THE NATIONAL SAMPLE SURVEY

TWENTYSEVENTH ROUND : OCTOBER 1972 - SEPTEMBER 1973

NUMBER 284

TABLES ON CONSUMER EXPENDITURE

The report entitled '' Tables on Consumer Expenditure was prepared by NSS Organisation under the guidance of the Governing Council for NSS Organisation, and that the views contained in the report are not necessarily those of the Government of India.

SECTION ONE

INTRODUCTION

1.1 This report presents results on consumer expenditure of the rural and urban population of different states and all-India, based on the data collected in the NSS 27th round.

1.2 The field work of twentyseventh round /started in the October 1972 and continued upto September 1973 covering a period of one year. Data relating to expenditure incurred by the sample household on domestic consumption for a period of 30 days preceding the data of survey were collected in † ; different blocks of the household schedule. No account, however, was taken of any expenditure incurred towards the productive enterprises of the household.

1.3 The survey extends over the whole of the rural and urban areas of the Indian Union except Ladakh district of Jammy and Kashmir, rural areas of Pal and Sumri tehsils of district Surguja and Bijapur, Dantewara, Konta and Narayanpur tehsils of district Bastar of Madhya Pradesh, Rajura Sironcha and Godh - Chiroli tehsils of district Chanda and Melghat tehsils of district Amarawati of Maharashtra, rural areas of Nagaland, disturbed villages of Tripura, rural areas of the Union Territory of Chandigarh, the union territories of Arunachal Pradesh, Andaman and Nicobar Islands, Mizoram, Laccadive, Minicoy and Amindivi islands and Dadra and Nagar Haveli.

1.4 The general sample design is stratified with two-stage selection within each stratum. The first stage units are 1971 census villages in rural areas and urban blocks in urban areas. The second stage units are households. A detailed account of sample design has been presented in section four of the report.

1.5 The field work relating to Central Sample was undertaken by the Directorate of Field Operation Division in all the states and Union Territories. All the states (except West Bengal) and Union Territories of Arunachal Pradesh, Delhi and Goa, Daman and Diu participated in the work of this survey. The collection of data for the state sample was the responsibility of the respective states. Tables presented in the report are based on Central Sample only except in Jammu and Kashmir which are based on State and Central samples pooled

1.6 In section 2 some important concepts used in this survey have been discussed. Section 3, deals with explanatory notes on the tables presented. Sample design and estimation procedure have been noted in section five.

1.7 Appendix I of the report contains detailed tables in respect of rural and urban areas for each of the states and Union Territories. Tables for all-India and Union Territories pooled, and for four big cities - Bombay, Calcutta, Delhi and Madras - separately and combined have also been presented.

1.8 The following tables have been presented in the report :

Table (1) : Distribution of sample households, percentage distribution of estimated number of households and estimated number of adult males, adult females and children per household by monthly per capita expenditure classes.

Table (2) : Quantity (0.00 kg.) and value (Rs. 0.00) of consumption per person for a period of 30 days of items of cereals, gram and cereal substitutes by monthly per capita expenditure classes.

Table (3) : Consumer expenditure (Rs.0.00) per person for a period of 30 days by broad groups of items and by monthly per capita expenditure classes.

1.9 The following system has been adopted in numbering the tables in the Appendix I. The left hand most digit refers to the table number listed above. The digits following the first point from left stand for individual state and union territories which are first arranged in alphabetic order of their names and are assigned serial numbers in that order. The alphabets 'R' and 'U' at the end stand for rural and urban respectively. For cities the serial numbers C_1, C_2, C_3, and C_4, are assigned to Bombay, Calcutta, Delhi and Madras respectively.

SECTION TWO

CONCEPTS AND DEFINITIONS

2.1 Some of the important concepts and definitions followed in the NSS ~~second~~ 27th round consumer expenditure survey are noted below :

2.2 Household : A household is a group of persons normally living together and taking food from common kitchen. A boarding house, a hotel boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government such as those in prisons, police quarters, cantonments, hospitals, relief camps are, however, excluded from the scope of the enquiry.

2.3 Cash Purchase : This refers to all cash purchase except for enterprise purposes of the household during the reference period. Only such purchases as are made for non-productive domestic purchase are considered for this purpose.

2.4 Homegrown Stock : Homegrown stock means commodities produced at home. This includes produce from leased in as well as from leased out land, produce from kitchen garden and livestock products and produce from household industries. Produce brought from village home is also included in this. The value of homegrown stock is imputed at ex-farm price or ex-factory rate which excludes any transporter distributive cost or middleman's profit or other trade margins.

