

STATEWISE AND CROPWISE ESTIMATES OF
VALUE OF OUTPUT FROM AGRICULTURE

1980-81 -----1990-91

सत्यमेव जयते

AUGUST 1996

CENTRAL STATISTICAL ORGANISATION

DEPARTMENT OF STATISTICS

MINISTRY OF PLANNING AND PROGRAMME IMPLEMENTATION

GOVERNMENT OF INDIA

FOREWORD

The Central Statistical Organisation (CSO) in the Department of Statistics, while publishing the estimates of National Income and Related Aggregates also provides disaggregated information on value of output of agricultural crops in its annual publication entitled "National Accounts Statistics". The publication contains only the All India estimates of value of output of different crops and crop-groups. There has been a persistent demand from different users for State-wise and crop-wise information of value of output of various crops. Such information is not available from any source. Therefore, State-wise and crop-wise information on value of output from agriculture sector were published, for the first time, in December 1985, covering the years 1960-61 to 1980-81. since the aforesaid publication was found useful, it has now been decided to bring out parallel estimates for subsequent years. The present publication contains State-wise and crop-wise output for the years 1980-81 to 1990-91, both at current and constant prices (1980-81) prices.

This brochure has been prepared by the Agriculture Unit of the National Accounts Division (NAD). While all the officers and staff of the unit had to put in extra effort in gathering together the massive data, special mention is made of the efforts put in by Shri K.C.Saxena and Shri S.K.Mittal, Senior Investigators and Shri M.A.Khan, Junior Investigator, under the supervision of Shri Ramesh Kolli, Joint Director. Dr. A.C.Kulshreshtha, Head, NAD, provided the overall guidance.

(S.S.Srivastava)

DIRECTOR GENERAL

Central Statistical Organisation

STATEWISE AND CROPWISE ESTIMATES OF VALUE OF OUTPUT
FROM AGRICULTURE

1980-81.....1990-91

INTRODUCTION

1. The role of agriculture in the Indian economy needs no emphasis. Important developments in Indian agriculture have taken place over the years, particularly since the sixties due to the introduction of new technology in different States. With this in view, the statewise and cropwise estimates of value of output from Agriculture, 1960-61 to 1980-81 was brought out in December, 1985. This brochure gave the estimates of value of output both at current prices and constant (1970-71) prices. The present brochure presents the estimates of value of output in different States/UTs and for different crops for the period 1980-81 to 1990-91, both at current and constant (1980-81) prices.

2. Evaluation of crop production is done by multiplying the quantities of production by the corresponding producers' prices. The sources of data used in the preparation of the value of output are as under:

- (i) The estimates of outturn for principal crops are based on the results of the crop estimation surveys conducted annually by the State government agencies. These are compiled and published annually by the Directorate of Economics, Ministry of Agriculture (DESAg) in their annual publication captioned "Estimates of Area and production of Principal crops in India". For evaluation purposes of these crops, the producers' prices correspond to average wholesale prices ruling in the primary markets during the peak marketing periods and are furnished by the State Directorates of Economics and Statistics (DESS) to Central Statistical Organisation (CSO). The wholesale prices are collected by the agricultural produce marketing committees, State Agricultural Departments or by the DES under the market intelligence scheme of DESAg. For averaging the weekly wholesale prices available from the selected primary markets, the following procedure is adopted.
 - a) Arithmetic averaging the prices at the various centres within a district is done to get the weekly district prices.
 - b) Average price for a district is worked out as the arithmetic average over the "peak marketing period" of weekly prices obtained at (a) above.
 - c) State average price is obtained as a weighted average of district wise prices derived at (b) above, weights being the district-wise prices derived at (b) above, weights being the district-wise production of the corresponding crops.
- (ii) The earlier practices of evaluating rice (including bran and husk) after deducting the rice milling charges therefrom, to obtain the value of paddy has been dispensed away with. The value of paddy is now worked out directly. This has been done because of the prevailing practice of the farmers to dispose of paddy as such, and also since the corresponding prices of paddy in the primary markets are now available regularly.
- (iii) Growing of trees on farm land and village common land hitherto covered in the agriculture sector, now forms part of the forestry sector.
- (iv) In respect of coffee, rubber and opium, the statistics of production and prices are obtained from the coffee board, rubber board and Central

Bureau of Narcotics, respectively. In case of tea, the estimates of output available from Tea Board relate to production of processed tea, instead of raw tea leaves. The production of tea leaves has been estimated as 4.44 times the processed tea, the figures of which are furnished by the Tea Board.

- (v) In respect of unspecified and miscellaneous crop and crop groups viz. (a) other cereals, (b) other oil seeds, (c) other sugars, (d) other fibres, (e) dyes and tanning material (f) other drugs and narcotics, (g) other condiments and spices (h) other fruits and vegetables and (i) miscellaneous crops (fodder, grass, misc. food and non food crops), the outturn estimates are not directly available for all these crops. To the extent possible, data on related crops are utilized. The value of output in respect of these crops or crop groups is estimated by utilizing the area available from the annual publication, "Land Utilisation Statistics (LUS)" of DESAg. By applying an appropriate value of yield per hectare to the total estimated area under each of these crop groups, the outturn figures are estimated for these crops/crop groups.
- (vi) For estimating the value of by-products, viz. straw and stalks of various crops, annual data on the value of yield per hectare as available from the cost of cultivation studies coordinated by the Ministry of Agriculture, have been adopted.

The users may refer for further details on the methodology of estimation, the CSO publication entitled "National Accounts Statistics, Sources and Methods", 1989. The value of output in respect of 59 crops or crop group has been presented in this brochure. For each crop/crop groups, information is given in the form of two statements. The first statement contains information on stand-wise value of output of crop/crop group at current prices for 1980-81 to 1990-91. This is followed by a statement providing information on statewide value of output of crop/crop group at constant prices (1980-81) for 1980-81 to 1990-91.
