प्रस्तावना

अनिगमित गैर-कृषि क्षेत्र भारतीय अर्थव्यवस्था में देश के सकल घरेलू उत्पाद में अपने योगदान और रोजगार पैदा करने में महत्वपूर्ण भूमिका निभाता है और इस प्रकार यह क्षेत्र प्रत्यक्ष या अप्रत्यक्ष रूप से जुड़ी एक बड़ी आबादी के जीवन को छूता है। यह क्षेत्र आपूर्तिकर्ताओं और सेवा प्रदाताओं के रूप में कार्य करके निगमित क्षेत्र का भी समर्थन करता है, जिससे आपूर्ति श्रृंखला का एक अभिन्न अंग बनता है।

इस क्षेत्र की आर्थिक और प्रचालनात्मक गतिशीलता को वास्तविक रूप से कैप्चर करने के लिए राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) द्वारा राष्ट्रीय और राज्य स्तर पर विनिर्माण, व्यापार और अन्य सेवा क्षेत्र (निर्माण को छोड़कर) में अनिगमित गैर-कृषि स्थापनाओं की विभिन्न आर्थिक और प्रचालनात्मक विशेषताओं को विशेष रूप से मापने के लिए अनिगमित क्षेत्र उद्यमों (ASUSE) के वार्षिक सर्वेक्षण की संकल्पना की गई थी। बैन्च के आंकड़ों का उपयोग राष्ट्रीय लेखा सांख्यिकी के संकलन में किया जाना है। यह केंद्र और राज्य सरकारों के विभिन्न मंत्रालयों, नीति निर्माताओं, शोधकर्ताओं और अन्य हितधारकों को महत्वपूर्ण इनपुट भी प्रदान करेगा।

ASUSE का पहला पूर्ण सर्वेक्षण, जिसे 'ASUSE 2021-22' कहा जाता है, अप्रैल, 2021 से मार्च, 2022 के दौरान किया गया था। सर्वेक्षण अभिकल्प एवं अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति और उपकरणों को विकसित किया और यह रिपोर्ट तैयार की। क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा फील्ड कार्य किया गया था और समंक विधायन प्रभाग (डीपीडी) ने डेटा प्रोसेसिंग और सारणीयन कार्य को संभाला था। सर्वेक्षण समन्वय प्रभाग (एससीडी) ने इस सर्वेक्षण की विभिन्न गतिविधियों का समन्वय किया।

यह उल्लेख करना उचित है कि महामारी की दूसरी लहर के कारण ASUSE 2021-22 के प्रारंभिक भाग के क्षेत्र कार्य को काफी हद तक नुकसान उठाना पड़ा। अब, मुझे इस विस्तृत रिपोर्ट को लाने में खुशी हो रही है, जो विभिन्न परिचालन और आर्थिक विशेषताओं से संबंधित प्रमुख संकेतकों के अनुमानों के माध्यम से अनिगमित गैर-कृषि अर्थव्यवस्था (निर्माण को छोड़कर) के बारे में गहरी अंतर्दृष्टि और परिप्रेक्ष्य प्रदान करती है।

मैं स्टैंडिंग कमिटी ऑफ स्टेटिस्टिक्स (SCoS) के अध्यक्ष डॉ. प्रणव सेन और अन्य सदस्यों की आभारी हूं कि उन्होंने इस सर्वेक्षण पर अपने विभिन्न इनपुट, मार्गदर्शन आदि प्रदान किए। मैं उन सभी स्थापनाओं की भी सराहना करती हूं जिन्होंने इस सर्वेक्षण के लिए आंकड़े एकत्र करने में फील्ड अधिकारियों को अत्यधिक सहयोग दिया है। मैं ASUSE 2021-22 के संचालन और इस रिपोर्ट को प्रकाशित करने के लिए NSSO के विभिन्न प्रभागों के अधिकारियों/कर्मचारियों द्वारा किए गए प्रयासों की भी सराहना करना चाहती हूं। रिपोर्ट की सामग्री में सुधार के लिए सुझावों का स्वागत है।

Preface

The unincorporated non-agricultural sector plays a pivotal role in Indian economy in terms of its contribution to the Gross Domestic Product of the country and also for its ability to generate employment and thus touching the lives of a huge population directly or indirectly associated with this sector. The sector also supports the incorporated sector by acting as suppliers and service providers, thereby forming an integral part of the supply chain.