2.5 Household Consumer Expenditure : Consumer expenditure of a household comprises all expenditures of incurred by the household during a reference period of 30 days preceding the date of survey exclusively towards its non-productive domestic consumption. Thus all expenses towards the enterprise activities of the household are excluded. Transfer payments in kind like loans advanced, charities, gifts and other payments in kind if any are not considered as consumer expenditure. But, any consumption out of transfer receipts in kind like borrowings, gifts, charities, perquisites received by the household, free collections and other receipts in kind if any is considered for determining total consumption of the household.

SECTION THREE

EXPLANATORY NOTES ON TABLES

3.1 In NSS consumer expenditure data are usually collected for a number of items of consumption. For the purpose of presenting the results, similar items have however, been lumped together to form 21 more or less homogeneous groups. The groups are : (1) cereals , (2) gram ; (3) cereal substitutes ; (4) pulse and products ; (5) milk and products , (6) edible oil ; (7) meat, fish and egg , (8) vegetables ; (9) fruits and nuts ; (10) sugar ; (11) salt ; (12) spices ; (13) beverages and refreshments , (14) pan, tobacco and intoxicants ; (15) fuel and light ; (16) clothing ; (17) foot-wear ; (18) miscellaneous goods and services , (19) rents : (20) taxes and (21) durable goods. Over and above, results are presented also for (i) food-total, (ii) non-food total and (iii) total consumer expenditure.

3.2 The groups of items of consumption as presented in the table are defined here in terms of their constituents :

1) cereals : rice, wheat, jowar, bajra, maize, barley, small millets, ragi and their products ;

2) gram : Bengal gram and its products ,

3) cereal substitutes cereal substitutes like tapioca, pea etc ;

4) pulse and products : arhar, tur, gram, moong, masoor, urd, khesari, pea and other pulses and their products ,

5) milk and products : liquid milk (cow, buffalo and goat) and other milk (condensed, powder etc.) ghee (cow and buffalo), butter, curd or dahi, ghol, lassi and other milk products ;

6) edible oil vanaspati, mustard oil, cocoanut oil, gingelly oil, groundnut oil, linseed oil, refined oil, other edible oils and oil seeds ;

7) meat, fish and eggs : meat (goat meat, mutton, beef, pork, buffalo meat and other meat), egg, poultry, fish (fresh and dried), bird and others ;

8) vegetables : potato, onion, tomato, brinjal, cabbage, cauliflower, root vegetables (arum, radish etc.) leafy vegetables and other vegetables ;

9) fruits and nuts : banana, orange, lemon, mango, cocoanut, guava, pineapple, grapes, other fresh fruits, cocoanut copra, groundnut, cashewnut, date, raisins, other dry fruits and nuts;

10) sugar : sugar (factory), khandsari sugar, gur (cane and others) candy, other sugars ;

11) salt : sea salt, rock salt and other salts ,

12) spices . turmeric, black pepper, pepper, dry chillies, green chillies, garlic, tamarind, ginger, curry powder, other spices;

13) beverages and refreshments tea (number of cups), tea leaf, coffee (no. of cups), coffee powder, other drinking beverages, biscuits, confectioneries etc., salted refreshments, prepared sweets, cooked meals, pickles, sauce, jams and jellies, other processed food items ,

14) pan, tobacco and intoxicants : pan leaf, pan finished, supari (betel nut, other ingredients for pan), biri, cigarettes, leaf tobacco, hookah tobacco, chewed, snuff, zarda, kiman, surti, other tobacco products, opium, ganja, toddy, country liquor, foreign liquor, other drugs and intoxicants ,

15) fuel and light . coke, coal, firewood, electricity, gas, dung cake, charcoal, kerosene, candle, matches, methylated spirit, other fuel and light ·

16) clothing : cotton (mill made, power loom, hand-loom, khadi), wool, art silk or rayon, pure silk and others including items of bedding and upholstery ;

17) footwear : boot, shoe, slipper, sandal, chappal, wooden sandal etc

18) miscellaneous goods and services · amusements (cinema, theatre etc.) education, medicine, toilet articles, sundry articles, consumer services, conveyances, etc ,

19) rents rents on residential house, residential land and other consumer goods (no imputation of rent for residential houses, owned by the sample household was made) ,

20) taxes : licence fees for keeping gun, radio, cycle, motor car etc., and other consumer taxes like municipal taxes, road taxes etc., excluding income tax ;

21) durable goods : furniture, musical instruments, ornaments, utensils and other equipments and their repairing expenses including the cost of maintenance of residential houses.

