प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के अखिल भारत रोजगार एवं बेरोजगारी के सर्वेक्षण राष्ट्रीय तथा राज्य स्तर के श्रम बाजार आंकड़ों के प्रमुख स्रोत हैं। इन सर्वेक्षणों से राष्ट्रीय तथा राज्य/संघ राज्यक्षेत्र स्तर पर श्रम-बल के बारे में तैयार किए गए संकेतक विभिन्न सरकारी संगठनों के नियोजन तथा नीति-निर्माण संबंधी कार्यों के लिए जरूरी महत्वपूर्ण जानकारी के तौर पर इस्तेमाल किए जाते हैं तथा अनेक अन्य उपयोगकर्ता/शोधकर्ता इन आंकड़ों को महत्वपूर्ण तत्वों के रूप में उपयोग करते हैं। रोजगार तथा बेरोजगारी के बारे में एनएसएस के सर्वेक्षण 27वें दौर (अक्टूबर 1972 से सितम्बर 1973) से पंचवर्षीय आधार पर आयोजित किए जा रहे हैं। एनएसएस के 68वें दौर (जुलाई, 2011-जून, 2012) के दौरान रोजगार एवं बेरोजगारी संबंधी सर्वेक्षण को मिलाकर, एनएसएसओ रोजगार तथा बेरोजगारी पर अभी तक ऐसे कुल 9 व्यापक सर्वेक्षण कर चुका है। एनएसएस के 68वें दौर में (i) घरेलू उपभोक्ता व्यय और (ii) रोजगार एवं बेरोजगारी विषय शामिल किए गए थे।

2. एनएसएसओ द्वारा सर्वेक्षित प्रतिदर्शों को पारम्परिक रूप से केन्द्रीय प्रतिदर्श कहा जाता है। अधिकांश राज्यों ने भी राज्य प्रतिदर्श के तहत बराबर के अथवा अपेक्षाकृत बड़े प्रतिदर्श आकारों के लिए इस प्रकार के सर्वेक्षण किए हैं। केन्द्रीय प्रतिदर्शों से एकत्र किए गए आंकड़ों से रोजगार एवं बेरोजगारी के बारे में प्राप्त निष्कर्षों को एनएसएसओ अनेक रिपोर्टों के रूप में प्रकाशित करता है। 'भारत में रोजगार तथा बेरोजगारी के प्रमुख संकेतक, 2011-12' नामक दस्तावेज जून, 2013 में जारी किया गया था और जून, 2013 में ही यानी फील्ड कार्य समाप्त होने के एक वर्ष के अंदर इकाई स्तर के आंकड़े भी जारी कर दिए गए थे। मुख्य संकेतकों के बारे में उपरोक्त दस्तावेज जारी करने के अलावा, एनएसएस के 68वें दौर के आधार पर रोजगार तथा बेरोजगारी के अलग-अलग पहलुओं के बारे में आने वाले समय में सात विस्तृत रिपोर्टें जारी करने की योजना बनाई गई है। इस श्रृंखला की पहली रिपोर्ट 'भारत में रोजगार एवं बेरोजगारी की स्थिति 2011-12' जनवरी, 2014 में प्रकाशित की गई थी। 'भारत में औपचारिक क्षेत्र तथा रोजगार की स्थितियां नामक दूसरी रिपोर्ट जुलाई, 2014 और 'घरेलू कार्यों के साथ विशिष्ट कार्यकलापों में महिलाओं की भागीदारी' नामक तीसरी रिपोर्ट सितम्बर, 2014 में प्रकाशित की गई थी। 'भारत में विभिन्न सामाजिक समूहों में रोजगार और बेरोजगारी की स्थिति' नामक वर्तमान रिपोर्ट इस श्रृंखला की चौथी रिपोर्ट है।

3. इस रिपोर्ट में रोजगार तथा बेरोजगारी और चार सामाजिक समूहों यथा अनुसूचित जनजाति (अ.ज.जा.), अनुसूचित जाति (अ.जा.), अन्य पिछड़ा वर्ग (अ.पि.व.) तथा अन्यों से संबंधित व्यक्तियों की विशिष्टताओं के चुने हुए पहलुओं पर सूचना दी गई है। इस रिपोर्ट में तीन अध्याय और पांच परिशिष्ट हैं। अनुमानों से संबंधित मुख्य निष्कर्ष इस रिपोर्ट के तीसरे अध्याय में दिए गए हैं।

4. एनएसएसओ के सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी)ने सर्वेक्षण पद्धति, सर्वेक्षण साधन विकसित करने तथा यह रिपोर्ट तैयार करने का कार्य किया। एनएसएसओ के क्षेत्र संकार्य प्रभाग ने (एफओडी) फील्ड कार्य, किया जबकि आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग ने (डीपीडी)किया। एनएसएसओ के ही समन्वय एवं प्रकाशन प्रभाग (सीपीडी)ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया।

5. मैं सर्वेक्षण के विभिन्न चरणों में अपना बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 68वें दौर के कार्य दल और राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ। मैं इस रिपोर्ट को प्रकाशित करने के लिए आवश्यक सुव्यवस्थित नियोजन तथा विभिन्न कार्यकलापों के बेहतरीन निष्पादन के लिए एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ।

6. मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, कलेवर, कवरेज अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

(ए.के. मेहरा)

महानिदेशक एवं मुख्य कार्यकारी अधिकारी,
राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय

नई दिल्ली
जनवरी, 2015

PREFACE

The all India Employment and Unemployment Surveys of National Sample Survey Office (NSSO) are the primary sources of labour market data at the National and State level. The labour force indicators at National and State/UT levels, generated from these surveys, provide the critical inputs required for planning and policy formulation exercises of various Government organisations and also serve as an important element of data to other users/researchers. NSS surveys on Employment and Unemployment, with large sample of households, are being conducted quinquennially from 27th round (October 1972 – September 1973) onwards. Including the present employment and unemployment survey during NSS 68th round (July 2011- June 2012), nine such comprehensive surveys on the employment and unemployment have been conducted by NSSO so far. The NSS 68th round covered the subjects of (i) *Household Consumer Expenditure* and (ii) *Employment and Unemployment*.

2. The sample surveyed by the NSSO is traditionally referred to as the 'Central Sample'. Most of the States have also conducted this survey for an equal or larger sample size under the 'State Sample'. The results of the Employment and Unemployment surveys, generated from the Central Sample data, are brought out by NSSO in the form of a number of reports. The document '*Key Indicators of Employment and Unemployment in India, 2011-12*' was brought out in June 2013 and unit level data were also released in June, 2013, i.e., within one year of completion of the field work. Apart from the above document on key indicators, seven detailed reports are planned to be released on varied aspects of Employment and Unemployment based on NSS 68th round data. The first report of this series '*Employment and Unemployment Situation in India, 2011-12*' was brought out in January 2014, the second report '*Informal Sector and Conditions of Employment in India*' was brought out in July 2014 and the third report, '*Participation of Women in Specified Activities along with Domestic Duties*' was brought out in September 2014. The present report, '*Employment and unemployment situation among social groups in India*' is the fourth in the series.

3. This report presents information on selected aspects of employment and unemployment and some other features pertaining to people belonging to four social groups viz., Scheduled Tribe (ST), Scheduled Caste (SC), Other Backward Class (OBC) and others. This report contains three chapters and five appendices. The main findings, relating to the estimates given in this report, are presented in Chapter Three.

4. The Survey Design and Research Division (SDRD) of NSSO developed the survey instruments and prepared this report. The field work was carried out by the Field Operations Division (FOD) of NSSO, while the data processing and tabulation was undertaken by the Data Processing Division (DPD) of NSSO. The Coordination and Publication Division (CPD) of NSSO coordinated various activities pertaining to the survey.

5. I am greatly thankful to the Chairman and Members of the Working Group of NSSO 68th round and the National Statistical Commission (NSC) for their valuable guidance at various stages of the survey. I also acknowledge and appreciate the efforts made by the officials of the different Divisions of NSSO in meticulous planning and execution of various activities involved in bringing out this report.

6. I hope this report will be useful to planners, policy makers and researchers. Suggestions for improvement in the content, layout, coverage or any other aspect of this report would be highly appreciated.

(A. K. Mehra)

Director General & Chief Executive Officer
National Sample Survey Office

New Delhi
January 2015.

मुख्य विशेषतायें

यह रिपोर्ट जुलाई 2011 से जून 2012 के दौरान रा.प्र.स. के 68वें दौर में रोजगार एवं बेरोजगारी पर किए गए सर्वेक्षण पर आधारित है। प्रथम चरण इकाईयों (प्र.च.इ.या) एवं सर्वेक्षित परिवार एवं परिगणित व्यक्तियों की संख्या नीचे दिए गए हैं :-

- यह सर्वेक्षण 12,737 प्र.च.इ.यों में (7,469 ग्रामों एवं 5,268 नगरीय खण्डों) में फैला हुआ था, एवं 1,01,724 परिवारों (59,700 ग्रामीण क्षेत्रों में एवं 42,024 नगरीय क्षेत्रों में) को इसमें समाविष्ट किया गया एवं 4,56,999 व्यक्तियों (2,80,763 ग्रामीण क्षेत्रों में एवं 1,76,236 नगरीय क्षेत्रों में) की गणना की गई।

[अनु. 3.2.1.2]

- अखिल-भारतीय-स्तर पर ग्रामीण क्षेत्र में सामाजिक वर्गों जैसे, अनुसूचित जाति (अ.जा.), अनुसूचित जन जाति (अ.ज.जा.), अन्य पिछड़ी जाति (अ.पि.जा.) एवं अन्य के लिए सर्वेक्षित¹ परिवारों की संख्या क्रमशः 9833, 10147, 23604, 16114 था, जबकि नगरीय क्षेत्रों में यह संख्या क्रमशः 3573, 5505, 16117, 16829 था।

[अनु. 3.2.1.2]

- अखिल-भारतीय-स्तर पर ग्रामीण क्षेत्र में सामाजिक वर्गों जैसे, अनुसूचित जाति(अ.जा), अनुसूचित जनजाति(अ.ज.ज), अन्य पिछड़ी जाति(अ.पि.ज) एवं अन्य के लिए सर्वेक्षित व्यक्तियों की संख्या क्रमशः 46028, 46339, 112374, 76014, था, जबकि नगरीय क्षेत्रों में यह संख्या क्रमशः 15633, 23534, 68201, 68868 था।

[अनु. 3.2.1.2]

इस रिपोर्ट में विविध सामाजिक वर्गों के लिए रोजगार एवं बेरोजगार संकेतकों के प्राक्कलन सामान्य स्तर (पीएस+एसएस) में प्रस्तुत किये गए हैं। सामान्य स्तर पर सुसंगत संकल्पनाएँ अध्याय दो में दिए गए हैं (संकल्पनाएं एवं परिभाषाएं)।

अखिल भारतीय स्तर पर रा.प्र.स के 68वें दौर (जुलाई 2011-जून 2012) के दौरान जो आकड़े एकत्र किए गए हैं, उस पर आधारित, विभिन्न सामाजिक वर्गों के कुछ मुख्य निष्कर्ष, नीचे दिए गए हैं :-

(क) परिवार एवं जनसंख्या

(i) परिवार एवं जनसंख्या का वितरण :-

- भारत में करीब 68.8 प्रतिशत परिवार ग्रामीण क्षेत्रों से थे जो कुल जनसंख्या का करीब 71.2 प्रतिशत थे।

[अनु. 3.2.1.3]

- देश में करीब 8.8 प्रतिशत परिवार अनुसूचित जन जातियों (एसटी) के थे, अनुसूचित जातियों (एससी) के करीब 18.7 प्रतिशत एवं 43.1 प्रतिशत अन्य पिछड़ी जातियों (ओबीसी) के थे।

[अनु. 3.2.2.1]

¹ ग्रामीण क्षेत्रों में दो प्रतिदर्श परिवारों के लिए (जिनमें कुल 8 व्यक्ति हैं) सामाजिक समूह का रिपोर्ट नहीं किया गया इसलिए ग्रामीण क्षेत्रों में अनुसूचित जनजाती (एसटी), अनुसूचित जाती (एससी), अन्य पिछड़ी जाती (ओबीसी) एवं अन्य से प्रतिदर्श परिवारों/व्यक्तियों की संख्या, अखिल भारतीय स्तर पर ग्रामीण क्षेत्रों में प्रतिदर्श परिवारों/व्यक्तियों की कुल संख्या से मिलती नहीं है।

- ग्रामीण क्षेत्रों में, 11.2 प्रतिशत परिवार अनुसूचित जन जाति, 20.9 प्रतिशत अनुसूचित जाति एवं 44.2 प्रतिशत अन्य पिछड़ी जाति के थे जबकि नगरीय क्षेत्रों में, तदनुरूप अनुपात क्रमशः 3.5 प्रतिशत, 13.8 प्रतिशत एवं 40.9 प्रतिशत था ।

[अनु. 3.2.2.1]

- अखिल-भारतीय-स्तर पर अ.ज.जा., अ.जा. एवं अ.पि.जा. वर्गों के व्यक्तियों का अनुपात क्रमशः 8.7 प्रतिशत, 18.8 प्रतिशत एवं 44 प्रतिशत था । ग्रामीण क्षेत्रों में तदनुरूप अनुपात क्रमशः 10.8 प्रतिशत, 20.7 प्रतिशत एवं 45.1 प्रतिशत था, एवं नगरीय क्षेत्रों में यह, करीब 3.4 प्रतिशत, 14.3 प्रतिशत एवं 41.4 प्रतिशत थे ।

[अनु. 3.2.3.2]

(ii) परिवार का आकार एवं लिंग अनुपात :-

- ग्रामीण क्षेत्रों में, परिवार का आकार अ.पि.जा. में सबसे अधिक था (4.6) एवं बच्चे प्रत्येक सामाजिक वर्गों के लिए यह 4.4 था ।

[अनु. 3.2.3.3]

- नगरीय क्षेत्रों में, परिवार का आकार अ.जा में सबसे अधिक था (4.2) एवं अ.ज.जा एवं अन्यो में सबसे कम (प्रत्येक 3.9) एवं अ.पि.जा. में यह 4.1 था ।

[अनु. 3.2.3.3]

- ग्रामीण क्षेत्रों में, अ.पि.जा के लिए लिंग अनुपात सबसे अधिक था (प्रत्येक 1000 पुरुषों के मुकाबले 965 महिलाएं) एवं अन्यो के लिए सबसे कम (प्रत्येक 1000 पुरुषों पर 942 महिलाएं) था ।

[अनु. 3.2.3.3]

- नगरीय क्षेत्रों में अ.जा. में यह लिंग अनुपात सबसे अधिक था (प्रत्येक 1000 पुरुषों पर 946 महिलाएं) एवं अ.ज.जा. के लिए यह सबसे कम (प्रत्येक 1000 पुरुषों पर 884 महिलाएं) था ।

[अनु. 3.2.3.3]

(iii) परिवार का प्रकार :-

➤ स्व-रोजगार

- ग्रामीण भारत में वैसा परिवार जिनके आय का प्रमुख स्रोत स्व-रोजगार था, यह अन्य वर्ग में सबसे अधिक (58.4 प्रतिशत) था, तत्पश्चात् अ.पि.जा.(52.9 प्रतिशत), अ.ज.जा. (49.5 प्रतिशत) एवं अ.जा. (33.7 प्रतिशत) ।

[अनु. 3.2.4.2]

- नगरीय भारत में वैसा परिवार जिनके आय का प्रमुख स्रोत स्व-रोजगार था, यह अनुपात अ.पि.जा में (37.8 प्रतिशत) एवं अन्य में (36.9 प्रतिशत), अधिकतर था, अ.जा. (26.8 प्रतिशत) एवं अ.ज.जा. (19.5 प्रतिशत) के तुलना में ।

[अनु. 3.2.4.3]

➤ आकस्मिक श्रम :-

- ग्रामीण भारत में, उन परिवारों का अनुपात जिनका आकस्मिक श्रम आय का मुख्य स्रोत था, अ.जा में (52.6 प्रतिशत) एवं अ.ज.जा. में (करीब 38.3 प्रतिशत) अधिकतर था, अ.पि.जा (32.1 प्रतिशत) और 'अन्य' (21 प्रतिशत) के तुलना में ।

[अनु. 3.2.4.2]

- नगरीय भारत में, उन परिवारों का अनुपात जिनका आकस्मिक श्रम आय का मुख्य स्रोत था, अ.जा. एवं अ.ज.जा में अधिक था (क्रमशः 20.5 प्रतिशत एवं 18 प्रतिशत), अ.पि.जा (14.3 प्रतिशत) और 'अन्य' (5.9 प्रतिशत) के तुलना में ।

[अनु. 3.2.4.3]

➤ **नियमित मजदूरी/वेतन :-**

- ग्रामीण भारत में, उन परिवारों का अनुपात जिनका नियमित मजदूरी/वेतन ही आय का मुख्य स्रोत था, अन्य वर्ग में सबसे अधिक (13.3 प्रतिशत) था, तत्पश्चात् अ.पि.जा (9 प्रतिशत), अ.जा (8.5 प्रतिशत) एवं अ.ज.जा(6.3 प्रतिशत) था ।

[अनु. 3.2.4.2]

- नगरीय भारत में, उन परिवारों का अनुपात जिनका नियमित मजदूरी/वेतन आय का मुख्य स्रोत था, अ.ज.जा. के लिए सबसे अधिक (46.5 प्रतिशत) था, तत्पश्चात् अन्य (44.5 प्रतिशत), अ.जा. (44 प्रतिशत) एवं अ.पि.जा (37.6 प्रतिशत) था ।

[अनु. 3.2.4.3]

(iv) **ग्रामीण क्षेत्रों में धारित भूमि एवं जोती गयी भूमि :-**

- उन परिवारों का अनुपात जिनकी धारित भूमि का आकार 4.01 हैक्टेयर या उससे अधिक था, 'अन्य' वर्ग के परिवारों के लिए सबसे अधिक (4.3 प्रतिशत) था, तत्पश्चात्, अ.पि.जा (3.2 प्रतिशत), अ.ज.जा. (करीब 1.8 प्रतिशत) एवं अ.जा. (0.8 प्रतिशत) था ।

[अनु. 3.2.5.2]

- उन परिवारों का अनुपात जिन्होंने 4.01 हैक्टेयर या उससे अधिक की भूमि को जोता, 'अन्य' वर्ग के परिवारों में सबसे अधिक था (करीब 3.8 प्रतिशत), तत्पश्चात् अ.पि.जा. (करीब 2.7 प्रतिशत), अ.ज.जा. (1.7 प्रतिशत) एवं अ.जा.(0.6 प्रतिशत) था ।

