प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) द्वारा किए जाने वाले अनिगमित गैर-कृषिगत उद्यमों के सर्वेक्षण विनिर्माण, व्यापार तथा अन्य सेवा क्षेत्र (निर्माण को छोड़कर) में अनिगमित गैर-कृषिगत उद्यमों की आर्थिक और प्रचालनात्मक विशेषताओं के विभिन्न संकेतकों के बारे में राष्ट्रीय तथा राज्य स्तर पर आंकड़ों के बुनियादी स्रोत हैं । इन आंकड़ों का उपयोग नियोजन, नीतिनिर्माण, निर्णय में सहायता तथा विभिन्न सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं और विद्वानों द्वारा सांख्यिकीय प्रक्रियाओं में इनपुट के रूप में किया जाता है । 67वें दौर के दौरान (जुलाई 2010 से जून 2011), राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) ने विनिर्माण, व्यापार तथा अन्य सेवा क्षेत्र (निर्माण को छोड़कर) में अनिगमित गैर-कृषिगत उद्यमों की आर्थिक तथा प्रचालनात्मक विशेषताओं पर एक अखिल भारतीय उद्यम सर्वेक्षण किया था । इस सर्वेक्षण का क्षेत्र कार्य राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया था जिसमें केन्द्रीय प्रतिदर्शों को सम्मिलित किया गया था । अधिकांश राज्य सरकारों ने भी समान प्रतिदर्श आकार के आधार पर इस सर्वेक्षण में सहभागिता की थी ।

सर्वेक्षणों के परिणाम एनएसएसओ द्वारा कई रिपोर्टों में प्रकाशित किए जाते हैं जो केन्द्रीय प्रतिदर्श आंकड़ों पर आधारित होते हैं । एनएसएसओ का यह निरन्तर प्रयास रहा है कि वह अपने सर्वेक्षणों के परिणामों को शीघ्रातिशीघ्र प्रकाशित करे ताकि इसके प्रयोक्ताओं की आवश्यकताओं को समय पर पूरा किया जा सके । इस लक्ष्य को ध्यान में रखते हुए तथा सर्वेक्षण के मुख्य परिणामों को रिपोर्ट जारी होने से पहले उपलब्ध कराने के मद्देनजर, एनएसएसओ ने जून 2012 में अनिगमित गैर-कृषिगत उद्यमों पर एनएसएस के 67वें दौर के मुख्य परिणामों को जारी किया । वर्तमान रिपोर्ट, श्रृंखला में दूसरे स्थान पर होते हुए, भारत तथा राज्यों में केन्द्रीय प्रतिदर्श पर आधारित आनिगमित गैर-कृषिगत उद्यमों की कुछ प्रचालनात्मक विशेषताओं के अनुमान प्रस्तुत करती है ।

एनएसएसओ के अलग-अलग प्रभागों द्वारा विभिन्न कार्यकलापों के बेहतरीन नियोजन और निष्पादन तथा एनएसएस के सहायक अधिकारियों और स्टाफ की कड़ी मेहनत से यह प्रतिवेदन वर्तमान रूप में संभव हो सका है । मैं राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के सदस्यों तथा एनएसएस के 67वें दौर के कार्यदल समूह के सदस्यों को उनके रचनात्मक सुझाव और मार्गदर्शन के लिए धन्यवाद देता हूँ जिससे रिपोर्ट में सुधार लाने में मदद मिली ।

आशा है कि यह प्रतिवेदन योजनाकारों, नीतिनिर्माताओं, शिक्षाविदों तथा शोधकर्ताओं के लिए उपयोगी होगा । इसकी विषय-वस्तु एवं इसके दायरे में सुधार हेतु सुझावों का स्वागत है ।

Preface

The unincorporated non-agricultural enterprise surveys conducted by NSSO are the primary source of data on various indicators of economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction) at national and state level. These are used for planning, policy formulation, decision support and as an input for further statistical exercises by various Government organizations, academicians, researchers and scholars. During 67th round (July 2010 to June 2011), National Sample Survey Office (NSSO) carried out an all-India enterprise survey on economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction). Field work of the survey covering the central samples was carried out by the Field Operations Division (FOD) of NSSO. Most of the State Governments also participated in the survey on matching sample size basis.

The results of the surveys are brought out by the NSSO in a number of reports, based on its central sample data. It has been the persistent endeavour of NSSO to bring out its survey results at the earliest to meet the timely requirements of its users. With that aim in mind and with a view to making available the salient results of the survey, well in advance of the release of its reports, the NSSO released Key Results of NSS 67th round on unincorporated non-agricultural enterprises in June 2012. The present report, being second in the series, presents the estimates of some operational characteristics of unincorporated non-agricultural enterprises in India and States based on central sample.

This report in its present form has been possible because of the efforts made by the different Divisions of NSSO in meticulous planning and execution of various activities involved and the hard work done by the supporting officials and staff of NSSO. I am thankful to members of National Statistical Commission (NSC) and Working Group of NSS 67th round for their constructive suggestion and guidance which helped in improving the report.

It is hoped that the report will be found useful by planners, policy makers, academicians and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

67वें दौर के सर्वेक्षण के लिए एक स्तरीकृत बहुचरणीय अभिकल्प अपनाया गया है । प्रथम चरण इकाइयां (प्र.च.इ.) ग्रामीण क्षेत्र के लिए जनगणना ग्राम (केरल के मामले में पंचायत वार्ड) और नगरीय क्षेत्र में नगरीय ढांचा सर्वेक्षण (न.ढा.स.) खंड होंगे । दोनों क्षेत्रों में अंतिम चरण इकाइयां (यू.एस.यू.) उद्यम होंगे ।

ग्रामीण क्षेत्रों के लिए जनगणना 2001 परिवारों की सूची को प्रतिदर्श ढांचे के लिए प्रयोग किया गया है । केवल में, गणना 2001 के अनुसार पंचायत वार्डों की सूची को ढांचे के रूप में प्रयोग किया गया क्योंकि ऐसे वार्डों की सूची आर्थिक गणना 2005 ढांचें में उपलब्ध नहीं था । नगरीय क्षेत्र में, जनगणना 2001 के अनुसार 10 लाख से अधिक जनसंख्या वाले 26 शहरों के लिए आ.ग.-2005 ढांचे का प्रयोग किया गया । यद्यपि मुम्बई 10 लाख से अधिक वाला शहर है, परन्तु पहचान की समस्या के कारण आर्थिक गणना-2005 ढांचा का प्रयोग मुम्बई के लिए नहीं किया गया । अन्य शहरों नगरों (मुम्बई सहित) के लिए न.ढा.स. ढांचा (2002-07 चरण या यदि वह उपलब्ध न हो तो 2002-2007 से पूर्व अंततम उपलब्ध चरण) का प्रयोग किया गया ।

Highlights

A stratified multi-stage design had been used in 67th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were enterprises in both the sectors.

Census 2001 list of villages had been used as the sampling frame for rural areas. In Kerala, list of panchayat wards as per Census 2001 was used as frame since list of such wards were not available as per Economic Census (EC) - 2005 frame. In the urban sector, EC-2005 frame was used for 26 cities with population more than a million as per census 2001. Although Mumbai was a million plus city, EC-2005 frame could not be used for Mumbai because of identification problem. For other cities/towns (including Mumbai), UFS frame (2002-07 phase or latest available phase prior to 2002-07 if it was not available) was used.

The survey was conducted in 8296 villages out of a sample allocation of 8380 villages selected from 647970 villages as per census 2001 and in 7602 urban blocks out of a sample allocation of 7620 urban blocks selected from 441538 urban blocks as per UFS frame. Information was collected from about 3.34 lakh enterprises engaged in the manufacturing, trade and other services activities throughout the country. All unincorporated non-agricultural enterprises, excluding construction, were listed; of which a total of 334474 were selected for data collection. Of those 334474 enterprises, 162375 were in rural areas and 172099 were in urban areas. About 49 per cent of these enterprises surveyed belonged to the rural sector. Moreover, 66 per cent of the total surveyed enterprises were Own Account Enterprises (OAEs).

- ✓ During 2010-11, 5.77 crore[1] unincorporated non-agricultural enterprises excluding construction were estimated at the all-India level. Out of them, 30 percent enterprises were engaged in manufacturing, 36 percent enterprises were in trading and 34 percent enterprises were in service sector.

- ✓ Of the total number of unincorporated non-agricultural enterprises estimated, about 54 per cent were located in rural areas and 46 per cent were located in urban areas

[1] (1 crore = 10^7)

- ✓ OAEs had the dominant share (85%) of unincorporated non-agricultural enterprises under survey coverage. At all-India level, OAEs outnumber establishments in all the three broad activity categories namely 'Manufacturing' (84%), 'Trade' (86%) and 'Other Services' (84%).

- ✓ Out of 4.9 crore OAEs, 58 percent OAEs were in rural sector against 42 percent OAEs in urban area. However Establishments were higher in urban areas. Out of 89 lakh establishments under survey coverage, urban area has a share of 70 percent establishments against 30 percent in rural area.

- ✓ 'Trade' had the highest percentage of enterprises for both rural (34%) and urban (38%) sectors and also for combined sector (36%). 'Other Services' had next highest share (34%) of enterprises among broad activity categories followed by 'Manufacturing' (30%).

These five states accounted for 53.6 percent of unincorporated non-agricultural enterprises at all-India level.

- ✓ OAEs had dominant share of workers under survey coverage in rural India. At all-India level, workers engaged in OAEs outnumber those engaged in establishments in all the three broad activity categories namely, manufacturing (60%), trade (72%) and service (63%). However, urban areas recorded slightly higher share of workers in establishments over OAEs in 'Manufacturing' (53%) and 'Other Services' (51%).

- ✓ The sector 'Other Services' had the highest percentage of workers (36%) for rural, urban and also for rural & urban combined (36%) areas. At all India level 'Trade' and 'Manufacturing' had almost equal share (32%) of workers.