In order to realistically capture economic and operational dynamics of this sector, Annual Survey of Unincorporated Sector Enterprises (ASUSE) was conceptualized by National Sample Survey Office (NSSO) for exclusively measuring various economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sector (excluding construction) at national as well as at state level. Data from ASUSE is to be used in compilation of National Accounts Statistics. It will also provide important input to various ministries in the central and state governments, policy makers, researchers and other stake holders.

The first full-fledged survey of ASUSE, referred to as 'ASUSE 2021-22' was carried out during April, 2021 to March, 2022. The Survey Design and Research Division (SDRD) developed the survey methodology and instruments and prepared this report. The field work was carried out by the Field Operations Division (FOD) and the Data Processing Division (DPD) handled the data processing and tabulation work. The Survey Coordination Division (SCD) coordinated various activities of this survey.

It is pertinent to mention that the field work of initial part of ASUSE 2021-22 suffered to a great extent, due to the second wave of the pandemic. Now, I am happy to bring out this detailed report, which provides deep insight and perspective about unincorporated non-agricultural economy (excluding construction) through estimates of key indicators pertaining to various operational and economic characteristics.

I am thankful to Dr. Pronab Sen, Chairman, and other members of the Standing Committee of Statistics (SCoS) for providing their various inputs, guidance, etc. on this survey.I also record my appreciation for all the establishments that had extended utmost co-operation to the field officers in collecting the data for this survey. I would also like to appreciate the efforts made by the officers/officials of different divisions of NSSO for conduct of ASUSE 2021-22and bringing out this report. Suggestions for improving the content of the report are most welcome.

SAMPLING DESIGN B1- B11

APPENDIX C: SCHEDULE ESU

SCHEDULE ESU C1-C27

Chapter One
Introduction

1.1 Background:

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MoSPI), Government of India, since its inception has been conducting nation-wide large scale sample surveys, employing scientific sampling methods, to collect data on diverse socio-economic aspects. The role of unincorporated enterprises in the Indian economy is very important and accordingly, a need was felt to design an annual survey covering the unincorporated non-agricultural enterprises of the country. This necessitated NSSO to develop the idea of Annual Survey of Unincorporated Sector Enterprises (ASUSE) for exclusively measuring various economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sector.

1.1.2 NSSO conducted the first full-fledged survey of ASUSE i.e. ASUSE 2021-22 during April, 2021- March, 2022. In this context, it is pertinent to mention that the first full-fledged annual survey was planned to be conducted during April, 2020 – March, 2021. However, due to the pandemic the survey could not be launched during Financial Year 2020-21 and could only be initiated from April, 2021.

1.2 Objective of the Survey:

1.2.1 In Indian economy, unincorporated sector is important because of the large number of establishments in this sector and the magnitude of employment it provides to unskilled/ semi-skilled/ skilled persons, besides its contribution to Gross Domestic Product of the country. Broadly, this unincorporated sector also covers the informal sector enterprises[1]. The necessity of comprehensive data pertaining to unincorporated sector including informal sector for planning and policy formulations thus needs no emphasis. The System of National Accounts 2008 (SNA 2008), has also acknowledged the difficulty in identifying the informal sector units properly. However, the basic features of this sector, in simple terms, is mainly characterised by factors such as (a) easy entry for the new enterprises, (b) family ownership of enterprises, (c) reliance on indigenous resources, (d) small-scale of operations and low productivity, (e) labour-intensive technology, etc. These units may operate without a fixed location, or in homes, small shops or workshops. The activities covered range from street vending, shoe shining and other activities that require little or no capital and skills to activities that involve a certain amount of investment or level of expertise such as tailoring, car repair and professional services. Many informal enterprises are operated by an individual working alone, as a self-employed entrepreneur (own-account worker), or with the help of unpaid family members, while other informal unincorporated enterprises may engage paid workers. The exact coverage of this sector is mentioned in paragraph 1.3.1.