3.3 Estimates have been given by monthly per capita expenditure classes in rupees, arranged in ascending order of magnitude. The expenditure levels are grouped into 15 classes as follows :

srl.no.	monthly per capita expenditure class (in rupees)	srl.no.	monthly per capita expenditure class (in rupees)
(1)	(2)	(1)	(2)
1.	0-13	9	43-55
2.	13-15	10	55-75
3.	15-18	11	75-100
4.	18-21	12	100-150
5.	21-24	13	150-200
6.	24-28	14	200 and above
7.	28-34	15	all classes
8.	34-43		

The groups 0-13, 13-15 etc. stand for 0 to less than 13, 13 to less than 15, and so on.

sc/

SECTION FOUR
SUMMARY OF RESULTS

4.1. In this chapter a brief account of the results of household consumer expenditure survey of NSS 27th the round has been presented. For the purpose of comparing the results with those for which data were collected in the following as well as preceeding NSS rounds of surveys, some selected results have been presented for 25th, 27th and 28th NSS rounds. A detailed account of the estimates for 27th round has been shown in Tables in Appendix I.

4.2. Percentage distribution of households by level of per capita monthly expenditure

26 percent of estimated number of households in rural areas of the country in 27th round was found from Table (I) to have monthly per capita expenditure class between 0 to 28 rupees, the corresponding percentage in urban areas being 9. Again ~~50~~ 30 percent of households in rural areas and ~~55~~ 38 percent in urban areas were reported to have monthly per capita expenditure equal to or greater than Rs. 28 but less than Rs. 55, and about ~~66~~ 24 percent of households in rural areas and ~~45~~ 53 percent in urban areas had monthly per capita expenditure equal to or more than Rs. 55 as observed from data of 27th round.

....P/8.

sc/

Table(I) : Percentage distribution of households by monthly per capita expenditure classes in rural and urban areas of the country NSS 25th, 27th and 28th rounds.

Monthly per capita expenditure class (Rs)	Percentage of households					
	All India rural			All India urban		
	NSS rounds			NSS rounds		
	25th	27th	28th	25th	27th	28th

75 and above	5.90	11.26	18.74	26.93	34.85	41.53
55 and above	14.59	24.19	38.22	42.67	52.81	62.38
all classes	100.00	100.00	100.00	100.00	100.00	100.00

sc/

4.3. In rural areas of the country a fast decline in the concentration of households in the lower monthly per capita expenditure classes viz from 0-13 to 28-34, could be observed as against a rise in higher monthly per capita expenditure classes over NSS rounds viz, 25th, 27th and 28th rounds. In urban areas of the country the trend was same with the difference that the decline in the concentration of households continued upto the monthly per capita expenditure class 34 to 43 and thereafter an upward trend over three NSS rounds of surveys was observed for households having monthly per capita expenditure of Rs. 43 and more.

4.4. Average household size : In Table (II) number of persons per household has been presented. Information on number of adult males, adult females and children were collected in each round of survey and average size of household was estimated out of it. The 27th round data showed that there were 522 persons in the rural areas and 472 persons in urban areas of the country per every 100 households. Average household size for the rural and urban areas of the country was found to be of the same order.

4.5. Of the selected states (excluding states belonging to union territories and other smaller states) as given in the table Haryana showed the highest (more than 6), and Tamil Nadu the lowest (a little over 4) household size in rural areas of the country. Average household size was reported to be between 5 and 6 in the remaining states except Andhra Pradesh and Orissa where it was less than 5 in rural areas. Urban areas of Jammu and Kashmir reported highest average household size (more than 5.50) as against nearly 3.4 in Himachal Pradesh, which was the lowest of the selected states in urban areas. Rest of the states showed an average household size of less than 5 except in Haryana, Gujarat, Kerala, Madhya Pradesh, Mysore (now Karnataka), where it was more than 5.

sc/

....P/10.

Table(II) : Average size of household in rural and urban areas of selected states and All India : NSS 25th (July 70-71), 27th (Oct.72-Sept.73), 28th (Oct.73-June 74) rounds.

States	average size of household					
	all India rural			all India urban

sc/

....P/11.