- ✓ Uttar Pradesh had the highest share in total number of workers (15%) followed by Andhra Pradesh (11%), West Bengal (11%), Maharashtra (9%), and Tamil Nadu (8%). These five states accounted for 54 percent of total workers of the unincorporated non-agricultural sector excluding construction.

- ✓ Proprietary enterprises (i.e. enterprises owned by a single household) had the highest share (96%) of unincorporated non-agricultural enterprises, out of which only 17 per cent of the owner proprietors were females and the rest were males. Only two per cent of enterprises were operated on a partnership basis.

About 99 percent of the total unincorporated non-agricultural enterprises were perennial while the seasonal and casual enterprises together constituted a little more than 1 percent of the total number of enterprises. The distribution of unincorporated non-agricultural enterprises in respect of nature of operation does not differ significantly between rural and urban areas, or between OAE and establishments.

- ✓ About 93 percent of the unincorporated non-agricultural enterprises had worked for 9 months or more during the last 365 days while about 2 percent of the enterprises under survey coverage had operated for less than a quarter of the same period.

Only 5 percent of unincorporated non-agricultural enterprises had worked less than 4 hours in a normal day.

- ✓ 85 percent unincorporated non-agricultural enterprises run the business at fixed location either within the household premises or outside and about 15 percent operated their business without any fixed location. Around 2 percent of the enterprises under survey coverage operated without any structure but had a fixed location while 10.8 percent unincorporated non-agricultural enterprises were operated as street vendors and 4 percent were operated in mobile market.

- ✓ At all-India level, about 90 percent of unincorporated non-agricultural enterprises were not maintaining any sort of accounts. This proportion was nearly 94 percent for OAEs and 68 percent for establishments.

- ✓ 62 percent of unincorporated non-agricultural enterprises were owned by persons belonging to Scheduled Tribes (ST), Scheduled Castes (SC) and Other Backward

Classes (OBC). This proportion was more in case of OAEs (65%) than establishments (47%). Again, more OAEs in the rural areas (69%) were run by entrepreneurs from the backward sections than OAEs in urban areas (58%).

- ✓ Private Non Profit Institutes constituted roughly 1 percent of all establishments at all-India level and their presence among OAEs was very low (0.3%).

- ✓ 29 percent of all enterprises under survey coverage were registered under any Act or with any registration authority. The overall proportion of registered enterprises under survey coverage was higher in urban areas (39%) as compared to rural areas (21%). 'Manufacturing' sector (86%) had the highest percentage of unregistered enterprises followed by 'Trade' (68%) and 'Other Services' (61%).

- ✓ 66 percent of all unincorporated non-agricultural enterprises reported to not having faced any specific problem in their day-to-day operation. 'Shrinking or fall of demand' (11%) and 'non recovery of financial dues' (9%) were the two main problems faced by the enterprises.

- ✓ Only 6 percent of unincorporated non-agricultural enterprises had undertaken at least some work on contract basis. This percentage was higher for manufacturing enterprises (20%).

- ✓ About 3 percent of unincorporated non-agricultural enterprises pursued mixed activities. Trading enterprises had pursued more mixed activities in comparison to manufacturing and 'other services' enterprises and OAEs had much more share than establishment for each of three broad activity categories.

- ✓ 2 percent of unincorporated non-agricultural enterprises had reported receiving any assistance from government. About 1 percent of unincorporated non-agricultural enterprises received assistance from the government in the form of financial loans.

Chapter One

Introduction

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. During the period 1st July 2010 to 30th June 2011, NSSO carried out an all-India enterprise survey on economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction).

1.1.2 The household-based non-agricultural activities, irrespective of their scale of operations, were covered in the surveys of NSSO in the early periods. The non-household based units in the unorganised sector thus remained outside the coverage, primarily due to non-availability of a comprehensive frame and background information needed for formulating an efficient sampling design. The need for auxiliary information on areas of concentration of enterprises for stratification purpose was strongly felt for developing more efficient sampling designs. This demand ultimately culminated in the conduct of periodic Economic Censuses (EC), which provided the frame for the follow-up surveys on non-agricultural enterprises including the non-household based units in the service sector.

1.1.3 With the launching of the first EC in 1977, the follow-up surveys of EC on unorganised manufacturing and service sector enterprises generally used the village and block level information on number of enterprises/workers as per the EC for selection of villages and urban blocks in the first stage. The approach of data collection from enterprises was also changed from the 'household approach' used earlier (i.e. prior to the launching of EC) to the 'site approach' wherever such sites existed.

1.1.4 Last surveys of enterprises on trade, unorganised manufacturing and service sectors (excluding trade and construction) were conducted during 53rd round (January – December 1997), 62nd round (July 2005 – June 2006) and 63rd round of NSS (July 2006 – June 2007) respectively. Other enterprise surveys carried out in between were 55th round (informal sector enterprises, 1999-2000), 56th round (unorganised manufacturing, 2000-2001) and 57th round (unorganised service sector excluding trade, finance and construction, 2001 –2002).

1.2 Objective of the unincorporated non-agricultural enterprises survey

1.2.1 The main objective of the unincorporated non-agricultural enterprise surveys conducted by NSSO was to get estimates of various economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction) at national and State level. The survey was designed to estimate value of key characteristics per enterprise like average no. of workers, fixed assets, outstanding loans, total receipts, total operating expenses and gross value added separately for 'Own Account Enterprises (OAEs)' and 'establishments'. Information on various operational characteristics like ownership, nature of operation, location, status of registration etc., were also collected to have an insight into economic scenario of the unincorporated non-agricultural enterprises in the country. These economic and operational indicators are required for planning, policy and decision making at various levels, both within the government and outside. These aspects of the unorganised enterprise sector are captured in detail in the present NSS survey and estimates are generated.

1.2.2 The enterprises covered in NSS 67th round were divided into three broad industry groups, viz. (i) manufacturing, (ii) trade and (iii) other service sector enterprises. Under the above sectoral coverage, enterprises were categorised into two types, the first type being Own Account Enterprises (OAE) i.e. those enterprises that do not employ hired workers on a fairly regular basis in the reference year and the second type being Establishments employing at least one hired worker on a fairly regular basis in the reference year. The eligibility criteria for an enterprise to be covered in the survey was at least 30 days of operation (15 days of operation for seasonal enterprises / SHGs) in the reference year i.e. "last 365 days preceding the date of survey".

1.3 **Survey outline of unincorporated non-agricultural survey**

1.3.1 Geographical coverage: The survey covers the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. Leh (Ladakh) and Kargil districts of Jammu & Kashmir did not have any separate sample first-stage units (FSUs) for 'central sample'. For these two districts, sample FSUs drawn as 'state sample' was considered as central sample.

1.3.2 Sub round: The survey period of one year was divided into four sub-rounds of three months' duration each as follows:

sub-round 1 :	July - September 2010
sub-round 2 :	October - December 2010
sub-round 3 :	January - March 2011
sub-round 4 :	April - June 2011

In each of these four sub-rounds equal number of sample first stage units (FSUs) i.e. villages/ blocks were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Every attempt was made to survey each of the FSUs during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep and rural areas of Arunachal Pradesh and Nagaland.

1.4 **Subject Coverage:**

1.4.1 The coverage of NSS 67th round (July 2010 – June 2011) was non-agricultural unincorporated enterprises belonging to three sectors viz., Manufacturing, Trade and Other Services. The survey considered the following broad categories of enterprises:

(a) Manufacturing enterprises excluding those registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948.

(b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948.

(c) Enterprises engaged in cotton ginning, cleaning and baling (code 01632 of National Industrial Classification (NIC) - 2008) excluding those registered under Factories Act.

(d) Enterprises manufacturing bidi and cigar excluding those registered under bidi and cigar workers (condition of employment) Act, 1966.

(e) Trading enterprises.

(f) Other **S**ervice sector enterprises excluding construction.

The Ownership categories of enterprises under coverage in (a) to (f) above was

(a) Proprietary and partnership enterprises.

(b) Trusts, Self-help groups (SHGs), Non-Profit Institutions (NPIs), etc.

And the following ownership categories of enterprise*s* were excluded from the coverage of the survey:

(a) Enterprises which are incorporated i.e. registered under Companies Act, 1956.

(b) Government and public sector enterprises.

(c) Cooperatives.

1.4.2 *Outline of sample design:* A stratified multi-stage design had been adopted for the 67th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were enterprises in both the sectors. In case of large FSUs, one

intermediate stage of sampling was done by the selection of three hamlet-groups (hgs)/ sub-blocks (sbs) from each large rural/ urban FSU.

1.4.3 Sampling frame: Census 2001 list of villages were used as the sampling frame for rural areas. Auxiliary information such as number of enterprises, number of workers, type of enterprises, activities of enterprises, etc. available from EC-2005 frame were used for stratification, sub-stratification and selection of enterprises. In Kerala, list of panchayat wards as per Census 2001 were used as frame since list of such wards is not available as per EC 2005 frame.

In the urban sector, EC-2005 frame was used for 26 cities with population more than a million as per census 2001. Although Mumbai is a million plus city, EC-2005 frame was not used for Mumbai because of identification problem for IV unit/blocks in the EC for the city. For other cities/towns (including Mumbai), UFS frame (2002-07 phase or latest available phase prior to 2002-07 if it was not available) was used.

1.4.4 Schedules of enquiry: During this round, the following two schedules of enquiry were canvassed, viz. Schedule 0.0: list of households and non-agricultural enterprises and Schedule 2.34: unincorporated non-agricultural enterprises (excluding construction). The detail concepts and definition of the main schedule (i.e. Schedule 2.34) is discussed in Chapter Two while in Appendix C, the schedule is reproduced.

1.4.5 Out of the total number of 16000 FSUs (8380 villages and 7620 urban blocks) allotted for the central sample, 15898 FSUs (8296 villages and 7602 urban blocks) could be surveyed at the all-India level for canvassing Schedule 2.34. The total number of enterprises surveyed was 334474 (162375 in rural areas and 172099 in urban areas). The State-wise detailed allocation of FSU and corresponding numbers of surveyed FSU is given in Table A1 below. The sample design and estimation procedure used for the survey is given in Appendix B document.