[1] System of National Accounts, 2008: "*Chapter 25: Informal aspects of the economy*", European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

1.2.2 ASUSE is devoted exclusively on economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sectors to supplement the corporate sector data. This will help National Accounts Division (NAD) of MoSPI to compute important components of national accounts. Specially designed three-digit product codes used in the enterprise schedule of this round will help NAD also make use of the survey results in preparation of Supply-Use Table. The data collected in this survey will help in meeting the requirements of different Ministries, Organizations and users in general.

1.3 Survey Outline:

1.3.1 Coverage of the Survey:

1.3.1.1 **Geographically**, ASUSE 2021-22 covered the rural and urban areas of whole of India (except the villages in Andaman and Nicobar Islands which are difficult to access).

1.3.1.2 **Sector-wise**, unincorporated non-agricultural establishments belonging to three sectors viz., Manufacturing, Trade and Other Services has been covered in ASUSE 2021-22.

1.3.1.3 **Category-wise**, ASUSE 2021-22 covered the following:

(a) Manufacturing establishments **excluding** those registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948.

(b) Manufacturing establishments registered under Section 85 of Factories Act, 1948.

(c) Establishments engaged in cotton ginning, cleaning and bailing (code 01632 of NIC-2008) **excluding** those registered under Factories Act, 1948.

(d) Establishments manufacturing bidi and cigar **excluding** those registered under Bidi and Cigar Workers (Conditions of Employment) Act, 1966.

(e) Non-captive electric power generation, transmission and distribution by units **not registered** with the Central Electricity Authority (CEA).

(f) Trading establishments.

(g) Other Service sector establishments.

1.3.1.4 **Ownership-wise**, establishments under coverage in (a) to (g) of para 1.3.1.3 consisted of:

(a) Proprietary and partnership establishments [**excluding** Limited Liability Partnership (LLP) establishments]

(b) Society/trust/association/club/body of individuals etc., Co-operatives, Self-Help Groups (SHGs), Non-Profit Institutions (NPI/NPISH), etc.

1.3.1.5 Following establishments were **excluded** from the coverage:

(a) Establishments which are incorporated i.e. registered under Companies Act, 1956/ Companies Act, 2013

(b) Manufacturing establishments and other non-manufacturing establishments covered under Annual Survey of Industries (ASI)

(c) The electricity units registered with the Central Electricity Authority (CEA)

(d) Government Department/Government Company/Government Society/ Public Sector Unit.

1.3.1.6 Different activity categories that are used in this report are presented as Annexure I at the end of this chapter.

1.3.2 **Survey Design**: The survey has been conducted following a multi-stage stratified sampling scheme where first stage units (FSUs) are census villages in rural[2] and UFS (Urban Frame Survey) blocks in urban areas. The ultimate stage units (USU) were establishments for both the sectors. In the case of large FSUs, one intermediate stage of sampling has been done in the form of hamlet-groups in rural and sub-blocks in urban. The detail of sampling design followed in this survey has been placed in Appendix B of this report.

1.4 Operational and Economic Characteristics of ASUSE 2021-22:

1.4.1 Data on various operational and economic characteristics have been collected through the enterprise schedule[3]. These characteristics are very important and relevant for overall picture of the unincorporated sector. This report exclusively focuses on these operational and economic characteristics and provide a number of tabulations on their estimates. The estimates are generated using the survey-based multipliers for both 'aggregate' and 'ratio' estimates. Moreover, it is worthwhile to mention that the survey period of ASUSE 2021-22 was impacted by the second wave of the pandemic and subsequent restrictions imposed by various Governments. As a result, the overall annual estimates of ASUSE 2021-22 got impacted to a significant extent. Hence, due caution should be taken while using the estimates for some of the domains/cross-section, specifically where sample size is low. Users should keep these points in mind while interpreting the results of this survey.

