SECTION I

INTRODUCTION

1.0 The non-agricultural sector is an important and growing segment of the Indian economy. But statistics on the unorganised part of this sector are not available regularly in usable form. To bridge the gap, a countrywide census of all non-agricultural units employing at least one hired worker was undertaken in 1977 by the CSO in collaboration with the State Statistical Bureaus. This census provided a list of all establishments (units having at least one hired worker) in the unorganised sector of economic activities. Using the frame provided by the Economic Census, a follow-up survey of small trading establishments employing five or fewer number of workers and relatively smaller trading units not employing any hired worker was conducted in the 34th round of the NSS in 1979-80.

1.1 The second Economic Census was conducted in 1980. It had a wider coverage than the earlier one in the sense that it covered the own-account enterprises (units without any hired worker are called **Own-Account Enterprises or OAEs**) also. In this census the establishments were further split into two categories : **Directory Establishments (DEs) and Non-Directory Establishments (NDEs)**; the former employed a total of six or more workers, while the latter employed a total of five or fewer workers. Thus, the second Economic Census dealt with three categories of units, viz. **DEs, NDEs and OAEs**. This census provided a list of villages/ enumeration blocks (EBs) giving a count of enterprises and establishments, which has been used by the NSSO as a frame for sample villages/ EBs in its follow-up surveys. Two such surveys of units engaged in trading activities were taken up by the NSSO in its 41st round (July 1985 to June 1986) and 46th round (July 1990 to June 1991).

1.2 The third Economic Census was conducted in the year 1990. The coverage and the classification of the enterprises were the same as those of the second Economic Census. Using the frame based on the third Economic Census, a similar survey on the small trading units was undertaken by the NSSO in its 53rd round during January to December, 1997.

1.3 The coverage of the 53rd round of the NSS was restricted to all non-directory trading establishments(NDTEs) and own-account trading enterprises (OATEs) except the public sector trading enterprises/establishments. Hereafter in this issue, the term 'enterprise' will mean a trading enterprise or establishment (i.e. OATE or NDTE) as the case may be. All the enterprises covered by the two-digit NIC codes 60 to 68 (called divisions) and three-digit codes 040, 052, 053, 054, 059, 060, 061, 063, 069 and 890 (called groups) under the revised National Industrial Classification, 1987 (**NIC, 1987**) were considered for this survey. The 3-digit codes, viz. 040, 052,...,069 represent various free collection activities for sale. These activities are being covered under unorganised trade since the NSS 34th round. The extract of the NIC, 1987 for unorganised trade is provided in Section 5.

1.4 In its geographical coverage, the 53rd round survey included the whole of the Indian Union except the Ladakh and Kargil districts of Jammu & Kashmir, 768 interior villages of Nagaland situated beyond five kilometers of the bus route and 195 inaccessible villages of Andaman & Nicobar Islands.

1.5 The 53rd round of the NSS, as stated in the preceding paragraph, covered OAEs and NDEs in the trade sector. The other part, comprising Directory Trading Establishments (DTEs), which employ six or more workers, had been surveyed separately under the technical guidance of the Central Statistical Organisation during October 1996 to September 1997. As such, information for the entire trade sector becomes available for the period 1996-97.

1.6 All the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The numbers of first-stage units surveyed (**villages** in the rural areas and **UFS blocks** in the urban areas) were 5988 and 7138 in rural and urban areas, respectively, in the central sample. In this round, the usual practice of hamlet group/sub-block formation was dispensed with. Instead, the whole fsu's (i.e. villages/ blocks) were listed. As a result, the workload increased manifold in the field. In a later decision of the Governing Council, a portion of the samples was curtailed from the original allocation. It was also decided that the villages with population 20,000 or more as per 1991 census will be omitted from the sample. The ultimate distribution of the first-stage units among different States for the central sample was as per Statement 1 below:

1.7 All the second-stage units (i.e. trading enterprises) were listed through a listing schedule. This list constituted the frame for drawing the required number of sample enterprises from each first-stage unit. The enterprises were divided into three **enterprise classes** on the basis of the number of workers employed, from each of which a certain specified number of enterprises were

Statement 1: Number of first stage units in different States and UTs for central sample

selected. Information collected through the listing schedule was used for calculating multipliers and for estimation of the number of enterprises. The enterprise schedule was canvassed in the selected sample enterprises for collecting information on basic items like fixed assets, employment, purchase and sale values, other expenditure, value added and trade margins of commodities traded. The present issue is based on the data collected through the enterprise schedule canvassed in the central samples of the NSS 53rd round and presents selected characteristics viz number of enterprises, workers, GVA and trade margins, some other important variables like fixed assets, net addition to fixed assets, other expenditure and various factors incomes, average numbers of months/days an enterprise operated in the last year/working month are also given in Part II. The estimates are presented by broad industry divisions and/or groups (2- and/or 3-digit levels) of the NIC, 1987. In some of the tables, estimates are presented separately for the enterprises engaged in different types of trades, viz. wholesale trade (NIC 60 to 63), retail trade (NIC 65 to 68), commission agents (NIC 64), auctioneers (NIC 890) and other trading units (NIC 040, 052, 053, 054, 059, 060, 061, 063 & 069). The tables are also presented by certain classificatory variables like duration of operation, social groups, maintenance of accounts, etc.

1.8 In the main findings GVA per enterprise is given in the Part (A) of the issue whereas GVA per worker is covered in the Part (B). The trade margins presented in the Part (A) are obtained as direct query from the traders. But the trade margins in Part (B) are derived from the schedule. Also, the number of enterprises in the Part (B) is presented by size class of workers and the number of workers is given by full-time and part-time categories. In the Part (A) of the issue, main discussions are made mostly with the absolute figures of enterprises and workers. Corresponding proportions over different NIC divisions/groups are discussed in some finer details in the main of findings of the Part (B) of the issue.

1.9 Important concepts and definitions adopted in the survey are explained in Section 2 of Part I. Section 3 of the Part I gives a note on sample design and estimation procedure followed in arriving at the estimates presented in this issue. Main findings based on the data are discussed in a summarised form in Section 4 of the Part I. The 4-digited industry division/group codes and the corresponding descriptions are given in Section 5.

The detailed tables at the all-India as well as the State level are given in Part II. Part III contains the Hindi version of the main findings.

SECTION 2

CONCEPTUAL FRAMEWORK

Important concepts and definitions followed in the survey of the NSS 53rd round are explained below :

2.0 Trade : Trading is defined as an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. The activities of intermediaries who do not actually purchase or sell the goods but arrange their purchase and sale, and thereby earn remuneration by way of brokerage or commission, are also covered for the purpose of 'trade' survey. Distributive agencies which undertake trading activity on commission basis are also included. In addition, the activities of free collection for sale of honey and forest products like gathering of fodder, grass, etc.; free hunting, trapping and game propagation for commercial purposes; free collection for sale of fish, prawns, crabs and oysters; free collection for sale of waste paper, ash, rags, coal, etc., are also treated as trade for this survey. Separate and distinct trading units of manufacturing concerns like sale shops of Delhi Cotton Mill, Bombay Dyeing, Bata Shoe, etc., and activities like selling of fruit juice, sugarcane juice, etc., which involve a process of transformation marginally are also covered under trade.

2.1 Wholesale trade: In wholesale trade, goods are generally bought from the producer and sold to the retailer. A wholesaler is generally regarded as an intermediary between the producer and the retailer. A wholesale trader sometimes sells goods to other wholesalers or to the users in bulk. Besides, wholesale business is undertaken not only by the merchant wholesalers who buy and sell commodities but also by the manufacturing wholesalers who maintain distinct and identifiable wholesale trade outlets.

2.2 Retail trade : In retail trade, goods are generally bought from wholesalers or dealers and sold to consumers. The retail trader is an intermediary between a wholesaler and consumers or users. The retail trader may sometimes purchase goods directly from the producer or manufacturer. Hawkers and peddlers selling goods are also considered retail traders.

2.3 Trading enterprise : A trading enterprise is an undertaking/unit engaged in trade. An enterprise may be owned and operated by a household or by an institutional body. The activities of the enterprise may be carried out by household members and/or by hiring outside labourer.

2.4 Household enterprise: A household enterprise is that enterprise which is run by the members of the household. An enterprise run by two or more households on partnership basis is also considered a household enterprise. In other words, all proprietary and partnership enterprises are household enterprises.

2.5 Non-household enterprise: Non-household enterprises are those which are institutional, i.e. owned and run by the public sector (governments, local self-governments,

local bodies, government undertakings, etc.), cooperative societies, corporate sector, other types of societies, institutions, associations, trusts, etc. In unorganised trade, however, Public Sector enterprises are not covered.

2.6 Own-account enterprise: An enterprise which is run by household workers only (i.e. without any hired worker on a fairly regular basis) is termed as an own-account enterprise. If such an enterprise is engaged in trading, it is termed as an own-account trading enterprise (OATE).

2.7 Establishment: An enterprise which is employing at least one hired worker on a fairly regular basis is termed as an establishment.

2.8 Non-directory establishment : An establishment employing fewer than six workers (household and hired workers taken together) is termed as a non-directory establishment. If such an establishment is engaged in trading activities, it is termed as a non-directory trading establishment (NDTE).

2.9 Worker : A worker is defined as one who is engaged, either full-time or part-time, in the activity of the enterprise, in any capacity - supervisory or primary – whether in return for wages/salaries or not, involving any kind of work incidental to or connected with the (trading) activity. The entire set of workers has been divided into two categories, viz. hired workers and other workers, the main distinction being that while the former category of workers is paid some wages or salaries, the latter category of workers is not paid wages/ salaries. For instance, a working proprietor or a working family member is treated as a hired worker if he/she gets remuneration for the work in an explicit form, but any receipt other than remuneration is not considered salary or wage and in that case a working proprietor or working family member is categorised as 'other worker'.

2.10 Fairly regular basis : The term "fairly regular basis" for employment of hired workers means that the enterprise/establishment has engaged hired worker(s) during the **major part** of its period of operation(s) in the last one year. However, it is not necessary that the same worker(s) should be employed throughout the year.

2.11 Duration of operation of enterprise: It refers to the regularity with which the enterprise is run. If an enterprise runs more or less regularly throughout the year it is a **perennial** enterprise. If an enterprise usually operates during a particular season or fixed months of a year, it is termed as a **seasonal** enterprise. In case the activities of an enterprise are neither perennial nor seasonal in nature but are undertaken occasionally during the reference year, the enterprise is termed as a **casual** enterprise.

2.12 Reference period : It means the period for which information on a particular characteristic is collected. In the NSS 53rd round, only one reference period, viz. 'a month', had been used to collect the data. However, data on trade margins and net additions to fixed assets were collected for the last one year.

2.13 Fixed assets : Fixed assets in connection with the enterprise will mean the (i) building (including land) and other construction, (ii) transport equipment and (iii) other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition/construction. The market values of the fixed assets were considered.

2.14 Trade Margin : Trade Margin of a commodity is the percentage difference between the sale price and the purchase price. Trade margins were obtained when some transaction of goods took place during the

(last) reference year and as such were not applicable for commission agents and auctioneers. For those units also which collected goods free of cost for sale, data on trade margins were not collected.

2.15 Trader's net earnings/surplus : The total income generated by an enterprise is distributed among 4 major heads. Interest goes to the lenders, rent on land goes to the landlords, compensation goes to the workers and the remaining income is retained by the entrepreneur(s). This fourth part is called the trader's net earnings/surplus. In common parlance, it is known as 'net profit'.

2.16 Change in stock : The change in stock has been estimated in value terms as difference between capital-locked-up in stock at the beginning and that at the end of the reference month (the latter minus the former gives the change in stock). Credit purchases were also considered while arriving at the capital locked up figures.

2.17 Trading expenses : The value of commodities purchased together with incidental expenditure, like electricity consumed, printing, stationery, postage and telephone charges, transport charges, rent on assets other than land, local rates, taxes, licence fees, etc., incurred by the unit during the month for trading purpose, is considered to be trading expenses of the unit.

2.18 Total receipts : The sale value of all commodities traded by the unit together with the value of trading goods consumed at home and other receipts incidental to trading activities will be considered to be the total receipts of the unit.

2.19 Value added : This represents the contribution of a trading unit to the economy. Gross value added is calculated by subtracting the value of trading expenses from the total of receipts and change in stocks of the unit.

SECTION 3

SAMPLE DESIGN AND ESTIMATION PROCEDURE

3.1 SAMPLE DESIGN

3.1.0 General : A stratified two-stage sampling design was adopted for the survey. The first stage units (FSUs) were the villages (**panchayat wards** in case of Kerala) in the rural sector and UFS blocks in the urban sector. The second-stage units were the OATEs and NDTEs for the trade survey.

3.1.1 Sample size : The total number of sampling units (i.e. villages and blocks) surveyed in the 53rd round was 13,224 for Central sample and 14,876 for the State sample.

3.1.2 Allocation of sample FSUs to States/ U.Ts and to rural and urban sectors : The total all-India sample size of FSUs was allocated to different States/U.Ts in proportion to the number of workers engaged in OATEs/NDTEs in the respective States/U.Ts (estimated as number of OATE/NDTE as per EC '90 multiplied by estimated number of workers per enterprise based on NSS 46th round) subject to a minimum allocation given to the State/U.Ts depending upon the total number of districts and town classes for the State/U.T. The State/U.T level sample size was again allocated to the rural and urban sectors in proportion to the number of workers.

3.1.3 Rural sector design

3.1.3.1 Sampling frame : The list of villages showing number of OATEs and NDTEs as per 1990 Economic Census was used for selection of villages in the States/U.Ts wherever such frame was available. For Kerala, list of Panchayat wards giving count of OATEs /NDTEs has been used as the frame for selecting Panchayat wards for the the survey instead of villages. For Jammu & Kashmir, the 1981 census lists of villages forms the frame. For Andaman & Nicober Islands, Lakshadweep and 5 districts of Madhya Pradesh, 1991 census lists were used as frame. For Andaman & Nicober Islands, villages remaining inaccessible throughout the year were excluded from the frame. For Nagaland, only villages connected by bus or situated within 5 kms of the bus route were included in the frame.

3.1.3.2 Stratification : Each district generally formed a broad stratum. However, for Gujarat, where NSS regions cut across district boundaries, parts of each such part of a district formed a separate stratum. If any district (or part thereof lying in an NSS region in case of Gujarat) had a small number of trading enterprises, it was clubbed with a neighbouring district to form a broad stratum in order to ensure a minimum allocation. To net an adequate number of NDTEs in the sample, each broad stratum was divided into two area types : (i) Area type 1 consisting of villages having at least one NDTE, and (ii) Area type 2 consisting of the remaining villages of the broad stratum.

Where population census frames were used for selection of fsus, there was no division as

above. In such cases, all the villages were classified in area type 2.

3.1.3.3 Allocation of sample villages among strata and area types : The State/ U.T level rural sample size was allocated among the strata in proportion to number of workers. While allocating as above, it was maintained that NSS region level allocation were multiples of 8 and stratum level allocation is at least 4 but in multiples of 2. This was done in order to allocate at least two fsu's to each of the area types. The stratum level allocation was again distributed between two area types in proportion to number of NDTEs and OATEs taking into consideration that allocation for each area type was in multiples of 2.

3.1.3.4 Selection of fsu's : Villages were selected in the form of two independent sub-samples from each broad stratum x area type using circular systematic sampling with probability proportional to size, the size being the number of (OATE + NDTE) for area type 1 and the number of OATEs (after assigning a size of 1 to the fsu's having no trading enterprise) for area type 2.

Where population census frame was used, villages were selected using circular systematic sampling with probability proportional to population. For Lakshadweep and A & N Islands, however, equal probability sampling was adopted.

3.1.4 Urban sector design :

3.1.4.1 Sampling Frame : The latest available list of UFS blocks was used as sampling frame for selection of fsu's for all cities and towns.

3.1.4.2 Stratification : Town classes (broad strata) were formed within each district by grouping cities/towns according to population sizes as per '91 census. Composition of the town classes were as given below :

town class code	composition of town class
1	all towns with population less than 1 lakh.
2	all towns with population 1 lakh or more but less than 5 lakhs.
3	all towns with population 5 lakhs or more but less than 10 lakhs.
4/5	each city with population 10 lakhs or more.

In case of Gujarat, if any district is spread over more than one NSS region , town classes were formed independently for each part of a district falling within a particular NSS region.

To net adequate number of trading enterprises in the sample, each town class was divided into two area types. Area type 1 consisted of the UFS blocks designated as 'bazar area' and area type 2 consisting of the remaining blocks of the town class.

3.1.4.3 Allocation of sample blocks among districts, town classes and area types : The State/U. T. level urban allocation is allocated among the districts and town classes in proportion of the number of workers. It is, however, ensured that NSS region level allocations were in multiples of 8 and town class level allocations were at least 4 and were in multiples of 2. Town class level allocations were further allocated between two area types in such a way that UFS blocks of area type 1 get completely surveyed (central and state samples combined) subject to a maximum of 50% of allocation for town class level. Area type wise allocations were in multiples of 2.

3.1.4.4 Selection of blocks For both the area types, sample blocks were selected circular systematically in the form of two independent sub-samples with equal probability.

3.1.5 Sampling of enterprises :All the OATEs and NDTEs of the selected village/block excluding those in the public sector and which operated for at least 30 days (15 days in case of seasonal enterprises) during the last 365 days preceding the date of survey were considered for sampling. All such, eligible enterprises were classified into three classes termed as **'enterprise class'** according to the total number of workers (including hired workers) employed in the enterprises on a regular basis. The classes were as follows :

Enterprise code	Composition of the class
1	all OATEs and NDTEs with one worker only.
2	all OATEs and NDTEs with two workers only.
3	all OATEs and NDTEs with three or more workers.

Before selecting enterprises from enterprise classes, all the enterprises within an enterprise class were arranged in ascending order of their NIC codes. The number of enterprises selected from enterprise classes 1, 2 and 3 were **4, 6 and 6** respectively. If there is a shortfall in enterprise class 3, it is made up from enterprise class 2, if possible, otherwise from enterprise class 1. Similarly, if there is a shortfall in enterprise class 2, it is made up from enterprise class 3, failing which from enterprise class 1. The priority order for compensation is 3rd, 2nd and 1st enterprise class.

The required number of enterprises were selected from each enterprise class circular systematically with equal probability.

3.2 ESTIMATION PROCEDURE

3.2.0 Notations :

s = subscript for s-th stratum.

t = subscript for t-th area type ; t = 1,2.

b = subscript for b-th sub-sample; b = 1,2.

i = subscript for i-th sample village/block (fsu).

j = subscript for j-th enterprise class

k = subscript for k-th enterprise

Z = total size for an area type (or for a stratum when there is no area type formation).

z = village/block size used for selection.

n = number of sample villages/blocks surveyed including uninhabited and zero cases and excluding casualty and other not received cases (used for tabulation).

E = total number of enterprises listed in an enterprise class.

e = number of enterprises surveyed (used for tabulation) in an enterprise class.

y = value of any character under estimation

$\hat{Y}$ = estimate of population total of the character Y.

3.2.1 Formula for estimation :

$$\hat{Y}_{sb} = \sum_{t} \frac{Z_{st}}{n_{stb}} \sum_{i=1}^{n_{stb}} \frac{1}{z_{stbi}} \sum_{j=1}^{3} \frac{E_{stbij}}{e_{stbij}} \sum_{k=1}^{e_{stbij}} y_{stbijk}$$

Note : 1) For rural sector, $\hat{Y}_{sb}$ was the estimate at the district level and for urban sector, $\hat{Y}_{sb}$ was the estimate at the town class level based on sub-sample b.

2) Value of $Z_{stbi} = 1$ for urban sector.

3.2.2 Estimate for the aggregate :

Pooled estimate $\hat{Y}_s$ based on two sub-samples is obtained as

$$\hat{Y}_s = \frac{1}{2} \sum_{b=1}^{2} \hat{Y}_{sb}$$

The pooled estimate $\hat{Y}$ at the region/State/U.T./All India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all the strata for the region/State/U.T./All India.

3.2.3 Ratio estimates :

The estimate of the ratio $R = \frac{Y}{X}$ (where X was the population total of an auxiliary variable) is given by $\hat{R} = \frac{\hat{Y}}{\hat{X}}$. Ratio may be computed at the last step after separately estimating X and Y.

SECTION 4

MAIN FINDINGS

4.0.1 The present issue is based on the survey on small trading units, viz. OATEs and NDTEs conducted by the NSSO in its 53rd round during January to December 1997. The focus of the issue is on some important characteristics of the unorganized trade sector. The issue contains 24 tables presenting the main characteristics of small trading units, namely number of enterprises, employment, gross value added and trade margins. Percentage distribution of the enterprises is also presented by certain classificatory variables like NIC, type of trade, social group, duration of operation, sex of owner and maintenance of accounts. The information on some of the above characteristics are given for the different classificatory variables.As for example, Gross Value Added is given for per enterprise as well as for per worker. Reported trade margins and calculated trade margins are also given in the issue. It may be mentioned that certain changes were made in the sample design of this round which have been delineated in Section 1. The term 'enterprise' has been used in a generalised sense in the issue and will refer to the OATEs or the NDTEs as the case may be. The main findings have been summarised in the from of 47 statements. Some of the statements have been subdivided into two or three parts for presentation of the findings in finer details. It may be mentioned that 'dash' (-) or 'zero point zero' (0.0) used in the tables will have their usual connotations of 'not available' or 'negligible values' in respective situations.

4.0.2 Number of FSUs and SSUs surveyed : Statement 1 gives the number of sample FSUs and SSUs surveyed for different States and UTs. It may be seen that in the NSS 53rd round, 5988 villages and 7138 UFS blocks were surveyed all over India. In these villages and blocks surveyed, data were collected from 72529 and 83146 enterprises respectively. The sample size for the UTs as well as the relatively smaller States like Arunachal Pradesh, Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Manipur, Maghalaya, Mizoram, Nagaland, Sikkim and Tripura was small. It is also seen that the major 14 States of the country, viz. Andhra Pradesh, Assam, Bihar, Gujarat, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal constitute more than 90% of the FSUs and SSUs. As such, in most of the statements, the estimates are given only for those 14 States where substantial numbers of units could be netted in the sample. The number of enterprises surveyed per FSU was 12.1 and 11.6 in the rural and urban areas, respectively. At the all-India level, the SSU/FSU ratio was 11.9 i.e. 12 enterprises per village/ block.