[अनु. 3.2.6.1]

(ख) **शैक्षणिक संस्थाओं में साक्षरता एवं वर्तमान उपस्थिति**

(i) **वैसा परिवार जिनमें 15 वर्ष या उससे अधिक आयु का कोई साक्षर सदस्य अथवा साक्षर महिला सदस्य नहीं था :-**

- ग्रामीण क्षेत्रों में करीब 18.2 प्रतिशत एवं नगरीय क्षेत्रों में करीब 5.9 प्रतिशत, परिवारों में 15 वर्ष एवं उससे अधिक उम्र का कोई साक्षर सदस्य नहीं था ।

[अनु. 3.2.7.2]

- दोनों ग्रामीण एवं नगरीय भारत में अ.पि.जा. या अन्य वर्ग के परिवार के मुकाबले अ.ज.जा.यों एवं अ.जा.यों के परिवारों में 15 वर्ष और उससे अधिक उम्र के कोई साक्षर सदस्य या 15 वर्ष और अधिक उम्र का कोई साक्षर महिला सदस्य नहीं था के परिवार का अनुपात काफी अधिक था।

[अनु. 3.2.7.2]

- उन परिवार का अनुपात जिनका कोई 15 वर्ष और उससे अधिक उम्र के साक्षर सदस्य नहीं था, अ.ज.जा. के परिवारों में, ग्रामीण क्षेत्रों में 26.6 प्रतिशत था 8.9 प्रतिशत नगरीय क्षेत्रों की तुलना में, अ.जा. के परिवारों में ग्रामीण क्षेत्र में 23 प्रतिशत था 9.7 प्रतिशत नगरीय क्षेत्रों की तुलना में, अ.पि.जा के परिवारों में ग्रामीण क्षेत्रों में 17.9 प्रतिशत था 7 प्रतिशत नगरीय क्षेत्रों की तुलना में एवं अन्य वर्गों के परिवारों में, ग्रामीण क्षेत्रों में 10.6 प्रतिशत था 3.3 प्रतिशत नगरीय क्षेत्रों की तुलना में।

[अनु. 3.2.7.2]

- अ.ज.जा. के बीच, ग्रामीण क्षेत्रों में 46.6 प्रतिशत परिवार का 21.3 प्रतिशत नगरीय क्षेत्र के मुकाबले, अ.जा. के बीच ग्रामीण क्षेत्रों में 47.3 प्रतिशत परिवार का 23.7 प्रतिशत नगरीय क्षेत्रों के मुकाबले, अ.पि.जा के बीच, ग्रामीण क्षेत्रों में 39.3 प्रतिशत परिवार का 16.4 प्रतिशत नगरीय क्षेत्र के मुकाबले, अन्य वर्गों के बीच, ग्रामीण क्षेत्र में 24.5 प्रतिशत परिवार का 8.1 प्रतिशत नगरीय क्षेत्र के मुकाबले 15 वर्ष एवं उससे अधिक उम्र का कोई साक्षर महिला सदस्य नहीं था ।
[अनु. 3.2.7.2]
- (ii) पांच वर्ष एवं उससे अधिक उम्र के व्यक्तियों के बीच साक्षरता दर :-
- देश में 5 वर्ष और उससे अधिक उम्र की जनसंख्या का करीब 74.1 प्रतिशत साक्षर था ।
[अनु. 3.2.9.1]
 - साक्षरता दर अन्य वर्ग में सबसे अधिक (83.2 प्रतिशत) था, तत्पश्चात् अ.पि.जा. (72.8 प्रतिशत), अ.जा (67.4 प्रतिशत) एवं अ.ज.जा. (64.8 प्रतिशत) ।
[अनु. 3.2.9.1]
 - ग्रामीण भारत के लिए साक्षरता दर अन्य वर्गों के लिए करीब 78.1 प्रतिशत, अ.पि.जा. के लिए 68.8 प्रतिशत, अ.जा के लिए 64.3 प्रतिशत एवं अ.ज.जा के लिए 62.7 प्रतिशत था ।
[अनु. 3.2.9.1]
 - नगरीय भारत के लिए साक्षरता दर अन्य वर्गों के लिए 90.2 प्रतिशत, अ.पि.जा के बीच 83.2 प्रतिशत, अ.ज.जा. के बीच 80.6 प्रतिशत एवं अ.जा. के बीच 78.5 प्रतिशत था ।
[अनु. 3.2.9.1]
- (iii) शैक्षणिक संस्थाओं में वर्तमान उपस्थिति दर
- 5-14 वर्ष के व्यक्तियों के बीच :-
- ग्रामीण क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के बीच सबसे अधिक (92.4 प्रतिशत) था, अ.पि.जा. के बीच 89.2 प्रतिशत, अ.जा. के बीच 88.7 प्रतिशत एवं अ.ज.जा में सबसे कम, करीब 88 प्रतिशत था ।
[अनु. 3.2.11.1]
 - नगरीय क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के बीच करीब 94.5 प्रतिशत था, अ.पि.जा. के बीच 93.6 प्रतिशत था, अ.ज.जा. के बीच 92.3 प्रतिशत एवं अ.जा. में सबसे कम, करीब 91.8 प्रतिशत था ।
[अनु. 3.2.11.1]
- 15-19 वर्ष के व्यक्तियों के बीच :-
- ग्रामीण क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के व्यक्तियों में सबसे अधिक (67.5 प्रतिशत) था, तत्पश्चात् अ.पि.जा. (62.3 प्रतिशत), अ.जा. (54.6 प्रतिशत) एवं अ.ज.जा. में सबसे कम (51.5 प्रतिशत) था ।
[अनु. 3.2.11.1]
 - नगरीय क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के व्यक्तियों में सबसे अधिक था (75.8 प्रतिशत), तत्पश्चात् अ.ज.जा. (71.3 प्रतिशत), अ.पि.जा. (69.5 प्रतिशत) एवं अ.जा. के लिए यह सबसे कम (65.3 प्रतिशत) था ।
[अनु. 3.2.11.1]

➤ 20-24 वर्ष के व्यक्तियों के बीच

- ग्रामीण क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के व्यक्तियों में सबसे अधिक (23.5 प्रतिशत) था, तत्पश्चात् अ.पि.जा. (15.7 प्रतिशत), अ.जा. (12.6 प्रतिशत) एवं अ.ज.जा. में यह सबसे कम (9.9 प्रतिशत) था ।

[अनु. 3.2.11.1]

- नगरीय क्षेत्रों में, वर्तमान उपस्थिति दर अन्य वर्गों के व्यक्तियों में सबसे अधिक (35.5 प्रतिशत) था, तत्पश्चात् अ.ज.जा. (28.1 प्रतिशत), अ.पि.जा. (26.5 प्रतिशत) एवं अ.जा. में यह सबसे कम (21.6 प्रतिशत) था ।

[अनु. 3.2.11.1]

(ग) एम.जी नरेगा कार्यों में ग्रामीण परिवारों की भागीदारी :-

(i) एम.जी नरेगा जॉब कार्ड में व्यक्तियों का पंजीकरण एवं परिवार जिनके पास एम जी नरेगा जॉब कार्ड हैं :-

- ग्रामीण क्षेत्रों में करीब 38.4 प्रतिशत परिवारों के पास एम. जी. नरेगा जॉब कार्ड थे ।

[अनु. 3.2.8.2]

- अन्य वर्ग के परिवारों एवं अ.पि.जा के मुकाबले अ.ज.जा. एवं अ.जा. के वर्ग के परिवारों का अनुपात अधिक था जिनके पास एम जी नरेगा जॉब कार्ड थे : 34.2 प्रतिशत अ.पि.जा. के परिवारों एवं 27.1 प्रतिशत अन्य वर्ग के परिवारों के मुकाबले 57.2 प्रतिशत अ.ज.जा. के परिवार एवं 50 प्रतिशत अ.जा. के परिवारों के पास एम जी नरेगा जॉब कार्ड थे ।

[अनु. 3.2.8.2]

- 18 वर्ष एवं उससे अधिक आयु वाले करीब 23.7 प्रतिशत ग्रामीण व्यक्ति एम.जी. नरेगा जॉब कार्ड में पंजीकृत थे ।

[अनु. 3.2.8.4]

- 18 वर्ष एवं उससे अधिक आयु वाले व्यक्तियों में, महिलाओं के मुकाबले पुरुष अधिक अनुपात में एम.जी नरेगा जॉब कार्ड में पंजीकृत थे : 19.4 प्रतिशत महिलाओं के मुकाबले करीब 28.1 प्रतिशत पुरुष एम. जी नरेगा जॉब कार्ड में पंजीकृत थे ।

[अनु. 3.2.8.4]

- 18 वर्ष एवं उससे अधिक आयु के व्यक्तियों का अनुपात जो एम.जी नरेगा जॉब कार्ड में पंजीकृत थे, सबसे अधिक था, अ.ज.जा. के परिवारों के व्यक्तियों के लिए करीब 42.6 प्रतिशत, तत्पश्चात् अ.जा के लिए 30.9 प्रतिशत, अ.पि.जा. के लिए 21 प्रतिशत एवं अन्य वर्गों के परिवारों के लिए सबसे कम 14.7 प्रतिशत था ।

[अनु. 3.2.8.4]

(ii) एम.जी नरेगा जॉब कार्ड में पंजीकृत 18 वर्ष एवं उससे अधिक आयु के व्यक्तियों के बीच एम जी नरेगा में काम पाने की स्थिति :-

- 18 वर्ष एवं उससे अधिक आयु वाले ग्रामीण व्यक्तियों के बीच जो कि एम.जी नरेगा जॉब कार्ड में पंजीकृत थे, 50.5 प्रतिशत को एम जी नरेगा कार्य में काम मिला, 18.8 प्रतिशत ने कार्य माँगा पर एमजी नरेगा कार्य नहीं मिला, एवं 30.5 प्रतिशत ने एम जी नरेगा कार्य नहीं माँगा ।

[अनु. 3.2.8.5]

- उन व्यक्तियों का अनुपात जिन्हें एम जी नरेगा कार्य में काम मिला अ.जा. में सबसे अधिक (55.6 प्रतिशत) था, तत्पश्चात् अ.ज.जा. (50.5 प्रतिशत), अ.पि.जा. (49.1 प्रतिशत) एवं अन्य वर्ग के बीच सबसे कम (45.5 प्रतिशत) था ।

[अनु. 3.2.8.5]

- उन व्यक्तियों का अनुपात जिन्होंने माँगा पर एम जी नरेगा कार्य नहीं मिला, अन्य वर्ग के व्यक्तियों के लिए सबसे अधिक (21.9 प्रतिशत) था, एवं अ.पि.जा. में सबसे कम था (16.5 प्रतिशत) था ।

[अनु. 3.2.8.5]

- उन व्यक्तियों का अनुपात जिन्होंने एम जी नरेगा कार्य में काम नहीं माँगा अ.पि.जा. में सबसे अधिक था (करीब 34.2 प्रतिशत) एवं अ.जा. में सबसे कम (24 प्रतिशत) था, जबकि अ.ज.जा. में यह 30.4 प्रतिशत था एवं अन्य वर्ग में 32.5 प्रतिशत था ।

[अनु. 3.2.8.5]

(घ) सामान्य स्तर (पीएस+एसएस) के अनुसार श्रमबल :-

- सामान्य स्तर (पीएस+एसएस) के अनुसार, ग्रामीण क्षेत्रों की करीब 40.6 प्रतिशत जनसंख्या एवं नगरीय क्षेत्रों की करीब 36.7 प्रतिशत जनसंख्या श्रम बल में थे ।

[अनु. 3.3.2.2]

- अखिल-भारतीय स्तर पर, श्रमबल भागीदारी दर (श्र.ब.भा.द) अ.ज.जा. में सबसे अधिक था (45.9 प्रतिशत) तत्पश्चात् अ.जा. (40.4 प्रतिशत), अ.पि.जा (38.9 प्रतिशत) एवं 'अन्य' के लिए यह सबसे कम (37.8 प्रतिशत) था ।

[अनु. 3.3.2.2]

- ग्रामीण क्षेत्रों में, यह श्र.ब.भा.द अ.ज.जा. में सबसे अधिक (46.9 प्रतिशत) था, तत्पश्चात् अ.जा. (41.1 प्रतिशत), अ.पि.जा (39.8 प्रतिशत) एवं अन्य वर्ग के बीच यह सबसे कम (38.9 प्रतिशत) था ।

[अनु. 3.3.2.2]

- नगरीय क्षेत्रों में, यह श्र.ब.भा.द अ.ज.जा. में सबसे अधिक (38 प्रतिशत) था, तत्पश्चात् अ.जा. (37.7 प्रतिशत), अ.पि.जा (36.7 प्रतिशत) एवं अन्य वर्ग के बीच यह सबसे कम (36.3 प्रतिशत) था ।

[अनु. 3.3.2.2]

(ङ) सामान्य स्तर (पीएस+एसएस) के अनुसार कार्यबल :-

- सामान्य स्तर (पीएस+एसएस) के अनुसार, ग्रामीण क्षेत्रों की करीब 39.9 प्रतिशत जनसंख्या एवं नगरीय क्षेत्रों के करीब 35.5 प्रतिशत जनसंख्या नियोजित थी ।

[अनु. 3.3.3.2]

- ग्रामीण भारत में, पुरुषों एवं महिलाओं दोनों के लिए कामगार जनसंख्या अनुपात (का.ज.अ) अ.ज.जा. में सबसे अधिक था (55.7 प्रतिशत पुरुषों में एवं 36.4 प्रतिशत महिलाओं में), शेष बचे सामाजिक वर्गों के बीच, यह का.ज.अ. अ.जा. के पुरुषों के लिए 53.9 प्रतिशत था, अ.पि.जा.यों के लिए 53.8 प्रतिशत था एवं अन्य वर्गों के लिए 55.2 प्रतिशत था जबकि महिलाओं के लिए यह अ.जा.यों में 26.2 प्रतिशत, अ.पि.जा.यों के लिए 23.9 प्रतिशत एवं अन्य वर्गों के लिए 20.1 प्रतिशत था ।

[अनु. 3.3.3.2]

- नगरीय पुरुषों के लिए, यह का.ज.अ. अन्य, अ.जा., एवं अ.पि.जा. के व्यक्तियों में अ.ज.जा. के मुकाबले कुछ अधिक था : अन्य वर्गों के लिए 54.9 प्रतिशत, अ.जा. के बीच 54.5 प्रतिशत, अ.पि.जा. के बीच 54.6 प्रतिशत एवं अ.ज.जा. के बीच 52 प्रतिशत था ।

[अनु. 3.3.3.2]

- नगरीय भारत में महिलाओं के बीच, यह का.ज.अ अ.ज.जा. में सबसे अधिक (19.2 प्रतिशत) था, तत्पश्चात् अ.जा (17.2 प्रतिशत), अ.पि.जा (15.1 प्रतिशत) एवं अन्य वर्गों के बीच यह सबसे कम (12.9 प्रतिशत) था ।

[अनु. 3.3.3.2]

(च) सामान्य स्तर (पीएस+एसएस) के अनुसार बेरोजगारी दर :-

- ग्रामीण क्षेत्रों में, पुरुषों के लिए यह बेरोजगारी दर अ.जा के लिए 2 प्रतिशत, अ.पि.जा के लिए 1.7 प्रतिशत, अन्यो के लिए 1.8 प्रतिशत एवं अ.ज.जा के लिए 1.3 प्रतिशत था ।

[अनु. 3.3.7.2]

- ग्रामीण क्षेत्रों में महिलाओं के बीच, यह बेरोजगारी दर अन्य वर्ग के बीच 2.4 प्रतिशत था, अ.पि.जा के बीच 1.7 प्रतिशत, अ.जा के बीच 1.4 प्रतिशत एवं अ.ज.जा के बीच 1.1 प्रतिशत था।

[अनु. 3.3.7.2]

- नगरीय क्षेत्रों में, पुरुषों के बीच यह बेरोजगारी दर अ.ज.जा. एवं अन्य वर्ग के लिए सबसे अधिक था (प्रत्येक करीब 3.4 प्रतिशत), अ.जा के बीच 3.2 प्रतिशत एवं अ.पि.जा. वर्गों के बीच 2.5 प्रतिशत था।

[अनु. 3.3.7.3]

- नगरीय क्षेत्रों में महिलाओं के बीच, यह बेरोजगारी दर अन्य वर्ग के बीच सबसे अधिक (6.3 प्रतिशत) था, अ.ज.जा के लिए यह 4.8 प्रतिशत, अ.पि.जा के बीच 4.7 प्रतिशत एवं अ.जा. के बीच यह 4.5 प्रतिशत था ।

[अनु. 3.3.7.3]

HIGHLIGHTS

This report is based on the employment and unemployment survey conducted in the 68th round of NSS during July 2011 to June 2012. Number of First Stage Units (FSU) and households surveyed and persons enumerated are given below:

- The survey was spread over 12,737 FSUs (7,469 villages and 5,268 urban blocks) covering 1,01,724 households (59,700 in rural areas and 42,024 in urban areas) and enumerating 4,56,999 persons (2,80,763 in rural areas and 1,76,236 in urban areas).
[para. 3.2.1.2]
- The number of households surveyed¹ for the social groups viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* at the all-India level in rural area were 9833, 10147, 23604, 16114, respectively, while in urban areas these were 3573, 5505, 16117, 16829, respectively.
[para. 3.2.1.2]
- The number of persons surveyed for the social groups viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* at the all-India level in rural area were 46028, 46339, 112374, 76014, respectively, while in urban areas these were 15633, 23534, 68201, 68868, respectively.
[para. 3.2.1.2]

In this report, estimates of the employment and unemployment indicators for various social groups have been presented with respect to the *usual status* (ps+ss). The relevant concepts on usual status are given in Chapter Two (*Concepts and Definitions*).

Some of the key findings, pertaining to various social groups, at the all-India level based on the data collected during NSS 68th (July 2011- June 2012) round are stated below:

A. Household and Population

(i) *Distribution of household and population*

- About 68.8 per cent of the households in India belonged to rural areas and accounted for about 71.2 per cent of the total population.
[para. 3.2.1.3]
- Nearly 8.8 per cent of the households in the country belonged to *scheduled tribes* (ST), about 18.7 per cent belonged to *scheduled castes* (SC) and about 43.1 per cent belonged to the *other backward class* (OBC).
[para. 3.2.2.1]

¹ In rural areas, for 2 sample households (having a total of 8 persons), household social group was not reported. Hence, number of sample households/persons in rural areas belonging to *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* does not add up to total number of sample households/persons in rural areas at the all-India level.