1.4.2 An establishment is treated as an enterprise or part of an enterprise, which is situated in a single location carrying out its productive activity. The enterprise and the establishment are the same for single-establishment entities. ASUSE survey is based on establishment approach and tries to capture the expenses, receipts, assets, loans, employment, etc. pertaining to the activities of the single location at which the establishment is located. However, it is pertinent to mention that it is very common in unincorporated sector to carry out multiple activities in the single location i.e., at the location of establishment. In such cases of multiple activities, if accounts are separable then the multiple activities, although in a single location, are listed as separate establishments. It ensures establishment approach is followed not only at location but also at activity level which further fine tunes the approach itself. Cases, where accounts of different activities are not separable, are treated as mixed activities of an establishment. Thus, by 'establishment approach' we mean an enterprise is engaged in single activity or mixed activity at the single location of the enterprise.

[2] In general, the census villages are the FSUs in the rural sector. However, for rural part of Kerala, Panchayat wards has been taken as FSUs.

[3] The 'establishment approach' has been followed for this survey.

1.5 Contents of this document

1.5.1 All the estimates presented in this report are based on data collected through ESU Schedule of ASUSE 2021-22.

1.5.2 This report contains three chapters and three appendices. Following the present introductory chapter (Chapter One), 'Chapter Two' outlines the concepts and definitions of different terms used in this survey. Chapter Three presents summary of findings of the survey at the National, State/UT as well as at activity level. Detailed tables forming the basis of this report have been provided at Appendix A. Appendix B provides the sampling design and estimation procedure used for estimating various parameters while Appendix C contains a copy of the ESU Schedule of ASUSE 2021-22.

1.5.3 While using the estimates for the Union Territories and smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates and interpretation thereof should be made with caution. Similarly, while interpreting the results using estimates at much deeper cross-sectional level, data users must keep in mind the inadequacy, if any, of the corresponding domain specific samples before arriving at any conclusion.

1.5.4 The activities pursued by the establishments are broadly categorised into four (4) Broad Activity Categories (BAC). The different 'Broad Activity Categories' that were covered in ASUSE survey are 'manufacturing', 'non-captive electricity generation', 'trade' and 'other services'. There are many tables for State/UTs in 'Appendix A', where estimates for important indicators are presented at BAC level. 'Non-captive electricity generation' has not been displayed separately in these tables because of very low sample sizes. However, all-India values do contain the contribution of the 'Non-captive electricity generation' sector. Hence, the all-India values may not always match with the constituent values.

1.5.5 Many tables in 'Appendix A' are generated for different 'Activity Categories' under the BAC's, with notations M1, M2, M3, ….., T1, T2,….., S1, S2,…., etc. Users are requested to refer Annexure I at the end of this chapter for the composition and detailed description of these various activity categories.

1.5.6 Due to round-off issues also, all-India values may not always match with the sum of the values of the constituent items. Similarly, for tables showing per thousand distribution of any attribute, the sum of the individual rows may not add up to 1000, owing to the same reason.

Chapter Two

Concepts and Definitions

2. Concepts and Definitions:

2.1 **Population coverage:** The following rules regarding coverage of the population/households are adhered to while visiting households for the purpose of listing of households and establishments are followed:

(a) Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., are excluded, but residential staff therein are considered while listing is done in such institutions. The persons of the first category are considered as normal members of their parent households and has been considered there. Convicted prisoners undergoing sentence have been outside the coverage of the survey.

(b) Floating population, i.e., persons without any normal residence are not to be considered. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, has been taken into account.

(c) Foreign nationals are not considered, nor do their domestic servants, if by definition the latter belong to the foreign national's household.

(d) Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) are kept outside the survey coverage due to difficulties in conducting survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, has been covered.