4.0.3 Number of sample enterprises : Statement 2 shows the number of sample enterprises for different NIC groups by OATEs, NDTEs and combined. From the statement it is seen that out of about 1.56 lakh enterprises surveyed in NSS 53rd round, only 16%

Statement 1: Number of sample FSUs and SSUs surveyed in the NSS 53rd round

State/UT	Rural		Urban		Combined	
	Fsu's	Ssu's	Fsu's	Ssu's	Fsu,s	Ssu's

enterprises were NDTEs which clearly suggests that OATEs were abundantly represented in the sample. For wholesale trade, however, the dominance of OATEs was less prominent. There, sample OATEs were found to have accounted for about 57% of the total surveyed enterprises. In fact, for wholesale trade in wood, firewood, leather etc. (NIC 61) and in machinery and equipment (NIC 62), NDTEs were found to be sampled more in number. In free collection category, only 2.5% of the enterprises surveyed were NDTEs. In auctioneering services, only 17 enterprises were caught all over India. Maximum number of enterprises were surveyed from NIC 65 i.e. retail trade in food articles etc. NIC 68 (retail trade n.e.c) was also fairly represented in the sample. Among free collection categories, NIC 052 (firewood from forest), 054 (gums, resins, honey, fruits from forests) and 061(inland water fishing) showed substantial number of enterprises (mostly OATEs) in the sample. Retail trading enterprises (sub-total: 65..68) accounted for about 90% of the total sample.

Part (A)

4.1.1 Key estimates at all-India level : The main findings of the NSS 53rd round survey have been summarised in Statement 3.

It may be observed that in 1997, there were approximately 145 lakh trading enterprises in India, of which 92% were OATEs and 8% were NDTEs. It is also seen that the OATEs outnumbered the NDTEs in both rural (96% of the total) and urban (85% of the total) sectors. Wholesale trading enterprises were found to be only 6% (8 lakh) whereas there were 82% (119.4 lakh) retail trading units. The table also suggests that there was a sizable proportion of enterprises (12%) other than wholesale and retail trading units (free collection, commission agents and auctioneering services). This sector of the

(iv) GVA per month per worker (Rs)	1195	2472	1773

economy provided employment to about 222 lakh Persons, the rural and urban shares being 54 and 46 percent, respectively. Female employment (about women + girls) was estimated to be 30 lakh and child labour (boy + girls) was estimated to be about 6 lakh. The incidence of employment of children or females was observed to be more in the rural areas than in the urban areas. The small trading units were found to have generated **monthly** gross value added (GVA) of about Rs.3927 crore, of which the rural and urban shares were approximately 37 and 63. Per **enterprise** GVA in the urban areas was almost two and a half times that in the rural areas; the all-India estimate being Rs.2708 GVA per **worker** was Rs.1195 in rural areas and Rs.2472 in urban areas. The all-India estimate for GVA per worker was Rs.1773. The yearly gross value added from the sector was Rs.44,220 crore approximately.

4.1.2 Number of enterprises per thousand population: The estimated number of enterprises per thousand population in the 14 major States have been presented in statement 4. (See Fig. 1). The third column of the statement represents the number of enterprises per thousand population (density) in 14 major States of India. Among these States, Orissa records the highest density of enterprises although the contribution of the State is not very significant in the Gross Value Added of the country. One of the reasons may be the presence of a substantial number of free collection activities in the State. On the other hand, Madhya Pradesh and Rajasthan are coming at the bottom of the table. The State of Uttar

Pradesh has shown maximum number of trading enterprises, but density – wise it comes below West Bengal, Punjab, Andhra Pradesh and Karnataka. Even Maharashrta, which is considered to be an advanced State, comes in the lower half of the table in the density of enterprises. Interestingly, Uttar Pradesh records a density very close to that of the nation.

ENTERPRISES

4.1.3 Estimated number of enterprises: The estimated number of OATEs, NDTEs and their totals for all States and UTs are given in statement 5. It is observed that out of 145 lakh enterprises in India, 133 lakh (92%) are OATEs and the remaining 12 lakh (8%) are NDTEs. It is also seen that 84 lakh (58%) enterprises are located in the rural areas and 61 lakh (42%) are in the urban areas. The percentage of NDTEs was only 4 among rural enterprises and 15 among urban enterprises. Among the States, a sizable number of NDTEs are observed in West Bengal (0.40 lakh), Maharashtra (0.39 lakh), Andhra Pradesh (0.29 lakh) and Kerala (0.25 lakh) in the rural areas. In the urban areas, a substantial number of NDTEs are found in Tamil Nadu (1.14 lakh) Maharashtra (1.06 lakh), West Bengal (1.04 lakh), and Uttar Pradesh (0.80 lakh). OATEs are abundant in almost all the States. Uttar Pradesh, West Bengal, Orissa, Bihar and Andhra Pradesh in the rural sector and Uttar Pradesh, West Bengal, Tamil Nadu, Maharashtra and Andhra Pradesh in the urban sector are sector are leaders in the number of OATEs. The overall estimates of number of enterprises is the highest in Uttar Pradesh, which is followed by West Bengal, Bihar, Andhra Pradesh and Orissa, Number of trading enterprises in Orissa was as high as 1110053, the majority of which were free-collection enterprises (67%). Bulk of these free-collection enterprises were situated in the rural areas (97%) of the State.

4.1.4 States with substantial number of free collection activities: It is found that substantial number of free collection enterprises exist in the States of Andhra Pradesh, Bihar, Madhya Pradesh and Orissa. The bulk of the free collection activities are concentrated in the rural areas of the States. But in the urban areas too, some types of free collection activities take place, which contribute substantially in the GVA of the States. The estimates of the number of trading enterprises in those States are inflated due to the presence of such activities. Needless to say, the number of workers engaged in these enterprises is also inflated. In statement 6, the number of enterprises and number of workers have been presented for those States with and without the free collection activities. It may be noted that in all the four States, the number of enterprises as well as the number of workers have decreased in the NSS 53rd round in comparison to those in the NSS 46th round. Even without free collection, the estimates in 53rd round are found to be on the lower side. Only exception is Andhra Pradesh, where estimates are showing an increase if free collection is not considered. The number of free collection enterprises in Orissa is found to be abnormally high in both the rounds (about 8.2 lakh in the 46th round and about 7.4 lakh in the 53rd round). Free collection enterprises of the four States contributed about 13.34 lakh enterprises and 23.23 lakh workers in the 53rd round. In the 46th round, the contribution of such enterprises was even higher with 16.61 lakh enterprises and 32.95 lakh workers.

4.1.5 Percentage share of wholesale and retail trading units : Statement 7 gives the percentage distribution of wholesale, retail and other trading units (commission agents, auctioneers and free collection taken together) in 14 major States.

On a review of this statement, the emerging scenario is that, at the all-India level 82.3% of

Note : f.c = free collection

the total trading units are engaged in retail trade, whereas the share of wholesale trade is 5.5% and that of other trade is 12.2%. While looking at the individual States, it can be seen that Rajasthan is having a comparatively higher percentage of retail trading units than any other State. Rajasthan is followed by Uttar Pradesh and Karnataka with 93.0% and 92.5% retail trading units respectively. West Bengal is found to be having a higher percentage of wholesale trading units than other States with 17.7%, followed by 8.6% of Kerala and 6.0% of Gujarat. In the category of 'other trading units', Orissa is found to be having an abnormally high percentage (67.0%) of enterprises, followed by Andhra Pradesh and Bihar with 22.5% and 15.7%, respectively. The bulk of the other trading units in Orissa were accounted for by the free collection activities (about 7.24 lakhs in the rural areas only).

4.1.6 Percentage distribution of household enterprises by sex of the owner : Statement 8 presents the percentage of household enterprises (excluding the institutional enterprises from the total number of enterprises) by sex of owner in rural and urban areas of 14 major States. It may be observed that in both the sectors, enterprises owned by males are dominant. The percentage of enterprises owned by females is marginally higher

Statement 7: Percentage of wholesale, retail and other trading units in 14 major States

State	Wholesale trading unit	Retail trading units	*other trading unit
(1)	(2)	(3)	(4)
Andhra Pradesh	3.1	74.4	22.5

in the urban sector than in the rural sector. Female-owned enterprises are found to be more in the four southern States, viz. Andhra Pradesh, Kerala, Karnataka and Tamil Nadu, in comparison to their northern counterparts. In the rural areas, Tamil Nadu, Karnataka and Andhra Pradesh show relatively higher proportions of female-owned enterprises. In the urban areas, all the four southern States record high proportions of enterprises owned by females. As a consequence, the percentages of enterprises owned by males are found to be below the national percentage of male-owned enterprises in the four southern States.

4.1.7 Household enterprises of different trade-types by sex of the owner: Statement 9 shows the percentage share of household enterprises owner by males or females in different type of trade. It may be observed that more than 93% of the enterprises are owned by males at the national level. This feature is almost same in rural sector and also in the urban sector, where the percentage of female owners is marginally higher. The percentage of female owners is maximum for 'free collection' in both rural and urban sectors. The percentage of female 'commission agents' is observed to be marginally higher in the rural sector. There is no enterprise in 'auctioneering

Statement 9 : Percentage distribution of household enterprises by type of trade and sex of the owner

type of trade	rural		no. of reporting enterprises	urban		no. of reporting enterprises	combined		no. of reporting enterprises
	male owner	female owner		male owner	female owner		male owner	female owner

services' which is owned by females. It may also be seen that in 'wholesale trade', more than 98% of the enterprises are owned by males and the percentage of enterprises owned by females in this category is almost four times as high in the urban areas as in the rural areas. The feature is more or less the same for 'retail trade' where enterprises owned by females are about 7% as against 93% owned by males. Female owners are more in number in urban areas. The percentage of female owners in retail trading units is found to be higher in the urban areas.

4.1.8 Percentage distribution of household enterprises by social group of the owner: In statement 10, percentage shares of trading enterprises owned by different social groups, viz. ST, SC, OBC and 'other' are provided for the major States. The institutional enterprises are not considered in this statement, which means only those (household) enterprises are taken into account for which the owner could be identified. It may be seen that at the all-India level, the share of the STs in unorganised trade is the minimum (about 8%). The enterprises owned by the SCs form approximately 11%, the next share is of the OBCs (21%) and the highest share (60%) goes, as expected, to the 'others' category (Fig. 2 in page 22 may be seen). The percentage share of STs is significant in Orissa (46%) and Madhya Pradesh (15.4%). The SCs share is significant in Punjab (19.5%), West Bengal

Statement 10 : Percentage distribution of household enterprises for major States by social group of the owner

Rural + Urban

State	% of household enterprises owned by social group					number of reported enterprises
	ST	SC	OBC	'Others'	All

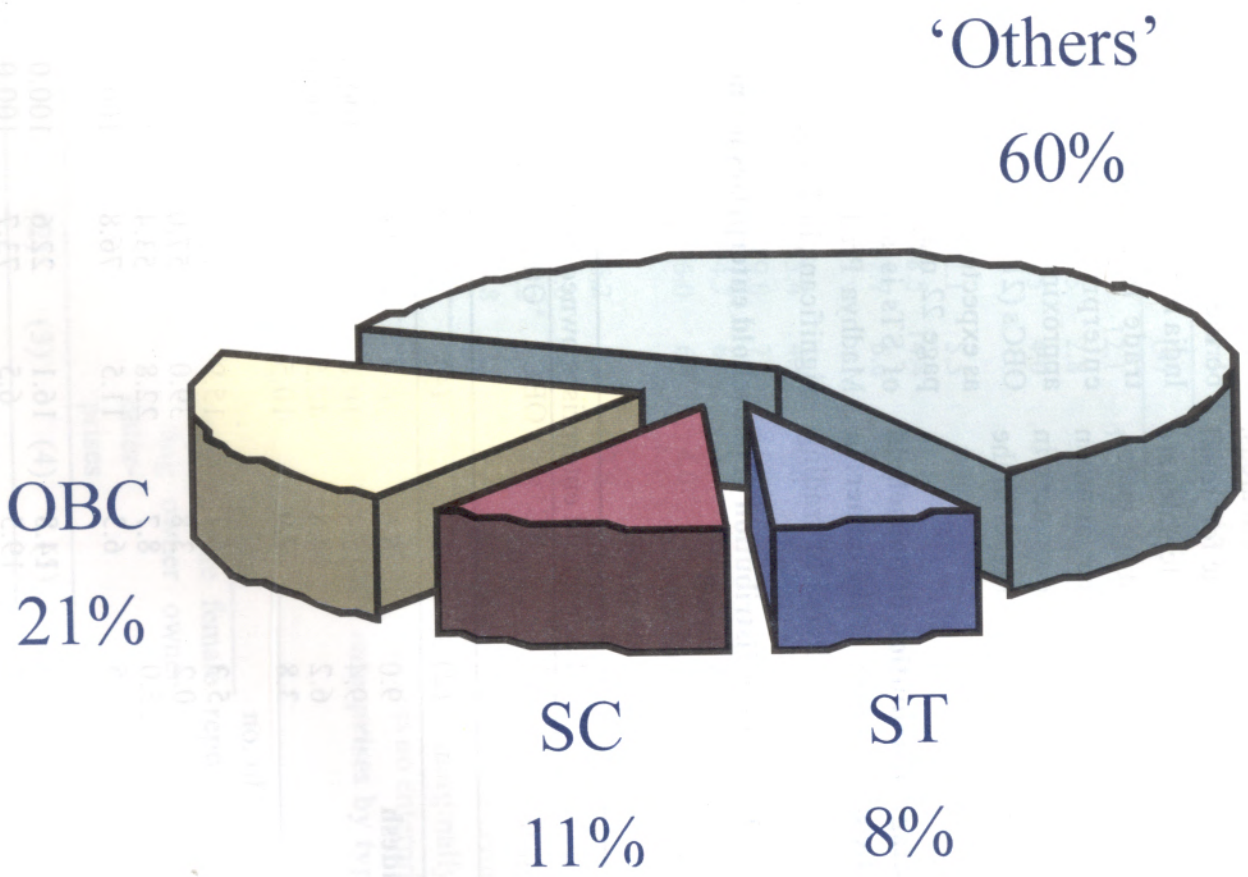
India	**7.6**	**10.7**	**21.4**	**60.2**	**100.0**	**155548**

Fig. 2 : Percentage distribution of household enterprise in India by social group



Source : Statement 9

(19.3%), Assam (15.4%), Bihar (14.8%) and Orissa (14.8%). The percentage of enterprises owned by OBCs is the maximum in Tamil Nadu (57%). The other States which have significant contributions are Bihar (43%), Kerala (39%), Andhra Pradesh (27%), Madhya Pradesh (23%) and Uttar Pradesh (23%). The percentage of enterprises owned by the category 'others' is found to be only 22.6% in Orissa, which is much lower than the percentage owned by this category in other States.

4.1.9 Percentage distribution of household enterprises (OATE and NDTE) in India by social group of the owner: Statement 11 shows the percentage distribution of OATEs and NDTEs owned by different social groups, viz. ST, SC, OBC and 'others'. The institutional enterprises are not again considered in this statement, which means that only those (household) enterprises are taken into account for which the owner could be identified. From the statement, it may be seen that almost 82% of the enterprises are owned by the two categories, viz. OBCs and 'others' in all-India. In the urban sector, almost 97% of the enterprises are owned by the above two social groups. The remaining 3% are shared by the STs and SCs. The percentage of enterprises owned by STs or the SCs is in general more in OATEs than in NDTEs. Again, this feature is more prominent in the rural sector than in the urban. This is perhaps because of the fact that NDTEs are relatively bigger units requiring higher rate of investment and are proportionately more in number in the urban areas.

4.1.10 Percentage distribution of enterprises by duration of operation: The percentage distribution of enterprises by their duration of operation for 14 major States is presented in statement 12. It may be seen that the casual

Kerala	97.4	2.5	0.1	96.4	2.8	0.8
Madhya Pradesh	76.5	22.0	1.5	98.9	0.8	0.3
Maharashtra	94.1	4.6	1.3	98.1	1.7	0.2
Orissa	62.2	36.8	1.0	98.9	1.1	0.0
Punjab	99.1	0.8	0.1	98.2	1.7	0.1
Rajasthan	99.0	0.5	0.5	99.1	0.8	0.1
Tamil Nadu	96.0	3.5	0.5	99.0	0.9	0.1
Uttar Pradesh	97.1	2.1	0.8	97.9	1.7	0.4
West Bengal	94.8	4.8	0.4	98.9	0.9	0.2
India	**89.8**	**9.3**	**0.9**	**98.2**	**1.5**	**0.3**

enterprises are almost non-existent in both urban (0.3%) and rural (0.9%) areas. The seasonal enterprises are marginally present in urban areas (1.5%) and moderately present in rural areas (9.3%). But perennial enterprises are found aplenty in both the sectors They constitute about 90% of the rural and 98% of the urban enterprises. Among the States, Orissa shows the highest percentage of seasonal enterprises in rural areas (36.8%), followed by Madhya Pradesh, Andhra Pradesh and Karnatakka. In the urban areas, Kerala, Karnataka and Andhra Pradesh show relatively higher proportion of seasonal enterprises. Some casual enterprises are seen to exist in the rural areas of Bihar, Madhya Pradesh and Maharashtra. For Orissa (rural), the percentage of perennial enterprises is found to be abnormally low (62.2%).

4.1.11 Percentage distribution of OATEs and NDTEs in India by duration of operation: Statement 13 shows the percentage distribution of OATEs and NDTEs by duration of operation. From the statement, it is observed that the presence of seasonal or casual enterprises is relatively higher in the case of OATEs and such enterprises are found proportionately more in the rural areas. Casual NDTEs are almost non-existent in both the sectors; seasonal NDTEs are found marginally in rural sector (5.1%) as well as in urban sector (1.1%). 93% of the OATEs and 98% of the NDTEs are found to be perennial enterprises. In the urban areas, the dominance of perennial enterprises is clear from the fact that about 98% of the enterprises (OATEs and NDTEs taken together) fall under this category. The seasonal enterprises comprise only 1.5% of the urban enterprises whereas they constitute 9.3% of the enterprises found in the rural areas.

Statement 13 : Percentage distribution of OATEs and NDTEs by duration of operation

India

Enterprise type	Rural			Urban			Rural + Urban		
	Perennial	Seasonal	Casual	Perennial	Seasonal	Casual	Perennial	Seasonal	Casual
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
OATE	89.7	9.4	0.9	98.1	1.6	0.3	92.9	6.4	0.7
NDTE	94.5	5.1	0.4	98.8	1.1	0.1	97.7	2.1	0.2
Combined	89.8	9.3	0.9	98.2	1.5	0.3	93.3	6.0	0.6

4.1.12 Percentage distribution of enterprises in India by maintenance of accounts: The percentage distributions of enterprises by maintenance of accounts of different NIC divisions/groups have been presented in statement 14. It may be seen that about 6% of the enterprises in rural areas and 14% of the enterprises in the urban areas maintained accounts. The maintenance of accounts is, as expected, high among wholesale trading units (sub-total 60-63). Here 18% enterprises in the rural areas and 34% enterprises in the urban areas are found to have maintained accounts. The free-collection categories are found to be maintaining accounts in less than 1% cases. It may also be seen that the urban enterprises in general maintain accounts in a higher proportion of cases than the rural enterprises. The percentage of wholesale trading enterprises maintaining accounts is the highest in NIC division: 63 in rural sector and in NIC division: 62 in urban sector. Among retail trading units, NIC division : 68 in rural sector and NIC division : 67 in urban sector show the highest proportions of enterprises maintaining accounts.

EMPLOYMENT

4.1.13 Distribution of workers in the major States: Statements 15 and 15a provide estimated numbers of adult and child workers by sex in 14 major States. The columns 7 of the two tables give the workers engaged in trade per thousand of population for the States. These ratios are expected to throw some light on the relative importance of the States in generation of employment.

It may be seen that out of 121.27 lakh workers engaged in the rural enterprises, 80% are men, 16.5% are women and 3.5% are child workers. In the urban areas 89% are men, 9% are women and only 2% are child worker. The above 14 States account for 96% of the total workers in the rural sector and 92% of the total workers in the urban sector. Among the States, Uttar Pradesh in the rural areas and 15 lakh workers in the urban areas. The States which follow Uttar Pradesh in the rural sector are Orissa (16.5 lakh), Bihar (13.0 lakh) and West Bengal (12.9 lakh). In the urban sector, the three States after Uttar Pradesh are Maharashtra (10.2 lakh), West Bengal (10.1 lakh) and Tamil Nadu (9.7 lakh). In the category of adult male workers, Uttar Pradesh, West Bengal, Bihar and Orissa show the maximum number of workers in rural areas whereas Uttar Pradesh, West Bengal, Maharastra and Tamil Nadu show a higher number of workers in the urban areas. The number of female workers is a maximum in Orissa, Andhra Pradesh, Uttar Pradesh and Madhya Pradesh records the maximum number of workers, in both the sectors, with 19 lakh workers in rural sector whereas Andhra Pradesh, Tamil Nadu and Maharashtra show a

significant number of female workers in the urban sector. Regarding child workers, it is seen that their number is a maximum in Orissa, Uttar Pradesh, Madhya Pradesh, Bihar and Andhra Pradesh in rural sector and Uttar Pradesh, Andhra Pradesh, Bihar and Karnataka in urban sector.

Female workers as well as child workers are found to be engaged more in the rural areas than in the urban areas. The mean number of workers per enterprise is found to be 1.44 in rural sector and 1.65 in urban sector as against the all-India mean of 1.53 workers per enterprise. So far as the workers per thousand population is concerned, Orissa shows the highest rate (56 Persons) and Rajasthan records the lowest (9 Persons) in the rural areas. In the urban sector, Punjab is found to have absorbed highest number of workers per thousand of population (60 Persons). Surprisingly, Kerala and Maharashtra, both of which are considered to be advanced States, record the lowest rates (29 and 28 Persons, respectively) in the urban sector.