- In rural areas, 11.2 per cent of the households belonged to ST, 20.9 per cent to SC, 44.2 per cent to OBC while in urban areas, the corresponding proportions were 3.5 per cent, 13.8 per cent and 40.9 per cent, respectively. [para. 3.2.2.1]

- The proportion of persons belonging to ST, SC and OBC categories were about 8.7 per cent, 18.8 per cent and 44 per cent, respectively, at the all-India level. The corresponding proportions were 10.8 per cent, 20.7 per cent and 45.1 per cent, respectively in rural areas and about 3.4 per cent, 14.3 per cent and 41.4 per cent, respectively in urban areas. [para. 3.2.3.2]

(ii) Household size and sex ratio

- In rural areas, the household size was the highest among OBC (4.6) and for each of the remaining social groups it was 4.4. [para. 3.2.3.3]
- In urban areas, the household size was the highest among SC (4.2) and the lowest among the ST and *others* (3.9 each) and it was 4.1 among OBC. [para. 3.2.3.3]
- In rural areas, sex ratio was the highest for OBC (965 females per 1000 males) and the lowest for *others* (942 females per 1000 males). [para. 3.2.3.3]
- In urban areas the sex ratio was the highest for SC (946 females per 1000 males) while it was the lowest for ST (884 females per 1000 males). [para. 3.2.3.3]

(iii) Household type

➤ *Self-employment*

- In rural India, proportion of households with *self-employment* as the major source of income was the highest among *others* category (58.4 per cent) followed by OBC (52.9 per cent), ST (49.5 per cent) and SC (33.7 per cent). [para. 3.2.4.2]
- In urban India, proportion of households with *self-employment* as the major source of income was higher among OBC (37.8 per cent) and *others* (36.9 per cent) than among the SC (26.8 per cent) or ST (19.5 per cent) households. [para. 3.2.4.3]

➤ **Casual labour**

- In rural India, proportion of households with *casual labour* as the major source of income was much higher among SC (52.6 per cent) and ST (about 38.3 per cent) than among the OBC (32.1 per cent) and ‘*others*’ (21 per cent).

[para. 3.2.4.2]

- In urban India, proportion of households with income from *casual labour* as major source, was higher among the SC and ST (20.5 per cent and 18 per cent, respectively) than among OBC (14.3 per cent) or *others* (5.9 per cent).

[para. 3.2.4.3]

➤ **Regular wage/salary**

- In rural India, proportion of households with *regular wage/salary* earning as the major source was the highest among *others* category (13.3 per cent) followed by OBC (9 per cent), SC (8.5 per cent) and ST (6.3 per cent).

[para. 3.2.4.2]

- In urban India, proportion of households with *regular wage/salary* earning as the major source was the highest for ST (46.5 per cent) followed by *others* (44.5 per cent), SC (44 per cent) and OBC (37.6 per cent).

[para. 3.2.4.3]

(iv) Land possessed and land cultivated in rural areas

- The proportion of households possessing land of size 4.01 hectares or more was the highest for *others* category of households (4.3 per cent), followed by OBC (3.2 per cent), ST (about 1.8 per cent) and SC (0.8 per cent).

[para. 3.2.5.2]

- The proportion of households cultivating land of size 4.01 hectares or more was the highest among *others* category of households (about 3.8 per cent), followed by OBC (about 2.7 per cent), ST (1.7 per cent) and SC (0.6 per cent).

[para. 3.2.6.1]

B. Literacy and Current Attendance in Educational Institutions

(i) Households without any literate member or literate female member of age 15 years and above

- About 18.2 per cent of the households in the rural areas and 5.9 per cent in the urban areas, had no literate member of age 15 years and above.

[para. 3.2.7.2]

- The proportion of households without any literate member of age 15 years and above or any literate female member of age 15 years and above was much higher

among the households belonging to the STs and SCs compared to the OBCs or *others* category households in both rural and urban India.

[para. 3.2.7.2]

- Among ST, 26.6 per cent households in rural areas compared to 8.9 per cent in urban areas, among SC, 23 per cent households in rural areas compared to 9.7 per cent in urban areas, among OBC, 17.9 per cent households in rural areas compared to 7 per cent in urban areas and among *others*, 10.6 per cent in rural areas compared to 3.3 in urban areas had no literate member of age 15 years and above.

[para. 3.2.7.2]

- Among ST, 46.6 per cent households in rural areas compared to 21.3 per cent in urban areas, among SC, 47.3 per cent households in rural areas compared to 23.7 per cent in urban areas, among OBC, 39.3 per cent households in rural areas compared to 16.4 per cent in urban areas and among *others*, 24.5 per cent in rural areas compared to 8.1 in urban areas had no literate female member of age 15 years and above.

[para. 3.2.7.2]

(ii) Literacy rate among persons of age 5 years and above

- About 74.1 per cent of the population of age 5 years and above in the country were literate.

[para. 3.2.9.1]

- Literacy rate was the highest (83.2 per cent) among *others* category, followed by OBC (72.8 per cent), SC (67.4 per cent) and ST (64.8 per cent).

[para. 3.2.9.1]

- Literacy rates for rural India were about 78.1 per cent for *others*, 68.8 per cent for OBC, 64.3 per cent for SC and 62.7 per cent for ST.

[para. 3.2.9.1]

- Literacy rates for urban India were 90.2 per cent among *others*, 83.2 per cent among OBC, 80.6 per cent among ST and 78.5 per cent among SC.

[para. 3.2.9.1]

(iii) Current Attendance Rate in Educational Institutions

➤ **Among persons of age 5-14 years**

- In rural areas, current attendance rate was the highest (92.4 per cent) among *others*, 89.2 per cent among OBC, 88.7 per cent among SC and the lowest, nearly 88 per cent among ST

[para. 3.2.11.1]

- In urban areas, current attendance rate was nearly 94.5 per cent among *others*, 93.6 per cent among OBC, 92.3 per cent among ST and the lowest, nearly 91.8 per cent among SC.

[para. 3.2.11.1]

➤ ***Among persons of age 15-19 years***

- In rural areas, current attendance rate was the highest (67.5 per cent) among *others*, followed by OBC (62.3 per cent), SC (54.6 per cent) and it was the lowest among ST (51.5 per cent).

[para. 3.2.11.1]

- In urban areas, current attendance rate was the highest for *others* category of persons (75.8 per cent), followed by ST (71.3 per cent), OBC (69.5 per cent) and it was the lowest for SC (65.3 per cent).

[para. 3.2.11.1]

➤ ***Among persons of age 20-24 years***

- In rural areas, current attendance rates was the highest among *others* (23.5 per cent), followed by OBC (15.7 per cent), SC (12.6 per cent) and it was the lowest for ST (9.9 per cent).

[para. 3.2.11.1]

- In urban areas, current attendance rate was the highest among *others* (35.5 per cent), followed by ST (28.1 per cent), OBC (26.5 per cent) and it was the lowest for SC (21.6 per cent).

[para. 3.2.11.1]

C. Participation of rural households in MGNREG works

(i) Households with MGNREG job cards and registration of persons in MGNREG job cards

- About 38.4 per cent of the households in rural areas had MGNREG job cards.

[para. 3.2.8.2]

- A higher proportion of households belonging to ST or SC category had MGNREG job cards than OBC or *others* category of households: 57.2 per cent of ST households and 50 per cent of SC households had MGNREG job cards compared to 34.2 per cent of OBC households and 27.1 per cent of *others* category of households.

[para. 3.2.8.2]

- About 23.7 per cent of the rural persons of age 18 years and above were registered in MGNREG job card.

[para. 3.2.8.4]

- Among persons of age 18 years and above, a higher proportion of males compared to females were registered in MGNREG job card: nearly 28.1 per cent of males compared to 19.4 per cent of females were registered in MGNREG job card.

[para. 3.2.8.4]

- The proportion of persons of age 18 years and above registered in MGNREG job cards was the highest, nearly 42.6 per cent for persons belonging to ST households, followed by 30.9 per cent for SC, 21 per cent for OBC and the lowest 14.7 per cent for persons in *others* category of households.

[para. 3.2.8.4]

(ii) Status of getting work in MGNREG work among persons of age 18 years and above registered in MGNREG job cards

- Among rural persons of age 18 years and above registered in MGNREG job cards, 50.5 per cent *got work in MGNREG work*, 18.8 per cent *sought but did not get MGNREG works* and 30.5 per cent *did not seek work in MGNREG work*.

[para. 3.2.8.5]

- Proportion of persons who *got work in MGNREG work* was the highest among SC (55.6 per cent), followed by ST (50.5 per cent), OBC (49.1 per cent) and was the lowest among *others* category (45.5 per cent).

[para. 3.2.8.5]

- The proportion of persons who *sought but did not get work in MGNREG work* was the highest for *others* category of persons (21.9 per cent) and it was the lowest among OBC (16.5 per cent).

[para. 3.2.8.5]

- The proportion of persons who *did not seek work in MGNREG work* was the highest among OBC (nearly 34.2 per cent) and was the lowest among SC (24 per cent), while it was 30.4 per cent among ST and 32.5 per cent among *others* category.

[para. 3.2.8.5]

D. Labour Force according to usual status (ps+ss)

- According to *usual status* (ps+ss), about 40.6 per cent of the population in rural areas and 36.7 per cent of the population in urban areas were in the labour force.

[para. 3.3.2.2]

- At the all-India level, labour force participation rate (LFPR) was the highest among the STs (45.9 per cent), followed by the SCs (40.4 per cent), OBCs (38.9 per cent) and it was the lowest for *others* (37.8 per cent).

[para. 3.3.2.2]

- In rural areas, LFPR was the highest for STs (46.9 per cent), followed by SCs (41.1 per cent), OBCs (39.8 per cent) and it was the lowest for *others* (38.9) per cent.

[para. 3.3.2.2]

- In urban areas, LFPR was the highest for STs (38 per cent), followed by SCs (37.7 per cent), OBCs (36.7 per cent) and it was the lowest among *others* (36.3 per cent).
[para. 3.3.2.2]

E. Work Force according to *usual status* (ps+ss)

- According to *usual status* (ps+ss), about 39.9 per cent of the population in rural areas and 35.5 per cent of the population in urban areas was employed.
[para. 3.3.3.2]
- In rural India, for both males and females, worker population ratio (WPR) was the highest among STs (55.7 per cent among males and 36.4 per cent among females). Among the remaining social groups, WPR for male was 53.9 per cent for SCs, 53.8 per cent for OBCs and 55.2 per cent for *others* while for females it was 26.2 per cent for SCs, 23.9 per cent for OBCs and 20.1 per cent for *others*.
[para. 3.3.3.2]
- For urban males, WPR was higher among *others*, SCs and OBCs than that among STs: it was 54.9 per cent among *others*, 54.5 per cent among SCs, 54.6 per cent among OBCs and 52 per cent among STs.
[para. 3.3.3.2]
- Among females in urban India, WPR was the highest among STs (19.2 per cent), followed by SCs (17.2 per cent), OBCs (15.1 per cent) and it was the lowest among *others* (12.9 per cent).
[para. 3.3.3.2]

F. Unemployment Rate according to *usual status* (ps+ss)

- In rural areas, unemployment rate for males was 2 per cent for SC, 1.7 per cent for OBC, 1.8 per cent for *others* and 1.3 per cent among ST.
[para. 3.3.7.2]
- Among females in rural areas, unemployment rate was 2.4 per cent among *others* category, 1.7 per cent among OBC, 1.4 per cent among SC and 1.1 per cent among ST.
[para. 3.3.7.2]
- In urban areas, unemployment rate among males was the highest for ST and *others* category (nearly 3.4 per cent each), 3.2 per cent among SC and 2.5 per cent among OBC category.
[para. 3.3.7.3]
- Among females in urban areas, unemployment rate was the highest among *others* category (6.3 per cent), it was 4.8 per cent among ST, 4.7 per cent among OBC and 4.5 per cent among SC.
[para. 3.3.7.3]

Table (S12)	Distribution (per 1000) of persons of age 15 years and above by usual activity category taking also into consideration the subsidiary economic status of persons categorised 'not working' in the principal status (ps+ss) for each general educational level and social groups	A-75-A-119

Chapter One

Introduction

1.1 The Report in Perspective

1.1.1 In its 32nd Meeting held on 23-24 April 2010, the National Statistical Commission (NSC) considered the use of the 2009-10 quinquennial survey of NSSO as the base year for both the price indices as well as revision of the national income estimates and felt that 2009-10 being a non-normal year may pose problems. Hence, it was desirable to repeat the survey once again in respect of consumer expenditure as well as employment and unemployment issues. In its 33rd Meeting held on 19-21 May 2010, the NSC decided that the 68th Round of NSS would be devoted to repeating the quinquennial survey on consumer expenditure and employment and unemployment with a provision in the employment schedule to measure employment under Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works.

1.1.2 Pursuant to the above decision of the NSC, the National Sample Survey Office (NSSO), as a part of its 68th round survey programme during the period July 2011 - June 2012, carried out an all-India household survey on the situation of employment and unemployment in India. In this survey, a nation-wide household enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment at the national and State/UT levels. Information on various facets of employment and unemployment in India was collected in NSS 68th round through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Here information on social group was collected as an associated characteristic for studying the employment and unemployment situation among various social groups in the country. Based on the data so collected, estimates pertaining to some key indicators of employment and unemployment of people belonging to different social groups in India, along with certain features associated with them have been presented in this report. In the survey, information in respect of four social groups viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* was collected. The social group to which the head of the household belonged was defined as the social group of that household and all the members of the household, irrespective of their own social group, were assigned the social group of the head of the household. The information recorded in this regard was based entirely on the response of the informant and not based on any State level list of social groups.

1.2 Genesis of NSS Employment and Unemployment Survey

1.2.1 The quinquennial survey on employment and unemployment is one of the important surveys conducted repeatedly by the NSSO. The first such survey was carried out in the 27th round of NSSO during October 1972 - September 1973. The current employment and unemployment survey of NSS 68th round is like a quinquennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned. Including the present

employment and unemployment survey of NSS 68th round (July 2011 - June 2012), nine such surveys on the employment and unemployment situation in India have so far been conducted by NSSO.

1.2.2 Past Quinquennial Surveys: To assess the volume and structure of employment and unemployment, starting with the 9th round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. To give a firm conceptual framework for conducting the employment and unemployment surveys, the Planning Commission, in the year 1968, set up an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee). The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted during 27th round (October 1972 - September 1973) of NSSO. The other quinquennial surveys on employment and unemployment situation in India carried out by NSSO were during 32nd round (July 1977 - June 1978), 38th round (January - December 1983), 43rd round (July 1987 - June 1988), 50th round (July 1993 - June 1994), 55th round (July 1999 - June 2000), 61st round (July 2004 - June 2005) and 66th round (July 2009 - June 2010), in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee.

1.2.3 Other surveys on employment-unemployment: Apart from the quinquennial surveys on employment and unemployment, NSSO has also collected information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). This procedure of collecting data on employment and unemployment in the annual rounds of NSSO continued till NSS 59th round (January - December 2003). In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). In these annual rounds, particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected by applying a similar approach as in the quinquennial rounds. In the quinquennial rounds, current daily activities in terms of status and industry are collected for the household members and current weekly activity is derived from the daily activities of the reference week whereas in the annual rounds, current weekly activity particulars were collected through direct query. In the 60th round (January - June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment were collected in the same manner as that of the quinquennial rounds. A separate schedule on employment and unemployment, similar to the one canvassed in the 60th round, was also canvassed in the 62nd round (July 2005 - June 2006) and 64th round (July 2007- June 2008) of NSSO.

1.3 Scope of 68th Round of NSSO Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. In the employment and unemployment surveys of quinquennial rounds of NSSO, persons are classified into various activity categories in three approaches based on different activities (economic/non-economic) pursued by them during certain specified reference periods. These three approaches are usual status approach, current weekly status approach and current daily status approach. Three reference periods used in surveys of NSSO are (i) one year, (ii) one week and (iii) each day of the reference week. In the usual status approach, the activity status of a person is determined on the basis of the reference period of last 365 days preceding the date of survey. The activity status of a person in current weekly status approach is determined on the basis of the reference period of last 7 days preceding the date of survey and that in current daily status approach is determined on the basis of the reference period of each of the last 7 days preceding the date of the survey. Based on the classification of the individuals into various activity categories in these three approaches, labour force indicators like, labour force participation rate (LFPR), worker population ratio (WPR), unemployment rate (UR) are derived in usual principal status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS). As in the past, during 68th round also, NSSO collected data to measure employment and unemployment indicators in terms of usual principal status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS) through the employment and unemployment schedule (Schedule 10).

1.3.2 The major features of data collected in NSS 66th round and in NSS 68th round were the same. The activity participation of the people is not only dynamic but also multidimensional - it varies over regions, age, education, gender, industry and occupational categories. In order to reveal the multidimensional aspects of the employment and unemployment situation in India, the employment and unemployment schedule (Schedule 10) of NSS 68th round captured a range of information on the following aspects:

- i) *Particulars on household characteristics like household size, household type, religion and social group of the household, land owned, possessed and cultivated by the household, etc;* for the rural households, information was collected on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card. For the households with MGNREG job card, information was also collected on (a) number of MGNREG job cards issued to the household and (b) whether any member has any bank/ post office account. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment and unemployment characteristics with the level of living of the population;

ii) *Demographic particulars of the household members like age, sex, educational level, status of current attendance, status of registration in placement agency, vocational training received, etc.; for rural households with MGNREG job card, for persons of age 18 years and above, whether the person was registered in any MGNREG job card and if registered, whether he/she worked in MGNREG works during last 365 days;*

iii) *Particulars of usual principal activity, usual subsidiary economic activity, current weekly activity and current daily activity for all the members of the sample households; for persons engaged in economic activities, information on detailed activity status, industry of work, occupation, wage and salary earnings of the employees for the work done during the reference week was also collected. For those who were unemployed on all the 7 days of the reference week, information was collected regarding the duration of the present spell of unemployment;*

iv) *Particulars of the enterprise like location of work place, type of enterprises, number of workers in the enterprise etc. for the usual principal status workers and usual subsidiary status workers engaged in industries other than growing of crops, plant propagation and mixed farming;*

v) *Particulars on conditions of employment like type of job contract, eligibility for paid leave, availability of social security benefits and method of payment for the usual principal status employees and usual subsidiary status employees engaged in industries other than growing of crops, plant propagation and mixed farming;*

vi) *Particulars regarding extent of under-utilization of the labour time, nature of employment (permanent/temporary), existence of union/ association in their activity, etc. for persons who were employed either in usual principal status or in usual subsidiary status;*

vii) *Particulars regarding participation in specified activities like (a) maintenance of kitchen garden, (b) work in household poultry/diary, (c) free collection of primary goods, husking of paddy, grinding of food grains, making baskets, sewing, tailoring, weaving for household use, tutoring of own children or others' children free of charge, etc. for persons who were classified as engaged in domestic duties in the usual principal status.*

1.4 Outline of NSS 68th round survey

1.4.1 *Geographical coverage:* The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometers of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year.