4.6. Average monthly per capita expenditure :
Monthly consumer expenditure of a household was computed from data of expenditure on food and non-food items, collected in detail for estimating monthly per capita consumer expenditure for the country as a whole. In Table (III) estimates of average monthly per capita consumer expenditure are shown by items viz. food, non-food and total of food and non-food items for three different NSS rounds, 25th, 27th and 28th. It is seen from the table below that the average monthly per capita expenditure had an increasing trend over rounds both in rural and urban areas of the country. It was found to be Rs. 42 per month per person in rural areas and Rs. 63 in urban areas of the country in the 27th round of NSS, which was Rs.7 more and Rs.11 less than that of 25th and 28th rounds respectively in rural areas and, Rs. 11 ~~less~~ more and Rs. 7 ~~more~~ less respectively in urban areas of the country. Of the total monthly expenditure per person Rs. 31 was spent on items of food, which was 72 percent of the total expenditure. It is however seen that proportion of expenditure on food for household consumption per month per person did not show any appreciable change over rounds. In urban areas however the proportion of expenditure on food was found to be less (65 per cent) than that of rural areas of the country.

Table(III) : Consumer expenditure (Rs.0.00) per person per month on food and non-food items and percentage of expenditure on food to total expenditure in rural and urban areas of the country: NSS 25th rounds and 27th to 28th rounds

NSS round(survey-period)	per capita monthly expenditure (Rs.0.00) on			percentage of expenditure on food to total expenditure
	food	non-food	total	
(1)	(2)	(3)	(4)	(5)
	All India rural			
25th(July-1970-June 1971)	25.98	9.3	35.31	73.58
27th(Oct.1972-Sept.1973)	30.65	11.67	42.32	72.42
28th(Oct.1973-June 1974)	39.70	13.31	53.01	74.89
	All India urban			
25th(July 1970-June 1971)	34.04	18.81	52.85	64.41
27th(Oct. 1972-Sept.1973)	40.84	22.49	63.33	64.48
28th(Oct. 1973-June 1974)	47.93	22.84	70.77	67.72

4.7. Table(IV) below shows monthly per capita expenditure by items viz food, non-food and total, for some selected states based on data collected in the 27th round of NSS. Punjab reported to have the highest monthly per capita expenditure viz. Rs.75 as against Rs.35 in Orissa, the lowest of these states in the rural areas of the country. Monthly per capita expenditure of the states of Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Orissa, West Bengal, Kerala and Uttar Pradesh was found to be lower than or equal to Rs.42, monthly per capita expenditure of the rural areas of the country. The remaining states reported a monthly per capita expenditure of Rs. ~~40~~ 43/- and more.

sc/

....P/13.

Table(IV) : Monthly per capita consumer expenditure, by items in food, non-food and total of food and non-food and percentage of expenditure on food to total expenditure in rural and urban areas of each state and All India NSS 27th round. Oct.' 72 - Sept.' 73.

State	monthly per capita consumer expenditure (Rs.0.00) on						percentage of expenditure on food to total expenditure	
	food		non-food		total			
	rural	urban	rural	urban	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1. Andhra Pradesh	29.22	38.12	10.57	18.20	39.79	56.32	73.43	67.68

7. Jammu and Kashmir	32.32	33.23	15.38	16.15	47.70	49.38	67.76	67.29
8. Kerala	29.71	37.79	12.48	20.48	42.19	58.27	70.42	64.85
9. Madhya Pradesh	29.39	38.73	11.33	23.15	40.72	61.88	72.18	62.59
10. Maharashtra	28.07	45.71	13.48	29.13	41.55	74.84	67.56	61.08
11. Mysore(Karnataka)	32.73	38.91	11.80	18.98	44.53	57.89	73.50	67.21
12. Orissa	26.24	40.77	8.72	21.58	34.96	62.35	75.06	65.39
13. Punjab	46.71	47.22	27.91	30.66	74.62	77.88	62.60	60.63
14. Rajasthan	38.43	42.25	13.55	21.62	51.98	63.87	73.95	66.15
15. Tamil Nadu	27.14	34.61	10.56	19.41	37.70	54.02	71.99	64.07
16. Uttar Pradesh	29.52	35.43	12.60	18.12	42.12	53.55	70.09	66.16
17. West Bengal	29.77	43.78	8.68	24.45	38.45	68.23	77.43	64.16
18. All India	30.65	40.84	11.67	22.49	42.32	63.33	72.42	64.49

sc/

4.8. In urban areas of these states monthly per capita expenditure was found to be highest (Rs.108) in Himachal Pradesh and lowest (Rs.49) in Jammu and Kashmir. Monthly per capita expenditures in urban areas of the states like, Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Mysore (now Karnataka), Orissa, Tamil Nadu and Uttar Pradesh were reported to be lower than the All India level of monthly per capita expenditure in urban areas. On the contrary in urban areas of states like, Haryana, Maharashtra, Punjab and West Bengal it was higher than that of All India (Urban). Rajasthan in urban areas however showed an amount of monthly per capita expenditure equal to that of All India (urban).