4.1.14 Comparison of workers from the 50th round: The NSS 50th round dealt with the employment-unemployment situation in India and provided estimated number of workers (from organised as well as unorganised sector) for different NIC divisions/groups. The information regarding employment was collected from **households.** The NSS 53rd round was a survey of trading enterprises in the unorganised sector where information was collected from the **OATEs and NDTEs.** As information on DTEs was not available, the estimated number of workers as per DTE survey in 1990-91 has been used to get an idea of the total number of worker in the trade sector. However, it may be noted that the public sector enterprises were kept out

Statement 15 : Estimated number of adult and child workers by sex for 14 major States

of the coverage of the 53rd round. From statement 16, it is seen that the employment figures of the NSS 53rd round are uniformly lower than the corresponding estimates thrown up by the NSS 50th round (1993-94). The differences in approach, coverage and concepts in the two rounds may be one of the reasons behind the divergence in the two sets of estimates.

4.1.15 Distribution of hired and other workers in the major States: In statement 17 estimated numbers of hired and other workers by sex for rural and urban areas of 14 major States are given. It can be seen that in the **rural sector,** out of a total of 4.40 lakh hired workers, only 10571 (2.4%) are females. In the category of other workers, out of a total of 116.94 lakh, 21.17 lakh (18.1%) are females. While making a comparative study of the different States, it can be seen that a higher number of hired male workers is engaged by Maharashtra, followed by West Bengal, Andhra Pradesh and Gujarat. In the category of hired workers, a higher number of females is engaged by the four southern States, viz. Kerala, Tamil Nadu, Andhra Pradesh and Karnataka. In the category of other workers, a higher number of male workers is employed by Uttar Pradesh, followed by West Bengal, Bihar and Orissa.

Statement 15a: Estimated number of adult and child workers by sex for 14 major States

Urban

State	Adult workers		Child workers		Total workers	Workers per 1000 popln
	Male	Female	Boys	Girls

Pradesh. In this category, a higher number of female workers is engaged by Kerala, followed by Tamil Nadu, Maharashtra and Andhra Pradesh. In the category of other workers more male workes are engaged by Uttar Pradesh, followed by West Bengal, Maharashtra and Andhra Pradesh. In this category, the highest number of female workers is engaged by Andhra Pradesh, followed by Tamil Nadu, Maharashtra and Karnataka.

4.1.16 Distribution of female workers by type of trade: The total number of female workers and their percentage representation over different types of trade are given in statement 18 for rural and urban sectors of India. It may be seen that there are about 21 lakh and 9 lakh female workers in the rural and urban sectors, respectively. The maximum proportion of these workers is engaged in retail trading activities. The percentage of female

Statement 18 : Number and percentage of female workers by type of trade

India

**This proportion will change to 17.94 if Orissa is excluded .*

workers working in retail trade is 93.6 in the urban sector. In the rural sector, however, female workers are observed in a sizable proportion in 'free collection' categories also (44.4%).

4.1.17 Distribution of child workers by NIC division/group: Statement 19 shows the numbers of child workers employed in different NIC divisions/groups at the national level.

It is seen from the statement that the auctioneers (NIC 890) did not employ any child workers. Among the 4.18 lakh child workers employed in the rural sector, 2.33 lakh (56%) were engaged in the retail trading enterprises. A significant number (1.69 lakh) of child workers were found to be engaged in free collection. In the urban sector, total number of child workers were found to be about 2 lakh of which 1.83 lakh (93%) were engaged in retail trading units. Among the wholesale trading units, the maximum number of child labour was utilised by NIC division : 60 in both the sectors Similarly, among retail trading enterprises NIC division 65 and 68 were found to be engaging a significant number of child labour in rural and urban sectors Among all the NIC divisions/groups, the highest percentage of child labour is found to be engaged in NIC division : 65 in rural (40.3%) as well as urban (48.1%) areas.

4.1.18 Percentage of workers by sex and type of trade: In statement 20, the percentage of workers in different trade types is presented by sex of workers (See Fig.3).

It is observed that at the national level, 84% workers are adult male, 13% workers are adult female, 2% are boys and 1% are girls. Adult male workers are dominant in all the trade types. Especially, in auctionering services 100% workers are observed to be adult male. Adult females are mostly engaged in free collection. Their presence is also significant in retail trading units. Child workers (boys + girls) are observed to be engaged in larger number in free collection and retail trading units. Among the child workers, boys are employed in higher proportion than girls except in *free collection* where girls slightly outnumber boys.

GROSS VALUE ADDED

4.1.19 Per enterprises gross value added (GVA) for major States: Statement 21 shows the per enterprises GVA for OATEs and NDTEs in fourteen major States of India. It

may be observed that per enterprises GVA's in urban India are 1.9 times (for OATEs) and 1.7 times (for NDTEs) higher than those in rural India. The GVA per enterprise is in general found to be higher in NDTEs than in OATEs in both the sectors. The NDTEs show GVA per enterprise which is four and a half times as high as that for the OATEs. The OATEs or the NDTEs in the urban sector add more values than their rural counterparts. Among the States, OATEs in Punjab show maximum GVA per enterprise. The other States which come after Punjab are Kerala, Maharashtra, Gujarat and Rajasthan. The NDTEs of Gujarat show the maximum GVA per enterprise. The other State showing significant GVA per NDTE are Maharashtra, Kerala and Rajasthan.

4.1.20 Per enterprise GVA for OATEs and NDTEs in India: Statement 22 provides GVA per enterprise for OATEs and NDTEs of different types of trade in the rural and urban areas of India. From this statement also, it can be seen that the GVA per enterprise was more in NDTEs than in OATEs in both the sectors. The per enterprise GVA was maximum for wholesale trade in the urban sector, but it was the second highest in the rural sector. The auctioneering services gave maximum GVA per enterprise in rural sector. The wholesale NDTEs give the maximum GVA per enterprise in both the sectors. In the urban sector, the contribution of 'free collection' was substantial (Rs.5329) although they contributed much less in rural sector (Rs. 847). This is perhaps because of the fact that free collection is more prevalent in rural areas than in urban areas but the value added by such enterprises was much less in the rural areas. Auctioneers in the urban areas contributed less GVA per enterprise than

Statement 20 : Percentage of workers by sex and type of trade

their rural counterparts. For other types of trade, the urban contribution was always more than the rural contribution.

4.1.21 GVA per enterprise for different NIC divisions: Statement 23 gives the estimated GVA per enterprise (Rs.) for different NIC divisions at the all-India level. The GVA per enterprise at the national level was Rs.2708, the rural and urban contribution being Rs.1722 and Rs.4068, respectively. Obviously, the urban enterprises added more values on the average. In the rural sector, industry division 62 was having the maximum GVA per enterprise (Rs.11472), followed by industry group 890 (Rs.4308) and NIC 60 (Rs.3876). In the urban sector also, industry division 62 was having the maximum GVA per enterprise (Rs.19521), followed by industry divisions 63 and 61 with Rs.11703 and Rs.10487, respectively. If rural and urban sectors are put together, NIC 62 was having the maximum GVA per enterprise (Rs.19005), followed by industry divisions 61 and 60. GVA per enterprise for these NICs were Rs.9341 and Rs.6436, respectively.

GVA was the highest but GVA per enterprise was pretty low. On the other hand, GVA per enterprise for Delhi is the highest but the State's contribution to total GVA is very low. Assam's contribution was the lowest for GVA but for GVA per enterprise it was above West Bengal, Bihar and Orissa. The eight States which show GVA per enterprise above the national average contributed 46% of the total GVA and the seven States which show GVA per enterprise lower than the national average contributed 48% of the total GVA.

4.1.23 Yearly Gross value added: The trade schedule of the NSS 53rd round was designed to throw up monthly estimates of GVA for the

enterprises. As such, the comments given in statements 21 to 24 pertain to **monthly** value added only. However, a provision was kept in the schedule to collect 'number of months of operation' for the enterprises. Using this information, one may calculate the yearly value added from the monthly values as follows:

yearly GVA = monthly GVA x number of months of operation

Statement 25 presents the **yearly** estimates of GVA by the above procedure for State x Sector. It is observed that the small trading units added value of **Rs. 44,220 crores** during 1997. The urban contribution was almost double the contribution of the rural units, although there were about 23 lakh more units in rural areas. The first three States which added substantial values were Uttar Pradesh, Maharashtra and West Bengal.

4.1.24 Trade margin : Statement 26 provides figures of average trade margins for certain commodity groups at the national level for both wholesale and retail trade. The average is taken over all reported trade margins for a particular commodity group at the national level. It may be seen from the statement that margins are generally higher in retail trade than in the wholesale trade. This may be due to the fact that in wholesale trade, bulk sale tends to compensate for the lower margin in sale. For a few

India	15727.50	28492.23	44219.73

commodity groups, however, trade margins are observed to be higher in wholesale trade. The commodity groups are: fish, fruits, crockery & glassware, bricks and other building materials. The trade margins reported are found to be on the higher side for the following commodity groups: fish, vegetables, fruits, pan & pan masala, fruit juice and wine & intoxicants. The minimum and the maximum trade margins observed are 4.5% for sugar (wholesale rate) and 31.0% for fruit juice (retail rate).

4.1.25 Selected characteristics of enterprise: Statements 27 and 27a show the per enterprise values (Rs.) of certain characteristics such as fixed assets (owned and rented), total receipts, total expenses, change in stock and value added for major 14 States in the rural (Statement 27) and urban (Statement 27a) sectors, respectively. Reference period for fixed assets is 'as on the date of survey' and that for the other characteristics is 'last 30 days prior to the date of survey'. The negative sign shown against change in stock figure will mean the opening stock in that case was more than the closing stock during the reference month. The per enterprise values will give an idea about the average picture in respect of the characteristics concerned.

At the all-India level, the per enterprise value (Rs.) of fixed assets owned in **rural areas** was found to be higher than the rented assets, which suggests that the rural enterprises tended to rely more on their owned assets. Total receipts per enterprise was found to have exceeded the total expenses and average change in stock was only Rs.327. Cols 4, 5 & 6 of the statement results in the positive value added of Rs.1722 for rural India. This means that the rural enterprises add an average value of Rs.1575 and their opening and closing stocks did not differ much. At State level, Kerala was found to be the richest State with the maximum value of fixed assets, owned as well as rented, total receipts and total expenses. Orissa was observed to be the poorest State in respect of the above four characteristics. But so far as value added was concerned, Punjab beat the other States by a wide margin. Orissa was found to have added the lowest value of Rs.669 per enterprise. This may be because of the fact that in rural Orissa, a substantial section of enterprises were under the 'free collection' category and these were mostly owned by the tribal population.

In **urban India**, per enterprise value (Rs.) of fixed assets owned were less than the assets rented – unlike in the rural areas. This may be because renting in assets (especially, buildings) for enterpreneurial activity was more prevalent in the urban areas. Here also, the opening stock and the closing stock did not differ much since the average change in stock figure was obtained as Rs.738 only. Among the States, Punjab showed the maximum value of fixed assets per enterprise and Orissa recorded the minimum. But when total receipts and total expenses were concerned, Kerala was found to be the

Note: EC'90 was not conducted in Jammu & Kashmir. Free collection enterprise were also kept outside the coverage of EC.

and the NSS 53rd round (1997) for Rural and Urban sectors, respectively. The comparison for smaller States and UTs is not presented here since the sample sizes for these States and UTs were very small. The unorganised trade being a growing sector, it is expected that there would be an increasing trend in the number of enterprises. Accordingly, the eighteen States in the statements have been arranged in two groups. The first group consists of those States where some trend is observed in at least three of the four sets of

estimates. The second group is comprised of the remaining States where no such trend is observed. It is seen that there are 10 States in rural sector and 14 States in urban sector which have shown an increasing trend in the number of trading enterprises over the time-periods. On the other hand, 8 States in rural and 4 States in urban do not show any definite trend.

In the rural sector, the EC estimates are found to be lower than those of the NSS 41st round in respect of the 11 States, viz. Bihar, Maharashtra, Madhya Pradesh, Orissa, Rajasthan, Delhi, Assam, Punjab, Uttar Pradesh and West Bengal. One of the reasons for such a finding may be the presence of free collection activities, which were covered in the NSS 41st round but not in the EC. While comparing the estimates obtained in the 41st round with those of the NSS 46th round, it is seen that 13 of the 18 States have recorded an increase. However, Jammu & Kashmir, Rajasthan, Assam, Kerala and Delhi are the 5 States where the no. of enterprises has decreased. The increase in the estimates for Madhya Pradesh, Orissa and Andhra Pradesh in the 46th round is exceptionally high. The estimates in the 53rd round have in general shown an increasing trend if compared with the NSS 46th round. But for 8 States, viz. Bihar, Madhya Pradesh, Maharashtra, Orissa, Tamil nadu, Andhra Pradesh, Haryana and Kerala – the estimates have decreased. The decrease is substantial for Bihar, Madhya Pradesh, Orissa, Andhra Pradesh and Kerala. From the four sets of estimates, it is also felt that the all-India estimate of NSS 46th round is on the higher side and that of the EC'90 is on the lower side.

In the urban sector, all the States except four, viz. Andhra Pradesh, Jammu & Kashmir, West Bengal and Delhi have shown an increasing trend in at least three of the four sets of estimates. The EC'90 estimates are higher than the NSS 41st round estimates except for Andhra Pradesh, West Bengal, Tamil Nadu and Uttar Pradesh. Again the 46th round estimates have shown an increase over the estimates of the NSS 41st round for all other States except Andhra Pradesh, Jammu & Kashmir, West Bengal, Assam, Himachal Pradesh and Rajasthan. If the 46th round estimates are compared with those of the 53rd round, it is observed that there is an increasing trend for all the 18 States. The increase in the number of enterprises is substantial for Andhra Pradesh, West Bengal and Uttar Pradesh. It seems that the increase in the all-India estimate for the NSS 53rd round is somewhat against the trend.

Statement 28a: Comparison of number of enterprises as obtained from the NSS 41st round, the EC 90, the NSS 46th round and the NSS 53rd round for 18 major States

Part (B)

4.2.1 Estimated number of enterprises: The estimated number of OATEs, NDTEs and their total for all States and UTs are given in statement 29. It is observed that out of 145 lakh enterprises in India 133 lakh (92%) are OATEs and the rest 12 lakh (8%) are NDTEs. It is also seen that about 84 lakh (58%) enterprises are located in the rural areas and 61 lakh (42%) in the urban areas. The percentage of NDTEs is observed to be only 4 among rural enterprises and 15 among of urban enterprises. Among the States, sizable number of NDTEs are observed in West Bengal (0.40 lakh), Maharashtra (0.39 lakh), Andhra Pradesh (0.29 lakh) and Kerala (0.25 lakh) in the rural areas. In the urban areas substantial number of NDTEs are found in Tamil Nadu (1.14 lakh), Maharashtra (1.06 lakh), West Bengal (1.04 lakh) and Uttar Pradesh (0.80 lakh). OATEs are abundant in almost all the States and they are more in number in the rural areas. Uttar Pradesh, West Bengal, Orissa, Bihar and Andhra Pradesh in the rural sector and Uttar Pradesh, West Bengal, Tamil Nadu, Maharashtra and Andhra Pradesh in the urban sector are leaders in the number of OATEs. Overall estimates of number of enterprises is highest in Uttar Pradesh followed by West Bengal, Bihar, Andhra Pradesh and Orissa.

4.2.2 Number of enterprises by industry group : Statement 29a presents the estimated number of OATEs, NDTEs and their total at 3-digit levels of NIC. It is seen that out of a total of about 145 lakh small trading units in India, OATEs and NDTEs are estimated to be 133 lakh and 12 lakh respectively. The highest number of such enterprises were recorded against retail trade (sub-total 65 to 68). Contribution of NIC 65 (retail trade in food products) is found to be maximum among all NICs. At the 3-digit level, NIC 650, 688 and 655 show significantly high number of enterprises. In wholesale trade, NIC 60 (wholesale trade in food and agricultural raw materials) had the highest contribution. NIC 601 and 638 were found to have substantial number of enterprises. Auctioneering services (NIC 890) were observed to be very few in number (only 1228 all over India). But enterprises in free collection had a sizable number. There were about 16 lakh OATEs and 11 thousand NDTEs which traded in freely collected goods. In most of the NIC groups, OATEs are found more in number than the NDTEs, but for NIC 609, 615, 623, 632, 634 etc., the situation is found to be reverse where NDTEs were more in number. As the expected, proportion of NDTEs among wholesale trading units (19%) is more than that among retail trading units (8 %).

4.2.3 Key estimates of unorganised trade: The key estimates of unorganised trade obtained from NSS 53rd round have been presented in statement 30 in a concised form. Three basic characteristics of unorganised trade viz. number of enterprises, Persons employed therein and **monthly** gross value added by the enterprises have been considered in the statement. The estimates are provided separately for wholesale trade, retail trade and all trading enterprises.

It may be observed that in the unorganised sector, retail trading units (119 lakh) are outnumbering the wholesale units (8 lakh) by a wide margin. However, this feature was less prominent in NDTEs than in OATEs. Among 222 lakh (approx) workers engaged in the unorganised trade sector, it is seen that about 15 lakh workers are employed by the wholesale trading outlets, whereas, about 176 lakh workers were engaged by the retail trading outlets. The employment figures for females suggest that sizable proportion of such workers were engaged in the other trading units (free collection, auctioneering and commission agents taken together). Considering the relatively small number of wholesale enterperises in India (8.02 lakh), the number of

hired or full-time workers engaged in such enterprises were found to be substantial. Gross value added by the wholesale units is about one seventh of the total GVA. The retail trading units add value of Rs.3102 crore which amounts to 79% of the total GVA. Gross value added per enterprise and per worker were estimated to be Rs.2708 and Rs.1773 respectively. It may be noted that average value added by a wholesale unit (Rs.7003) was much more than that added by a retail unit (Rs.2597). The variation in the average GVA between wholesale and retail trade was reduced when per worker estimates were taken.

4.2.4 Comparison of estimates obtained in various rounds: Statement 30a shows the

Statement 30: Key characteristics of the NSS 53rd round

characteristic	wholesale trade	retail trade	all
Enterprises (lakh)			
(i) total	8.02	119.40	145.04
(ii) OATE	5.86	109.79	132.75
(iii) NDTE	2.17	9.60	12.29
Employment (lakh)			
(i) total	15.12	176.48	221.52
(ii) female	0.44	20.01	30.24
(iii) children	0.26	4.16	6.15
(iv) hired	4.09	13.94	18.86
(v) full time	14.45	163.67	206.57
Gross value added (GVA)			
(i) total (crores)	561.89	3101.85	3927.13
(ii) GVA per enterprise(Rs)	7003	2597	2708
(iii) GVA per worker(Rs)	3717	1758	1773

number of enterprises and persons employed in unorganised trading enterprises over 4 time periods viz. 34th round (1979 - 80), 41st round (1985 - 86), 46th round (1990 - 91) and 53rd round (1997) of the NSS. It is seen that total number of enterprises has shown an upward trend in the four time periods. But the growth somewhat slowed down after 1990 - 91. The wholesale trading units grew 5 times after 34th round. The number remained almost the same in 41st and 46th rounds. But after 1990 - 91, there is a sudden rise in the number of such units. The total number of enterprises grew by about 41 lakhs in 46th round as compared to the 41st round. It is seen that the rise was due to the rise in the number of trading units other than wholesale and retail trade. Total employment grown steadily in 34th, 41st and 46th rounds. The growth has minimal after 46th round. Number of persons employed took a big jump after 34th round for wholesale as well as retail trade. The growth slowed down during the 53rd round. The growth in the number of persons employed during the 46th round is seen to be due to the growth in the employment generated by the other trading units.

4.2.5 Ranking the major states in respect of unorganised trade: In Statement 31 the major 16 States (including Delhi) of the country have been ranked on the basis of the 3 basic characteristics, namely, **number of enterprises**, **employment** and (monthly) **value added**.

It has been observed that the above 16 States contribute about 97% of the total enterprises, employment and gross value added of the country. Hence the comments have been restricted to these major States only. It may be noted that the ranks given to the States on the basis of number of persons employed and GVA are varying considerably. This is because of the composition of the States in respect of types of enterprises and types of trade. The States where concentration of the NDTEs or the wholesale enterprises was more were expected to have employed more persons and added more value than the States where

Statement 30a: Comparative statement showing the number of enterprises and number of persons employed in unorganised trade over NSS rounds

OATEs or free collection units are more in number. This point is well established by the observations given below. The State of Uttar Pradesh was ranked **first** in respect of the number of enterprises, employment and GVA of the nation. Maharashtra stood 6th in the number of enterprises, 4th in employment but ranked **second** in its share of GVA. Gujarat was ranked 10th in enterprise and employment but ranked 7th in GVA. Orissa is 5th in enterprises, 5th in employment but **14th** in its share of GVA. This is perhaps due to the existence of a sizable number of enterprises in Orissa in the free collection category which contribute marginally in GVA. In case of Delhi, it is seen that the rank of the State according to the share in GVA is **13th** although it stood 16th on the basis of estimated enterprises and employment which clearly indicates, that Delhi had a concentration of relatively bigger enterprises than lower placed States like Orissa, Assam and Haryana each of which obviously had a bigger share in the number of enterprises.

4.2.6 Contribution of industries at the 3-digit level : Statement 32 and 32a delve into the 3-digit level composition of the industries in wholesale (Statement 32) and retail (Statement 32a) trading activities. Percentage shares of individual NIC groups in respect of the number of enterprises, number of workers and gross value added are also given in the statements to indicate the relative importance of the individual industries in their contributions. The enterprises have been arranged in order of their percentage share in GVA at the 3-digit level of NIC.