1.4.2 *Sub-round*: The fieldwork of the 68th round of NSSO was of one year duration starting on 1st July, 2011 and ending on 30th June, 2012. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1st sub-round period ranging from July to September 2011, the 2nd sub-round period from October to December 2011 and so on. In each of these four sub-rounds, an equal number of sample villages/blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from these FSUs. For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks (2007-12) constituted the sampling frame. Within each district of a State/UT, two basic strata were formed viz. (i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. Sub-stratification was done within stratum of both rural and urban areas. If 'r' was the sample size of FSUs allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population. If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS 2007-12.

1.5.2 At the all-India level, a total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra,

Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/sub-strata in proportion to the population as per census 2001. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4 and equal number of sample FSUs was allocated in each of the four sub-rounds.

1.5.3 For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum/sub-stratum, required number of sample FSUs was selected by Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households. All households listed in the selected village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). The details of formation of SSS are given in Appendix B. A total of 8 households were selected from each sample village/block for canvassing the employment and unemployment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) allotted for the central sample¹ at the all-India level, 12,737 FSUs (7,469 villages and 5,268 urban blocks) could be surveyed for canvassing the employment and unemployment schedule (Schedule 10). The number of households surveyed was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and number of persons surveyed was 4,56,999 (2,80,763 in rural areas and 1,76,236 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this report. Field investigators of NSSO collected data for all members of the sample households by interviewing the informants of the selected households.

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in census. The urban frame used in the survey is the latest updated UFS that takes into account the newly declared towns after the last census 2001. Accordingly the rural sector is the one that is not urban.

1.6 Reports on Employment and Unemployment survey of 68th round of NSSO

1.6.1 The results of the employment and unemployment surveys of NSSO, generated from the central sample data, are released in the form of reports. It was planned to bring out the

¹ The sample selected for NSS 68th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey. The sample surveyed by State Government is termed as "State sample".

results of the employment and unemployment survey of NSS 68th round in seven reports. Based on the data of NSS 68th round, a document entitled '*Key Indicators of Employment and Unemployment in India, 2011-12*' showing the estimates of key labour force indicators for each State/UT and all-India was brought out in June 2013. The estimates of labour force indicators along with various characteristics associated with them were presented in detail in Report Number 554 (*Employment and Unemployment Situation in India*) released in January 2014. The estimates of usual status workforce engaged in the *informal sector* (proprietary or partnership enterprises) and various conditions of their employment were presented in detail in Report Number 557 (*Informal Sector and Condition of Employment in India*) released in July 2014. The third report in the series, viz., Report No. 559 (*Participation of Women in Specified Activities along with Domestic Duties*) presents different features of participation of women who were usually engaged in domestic duties about their engagement in specified activities along with domestic duties; willingness to accept work along with their domestic duties if work is made available to their household premises, type of assistance required to undertake the desired work etc.. The present report is the fourth in the series of seven reports. The tentative titles of the remaining three reports are:

- (i) *Employment and Unemployment situation in Cities and Towns in India,*
- (ii) *Employment and Unemployment situation among Major Religious groups in India,*
- (iii) *Status of Education and Vocational Training in India.*

1.7 Contents of the Report

1.7.1 Based on the data collected in NSS 68th round, estimates pertaining to the employment and unemployment situation among the various social groups in the country, along with certain other features associated with them have been presented in this report.

1.7.2 This report contains three chapters including the present introductory chapter (Chapter One) and five appendices. Chapter Two describes the concepts and definitions of the different terms used in the survey in connection with the items covered in this report. Chapter Three presents the main findings of the survey with respect to the different social groups. The detailed all-India tables forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. The Projected Population as on 1st January 2012 obtained by using the census population as on 01.03.2011 and the rate of growth of population between census 2001 and 2011 have been presented in Appendix C. Appendix D gives a facsimile of the schedule canvassed in the survey. The RSEs of the estimates of worker population ratio (WPR) according to *usual status* (ps+ss) have been presented in Appendix E for the major States.

1.7.3 The estimates presented in this report, in general, refer to the mid-point of the survey period (July 2011 - June 2012) of NSS 68th round, i.e., 01.01.2012. In the NSS reports, the estimates of the employment and unemployment characteristics are generally presented as ratios. To estimate the absolute number of any category corresponding to the NSS 68th round, the survey estimates of ratios may be applied to the Projected Population as on 1st January 2012 as given in Appendix C. It may also be noted that as the tables are generally presented as 'per 1000 distribution' or rates 'per 1000', the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates of the employment and unemployment characteristics have been presented in the report for all the States and UTs. While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States/UTs may not be adequate enough for getting sufficiently reliable estimates for some of the employment and unemployment characteristics.

1.7.4 Appendix A contains the detailed all-India tables of the report. The survey estimates of the aggregates are presented in the margin of the detailed tables and these may be used to combine the estimates of the ratios or to get the ratios with more significant digits. The cell-level figures in the detailed tables, when added up, may not exactly be equal to the figure shown against the 'total' column/row due to rounding off and/or presence of non-response (n.r.) cases. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category appear as zero (0) in the detailed tables. Estimated numbers per 1000 are also shown as zero (0), when they are greater than 0 but less than 0.5. Appendix A of the report is provided in a CD.

Chapter Two

Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 **Household and household size:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, when a person sleeps in one place (say, in a shop or in a room in another house because of space shortage) but usually takes food with his or her family, he or she was treated as a member of the household in which other members of his or her family stayed. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household. The same principle was applicable for the residential staff of such establishments. However, if a group of persons among them pooled their income for spending, they were treated as forming a single household. A family living in a hotel was treated as a single household. The size of a household is the total number of persons in the household.

2.2 **Age (years):** The age in completed years, as on the date of survey, of the household members were recorded.

2.3 **Social group:** For each household surveyed, the social group to which the head of the household belonged to was recorded. The social group of the head of the household was considered as the social group of all the members of the household irrespective of the actual social group to which the individual members belonged. In the survey, information was collected in respect of four social groups viz. *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and the rest referred to as *others*. The information recorded in this regard was based entirely on the response of the informant and not based on any state or central level list of the social group.

2.4 **Land possessed by the household as on date of survey:** The area of land possessed included land ‘owned’, ‘leased in’ and ‘land neither owned nor leased in’ (i.e., encroached) by the household but excluded land 'leased out'. For a piece of land under the possession of

the household, if the household did not have the title of ownership and also did not have lease agreement for the use of land transacted, either orally or in writing, such land was considered as 'neither owned nor leased in'. Information regarding land possessed referred to the amount of land possessed by the household as on the date of survey. The 'area of land possessed' did not include the area of land owned, leased-in, etc. by the servants/paying guests who were considered as normal members of the household, as per the definition of household taken up for the survey.

2.5 Land cultivated (including orchard and plantation) during July 2010-June 2011: Land cultivated (including orchard and plantation) during the agricultural year 2010-2011, i.e., July 2010 to June 2011 was recorded considering cultivation of land from the land 'owned', 'land leased-in' or from 'land neither owned nor leased-in'. Area with field crops and area under orchards and plantations was counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares up to 3 places of decimals.

2.6 General educational level: A person who can both read and write a simple message with understanding in at least one language was considered as literate for the purpose of the survey. For all the individuals who were found to be literate, information on the general level of education was collected in terms of highest level of education successfully completed by him/her. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) *not literate*, (ii) *literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above.* The criterion for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

2.7 Status of current attendance in educational institution: Particulars of current attendance in educational institution were recorded for persons of age below 30 years. It was first ascertained whether the person was currently attending any educational institutions (government or private) or not. For persons who were not currently attending any educational institutions, reason for not attending viz. (i) *school too far, (ii) to supplement household income, (iii) education not considered necessary, (iv) to attend domestic chores, and (v)*

others, was recorded. For those who were currently attending any educational institution, the course of study pursued by them was recorded in terms of 23 categories viz. (i) EGS/NFEC/AEC, (ii) TLC, (iii) pre-primary (Nursery/Kindergarten, etc.), (iv) primary (class I to IV/V), (v) middle, (vi) secondary, (vii) higher secondary, (viii) graduate in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) other subjects; (ix) post graduate and above, (x) diploma or certificate (below graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, (xi) diploma or certificate (graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subject; (xii) diploma or certificate in post graduate and above level. Persons who were registered for any regular correspondence courses or distance education courses for a stipulated period at the end of which, were allowed to appear in the examination for the course, was also considered as 'currently attending'. Persons who were awaiting results were also considered as 'currently attending'.

2.8 Economic activity: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included (i) production of all goods and services for market (i.e. for pay or profit) including those of government services, (ii) production of primary commodities for own consumption and (iii) own account production of fixed assets.

2.8.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition of economic activities adopted for the employment and unemployment survey of NSS 68th round. Although production of any good for own consumption is considered as economic activity by UN System of National Accounts, production of only primary goods for own consumption was considered as economic activity by NSSO for the purpose of the survey. While the UN System of National Accounts considers activities like own account processing of primary products as economic activities, processing of primary products for own consumption was not considered as economic activity in the NSS surveys.

2.8.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 68th round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
 - (a) all the activities relating to the agriculture, forestry, fishing, mining and quarrying sector (i.e. industry Divisions 01 to 09 of NIC-2008) which result in

production of primary goods for own consumption (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.)

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities.

2.9 Activity status: It is the activity situation in which a person was found participated in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in labour force'. Within the labour force, broad activity statuses (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

2.9.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person during the reference period. In such an eventuality, unique identification under any one of the three broad activity statuses (viz. employed/unemployed/not in labour force) was done by adopting either *the major time criterion* or *priority criterion*. The former was used for classification of persons according to the usual status approach and the latter for classification of persons according to the current status approach (i.e., current weekly status and current daily status approaches).

Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code was connected to that

activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

2.9.2 This report discusses various employment and unemployment indicators according to usual status approach and as such the discussions of the concepts relevant for usual status approach have only been made. The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in usual status approach are given below:

<u>code</u>	<u>description</u>
working (or employed)	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual wage labour in public works
51	worked as casual wage labour in other types of works
not working but seeking/available for work (or unemployed)	
81	sought work or did not seek but was available for work
neither working nor available for work (or not in labour force)	
91	attended educational institutions
92	attended to domestic duties only
93	attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94	rentiers, pensioners, remittance recipients, etc.
95	not able to work owing to disability
97	others (including beggars, prostitutes, etc.)
99	children of age 0-4 years

It may be noted that for persons of age 0-4 years, a separate activity status code, viz., 99 was assigned.

2.10 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. In the usual status, relevant activity status codes 11 to 51 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21), *regular salaried/wage employee* (relevant activity status codes: 31), and *casual wage labour* (relevant activity status codes: 41 and 51).

2.11 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). In the usual status, activity status code 81 was assigned for unemployed persons.

2.12 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. In the usual status, persons with activity status codes 11 – 81 constituted the labour force.

2.13 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc., and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.14 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise.

2.14.1 Categories of self-employed persons: Self-employed persons were categorised as follows:

- (i) **own-account workers:** Self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour was considered as own-account workers. They could, however, have had unpaid helpers to assist them in the activity of the enterprise.
- (ii) **employers:** Self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour were considered as employers.
- (iii) **helpers in household enterprise:** Self-employed persons who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed were considered as helpers in household enterprise. They did not run the household enterprise on their own but assisted the concerned person living in the same household in running the household enterprise.

2.15 **Regular wage/salaried employee:** These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e., not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.16 **Casual wage labourer:** A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

2.17 **Public works:** 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programmes such as Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' is restricted to those schemes under poverty alleviation programmes, or relief measures through which the Government generated wage employment. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, digging of irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. There may be some schemes sponsored by the Government and in operation, which were conceived as self-employment generation schemes. Some such schemes of the Government were Swarnjayanti Gram

Swarozgar Yojana (schemes under erstwhile IRDP merged with this), Rural Employment Generation Programme (REGP), Prime Minister's Rozgar Yojana (PMRY), Valmiki Ambedkar Awas Yojana (VAMBAY), etc. Employment generated through these schemes was not considered within the purview of 'public works'. Classification of individuals as 'casual labour in *public works*' required that the work in which they participated was '*public works*' as defined above. To distinguish between '*public works*' and works not classifiable as '*public works*', some broad characteristics of '*public works*' were identified, viz. the primary objective was generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives.

2.18 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA): The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) are formed by the State Governments. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

2.19 Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories in three approaches on the basis of activities (economic/non-economic) pursued by them during certain specified reference periods. The three approaches are usual status approach, current weekly status approach and the current daily status approach. Three reference periods used in NSS surveys are (i) one year, (ii) one week and (iii) each day of the reference week. In the usual status approach, the activity status of a person is determined on the basis of the reference period of one year. The activity status of a person in current weekly status approach is determined on the basis of the reference period of one week and that in current daily status approach is determined on the basis of the reference period of one day. In this report, the various indicators of employment and unemployment have been presented in the usual status approach. The procedure adopted to arrive at the usual status are given below.

2.19.1 Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey was considered as the *usual principal activity status* of the

person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 and 99 to those 'not in the labour force'. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

2.19.2 Usual subsidiary economic activity status: A person whose usual principal activity status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference period of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the following two situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively short period (but not simultaneously), which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively short period was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

If a person was categorised as worker according to usual principal status, then the subsidiary economic activity of the person was different from the principal activity either in terms of detailed work activity status or in terms of industry of work at the 2-digit level of NIC-2008.

2.19.3 Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the activity status of the person according to usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during the 365 days preceding the date of survey.

2.20 Household type: The household type was decided based on the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belonged to any one of the following six household types:

1. self-employed in agriculture
2. self-employed in non-agriculture
3. regular wage/salary earning
4. casual labour in agriculture
5. casual labour in non-agriculture
6. others

For **urban** areas, the household types are:

1. self-employed
2. regular wage/salary earning
3. casual labour
4. others

2.21 Industry and occupation of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 97 (Activities of households as employers of domestic personnel) of NIC-2008, eight additional codes were used in the survey viz., housemaid /servant (97001), cook (97002), gardener (97003), gatekeeper/chowkidar/watchman (97004), governess/baby-sitter (97005), tutor (97006), driver (97007) and 'others' (97009).

2.22 Procedure for collecting monthly per capita consumer expenditure (MPCE):

Household consumer expenditure was measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It also included the imputed values of goods and services, which were not purchased but procured otherwise for consumption. In other words, it was the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. The imputed rent of owner-occupied houses was excluded from consumption expenditure. Any expenditure incurred towards the productive enterprises of the households was also excluded from the household consumer expenditure. Monthly per capita consumer expenditure (MPCE) was the household consumer expenditure over a period of 30 days divided by household size. For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 68th round. The approximate value of consumer expenditure obtained through the worksheet was used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz. 30 days and 365 days, was used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) food (other than 'cooked meals'), pan, tobacco & intoxicants and fuel & light, (ii) cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess, (iii) clothing and footwear and (iv) durable goods. The procedures followed for defining consumption of the four groups were (i) consumption approach, (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure).

2.23 Conceptual Framework of Key Employment and Unemployment Indicators

2.23.1 Labour force participation rate (LFPR): LFPR is defined as the number of persons in the labour force per 1000 persons.

2.23.2 Worker Population Ratio (WPR): WPR defined as the number of persons employed per 1000 persons.

2.23.3 Proportion Unemployed (PU): It is defined as the number of persons unemployed per 1000 persons.

2.23.4 Unemployment Rate (UR): UR is defined as the number of persons unemployed per 1000 persons in the labour force (which includes both the employed and unemployed).

2.23.5 Key employment-unemployment indicators are derived as follows:

activity profile		key indicators
usual activity status (code)	category of persons	
11, 12, 21, 31, 41, 51	workers	1. Labour Force Participation Rate (LFPR): $\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000$
81	unemployed	
91, 92 93, 94, 95, 97,99	not in labour force	2. Worker Population Ratio (WPR): $\frac{\text{no. of employed persons}}{\text{total population}} * 1000$
		3. Proportion Unemployed (PU): $\frac{\text{no. of unemployed persons}}{\text{total population}} * 1000$
		4. Unemployment Rate (UR): $\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000$

Chapter Three

Summary of Findings

3.1 Introduction

3.1.1 *General*: This report primarily deals with the employment and unemployment situation during 2011-12 among persons belonging to the four social groups, viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and the rest referred to as *others*. However, before studying their employment and unemployment situation, some broad indicators pertaining to household and population characteristics of the different social groups are discussed first in Section 1 and Section 2. These are (i) distribution of household/population in different social groups, (ii) distribution of households by *household type* (i.e., nature or type of work from which the household derived major income during the 365 days preceding the date of survey), (iii) distribution of households of different social groups by land possessed or land cultivated, (iv) literacy, etc., and (v) some indicators related to participation of rural households in MGNREG works. The indicators of employment and unemployment for different social groups are discussed in Section 3 of this Chapter.

3.1.2 *Reference period of the estimates*: The estimates presented in the report, in general, refer to the midpoint of the survey period (July 2011 - June 2012) of NSS 68th round, i.e., 01.01.2012. The estimates for 'land cultivated' have the reference period of the agricultural year 2010-11, i.e., July 2010 –June 2011.

3.1.3 It may be mentioned that discussions are mainly centered on the all-India estimates. A comparison with the results of 61st round (July 2004 – June 2005) and 66th round (July 2009 – June 2010) is also made in some cases at the all-India level. While summary results at the all-India level are presented along with the write-up, the corresponding results at the State/UT level are given at the end of the write-up of this Chapter.

3.1.4 It may be noted that the scope of the survey being all households without special focus on social groups, sample design was not tailored to netting in special social groups like *Scheduled Caste (SC)* and *Scheduled Tribe (ST)* households, etc. Since ST households are concentrated in a few states and SC households are geographically dispersed, the reliability of state level results is critically dependent on the state level sample size of households of the different social groups which happened to be netted in a general-purpose representative sample of households. It may be noted that the number of sample households for a particular social group in a State/UT may not be adequate enough in providing sufficiently reliable estimates of the various indicators and therefore, the estimates for the different social groups for the State/UT are to be used after taking due account of the sample number of households for different social groups of the State/UT. This caution is sounded upfront for the interpretation of state level results for social groups.