4.9. The percentage of expenditure on items of food in these states varied between 62 and 78 in rural areas, and between ~~62~~ and 73 in urban areas. In rural areas of Andhra Pradesh, Kerala, Madhya Pradesh, Maharashtra, Orissa, Tamil Nadu, Uttar Pradesh and West Bengal monthly per capita expenditure on food was less than Rs.30., Where as urban areas of Andhra Pradesh, Jammu and Kashmir, Kerala, Madhya Pradesh, Mysore(now, Karnataka) and Uttar Pradesh reported an expenditure less than Rs.40 per person per month but more than Rs. 30.

4.10. Quantity of consumption of cereals : Table(V), shows quantity of consumption of selected items of cereals viz., rice, wheat and rest of the cereals together per person per month. In rural areas of the country on an average a person was reported to have consumed about 15 kilogram of cereals, against 11 kilograms in urban areas. Out of 15 kg. of cereals in rural areas about 7 kilogram of rice, 4 kilograms of wheat and rest (4 kilograms) of other cereals was consumed per person per month. In urban areas the total consumption of cereals was constituted of 5 kilogram of rice, 5 kilograms of wheat and the rest (2 kilogram) of other cereals.

sc/

....P/15.

Table(V) . Quantity of consumption of rice, wheat, other cereals and all cereals per person per month in rural and urban areas of the country: NSS 25th, 27th and 28th rounds.

NSS rounds (period of surveys)	quantity of cereals (0.00 kg)

4.11. States wise estimates of monthly per capita quantity of consumption of cereals for rural and urban areas of some 17 selected states are presented in Tables(VI A) and (VI B) respectively. It is seen that both in rural and urban areas of Jammu and Kashmir monthly per capita consumption of cereals in terms of quantity was highest viz. 10.79 kg. and 14.16 kg. and lowest in Kerala viz. 7.97 kg. and 8.17 kg. Per capita consumption of rice was highest viz. 14.53 kg. and 11.54 kg. respectively in both rural and urban areas of Assam. It was least in both rural and urban areas of Rajasthan viz. 0.26 and 0.47 kilogram respectively. For wheat the consumption was highest in Haryana viz. 12.51 kg. in rural areas and 10.33 kg. in urban areas. Lowest figures of monthly per capita consumption of wheat in terms of quantity was reported by the state of Tamil Nadu.

sc/ .....P/16.

Table(VIA): Quantity (Kg. 0.00) od consumption per person for a period of 30 days of selected items of cereals in rural areas : NSS 25th, 27th and 28th rounds.

SECTION FIVE

SAMPLE DESIGN AND ESTIMATION PROCEDURE

5.1 Sample design : The general sample design is stratified with two-stage selection within each stratum. The first-stage units are villages in rural areas and blocks in urban areas ; the second - stage units are households in both rural and urban areas. The sample design has been self-weighting for all the household enquiries at the region and sub-stratum level in rural areas. The sample villages and blocks have been selected in the form of usually two independent and interpenetrating sub-samples.

5.2 Sample size (Central Sample) : In the central sample there were 9088 villages in rural areas and 4832 blocks in urban areas.

5.3 Work Programme : The survey period of 12 months had been divided into 4 sub-rounds of 3 months each.

(i) Sample Design (Rural)

5.4 Sampling Frame . The frame used for selection was the list of villages as per 1971 population census.

5.5 Stratification . The country had been divided into 66 agricultural regions by grouping, within each state or Union Territory, districts having similar population density and crop pattern. Then within each region, strata had been formed by grouping tehsils which were (i) contiguous, (ii) having similar crop pattern, population density and altitude and (iii) having good transport and communication facilities amongst them. The rural population was about the same for each stratum within a region. The number of strata formed within a state/ Union Territory was given by the number of sample villages allocated to it divided by 24 except in Uttar Pradesh where each district was a stratum. The total number of rural strata was 392.

sc/

5.6 Allocation (Central Sample) : The all India sample size of 9088 villages had been allocated to the states on a joint consideration of their rural population, area under cereal crops and available investigator strength. This was modified to (i) ensure a minimum of 360 villages in a state excepting some smaller states and the Union Territories, (ii) take account of state-wise variation in work-load and number of investigators, and (iii) make the sample size a multiple of 24 in order to facilitate selection of 2 sub-samples of 12 villages.