It is observed that there were about 8 lakh wholesale trading units employing about 15 lakh workers and 119 lakh retails trading units employing about 176 lakh workers in 1997. The wholesale enterprises added value of about Rs.562 crores whereas the retail trading units contributed about Rs.3102 crores to GVA. It is also seen that the NICs 600 (w.t in Cereals), 601 (w.t in basic food stuffs), 605 (w.t in live animals) and 638 (w.t in metal scraps) are the four industries which contributed quite substantially to the total number of wholesale tading units. They account for about 58.4% of the wholesale units. The maximum number of wholesale enterprises, however, came from the two NICs, viz. 601 (w.t in basic food stuffs) and 638 (w.t in metal scraps). Similarly, the contributions of the NICs 650 (r.t in cereals), 651 (r.t in vegetables), 655 (r.t in *pan, bidi* etc) and 688 (non-specialsed r.t) were noteworthy in the number of retail trading units. These 4 industries jointly contributed about 62% of the total number of retail enterprises. The maximum number of units in retail trade came from NIC groups 650 (r.t in cereals) and 688 (non-specialised r.t). In the total number of workers engaged by the wholesale and retail trading units, significant contributions are observed from NIC 601(w.t in basic food stuffs), 638 (w.t in metal scraps), 600 (w.t in cereals), 609 (w.t in textiles) and 605 (w.t in live animals) in wholesale trading activities and NIC 650 (r.t in cereals), 688 (non-specialised r.t), 655 (r.t in *pan, bidi* etc.), 651 (r.t in vegetables) and 689 (r.t not elsewhere classified) in retail trading activities. These industries contributed about 58.5% of the workers engaged in wholesale trade and 65.6% of the workers of the retail trade. Maximum workers are engaged by the industries 601 (w.t in basic food stuffs) and 638 (w.t in metal scraps) in wholesale trade and 650 (r.t in cereals) and 688 (non-specialised r.t) in the retail trade. Gross value added by the wholesale trade are substantial for NICs 600 (w.t in cereals), 601 (w.t in basic food stuffs), 609 (w.t in textiles), 615 (w.t in medicines) and 639 (w.t not elsewhere classified). They contributed 71.3% of the total GVA. In retail trade, 61.4% GVA is contributed by the NICs 650 (r.t in cereals), 651 (r.t in vegetables), 660 (r.t in textiles), 688 (non-specialised r.t), 683 (r.t in building materials) and 689 (r.t not elsewhere

Statement 32 : Contributions of particular industries to the wholesale trade

NIC group	Number of enterprises	% share in total	number of workers	% share in total	gross value added (Rs.)	% share in total

classified). The maximum contributions came from the NICs 650 (r.t in cereals) and 688 (non-specialised r.t).

4.2.7 Distribution of enterprises by number of workers : Statement 33 shows the percentage distribution of enterprises **by number of workers**. It is observed that at the all-India level about 90% enterprises were covered by the size classes **1** and **2**. About 60% of the enterprises were accounted for by the class **1**. The overwhelming presence of OATEs in the unorganised trade sector may be the reason behind this finding. Concentration of enterprises in size class **1** was found to be the minimum for Andhra Pradesh (46%) and the

maximum for Bihar (70%). Percentage of enterprises in size class **2** was observed to be maximum (42%) in Andhra Pradesh and the minimum in Assam (21%). In size class **3**, Orissa, Andhra Pradesh, Maharashtra and Tamil Nadu showed higher proportion of enterprises whereas Tamil Nadu and Madhya Pradesh recorded sizable proportions of enterprises in employment size class **4**. It may be noted that in size class **0** also, certain proportions of enterprises were present in all the above States. Those were the cases where enterprises did not operate during the reference month. About 0.8% of enterprises were observed in the size class **5 or more**. These may have been the cases of bigger OATEs (with many household workers) or misclassified DTEs.

4.2.8 Distribution of OATEs and their TOTAL by size class of workers: Statement 33a provides the distribution of number of enterprises and the corresponding percentages by number of workers. The information has been provided in the statement sectorwise for OATEs, NDTEs and their total. It may be observed that OATEs were concentrated in the size classes 1 and 2, whereas, the concentration of NDTEs were observed against the size classes 2 and 3. In urban areas, however, sizable number of enterprises were also seen which employ three workers. It is interesting to note that there were 7366 OATEs and 3435 NDTEs which employed 6 workers or more. There is a chance of misclassification of enterprises in those cases. Among all size classes of workers, highest percentage of enterprises were observed against size class 1. This is happening because of the huge number of estimated OATEs. Among the NDTEs about 89% of the enterprises were accounted for by the 3 size classes, viz., 2,3 and 4. More than 94% of the OATEs were concentrated in size classes 1 and 2.

4.2.9 Distribution of full-time and part-time workers in States : Statement 34 gives the percentage distribution of full-time and part-time workers for the OATEs, NDTEs and their total in the 14 major States. The statement has been presented separately for rural and urban sectors of the States. It is seen that OATEs in India employ 93% full-time and 7% part-time workers whereas NDTEs engage 95% full-time and 5% part-time workers. Among the States, Maharashtra, Karnataka, Orissa and Uttar Pradesh have relatively higher proportion of part time workers in OATEs. Whereas, Andhra Pradesh, Madhya Pradesh and West Bengal are the States which record hihger proportion of part-time workers in NDTEs. If OATEs and NDTEs are considered together, it is seen that Orissa, Maharashtra, Karnataka and Uttar Pradesh are the 4 leading States in the number of part-time workers. All the States in general employ high proportion of full-time workers in OATEs as well as in NDTEs. It is interesting to note than the OATEs are engaging more part-time workers than the NDTEs. This feature is common in almost all the States.

4.2.10 Workers per enterprise : Statement 35 and 35a show the number of workers per

Statement 34: Percentage distribution of full-time and part-time workers for the different enterprise types

India	**92.96**	**7.04**	**94.71**	**5.29**	**93.23**	**6.77**

enterprise by category of workers in the 14 major States. From statement 35, it is observed that worker per enterprise at the all-India level was more in the urban enterprises than in the rural enterprises and this feature was true for all States excepting Orissa. For Orissa, the average for full-time workers in rural areas is more than the urban average. The all-India estimate of workers per enterprise is 1.53 Persons of which 1.42 Persons are working full-time in an enterprise. Worker per enterprise was highest (1.70) for the State of Andhra Pradesh and it was lowest (1.35) for the State of Assam. The workers engaged in small trading activities were mainly full-time workers. From statement 35a, it is observed that female worker per 1000 enterprises was highest (560) for Orissa and it was much higher than all-India estimate (208) for the States like Andhra Pradesh, Tamil Nadu, Karnataka and Madhya Pradesh. The child worker per 1000 enterprises was highest (109) for the State of Orissa and it was higher than the all-India estimate (42) for States like Madhya Pradesh, Uttar Pradesh, Assam, Andhra Pradesh and Bihar. Child worker per 1000 enterprises was lowest for the State of Kerala (9).

4.2.11 Workers per enterprise at the all-India level : Statement 35b shows the employment rate (average number of workers per enterprise) for each enterprise type at the all-India level. Three categories of workers, namely, full-time, hired and total workers, have been considered in the Statement. It may be observed that the average number of workers per NDTE was 2.77 while it was 1.41 per OATE at the all-India. It is also seen that the employment rate for urban areas was more than that of the rural areas for OATEs as well as NDTEs. The majority of the workers engaged by either an OATE or an NDTE were found to be full-time workers. One interesting feature of the NDTEs was that the number of hired workers engaged by such enterprises was almost 50% of the total number of workers.

Statement 35 : Per enterprise total and full-time workers for the major States

This finding was the same for rural as well as urban sectors.

4.2.12 Distribution of female and child workers over the industries : Statement 36 shows the percentage distribution of female workers and Statement 36a that of child workers over different NIC groups. From Statement 36, it is observed that in rural areas female workers were mostly concentrated in the retail trading (54.6%) and free collection (44.4%) activities while in urban areas most of the female workers were engaged in retail trading activities (93.6%) only. In rural areas, out of the total female working strength, the highest proportion of females was found to be engaged in the activity of gathering of uncultivated materials such as gum, lac, honey, wild fruits, leaves etc. (NIC 054) and then in the retail trading enterprises in cereals and pulses, tea, coffee, spices etc., (NIC 650). In urban areas, female workers were engaged mainly in the NIC groups 650 and 688.

Statement 36a shows the distribution of total child workers by various trading activities. The feature is similar to the distribution of female workers. In rural sector, children are engagaged mostly in retail trade (55.8%) and free collection activity (40.3%) while in urban sector they are concentrated mainly in retail trading activities (92.9%). In rural areas, highest proportion of children are engaged in the NIC group 054 (31.9%) and then in the NIC group 650 (25.7%) and in urban areas highest proportion of children are engaged in the industry group 650.

4.2.13 Proportions of female workers and child workers to total workers : The proportions of female workers and child workers among total workers over the different trading activities have been presented in the statements 37 & 37a. The proportion of 15 or more female workers per 100 workers in rural sector are significantly high for NIC groups 054 (46.43%) and 053 (42.83%). In the urban sector, for NIC groups 053 and 040, higher proportions of females were working than males. From statement 37a, it may be noted that the proportion of 4 or more child workers per 100 workers was the highest in NIC group 614, i.e.wholesale trade in petrol, mobile oil and allied products (10.23%). Employment of child workers was prominent for NIC groups 054 and 053 in rural areas. Child workers were engaged in a lesser proportion in urban areas than in rural areas. In urban areas, the proportion of child workers was the highest in the activity of wholesale trade in un-

manufactured tobacco, *pan leaves, ganja*, etc., (NIC code : 603).

4.2.14 Percentages of female and child workers to total workers : Statements 38 and 38a show the major States arranged according to the percentage of female workers and the percentage of child workers among total workers. It is observed that nearly 14 workers out of 100 were female workers at the all-India level and the participation of the females in the small trading activities was highest for the State of Orissa (33.34). The States of Andhra Pradesh (25.62) and Tamil Nadu (19.45) were in the next two positions. Participation of females in the small trading activities was found to be the lowest for the State of Assam (4.55). West Bengal is just before it (4.80). From statement **38a**, it is observed that nearly 3% of total workers were child workers. This proportion was above 4% for the States of Orissa (6.48%), MP (4.69%) and Assam (4.04%). Employment of child workers is less than 1% for Kerela (0.72%), Punjab (0.83%) and Delhi (0.87%). It may be noted that Orissa recorded the maximum proportion of female as well as child workers among the 14 major States of India.

4.2.15 Gross Value Added per worker : Statements 39 and 39a present the GVA per enterprise and GVA per worker for the 14 major States (Statement 39) and for the various NIC divisions/groups (Statement 39a), respectively. From statement 39, it may be observed that in India the value added by small trading units was

Rs.1773 per worker. The value added per worker in the urban sector was almost 2.1 times the value added per worker in the rural sector. Punjab contributed the highest GVA per worker by the small trading units and Orissa the lowest (value added per worker in Orissa was one-third that of India) in this regard. GVA per enterprise for urban areas was 2.4 times that for rural areas. Statement 39a provides value added per worker by the various NIC divisions/groups. It may be observed that per worker value added by small trading units was the highest for industry division 62 (wholesale trade in machinery and equipment) which was slightly less than 5 times the value added by all industries taken together. Value added by the wholesale trading units was approximately 3.5 times the value added by the retail trading units. The free collection activity had the lowest value added per worker (Rs.676). The urban-rural ratio of value added per worker in wholesale trade was 3.64 and it was 1.73 for retail trade.

4.2.16 Fixed assets - owned and hired : Statement 40 shows the per enterprise value (Rs.) of fixed assets owned and hired by the 14 major States of India. The percentage of owned assets among the total assets are also provided in the statement for the States. It may be observed that at all-India level the per enterprise value of owned assets (Rs.26623) was higher than the hired assets (Rs.22458) and owned assets is constituted about 54.2% of the total assets. Among the States, Punjab recorded the highest value of assets owned as well as hired, followed by Maharashtra and Kerala. Orissa was found to record the lowest value of fixed assets per enterprise while Punjab showed the highest value. The percentage of assets owned per enterprise was observed to be the maximum for Assam, followed by Bihar and Orissa. Interestingly, all the three States mentioned above have recorded per enterprise fixed assets lower than the national average.

4.2.17 Fixed assets by trade types : Statement 40a provides per enterprise fixed assets owned and hired by wholesale trade, retail trade and all trade types for different enterprise types in India. The percentage of owned assets among total assets and also the sample number enterprises under each trade type are presented in the statement. It may be observed that among the OATEs, fixed assets per enterprise is uniformly higher in wholesale trade and the percentage share of owned assets among total fixed assets is more for the retail trading units. In case of NDTEs, per enterprise hired assets is more for wholesale trade but owned assets is almost same for the wholesale and retail trade. It is also observed that the percentage of owned assets among total fixed assets is more for the OATEs than the NDTEs. It may be noted that the sample number of enterprises for wholesale and retail trading enterprises do not add up to the sample number for all trade types. This is because of the existence of other trading enterprises.

4.2.18 Different types of fixed assets owned and hired: Statement 40b shows the per enterprise fixed assets by type of assets in the rural, urban and all-India. It is seen that 'building and other construction' accounted for the major part of fixed assets for rural as well as urban India. At the all-India level, per enterprise values of 'building and other construction' is found to be 87% of the value of total fixed assets; the corresponding percentages in the rural and urban areas being 82% and 88% respectively. The value per enterprise of hired assets in this category was found to be less than owned assets in rural areas but more than owned assets in the urban areas. This may be because of the fact that the enterprises in the rural areas have a tendency to depend on their owned assets. As expected, the per enterprise value of all types of fixed

Statement 40: Per enterprise value of fixed assets owned and hired (Rs.) and percentage of owned assets for 14 major States

State	fixed assets per enterprise (Rs)			percentage of fixed assets owned

other fixed assets	4458	132	4590
all	**26623**	**22458**	**49081**

assets in the urban areas were in general more than that in rural areas. The incidence of hiring of 'transport equipment' and 'other fixed assets' is found to be less in both the sectors.

4.2.19 Net additions to fixed assets : Statement 41 shows the per enterprise value (Rs.) of net additions to fixed assets for the major 14 States for rural, urban and combined sectors. It is observed that the average net additions to fixed assets in India was maximum for Kerala followed by Tamil Nadu and Gujarat. Orissa recorded the minimum net additions to fixed assets. It is interesting to note that the average net additions to fixed assets is same for Assam and Bihar. For hired assets, net additions were substantial in the States of Kerala, Tamil Nadu and Rajasthan. In respect of owned assets, however, Gujarat and Maharashtra are found to have added substantial value on the average after Kerala. It is also observed that the average net additions to fixed assets (hired and owned) were more for the urban areas than for their rural counterparts. Orissa and Assam were the two States which recorded minimum values of net additions to fixed assets in the rural and urban areas, respectively. Kerala showed maximum values of net additions to fixed assets in both the sectors.

4.2.20 Incidental expenditure for OATEs and NDTEs : Statement 42 presents the per enterprise value (Rs.) of 'other expenditure' (which are incidental to the entrepreneurial activity) for OATEs and NDTEs in India. The estimates are presented for wholesale as well as retail trading enterprises. As expected, such expeses are always higher in wholesale trade than in retail trade and this was true for OATEs

Statement 41: Net addition to fixed assets (Rs.) per enterprise for 14 major states

States	net additions to fixed assets (Rs) per enterprise								
	Rural			Urban			Rural + Urban		
	owned	hired	all	owned	hired	all	owned	hired	all

West Bengal	328	42	370	1166	675	1841	648	283	931
India	**551**	**269**	**820**	**1797**	**1583**	**3380**	**1074**	**821**	**1895**

Statement 42: Per enterprise value (Rs.) of 'other expenditure' by items of expenditure

India **Rural+Urban**

items of expenditure	wholesale		retail	
	OATE	NDTE	OATE	NDTE
packing materials	94	963	35	118
other consumable stores	31	76	8	24
electricity charges	37	185	37	190
printing & stationery charges	13	115	5	54
building - repair & maintenance	13	34	6	29
other - repair & maintenance	27	101	10	50
postage & telephone charges	63	498	11	163
transport charges	579	2097	116	545
rent on asset exept land	88	411	59	335
taxes, licence etc	41	365	14	223
local rates	33	115	10	75
any other expenses	250	643	73	311
total trd. Expenses	1267	5587	384	2119

as well as NDTEs. It is also observed that per enterprise expenditure on certain items are more in comparison to other items in OATEs.

The items were 'transport charges', 'packing materials', 'rent on assets except land' and 'other expenses'. For NDTEs, other than the above four items, substantial expenditure per enterprise is also seen against 'electricity charges', 'postage & telephone charges' and 'taxes, licence etc'. The expenditure on printing & stationary charges for a retail OATE is minimum (only Rs.5) and expenditure on transport charges for a wholesale NDTE is maximum (Rs.2097). The wholesale-retail ratio of other expenditure was 3.30 for OATEs and 2.63 for NDTEs at all-India level.

4.2.21 Gross value added by two approaches: Statement 43 gives the gross value added (GVA) per enterprise in two different approaches at all-India level for rural as well as urban sectors of the 14 major states. The GVA as calculated by the addition of the four **Factor Incomes** (*factor income approach*) has been compared with the GVA calculated in usual way as: **Receipts - Expenses + Change in Stock** (*direct approach*). It may be observed that the GVA per enterprise by direct approach has resulted in giving higher values than the GVA per enterprise obtained from factor income approach at all-India level. This is true for rural and urban areas. While looking at the States, however, reverse picture is seen against the following States: Assam(r&u), Karnataka(r&u), where the estimate thrown up by the factor income approach is found to be more than that by the direct approach. Substantial differences are observed in the estimates by the two approaches in the following cases: Punjab (r+u), Assam(u), Kerala(u) and Maharashtra (u). It is interesting

Statement 43: Per enterprise GVA by factor income approach and direct approach in the 14 major States

States	Rural			Urban		
	GVA/ent. by factor income approach	GVA/ent. by by direct approach	percent difference	GVA/ent. by factor income approach	GVA/ent. by by direct approach	percent difference

NDTE	9658	10718	10.97
		Rural+Urban	
OATE	1799	2074	15.29
NDTE	8564	9545	11.45

to note that the per enterprise estimates of GVA by the two approaches are almost equal in the case of rural areas of **Orissa.**

4.2.22 GVA by two approaches for OATEs and NDTEs: Statement 43a provides the comparision of per enterprise GVA for OATEs and NDTEs by direct approach and by factor income approach. It is seen that the estimates thrown up by the two approaches were more or less close to each other except for urban NDTEs, where a difference of about Rs.1060 was observed between the two estimates. In general, the difference between the estimates for NDTEs was found to be less than that for OATEs. Estimated GVA per enterprise was found to be higher for OATEs as well as NDTEs when calculated by direct approach.

4.2.23 Calculated and observed trade margins: Trade margins at the all-India level for selected commodity groups are presented in Statement 44 for wholesale and retail trading activities. The statement enables one to compare the trade margins reported in the schedule with those calculated from the purchase and sale prices of the commodities traded during the reference month. The calculated trade margins are obtained by using the formula:

Trade Margin = {(average sale price-average purchase price) / Average purchase price} X 100

It may be seen that the calculated trade margins are negative in as many as 6 cases but the observed trade margins are always positive. This may be due to the fact that the sale price of the trade commodities in certain cases is lower than the corresponding purchase price in the reference month. The commodity groups showing negative trade margins are: *bidi,* Cigarette etc., precious stones, bulbs and tubes, note books etc., iron rods in the wholesale trade and books and periodicals in the retail trade. The margins in the wholesale trade are, in general, lower than the corresponding retail rates and this feature is common for observed as well as calculated trade margins. However, for certain commodity groups like footwear, textiles, artificial jewellery, TV-VCP-VCR, washing machines, crockery & glassware, cane & bamboo products, coal, coke, firewood, etc., the calculated trade margins for wholesale trade are observed to be more than the corresponding retail rates. The observed trade margins differ markedly from the corresponding calculated margins in case of the following commodity groups: spices, fruits, *bidi,*

Statement 44: Calculated and observed trade margins for selected commodity groups at the all-India level

commodity group	trade margin				commodity group	trade margin

other leather products	11.3	14.8	18.6	19.2	coal, coke, fire wood	86.7	46.0	31.9	28.3
cotton textile	19.9	9.4	16.6	16.8	watch, spectacles, sun glasses, lighters etc.	4.6	12.2	19.0	19.8

cigarettes etc., toilet preparations, cotton textiles, jewellery, crockery & glassware, fertilizers, soft drinks, wine and intoxicants, etc. Calculated trade margins for jewellery and coal, coke, etc., are found to be abnormally high.

4.2.24 Number of months/days of operation of the enterprises: Statements 45 and 45a give the number of months and number of days operation of the enterprises on the average in the last year and last working month,

Statement 45: Average number of months of operation of different enterprise types in the last 365 days

enterprise type	perennial	seasonal	casual	all
		Rural		
OATE	11.2	3.5	7.1	10.5
NDTE	11.4	4.8	5.3	11.1
OATE+NDTE	**11.2**	**3.5**	**7.1**	**10.5**
		Urban		
OATE	11.3	5.6	8.0	11.2
NDTE	11.4	5.6	7.2	11.3
OATE+NDTE	**11.3**	**5.6**	**7.9**	**11.2**

Statement 45a: Average number of days of operation of different enterprise types in the last working month

enterprise type	perennial	seasonal	casual	All
		Rural		
OATE	25.6	21.5	17.3	25.2
NDTE	25.9	23.1	22.3	25.7
OATE+NDTE	**25.6**	**21.5**	**17.4**	**25.2**
		Urban		
OATE	26.1	24.7	19.6	26.1
NDTE	25.9	26.7	25.0	25.9
OATE+NDTE	**26.1**	**25.0**	**19.7**	**26.1**

respectively. The statements have focussed on the OATEs and NDTEs segregating them by their durations of operation. From statement 45, it is seen that OATEs on the average operated for lesser number of months than the NDTEs in perennial and casual enterprises. But for seasonal enterprises in the rural areas, NDTEs worked for lesser number of months. The number of months of operation was the highest for perennial, followed by casual and then for seasonal enterprises. This was true for both the sectors. The all-India average for number of months of operation by urban enterprises (11.2 months) was more than that for their rural counterpart (10.5 months). From statement 45a it is observed that number of days of operation in the last working month was maximum for perennial enterprises, followed by seasonal and least for casual enterprises in both the sectors. The days operation of the OATEs were fewer than those for the NDTEs in rural areas but the reverse was observed in the urban areas. In general, the urban enterprises were found to operate for more days than the rural enterprises. This observation is true for perennial, seasonal as well as casual enterprises. The all-India average for number of days of operation by an urban enterprise (26.1 days) was higher than the corresponding average (25.2 days) in the rural enterprise.