(e) Establishments run by persons staying in orphanages, rescue homes, *ashrams*, vagrant houses, old-age homes, students staying in hostels and the residential staff (other than monks/ nuns) of these institutions have been considered.

2.2 House: Every structure, tent, shelter, etc. is a house irrespective of its use. It may be used for residential or non-residential purpose or both or even may be vacant.

2.3 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways but exclude temporary visitors and guests. The following procedures have been adopted as guidelines for identifying the composition of the household.

(a) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constitutes a single-member household. If, however, a group of persons among them normally pool their income for spending, they would together be treated as forming a single household. For example, a family living in a hotel is treated as a single household.

(b) In deciding the composition of a household, more emphasis is placed on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case, the place of residence of a person is different from the place of boarding, he or she has been treated as a member of the household with whom he or she resides.

(c) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) is considered as a member of the household with whom he or she resides even though he or she is not a member of the same family.

(d) When a person sleeps in one place (say, in a shop or in a room in another house) but usually takes food with his or her family, he or she has been treated not as a single member household but as a member of the household in which other members of his or her family stay.

(e) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/ she has not been considered as a member of his/ her parent's household. However, he/ she is considered as a single member household if the hostel is surveyed.

2.4 **Enterprise**: An institutional unit[4] in its capacity as a producer of goods and services is known as an enterprise. An enterprise is an economic transactor with autonomy in respect of financial and investment decision-making, as well as authority and responsibility for allocating resources for the production of goods and services. It may be engaged in one or more economic activities at one or more locations. It may be noted that unincorporated enterprises owned by households, all of whose output is intended for final consumption or gross fixed capital formation by those households is outside the coverage of the definition of enterprises used in this survey.

2.5 **Establishment**: An establishment is an enterprise, or part of an enterprise, that is situated in a single location and in which either only a single productive activity is carried out or in which the principal productive activity accounts for most of the value added. The enterprise and the establishment are the same for single-establishment firms. The unit of enquiry of the ASUSE is an Establishment and not the Enterprise. ASUSE survey is based on establishment approach and tries to capture the expenses, receipts, assets, loans, employment, etc. pertaining to the activities of the single location at which the establishment is located. However, it is pertinent to mention that it is very common in unincorporated sector to carry out multiple activities in the single location i.e., at the location of establishment. In such cases of multiple activities, if accounts are separable then the multiple activities, although in a single location, are listed as separate establishments. It ensures establishment approach is followed not only at location but also at activity level which further fine-tunes the approach itself. Cases, where accounts of different activities are not separable, are treated as mixed activities of an establishment. Thus, by 'establishment approach' we mean an enterprise is engaged in single activity or mixed activity at the single location of the enterprise.

2.6 **Non-agricultural establishment:** All establishments covered under Sections 'C' to 'S' of NIC-2008 are "non-agricultural establishments". All non-agricultural establishments are referred to as NAE for this survey.

2.7 **Unincorporated non-agricultural establishments**: Non-agricultural establishments which are not incorporated (i.e. not registered either under Companies Act, 1956 or, Companies Act, 2013) are only covered. Further, the coverage of 'unincorporated establishments' is given in paragraph 1.3.1. The coverage is restricted primarily to all household proprietary and partnership establishments. In addition, society/trusts/associations/clubs/body of individuals etc., Co-operatives, Self-Help groups (SHGs) and Private Non-Profit Institutions (NPIs) including Non-Profit Institutions Serving Households (NPISH) are covered.

[4] An institutional unit is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.

2.8 **Manufacturing Establishment**: A manufacturing establishment is a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. Also included are units primarily engaged in maintenance and repair of industrial, commercial and similar machinery & equipment, which are, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods. Thus, all activities covered by Divisions 10 to 33 of NIC 2008 have been considered as 'manufacturing' for the purpose of the survey. In addition, the activity of cotton ginning, cleaning and bailing (Code 01632 of NIC 2008) has been covered in the present survey under manufacturing. *It is important to note that production of goods for the sole purpose of domestic consumption has not been considered as manufacturing*.