5.7 Selection of villages : Two independent sub-samples of 24 villages each were selected circular symtematically with equal probability in each stratum, after arranging the tehsil of the stratum in a serpentine order. In each sub-sample, the villages with odd order of selection formed the Central Sample and the rest formed the State Sample. Thus generally, each sub-sample of a rural stratum contained 12 sample villages. But a sub-sample had only 8 villages in Delhi, 3 villages in central sample of Goa, Daman and Diu. And in Uttar Pradesh, the sub-sample size varied from stratum to stratum and also between central and state samples.

5.8 Selection of households : All households in a sample village/hamlet group were divided into three sub-strata on the basis of their means of livelihood as follows : (1) Self-employed in non - agriculture, (2) rural labour, and (3) others. On an average, 12 sample households were selected in a sample village (2, 5 and 5 households, on the average from sub-strata 1, 2 and 3 respectively). Sampling of households was done linear systematically and independently from each sub-stratum using the interval and random start

specified for the purpose so as to make the design self-weighting at the region level for each sub-stratum.

(ii) Sample Design (urban)

5.9 Sampling Frame : The list of NSS ~~xxxxx~~ Urban Frame Survey (UFS) blocks supplemented by the list of 1971 census blocks (1961 census blocks in Tamil Nadu and West Bengal) had been used as the sampling frame.

5.10 Stratification : In each state/Union Territory, towns with 1971 census population less than 50,000 formed stratum 1, and the remaining towns and cities formed stratum 2 except the four big cities viz., Bombay, Calcutta, Delhi and Madras. Each one of the formed stratum 3 of its respective state. The total number of urban strata in all-India was 50.

4.11 Allocation (Central Sample) The all-India sample size of 4832 blocks had been allocated to the states in proportion to their 1961 census urban population. The allocations had been modified (i) to ensure a minimum of 144 sample blocks in a state excepting some smaller states and Union Territories, (ii) to take account of state wise variation of work-load and number of investigators, and (iii) to make the allocations multiples of 8 in order to facilitate having 2 sub-samples and 4 sub-rounds. Sample size for a state was allocated to the strata in it in proportion to their total urban population ; final stratum allocations also were made multiples of 8.

5.12 Selection of blocks . In each stratum blocks had been selected circular systematically with probability proportional to size (PPS), the size of a block being taken as its population rounded off to the next multiple of 1000. Generally, the blocks had been selected in the form of two independent and interpenetrating sub-samples of equal size , within each sub-sample the central sample and the state sample were formed as for sample villages.

4.13 Selection of households : All households of a sample block, sub-block were divided into two sub-strata : (1) self-employed and (2) not self-employed. Further, the households of sub-stratum 1 were arranged in two classes viz., (a) self-employed in manufacture, and (b) self-employed in other activities. Then from each sub-stratum households were sampled linear systematically using the interval and random start specified in the sample list. The

average sample size for a block was 12 households - 6 from each sub-stratum.

5.14 Estimation Procedure :

Notations

s : subscript for s^{th} stratum in a state

t : subscript for t^{th} sub-stratum within a sample village/block

i : subscript for i^{th} sample village/block/selected part of village or block.

j : subscript for j^{th} sample household.

k : number of strata in the state.

n_s : number of selected villages/blocks in a sub-sample of the sth rural /urban stratum for the whole round.

h : number of households selected for the enquiry.

y : value of the characteristic.

Y the estimate of the state total for the characteristic y in consumer expenditure schedule from a sub-sample for the whole round, is given by for rural areas is,

$$Y = \sum_{t=1}^{3} \sum_{s=1}^{k} M_{st} \sum_{i=1}^{ns} \sum_{j=1}^{hsit} y_{sitj} .$$

Where M_{st} is the constant multiplier for the sth stratum and t^{th} sub-stratum. It may be noted that M_{st} is same for all strata within a region. For urban areas Y is given by,

$$Y = \sum_{t=1}^{2} M_t \sum_{s=1}^{k} \sum_{i=1}^{ns} \sum_{j=1}^{hsit} y_{sitj}$$

Where M_t is the statewise constant multiplier for the tth sub - stratum.