4.2.25 Number of visits required to fill in a schedule: Statement 46 shows the average number of visits required to canvass a schedule

Statement 46: Number of visits required to canvass a schedule in different sub-rounds

Sub Round	enterprise type	rural number of visit	urban number of visit
First	OATE	1.6	1.8
	NDTE	1.8	2.0
	OATE+NDTE	1.6	1.8
Second	OATE	1.6	1.7
	NDTE	1.7	1.9
	OATE+NDTE	1.6	1.8
Third	OATE	1.6	1.8
	NDTE	1.7	2.0
	OATE+NDTE	1.7	1.8
Fourth	OATE	1.6	1.6
	NDTE	1.7	1.7
	OATE+NDTE	1.6	1.6
All sub rounds	OATE	1.6	1.7
	NDTE	1.7	1.9
	OATE+NDTE	**1.6**	**1.8**

2.41.2 in the four sub-rounds (a sub-round means a period of 3 months' duration) of NSS 53rd round. It is seen that the number of visits required for filling up a schedule is **more than one** (1.8 visits at all-India level) which indicates the difficulty in collection of data from trading enterprises. The average number of visits required for an urban schedule was higher than that for a rural schedule. This may be due to greater reluctance on the part of the respondents in the urban areas. The number of visits required for an OATE was less as compared to the NDTEs. In this context, it may be mentioned that average time taken to canvass a trade schedule 2.41.2 in the NSS 53rd round was found to be 1.7 hours.

4.2.26 Yearly gross value added: The trade schedule of NSS 53 round was designed to throw up monthly estimates of GVA for the enterprises. As such, the comments given is statement 31, 39, 39a, 43 and 43a pertain to monthly value added only. However, a provision was kept in the schedule to collect 'number of months of operation' for the enterprises. Using this information, one may calculate the yearly value added from the monthly values as follows:

Yearly GVA = Monthly GVA x Number of months of operation

Statement 47 presents the yearly estimates of GVA by the above procedure for state X sector. It is observed that the small trading units added value of Rs.44,220 crores in 1997. The urban contribution was almost double the contribution of the rural units, although there were about 23 lakh more units in rural areas. The first three States that added substantial values were Uttar Pradesh, Maharashtra, and West Bengal.

SECTION - 5

REVISED NATIONAL INDUSTRIAL CLASSIFICATION

GROUPS AND CLASSES : CLASSIFICATION AT THREE & FOUR DIGIT LEVELS

(For Trade Survey of NSS 53rd Round)

group	class	description
		SECTION-0 : AGRICULTURE, HUNTING, FORESTRY AND FISHING
		DIVISION 04 : HUNTING, TRAPPING AND GAME PROPAGATION
040	040.0	Hunting, trapping, and game propagation other than for sports.
		DIVISION 05 : FORESTRY AND LOGGING
052	052.0	production of firewood/fuel wood (including char coal by burning) by exploitation of forests.
053	053.0	gathering of fodder by exploitation of forests.
054	054.0	gathering of uncultivated materials such as gums, resins, lac, barks, munjh, herbs, honey, wild fruits, leaves etc. by exploitation of forests.
059	059.0	Forestry services n.e.c.
		DIVISION 06 : FISHING (INCLUDING COLLECTION OF SEA PRODUCTS)
060	060.0	Ocean, sea and coastal fishing
061	061.0	Inland water fishing
063	063.0	Collection of pearls, conchs, shells, sponges and other sea products.
069	069.0	Other allied activities and services incidental to fishing n.e.c.
		SECTION-6 : WHOLESALE AND RETAIL TRADE AND RESTAURANTS A N D HOTELS
		DIVISION 60: WHOLESALE TRADE IN AGRICULTURAL RAW MATERIALS LIVE ANIMALS, FOOD, BEVERAGES, INTOXICANTS AND TEXTILES
600		Wholesale trade in cereals and pulses
	600.1	Procurement agencies dealing primarily in cereals and pulses.
	600.2	Wholesale trade in cereals and pulses other than by procurement agencies.
601		Wholesale trade in basic food-stuffs (other than cereals and pulses).
	601.1	Wholesale trade in fruits.
	601.2	Wholesale trade in vegetables.
	601.3	Wholesale trade in spices in primary forms.

group	class	description
	601.4	Wholesale trade in raw milk.
	601.5	Wholesale trade in meat, fish and eggs.
	601.9	Wholesale trade in other basic food-stuffs n.e.c.
602		Wholesale trade in textile fibres of vegetable/animal origin.
	602.1	Procurement agencies dealing primarily in cotton and jute.
	602.2	Wholesale trade in cotton and jute, other than by procurement agencies.
	602.3	Wholesale trade in raw wool.
	602.4	Wholesale trade in raw silk.
	602.9	Wholesale trade in other textile fibres of vegetable/animal origin n.e.c. (note : wholesale trade in man-made textile fibres is included in group 615).
603		Wholesale trade in un-manufactured tobacco, pan leaves, opium, ganja and cinchona etc.
	603.1	Wholesale trade in un-manufactured tobacco.
	603.2	Wholesale trade in pan leaves.
	603.3	Wholesale trade in opium, ganja and cinchona etc.
604		Wholesale trade in straw, fodder and other animal/poultry feed.
	604.1	Wholesale trade in straw and fodder.
	604.9	Wholesale trade in other animal/poultry feed.
605		Wholesale trade in live animals and poultry.
	605.1	Wholesale trade in live animals.
	605.2	Wholesale trade in poultry.
606		Wholesale trade in manufactured foodstuffs.
	606.1	Wholesale trade in dairy products.
	606.2	Wholesale trade in sugar, confectionery and bakery products.
	606.3	Wholesale trade in edible oils and fats.
	606.4	Wholesale trade in manufactured/processed spices.
	606.9	Wholesale trade in other manufactured food-stuffs n.e.c.
607		Wholesale trade in tea, coffee, cocoa, tobacco products and beverages other than intoxicants.
	607.1	Wholesale trade in tea, coffee and cocoa.
	607.2	Wholesale trade in manufactured tobacco and tobacco products.
	607.3	Wholesale trade in beverages other than intoxicants.

group	class	description
608	608.0	Wholesale trade in intoxicants like wines and liquors including incidental bottling.
609		Wholesale trade in textiles and textiles products like all kinds of yarn, fabrics, garments, and other made-up articles etc. (including second-hand textile goods).
	609.1	Wholesale trade in yarns.
	609.2	Wholesale trade in textile articles.
	609.3	Wholesale trade in made-up textile articles (except garments) such as blankets, carpets, felts etc.
	609.4	Wholesale trade in new ready made garments (except hosiery/knitted garments).
	609.5	Wholesale trade in hosiery/knitted textile products
	609.6	Wholesale trade in used/second-hand garments.
	609.9	Wholesale trade in textiles and clothing accessories, not elsewhere classified.
DIVISION-61 :		**WHOLESALE TRADE IN WOOD, FIREWOOD, PAPER, SKIN, LEATHER AND FUR, FUEL, PETROLEUM, CHEMICALS, PERFUMERY, CERAMICS, GLASS AND ORES, AND METALS**
610	610.0	Wholesale trade in cane, bamboo and thatches etc.
	610.8	Wholesale trade in wood.
	610.9	Wholesale trade in fire-wood.
611	611.0	Wholesale trade in paper and other stationery goods.
612	612.0	Wholesale trade in skin, leather, fur and their products.
613	613.0	Wholesale trade in fuel and lighting products.
614	614.0	Wholesale trade in petrol, mobile oil and allied products.
615	615.0	Wholesale trade in medicines and chemicals.
616	616.0	Wholesale trade in fertilisers and pesticides.
617	617.0	Wholesale trade in toiletry, perfumery and cosmetics.
618	618.0	Wholesale trade in metal, porcelain, and glassutensils, crockery and chinaware.
619		Wholesale trade in ores and metals.
	619.1	Wholesale trade in ores.
	619.2	Wholesale trade in metals in primary form (note : wholesale trade in precious metals is included in group 637)
DIVISION 62 :		**WHOLESALE TRADE IN ALL TYPES OF MACHINERY EQUIPMENT INCLUDING TRANSPORT EQUIPMENT**
620		Wholesale trade in agricultural and industrial machinery.
	620.1	Distributors of agricultural machinery and equipment.

group	class	description
	620.2	Distributors of industrial machinery and equipment other than electrical/ electronic.
621	621.0	Wholesale trade in electrical machinery and equipment.
622	622.0	Wholesale trade in electronic equipment and accessories.
623		Wholesale trade in transport and storage equipment.
	623.1	Distribution of heavy motor vehicles classified in group 373.
	623.2	Distribution of motor vehicles classified in group 374.
	623.3	Distribution of motor-cycles scooters and three wheelers etc. classified in group 375.
	623.4	Distribution of cycles, rickshaws and other non- mechanical transport equipment
	623.5	Distributors of other transport equipment n.e.c.
	623.6	Distributors of storage equipment.
	DIVISION 63 : WHOLESALE TRADE NOT ELSEWHERE CLASSIFIED	
630	630.0	Wholesale trade in furniture and fixtures
631	631.0	Wholesale trade in rubber, plastic and their products.
632	632.0	Wholesale trade in building materials.
633	633.0	Wholesale trade in hardware and sanitary fixtures.
634	634.0	Wholesale trade in household equipment, appliances n.e.c.
635	635.0	Wholesale trade in scientific, medical and surgical instruments.
636	636.0	Wholesale trade in watches/clocks, eye-glasses and spectacles frames.
637	637.0	Wholesale trade in precious metals, stones, and jewellery.
638	638.0	Wholesale trade in wastes and metal scraps.
639		Wholesale trade in miscellaneous goods not elsewhere classified.
	639.1	Wholesale trade in photographic equipment
	639.2	Wholesale trade in games, toys and sports-goods.
	639.9	Wholesale trade in other goods n.e.c.
	DIVISION 64 : COMMISSION AGENTS	
640	640.0	Commission agents dealing in agricultural raw materials, live animals, food, beverages, intoxicants and textiles.
641	641.0	Commission agents dealing in wood, paper, skin, leather and fur, fuel, petroleum, chemicals, perfumery, cosmetics, glass, ores and metals.
642	642.0	Commission agents dealing in machinery and equipment.
649	649.0	Other commission agents n.e.c.

group	class	description
		DIVISION 65: RETAIL TRADE IN FOOD AND FOOD ARTICLES, BEVER AGES, TOBACCO AND INTOXICANTS (NOTE : NON-SPECIALISED RETAIL TRADE ESTABLISHMENTS SUCH AS DEPARTMENTAL STORES, SUPER BAZARS, AND GENERAL STORES ARE CLASSIFIED IN GROUP 688 ALONG WITH NON-STORE RETAIL SALE ESTABLISH MENTS ENGAGED IN HOUSE TO HOUSE OR OTHER AMBULANT SALES)
650	650.0	Specialised retail trade in cereals and pulses, tea, coffee, spices, flour, and other basic food items.
651	651.0	Retail trade in vegetables and fruits.
652	652.0	Retail trade in meat, fish and poultry.
653	653.0	Retail trade in sweetmeat, bakery products dairy products and eggs.
654	654.0	Retail trade in aerated water, soft-drinks and ice-cream.
655	655.0	Retail trade in pan, bidi and cigarette
656	656.0	Retail trade in wine and liquor not consumed on the spot.
659	659.0	Retail trade in food and food articles, beverages, tobacco and intoxicants not elsewhere classified.
		DIVISION 66 : RETAIL TRADE IN TEXTILES
660		Retail trade in textiles.
	660.1	Exclusive showrooms of mills.
	660.2	Retail trade in textiles of hand loom and khadi sectors.
	660.3	Other retailers dealing in textiles of mill or power loom sectors.
	660.9	Other dealers in textiles n.e.c.
661		Retail trade in ready-made garments, hosiery/knitted garments, etc. (includes retail trade in second-hand garments).
	661.1	Retail trade in hosiery goods.
	661.2	Retail trade in ready-made garments (new) except hosiery goods.
	661.3	Retail trade in second-hand garments.
		DIVISION 67 : RETAIL TRADE IN WOOD, FUELS AND OTHER HOUSEHOLD UTILITIES AND DURABLES
670		Retail trade in wood firewood, coal, kerosene oil and cooking gases.
	670.1	Retail trade in coal, cinder coal dust.
	670.2	Retail trade in kerosene oil.
	670.3	Retail trade in cooking gases.

group	class	description
	670.8	Retail trade in wood.
	670.9	Retail trade in firewood.
671	671.0	Retail trade in footware.
672		Retail trade in crockery, glassware and plasticware.
	672.1	Retail trade in crockery and glassware (including malamine crockery).
	672.2	Retail trade in plastic wares.
673	673.0	Retail trade in utensils (except those specialising in plastic wares).
674	674.0	Retail trade in furniture.
675		Retail trade in electric/electronic equipment (including watches and clocks).
	675.1	Retail trade in household electric equipment and appliances (including air conditioners, refrigerators and room-coolers etc.)
	675.2	Retail trade in audio/video household equipment (including TV sets, transistors, VCRs etc.)
	675.3	Retail trade in watches and clocks.
	675.4	Retail trade in photographic equipment (like cameras, photo films, etc.
	675.9	Retail trade in other electric and electronic goods n.e.c.
676	676.0	Retail trade in jewellery.
679		Retail trade in fuel and other household utilities and durables not elsewhere classified.
	679.1	Retail trade in gas stoves and other cooking appliances.
	679.2	Retail trade in sewing and knitting machines.
	679.9	Retail trade in other household utilities and durables n.e.c.
DIVISION 68 : RETAIL TRADE N.E.C.		
680	680.0	Retail trade in books, magazines and stationery (including distribution of newspapers).
681	681.0	Retail trade in agricultural inputs, viz. seeds, fertilisers and pesticides.
682	682.0	Retail trade in motor fuels.
683	683.0	Retail trade in building materials.
684	684.0	Retail trade in agricultural machinery and equipment.
685	685.0	Retail trade in industrial machinery and equipment electrical and non-electrical.
686	686.0	Retail trade in transport equipments.
687	687.0	Retail trade in pharmaceutical, medical and orthopaedic goods.
688		Non-specialised retail trade including non-store retail trade.

group	class	description
	688.1	Super bazars and other cooperative stores.
	688.2	Fair price shops.
	688.3	General stores.
	688.4	Retail sale via mail-order houses.
	688.5	Retail sale via stalls and markets (Note : This class includes retail sale of any kind of product in a usually movable stall either along a public road or on a fixed market place. Also included are sales via peddlers).
	688.6	Retail sale via house-to-house or other ambulant sales.
	688.8	Other non-store retail sales n.e.c.
	688.9	Other non-specialised retail trade n.e.c.
689		Retail trade not elsewhere classified.
	689.1	Retail trade in sun-glasses, spectacles frames etc.
	689.2	Junk shops (waste articles, etc.)
	689.3	Free collection for retail trade of waste-paper, rags, ash, coal etc.
	689.9	Other retail trade n.e.c.
DIVISION 89 : BUSINESS SERVICES NOT ELSEWHERE CLASSIFIED		
890	890.0	Auctioneering services.

N.B : 'n.e.c' means 'not elsewhere classified'.

Part II

SURVEY RESULTS

Survey Results on Small Trading Units in India and Their Basic Characteristics : 1997 : NSS 53rd Round (January – December, 1997)

Survey Results on small trading units in India and their Basic Characteristics : 1997

List of All-India Detailed Tables

Table No.	Description	Page No.
1	Number of enterprises of each type (OATE and NDTE) and their percentage distribution by industry division/group	S1-S33
2	Number of workers by industry division/group	S34-S66
3	Estimated number of enterprises and value added by maintenance of accounts and by industry division	S67-S100
4	Gross value added per enterprise by industry division/group	S101-S133
5	Average trade margin for selected commodity groups for wholesale and retail trade	S134-S165
5.1	Average trade margin of different commodity groups for wholesale and retail trade by enterprise type	S166-S169
6	Selected items per enterprise by type of trade	S170-S186
7	Number of enterprises facing different types of problem by enterprise type and type of trade	S187-S190
8	Percentage distribution of enterprises by maintenance of accounts for different types of trade and different durations of operation.	S191-S194
9	Percentage distribution of enterprises of different types by duration of operation	S195-S206
9.1	Percentage distribution of enterprises of different types by duration of operation for each type of trade	S207-208
10	Percentage distribution of household enterprises by sex of the owner for different industry divisions/groups and enterprise types	S209-S241
11	Percentage distribution of household enterprises by social group for different enterprise types and type of trade.	S242-S274
12	Percentage distribution of enterprises by status in the last three years for different industry division/group, enterprise type and social group	S275-S278
13	Number of enterprises by type of trade and size class of worker	S279-S311
14	Number of full-time and part-time worker in hired and other enterprises for various industry divisions/groups	S312-S344

Table no.	Description	Page no.
15	Gross value added (Rs.) per worker by enterprise type and industry division/group (Rural)	S345-S377
15.1	Gross value added (Rs.) per worker by enterprise type and industry division/group (Urban)	S378-S410
16	Per enterprise value (Rs.) of fixed assets owned/rented for different types of assets by enterprise type and industry division/group. (Rural)	S411
16.1	Per enterprise value (Rs.) of fixed assets owned/rented for different types of assets by enterprise type and industry division/group. (Urban)	S412
17	Per enterprise value (Rs.) of net addition to fixed assets during last year for different types asset by enterprise type and type of trade	S413
18	Calculated trade margin of different commodity groups by enterprise type for wholesale and retail trade (Rural)	S414-S445
18.1	Calculated trade margin of different commodity groups by enterprise type for wholesale and retail trade (Urban)	S416-S417
19	Distribution of sample enterprises over trade margin classes (Rural)	S418-S420
19.1	Distribution of sample enterprises over trade margin classes (Urban)	S421-S423
20	Percentage distribution of adult and child workers by sea and industry division/group	S424-S456
21	Average number of months of operation in the last 365 days by duration of operation.	S257
21.1	Average number of months of operation in the last 365 days by enterprise type and duration of operation for different types of trade	S258
22	Average number of days of operation in the last working month by enterprise type and duration of operation	S459-S462
22.1	Average number of days of operation in the last working month by enterprise type and duration of operation for different types of trade	S463
23	Per enterprise value (Rs.) of rent, interest, compensation to workers and trader's net earnings by industry division/group	S464-S491
24	Per enterprise value (Rs.) of 'other expenditure' by enterprise prise type and type of trade for different states/uts.	S492-S494
24.1	Per enterprise value (Rs.) of 'other expenditure' by different items of expenditure for enterprise type and type of trade.	S495-S497

भारत में लघु व्यापारिक इकाइयां और उनकी मूल विशेषताएं: 1997
रा.प्र.सर्वे. का 53वाँ दौर (जनवरी—दिसम्बर, 1997)

1. **खण्ड-एक** हि. 1-15
2. **खण्ड-दो** हि. 16-38

भारत में लघु व्यापारिक इकाइयाँ
और उनकी मूल विशेषताएं:
रा. प्र. सर्वे. का 53 वां दौर (जनवरी-दिसम्बर, 1997)

सर्वेक्षण निष्कर्ष

खण्ड-एक

1.0 वर्तमान अंक लघु व्यापार इकाईयों अर्थात स्वं लेखा व्यापार प्रतिष्ठानों और गैर-निर्देशिका व्यापार प्रतिष्ठानों के सर्वेक्षण पर आधारित है जो जनवरी से दिसम्बर, 1997 के दौरान रा.प्र.सर्वे. से के अपने 53 वें दौर द्वारा आयोजित किया गया था। अंक का केन्द्र बिन्दु असंगठित व्यापार क्षेत्र के कुछ महत्वपूर्ण विशेषताओं पर है। अंक में कवर की गयी प्रमुख विशेषताएं अर्थात : उद्यमों की संख्या, रोजगार, सकल वर्धित मूल्य और व्यापार सीमान्त लाभ है। उद्यमों का प्रतिशत वितरण एन आई सी, व्यापार के प्रकार, सामाजिक समूह प्रचालन की अवधि, स्वामित्व के लिंग और लेखा के रख रखाव जैसे कुछ वर्गीकरणीयचरों के अनुसार अंक में भी प्रस्तुत की गयी है। मुख्य निष्कर्ष भिन्न-भिन्न विवरणियों के प्रारूप में संक्षिप्त किए गए हैं।

1.1 सर्वेक्षित प्र.च.ई. की संख्या :