3.2 Households and Population

3.2.1 Number of Households and Persons Surveyed and Estimated in Different Social Groups

3.2.1.1 To study employment and unemployment situation of persons in different social groups, it is important to have an idea of the sample sizes based on which the survey results/estimates have been developed. Table S3.0 presents the number of households

surveyed/persons surveyed in NSS 68th round (July 2011 - June 2012) by social groups for each State/UT and at the all-India level with rural-urban break-up. The Table shows that there are a good number of States/UTs where the number of surveyed households/persons for some social groups is rather low.

3.2.1.2 The survey was spread over 12,737 FSUs (7,469 villages and 5,268 urban blocks). The total number of households surveyed at the all-India level was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and total number of persons enumerated was 4,56,999 persons (2,80,763 in rural areas and 1,76,236 in urban areas). The number of sample households¹ for the social groups *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* were 9833, 10147, 23604, 16114 respectively, in rural areas and 3573, 5505, 16117, 16829 respectively, in urban areas at the all-India level. The number of sample persons for the social groups viz., *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* in rural areas were 46028, 46339, 112374, 76014, respectively, while in urban areas the corresponding sample persons were 15633, 23534, 68201, 68868, respectively at the all-India level.

3.2.1.3 Statement 3.1 gives the estimates of number of households and number of persons as obtained from NSS 68th round for different social groups. As per the survey estimates, about 1088 million people stayed in 250 million households in India. Statement 3.1 shows that about 68.8 per cent of the households belonged to rural India and accounted for nearly 71.2 per cent of total population. For different social groups, the corresponding proportions were as follows: among ST, 87.5 per cent households and 88.8 per cent persons belonged to rural areas, among SC, 76.9 per cent households and 78.0 per cent persons belonged to rural areas, among OBC, 70.4 per cent households and 72.9 per cent persons belonged to rural areas and among others, 55.5 per cent households and 58.6 per cent persons belonged to rural areas.

Statement 3.1: Estimated number of households and number of persons for different social groups during 2011-12

all-India estimates	ST	SC	OBC	others	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)
rural					
number of households (00)	192669	360409	760274	407998	1721354
number of persons (00)	839129	1601020	3491018	1813119	7744301

rural+ urban					
number of households (00)	220192	468738	1079984	734791	2503709
number of persons (00)	945354	2051292	4791071	3094825	10882557

3.2.2 Distribution of Households

3.2.2.1 *Distribution of households by social group*: Statement 3.2 gives per 1000 distribution of households by social group separately for rural and urban areas during 61st (July 2004-June 2005), 66th (July 2009-June 2010) and 68th (July 2011-June 2012) rounds. Corresponding distribution for each State/UT is given in Table S3.2. Statement 3.2 shows that during 2011-

¹ In rural areas, for 2 sample households, (having a total of 8 persons) household social group was not reported. Hence, number of sample households in rural areas belonging to *scheduled tribe* (ST), *scheduled caste* (SC), *other backward class* (OBC) and *others* does not add up to total number of sample households in rural areas at the all-India level.

12, nearly 8.8 per cent of the households in the country belonged to *scheduled tribe* (ST), about 18.7 per cent belonged to *scheduled caste* (SC)² and about 43.1 per cent of the households belonged to the *other backward class* (OBC). The corresponding proportions of households, in rural areas were 11.2 per cent, 20.9 per cent and 44.2 per cent, respectively, and in urban areas, the corresponding proportions were 3.5 per cent, 13.8 per cent and 40.9 per cent, respectively. It shows that the proportion of households belonging to ST, SC and OBC were higher in rural areas than in urban areas, while the proportion of households belonging to *others* category was higher in urban areas (41.8 per cent) than in rural areas (23.7 per cent).

Statement 3.2: Per 1000 distribution of households among different social groups in NSS 61st (July 2004 - June 2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds

Source: 1. For 61st round: NSS Report no. 516 (*Employment and unemployment situation among social groups in India, 2004-05*)
2. For 66th round: NSS Report no. 543 (*Employment and unemployment situation among social groups in India*)

3.2.2.2 Changes over time: It is seen from Statement 3.2 that at the all-India level, the proportion of households belonging to ST remained at the same level during the period 2004-05 to 2011-12 (8.6 per cent in 2004-05, 8.5 per cent in 2009-10 and 8.8 per cent in 2011-12) while that of SC decreased by nearly 1 percentage point during this period (19.7 per cent in 2004-05, 19.8 per cent in 2009-10 and 18.7 per cent in 2011-12). The proportion of households belonging to OBC category increased by nearly 3 percentage points during 2004-05 to 2011-12 (from 40.2 per cent in 2004-05 to 43.1 per cent in 2011-12) and the corresponding proportion for the residual category *others* decreased by 2 percentage points during this period (from 31.4 per cent in 2004-05 to 29.3 per cent in 2011-12). This growth in the share of OBC households is observed for both rural and urban areas but the growth was more in urban areas than in rural areas: in rural areas the proportion of OBC households increased from 42 per cent in 2004-05 to 44.2 per cent in 2011-12 while in urban areas, it increased from 35.5 per cent to 40.9 per cent during this period.

3.2.3 Distribution of Population and Household Size

3.2.3.1 Distribution of persons by social group: Statement 3.3 presents at the all-India level, distribution of persons by social groups during 61st (July 2004 - June 2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds separately for males and females in rural and urban areas. Corresponding results for each State/UT is given in Table S3.3.

² NSS estimates of proportion of ST or SC households/population are not strictly comparable with the corresponding figures available from Population Census due to the differences in definitions adopted. The NSSO classifies a household (and accordingly all persons within a household) as ST or SC if the informant reports the head of the household to be so. On the other hand, in the Population Census, a person enumerated is classified as belonging to ST or SC if he or she is covered in the list of STs/SCs furnished to the enumerator with respect to his/her state/union territory. The divergence of the NSS estimates of ST/SC households or population from the Census figures may also partially be due to the limitation of sample size which the NSS estimates are subjected to.

Statement 3.3: Per 1000 distribution of persons among different social groups in NSS 61st (July 2004 - June 2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds

Source: 1. For 61st round: NSS Report no. 516 (*Employment and unemployment situation among social groups in India, 2004-05*)
2. For 66th round: NSS Report no. 543 (*Employment and unemployment situation among social groups in India*)

3.2.3.2 It is seen from the Statement that during 2011-12, proportions of persons belonging to the categories ST, SC and OBC were about 8.7 per cent, 18.8 per cent and 44 per cent, respectively, at the all-India level. The corresponding proportions were 10.8 per cent, 20.7 per cent and 45.1 per cent, respectively in rural areas and about 3.4 per cent, 14.3 per cent and 41.4 per cent, respectively in urban areas. It is seen that a higher proportion of persons belonging to ST, SC or OBC categories lived in rural areas than in urban areas. Over the period from 2004-05 to 2011-12, the proportion of persons belonging to ST or SC among total persons did not show much variation but the share of persons belonging to OBC showed an increasing trend in both rural and urban areas: in rural areas the share of ST in total population changed from 10.2 per cent in 2004-05 to 10.8 per cent in 2011-12, that of SC changed from 21.3 per cent to 20.7 per cent while that of OBC changed from 42.9 per cent to 45.1 per cent and in urban areas the share of ST changed from 3 per cent to 3.4 per cent, that of SC changed from 15 per cent to 14.3 per cent while that of OBC changed from 36 per cent to 41.4 per cent.

SC	4.4	4.2	4.4	953	946	951
OBC	4.6	4.1	4.4	965	928	955
others	4.4	3.9	4.2	942	910	929
all (incl. n.r.)	4.5	4.0	4.3	957	922	946

and sex ratio is given in Statement 3.4 separately for each social group at the all-India level. It may be noted that the household sizes did not vary much among the social groups in rural areas: it was 4.6 among OBC and for each of the remaining social groups it was 4.4. In urban areas, the household size was the lowest and

equal among the ST and *others* (3.9 each) and the highest among the SC (4.2). In rural areas, sex ratio was the highest for OBC (965 females per 1000 males) and the lowest for *others* (942 females per 1000 males) while in urban areas the sex ratio was the highest for SC (946 females per 1000 males) while it was the lowest for ST (884 females per 1000 males).

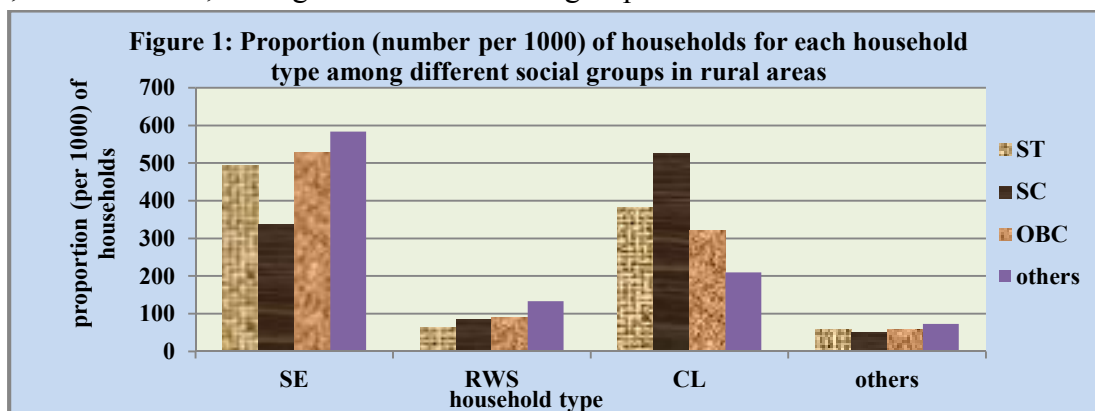

3.2.4 Distribution of Households by Household Type

3.2.4.1 In this survey, each surveyed household was categorised into an appropriate 'household type' on the basis of the source of major income by its members during the 365 days preceding the date of the survey. Six such household types were distinguished in rural areas and four in urban areas (see Para 2.20 of Chapter Two). The distribution of households of each social group by household type has been presented in Statement 3.5 and Statement 3.6 for rural and urban areas separately. The corresponding results for each State/UT are given in Table S3.5 and Table S3.6 for rural and urban areas, respectively.

Statement 3.5: Per 1000 distribution of households of different social groups by household type

all-India household social group	self employed in (SE)			regular wage/ salary earning (RWS)	casual labour in			others	rural all (incl. n.r.)
	agri- culture	non agri culture	sub total		agri- culture	non agri culture	sub total		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
ST	414	81	495	63	245	139	383	59	1000
SC	195	142	337	85	314	213	526	51	1000
OBC	366	163	529	90	196	126	321	59	1000
others	398	186	584	133	128	83	210	73	1000
all (incl. n.r.)	343	155	498	96	210	135	345	61	1000

3.2.4.2 *In rural areas:* Statement 3.5 shows that, proportion of households with *self-employment* (SE) as the major source of income was the highest among the households in residual social group categorized as *others* (58.4 per cent) followed by OBC (52.9 per cent), ST (49.5 per cent) and SC (33.7 per cent). On the other hand, proportion of households with *casual labour* (CL) as the major source of income was much higher among SC (52.6 per cent) and ST (about 38.3 per cent) than among OBC (32.1 per cent) and *others* (21 per cent). The proportion of households with *regular wage/salary* earning as the major source of income was the highest among *others* category (13.3 per cent) followed by OBC (9 per cent), SC (8.5 per cent) and ST (6.3 per cent). Figure 1 presents the proportion of households for each household type, for rural areas, among the different social groups in India.

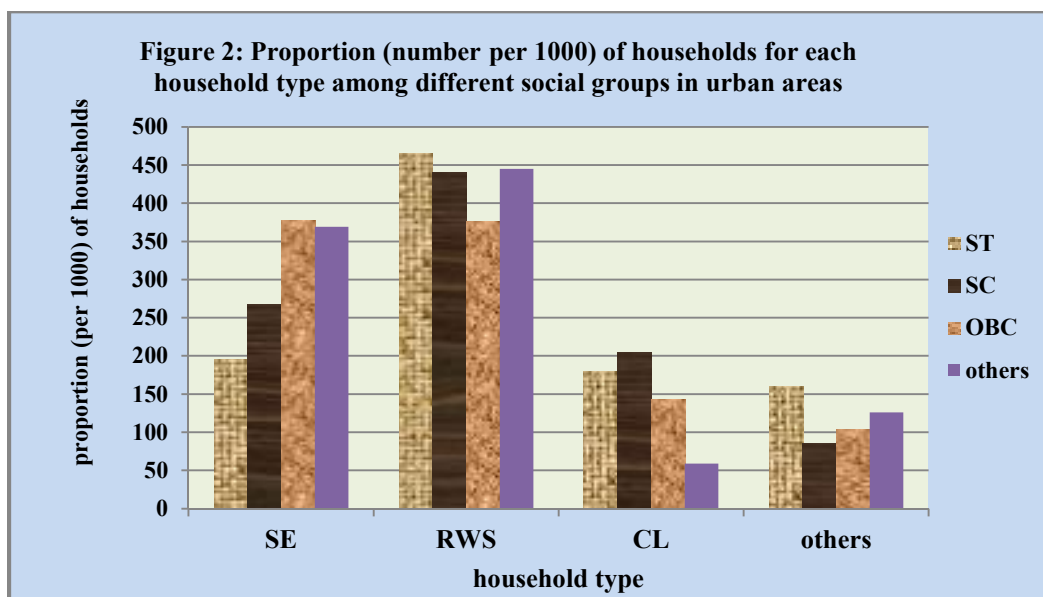

3.2.4.3 *In urban areas*: From Statement 3.6, it is seen that in urban area like in rural area, proportion of households with household type *self-employed* (SE) was higher among OBC (37.8 per cent) and *others* category (36.9 per cent) than among SC (26.8 per cent) or ST (19.5 per cent). Proportion of households with income from *regular wage / salaried* (RWS) employment as

Statement 3.6: Per thousand distribution of households of different social groups by household type

social group	urban				
	household type				
	self employed (SE)	regular wage/ salaried (RWS)	casual labour (CL)	others	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)
ST	195	465	180	160	1000
SC	268	440	205	86	1000
OBC	378	376	143	104	1000
others	369	445	59	126	1000
all (incl. n.r.)	353	417	118	112	1000

major source of income was the highest for ST (46.5 per cent) followed by *others* (44.5 per cent), SC (44 per cent) and OBC (37.6 per cent). Proportion of urban households with income from *casual labour* (CL) as major source of

income was higher among SC and ST (20.5 per cent and 18 per cent, respectively) households than among OBC households (14.3 per cent) or *others* households (5.9 per cent). Figure 2 presents, the proportion of households for each household type, for urban areas, among the different social groups in India.

3.2.5 Distribution of Households by Size Class of Land Possessed

3.2.5.1 The distribution of households in rural India by size class of land possessed for each social group, as obtained from the survey, is presented in Statement 3.7. The corresponding distribution for each State/UT is given in Table S3.7.

3.2.5.2 *Land possessed by different social groups*: Statement 3.7 shows that during 2011-12, in rural India, among the social groups, proportion of households possessing land less than

0.001 hectares (including the households who had reported no information on land), was the highest for ST households (nearly 4.9 per cent). The corresponding proportion for SC was

Statement 3.7: Per 1000 distribution of households of different social groups by size class of land possessed

all-India size class of land possessed (hectares)	rural				all (incl. n.r.) (6)
	ST (2)	SC (3)	OBC (4)	others (5)	
(1)					
less than 0.001	49	35	27	37	34
0.001-0.004	122	149	108	87	113
0.005-0.40	357	596	479	467	487
0.41-1.00	210	128	171	163	165
1.01-2.00	162	62	117	114	110
2.01-4.00	82	22	67	87	64
4.01 & above	18	8	32	43	28
all	1000	1000	1000	1000	1000

Note:

(i) The households with size class of land possessed 'less than 0.001' hectares comprise households which (a) possessed some land less than 0.001 hectares, (b) did not possess any land and (c) reported no information on land possessed.

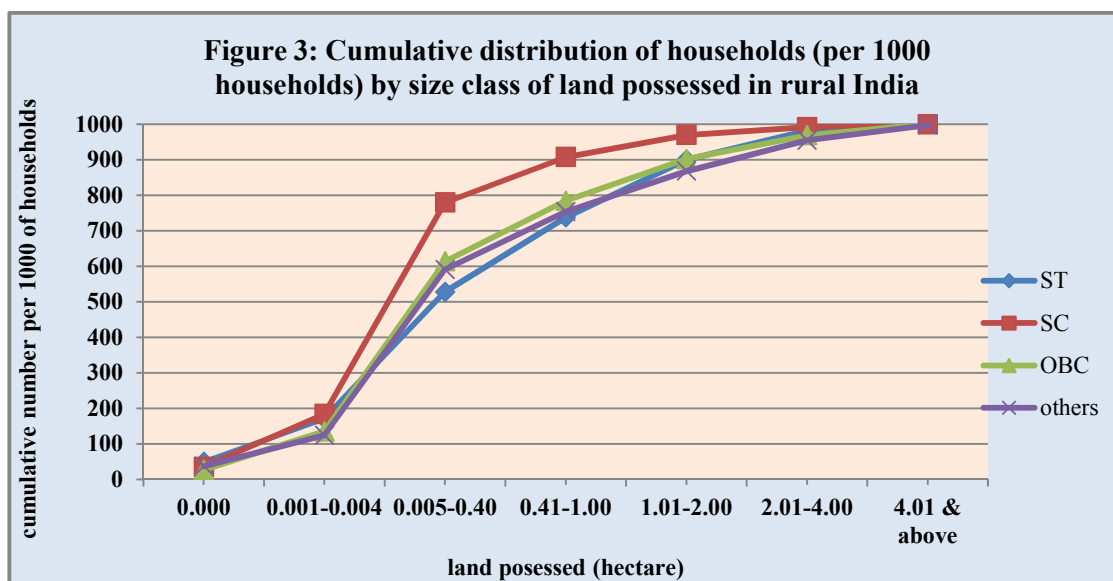

ii) The size class of land possessed '0.005 - 0.40 hectares' included households with land possessed 0.005 - 0.404 hectares; the size class '0.41 - 1.00 hectares' included households with land possessed 0.405 - 1.004 hectares and similarly the other classes.

about 3.5 per cent, for OBC 2.7 per cent and for *others* category of households it was around

3.7 per cent. It is also seen that the proportion of households possessing land of size 4.01 hectares or more was the highest for *others* category of households (4.3 per cent), followed by OBC (3.2 per cent), ST (about 1.8 per cent) and SC (0.8 per cent) households.