1.5 NSS 67th round Reports on unincorporated non-agricultural enterprises

1.5.1 The results of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the central sample data. Corresponding to NSS 67th round survey, NSS first published a Key Report in June 2012 covering key indicators of unincorporated non-agricultural enterprises (excluding construction). Besides this key report the results are planned for release in other two reports covering ‘operational characteristics’ and ‘economic characteristics’ of unincorporated non-agricultural enterprises (excluding construction) respectively. The present report discusses the

'operational characteristics' of unincorporated non-agricultural enterprises (excluding construction) in details.

1.6 Contents of the present report:

1.6.1 This report contains Three Chapters and Three Appendices. Following the present introductory chapter (Chapter One), Chapter Two outlines different concepts and definition that were used during the survey. Summary findings on operational characteristics of unincorporated non-agricultural enterprises (excluding construction) are presented in Chapter Three. The coverage of the survey in terms of NIC 2008 and notations of different activities covered in the survey are given in Table A2 and A3 respectively.

1.6.2 The detailed tables elaborating the results for all-India and States are given in Appendix A. An outline of the sample design and estimation procedure is presented in Appendix B while Appendix C gives a facsimile of the schedule canvassed in the survey.

1.6.3 The estimates of different indicators related to operational characteristics of unincorporated non-agricultural enterprises (excluding construction) have been presented for all the States and UTs. While using the estimates for the smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates.

Chapter Two

Concepts and Definitions

2.1 Important concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.2 **Population coverage:** The following rules regarding the population/households covered were followed while visiting households for the purpose of listing of enterprises:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but residential staff therein was included during listing. The persons of the first category were considered as normal members of their parent households. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence were not considered. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were taken into account.
3. Foreign nationals were not considered, nor do their domestic servants, if by definition the latter belong to the foreign national's household. If, however, an enterprise was run by a member of such household located within the premises of the household or without any fixed premises, it was listed as an enterprise.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) was kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, were covered.
5. Orphanages, rescue homes, *ashrams* and vagrant houses were outside the survey coverage but enterprises run by them and located within the premises of those institutions were considered. However, persons staying in old age homes, students staying in *ashrams*/ hostels and the residential staff (other than monks/ nuns) of these ashrams were treated as forming households (as per the standing practice in NSS) for the purpose of identifying enterprises through such households. For orphanages, although orphans were not covered, the persons looking after them and staying there were considered as forming households.

2.3 **House:** Every structure, tent, shelter, etc. was considered as a house irrespective of its use. It might have been used for residential or non-residential purpose or both or even it might have been vacant.

2.4 **Household:** A group of persons who normally lived together and taking food from a common kitchen constituted a household. It included temporary stay-aways (those whose total period of absence from the household was expected to be less than 6 months) but excluded temporary visitors and guests (expected total period of stay less than 6 months). Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedures were adopted as guidelines.

(i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constituted a single-member household. If, however, a group of persons among them normally pool their income for spending, they were together treated as forming a single household. For example, a family living in a hotel was treated as a single household.

(ii) In deciding the composition of a household, more emphasis was given on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person was different from the place of boarding, he or she was treated as a member of the household with whom he or she resided.

(iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) was considered as a member of the household with whom he or she resided even though he or she was not a member of the same family.

(iv) When a person sleeps in one place (say, in a shop or in a room in another house because of space shortage) but usually took food with his or her family, he or she was treated not as a single member household but as a member of the household in which other members of his or her family stayed.

(v) If a member of a family (say, a son or a daughter of the head of the family) stayed elsewhere (say, in hostel for studies or for any other reason), he/ she was not considered as a member of his/ her parent's household. However, he/ she were considered as a single member household if the hostel is listed.

2.5 **Public works:** 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as National Rural Employment Guarantee Act (NREG) programme, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc.

2.6 **National Rural Employment Guarantee Act (NREGA):** The National Rural Employment Guarantee Act, 2005 (NREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to

every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government. If an applicant for employment under the scheme is not provided employment within 15 days of receipt of his application seeking employment or from the date on which employment has been sought, the applicant will be entitled for getting daily unemployment allowances.

2.7 **Enterprise:** An enterprise is an undertaking which is engaged in the production and/ or distribution of some goods and/ or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

2.8 **Non-agricultural enterprise:** All enterprises covered under Sections ‘C’ to ‘S’ of NIC-2008 are "non-agricultural enterprises". All non-agricultural enterprises will be henceforth referred to as NAE for this survey.

2.9 **Unincorporated non-agricultural enterprises:** Non-agricultural enterprises which are not incorporated (i.e. registered under Companies Act, 1956) were covered in the survey. Further, the domain of ‘unincorporated enterprises’ excluded (a) enterprises registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948 or bidi and cigar manufacturing enterprises registered under bidi and cigar workers (condition of employment) Act, 1966, (b) government/public sector enterprises and (c) cooperatives. Thus the coverage was restricted primarily to all household proprietary and partnership enterprises. In addition, Self Help groups (SHGs), Private Non-Profit Institutions (NPIs) including Non-Profit Institutions Serving Households (NPISH) and Trusts were also covered.

2.10 **Manufacturing Enterprise**: A manufacturing enterprise was a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. The units primarily engaged in maintenance and repair of industrial, commercial and similar machinery and equipment, which were, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods were also included.

Thus all activities covered by NIC – 2008 divisions 10 to 33 of NIC- 2008 were considered as 'manufacturing' for the purpose of the survey. In addition, the activity of cotton ginning, cleaning

and baling (NIC - 2008 code 01632) was covered in the present survey. However the production of goods for the sole purpose of domestic consumption was not considered as manufacturing.

2.11 **Trading Enterprise:** A trading enterprise is an undertaking engaged in trade. Trade is defined to be an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. Thus all the trading activities, both wholesale and retail (perennial, casual or seasonal) listed under NIC-08 divisions 45 to 47 was treated as trade in this survey. The activities of intermediaries who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission was also treated as trade. The purchase and sale agents, brokers listed under NIC-08 division and auctioneers listed under NIC group were also covered in this survey.

2.12 **Servicing Enterprise**: A servicing enterprise or service sector enterprise is engaged in activities carried out for the benefit of a consuming unit and typically consists of changes in the condition of consuming units realized by the activities of servicing unit at the demand of the consuming unit. It is possible for a unit to produce a service for its own consumption provided that the type of activity is such that it could have been carried out by another unit. Some examples of changes that a producer of service brings about in the condition of consumers of service are:

a) Changes in the condition of consumer's goods: the producer works directly on goods owned by the consumer by transporting, cleaning, repairing or otherwise transforming them;
b) Changes in the physical condition of persons: the producer transports the persons, provides them with accommodation, provides them with medical or surgical treatments, improves their appearance etc;
c) Changes in the mental condition of persons: the producer provides education, information, advice, entertainment or similar services;
d) Changes in the general economic state of the institutional unit itself: the producer provides insurance, financial intermediation, protection, guarantees, etc.

All activities under NIC – 2008 Sections D – U except section G (trade) are considered as service activities other than trade. However, sections D (Electricity, gas, steam and air conditioning supply), F (Construction), O (Public administration and defence; compulsory social security), T (Activities of households as employer; undifferentiated goods and services producing activities of households for own use) and U (Activities of extraterritorial organisations and bodies) were excluded from coverage of this survey. Only unincorporated enterprises in the service sector under coverage were surveyed. Among these also**,** activities under certain NIC - 2008 codes, viz. 36 (water collection, treatment and supply), 491 (transport via railways), 49212 (urban or suburban tramways), 49213 (urban or suburban underground or elevated railways), 493 (transport via pipeline), 51 (air transport), 641 (monetary intermediation), 642 (activities of

holding companies), 6611 (Administration of financial markets), 774 (Leasing of nonfinancial intangible assets), 942 (activities of trade unions), 9491 (activities of religious organisations [although activities of individuals are covered]), 9492 (activities of political organisations) were kept out of survey coverage.

2.13 **Financial enterprise**: A financial enterprise is a servicing enterprise that is principally engaged in financial intermediation or in auxiliary financial activities which are closely related to financial intermediation. Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for the purpose of acquiring financial assets by engaging in financial transactions on the market. The role of financial intermediaries is to channel funds from lenders to borrowers by intermediating between them.

2.14 **Household Enterprise:** A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.15 **Non-household Enterprise:** Non-household enterprises are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc. Non-household enterprises covered under public sector were not included in the current survey.

2.16 **Own-account Enterprise**: An enterprise, which is run without any hired worker employed on a fairly regular basis[1], is termed as an own account enterprise.

2.17 **Establishment**: An enterprise which is employing at least one hired worker on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an enterprise are considered as hired workers.

2.18 **Non-directory establishment (NDE):** An establishment having one to five workers (household and hired taken together) is termed as a non-directory establishment.

2.19 **Directory establishment (DE):** A directory establishment is an establishment, which has got six or more workers (household and hired taken together).

[1] "fairly regular basis" means the major part of the period when operation(s) of an enterprise are carried out during a reference period.

2.20 **Perennial enterprise:** Enterprises that are run more or less regularly throughout the year are called perennial enterprises.

2.21 **Seasonal enterprise:** Seasonal enterprises are those, which are usually run in a particular season or fixed months of a year.

2.22 **Casual enterprise:** Enterprises that are run occasionally, for a total of at least 30 days in the last 365 days, are called 'casual enterprises'.

2.23 **Classification of enterprises based on ownership**:

(i) *Proprietary*: When an individual is the sole owner of an enterprise it is a proprietary enterprise. Own account production of fixed assets for own use, when produced by a single member, was classified as proprietary enterprise.