2.9 **Trading Establishment:** A trading establishment is a unit engaged in trade. Trade is defined to be an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. Thus, all the trading activities, both wholesale and retail (perennial, casual or seasonal) listed under Divisions 45 to 47 of NIC 2008 are treated as trade. The activities of intermediaries who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission are also treated as trade. Thus, purchase and sale agents, brokers listed in NIC 2008 Division, and auctioneers listed under NIC Group are also under the survey coverage.

2.10 **Other Service Establishment**: A servicing establishment or service sector establishment is engaged in activities carried out for the benefit of a consuming unit. Such consuming units could be individuals or other institutional units. Activities of service establishments typically results in changes in the condition of consuming units when such activities are realized by the consuming unit on demand. It is possible for a unit to produce a service for its own consumption provided that the type of activity is such that it could have been carried out by another unit. Some examples of changes that a producer of service brings about in the condition of consumers of service are:

a) *Changes in the condition of consumer's goods*: the producer works directly on goods owned by the consumer by transporting, cleaning, repairing or otherwise transforming them;

b) *Changes in the physical condition of persons*: the producer transports the persons, provides them with accommodation, provides them with medical or surgical treatments, improves their appearance, etc.;

c) *Changes in the mental condition of persons*: the producer provides education, information, advice, entertainment or similar services;

d) *Changes in the general economic state of the institutional unit itself*: the producer provides insurance, financial intermediation, protection, guarantees, etc.

All activities listed under Sections H – U of NIC 2008 are considered as *other service activities*. Further, activities under Section E are also under coverage. However, Section F (Construction), O (Public administration and defence; compulsory social security), T (Activities of households as employer; undifferentiated goods and services producing activities of households for own use) and U (Activities of extraterritorial organizations and bodies) are excluded from coverage of this survey. Only unincorporated establishments in the service sector under coverage as described in Annexure I of Chapter 1 have been surveyed. Among these also**,** activities under certain NIC 2008 codes are out of survey coverage, viz., 491 (transport via railways), 49212 (urban or suburban tramways), 49213

(urban or suburban underground or elevated railways), 493 (transport via pipeline), 51 (air transport), 641 (monetary intermediation) excluding special code 64193, 642 (activities of holding companies), 65 (insurance, reinsurance and pension funding), 6611 (administration of financial markets), 942 (activities of trade unions), 9492 (activities of political organizations).

2.11 **Financial Establishment**: A financial establishment is a servicing establishment that is principally engaged in financial intermediation or in auxiliary financial activities, which are closely related to financial intermediation. Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for acquiring financial assets by engaging in financial transactions in the market. The role of financial intermediaries is to channelize funds from lenders to borrowers by intermediating between them.

2.12 **Household Establishment:** A household establishment is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the establishment is located in the premises of the household(s) or not. In other words, all proprietary and partnership establishments are household establishments.

2.13 **Non-household Establishment:** Non-household establishments are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc.

2.14 **Worker**: Worker is defined as persons working within the premises of the establishment who are in the payroll of the establishment as well as the working owners and unpaid family members who help in the entrepreneurial activity. The helpers, apprentices, interns engaged by the establishment are also treated as worker. The worker may serve the establishment in any capacity - primary or supervisory. He/she may or may not receive wage/salary in return to his/her work incidental to or connected with the entrepreneurial activity. Sales persons appointed by an establishment for selling its products/services, *paid or unpaid*, are also treated as workers. A worker need not mean that the same person would be working continuously; it would only refer to a position. i.e., if one person is terminated and another person is appointed in his place, it has been counted as 1 and not 2. A worker engaged for more than half of the normal working hours of the establishment has been treated as **full time worker**.