Figure 3 presents the

cumulative distribution of households (per 1000 households) by size class of land possessed in rural India.

3.2.6 Distribution of Households by Size Class of Land Cultivated

3.2.6.1 *Land cultivated by different social groups:* Information on land cultivated by the households during the agricultural year (AY) 2010-11, i.e., July 2010 to June 2011 was also collected through employment and unemployment Schedule of 68th round of NSSO. The distribution of rural households in India by size class of land cultivated is given in Statement 3.8. The corresponding distribution for each State/UT is given in Table S3.8. It is seen that

during the agricultural year 2010-11, about 47.4 per cent of the rural households cultivated land less than 0.001 hectare (including those households which reported no information on

Statement 3.8: Per 1000 distribution of households of different social groups by size class of land cultivated

4.01 & above	17	6	27	38	24
all	1000	1000	1000	1000	1000

Note:

(i) The households with size class of land cultivated 'less than 0.001' hectares comprise households which (a) cultivated some land less than 0.001 hectares, (b) did not cultivate any land and (c) reported no information on land cultivated.

(ii) The size class of land cultivated '0.005 - 0.40 hectares' included households with land cultivated 0.005 - 0.404 hectares; the size class '0.41 - 1.00 hectares' included households with land cultivated 0.405 - 1.004 hectares and similarly the other classes.

households operating land of size 4.01 hectares and above were 1.7 per cent and 0.6 per cent, respectively.

land cultivated). The corresponding proportions for ST, SC, OBC and *others* category were 38.6 per cent, 61.2 per cent, 44.8 per cent and 44.3 per cent, respectively. The proportion of households cultivating land of size 4.01 hectares and above was the highest among *others* category of households (about 3.8 per cent), followed by OBCs (about 2.7 per cent). For the ST and SC households, the proportions of

3.2.7 Proportion of Households with no Literate Member / no Literate Female Member of age 15 years and above

3.2.7.1 Statement 3.9 gives the proportions of households having no literate member of age 15 years and above or no literate female member age 15 years and above for different social groups at the all-India level, separately for rural and urban areas during 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds. In the survey, a person was considered as literate if he/she could both read and write a simple message with understanding in at least one language.

3.2.7.2 The Statement shows that about 18.2 per cent of the households in rural areas and 5.9 per cent in urban areas had no literate member of age 15 years and above. Proportion of households without any literate member of age 15 years and above was much higher among households belonging to STs and SCs as compared to OBC or *others* category households in both rural and urban areas. In rural areas, 26.6 per cent of the households belonging to ST and 23 per cent of the households belonging to SC had no literate member of age 15 years and above compared to 17.9 per cent of the households belonging to OBC and 10.6 per cent of households belonging to *others* category. In urban areas, 8.9 per cent of ST households, 9.7 per cent of SC households, 7.0 per cent of OBC households and 3.3 per cent of *others* category of households had no literate member of age 15 years and above. In comparison to the proportion of households without any literate member of age 15 years and above, in both rural and urban areas, the proportion of households without any literate female member of age 15 years and above was much higher among all the social groups. The proportion of households without any literate female member of age 15 years and above was much higher among ST and SC households compared to OBC or *others* category of households: in rural

areas nearly 46.6 per cent of ST households and 47.3 per cent of SC households compared to 39.3 per cent of OBC households and 24.5 per cent of *others* category of households had no literate female members of age 15 years and above while in urban areas, 21.3 per cent of ST households, 23.7 per cent of SC households, 16.4 per cent of OBC households and 8.1 per cent of *others* category of households had no literate female member of age 15 years and above. Table S3.9 gives the proportions of households having no literate member of age 15 years and above and no literate female member of age 15 years and above for different social groups for each State/UT. Normally, the proportion of households with no literate member of age 15 years and above should be lower. However, households with no female member of age 15 years and above but having male members of age 15 years and above all of whom are illiterate are counted for finding the proportion of households with no literate member of age 15 years and above but omitted for finding the proportion of households with no literate female member of age 15 years and above. For this in some places with small sample size the relationship has been reversed. Figure 4 presents, the proportion of households (per 1000) with no literate member of age 15 years and above / no literate female member of age 15 years and above in the household by social group.

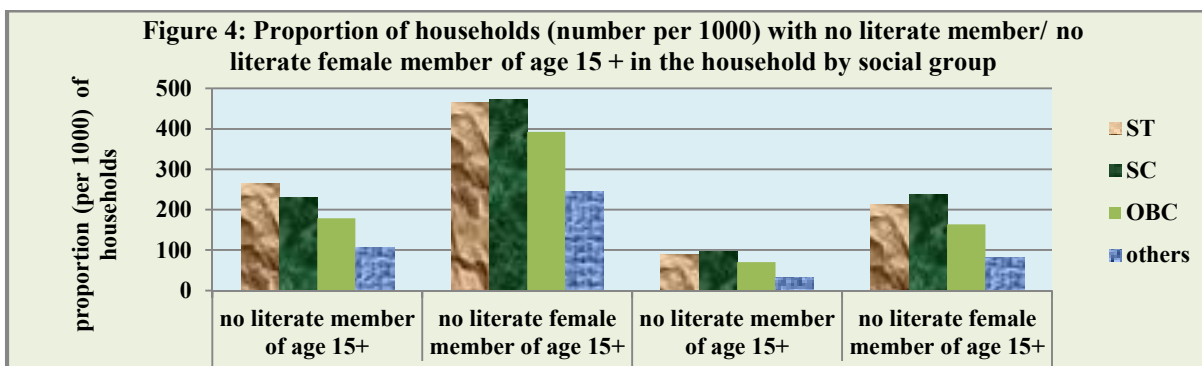

Statement 3.9: Proportion (per 1000) of households with no literate member/ female member of age 15 years and above during NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds

Source: 1. For 61st round: NSS Report no. 516 (*Employment and unemployment situation among social groups in India, 2004-05*)
2. For 66th round: NSS Report no. 543 (*Employment and unemployment situation among social groups in India*)

3.2.7.3 Changes over time: Over the period 2004-05 to 2011-12, the proportions of households without any literate member age 15 years and above, have decreased across all the household social groups in both rural and urban areas and the decrease was more for ST and SC households compared to OBC or *others* category of households. During 2011-12, in rural areas, for ST households, the proportion of households without any literate member age 15 years and above has decreased by nearly 11.5 percentage points from 38.1 per cent in 2004-05, for SC households the decrease was 9.7 percentage points from 32.7 per cent in 2004-05, for OBC households the decrease was 7.8 percentage points from 25.7 per cent in 2004-05

and for *others* category of households the decrease was 5.3 percentage points from 15.9 per cent in 2004-05. In urban areas, during 2011-12, for ST households, the proportion of households without any literate member age 15 years and above, decreased by 5.4 percentage points from 14.3 per cent in 2004-05, for SC households the decrease was 5.1 percentage points from 14.8 per cent in 2004-05, for OBC households the decrease was 3.3 percentage points from 10.3 per cent in 2004-05 and for *others* category of households, the decrease was 1.3 percentage points from 4.6 per cent in 2004-05. Similar decreasing pattern was also observed in the proportion of households without any female member age 15 years and above across all the household social groups in both rural and urban areas.

3.2.8 Participation of rural households in MGNREG works

3.2.8.1 In the employment and unemployment survey of NSS 68th round, a few questions were put to the rural households for collection of information related to MGNREG works. These were ‘whether the household had MGNREG job card’ and if the household had MGNREG job card, ‘number of MGNREG job cards issued to the households’ and ‘whether any member of the household had any bank/post office account’. In the present survey, the household having MGNREG job card connoted that at least one member of the household appeared in such a job card. In addition to these, for persons of age 18 years and above of the rural households having MGNREG job cards, information was collected on *whether the person was registered in any MGNREG job card* and if registered, *whether worked in MGNREG works during last 365 days* in terms of the three types of responses viz. ‘worked’, ‘sought but did not get work’ and ‘did not seek work’. A person was considered to have worked in MGNREG works during last 365 days if he/she had worked for at least for one day in MGNREG works during last 365 days.

3.2.8.2 Statement 3.10 presents for each household social group the results of 68th round survey on (i) number of households having MGNREG job card per 1000 of rural households, (ii) number of job cards issued per 1000 households reported having MGNREG job card and (iii) number of households having bank/post office accounts per 1000 households reported having MGNREG job card and the corresponding results for each State/UT are given in Table S3.10. Statement 3.10 shows that 38.4 per cent of the households in rural areas had MGNREG job cards and a higher proportion of households belonging to ST or SC category had MGNREG job cards than OBC or *others* category of households: 57.2 per cent of ST households and 50 per cent of SC households had MGNREG job cards compared to 34.2 per cent of OBC households and 27.1 per cent of *others* category of households. It is observed that number of job cards issued per 1000 of job card holder households of rural India was the highest among OBC households: nearly 1224 job cards were issued per 1000 OBC households with MGNREG job cards while number of job cards issued per 1000 households with MGNREG job cards were 1185 for ST, 1177 for SC and 1174 for *others* category of

households. The number of households having bank/Post Office account per 1000 households with MGNREG job card was nearly 880 among ST households, 877 among *others* category, 855 among SC households and 850 among OBC households.

Statement 3.10: Number of households having MGNREG job card per 1000 households, number of job cards per 1000 households having MGNREG job card and number of households having bank/ post office account per 1000 households having MGNREG job card for each household social group

all (incl. n.r.)	237	505	188	305	1000	

3.2.8.4 Number of persons of age 18 years and above registered in MGNREG job card per 1000 persons of age 18 years and above: Statement 3.11 shows that in rural areas about 23.7

per cent of persons of age 18 years and above were registered in MGNREG job card and a higher proportion of males compared to females were registered in MGNREG job card: nearly 28.1 per cent of males compared to 19.4 per cent of females were registered in MGNREG job card. The proportion of persons of age 18 years and above registered in MGNREG job cards varied across social groups: it was the highest, nearly 42.6 per cent for persons belonging to ST households, followed by 30.9 per cent for SC, 21 per cent for OBC and the lowest 14.7 per cent for persons in *others* category of households. It is seen that a higher proportion of males of age 18 years and above were registered in MGNREG job cards compared to females across all the social groups: it was 48.3 per cent for males compared to 37.1 per cent for females among ST, 36.6 per cent for males compared to 25.2 per cent for females for SC, 24.2 per cent for males compared to 17.9 per cent for females for OBC and 19.8 per cent for males compared to 9.5 per cent for females for *others* category.

3.2.8.5 Per 1000 distribution of persons of age 18 years and above registered in MGNREG job card by status of getting work in MGNREG work: It is seen from Statement 3.11 that in rural areas, among persons of age 18 years and above registered in MGNREG job cards, 50.5 per cent *got work in MGNREG work*, 18.8 per cent *sought but did not get MGNREG work* and 30.5 per cent *did not seek work in MGNREG work*. Proportion of persons of age 18 years and above registered in MGNREG work *who got work in MGNREG work* was the highest among SC (55.6 per cent), followed by ST (50.5 per cent), OBC (49.1 per cent) and was the lowest among *others* category (45.5 per cent). Among persons of age 18 years and above registered in MGNREG job card, the proportion of persons *who sought but did not get work in MGNREG work* was the highest for *others* (21.9 per cent) and it was the lowest among OBC (16.5 per cent) while it was 19 per cent among ST and 20.4 per cent among SC. The proportion of persons *who did not seek work in MGNREG work* was the highest among OBC (nearly 34.2 per cent) and was the lowest among SC (24 per cent), while it was 30.4 per cent among ST and 32.5 per cent among *others* category. Male-female variations existed among different social groups in the proportion of persons *who got work in MGNREG work*: among ST, a higher proportion of males (51.8 per cent) compared to females (48.9 per cent), among SC, a higher proportion of females (56.3 per cent) compared to males (55.1 per cent), among OBC, a higher proportion of females (51.6 per cent) compared to males (47.3 per cent) and among *others* category a higher proportion of males (49.3 per cent) compared to females (37.4 per cent) *got work in MGNREG work*. However, the proportion of persons of age 18 years and above registered in MGNREG job card *who sought work but did not get MGNREG work* was higher among males than females across all the social groups and the proportion of persons of age 18 years and above registered in MGNREG job cards *who did not seek MGNREG work* was lower for males than females across all the social groups except for OBC where the proportions were equal for males and females (nearly 34 per cent).

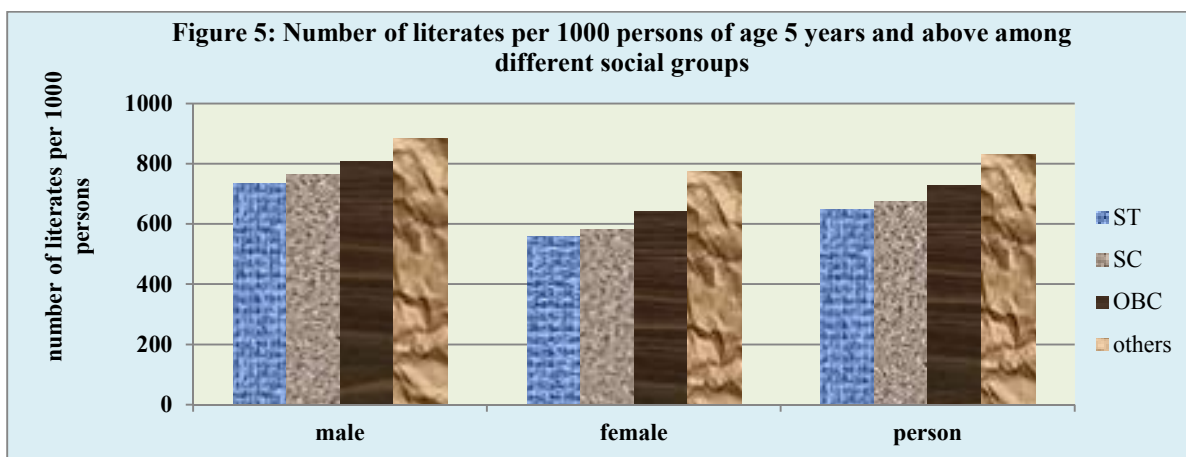

3.2.9 Literacy Rate among Persons of Age 5 years and above

3.2.9.1 Statement 3.12 presents at the all-India level, the literacy rate among persons of age 5 years and above belonging to different social groups in NSS 61st (July 2004 - June 2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds. Similar results for each State/UT for NSS 68th round are given in Table S3.12. Figure 5 presents, number of literates per 1000 persons of age 5 years and above among different social groups in India during 2011-12. It is seen that during 2011-12, in all-India, about 74.1 per cent of the population of age 5 years and above were literate, that is, they could both read and write a simple message with understanding in at least one language. At the all-India level, the estimated literacy rate was the highest (83.2 per cent) for the population belonging to *others* category of households, followed by OBC (72.8 per cent), SC (67.4 per cent) and ST (64.8 per cent). The literacy rates

for rural India were about 78.1 per cent (*others*), 68.8 per cent (OBC), 64.3 per cent (SC) and 62.7 per cent (ST) and those for urban India were 90.2 per cent among *others*, 83.2 per cent among OBC, 80.6 per cent among ST and 78.5 per cent among SC. For rural India, female literacy rate was 17.5 percentage points lesser than male literacy rate with considerable male-female differential in the literacy rates across different social groups: female literacy rate was 19 percentage points lower than male literacy rate among SC, 18.5 percentage points lower among OBC, 17.7 percentage points lower among ST and 13.9 percentage points lower among *others* category. In urban areas, the magnitude of the difference in literacy rates for males and females across all the social groups narrowed down compared to those in rural areas: female literacy rate was 16 percentage points lower than male literacy rate among SC, 14.3 percentage points lower among ST, 11.6 percentage points lower among OBC and 6.8 percentage points lower among *others* category. It is seen that literacy rate has increased in both rural and urban areas for males and females across all the social groups between 2004-05 and 2011-12.

Statement 3.12: Literacy rate among persons of age 5 years and above for different social groups in NSS 61st (July 2004 - June 2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds

3.2.10 Distribution of Persons of Age 15 years and above by Educational Level

3.2.10.1 The distribution of persons of age 15 years and above by level of general education is given in Statement 3.13 separately for each of the four social groups. Similar results at State/UT level are also given in Table S3.13.

3.2.10.2 It is seen that among persons of age 15 years and above, the percentage of not literates was the lowest among *others* category for both males and females in both rural and urban areas while in rural areas the percentage of not literates was the highest among ST for both males and females and in urban areas it was the highest among the SC for both males and females. Among *others* category in rural areas, 16.8 per cent of males and 34 per cent of females and in urban areas 6.2 per cent of males and 14.7 per cent of females of age 15 years and above were not literates. In rural areas among ST, 34.5 per cent of males and 56.7 per cent of females and in urban areas, among SC, 14.9 per cent of males and 34.4 per cent of females of age 15 years and above were not literates. It is seen that the percentage of population with education level graduate and above was the highest for *others* category among all the social groups for both males and females in both rural and urban areas: it was 8.9 per cent among rural male, 4.7 per cent among rural female, 29.1 per cent among urban male and 22.3 per cent among urban female.

3.2.11 Current Attendance Rates in Educational Institutions

3.2.11.1 For the present survey, current attendance rate is defined as the number of persons currently attending educational institution per 1000 persons of a given population. Statement 3.14 gives the estimated current attendance rate for persons in the age groups 5-14 years, 15-19 years and 20-24 years by social groups separately for males and females and rural and urban India. Results for each State/UT are given in Table S3.14. To facilitate temporal comparison, estimates for NSS 61st (2004-05) and 66th (2009- 2010) rounds are also presented alongside the estimates for 68th round. Statement 3.14 shows that in rural areas, current attendance rate among persons of age 5-14 years was the highest (92.4 per cent) for *others*, 89.2 per cent for OBC, 88.7 per cent for SC and the lowest, nearly 88 per cent among ST, while in urban areas, current attendance rate was the highest, nearly 94.5 per cent for *others*, 93.6 per cent for OBC, 92.3 per cent for ST and the lowest, nearly 91.8 per cent among SC. In rural areas, among males in the age group 5-14 years, the rate was the highest for *others* category (93.3 per cent) and the lowest for ST (88.5 per cent), while among females it was the highest among *others* category (91.5 per cent) followed by OBC (88.1 per cent), SC (87.9 per

cent) and ST (87.5 per cent). In urban India, among males, current attendance rates in the age group 5-14 years were lower among SC and ST (92.7 per cent among SC and 92.3 per cent among ST) than those among OBC and *others* (94.2 per cent among OBC and 94.1 per cent among *others* category) while among females, the rate was the lowest among SC (90.8 per cent) and the highest among *others* category (95.1 per cent). For the age group 15-19 years, in rural areas, current attendance rate was the highest (67.5 per cent) among *others*, followed by OBC (62.3 per cent), SC (54.6 per cent) and it was the lowest among ST (51.5 per cent), while in urban areas, current attendance rate was the highest for *others* category of persons (75.8 per cent), followed by ST (71.3 per cent), OBC (69.5 per cent) and it was the lowest for SC (65.3 per cent). For the age group 20-24 years, current attendance rates in rural areas was the highest among *others* (23.5 per cent), followed by OBC (15.7 per cent), SC (12.6 per cent) and it was the lowest for ST (9.9 per cent) while in urban areas, current attendance rate was the highest among *others* (35.5 per cent), followed by ST (28.1 per cent), OBC (26.5 per cent) and it was the lowest for SC (21.6 per cent).