(ii) *Partnership*: Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. There may be two or more owners, belonging to the same or different households, on a partnership basis, with or without formal registration (where there is a tacit understanding about the distribution of profit among the so-called partners). Own account production of fixed assets, when produced by two or more members belonging to the same or different households will be classified as partnership enterprises. Thus, own account production of fixed assets by a group of households for community use was classified as partnership enterprise. The partnership enterprises registered under Limited Liability Partnership (LLP) Act, 2008 were excluded from coverage of the survey. Also, partnership enterprises registered under Factories Act, 1948 was outside the survey coverage.

(iii) *Government/public Sector Enterprise*: An enterprise, which is wholly owned/ run/managed by Central or State governments, quasi-government institutions, local bodies like Panchayat, Zilla Parisad, City Corporation, Municipal authorities, etc., autonomous bodies like Universities, Education boards, and institutions like schools, libraries etc. set up by the government, panchayat, etc., was considered as public sector enterprise. Enterprises owned/ managed by a single or a group of private persons with no participation of the Government, local body etc. in it, both in terms of management and shares, was considered as private sector enterprises. An enterprise was not considered as a public sector enterprise if it is run on a loan granted by government, local body, etc.

(iv) *Private Limited Company*: Private company means a company which by its articles:

(a) restricts the right to transfer its shares, if any,

(b) limits the number of its members to fifty not including-

(i) persons who are in the employment of the company, and

(ii) persons who, having been formerly in the employment of the company, were members of the company while in that employment and have continued to be members after the employment ceased; and

(c) prohibits any initiation to the public to subscribe for any share in, or debentures of, the company.

Where two or more persons hold jointly one or more shares in a company, they were considered as a single member in this survey.

(v) *Public Limited Company*: A public limited company is defined as a company that is not a private company. As such public companies can have an unlimited number of members and can invite the public to subscribe to its shares and debentures. The minimum number of members required to form a public company is seven.

(vi) *Co-operative Societies*: Co-operative society is one that is formed through the co-operation of a number of persons, recognised as members of the society to benefit themselves. In the process, the funds are raised by members' contributions/investments and the profits generated out of the society's activities are shared by the members. A government agency itself can also be a member or shareholder of a registered co-operative society but this fact cannot render the society into a public sector enterprise for the purpose of this survey.

(vii) *Trust*: An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees.

(viii) *Non-Profit Institutions (NPI)*: Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate surpluses. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share in any profits or other income which the NPI's receive and for this reason, they are frequently exempted from various kinds of taxes.

NPIs are principally market producers but they may engage in non-market production also. It is important to distinguish between NPI's engaged in market and non-market production as this affects the sector of the economy to which an NPI is allocated. Most market NPIs serving businesses are created by associations of the businesses whose interests they are designed to promote. They consist of chambers of commerce, agricultural, manufacturing or trade associations, employers' organisations, research or testing laboratories or other organisations or institutes which engage in activities which are of mutual interest or benefit to the group of businesses that control and finance them.

2.24.1 **Self-help Groups**: A self-help group (SHG) is a financial intermediary usually composed of between 10-20 local persons. Members of a SHG make small regular savings contributions over a few months until there is enough capital in the group to begin lending. Funds may then be lent back to the members or to others in the locality for any purpose. Also many SHGs are 'linked' to banks for the delivery of microcredit. The characteristic features of self-help groups may be summarised as follows:

- SHG is a small group generally comprising of people who are poor or economically weak, who have voluntarily come forward to form a group for improvement of the social and economic status of the members.
- It can be formal (registered) or informal.
- The concept underlines the principle of Thrift, Credit and Self Help.
- Members of SHG agree to save regularly and contribute to a common fund.
- The members agree to use this common fund and such other funds (like grants and loans from banks), which they may receive as a group, to give small loans to needy members as per the decision of the group.
- The ideal size of an SHG is 10 to 20 members. Also, legally it is required that an informal group should not be of more than 20 people). However, in difficult areas like deserts, hills and areas with scattered and sparse populations and in case of disabled persons, this number may be 5-20.
- The group need not be registered.
- From one family, only one person can become a member of an SHG. (More families can join SHGs this way).
- The group normally consists of either only men or only women.
- Members should be between the age group of 21-60 years.
- Members should be poor people [the term poor is in relation to the economic and living conditions and this has no relation to poverty line. People living above poverty line (APL) can also form SHG like people living below poverty line (BPL)].

2.24.2 **Activity of self-help groups**

In most cases, self-help groups are engaged in financial intermediation only i.e. the activity of the SHG is confined to providing loans to the members and the members can utilise the loan for any purpose - personal or entrepreneurial. However, an SHG may be formed initially and later and it may be engaged in group-based enterprise. Examples of such group-based activities are given below:

- Collective organisation of marketing for the produce of individual enterprises established using micro-credit, particularly milk collection centres/ diary cooperatives at village level.
- Collective activities of SHGs using group credit to access larger natural assets for production e.g. leasing lands and ponds for cultivation and pisciculture.
- Other collective economic activities based on group credit that combines labour and management: stone-cutting, processing rice, managing a tent house etc.
- Management of government contracts such as running ration shops (as part of public distribution systems), cooking mid-day meal for school children, managing a subsidised fodder depot etc.

While listing the self-help groups engaged in financial intermediation and self-help groups running group based enterprises, the following three cases should be considered:-

(a) The SHG was engaged in financial activities only. In that case, it was listed under financial intermediation.
(b) An SHG was formed and later it was engaged only in some non-financial activity. In that case if that activity was under survey coverage, then it was listed under the corresponding non-financial activity. The enterprise would continue to be considered as SHG.
(c) An SHG was engaged in financial as well as non-financial activity. In that case, the major activity was decided based on maximum value added / sales turnover/ employment in that order. The enterprise would continue to be considered as SHG.

2.24.3 **Determination of eligibility of an SHG**

An SHG was considered as eligible enterprise for the purpose of survey if the total number of days of operation of that SHG in last 365 days was at least 15. Working days would include-

a) Days of meeting.
b) Days of interaction with the bank for purpose of deposit/withdrawal/loan/repayment etc.
c) Days of performing other jobs related to SHG like maintenance of register.

2.24.4 **Determination of number of working owners of an SHG**

Those members of SHG who are regularly attending meetings or taking part in decision making procedure like secretary, treasurer, active committee member etc. was considered as working owners.

2.25 **Mixed Activity**: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertaining to the enterprise as a whole was collected and the enterprise was classified as having mixed activities and the activities of such enterprises are generally a mixture of NIC's. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities are different at 2-digit level of NIC-2008. The appropriate NIC in such cases was determined on the basis of major activity. Major activity refers to the activity which yields maximum income/turnover/employment. The above criteria are applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

2.26 **Multiple Activity**: Since many of the entrepreneurs belonging to the unorganised and informal sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as "mixed activity". Carrying out of more than one economic activity by the entrepreneur during the reference year was called multiple activities. It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise. However, an entrepreneur of a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer was not considered as carrying out multiple activities.

2.27 **Reference Period**: *Last 30 days preceding the date of survey* or l*ast month* had been used as the reference period to collect most of the data. Various items of receipts and expenses as well as data on employment, emoluments, rent, interest, net surplus and value added for the enterprises were collected for the above reference period only. However, for seasonal enterprises the reference period was the last 30 days (preceding the date of survey), if they have worked continuously for last 30 days or more (including scheduled holidays) in the current season. For seasonal enterprises which had worked for less than 30 days in the current season, last month would refer to an average month in the last working season.

2.27.1 If some enterprise was unable to give information for the last 30 days and was able to give information for the latest calendar month form their books, figures for the latest calendar month were taken. Month would refer to a period of 30 days. For some of the items like value of fixed assets, amount of loan outstanding etc., the reference period was 'as on the date of survey'. For some other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the period of reference was the 'last 365 days preceding the date of survey'. For enterprises maintaining accounts and giving information from their books of accounts, reference year, 'last 30 days/ last month' and 'last date of the reference year' would respectively relate to 'last accounting year for which information is available', 'last month of the said accounting year' and 'last date of the accounting year'.

2.28 **Worker**: For this survey, a worker was defined as all persons working within the premises of the enterprise who were in the payroll of the enterprise as also the working owners and unpaid family workers. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/salaries in return to his/her work incidental to or connected with the entrepreneurial activity. Salespersons appointed by an enterprise for selling its services and apprentices, paid or unpaid were also treated as workers.

2.28.1 *Volunteers, who work without salary / honorarium, were not considered as workers*. Voluntary participation without remuneration in production of goods and services in philanthropic organisation/ institutions or in any other organisation/ institution or even in the individual capacity will not render one to be counted as worker/enterprise. Voluntary participation will mean that the person has performed these activities without coercion or obligation but has participated in his/ her own volition. Moreover, the voluntary participation in the work should be without remuneration, which means that the person does not become entitled to receive, in respect of the work performed by him/ her, any compensation including honorarium from the institution/ organisation. For the purpose of the survey, minor contingencies/ honorarium received from the institution/ organization against the voluntary work done may not be considered as remuneration. To determine 'minor', average daily wage received by the lowest paid full-time/part-time worker of that enterprise may be used as a guiding tool.

2.28.2 Some enterprises do not hire individuals like porters, sweepers, accountants, etc., on a fairly regular basis. These individuals can **work in one or more enterprises** in a locality, has some autonomy to determine the charges receivable by him depending upon volume of job performed and usually receive service charges as and when they render such services to the enterprise. Such persons were not considered as workers of the enterprise using their services. Instead, they were considered as independent OAEs.

2.28.3 If an enterprise has some contract with some other agency (e.g. security, cleaning, nursing, midwife), or persons (like CA, lawyer, etc.), the employees of the agency (or persons)

who were working within the premises of the enterprise under survey (e.g. sweeper, guard, nurse, etc.) were not counted as the employee of the enterprise. Rather they were considered as the worker of the agency (or separate OAE, for persons).

2.29 **Working owner**. In the case of proprietary enterprises, if the owner himself/ herself works in the enterprise on a fairly regular basis, then he/she will be treated as working owner. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without help of anybody else (on fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then information for them shall be recorded.