विवरणी-1 विभिन्न राज्यों और संघ शासित क्षेत्रों के लिए सर्वेक्षित प्रतिदर्श प्र.च.ई. और द्वि. च.ई. की संख्या देती है। यह भी देखा जा सकता है कि रा.प्र.सर्वे. 53वें दौर में, 5988 गांव और 7138 रा.प्र.स. ब्लाक समस्त भारत में सर्वेक्षित किए गए थें इन सर्वेक्षित गांवो और खण्ड़ों में, आकड़े क्रमश: 72529 और 83146 उद्यमों से एकत्रित किए गए थे। संघ शासित क्षेत्रों और अपेक्षाकृत छोटे राज्यों जैसे अरूणाचल प्रदेश, गोवा, हरियाणा, हिमाचल प्रदेश, जम्मू और काश्मीर, मणीपुर, मेघालय, मिजोरम, नागालैण्ड़, सिक्किम, और त्रिपुरा के लिए प्रतिदर्श आकार छोटा था। यह भी देखा गया है कि देश के 14 प्रमुख राज्यों अर्थात: आन्ध्र प्रदेश, असम, बिहार, गुजरात, कर्नाटक, केरल, मध्यप्रदेश, महाराष्ट्र, उड़ीसा, पंजाब, राजस्थान, तमिलनाडु, उत्तर प्रदेश, और पश्चिम बंगाल में प्र.च.ई. और द्वि.च.ई. को 90% से भी अधिक इकाईयां है। प्रति प्र.च.ई. सर्वेक्षित उद्यमों की संख्या ग्रामीण और शहरी क्षेत्रों में क्रमश: 12.1 और 11.6 थी। समस्त भारत स्तर पर, द्वि.च.ई. /प्र.च. ई. का अनुपात 11.9 अर्थात प्रति गांव/ब्लाक 12 उद्यम था।

1.2 समस्त-भारत स्तर पर मुख्य अनुमान:

रा.प्र.सर्वे. 53वें दौर के मुख्य निष्कर्ष का सार विवरणी-2 में दिया गया है। यह देखा गया है कि 1977 में, भारत में लगभग 145 लाख व्यापार उद्यम थे जिनमें 92% स्वं.ले. व्य.प्र. और 8% गैर-नि.व्या.प्र. थे। यह भी देखा गया है कि स्व. ले. व्या. प्र. ग्रामीण (कुल का 96.6) और शहरी

गैर–नि.व्या.प्र. का प्रतिशत ग्रामीण उद्यमों में मात्र 4 और शहरी उद्यमों में 15 था। राज्यों में, गैर–नि. व्या.प्र. की काफी बड़ी संख्या पश्चिम बंगाल (0. 40 लाख), महाराष्ट्र (0.39 लाख) और केरल (0.25 लाख) ग्रामीण क्षेत्रों में है। शहरी क्षेत्रों में, गैर–नि.व्या.प्र. की बड़ी संख्या तमिलनाडु (1. 14 लाख), महाराष्ट्र (0.29 लाख) और केरल (0.25) ग्रामीण क्षेत्रों में है। शहरी क्षेत्रों में, गैर–नि.व्या.प्र. की बड़ी संख्या तमिलनाडु (1.14 लाख), महाराष्ट्र (1.06 लाख), पश्चिम बंगाल (1.04 लाख) और उत्तर प्रदेश (0.80 लाख) पायी गयी है। स्व.ले.व्या.प्र. लगभग सभी राज्यों में प्रचुरता में है। ग्रामीण क्षेत्र में उत्तर प्रदेश, पश्चिम बंगाल, उड़ीसा, बिहार और आन्ध्र प्रदेश और शहरी क्षेत्रों में उत्तर प्रदेश, पश्चिम बंगाल, तमिलनाडु, महाराष्ट्र और आंध्र प्रदेश स्व. लेखा व्यापार प्रतिष्ठानों की संख्या में अग्रणीय है। उद्यमों की संख्या का समग्र अनुमान उत्तर प्रदेश में उच्चतम है इसके बाद पश्चिम बंगाल, बिहार, आन्ध्र प्रदेश और उड़ीसा में व्यापारिक उद्यमों की संख्या 1110053 थी उनमें से अधिकांश नि:शुल्क संग्रहण उद्यम (67%) थे। इन नि:शुल्क संग्रहण उद्यमों में से अधिकांश राज्यों के ग्रामीण क्षेत्रों (97%) में स्थित थे।

1.4 स्वामी के लिंग के अनुसार विभिन्न व्यापार–प्रकार के पारिवारिक उद्यम: विवरणी–4 व्यापार के विभिन्न प्रकारों के पुरूष या महिला स्वामित्व वाले पारिवारिक उद्यम का प्रतिशत अंश दर्शाती है। यह देखा जा सकता है कि उद्यमों के 93.3% से भी अधिक राष्ट्रीय स्तर पर पुरूष स्वामित्व वाले हैं। यह विशेषता ग्रामीण क्षेत्र में लगभग वही है और शहरी क्षेत्रों में भी वही है जहॉ महिला स्वामित्व का प्रतिशत सीमान्त रूप से अधिक है। महिला स्वामित्व का प्रतिशत दोनों ग्रामीण और शहरी क्षेत्रों में "निशुल्क संग्रहण" के लिए अधिकतम है। महिला "कमीशन एजेन्ट" का प्रतिशत ग्रामीण क्षेत्रों में सीमान्त रूप से अधिक देखा गया है। नीलामी सेवाओं में ऐसी कोई उद्यम

विवरणी–4 : स्वामी के लिंग और व्यापार के प्रकार के अनुसार पारिवारिक उद्यमों का प्रतिशत वितरण

भारत

व्यापार का प्रकार	ग्रामीण		सूचना देने वाले उद्यमों की संख्या	शहरी		सूचना देने वाले उद्यमों की संख्या	संयुक्त		सूचना देनेवाले उद्यमों की संख्या
	पुरूष स्वामित्व	महिला स्वामित्व		पुरूष स्वामित्व	महिला स्वामित्व		पुरूष स्वामित्व	महिला स्वामित्व	
1	2	3	4	5	6	7	8	9	10
थोक	99.3	0.7	2858	97.3	2.7	5367	98.4	1.6	8225

नहीं हैं जो महिलाओं के स्वामित्व वाला हो। यह भी देखा गया है कि "थोक व्यापार में" 98% से भी अधिक उद्यम पुरूष स्वामित्व वाले और इस श्रेणी में महिला स्वामित्व वाले उद्यमों का प्रतिशत ग्रामीण क्षेत्रों के मुकाबले में लगभग चार गुना अधिक है। उन "फुटकर व्यापार" के लिए विशेषता लगभग वही है जहां महिला स्वामित्व वाले उद्यम पुरूष स्वामित्व वाले 93% के मुकाबले लगभग 7% है। महिला स्वामित्व की संख्या शहरी क्षेत्रो में अधिक है। फुटकर व्यापार इकाईयों में महिला स्वामियों का प्रतिशत शहरी क्षेत्रों में अधिक पाया गया।

1.5 स्वामी के सामाजिक समूह के अनुसार भारत में पारिवारिक उद्यमों (स्व.ले.व्या.प्र. और गैर–नि.व्या.प्र.) का प्रतिशत वितरण:

विवरणी–5 विभिन्न सामाजिक समूहों अर्थात, अ.ज.जा., अ.जा., अ.प.जा. और अन्य स्वामित्व वाले स्व लेखा व्यापार प्रतिष्ठानों और गैर निर्देशिका व्यापार प्रतिष्ठानों का प्रतिशत वितरण दर्शाती है। विवरणी से, यह देखा जा सकता है कि समस्त भारत में लगभग 82% उद्यम दो श्रेणियों अर्थात: अ.प.जा. और अन्य स्वामित्व वाले हैं। शहरी क्षेत्र में, लगभग 97% उद्यम उपरोक्त दो सामाजिक समूहो के स्वामित्व में हैं। शेष 3% अ.ज.जा. और अ.जा. द्वारा बाटे गए हैं।

अ.ज.जा. या अ.जा. स्वामित्व वाले उद्यमो का प्रतिशत सामान्यत: गैर नि.व्या.प्र. के मुकाबले में स्व.ले.व्या.प्र. में अधिक है। पुन: यह लक्षण शहरी क्षेत्रो की अपेक्षा ग्रामीण क्षेत्रो में अधिक प्रबल है।

1.6 प्रचालन अवधि के अनुसार भारत में स्व.ले.व्या.प्र. और गैर–नि.व्या.प्र. का प्रतिशत वितरण:

विवरणी–6 प्रचालन की अवधि के अनुसार

विवरणी–5 : विभिन्न उद्यम प्रकारो के लिए स्वामी के सामाजिक समूह के अनुसार उद्यमो का प्रतिशत वितरण

क्षेत्र	उद्यम प्रकार	स्वामी का सामाजिक समूह			अन्य	सभी	प्रतिवेदित उद्यामों की संख्या
		अ.ज.जा.	अ.जा.	अ.प.जा.			
ग्रामीण	स्व.ले.व्या.प्र.	12.5	13.1	23.8	50.6	100.0	64706
	गैर.नि.व्या.प्र.	1.5	8.9	19.4	70.2	100.0	66482
	स्व.ले.व्या.प्र. + गैर.नि.व्या.प्र.	8.2	11.5	22.1	58.2	100.0	131188
शहरी	स्व.ले.व्या.प्र.	1.4	5.3	20.3	73.0	100.0	7715
	गैर.नि.व्या.प्र.	0.7	1.6	12.6	85.1	100.0	16645
	स्व.ले.व्या.प्र. + गैर.नि.व्या.प्र.	0.9	2.5	14.5	82.1	100.0	24360
सयुंक्त	स्व.ले.व्या.प्र.	12.1	12.9	23.6	51.4	100.0	72421
	गैर.नि.व्या.प्र.	1.4	7.8	18.4	72.4	100.0	83127
	स्व.ले.व्या.प्र. + गैर.नि.व्या.प्र.	7.6	10.7	21.4	60.2	100.0	155548

विवरणी–6: प्रचालन की अवधि के अनुसार स्व.ले.व्या.प्र. और गैर.नि.व्या.प्र. का प्रतिशत वितरण

भारत

उद्यम	ग्रामीण			शहरी			ग्रामीण + शहरी		
प्रकार	बारहमासी	मौसमी	अनियत	बारहमासी	मौसमी	अनियत	बारहमासी	मौसमी	अनियत
1	2	3	4	5	6	7	8	9	10
स्व.ले.व्या.प्र.	89.7	9.4	0.9	98.1	1.6	0.3	92.9	6.4	0.7
गैर.नि.व्या.प्र.	94.5	5.1	0.4	98.8	1.1	0.1	97.7	2.1	0.2
सयुंक्त	89.8	9.3	0.9	98.2	1.5	0.3	93.3	6.0	0.6

स्व.ले.व्या.प्र. और गैर–नि.व्या.प्र. का प्रतिशत वितरण दर्शाती है। विवरणी से, यह देखा गया है कि मौसमी और अनियत उद्यमों की उपस्थिति स्व.ले.व्या.प्र. के मामलों में अपेक्षाकृत अधिक है और ऐसे उद्यम आनुपातिक रूप से ग्रामीण क्षेत्रों में अधिक पाये गए हैं। अनियत गैर–नि.व्या.प्र. दोनों क्षेत्रों में लगभग विद्यमान नहीं है, "मौसमी गैर–नि.व्या.प्र. ग्रामीण क्षेत्रो (5.1%) और शहरी क्षेत्रो में (1.1%)में भी सीमान्त रूप से पाये गए हैं। स्व.ले.व्या.प्र. का 93% और गैर–नि.व्या.प्र. का 98% बारहमासी उद्यम होना पाया गया है। शहरी क्षेत्रों में, बारहमासी उद्यमो की प्रधानता इस तथ्य से स्पष्ट है कि लगभग 98% उद्यम (स्व.ले. व्या.प्र. और गैर–नि.व्या.प्र. साथ–साथ लिए गए) इस श्रेणी के अर्न्तगत आते हैं। मौसमी उद्यम शहरी उद्यमों की केवल 1.5% है जबकि वे ग्रामीण क्षेत्रों में पाये गए उद्यमों का 9.3% है।

1.7 लेखों के रखरखाव के अनुसार भारत में उद्यमो का प्रतिशत वितरण:

विभिन्न रा.औ.व. प्रभागो/समूहों पर लेखा के रखरखाव के अनुसार उद्यमों का प्रतिशत वितरण विवरणी–7 में प्रस्तुत किया गया है। यह देखा गया है कि ग्रामीण क्षेत्रों में उद्यमों का लगभग 6% और शहरी क्षेत्रों में उद्यमो का लगभग 14% ने रखरखाव किया। लेखे का रखरखाव, जैसी कि उम्मीद की गयी थी। थोक व्यापार इकाईयां (उप–योग 60–63) में उच्च था। यहां ग्रामीण क्षेत्रो में 18% उद्यम और शहरी क्षेत्रों में 34% उद्यम लेखा रखने वाले पाये गए। नि:शुल्क संग्रहण श्रेणियों में 1% से भी कम के मामलो में लेखों का रखरखाव होना पाया गया। यह भी देखा गया है कि शहरी उद्यमों ने सामान्यत: ग्रामीण उद्यमों से अधिक अनुपात में लेखे रखे। लेखा रखने वाले थोक व्यापारिक उद्यमों का प्रतिशत रा.औ.व. प्रभाग: में सर्वाधिक था; ग्रामीण क्षेत्रों में 63 और रा.औ.व. प्रभाग शहरी क्षेत्रों में 62 था। फुटकर व्यापारिक इकाईयों में, ग्रामीण क्षेत्रों में 68 एन. आई.सी. प्रभाग: और शहरी क्षेत्रों में 67 एन. आई.सी. प्रभाग: लेखा रखने वाले उद्यमों का उच्चतम अनुपात दर्शाता है।

1.8 व्यापार के प्रकार के अनुसार महिला कामगारो का वितरण:

भारत के ग्रामीण और शहरी क्षेत्र के लिए व्यापार के विभिन्न प्रकारों में महिला कामगारों की कुल संख्या और उनका प्रतिशत प्रतिनिधित्व विवरणी–8 में दिया गया है। यह देखा जा सकता है कि ग्रामीण और शहरी क्षेत्रों में क्रमश: लगभग 21 लाख और 9 लाख महिला कामगार हैं। इन कामगारो का अधिकतम अनुपात फुटकर व्यापारिक गतिविधयों

विवरणी–7 : विभिन्न रा.औ.व. प्रभाग/समूह के लिए लेखों के रखरखाव के अनुसार उद्यमों का प्रतिशत

भारत

सभी	5.95	94.5	8413351	13.62	86.38	6091019

नोट : थो. व्या. = थोक व्यापार, फु. व्या = फुटकर व्यापार
अ.व.न. = अन्यत्र वर्गीकृत नहीं

में लगा हुआ है। फुटकर व्यापार में कार्यरत महिला कामगारो का प्रतिशत शहरी क्षेत्र में 93.6 है। तथापि ग्रामीण क्षेत्र में, महिला कामगार नि:शुल्क संग्रहण श्रेणी में भी (44.4) बड़े अनुपात में देखी गयी हैं।

1.9 रा.औ.व. प्रभाग /समूह के अनुसार बाल कामगारों का वितरण :

विवरणी–9 राष्ट्रीय स्तर पर विभिन्न एन. आई.सी. प्रभागो/समूहो में नियोजित बाल कामगारों की संख्या दर्शाती है। विवरणी से यह देखा गया है कि नीलामी कर्ताओं (एन.आई.सी. 890) ने किसी बाल कामगारो को नियोजित नहीं किया। ग्रामीण क्षेत्र में नियोजित 4.18 लाख बाल कामगारो में, 2.33 लाख (56%) फुटकर व्यापारिक उद्यमों में लगे हुए थे। बाल कामगारो की (1.69 लाख) एक महत्वपूर्ण संख्या नि:शुल्क संग्रहण में लगी

विवरणी–8 व्यापार के अनुसार महिला कामगारो की संख्या और प्रतिशत

व्यापार की किस्म	ग्रामीण		शहरी	
	कामगारों की संख्या	कामगारों का प्रतिशत	कामगारों की संख्या	कामगारों का प्रतिशत
थोक व्यापार	18373	0.86	26074	2.91
कमीशन एजेन्ट	3324	0.16	8225	0.91
फुटकर व्यापार	1161904	54.62	839210	93.56
नीलामी	0	0.0	0	0.0

सभी	2127128	100.0	896967	100.0

* यह अनुपात 17.94 में परिवर्तन हो जाएगा, यदि उड़ीसा को हटा दिया जाता है।

हुई पायी गयी। शहरी क्षेत्र में, बाल कामगारो की कुल संख्या लगभग 2 लाख पायी गयी जिसमें से 1.83 लाख (93%) फुटकर व्यापारिक इकाईयों में लगे हुए थे। थोक व्यापारिक इकाईयों में, बाल श्रमिको की अधिकतम संख्या दोनो क्षेत्रों में एन. आई.सी. प्रभाग: 60 द्वारा उपयोग की गयी थी। इसी प्रकार, फुटकर व्यापारिक उद्यमों में, एन.आई. सी. प्रभाग 65 और 68 में ग्रामीण और शहरी क्षेत्रों में बाल श्रमिकों की एक महत्वपूर्ण संख्या लगी हुई पायी गयी थी। सभी एन.आई.सी. प्रभागों/समूहो में बाल श्रमिको का उच्चतम प्रतिशत ग्रामीण (40.3%) और शहरी (48.1%) क्षेत्रों में एन.आई.सी. प्रभाग: 65 में लगे हुए पाये गये थे।

1.10 लिंग और व्यापार के प्रकार के अनुसार कामगारो का प्रतिशत:

विवरणी–10 में कामगारो के लिंग के अनुसार विभिन्न व्यापार प्रकार में कामगारो का प्रतिशत प्रस्तुत किया गया है।

यह देखा गया है कि राष्ट्रीय स्तर पर, 84% कामगार व्यस्क पुरूष है, 13% कामगार व्यस्क महिलाएं है, 2% लड़के हैं और 1% लड़कियां हैं। व्यस्क पुरूष कामगार सभी व्यापार प्रकारों में प्रभावी है। विशेष रूप से, नीलामी सेवाओं में 100% कामगार व्यस्क पुरूष देखे गए हैं। व्यस्क महिलाएं अधिकतर निशुल्क संग्रहण में लगी हुई हैं। फुटकर व्यापारिक इकाईयों में भी उनकी उपस्थिति महत्वपूर्ण है। बाल कामगार (लड़के + लड़कियां) निशुल्क संग्रहण और फुटकर व्यापारिक इकाईयों में बड़ी संख्या में लगी हुई हैं। बाल कामगारो में निशुल्क संग्रहण को छोड़कर जहां लड़कियां लड़को से संख्या में थोड़ी अधिक है लड़कियो से अधिक अनुपात में नियोजित हैं।

1.11 भारत में स्व.ले.व्या.प्र. और गैर.व्या.प्र. के लिए प्रति उद्यम स.मू.व.:

विवरणी–11 भारत के ग्रामीण और शहरी क्षेत्रों में व्यापार के विभिन्न प्रकारो के स्व.ले.व्या. प्र. और गैर–नि.व्या.प्र. के लिए प्रति उद्यम स.मू. व. उपलब्ध कराती है। इस विवरणी से भी यह देखा जा सकता है कि प्रति उद्यम स.मू.व. दोनो क्षेत्रों में स्व.ले.व्या.प्र. से गैर.नि.व्या.प्र. से अधिक

विवरणी–9 : उद्योग प्रभाग/समूह के अनुसार बाल कामगारों की संख्या और प्रतिशत

भारत

रा.औ.व. प्रभाग/समूह	ग्रामीण		शहरी	
	कामगारों की संख्या	प्रतिशत	कामगारों की संख्या	प्रतिशत
1	(2)	(3)	(4)	
खाद्य, वस्त्र में थो. व्या. (60)	13304	3.18	5920	3.00
लकड़ी, पेपर में थो. व्या. (61)	496	0.12	1757	0.89
मशीनरी में थो. व्या. (62)	0	—	80	0.04
थो. व्या., अ.व.न. (63)	689	0.16	3378	1.71
थोक व्यापार	14487	3.46	11135	5.65
कमीशन एजेन्ट (64)	1932	0.46	1183	0.60
खाद्य वस्तुओं में फु. व्या. (65)	168678	40.34	94840	48.12

नि:शुल्क संग्रहण (उप जोड़ : 040.069)	168661	40.33	1631	0.83
सभी उद्योग	418172	100.00	197106	100.00

था। प्रति उद्यम स.मू.व. शहरी क्षेत्र में थोक व्यापार के अधिकतम था, लेकिन यह ग्रामीण क्षेत्र में द्वितीय उच्चतम था।

नीलामी सेवाओं ने ग्रामीण क्षेत्र में प्रति उद्यम अधिकतम स.मू.व. दिया। थोक गैर–नि.व्या.प्र. दोनों क्षेत्रों में प्रति उद्यम अधिकतम स.मू.व. देते हैं। शहरी क्षेत्रों में निशुल्क संग्रहण का योगदान पर्याप्त (5329 रू.) तथा यद्यपि उन्होंने ग्रामीण क्षेत्र (847 रू.) में बहुत कम योगदान दिया। यह सम्भवत: इस तथ्य के कारण हैं कि निशुल्क संग्रहण शहरी क्षेत्रों की अपेक्षा ग्रामीण क्षेत्रों में अधिक प्रचलित है। लेकिन ऐसे उद्यमों द्वारा वर्धित मूल्य ग्रामीण क्षेत्रों में बहुत कम था। शहरी क्षेत्रों में नीलामी कर्ता ने अपनी ग्रामीण प्रतिपक्षो के मुकाबले प्रति उद्यम कम स.मू.व. का योगदान दिया। व्यापार के अन्य प्रकारों के लिए, शहरी योगदान ग्रामीण योगदान से हमेशा अधिक था।

1.12 विभिन्न एन.आईसी. प्रभागो के लिए प्रति उद्यम स.मू.व.:

विवरणी 12 समस्त भारत स्तर पर विभिन्न एन.आई.सी. प्रभागो के लिए उद्यम (रू.)