Statement 3.14: Current attendance rates in educational institutions per 1000 persons of different age groups during NSS 61st (2004-2005), 66th (July 2009- June 2010) and 68th (July 2011-June 2012) rounds

Source: 1. For 61st round: NSS Report no. 516 (*Employment and unemployment situation among social groups in India, 2004-05*)

2 For 66th round: NSS Report no. 543 (*Employment and unemployment situation among social groups in India*)

3.3 Labour force, Employed and Unemployed

3.3.1 *General*: From the data collected through the quinquennial surveys on employment and unemployment, four different estimates of the employment and unemployment indicators can be generated based on the three approaches adopted for classification of persons by activity statuses. These are:

- (i) number of persons employed/ unemployed or in the labour force according to the *usual status* (ps) i.e., by considering usual principal activity only,
- (ii) number of persons employed/ unemployed or in the labour force according to the *usual status* (ps+ss) i.e., by considering usual principal and subsidiary activity together,
- (iii) number of persons employed/ unemployed or in the labour force according to the *current weekly status* (cws) approach, and
- (iv) number of person-days employed/ unemployed or in the labour force according to the *current daily status* (cds) approach

For the purpose of this report, estimates of the employment and unemployment indicators for various social groups have been generated with respect to the *usual status* (ps+ss) where the activity status of a person for the reference period of 365 days preceding the date of survey has been determined on the basis of the usual principal activity and usual subsidiary economic activity of the person taken together.

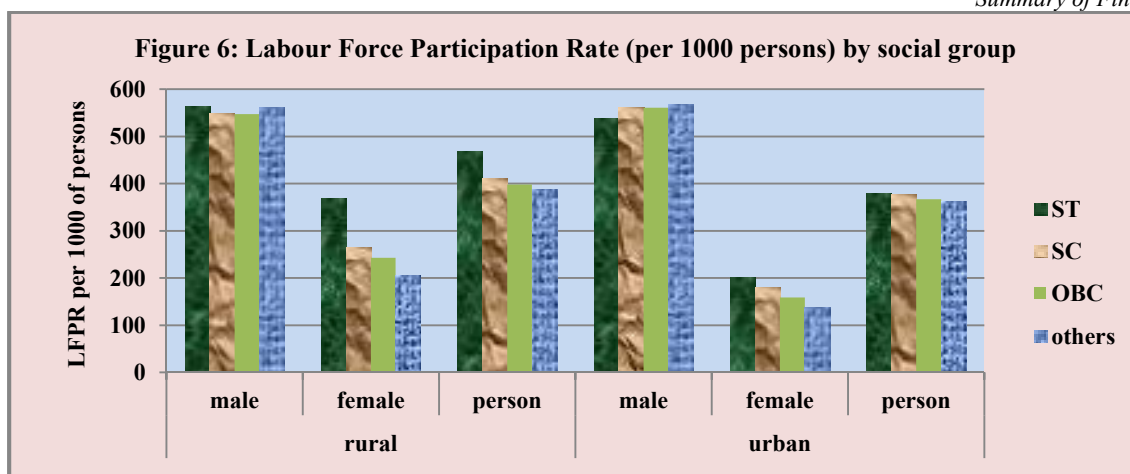

3.3.2 Labour Force Participation Rate (LFPR) of Various Social Groups

3.3.2.1 Labour force, or, in other words, the ‘economically active’ population refers to the population which supplies or seeks to supply labour for production of goods and services and therefore, includes both the ‘employed’ and the ‘unemployed’. The labour force participation rate (LFPR), i.e., the number of persons in the labour force per 1000 persons, presented in Statement 3.15 for all-India, has been measured according to the usual status considering both the principal and the subsidiary statuses. The estimates of LFPR for each State/UT by social group are presented in Table S3.15.

3.3.2.2 Statement 3.15 shows that in *usual status* (ps+ss), LFPR was 40.6 per cent in rural areas and 36.7 per cent in urban areas. It shows that at the all-India level, LFPR was the highest among the STs (45.9 per cent), followed by the SCs (40.4 per cent), OBCs (38.9 per cent) and it was the lowest for the category *others* (37.8 per cent). In rural areas, LFPR was the highest for STs (46.9 per cent), followed by SCs (41.1 per cent), OBCs (39.8 per cent) and it was the lowest for the category *others* (38.9 per cent). In urban areas, LFPR was the highest for STs (38 per cent), followed by SCs (37.7 per cent), OBCs (36.7 per cent) and it was the lowest among *others* (36.3 per cent). The male-female differences in LFPR are observed to be quite prominent for all the social groups with male LFPR much higher than female LFPR. In rural areas, among males, LFPR was the highest among STs, nearly 56.5 per cent followed by *others* (56.2 per cent), SCs (55.0 per cent) and OBCs (54.7 per cent), while among females, the LFPR was the highest among STs (36.9 per cent) followed by SCs (26.5 per cent), OBCs (24.3 per cent) and it was the lowest for *others* (20.6 per cent). In urban areas, among males, LFPR was the highest among *others* (56.8 per cent), followed by SCs (56.3 per cent), OBCs (56.1 per cent) and STs (53.8 per cent), while among females, LFPR was the highest among STs (20.2 per cent), followed by SCs (18.1 per cent), OBCs (15.9 per cent) and *others* (13.8 per cent). Figure 6 presents, LFPR for different social groups at the all-India level.

3.3.3 Worker Population Ratios (WPRs) of Various Social Groups

3.3.3.1 The work force according to the *usual status* (ps+ss) includes persons who (a) either worked for a relatively long part of the 365 days preceding the date of survey and (b) also those persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey. The number of persons employed per 1000 persons is referred to as work-force participation rate (WFPR) or worker population ratio (WPR). The WPRs for different social groups at the all-India level are presented in Statement 3.16. Figure 7 presents the WPR for different social groups at the all-India level.

3.3.3.2 Statement 3.16 shows that according to *usual status* (ps+ss) in rural areas, WPR was 39.9 per cent and it was 35.5 per cent in urban areas. It shows that in rural India, for both males and females, WPR according to *usual status* (ps+ss), was the highest for STs (55.7 per cent among males and 36.4 per cent among females). Among the remaining social groups, for males, WPRs were 53.9 per cent for SCs, 53.8 per cent for OBCs and 55.2 per cent for *others*, while for females WPRs were 26.2 per cent for SCs, 23.9 per cent for OBCs and 20.1 per cent for *others*. In urban areas, for males, WPR according to *usual status* (ps+ss) was higher among *others*, SCs and OBCs than that among STs while for females WPR was lower among *others*, SCs and OBCs than that among STs: for males it was 54.9 per cent among *others*, 54.5 per cent among SCs, 54.6 per cent among OBCs and 52 per cent among STs, while for females, it was 17.2 per cent for SCs, 15.1 per cent for OBCs, 12.9 per cent for *others* and 19.2 per cent for STs. The estimates of the WPRs at the State/UT level are presented in Table S3.15.

3.3.4 Worker Population Ratios (WPRs) of Various Social Groups over NSS Rounds

3.3.4.1 Statement 3.17 presents, WPRs according to *usual status* (ps+ss) for different social groups over the period 1983 to 2011-12 as obtained from 38th (1983), 43rd (1987-88), 50th (1993-94), 55th (1999-2000), 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds. It may be noted that the estimates for *others* category included OBCs in the 38th, 43rd and 50th rounds, since in those surveys, OBC was not a separate social group.

3.3.4.2 It is seen from Statement 3.17 that in rural areas, for males in ST category, WPR hovered around 56 per cent during 1999-2000 to 2011-12 (55.8 per cent during 1999-2000, 56.2 per cent during 2004-05, 55.9 per cent during 2009-10 and 55.7 per cent during 2011-12) while during the period prior to 1999-2000, it was around 57 to 59 per cent (59.1 per cent during 1993-94, 56.7 per cent during 1987-88 and 58.8 per cent during 1983). In rural areas, for males in the SC category, WPR hovered around 55 per cent in all the time periods except during 2011-12 (53.9 per cent), 1999-2000 (53.1 per cent) and 1987-88 (53.8 per cent). For rural male OBC category, WPR was nearly 54 per cent during 2004-05 to 2011-12 (53.7 per cent during 2004-05, 54 per cent during 2009-10 and 53.8 per cent during 2011-12), while it was around 53.2 per cent during 1999-2000. In rural areas, for males belonging to the household social group *others*, WPR was the lowest during 1999-2000 (52 per cent) and the highest during 2004-05 (55.7 per cent), while in both the periods 2009-10 and 2011-12 it was nearly 55.2 per cent. For females in rural areas, across all the social groups, WPR was lower during 2009-10 and 2011-12 compared to the other time periods: during 2011-12 and 2009-10, WPRs for ST were 36.4 per cent and 35.9 per cent, respectively, WPRs for SC were 26.2 per cent and 26.9 per cent, respectively, for OBC, WPRs were 23.9 per cent and 26.7 per cent respectively and for *others* WPRs were 20.1 per cent and 19.9 per cent, respectively. In urban areas, among males in the ST category, WPR was nearly 52 per cent in 2011-12 compared to 51 per cent in 2009-10 and 52.3 per cent in 2004-05 while the WPRs among males in the SC category were nearly 54.5 per cent in 2011-12 compared to 55 per cent in 2009-10 and 53.7 per cent in 2004-05. In urban areas, among males, WPRs among OBC were 54.6 per cent in 2011-12 compared to 54.3 per cent in 2009-10 and 55.4 per cent in 2004-05 and among *others*, it was 54.9 per cent in 2011-12 compared to 54.2 per cent in 2009-10 and 55 per cent in 2004-05. In urban areas for females, WPR declined in 2011-12 compared to 2009-10 among ST and SC (WPR was 19.2 per cent in 2011-12 compared to 20.3 per cent in 2009-10

among ST and it was 17.2 per cent in 2011-12 compared to 17.8 per cent in 2009-10 among SC) while WPR increased marginally from 14.5 per cent in 2009-10 to 15.1 per cent in 2011-12 among OBC and from 11.3 per cent to 12.9 per cent among *others*.

Note: For 38th, 43rd and 50th rounds, no separate category of social group 'OBC' was there and the category 'others' included 'OBC' category also.

3.3.5 Worker Population Ratios (WPRs) among Persons of Age 15 years and above for Different Levels of General Education

3.3.5.1 The WPRs for different levels of general educations among persons of age 15 years and above belonging to different social groups are presented in Statement 3.18 at the all-India level. It is seen that WPR for rural males of age 15 years and above was the highest for STs (84.3 per cent) followed by SCs (80.5 per cent), OBCs (79.8 per cent) and *others* (77.9 per cent). Level of WPR is seen to vary with levels of general education. Thus, among males in rural areas, for ST, it was 90.8 per cent for not literates and 66.5 per cent among the educated

(i.e., persons with general educational level secondary and above), for SC it was 87.3 per cent for not literates compared to 63.4 per cent for educated, for OBC, it was 88.8 per cent for not literates compared to 67.1 per cent for educated and for *others* it was 84.6 per cent for not literates compared to 70.1 per cent among the educated. In rural areas for females, WPRs among the different social groups followed the same pattern as that of their male counterparts in rural areas: it was the highest for ST (53 per cent) followed by SC (38.1 per cent), OBC (34.2 per cent) and *others* (27.1 per cent). Among the not literate females in rural areas, WPR was the highest for ST, nearly 62.5 per cent and the lowest for *others*, nearly 31.6 per cent and among the educated also, WPR was the highest among ST (25.4 per cent) and the lowest among *others* (21.2 per cent). In urban areas for males, WPR was the highest among OBCs (75.9 per cent) and lowest among *others* (72 per cent). Among the not literate males in urban areas, WPR was the highest among STs (89.2 per cent) and the lowest among *others* (81.2 per cent), while among the educated males in urban areas, WPR was the highest among OBCs (69.2 per cent) and was the lowest among STs (67.2 per cent). Among females in urban areas, WPR was the highest among STs (26.6 per cent) and the lowest among *others* (16.5 per cent). The WPR among not literate females in urban areas was the highest among STs (35.1 per cent) and the lowest among *others* (17.6 per cent) and among the educated females, it was the highest among STs (20.3 per cent) and the lowest among OBCs (16.9 per cent). The corresponding estimates for each State/UT are presented in Table S3.18.

3.3.6 Distributions of usual status workers by activity status and broad industry groups

3.3.6.1 Statement 3.19 presents distribution of usual status workers (ps+ss) by statuses in employment and by broad industry groups for each of the social groups. The employed persons are categorised into three broad statuses in employment, namely, *self-employment*, *regular wage/salaried employee* and *casual labour*. The broad industry groups are *primary* (NIC-2008 divisions: 01 – 03), *secondary* (NIC-2008 divisions: 05 – 43) and *tertiary* (NIC-2008 divisions: 45 – 99).

3.3.6.2 *Statuses in employment in rural areas:* During 2011-12, among the *usual status* (ps+ss) male workers, share of *self-employment* was the highest among *others* category (63.8 per cent) and was the lowest among the SC category (35.7 per cent). Among males, proportion of *casual labour* was the highest among the SC (55.4 per cent) and was the lowest among *others* category (22.1 per cent). Among male workers share of *regular wage/salaried employees* was the highest in *others* category (14.1 per cent) and was around 9.4 per cent among OBC, 8.9 per cent among SC and was the lowest among ST (5.8 per cent). The pattern of distribution in statuses in employment was similar among male and female workers.

Among female workers, the share of *self-employment* was the highest among *others* category (73.3 per cent) and the lowest among the SC (44.4 per cent), while share of *casual labour* was the highest among SC (50.6 per cent) and the lowest among *others* category (18.4 per cent). Among female workers, share of *regular wage/salaried employees* was the highest among females in *others* category (8.3 per cent) and the lowest among ST (3.3 per cent).

3.3.6.3 *Statuses in employment in urban areas:* During 2011-12, among the *usual status* (ps+ss) male workers, proportion of *self-employed* was the highest in *others* category (45.2 per cent), it was 43.8 per cent among workers in OBC category, 29.5 per cent among workers in SC category and 23.7 per cent among workers in ST category. Among the male workers, proportion of *casual labour* was the highest among SC (26.2 per cent) and was the lowest among *others* category (7.8 per cent). Among male workers, share of *regular wage/salaried employees* was the highest in ST category (52 per cent), it was 47 per cent among *others* category, 44.3 per cent among SC category and was the lowest among OBC category (38.8 per cent). Among female workers, the share of *self-employment* was the highest among OBC category (48.9 per cent) and the lowest among the SC (31.8 per cent), while share of *casual labour* was the highest among ST (30.8 per cent) and the lowest among *others* category (7.7 per cent). Among female workers, share of *regular wage/salaried employees* was the highest in *others* category (50.4 per cent), it was 48.8 per cent among SC category, 34.9 per cent among OBC category and 34.6 per cent among ST category.

3.3.6.4 *Broad industry of work in rural areas:* In rural areas for both males and females, *primary sector* employed the highest proportion of *usual status* (ps+ss) workers across all the social groups: among ST, 72.7 per cent and 81.8 per cent among males and females, respectively; among SC, 53.2 per cent and 73.3 per cent among males and females, respectively; among OBC, 60.2 per cent and 75.4 per cent among males and females, respectively; among *others*, 56.8 per cent and 69.8 per cent among males and females, respectively. It is observed that *secondary sector* was next to the *primary sector* in the share of total employment and the share of *tertiary sector* was the lowest for all categories of persons except for rural males in the category *others*, where the share of *tertiary sector* was more than the share of *secondary sector*. Among males of ST category, shares of *secondary sector* and *tertiary sector* were 18.3 per cent and 9 per cent, respectively, while among females, the shares of *secondary sector* and *tertiary sector* were 13.5 per cent and 4.7 per cent, respectively. Among males of SC category, shares of *secondary sector* and *tertiary sector* were 31.1 per cent and 15.7 per cent, respectively, while among females, these were 19.2 per cent and 7.4 per cent, respectively. Among males of OBC category, shares of *secondary sector* and *tertiary sector* were 20.6 per cent and 19.1 per cent respectively, while among females, these were 16.2 per cent and 8.4 per cent, respectively. Among males of *others* category, the shares of *secondary sector* and *tertiary sector* were 18.4 per cent and 24.8 per cent, respectively, while among females the shares were 18 per cent and 12.2 per cent, respectively.

3.3.6.5 *Broad industry of work in urban areas:* In urban areas, for both males and females, *tertiary sector* employed the highest proportion of *usual status* (ps+ss) workers across all the social groups followed by the *secondary sector* and the lowest proportion of *usual status* workers were employed in the *primary sector*. Among male workers, nearly 57.4 per cent in the ST category, 53.3 per cent in the SC category, 56.3 per cent in the OBC category and 64.1 per cent in the category *others* were engaged in the *tertiary sector*, while among female workers, 47.2 per cent in the ST category, 60.8 per cent in the SC category, 46.3 per cent in

the OBC category and 63.9 per cent in the category *others* were engaged in the *tertiary sector*. Among male workers, share of *secondary sector* was 33.8 per cent in ST category, 40.7 per cent in SC category, 36.4 per cent in OBC category and 32.3 per cent in category *others*, while among female workers it was 30.3 per cent in ST category, 28.3 per cent in SC category, 39.7 per cent in OBC category and 30.2 per cent in category *others*. Among male workers in different social groups, share of *primary sector* was the highest among ST (8.8 per cent) and the lowest among *others* category (3.6 per cent) and among females workers in different social groups also, share of *primary sector* was the highest among ST (22.5 per cent) and the lowest among *others* category (5.9 per cent).