2.30 **Formal hired worker**: A formal hired worker is one having continuity of job and eligible for paid annual leave and also eligible for social security benefits like provident fund or insurance provided by the employer.

2.31 **Informal hired worker:** An informal hired worker is not having continuity of job and/or not eligible for paid annual leave and/or not eligible for social security benefits like provident fund or insurance provided by the employer.

2.32 **Other worker/ helper:** This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

2.33 **Working on Contract**: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as ‘enterprises working on contract’.

Chapter Three

Summary of Findings

3.1 The present survey covers exclusively all the unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction). Data were collected on both economic and operational characteristics of the enterprises. The coverage excludes enterprises registered under Companies Act 1956, Government & Public Sector Services and Cooperatives. This report presents the estimates of some operational characteristics of unincorporated non-agricultural enterprises (*hereafter 'enterprises' would refer to 'enterprises under survey coverage'*), like distribution of estimated number of enterprises by type of ownership, their location, registration status, nature of operation by activity category for each State/Union Territory. A summary of some of these results is presented and discussed in this section. Detailed tables provide estimates separately for rural, urban and for both sectors combined at the all-India and State/UT level by activity category. In addition, information for 'Own Account Enterprises (OAEs)' and 'establishments' have been presented separately. The marginal totals and the sum of the proportions presented in various detailed tables may, in some cases, differ slightly due to rounding off.

3.2 Wherever state wise results have been presented in this report, estimates have been given for all the states and UTs. However, because of small sample sizes for some of the North-eastern and smaller states, before using estimates, users may consult Relative Standard Error (RSE) given in detailed tables to determine their level of reliability.

3.3 The term 'enterprise' is used in general to represent OAEs and also establishments. In the statements, 'all' is used to denote all the enterprises taken together. A "-" has been used in the statements and tables if no enterprise was surveyed in that particular level of disaggregation. On the other hand, the figure "0" appears in some levels of disaggregation when the estimated figure is very low and has become "0" due to rounding off.

3.4 **Sample number of enterprises**: Information was collected from about 3.34 lakh enterprises engaged in the manufacturing, trade and other services activities throughout the country. About 49 per cent of these enterprises surveyed belonged to the rural sector (vide Table 2). Moreover, 66 per cent of the total surveyed enterprises were OAEs (vide Table 3).

3.5 **Estimated number of enterprises**: Before looking into various characteristics of the enterprises in the unincorporated non-agricultural sector (excluding construction), it may be worthwhile to know the extent of their presence in the economy as a whole as well as in different broad activities as revealed by the survey. During 2010-11, out of the estimated 5.77 crore[1]

[1](1 crore = 10^7)

unincorporated non-agricultural enterprises excluding construction, 30 percent enterprises were engaged in manufacturing, 36 percent enterprises were in trading and 34 percent enterprises were in service sector. While about 54 percent of such enterprises were located in rural areas, 46 per cent were located in urban areas. Though in rural India, these enterprises were more or less equally (between 33 to 34 percent) distributed by broad activity category, enterprises engaged in trading sector had the dominant share (38%) of enterprises under survey coverage in urban area followed by service sector (35.5%) and manufacturing sector (26.5%). The break-up of these estimates is shown in **Statement 1** and their percentage distribution in **Statement 1.1**. The percentage distribution of enterprises in the unincorporated non-agricultural sector by broad activity category is also shown in **Chart C1** for rural and urban areas combined.

About 59 percent of manufacturing enterprises were located in rural areas and 41 percent were located in urban areas.

3.5.3 Largest segment of non-agricultural enterprises were engaged in trading activities; about estimated 2.08 crore in numbers. Of these, about 88 percent of trading enterprises were engaged in 'Other retail trade' (T4), 7 percent in 'Other wholesale trade' (T3), 4 percent in 'Trade and repair of motor vehicles and motor cycles' (T1) and 1 percent in 'Activities of commission agents' (T2). Trading enterprises were marginally higher (about 51%) in rural areas than (49%) in urban areas.

3.5.4 Out of the estimated 1.97 crore service sector enterprises, 27 percent enterprises were engaged in 'Other community, social and personal service activities' (S15) followed by 26 percent enterprises engaged in 'Land transport' (S3) and 14 percent engaged in 'Food service activities' (S2). About 52 percent of service sector enterprises were located in rural areas and 48 percent were located in urban areas.

3.8 **Nature of operation:** Enterprises in the unorganized sector sometimes do not operate throughout the year and the number of months of operation of an enterprise largely depends on the type of activity it carries out. A small proportion of enterprises operate only in seasons when the raw materials for the enterprise are available or certain services are in demand in the season. Broadly, an enterprise may operate more or less throughout the year or in seasons or intermittently throughout the year and accordingly they are termed as perennial, seasonal and casual enterprises, respectively. The distribution of unincorporated non-agricultural enterprises by the nature of operation and activity categories is given in **Statement 10.0** for rural, urban and combined sector.

3.8.1 About 99 percent of the total enterprises were perennial while the seasonal and casual enterprises together constituted a little more than 1 percent of the total enterprises. The distribution of unincorporated non-agricultural enterprises in respect of nature of operation does not differ significantly between rural and urban areas, or between OAE and establishments. **Chart C5** depicts the percentage distribution of enterprises by nature of operation in India for each activity category and by different sectors.

3.8.2 **Statement 10.1** depicts the percentage distribution of enterprises by nature of operation in India for each activity category and sector. It has been observed that unorganized manufacturing sector enterprises are mostly following a perennial nature of operation in both rural and urban areas and the trend is same for all most all types of manufacturing activities except 'Cotton ginning, cleaning and bailing' (M1) and 'Manufacture of pharmaceuticals, medicinal chemical and botanical products' (M13). In rural India, only 36.8 percent of the enterprises engaged in 'Cotton ginning, cleaning and bailing' (M1) activity was perennial in nature whereas in urban areas it was 79.7 percent. Also 63.2 percent and 33.5 percent of manufacturing enterprises engaged in 'Cotton ginning, cleaning and bailing' (M1) and 'Manufacture of pharmaceuticals, medicinal chemical and botanical products' (M13) activities respectively were operated on seasonal basis.

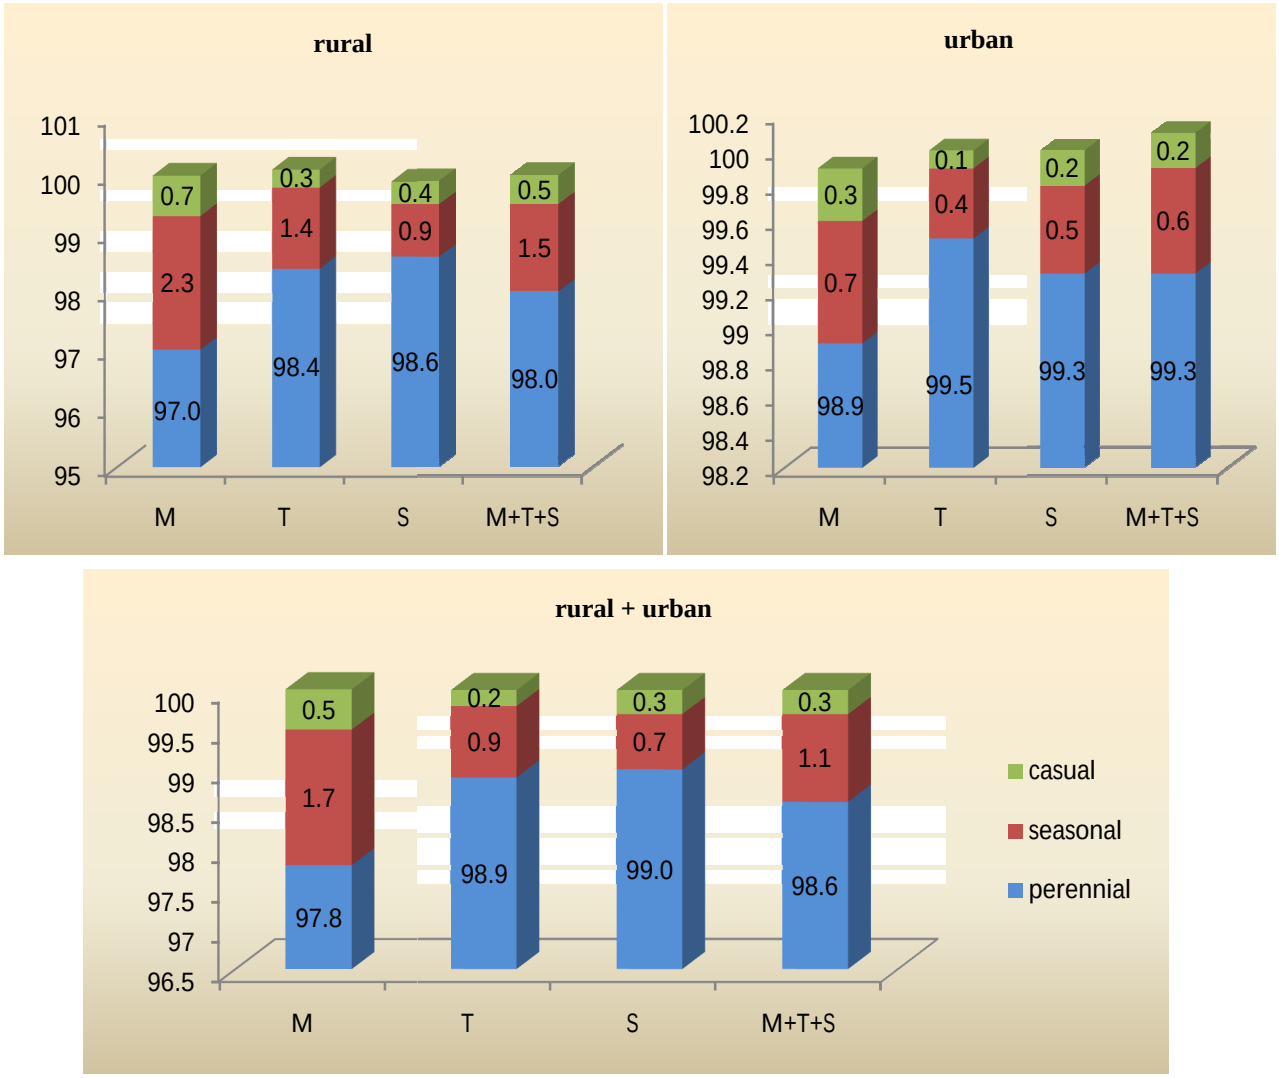
3.8.3 The scenario of the unorganized trading sector enterprises was more or less similar to that of the manufacturing sector enterprises in both rural and urban India. Here, the trading activity 'Activities of commission agents' (T2) depict a significant (5.5%) seasonal type of operation in the rural sector. Overall around 99 percent of the trading enterprises were involved in perennial type of operation.