विवरणी–10 : लिंग और व्यापार के प्रकार के अनुसार कामगारों का प्रतिशत

भारत

व्यापार का प्रकार	व्यस्क कामगार		बाल कामगार		कुल कामगार
	पुरूष	महिला	पुरूष	महिला	
1	2	3	4	5	6
थोक व्यापार	95.45	2.85	1.61	0.09	1511785
कमीशन एजेन्ट	95.16	3.80	0.98	0.06	298733
फुटकर व्यापार	86.64	11.00	2.02	0.34	17647858
नीलामी कर्ता	100.0	0.00	0.00	0.00	1872
नि:शुल्क संग्रहण	60.94	32.73	3.14	3.19	2691971
सभी	84.23	12.99	2.11	0.66	22152219

अनुमानित स.मू.व. देती है। ग्रामीण और शहरी योगदान क्रमश: 1722 रू. और 4068 रू. है। राष्ट्रीय स्तर पर प्रति उद्यम स.मू.व. 2708 रू. था। स्पष्टतया शहरी उद्यमों ने औसतन अधिक मूल्य वृद्धि की। ग्रामीण क्षेत्रो में, उद्योग प्रभाग 62 में सकल वर्धित मूल्य प्रति उद्यम अधिकतम (1142 रू.) था इसके बाद था उद्योग समूह 890 (4308 रू.) और रा.औ.व. (3876 रू.) शहरी क्षेत्रों में भी उद्योग प्रभाग 62 में प्रति उद्यम अधिकतम सकल वर्धित मूल्य (19521 रू.) था। इसके बाद थे प्रभाग 63 और 61 जिनका सकल वर्धित मूल्य क्रमश: 11703 रू. और 10847 रू. था। यदि ग्रामीण और शहरी क्षेत्रों को साथ साथ रखा जाता है तो एन.आई.सी. 62 में प्रति उद्यम 19005 रू. (अधिकतम स.मू.व.) था। इसके बाद थे उद्योग प्रभाग 61

विवरणी–11: व्यापार प्रकार के अनुसार स्व.ले.व्या.प्र. और गैर.नि.व्या.प्र. के लिए प्रति उद्यम स.मू.व. (रू.)

भारत

ग्रामीण इकाईयों के अंशदान से लगभग दुगुना था, यद्यपि ग्रामीण क्षेत्रो में लगभग 23 लाख अधिक इकाईयां थी। प्रथम तीन राज्य जिन्होंने पर्याप्त मूल्य जोड़े थे— उत्तर प्रदेश, महाराष्ट्र और पश्चिम बंगाल।

1.14 व्यापार सीमान्त लाभः

विवरणी–14 थोक और फुटकर व्यापार दोनों के लिए राष्ट्रीय स्तर पर कुछेक वस्तु समूहों के लिए औसत व्यापार सीमान्त लाभ के आकड़े उपलब्ध कराती है। औसत राष्ट्रीय स्तर पर एक विशेष वस्तु समूह के लिए सभी सुचित व्यापार सीमान्त लाभो से लिया गया है। विवरणी से यह देखा गया है कि सीमान्त लाभ सामान्यतः थोक व्यापार से फुटकर व्यापार में अधिक है। यह इस तथ्य के कारण हो सकता है कि थोक व्यापार में, वृहत्त विक्रय प्रवृति बिक्री में निम्नतर सीमान्त लाभ के लिए क्षतिपूर्ति करती है। कुछ वस्तु समूह के लिए यद्यापि, व्यापार सीमान्त लाभ थोक व्यापार में उच्चतम होना देखा गया है। वस्तु समूह हैं: मछली, फल क्रोकरी और ग्लासवेयर, ईंट और अन्य भवन सामग्री। सूचित किए गए व्यापार सीमान्त लाभ निम्नलिखित वस्तु समूहों में अधिक देखे गये है: मछली, सब्जियां, फल पान और पान मसाला, फलों का जूस और शराब और नशीले पदार्थ। अवलोकित न्यूनतम और अधिकतम व्यापार सीमान्त लाभ चीनी (थोक दर) के लिए 4.5 और फलों का जूस (फुटकर दर) के लिए 31.0% है।

विवरणी–14 : समस्त भारत स्तर पर कुछेक वस्तु समूहों के लिए औसत व्यापार सीमान्त लाभ (प्रतिशत)

भारत में लघु व्यापारिक इकाइयाँ
और उनकी मूल विशेषताएं: 1997
रा. प्र. सर्वे. का 53 वां दौर (जनवरी–दिसम्बर, 1997)

सर्वेक्षण निष्कर्ष

खण्ड–दो

1.0 प्रस्तावना: मौजूदा अंक रा.प्र.सर्वे. के 53वें दौर के असंगठित व्यापार सर्वेक्षण के निष्कर्षो के बारे में दूसरा और अन्तिम खण्ड है। अंकमाला के पहले खण्ड में छोटी व्यापारिक इकाइयों नामत: उद्यमों की संख्या, कामगार वर्धित मूल्य और व्यापार से सीमान्त लाभ की मुख्य विशेषताओं वाली सारणियां प्रस्तुत की गई। सारणीयन योजना की शेष सारणियां मौजूदा अंक में दी गई है। अंक में न केवल उक्त विशेषताओं के बारे में सूचना दी गई है बल्कि वर्गीकरण चरांक भी भिन्न–भिन्न है। प्रति उद्यम सकल वर्धित मूल्य पहले खण्ड में दर्शाया गया था। इस खण्ड में प्रति कामगार सकल वर्धित मूल्य दिया गया है। सूचित किए गए व्यापार सीमान्त लाभों को पहले खण्ड में दिखाया गया था जबकि परिगणित व्यापार सीमान्त लाभ दूसरे खण्ड में दर्शाए गए है, आदि। उपर्युक्त विशेषताओं से अलग मौजूदा खण्ड में उद्यमों द्वारा संचालित स्थाई परिसम्पत्तियों, दिनों/महीनों की औसत संख्या और कारक आय पद्धति के अनुसार सकल वर्धित मूल्य को भी जोड़ा गया है। अंक के निष्कर्षो के सार को विवराणों के रूप में दिया गया है। कुछ विवरणों को अन्तिम वर्णन में निष्कर्षों को प्रस्तुत करने के लिए दो अथवा तीन भागों में उप विभाजित किया गया है। यह कहा जाता है सारणियों में प्रयुक्त "डेश" (—) और शून्य दशमलव शून्य (0.0) के भिन्न–भिन्न स्थितियों ने अपने सामान्य संयुक्तार्थ "उपलब्ध नहीं" और नगण्य मूल्य होंगे।

1.1 उद्यमों की अनुमानित संख्या: स्वलेखा व्यापार उद्यमों, गैर निदेशिका व्यापार प्रतिष्ठानों की अनुमानित संख्या और सभी राज्यों और संघ शासित क्षेत्रों के लिए उनका जोड़ विवरण पत्र–1 में दिया गया है। यह देखा जाता है भारत में 145 लाख उद्यमों में से 133 लाख (92%) स्वलेखा व्यापार उद्यम है और शेष 12 लाख (8%) गैर निदेशिका व्यापार प्रतिष्ठान है। यह भी देखा जाता है कि लगभग 84 लाख (58%) उद्यम ग्रामीण क्षेत्रों में स्थित हैं और 61 लाख (42%) शहरी क्षेत्रों में है। गैर निदेशिका व्यापार प्रतिष्ठानों का प्रतिशत ग्रामीण उद्यमों में केवल 4 और शहरी उद्यमों में 15 प्रतिशत है। राज्यों में, गैर निदेशिका व्यापार प्रतिष्ठानों की बड़ी संख्या पश्चिम बंगाल (0.40 लाख), महाराष्ट्र (0.39 लाख), आन्ध्र प्रदेश (0.29 लाख) और केरल (0.25) ग्रामीण क्षेत्रों में है। शहरी क्षेत्रों में, गैर निदेशिका व्यापार प्रतिष्ठानों की बड़ी संख्या तमिलनाडू (1.14 लाख), महाराष्ट्र (1.06 लाख) पश्चिम बंगाल (1.04 लाख) और उत्तर प्रदेश (0.80 लाख),

विवरण पत्र–1 भिन्न–भिन्न राज्यों/संघशासित क्षेत्रों के लिए स्वलेखा व्यापार उद्यमों और गैर–निदेशिका व्यापार प्रतिष्ठानो की अनुमानित संख्या

नोट : थो. व्या.=थोक व्यापार, क. ए.=कमीशन एजेन्ट, फू. व्या.=फूटकर व्यापार, बो. ल. स.=बोली लगाने वाली सेवाएं, नि. स.=निशुल्क संग्रहण, उ. ज.=उप जोड़

पाई गई है। स्वलेखा व्यापार उद्यम लगभग सभी राज्यों में बहुतायत में है और यह ग्रामीण क्षेत्रों में अधिक संख्या में हैं। स्वलेखा व्यापार उद्यमों की संख्या में उत्तर प्रदेश, पश्चिम बंगाल, उड़ीसा, बिहार और आंध्र प्रदेश ग्रामीण क्षेत्र में और उत्तर प्रदेश, पश्चिम बंगाल, तमिलनाडू, महाराष्ट्र और आंध्र प्रदेश शहरी क्षेत्र में अग्रणीय हैं। उद्यमों की समग्र अनुमानों की संख्या उत्तर प्रदेश में अधिकतम है, पश्चिम बंगाल, बिहार, आंध्र प्रदेश और उड़ीसा का स्थान उसके बाद है।

1.1.2 उद्योग समूह के अनुसार उद्यमों की संख्या:

विवरण पत्र–1क स्वलेखा व्यापार उद्यम और गैर निदेशिका व्यापार प्रतिष्ठानों की अनुमानित संख्या और रा.औ.वर्गी. के 3 अंक स्तरों पर कुल जोड़ दर्शाती है। यह देखा जाता है कि भारत में कुल लगभग 145 लाख छोटी व्यापारिक इकाइयों में से स्वलेखा व्यापार उद्यम और निदेशिका व्यापार प्रतिष्ठान क्रमश: 133 लाख और 12 लाख थे। ऐसे उद्यमों की अधिकतम संख्या फुटकर व्यापार के समक्ष दर्ज की गई (उप जोड़ 65 से 68 तक) रा.औ.व. 65 का योगदान (खाद्य उत्पादों में फुटकर (व्यापार) सभी स.औ. वर्गीकरणों में अधिकतम पाया गया। 3–अंकीय स्तर पर रा.औ.व. 650, 688 और 655 उद्यमों की काफी अधिक संख्या दर्शाते हैं। थोक बिक्री व्यापार में रा.औ.व. 60 (खाद्य और कृषीगत कच्ची सामग्री में थोक बिक्री व्यापार) का अधिकतम योगदान था। रा.औ.व. 601 और 638 में उद्यमों की काफी बड़ी संख्या पायी गई। बोली लगाने की सेवाएं (रा.औ.व. 890) काफी कम संख्या (समस्त भारत में केवल 1228) ही देखे गए। नि:शुल्क संग्रहण में कार्यरत उद्यमों की काफी बड़ी संख्या थी। यहां लगभग 16 लाख स्वलेखा व्यापार उद्यम और 11 हजार गैर निर्देशिका व्यापार प्रतिष्ठान थे जो नि:शुल्क रूप से संगृहीत वस्तुओं का व्यापार करते थे। अधिकांश राष्ट्रीय औद्योगिक वर्गीकरण समूहों में स्वलेखा व्यापार उद्यमों की संख्या गैर निदेशिका व्यापार प्रतिष्ठानों की संख्या से अधिक पाई गई किन्तु रा.औ.व. 609, 615, 623, 632, 634, आदि के लिए यह स्थिति ठीक उलटी थी जहां गैर निदेशिका व्यापार प्रतिष्ठानों की संख्या अधिक थी। जैसी आशा थी, थोक बिक्री व्यापार इकाइयों (19%) में से गैर निदेशिका व्यापार प्रतिष्ठानों का समानुपात फुटकर इकाइयों (8%) में गैर निदेशिका व्यापार प्रतिष्ठानों के समानुपात से अधिक था।

1.2.1 गैर संगठित व्यापार के प्रमुख अनुमान:

राष्ट्रीय प्रतिदर्श सर्वेक्षण के 53 वीं दौर से प्राप्त किए गए असंगठित व्यापार के प्रमुख अनुमानों को संक्षिप्त रूप से विवरण पत्र–2 में प्रस्तुत किया गया है। विवरण पत्र में असंगठित व्यापार की तीन मूलभूत विशेषताओं अर्थात उद्यमों की संख्या, उनमें नियोजित व्यक्तियों की संख्या और उद्यमों के अनुसार मासिक वर्धित मूल्य को शामिल किया गया है। अनुमानों की थोक बिक्री व्यापार फुटकर व्यापार और सभी व्यापारिक उद्यमों के लिए अलग से दिया गया है।

यह देखा जा सकता है कि असंगठित क्षेत्र में फुटकर व्यापार इकाईयों (119 लाख) की संख्या थोक बिक्री इकाईयों (8 लाख) से काफी अधिक थी। तथापि, यह लक्ष्य, गैर–निदेशिका व्यापार प्रतिष्ठानों में स्वलेखा व्यापार प्रतिष्ठानो की अपेक्षा कम प्रमुख था। असंगठित व्यापार क्षेत्र में कार्यरत 222 लाख (लगभग) कामगारों में यह देखा गया है कि 15 लाख कामगारों को थोक बिक्री व्यापार केन्द्रों द्वारा नियोजित किया गया था जबकि लगभग 176 लाख कामगारों को फुटकर व्यापार केन्द्रो द्वारा नियोजित किए गए थे। महिलाओं के लिए रोजगार आंकड़ों से पता चलता है कि ऐसे कामगारों का बड़ा समानुपात अन्य व्यापारिक इकाइयों (नि:शुल्क संग्रहण, नीलामी और कमीशन एजेन्टों को मिलाकर) में कार्यरत थी। भारत में थोक बिक्री उद्यमों की अपेक्षाकृत कम संख्या (8.02 लाख) को ध्यान में रखते हुए ऐसे उद्यमों में कार्यरत भाड़े

विवरण पत्र–2 रा.प्र.स. 53वां दौर की मुख्य विशेषताएं

उद्यम	विशेषता (संख्या लाख में)	थोक बिक्री व्यापार	फुटकर व्यापार	सभी
1	योग	8.02	119.40	145-04
2	स्वलेखा व्यापार उद्यम	5.86	109.76	132.75
3	गैर–निदेशिका व्यापार प्रतिष्ठानरोजगार	2.17	9.60	12.29
रोजगार (संख्या लाख में)				
1	कुल योग	15.12	176.48	221.52
2	महिला	0.44	20.01	30.24
3	बच्चे	0.26	4.16	6.15
4	भाड़े पर	4.09	13.94	18.86
4	पूर्ण कालिक	14.45	163.67	206.57
सकल वर्धित मूल्य				
1	कुल योग (करोड़ में)	561.89	3101.85	3927.13
2	प्रति उद्यम सकल वर्धित मूल्य (रूपयों में)	7003	2597	270
3	प्रति कामगार सकल वर्धित मूल्य	3717	1758	1773

के अथवा पूर्णकालिक कामगारों की पर्याप्त संख्या पाई गई। थोक बिक्री इकाइयों के अनुसार सकल वर्धित मूल्य कुल सकल वर्धित मूल्य का लगभग 1/7 था। फुटकर व्यापार इकाइयां 3102 रू. का मूल्य बढ़ाया जो कुल सकल वर्धित मूल्य का 79% है। प्रति उद्यम और प्रति कामगार सकल वर्धित मूल्य क्रमश: 2708 रू. और 1773 रू. आंका गया। यह भी देखा जा सकता है कि थोक बिक्री इकाइयां के अनुसार औसत वर्धित मूल्य (7003 रू.) फुटकर इकाई (2579 रू.) द्वारा बढ़ाये गए मूल्य से काफी अधिक था। थोक बिक्री और फुटकर व्यापार के मध्य औसत सकल वर्धित मूल्य में विभिन्नता को प्रतिकामगार अनुमानों को लेते समय घटा दिया गया था।

1.2.2 **विभिन्न दौरों में प्राप्त किये गए अनुमानों की तुलना :** विवरण पत्र 2 क, 4 समय अवधियों अर्थात रा.प्र.से. का 34वां दौर (1979–80), 41 वां दौर (1985–86), 46 वां दौर (1990–91) और 53वां दौर (1997), में असंगठित व्यापार उद्यमों में लगे उद्यमों की संख्या और नियोजित व्यक्तियों की संख्या दर्शाता है। यह देखा जाता है कि उद्यमों की कुल संख्या चार समय अवधियों में वृद्धि का दर्शाती हैं किन्तु, 1990–91 के बाद वृद्धि कुछ सीमा तक धीमी पड़ गई। 34 वें दौर के बाद थोक बिक्री व्यापार इकाइयों में 5 गुना वृद्धि हुई। यह संख्या 41 वें और 42 वें दौर में लगभग समान बनी रही है।

किन्तु 1990–91 के बाद, ऐसी इकाइयों की संख्या में अचानक बढ़ोतरी हुई है। उद्यमों की कुल संख्या में 41वें दौर की तुलना में 46वें दौर में लगभग

41 लाख तक वृद्धि हुई। यह देखा जाता है कि यह वृद्धि थोक बिक्री और फुटकर व्यापार की बजाय अन्य व्यापारिक इकाइयों की संख्या में वृद्धि के कारण हुई। कुल रोजगार 34वें, 41वें और 46वें दौर में लगातार बढ़ा। 46वें दौर के बाद वृद्धि न्यूनतम थी। नियोजित व्यक्तियों की संख्या ने थोक बिक्री और फुटकर व्यापार के लिए 34वें, दौर के बाद बड़ी कूद लगाई। 53वें दौर के बाद वृद्धि धीमी पड़ गई। 46वें दौर के दौरान नियोजित व्यक्तियों की संख्या में वृद्धि अन्य व्यापारिक इकाइयों द्वारा सृजित रोजगार में वृद्धि के कारण देखने में आई।

1.3.1 3 अंकीय स्तर पर उद्योगों का योगदान: विवरण पत्र–3 और विवरण पत्र 3"क", थोक बिक्री (विवरण पत्र–3) और फुटकर (विवरण पत्र 3"क") व्यापारिक कार्यकलापों में उद्योगों के 3–अंकीय स्तर संघटन

टिप्पणी :– कोष्ठक में 0 दिए गए आंकड़े गत दौरे से प्रतिशत वृद्धि दर्शाते हैं।

का विश्लेषण करते है। अलग–अलग उद्योगों में अनेक योगदान के सापेक्ष महत्व को दर्शाने के लिए उद्योगों की संख्या, कामगारों की संख्या और सकल वर्धित मूल्य के बारे में अलग–अलग रा. औ.वर्गी. का प्रतिशत भाग विवरण पत्रों में दिया जाता है। उद्यमों को रा.औ.वर्गी. के अ अंकीय स्तर पर सकल वर्धित मूल्य में उनके प्रतिशत भाग के क्रम में व्यवस्थित किया गया है।

यह देखने में आता है कि 1977 में लगभग 15 लाख कामगारों को नियोजित करने वाली लगभग 8 लाख थोक बिक्री व्यापारिक इकाइयां और लगभग 176 लाख कामगारों को नियोजित करने वाली 119 लाख फुटकर व्यापारिक इकाइयां थी। थोक बिक्री उद्यमों ने सकल वर्धित मूल्य में 562 करोड़ रूपयों का योगदान किया जबकि फुटकर व्यापारिक इकाइयों ने 3102 करोड़ रूपयों का योगदान किया। यह भी देखा गया है कि रा.औ.व. 600 (खाद्यान्नों में थोक बिक्री व्यापार) 601 (मूल खाद्य पदार्थो में थोक बिक्री व्यापार), 605 (जीवित पशुओं में थोक बिक्री व्यापार) और 638(धातु छितरन में थोक बिक्री व्यापार) चार उद्योग हैं जिनका थोक बिक्री व्यापार इकाइयों की कुल संख्या में बड़ा योगदान है। इनकी संख्या कुल थोक बिक्री इकाइयों की लगभग 58.4% है। तथापि, थोक बिक्री उद्यमों

विवरण पत्र–3 : थोक बिक्री व्यापार में विशेष उद्योगों का योगदान।

व्यापार) का रहा है।

1.4 स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों का वितरण और कामगारो के आकार वर्ग अनुसार कुल योग :

विवरण पत्र–4 कामगारों की संख्या के अनुसार उद्यमों की संख्या और तद्नुरूपी प्रतिशत्ता का वितरण दर्शाती है। विवरण पत्र में सूचना स्वलेखा व्यापार उद्यमों, गैर निदेशिका व्यापार प्रतिष्ठानों और उनके कुल योग के लिए क्षेत्रवार दिया गया है। यह देखा जा सकता है कि स्व–लेखा व्यापार उद्यम आकार वर्ग–1 और 2 में संकेन्द्रित थे जबकि गैर निदेशिका व्यापार प्रतिष्ठानों का संकेन्द्रण, आकार वर्ग 2 और 3 में देखा गया। तथापि, शहरी क्षेत्रों में ऐसे उद्यमों की भी बड़ी संख्या थी जिनमें तीन कामगार नियोजित थे। यह देखना भी मजेदार लगता है कि 7366 स्वलेखा व्यापार उद्यमों और 3435 गैर निदेशिका व्यापार प्रतिष्ठानों में 6 अथवा अधिक कामगार नियोजित थे। इन मामलों में उद्यमों के गलत वर्गीकरण होने का भी अन्देशा था। कामगारों के सभी आकार वर्गों में, उद्यमों की अधिकतम प्रतिशतता आकार वर्ग–1 में देखी गई। ऐसा स्वलेखा व्यापार उद्यमों की बड़ी अनुमानित संख्या के कारण हो रहा है। गैर निदेशिका व्यापार उद्यमों में लगभग 89% उद्यम 3 आकार वर्गों अर्थात 2, 3, और 4 के अनुसार ऑके गए। 94% से अधिक स्वलेखा व्यापार उद्यम आकार वर्ग 1 और 2 में सकेन्द्रित थे।

विवरण पत्र–6क में विभिन्न व्यापार कार्यकलापों के अनुसार कुल बाल श्रमिकों का वितरण दर्शाता महिला कामगारों का वितरण में समान रूप से विद्यमान है। ग्रामीण क्षेत्र में, बच्चे अधिकाशंत: फुटकर व्यापार (55.8%) और नि:शुल्क संग्रहण कार्यकलाप (40.3%) में कार्यरत थे जबकि शहरी क्षेत्र में वे फुटकर व्यापार कार्यकलापों (92.9%) में मुख्य रूप से संकेन्द्रित थे। ग्रामीण क्षेत्रों में, बच्चों का उच्चतम समानुपात रा.औ.व. समूह 054 (31.9%) में कार्यरत है इसके बाद रा.औ.व. समूह 650 (25.7%) में कार्यरत हैं और शहरी क्षेत्रों में बच्चों का उच्चतम समानुपात उद्योग समूह 650 में कार्यरत था।