3.3.7 Proportion of Unemployed (PU) and Unemployment Rates (UR) of Various Social Groups

3.3.7.1 *General*: As stated in para 3.3.1, for the purpose of this report, the estimates of the unemployed persons in various social groups have been generated following the *usual status* (ps+ss) approach. The estimate of unemployed according to the *usual status* (ps) gives the number of persons who sought or was available for work for a relatively long period during a reference period of 365 days and approximates to an indicator of the chronically unemployed. However, some of these persons classified as unemployed on the basis of this criterion might be working in a subsidiary capacity. The estimate of unemployed according to the *usual status* (ps+ss) gives the number of persons who remained unemployed for a relatively long period during a reference period of 365 days excluding those employed in a subsidiary capacity during the reference period. The former is called the usually unemployed according to the *usual principal status* (ps) and the latter, the usually unemployed excluding those employed in *subsidiary status* or *usual status adjusted* i.e., *us (adjusted)*, which would conceptually be lower than the former. The estimates of proportion of unemployed (PU), i.e., number of persons unemployed per 1000 persons and unemployment rate (UR) i.e., number of persons unemployed per 1000 persons in the labour force, according to the *usual status* (ps+ss) are presented in Statement 3.20 over the period from 1983 to 2011-12, for different social groups at the all-India level. The estimates of proportion of unemployed (PU) at the State/UT level are presented in Table S3.15. Figure 8 gives the unemployment rate (number of unemployed per 1000 persons in the labour force) for different social group in India.

3.3.7.2 *In rural areas*: During 2011-12, among males, the PU was nearly 0.7 per cent for ST, while for each of SC, OBC and *others* category, it was nearly 1 per cent and for females, PU was observed to vary between 0.4 to 0.5 per cent for different social groups. The UR for males was 2 per cent for SC, 1.7 per cent for OBC, 1.8 per cent for *others* and among ST it was 1.3 per cent. Among females, UR was 2.4 per cent among *others* category, 1.7 per cent among OBC, 1.4 per cent among SC and 1.1 per cent among ST.

3.3.7.3 *In urban areas*: During 2011-12, among males, PU was 1.8 per cent for each of ST and SC and 1.9 per cent for *others* category while it was 1.4 per cent among OBC. Among females in urban areas, PU was 1 per cent among ST, 0.8 per cent for SC, 0.7 per cent for

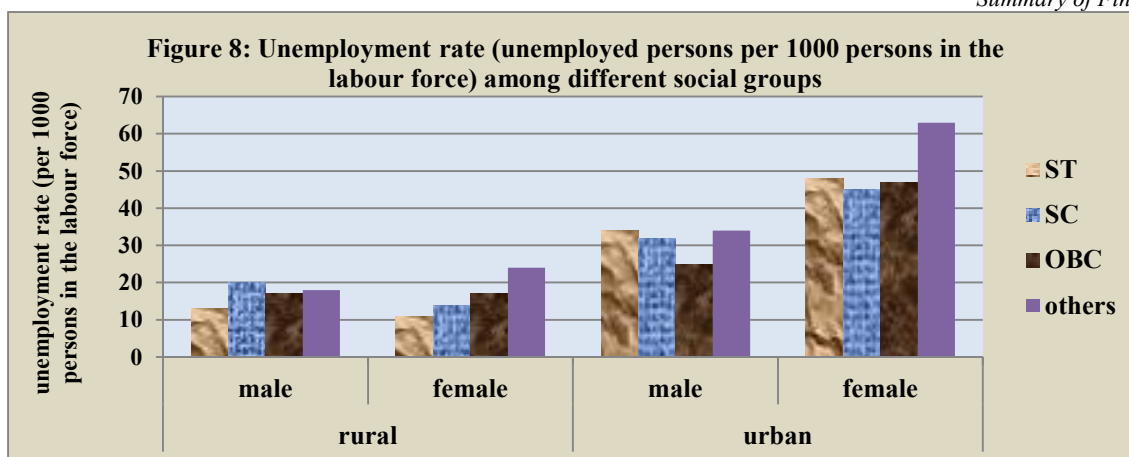

OBC and 0.9 per cent for *others* category. Among males, the UR was the highest and at the same level for ST and *others* category (3.4 per cent each), 3.2 per cent among SC and 2.5 per cent among OBC category, while among females, UR was the highest among *others* category (6.3 per cent) and it was 4.8 per cent among ST, 4.7 per cent among OBC and 4.5 per cent among SC.

Statement 3.20: Number of persons unemployed per 1000 persons (PU) and unemployment rate (UR) (number of persons unemployed per 1000 persons in the labour force) according to usual status (ps+ss) for different social groups during 1983 to 2011-12

Note: 1. For 38th, 43rd and 50th rounds, no separate category of social group 'OBC' was there and the category 'others' included 'OBC' category also.

2. Figures in parentheses are the corresponding unemployment rates (UR).

3.3.8 Proportion of Unemployed (PU) and Unemployment Rates (UR) of Various Social Groups over the Rounds of NSSO

3.3.8.1 From Statement 3.20, it is seen that for rural males, UR decreased marginally for ST and *others* category (from 1.7 per cent in 2009-10 to nearly 1.3 per cent in 2011-12 for ST and from 2 per cent to 1.8 per cent for the category *others*), while for the remaining social groups the UR increased marginally (from 1.7 per cent in 2009-10 to 2 per cent in 2011-12 for SC and from 1.4 per cent to 1.7 per cent for OBC). For rural females, UR remained almost at the same level for SC and *others* category (UR was 1.5 per cent in 2009-10 compared to 1.4 per cent in 2011-12 for SC and 2.5 per cent in 2009-10 compared to 2.4 per cent in 2011-12 for *others*) while for ST and OBC, it marginally increased during this period (it was 0.9 per cent in 2009-10 compared to 1.1 per cent in 2011-12 for ST and for OBC it increased to 1.7 per cent in 2011-12 from 1.4 per cent in 2009-10). For urban males, UR decreased for ST and OBC, remained at the same level for SC and increased for *others* category: for ST the decrease in UR was from 4.4 per cent in 2009-10 to 3.4 per cent in 2011-12; for OBC the decrease in UR was from 2.8 per cent to 2.5 per cent during this period; for *others* category the increase was from 2.7 per cent to 3.4 per cent during this period and for SC, it remained at 3.1 per cent to 3.2 per cent during this period. For urban females, UR increased for ST and SC (from 4.3 per cent in 2009-10 to 4.8 per cent in 2011-12 for ST and from 4.2 per cent to 4.5 per cent for SC during this period), it decreased for OBC (from 6.2 per cent to 4.7 per cent) and remained at the same level for *others* category (6.2 per cent in 2009-10 and 6.3 per cent in 2011-12).

3.3.9 Unemployment Rate (UR) Among Persons of Age 15 years and above for Different Levels of General Education

3.3.9.1 The URs for different levels of general educations among persons of age 15 years and above belonging to different social groups are presented in Statement 3.21 at the all-India level. It is seen that URs are higher among the educated persons (i.e., *persons with general educational level secondary and above*) than among the not literates for all categories of person across all the social groups. In rural areas, among the not literate males, UR was 0.3 per cent among ST, 0.6 per cent among SC, 0.4 per cent among OBC and 0.2 per cent among *others*, while among the educated males, the UR was 4.9 per cent among ST, 4.7 per cent among SC, 3.6 per cent among OBC and 3 per cent among *others*. Among not literate rural females, estimate of unemployment rate for ST came out to be zero (0), it was 0.2 per cent for

SC, 0.3 per cent for each of OBC and *others* category, while among the educated females, the UR was 15.6 per cent for ST, 9.9 per cent for SC, 9.3 per cent for OBC and 9.4 per cent for *others*. Among not literate urban males, UR was 0.9 per cent for ST, 0.7 per cent for SC, 0.6 per cent for OBC and 1 per cent for *others* category, while among educated males, the UR was 5.6 per cent for ST, 4.4 per cent for SC, 4 per cent for OBC and 4.1 per cent for *others* category. Among not literate urban females, estimates of unemployment rate for ST and OBC came out to be zero (0), it was 0.7 per cent among SC and 1.1 per cent among *others* category, while among the educated females, UR was 15.1 per cent for ST, 13.6 per cent for SC, 12 per cent for OBC and 8.5 per cent for *others* category.

Appendix B

Sample Design and Estimation Procedure

Appendix - B

Sample Design and Estimation Procedure

1. Introduction

1.1 The 68th round (July 2011-June 2012) of NSSO was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. The period of survey was of one year duration starting on 1st July 2011 and ending on 30th June 2012. The survey period of this round was divided into four sub-rounds of three months' duration each - 1st sub-round: July to September 2011; 2nd sub-round: October to December 2011; and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/sub-blocks (sbs) from these FSUs.

2.2 *Selection of the first-stage units:* The sampling frame and the sampling technique used for selection of the FSUs are stated in the following paragraphs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks (2007-12) constituted the sampling frame.

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising all rural areas of the district and
- (ii) urban stratum comprising all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification*: Procedure followed for sub-stratification in each of rural and urban sectors are stated below.

2.2.3.1 *Rural sector*: If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

2.2.3.2 *Urban sector*: If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS 2007-12.

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4. Equal number of samples was allocated in each of the four sub-rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For the urban sector, FSUs were selected from each stratum/sub-stratum by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples were allocated among the four sub rounds.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The procedures followed for selection of USUs within an FSU are stated in the remaining paragraphs of this sub-section.

2.3.1 *Formation and selection of hamlet-groups/sub-blocks:* Sample FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hgs)/ sub-blocks (sbs) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and was termed as hg/ sb 1; one more hg/sb was selected from the remaining hamlet-groups/ sub-blocks by simple random sampling (SRS) and was termed as hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. For the FSUs where no hg/sb formation was done, the hg/sb number was assigned as 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Formation of second stage strata (SSS) and allocation of households in different SSS:* For employment and unemployment survey of 68th round of NSSO, all households listed in the selected FSU/hamlet groups/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in each of rural and urban areas and the number of households surveyed from each of the three SSS are specified below:

SSS	composition of SSS	No. of households surveyed	
		FSU without hg/sb formation	for each hg/sb - for FSUs with hg/sb formation
Rural			
SSS 1	relatively affluent households	2	1
SSS 2	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3	other households	2	1
Urban			
SSS 1	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	households having MPCE of middle 60% of urban population ($A \leq \text{MPCE} \leq B$)	4	2
SSS 3	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

2.3.4 In the rural areas, identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like refrigerator/ washing machine etc.; any member as doctor/ advocate/ high salaried job/ ownership of large business etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of 10 or more cattle, buffaloes and camels. In the urban areas, two cut-off points 'A' and 'B' (in Rs.) were determined from NSS 66th round data for each NSS region in such a way that top 10% of the population had MPCE more than 'B' and bottom 30% of the population had MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey, a total of 8 households were selected from each FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 68th round along with the number of villages/blocks actually surveyed and number of persons enumerated in employment and unemployment survey are given for different states and union territories in Table B1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs are briefly indicated below:

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$; and

$= (D - 1)$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village used for selection

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum

H = total number of households listed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimates of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) of a stratum (s):

3.2.1 rural areas:

Estimate of population total (Y) of the characteristic y for the j-th SSS of a sub-stratum within a stratum denoted by \hat{Y}_j is obtained as

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t-th sub-stratum of s-th stratum denoted by \hat{Y}_{st} is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum (\hat{Y}_{sm}) is obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.2.2 urban areas:

Estimate of aggregates for j-th second stage stratum of a stratum (\hat{Y}_j) is obtained as

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t-th sub-stratum of s-th stratum denoted by \hat{Y}_{st} is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum (\hat{Y}_{sm}) is obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: \hat{Y} and \hat{X} being the overall estimates of the aggregates Y and X for two characteristics y and x, respectively at the State/ UT/ all-India level, the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

3.6 Estimates of Error: The estimated variances of the above estimates are obtained as follows:

3.6.1 For aggregate \hat{Y} :

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

3.6.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in each State/UT

State/UT	villages/blocks				persons enumerated

all-India	427632643	12.1	431722467	195489200	29.8	199784747	

Note: 1. Census population as on 1st March 2011 and percentage decadal change in population between census 2001 and 2011 are from Primary Census Abstract of RGI.

2. For any category of persons of any State/UT/all-India, Projected population as on 1st January 2012 has been derived using the formula, $A = A1 * [1 + \frac{R}{100}]^{10/120}$, where A1 is the census population as on 1st March 2011, R is the percentage decadal change in population between census 2001 and 2011 and A is the projected population as on 1st January 2012.

Appendix – C

Table C1: Census population as on 1st March 2011, percentage decadal change in population between census 2001 and 2011 and projected population as on 1st January 2012 for each State/UT and all-India

**GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY OFFICE
SOCIO-ECONOMIC SURVEY
SIXTY-EIGHTH ROUND: JULY 2011 – JUNE 2012
SCHEDULE 10: EMPLOYMENT AND UNEMPLOYMENT**

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward /inv. unit /block:
3. tehsil/town:*	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household							
item no.	item	code			item no.	item	code
1.	srl. no. of sample village/block				11.	sub-sample	
2.	round number	6		8	12.	FOD sub-region	
3.	schedule number	1	0	0	13.	sample hg/sb number (1/2)	
4.	sample (<i>central-1, state-2</i>)				14.	second-stage stratum number	
5.	sector (<i>rural-1, urban-2</i>)				15.	sample household number	
6.	NSS region				16.	srl. no. of informant (as in col. 1, block 4)	
7.	district				17.	response code	
8.	stratum				18.	survey code	
9.	sub-stratum				19.	reason for substitution of original household (code)	
10.	sub-round						

Codes for Block 1

item 17: response code:

informant: *co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.*

item 18: survey code: household surveyed: *original -1, substitute -2, casualty -3.*

item 19: reason for substitution of original household:

informant busy -1, members away from home -2, informant non-cooperative -3, others -9.

* tick mark (√) may be put in the appropriate place.

[2] particulars of field operation									
srl. no.	Item	investigator/assistant superintending officer			supervisory officer (s)

[3] household characteristics										
1.	household size				7.	land owned as on the date of survey (0.000 hectares)				
2.	principal industry (NIC-2008)	description:			8.	land possessed as on the date of survey (0.000 hectares)				
		code (5-digit)			9.	land cultivated (including orchard and plantation) during July 2010– June 2011 (0.000 hectares)				
3.	principal occupation (NCO-2004)	description:			10.	for rural areas, <i>if 1 in item 10,</i>	whether the household has MGNREG job card (<i>yes-1, no-2</i>)			
		code (3-digit)			11.		number of MGNREG job cards issued to the household			
4.	household type (code)				12.		whether any member of the household has any bank/post office account [#] (<i>yes-1, no-2</i>)			
5.	religion (code)									
6.	social group (code)									

Note: 1 acre = 0.4047 hectare, 1 hectare=10, 000 sq. metre

#: Including accounts held in bank/post offices for payment of wages earned in MGNREG work.

Codes for Block 3

item 4: household type:

for rural areas: self-employed in: agriculture-1, non-agriculture -2; regular wage/salary earning-3, casual labour in: agriculture-4, non-agriculture -5; others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

Codes for Block 4**col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): marital status:

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): educational level - general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kindergarten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): **type of institution:** government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (11): **whether currently registered with any placement agency:** registered: only in government employment exchanges-1, only in private placement agencies-2, in both government employment exchanges and private placement agencies-3; not registered -4.

col. (12): whether receiving/received any vocational training:

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): whether worked in MGNREG works during last 365 days:

worked-1, sought but did not get work-2, did not seek work-3.

Codes for Block 5.1

col. (3): **status:**

worked in h.h. enterprise (self-employed): *own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, renters, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.*

col. (5): **industry:** 5-digit code as per NIC -2008.

col. (6): **occupation:** 3-digit code as per NCO -2004.

col. (8): **location of workplace:**

workplace in rural areas and located in: *own dwelling unit-10, structure attached to own dwelling unit-11, open area adjacent to own dwelling unit-12, detached structure adjacent to own dwelling unit- 13, own enterprise/unit/office/shop but away from own dwelling-14, employer's dwelling unit -15, employer's enterprise/unit/office/shop but outside employer's dwelling -16, street with fixed location-17, construction site-18, others -19; workplace in urban areas and located in: own dwelling unit-20, structure attached to own dwelling unit-21, open area adjacent to own dwelling unit-22, detached structure adjacent to own dwelling unit- 23, own enterprise/unit/office/shop but away from own dwelling-24, employer's dwelling unit -25, employer's enterprise/unit/office/shop but outside employer's dwelling -26, street with fixed location-27, construction site-28, others -29; no fixed workplace -99.*

col. (9): **enterprise type:** *proprietary: male -1, female -2; partnership: with members from same hh. -3, with members from different hh. -4; Government/public sector-5, Public/Private limited company-6, Co-operative societies/trust/other non profit institutions -7, employer's households(i.e., private households employing maid servant, watchman, cook, etc.) -8, others -9.*

col. (11): **number of workers in the enterprise:** *less than 6 -1, 6 & above but less than 10 -2, 10 & above but less than 20 -3, 20 & above -4, not known -9.*

col. (12): **type of job contract:** *no written job contract -1; written job contract: for 1 year or less -2, more than 1 year to 3 years -3, more than 3 years -4.*

col. (14): **availability of social security benefits:**

eligible for: only PF/pension (i.e., GPF, CPF, PPF, pension, etc.) -1, only gratuity -2, only health care & maternity benefits -3, only PF/ pension and gratuity -4, only PF/ pension and health care & maternity benefits -5, only gratuity and health care & maternity benefits -6, PF/ pension, gratuity, health care & maternity benefits -7; not eligible for any of above social security benefits -8, not known-9.

col. (15): **method of payment:** *regular monthly salary -1, regular weekly payment -2, daily payment -3, piece rate payment -4, others - 5.*

col. (16): **period of seeking/available for work during last 365 days:** *sought/available for: less than 1 month -1, 1 month & above but less than 3 months -2, 3 months & above but less than 7 months -3, 7 months & above but less than 10 months -4, 10 months to 12 months - 5; did not seek/ not available -6.*

Codes for Block 5.2

col. (3): **status:** *codes as in col. 3, block 5.1. (only codes 11 to 51 are applicable here).*

col. (5): **industry:** *5-digit code as per NIC-2008.*

col. (6): **occupation:** *3-digit code as per NCO-2004.*

col. (7): **location of workplace:** *codes as in col. 8, block 5.1.*

col. (8): **enterprise type:** *codes as in col. 9, block 5.1.*

col. (10): **number of workers in the enterprise:** *codes as in col. 11, block 5.1.*

col. (11): **type of job contract:** *codes as in col. 12, block 5.1.*

col. (13): **availability of social security benefits:** *codes as in col. 14, block 5.1.*

col. (14): **method of payment:** *codes as in col. 15, block 5.1.*