3.8.4 About 99 percent of 'other services' enterprises were operated on perennial basis. It has been observed that in rural areas, 9.1 percent of 'Warehousing and storage' (S5) enterprises were

seasonal in nature. In general almost all 'other services' enterprises were operated on perennial basis.

C5: Percentage distribution of enterprises by nature of operation in India for each activity category:



3.9 **Number of months operated: Statement 11.0** gives the distribution of unincorporated non-agricultural enterprises by number of months operated during last 365 days. About 93 percent of the enterprises had worked for 9 months or more during the last 365 days while about 2 percent of the enterprises had operated for less than a quarter of the same period. In urban areas, the percentages of enterprises having specified duration of operation were nearly equal among OAEs and establishments (93%). Interestingly, the distribution of enterprises over months of operation is more or less equal in rural and urban areas for OAEs but it differs in case of establishments.

3.9.3 The distribution of ‘other services’ enterprises by number of months operated during the last 365 days, separately for rural, urban and combined sector is given in **Statement 11.3**. The survey revealed that 94 percent of the ‘other services’ enterprises had worked for 9 months or more during the last 365 days while about 2 percent of them had operated for less than a quarter of the same period. The distribution of ‘other services’ enterprise over months of operation is more or less even for rural and urban areas. The percentages of ‘other services’ enterprises having specified duration of operation were nearly equal among OAEs in both rural and urban areas and it differs marginally in case of establishments.

3.9.4 **Statement 11.4** presents a comparative picture of percentage distribution of enterprise by number of months operated during the last 365 days for each broad activity category and type of enterprise. Above 90 percent enterprises in all three sectors operated more than 9 months during the last 365 days. Distribution of OAEs by no. of months of operation is similar in all broad

activity categories. However the same for establishments in manufacturing sector is markedly different from trading and other services sector establishments. In manufacturing sector, establishments operated more than 9 months were 88 percent against 94 percent in trading and 92 percent in other services.

3.10.4 **Statement 12.4** presents a comparative picture of percentage distribution of enterprise by working hours in a normal day during the reference month for each broad activity category and type of enterprise. Significant difference can be observed in working pattern among manufacturing, trading and service sector enterprises. Whereas only 45 percent OAEs in manufacturing sector worked for 8 hours or more in a normal day, percentages of such OAEs are 78 percent and 63 percent in trading and service sector respectively. Significantly higher percentage of establishments worked 8 hours or more in normal day than OAEs in all three broad activity categories. Enterprises worked less than 4 hours in a normal day in trading sector is negligible (0.7%) when compared to service sector (7.8%) and manufacturing sector (5.4%) enterprises. The same pattern can be observed for OAEs also in trading sector. OAEs worked less than 4 hours in a normal day in trading sector is only 0.8 percent compared to service sector (9%) and manufacturing sector (6.4%) OAEs.

3.11 **Location of enterprises:** One of the characteristics of the enterprises in the unorganized sector is the presence of units that do not have fixed location. They operate as street vendors or as mobile market. On the other hand, many of them, particularly the OAEs, operate from within the household premises.

3.11.1 It can be seen from **Statement 13.0** that about 85 percent unincorporated non-agricultural enterprises run the business at fixed location either within the household premises or outside and about 15 percent operated their business without any fixed location. Around 2 percent of the enterprises operated without any structure but had a fixed location. 10.8 percent unincorporated non-agricultural enterprises were operated as street vendors and 4 percent were operated in mobile market. The percentage of unincorporated non-agricultural enterprises operating without fixed location was less in the case of establishments (4%) as compared to OAEs (17%). About 96 percent of establishments had fixed location as compared to 83 percent in case of OAEs.

3.11.1.1 The estimates for the States/UTs are given in **Statement 14.0** taking all unincorporated non-agricultural enterprises. If the enterprises located within household premises are considered, the proportion was the highest in Madhya Pradesh (70%) among rural areas and in Manipur (47%) among urban areas. For the enterprises operating from outside household premises with fixed location, the proportion is highest in Daman & Diu (81%) in rural areas and in Himachal Pradesh (88%) among urban areas. For the enterprises operating from outside household premises without fixed location, the proportion is highest in Chandigarh both in rural areas (31%) and in urban areas (37%).

3.11.2 **Statement 13.1** shows the percentage distribution of manufacturing enterprises by type of location. The survey revealed that about 97 percent manufacturing enterprises run the business at fixed location either within the household premises or outside and about 3 percent operated their business without any fixed location. Around 1 percent of the manufacturing enterprises operated under the sky without any structure but had a fixed location. The enterprises operating outside

household premises without fixed location had the characteristics of street vendors i.e. those who operate on the streets or mobile market. In case of manufacturing enterprises, this percentage was less in the case of establishments (1%) as compared to OAEs (2%). 99 percent establishments working in the manufacturing sector had fixed location as compared to 97 percent of OAEs.

3.11.2.1 The corresponding estimates for the States/UTs are given in **Statement 14.1**. If manufacturing enterprises located within household premises are considered, the proportion was the highest in West Bengal (90%) among rural areas and in Manipur (91%) among urban areas. 3.11.4 **Statement 13.3** shows the percentage distribution of 'other services' enterprises by type of location. It has been observed that about 75 percent enterprises run the business at fixed location either within the household premises or outside and about 25 percent operated their business without any fixed location. About 4 percent of 'other service' enterprises were operated under the sky without any structure but have fixed location. The 'other services' enterprises operating outside household premises without fixed location have the characteristics of street vendors i.e. those who operate on the streets or mobile market. This percentage was less in the case of establishments (9%) as compared to OAEs (27%). About 91 percent of establishments had fixed location as compared to 73 percent in case of OAEs.

3.11.4.1 The estimates for the States/UTs are given in **Statement 14.3** taking all types of enterprises together. If the enterprises located within household premises are considered, the proportion was the highest in Andhra Pradesh (62%) among rural areas and in Sikkim (52%) among urban areas. For the enterprises operating from outside household premises with fixed location, the proportion is highest in Goa (81%) in rural areas and in Himachal Pradesh (83%) among urban areas. For the enterprises operating from outside household premises without fixed location, the proportion is highest in Tripura (55%) in rural areas and in Chandigarh (44%) among urban areas.

3.11.5 **Statement 13.4** presents a comparative picture of percentage distribution of enterprise by type of location for each broad activity category and type of enterprise. Significant difference can be observed in type of location pattern among manufacturing, trading and service sector enterprises. Whereas 80 percent OAEs in manufacturing sector worked from within household premises, percentages of such OAEs are only 32 percent and 38 percent in trading and service

sector respectively. About 28 percent OAEs engaged in 'other services' activities are operating from outside household premises without fixed location compared to 18 percent and 3 percent of such OAEs engaged in trading and manufacturing activities respectively. Share of street vendors are higher for all broad activity categories than those operating in mobile market. Establishments operating from outside household premises with fixed location having permanent structure are significantly higher than other locations for all three types of broad activity category.

3.13.4 **Statement 16.4** presents a comparative picture of percentage distribution of proprietary and partnership enterprises by social group of their owner / managing partner for each broad activity category and type of enterprise. It can be observed that proprietary and partnership held by Scheduled Tribes (ST) are minimum (ignoring the same held by those whose social group

was not known) for OAEs and establishments in all broad activity category followed by Schedule castes (SC). It is interesting to note that proprietary and partnership enterprises held by Other backward classes (OBC) are quite at par with those held by Others. While OBCs recorded dominance in OAEs in all three broad activity categories, proprietary and partnership enterprises held by persons belonging to other social groups had dominance in establishments in all three broad activities. **Chart C6** depicts the percentage distribution of proprietary and partnership of enterprises by social group of their owner / managing partner and different enterprise types at all India level.

3.14 **Non-profit institutions:** The information on whether the unincorporated non-agricultural enterprises netted was a private Non-Profit Institution (NPI) or not, was also collected during this survey. The proportion (per 100) of enterprises which is private NPIs categorized by enterprise types and sectors at all-India level is presented in **Statement 17.0**. Private NPIs constituted 0.4 percent of all establishments at all-India level; 0.3 percent were OAEs and 0.9 percent were establishments respectively. The survey result revealed that about 1.3 percent of the enterprises engaged in other services were NPIs in rural areas compared to about 0.7 percent in urban area. Overall, presence of NPIs among all unincorporated non-agricultural enterprises under coverage

was very insignificant. The same level of insignificance of presence of NPIs can be observed in the State wise estimates presented in the **Statement 17.1.** Among the states, Arunachal Pradesh (**2%**) has the highest proportion of private NPIs. **Chart C7** shows the percentage of private NPIs categorized by enterprise type and sector in India.

It can be observed assistance received by OAEs and establishments in all three broad activity category was negligible during the reference period. 99% of enterprises both in manufacturing and trading and 97% enterprises engaged in other services did not receive any assistance at all. For those who received assistance, financial loan remained major assistance in manufacturing (0.6%), trading (0.7%) and other service (2.7%) sector enterprises.