1.7 महिला कामगारों और बाल कामगारों तथा कुल कामगारों का समानुपात :

भिन्न–भिन्न व्यापारिक कार्यकलापों में कुल कामगारों में महिला कामगारों और बाल कामगारों का समानुपात विवरण पत्र 7 और 7 क में दिए गए है। ग्रामीण क्षेत्र में प्रति 100 कामगारों में 15 अथवा अधिक महिला कामगारों का समानुपात रा.औ.व. समूह 054(46.43%) के लिए काफी ऊंचा है। शहरी क्षेत्र में रा.औ.व. समूह 053 और 040 के लिए पुरूषों की तुलना में महिलाओं का समानुपात अधिक था। विवरण पत्र 7क से यह देखा जा सकता है कि प्रति 100 कामगारों में 4 अथवा अधिक बाल कामगारों का समानुपात

सभी	26623	22458	49081

रा.औ.व. समूह 614 में अधिकतम था अर्थात पैट्रोल, मोबाइल ऑयल औस सम्बद्ध उत्पादों में थोक बिक्री व्यापार (10.23%) बाल कामगारों का रोजगार ग्रामीण क्षेत्रों में रा.औ.व. समूह 054 और 053 के लिए प्रमुख था। बाल कामगार ग्रामीण क्षेत्रों की अपेक्षा शहरी क्षेत्रों में कम समानुपात में थे। शहरी क्षेत्रों में बाल कामगारों का समानुपात गैर–विनिर्मित तम्बाकू, पान के पत्ते, गान्जा आदि (रा.औ.व.कोड: 603) में थोक बिक्री व्यापार के कार्यकलाप में अधिकतम था।

1.8.1 व्यापार के प्रकार के अनुसार स्थाई परिसम्पत्तियां:– भारत में भिन्न–भिन्न उद्यम प्रकारों के लिए थोक बिक्री व्यापार, फुटकर व्यापार और सभी व्यापार किस्मों द्वारा स्वामित्व वाली और भाड़े पर ली गई प्रति उद्यम स्थाई परिसम्पत्तियां विवरण पत्र–8 में दर्शायी गई है। विवरण पत्र में कुल परिसम्पत्तियों में स्वामित्व वाली परिसम्पत्तियों का प्रतिशत और प्रत्येक व्यापार प्रकार के अन्तर्गत उद्यमों की प्रतिदर्श संख्या भी दी गई है। यह भी देखा जा सकता है कि स्वलेखा व्यापार में समानरूप से अपेक्षाकृत ऊंची कीमत की थी और कुल स्थाई परिसम्पत्तियों में स्वामित्व वाली परिसम्पत्तियों का प्रतिशत भाग फुटकर व्यापार इकाइयों के लिए अधिक था। गैर निदेशिका व्यापार प्रतिष्ठानों के मामले में प्रति उद्यम भाड़े की परिसम्पत्तियां थोक बिक्री व्यापार के लिए अधिक थी किन्तु स्वामित्व वाली परिसम्पत्तियां थोकबिक्री और फुटकर व्यापार के लिए करीब–करीब समान थी। यह भी देखा

विवरण पत्र 9 : व्यय के मदों के "अन्य व्यय" का प्रति उद्यम मूल्य (रू.)

भारत — ग्रामीण + शहरी

व्यय की मदें	थोक बिक्री		फुटकर	
	स्वलेखा व्यापार उद्यम	गैरनिदेशिका व्यापार प्रतिष्ठान	स्वलेखा व्यापार उद्यम	गैर निदेशिका व्यापार प्रतिष्ठान
पैकिंग सामग्री	94	963	35	118
अन्य उपयोग्य भण्डार	31	76	8	24
विद्युत प्रभार	37	185	37	190
मुद्रण और लेखन सामग्री प्रभार	13	115	5	54
भवन–मरम्मत और रखरखाव	13	34	6	29
अन्य–मरम्मत और रखरखाव	27	101	10	50
डाक घर और दूरभाष प्रभार	63	498	11	163
परिवहन प्रभार	579	2097	116	545
भूमि को छोड़कर परिसम्पत्तियों किराया	88	411	59	335
कर, लाइसैंस आदि	41	365	14	223
स्थानीय दरें	33	115	10	75
अन्य व्यय	250	643	73	311
कुल व्यापारिक व्यय	1267	5587	384	2119

जा सकता है कि कुल स्थाई परिसम्पत्तियों में स्वामित्व वाली परिसम्पत्तियों का प्रतिशत गैर निदेशिका व्यापार प्रतिष्ठानों की अपेक्षा स्वलेखा व्यापार उद्यमों के लिए अधिक था। यह भी ध्यान देने की बात है कि थोकबिक्री और फुटकर व्यापार उद्यमों के लिए उद्यमों की प्रतिदर्श संख्या सभी व्यापार किस्मों के लिए प्रतिदर्श संख्या में नहीं जोड़ी जाती। ऐसा अन्य व्यापारिक उद्यमों के अस्तित्व के कारण है।

1.8.2 स्वामित्व वाली और भाड़े की स्थाई परिसम्पत्तियों के भिन्न–भिन्न प्रकार: विवरण पत्र 8क ग्रामीण, शहरी और अखिल भारत स्तर पर स्थाई परिसम्पत्तियों का प्रति उद्यम मूल्य दर्शाता है। यह देखा जाता है कि ग्रामीण और शहरी भारत के लिए "भवन निर्माण और अन्य निर्माण" स्थाई परिसम्पत्तियों का मुख्य भाग गिना जाता है। अखिल भारत स्तर पर "भवन निर्माण और अन्य निर्माण" का प्रति उद्यम मूल्य कुल स्थाई परिसम्पत्तियों के मूल्य का 87% पाया गया, ग्रामीण और शहरी क्षेत्रों में तद्नुरूपी प्रतिशतता क्रमश: 82% और 88% रही। इस श्रेणी में भाड़े में उद्यमों का प्रति उद्यम मूल्य ग्रामीण क्षेत्रों में स्वामित्व वाली परिसम्पत्तियों से कम पाया गया किन्तु शहरी क्षेत्रों में स्वामित्व वाली परिसम्पत्तियों से अधिक पाया गया। यह इस तथ्य के कारण है कि ग्रामीण क्षेत्रों में उद्यमों में अपनी निजी परिसम्पत्तियों पर निर्भर रहने की प्रवृत्ति है। जैसी की आशा थी, शहरी क्षेत्रों में स्थाई परिसम्पत्तियों के सभी प्रकारों का प्रति उद्यम मूल्य ग्रामीण क्षेत्रों के मूल्यों से सामान्यत: अधिक थे। दोनों क्षेत्रों में "परिवहन उपस्कर" और अन्य स्थाई परिसम्पत्तियां को भाड़े पर लेने की बात कम पाई गई।

विवरण पत्र 10 : कारक आय पद्धति और प्रत्यक्ष पद्धति के अनुसार स्वलेखा व्यापार उद्यमों और गैर निर्देशिका व्यापार प्रतिष्ठानों के लिए प्रति उद्यम सकल वर्धित मूल्य

भारत

उद्यम के प्रकार	कारक आय पद्धति द्वारा सकल वर्धित मूल्य/उद्यम	कारक आय पद्धति द्वारा सकल वर्धित मूल्य/उद्यम	प्रतिशत अन्तर
	ग्रामीण		
स्वलेखा व्यापार उद्यम	1335	1552	16.25
गैर निदेशिका व्यापार प्रतिष्ठान	5365	6110	13.88
	शहरी		
स्वलेखा व्यापार उद्यम	2523	2892	14.62
गैर निदेशिका व्यापार प्रतिष्ठान	9658	10718	10.97
	ग्रामीण + शहरी		
स्वलेखा व्यापार उद्यम	1799	2074	15.29
गैर निदेशिका व्यापार प्रतिष्ठान	8564	9545	11.45

1.9 स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों के लिए अनुषंगी व्यय: विवरण पत्र–9 भारत में स्वलेखा व्यापार उद्यमों और गैर निर्देशिका व्यापार प्रतिष्ठानों के लिए "अन्य व्यय" (जो उद्यमीय कार्यकलापों के अनुषंगी हैं) का प्रति उद्यम मूल्य दर्शाता है। अनुमान थोक बिक्री तथा फुटकर व्यापार उद्यमों के लिए प्रस्तुत किए जाते हैं। जैसी आशा थी, ऐसे व्यय फुटकर व्यापार की अपेक्षा थोक व्यापार में अधिक थे और यहां बात स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों के लिए सत्य थी। यह भी देखा जाता है कि कुछ मदों पर प्रति उद्यम व्यय स्वलेखा व्यापार उद्यमों में अन्य मदों की तुलना में अधिक था। मदें "परिवहन प्रभार" पैकिंग सामग्री, "भूमि को छोड़कर परिसम्पत्तियों पर किराया" और "अन्य व्यय" थे। गैर निदेशिका व्यापार प्रतिष्ठानों के लिए, उपर्युक्त चार मदों को छोड़कर, प्रति उद्यम पर्याप्त व्यय "विद्युत प्रभार" "डाक खर्च और दूरभाष" और करों, "लाइसैंस आदि" पर अधिक देखा गया। फुटकर स्वलेखा व्यापार उद्यम के लिए मुद्रण और लेखन सामग्री प्रभार पर व्यय न्यूनतम (5 रू.) था और थोक बिक्री गैर निदेशिका व्यापार प्रतिष्ठान के लिए परिवहन व्यय पर व्यय अधिकतम (2097 रू. था) अन्य व्यय का थोक बिक्री–फुटकर अनुपात अखिल भारत स्तर पर स्वलेखा व्यापार उद्यमों के लिए 3.30 और गैर निदेशिका व्यापार प्रतिष्ठानों के लिए 2.63 था।

1.10.1 स्वलेखा व्यापार उद्यमें और गैर निदेशिका व्यापार उद्यमों के लिए दो पद्धतियों के अनुसार

सकल वर्धित मूल्य: विवरण 10 में प्रत्यक्ष पद्धति द्वारा स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों के लिए प्रति उद्यम सकल वर्धित मूल्य की तुलना दर्शायी गई है। यह देखा जाता है कि दोनों पद्धतियों द्वारा निकाले गए अनुमान शहरी गैर निदेशिका व्यापार प्रतिष्ठानों को छोड़कर जहां यह अन्तर दो अनुमानों के बीच 1060 रू. था, एक दूसरे से कमोबेश समान है।

सामान्य रूप से, गैर निदेशिका व्यापार प्रतिष्ठानों के लिए अनुमानों में अन्तर स्वलेखा व्यापार उद्यमों "क" अनुमानों से कम पाया गया। प्रति उद्यम अनुमानित सकल वर्धित मूल्य की जब प्रत्यक्ष पद्धति से गणना की गई तो यह स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों के लिए अपेक्षाकृत अधिक पाया गया।

1.11 परिगणित और अभिलक्षित व्यापार लाभ:

थोक बिक्री और फुटकर व्यापार कार्यकलापों के लिए चुने हुए पण्य समूहों के लिए अखिल भारत स्तर पर व्यापार लाभ विवरण पत्र–11 में दिए गए हैं। विवरण पत्र, संदर्भ वर्ष के दौरान व्यापार किए गए पण्यों के क्रय और विक्रय मूल्यों से परिगणित अनुसूची में सूचित किए गए व्यापार लाभों से तुलना करने में सहायता करता है।

यह देखा जा सकता है कि परिगणित व्यापार लाभ 6 मामलों में है किन्तु अभिलक्षित व्यापार लाभ हमेशा सकारात्मक है। ऐसा इस तथ्य के कारण है कि कुछ मामलों में व्यापारित पण्यों का विक्रय मूल्य संदर्भ माह में तद्नुरूपी क्रय मूल्य से कम है। नकारात्मक व्यापार लाभ दर्शाने वाले पण्य समूह इस प्रकार है: बीड़ी, सिगरेट आदि, बहुमूल्य पत्थर बल्ब और ट्यूब, नोटबुक आदि, थोक बिक्री व्यापार में लोहे की सलाखें और फुटकर व्यापार में पुस्तकें और पत्रिकांए। थोक बिक्री व्यापार में सामान्य तौर से तद्नुरूपी फुटकर दरों से कम हैं और यह लक्षण अभिलक्षित तथा परिगणित व्यापार लाभ के लिए सामान्य है। तथापि, कुछ पण्य समूहों के लिए जैसे जूते, वस्त्र, बनावटी आभूषण, टीवी – वी सी पी – वी सी आर, वाशिंग मशीन, क्राकरी और शीशे के बर्तन, बेन्त और बास के उत्पाद, कोयला, कोक, लकड़ी आदि के लिए थोक बिक्री व्यापार के लिए परिगणित व्यापार लाभ तद्नुरूपी फुटकर दरों की अपेक्षा अधिक पाया गया। निम्नलिखित पण्य समूहो: मसाले, फल, बीड़ी सिगरेट आदि, प्रक्षालन वस्तुएं, सूती वस्त्र, आभूषण, क्राकरी और शीशे के बर्तन, उर्वरक, साफ्ट ड्रिंक, शराब और नशीले पदार्थ आदि के मामले में अभिलक्षित व्यापार लाभ तद्नुरूपी परिगणित लाभ से काफी भिन्न है। आभूषण और कोयला, कोक आदि के लिए परिगणित व्यापार लाभ असामान्य रूप से ऊंचा पाया गया।

1.12 उद्यमों के संकार्य के माहां/दिवसों की संख्या:

विवरण पत्र 12 और 12क में गत वर्ष में और गत कार्य माह में क्रमश: औसतन उद्यमों के संकार्य के माहों की संख्या और दिवसों की संख्या दर्शायी गई है। विवरण पत्र स्वलेखा व्यापार उद्यमों और गैर निदेशिका व्यापार प्रतिष्ठानों पर केन्द्रित है जो संकार्य की अवधि के अनुसार उन्हें अलग–अलग करता है। विवरण पत्र–12 से यह देखा जा सकता है कि वार्षिक और दैनिक उद्यमों में गैर निदेशिका व्यापार प्रतिष्ठानों की अपेक्षा स्वलेखा व्यापार उद्यमों औसतन कम महीनों के लिए संचालित होते हैं। ग्रामीण क्षेत्रों में मौसमी उद्यमों को छोड़कर, गैर निदेशिका व्यापार प्रतिष्ठानों ने अपेक्षाकृत कम समय के लिए कार्य किया।

संकार्य के महीनों की संख्या वार्षिक उद्यमों के लिए अधिकतम थी इसके बाद दैनिक और फिर मौसमी उद्यमों का स्थान था। यह दोनों क्षेत्रों के लिए सत्य था। शहरी उद्यमों के लिए (11.2 माह) संकार्य के माहों की संख्या अखिल भारत स्तर पर ग्रामीण उद्यमों (10.5 माह) की अपेक्षा अधिक थी। विवरण पत्र–12क से यह देखा जाता है कि गत कार्य माह में संकार्य दिवसों की संख्या वार्षिक

विवरण पत्र 11: अखिल भारत स्तर पर चुने हुए पण्य समूहों के लिए परिगणित और अभिलक्षित व्यापार लाभ

परिगणित व्यापार लाभों को निम्नलिखित फार्मूला का प्रयोग करके प्राप्त किया जाता है:

व्यापार लाभ =[(औसत विक्रय मूल्य – औसत क्रय मूल्य)/औसत क्रय मूल्य]x 100

विवरण पत्र 12 : गत 365 दिवसों में भिन्न–भिन्न उद्यमों के प्रकारों का संकार्य के माहां की औसत संख्या

उद्यम के प्रकार	वार्षिक	मौसमी	दैनिक	सभी
		ग्रामीण		
स्वलेखा व्यापार उद्यम	11.2	3.5	7.1	10.5
गैर निदेशिका व्यापार प्रतिष्ठान	11.4	4.8	5.3	11.1
स्वलेखा व्यापार उद्यम + गैर निदेशिका व्यापार प्रतिष्ठान	11.2	3.5	7.1	10.5
		शहरी		
स्वलेखा व्यापार उद्यम	11.3	5.6	8.0	11.2
गैर निदेशिका व्यापार प्रतिष्ठान	11.4	5.6	7.2	11.3
स्वलेखा व्यापार + गैर निदेशिका व्यापार प्रतिष्ठान	11.3	5.6	7.9	11.2

विवरण पत्र12क: गत कार्य दिवस में भिन्न–भिन्न उद्यमों के प्रकारों के संकार्य दिवसों की औसत संख्या

उद्यम के प्रकार	वार्षिक	मौसमी	दैनिक	सभी
		ग्रामीण		
स्वलेखा व्यापार उद्यम	25.6	21.5	17.3	25.2
गैर निदेशिका व्यापार प्रतिष्ठान	25.9	23.1	22.3	25.7
स्वलेखा व्यापार उद्यम + गैर निदेशिका व्यापार प्रतिष्ठान	25.6	21.5	17.4	25.2
		शहरी		
स्वलेखा व्यापार उद्यम	26.1	24.7	19.6	26.1
गैर निदेशिका व्यापार प्रतिष्ठान	25.9	26.7	25.0	25.9
स्वलेखा व्यापार + गैर निदेशिका व्यापार प्रतिष्ठान	25.1	25.0	19.7	26.1

उद्यमों के लिए अधिकतम थी, इसके बाद मौसमी उद्यमों का स्थान था। और दोनों क्षेत्रों में दैनिक उद्यमों के लिए कम था।

स्वलेखा व्यापार उद्यमों के संकार्य दिवसों की संख्या ग्रामीण क्षेत्रों में गैर निदेशिका व्यापार प्रतिष्ठानों की संकार्य दिवसों की संख्या से कम थी परन्तु इसका विपरीत शहरी क्षेत्रों में देखा गया। सामान्य रूप से, शहरी उद्यम ग्रामीण उद्यमों की अपेक्षा अधिक दिनों तक संचालित होते पाए गए। यह निरीक्षण वार्षिक, मौसमी तथा दैनिक उद्यमों के लिए सत्य है। किसी शहरी उद्यम (26.1 दिवस) के अनुसार संकार्य दिवसों की संख्या का अखिल भारत औसत, ग्रामीण उद्यमों का तद्नुरूपी औसत (25.2 दिवस) की अपेक्षा अधिक था।

1.13 **अनुसूची में भरने के लिए अपेक्षित दौरों की संख्या :** प्रथम खण्ड के अध्याय चार के विवरण पत्र 41, रा.प्र.स. के 53वे दौर के चौथे (उप दौर का अर्थ है 3 माह की अवधि) में अनुसूची 2.41.2 भरने के लिए अपेक्षित दौरों की औसत संख्या दर्शाती है। यह देखा जाता है कि एक अनुसूची को भरने में अपेक्षा दौरों की संख्या एक से अधिक (अखिल भारत स्तर पर 1.8 दौरे) थी जो व्यापारिक उद्यमों से आंकड़े संगृहीत करने मे होने वाली कठिनाई दर्शाती हैं। शहरी अनुसूची भरने के लिए अपेक्षित दौरो की औसत संख्या ग्रामीण अनुसूची को भरने की अपेक्षा अधिक थी ऐसा शहरी क्षेत्रों में उत्तरदाताओं की ओर से अनिच्छा के कारण हुआ हो सकता है। स्वलेखा व्यापार उद्यम के लिए अपेक्षित दौरो की संख्या गैर निदेशिका व्यापार प्रतिष्ठानों की तुलना में कम थी। इस संदर्भ में, यह उल्लेख किया जा सकता है कि रा.प्र.स. के 53वें दौर में व्यापार अनुसूची 2.41.2 को भरने में लगा औसत समय 1.7 घन्टे पाया गया।

1.14 वार्षिक वर्धित मूल्य: रा.प्र.स. 53वां दौर की व्यापार अनुसूची उद्यमों के लिए सकल वर्धित मूल्य के मासिक अनुमान निकालने के लिए अभिकल्पित किया गया था। इस प्रकार प्रथम खण्ड के अध्याय चार के विवरण पत्र 32, 40, 40क, 44 और 44क में दी गई टिप्पणियां केवल मासिक वर्धित मूल्य से जुड़ी हैं। तथापि, उद्यमों के लिए "संकार्य के माहां की संख्या" एकत्रित करने के लिए अनुसूची में एक प्रवधान रखा गया। इस सूचना को प्रयोग करके मासिक मूल्यों से वार्षिक वर्धित मूल्य की गणना इस प्रकार की जा सकती है:

वार्षिक सकल वर्धित मूल्य = मासिक सकल वर्धित मूल्य x संकार्य के माहों की संख्या: विवरण पत्र 13 में राज्य x क्षेत्र के लिए उपर्युक्त प्रक्रिया के अनुसार सकल वर्धित मूल्य के वार्षिक अनुमान प्रस्तुत किए गए हैं। यह अभिलक्षित होता है कि लघु व्यापारिक इकाइयों ने 1997 में 44,220 करोड़ रू. मूल्य की वृद्धि की। शहरी योगदान ग्रामीण इकाइयों के योगदान का करीब–करीब दुगुना था यद्यपि ग्रामीण क्षेत्रों में करीब 23 लाख और इकाईयां थी। काफी मात्रा में मूल्य वृद्धि करने वाले प्रथम तीन राज्य उत्तर प्रदेश, महाराष्ट्र और पश्चिम बंगाल थे।

विवरण पत्र–13 : 1997 के दौरान राज्यों और अखिल भारत के लिए वार्षिक सकल वर्धित मूल्य (करोड़ रू. में)

राज्य/संघ शा. क्षेत्र	सकल वर्धित मूल्य (0.00 करोड़ रू.)		
	ग्रामीण	शहरी	ग्रामीण + शहरी