3.20 **Use of information and communication technology:** Information was collected on particulars of use of information and communication technology (ICT) during last 365 days/last year by unincorporated non-agricultural enterprises for all activity categories. **Statement 23.0** shows the number per 1000 of unincorporated non-agricultural enterprises using information and communication technology during last 365 days/last year categorized by enterprise type and sector. It has been observed that unincorporated non-agricultural enterprises had used computer and internet facilities much more as compared to other ICT facilities such as 'intranet', 'LAN', 'Extranet' etc. At all India level, 32 out of 1000 enterprises had used computer followed by internet (17 out of 1000). The use of ICT was much more prevalent in urban areas and among establishments. In urban India around 58 out of 1000 enterprises had used computers followed by internet (32 out of 1000 enterprises). It has been observed that 176 out of 1000 establishments

had used computers in urban India as compared to only 53 out of 1000 establishments in rural India.

3.20.1 **Statement 23.1, 23.2 and 23.3** respectively shows the use of information and communication technology among manufacturing, trading and 'other services' enterprises during last 365 days/last year respectively categorized by sector and enterprise types. The survey revealed that among manufacturing enterprises, the use of computer and internet was much more for establishments as compared to OAEs in both rural and urban sector. This trend is same in case of trading and 'other services' enterprises also. Considerable number establishments of the 'other services' enterprise had used the other ICTs like 'intranet', 'LAN', 'extranet' etc and the use was much more in urban areas as compared to rural areas.

3.20.2 **Statement 23.4** presents a comparative picture of number per 1000 of enterprises using ICT during last 365 days/last year for each broad activity category and type of enterprises. It can be observed that the use of almost all of the studied ICT facilities was much higher in 'other services' enterprises compared to other two broad activities and the use were much higher in establishments. Among different studied ICT facilities, 'using computer' had the highest share followed by 'using internet' for all the three broad activity categories. 57 out of 1000 enterprises under 'other services' category had used computers whereas 26 out of 1000 trading enterprises and 10 out of 1000 manufacturing enterprises had used computers.

3.21 **Precision of estimates**: Relative Standard Errors (RSEs) of estimated number of unincorporated non-agricultural enterprises and estimated number of workers categorized by broad activity/sector at all-India level are given in **Statement 24** to show the reliability of estimates. It may be seen that barring RSEs for estimated number of workers for rural and urban establishments engaged in 'manufacturing' (5.72% and 6.48% respectively) and urban establishments engaged in 'other services' (5.06%), RSEs are less than 5 percent at all-India level both for estimated number of enterprises and estimated number of workers for all other activity categories, indicating that estimates are fairly reliable. Corresponding State wise RSEs are available in detailed tables. The data users are advised to use the estimates with caution particularly in cases where RSEs of estimates are high (say, more than 15% or so).

3.22 **Comparison of estimates**: The present survey covers the unincorporated non-agricultural enterprises (excluding construction) in manufacturing, trade and other service sectors. This is first time that an integrated survey was attempted during NSS 67th round. The last survey on 'unorganized manufacturing' was conducted during NSS 62nd round (2005-2006). In 62nd round survey, NSS covered all manufacturing enterprises, which were not under the coverage of Annual Survey of Industries (ASI). All government and public sector undertakings were also outside the survey coverage. In the following round (NSS 63rd round, 2006-2007), the last survey on 'service sector enterprises' was conducted. The 63rd round covered broadly service sector enterprises engaged in the activities of hotels and restaurants (Section H of NIC 2004); transport, storage and communication (I); financial intermediation (J); real estate, renting and business activities (K); education (M); health and social work (N) and other community, social and personal service activities (O). The 'unorganized trade' sector was last covered during NSS 53rd round (1997) of survey. The coverage of the 53rd round of NSS was restricted to all non-directory trading establishments (NDTEs) and own-account trading enterprises (OATEs) except the public sector trading enterprises / establishments. Because of differences in coverage with the earlier rounds, comparison of estimates generated in 67th round with those of earlier round have been avoided in this report.

Sample Design and Estimation Procedure

1. Introduction

1.1 Since its inception National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. The sixty-seventh round of NSS is devoted exclusively for collection of data on economic and operational characteristics of unincorporated non-agricultural enterprises in manufacturing, trade and other service sector (excluding construction). The field operations of the survey commenced on 1st July 2010 and will continue up to 30th June 2011. Last surveys of enterprises on trade, unorganised manufacturing and service sectors (excluding trade and construction) were conducted during 53rd round (January – December 1997) , 62nd round (July 2005 – June 2006) and 63rd round of NSS (July 2006 – June 2007) respectively. Other enterprise surveys carried out in between were 55th round (informal sector enterprises, 1999-2000), 56th round (unorganised manufacturing, 2000-2001) and 57th round (unorganised service sector excluding trade, finance and construction, 2001 –2002).

2. Sample Design

2.1 *Outline of sample design:* A stratified multi-stage design had been adopted for the 67th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were enterprises in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of three hamlet-groups (hgs)/ sub-blocks (sbs) from each large rural/ urban FSU.

2.2 *Sampling frame to be used for selection of first stage units:* Census 2001 list of villages have been used as the sampling frame for rural areas. Auxiliary information such as number of enterprises, number of workers, type of enterprises, activities of enterprises, etc. available from EC-2005 frame were used for stratification, sub-stratification and selection of enterprises. In Kerala, list of panchayat wards as per Census 2001 was used as frame since list of such wards is not available as per EC 2005 frame.

In the urban sector, EC-2005 frame was used for 26 cities with population more than a million as per census 2001. Although Mumbai is a million plus city, EC-2005 frame could not be used for Mumbai because of identification problem for IV unit/blocks in the EC for the city. For other

cities/towns (including Mumbai), UFS frame (2002-07 phase or latest available phase prior to 2002-07 if it is not available) was used.

2.3 *Stratification:* Each district was a basic stratum in both rural and urban areas. However, in case of urban, each city with population of 1 million or more as per Census 2001 forms a separate stratum and all other cities/towns of a district are grouped to form another stratum.

2.4 *Sub-stratification:*

(i) Rural: There were three sub-strata in the rural sector, viz.:

(1) Villages with at least 5 establishments (NDE/DE) under coverage in the manufacturing sector as per EC-2005 information;
(2) Remaining villages having at least 5 NDE/DE under coverage in the services sector including trade as per EC-2005 information;
(3) Remaining villages of the stratum.

For the State(s) where EC-2005 information could be used as auxiliary information for stratification/sub-stratification due to limitations of EC 2005 frame, each district was sub-stratified into 'r/4' sub-strata with a sample allocation of 4 per sub-stratum where 'r' is the sample allocation for the district/stratum. The sub-strata were formed by arranging the villages in terms of population so that total population of each sub-stratum is approximately the same.

(ii) Urban, Million plus cities (excluding Mumbai):
For each stratum / million plus city, 20 sub-strata were formed as follows:

Sub-stratum 1:	Blocks with one or more establishment in insurance & pension funding;
Sub-stratum 2:	Remaining blocks with one or more establishment in storage & warehousing;
Sub-stratum 3:	Remaining blocks with one or more establishment in accommodation;
Sub-strata 4-8:	Remaining blocks with one or more establishment in broad activities of manufacturing (as per SSS formation discussed subsequently under para 3.9);
Sub-strata 9-12:	Remaining blocks with one or more establishment in broad activities of trade (as per SSS formation in para 3.9);
Sub-strata 13-19:	Remaining blocks with one or more establishment in broad activities of other services (as per SSS formation in para 3.9) excluding the activities covered under sub-strata 1-3.
Sub-strata 20:	All remaining blocks of the stratum.

(iii) Urban, Other cities and towns (including Mumbai): Two sub-strata were formed:

Sub-stratum 1: UFS block types: Bazaar area (BA)/ Industrial area (IA)/ Hospital area/ (HA)/ Slum area (SA) which are likely to contain relatively higher number of enterprises;

Sub-stratum 2: Remaining UFS blocks of the stratum.

Note that if the number of FSUs in the frame of a rural or urban sub-stratum was found to be less than 8, then separate sub-stratum was not formed and it was merged with the adjacent sub-stratum. There is only one town (Leh) in Leh district and one town (Kargil) in Kargil district of J & K. These two towns were out of UFS coverage. These were treated as sub-stratum 2 and the entire town was treated as one FSU.

2.5 *Total Sample size (FSUs):* A sample of 16000 FSUs for central sample out of 1089508 FSUs and 18248 FSUs for state sample have been allocated at all-India level. Allocations for the State/UTs and sectors for central and state samples are given in Table B1.

2.6 *Allocation of total sample FSUs:*

(i) All-India allocation over States:
All-India sample size (FSUs) had been allocated to different State/UTs taking into account the minimum allocations required for a State/UT and the proportion of non-agricultural workers as per EC-2005 in the State/UT.

(ii) State/UT allocation over rural/urban sectors: State/UT sample sizes had been allocated to rural and urban sectors of the State/UT in proportion to number of non-agricultural workers as per EC-2005 with the constraint that urban allocation should not be too high compared to rural allocation and both rural and urban allocations were in multiples of 8.

(iii) State × sector allocation over strata: Stratum allocations of State/UT sample sizes for each sector had been made in proportion to number of non-agricultural workers as per EC-2005. For the States/UTs where census 2001 frame was used in the rural sector, allocations to strata were made in proportion to population as per census.

(iv) Stratum allocation over sub-strata: Allocations to sub-strata was made

(a) In proportion to number of non-agricultural workers under coverage as per EC-2005 in rural sector as well as in million plus cities (after assuming the number as 1 for those villages/blocks where number of non-agricultural workers is 0);

(b) In proportion to number of blocks with a double weight to sub-stratum 1 for other than million plus cities.

The minimum allocation for a sub-stratum was 4.

2.7 *Selection of FSUs:*

(a) Rural & million plus cities: From each sub-stratum, required number of sample villages/blocks had been selected by probability proportional to size with replacement (PPSWR), size being the number of total non-agricultural workers under coverage in the village/block as per EC-2005. For the State(s) where EC-2005 information could be used as auxiliary information for selection of FSUs due to limitations of EC 2005 frame, size for PPSWR selection had been the population of the village as per Census 2001.

(b) Urban (other than million plus cities): From each sub-stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). However, for Leh and Kargil towns, each town was selected 4 times, once in each sub-round.

Both rural and urban samples had been drawn in the form of two independent sub-samples and equal number of samples had been allocated among the four sub rounds.

2.8 *Formation of segment 9 and selection of hamlet-groups/ sub-blocks:*

2.8.1 *Formation of Segment 9:* After determining the boundaries of the sample FSU, all non-agricultural enterprises with 20 or more workers in the entire FSU and had been operated for at least one day during last 365 days preceding the day of survey (hereinafter to be called as 'big enterprises') were listed and all the eligible units under coverage were surveyed. All the listed big units (whether under coverage or not) constituted segment 9 and all eligible enterprises under coverage were surveyed in segment 9.

2.8.2 *Criterion for hamlet-group/ sub-block formation:* After forming the segment 9 as stated above, it was to be determined whether listing had to be done in the whole sample FSU or not. For this, approximate present population (P) and approximate total number of non-agricultural enterprises (E) for the whole FSU was ascertained first from knowledgeable persons. Depending upon the values of 'P' and 'E', it was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below. Final value of 'D' was the higher of the two values 'P' and 'E' based on the dual criteria. While considering enterprise criteria, segment 9 enterprises, if any, was excluded from the count of 'E', if possible.

Population/enterprise dual criteria			
population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs to be formed
less than 1200	1	less than 120	1
1200 - 1599	4	120 - 159	4
1600 - 1999	5	160 - 199	5
2000 - 2399	6	200 - 239	6
and so on	…	and so on	…

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

Population/enterprise dual criteria			
population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs to be formed
less than 600	1	less than 120	1
600 - 799	4	120 - 159	4
800 - 899	5	160 - 199	5
1000 - 1199	6	200 - 239	6
and so on	…	and so on	…

2.8.3 *Formation and selection of hamlet-groups/ sub-blocks:* In case hamlet-groups/ sub-blocks were formed in the sample FSU, the same was done either by more or less equalizing population or by equalising number of non-agricultural enterprises. If the criterion for deciding the value of 'D' was population, then hgs/sbs were formed by equalising population. On the other hand if enterprise criterion had been used for deciding the value of 'D', then equalise the number of non-agricultural enterprises to form 'D' number of hg/sb. If the value of 'D' was same for both population and enterprise criteria, then hg/sb may be formed by equalising population.

2.8.4 *Segments 1 & 2:* Two segments (in addition to segment 9 already formed) were selected from a large FSU wherever hamlet-groups/sub-blocks were formed in the following manner – Segment 1 was the hg/sb having maximum number of establishments under the coverage. Two more hg's/sb's were chosen by SRSWOR and combined to form Segment 2. Listing and

selection of the enterprises were done independently in the two selected segments. The FSUs without hg/ sb formation was treated as sample segment number 1.

2.9 *Formation of Second Stage Strata and allocation of enterprises for schedule 2.34:*

A maximum of nineteen (19) second-stage strata (SSS) were formed within each sample FSU. Composition of various SSS was as follows:

(i) 5 SSS considering various broad manufacturing groups were formed in each segment for Manufacturing sector Establishments: (1) SSS 1 - Food products, Beverage and Tobacco Products, (2) SSS 2 - Textiles, Leather, etc. and Cotton ginning, cleaning and baling, (3) SSS 3 - Wood and wood products, paper and paper products, printing and publishing etc & Furniture, (4) SSS 4 - Petroleum Products, chemicals, rubber, metals, metal products, machinery and equipments, etc., and (5) SSS 5 – remaining manufacturing activities.

(ii) 4 SSS were formed in each segment for Trade sector Establishments: SSS 6 comprises the activities of commission agents. Excluding the activities of commission agents, three more SSS were formed. They were as follows: SSS 7 - Trade and repair of motor vehicles and motor cycles; SSS 8 – other wholesale trade and SSS 9 – other retail trade.

(iii) 7 SSS were formed in each segment for Service sector Establishments (other than trade) corresponding to the following broad activities: SSS 10 – Accommodation & food service, SSS 11 - Transport, storage, information & communication, SSS 12 - Financial & insurance activities, SSS 13 - Real Estate and Renting and Business Activities, SSS 14 - Education, SSS 15 – Human health & Social work, and SSS 16 - Other services.

(iv) 3 SSS were formed in each segment for own account enterprises (OAEs**)** as follows: SSS 17 – OAEs in Manufacturing, SSS 18 – OAEs in Trade, and SSS 19 – OAEs in Other services.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 *Formulae for Estimation of Aggregates for a particular sub-sample and stratum / sub-stratum:*

3.2.1 *Schedule 0.0:*

3.2.1.1 Rural:

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{Z}{n}\sum_{i=1}^{n}\frac{1}{z_i}\left[y_{i9} + y_{i1} + D_i^* \times y_{i2}\right]$$

where y_{i9} , y_{i1} , y_{i2} are the total number of enterprises possessing the characteristic *y* in segments 9, 1 & 2 of the i-th FSU respectively.

(ii) For estimating the number of villages in a sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{Z}{n}\sum_{i=1}^{n}\frac{1}{z_i}y_i$$

where, y_i is taken as 1 for sample villages possessing the characteristic and 0 otherwise.

3.2.1.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities (excluding Mumbai):

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{Z}{n}\sum_{i=1}^{n}\frac{1}{z_i}\left[y_{i9} + y_{i1} + D_i^* \times y_{i2}\right]$$

where, y_{i9}, y_{i1}, y_{i2} are the total number of enterprises possessing the characteristic *y* in segments 9, 1 & 2 of the i-th FSU respectively.

(b) Estimation formula for a sub-stratum of other strata:

(i) For estimating the number of enterprises possessing a characteristic:

$$\hat{Y} = \frac{N}{n}\sum_{i=1}^{n}\left[y_{i9} + y_{i1} + D_i^* \times y_{i2}\right]$$

where, y_{i9} , y_{i1} , y_{i2} are the total number of enterprises possessing the characteristic *y* in segments 9, 1 & 2 of the i-th FSU respectively.

[Note: There are only one FSU each in the districts Leh (Leh town) and Kargil (Kargil town) of J & K. Both of these have been selected and repeated in each of the sub-rounds. Thus, for these two stratum × sub-stratum, N = 1 in the above formula and n will be the number of FSUs

actually surveyed including repetitions (n = 4 for the whole round and n = 2 for a sub-sample of the whole round assuming no casualty) for each of the two districts.]

3.2.2 Schedules 2.34:

3.2.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j}\sum_{i=1}^{n_j}\frac{1}{z_i}\left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}}\sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}}\sum_{k=1}^{e_{i2j}} y_{i2jk}\right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities (except Mumbai):

(i) For enterprises selected in j^{th} second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j}\sum_{i=1}^{n_j}\frac{1}{z_i}\left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}}\sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}}\sum_{k=1}^{e_{i2j}} y_{i2jk}\right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for a sub-stratum of other strata:

(i) For enterprises selected in j^{th} second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j}\sum_{i=1}^{n_j}\left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}}\sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}}\sum_{k=1}^{e_{i2j}} y_{i2jk}\right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

[Note: For segment 9, an adjustment may be necessary if E ≠ e for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) in the

above formulae may be replaced by $\frac{E_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$, where E_{i9j} = (number of enterprises in the frame of segment 9 for j^{th} SSS of ith FSU as per column (4) block 6a of schedule 0.0) and e_{i9j} = (number of enterprises actually surveyed for segment 9 of jth SSS of ith FSU)

$E_{i9j} = e_{i9j}$ if there is no casualty.

As mentioned earlier in section 3.2.1.2, N = 1 in the above formula in the case of Leh and Kargil districts of J & K.]

3.2.3 Estimate for a stratum:

$$\hat{Y}s = \sum_{t} \hat{Y}st$$

3.3 *Overall Estimate for Aggregates:*

Overall estimate for aggregates for a stratum ($\hat{Y}_s$) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2}\sum_{m=1}^{2}\hat{Y}_{sm}$$

3.4 *Overall Estimate of Aggregates at State/UT/all-India level:*

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

3.5 *Estimates of Ratios:*

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level. Then the combined ratio estimate ($\hat{R}$) of the ratio $(R = \frac{Y}{X})$ will be obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

3.6 *Estimates of Error:* The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate* $\hat{Y}$ *:*

$$V\hat{a}r(\hat{Y}) = \sum_{s}\sum_{t} V\hat{a}r(\hat{Y}_{st})$$ where $V\hat{a}r(\hat{Y}_{st})$ is given by

$\hat{Var}\left(\hat{Y}_{st}\right)=\frac{1}{4}\left(\hat{Y}_{st1}-\hat{Y}_{st2}\right)^2$ where $\hat{Y}_{st1}$ and $\hat{Y}_{st2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6.2 *For ratio* $\hat{R}$ *:*

$$M\hat{S}E(\hat{R})=\frac{1}{4\hat{X}^2}\sum_s\sum_t\left[\left(\hat{Y}_{st1}-\hat{Y}_{st2}\right)^2+\hat{R}^2\left(\hat{X}_{st1}-\hat{X}_{st2}\right)^2-2\hat{R}\left(\hat{Y}_{st1}-\hat{Y}_{st2}\right)\left(\hat{X}_{st1}-\hat{X}_{st2}\right)\right]$$

3.6.3 Estimates *of Relative Standard Error (RSE):*

$$R\hat{S}E\left(\hat{Y}\right)=\frac{\sqrt{V\hat{a}r\left(\hat{Y}\right)}}{\hat{Y}}\times 100$$

$$R\hat{S}E\left(\hat{R}\right)=\frac{\sqrt{M\hat{S}E\left(\hat{R}\right)}}{\hat{R}}\times 100$$