2.14.1 In case of SHGs, if any member (including office bearers) performs the activities of the SHG by drawing remuneration, they are treated as working owner. Members of SHG who attend meetings regularly or participate in the activities of the SHG including decision making process without taking any remuneration are not treated as workers for the purpose of this survey. Instead, they are considered as 'active members of SHG'. There may also be hired worker or other workers assisting the activities of SHG.

2.14.2 **Formal hired worker**: A formal hired worker is one who is eligible for paid leave and also eligible for social security benefits like provident fund, ESIC, health insurance, etc. provided by the employer.

2.14.3 **Informal hired worker:** An informal hired worker is not eligible for paid leave and/or not eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. Several small establishments are expected to have informal hired workers.

2.15 **Emoluments**: Regular payments made by establishments to the individual workers (including working owners, if any) such as salary / wages, bonus etc. either in cash or in kind or both. There may be other type of payments like canteen facility, health care facility, recreation club facility, etc. which are paid in kind to a group or to all the workers of the establishment. All such payments, whether individual payments or payments made to a group, are considered as emoluments.

2.16 **Own Account Establishment (OAE)**: An establishment which is run without any hired worker employed on a fairly regular basis[5] is termed as an own account establishment.

2.17 **Hired Worker Establishment (HWE)**: An establishment which is employing at least one hired worker on a fairly regular basis is termed as hired worker establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an establishment are considered as hired workers.

2.18 **Perennial establishment:** Establishments that are run more or less regularly throughout the year are called perennial establishments.

2.19 **Seasonal establishment:** Seasonal establishments are those which are usually run in a particular season or fixed months of a year.

2.20 **Casual establishment:** Establishments that are run occasionally, for a total of at least 30 days in the last 365 days, are called 'casual establishments'.

2.21 **Multiple Activities**: Since many of the entrepreneurs belonging to the unincorporated sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. If the activities are carried out at the same location and the **information is not separately available**, then it has been taken as "mixed activity" for ASUSE. If the activities are carried out at the same location and the **information is separately available**, then it is taken as "multiple activity". However, an entrepreneur of a manufacturing establishment manufacturing woollen garments before winter and cotton clothes before summer would not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person providing computer services during day-time as an own account establishment and also providing tuition in the evening in his own coaching centre, ii) a person carrying out agricultural activity during sowing / harvesting season and doing carpentry at the same time or at other times, etc.

2.22 **Mixed Activity**: There are establishments that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, etc. Each such activity is treated as a separate establishment if information for them is separately available. If the accounts are not separable then the data pertaining to the establishment as a whole has been collected and the establishment is classified as having mixed activities and the activities of such establishments are a mixture of NIC's. The activities may be mixed at any level of NIC, but for the present survey, an establishment has been considered to have done mixed activities if its activities were different at 2-

[5] 'fairly regular basis' means the major part of the period when operation(s) of an establishment are carried out during a reference period.

digit level of NIC-2008. The appropriate NIC in such cases has been determined on the basis of major activity. Major activity refers to the activity which yielded maximum income followed by turnover and then by employment.

2.23 **Classification of establishments based on ownership**:

2.23.1 **Proprietary**: When an individual is the sole owner of an establishment, it is called a proprietary establishment.

2.23.2 **Partnership:** Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried out by all or any one of them acting for all'. There may be two or more owners, belonging to the same or different households, on a partnership basis, **with or without formal registration** (where there is a tacit understanding about the distribution of profits among the so-called partners).

2.23.3 **Limited Liability Partnership:** A limited liability partnership is a body corporate[6] formed and incorporated under this *Limited Liability Partnership* Act (2008) and is a legal entity separate from that of its partners. A limited liability partnership shall have perpetual succession. Any change in the partners of a limited liability partnership shall not affect the existence, rights or liabilities of the limited liability partnership. However, they are outside the coverage of ASUSE. Besides, other incorporated entities such as PSUs, Companies (Government and Non-Government), etc. are also outside the coverage of ASUSE.

2.23.4 **Public Sector Unit/Enterprise:** An enterprise, which is wholly owned/ run/managed by Central or State governments, quasi-government institutions, local bodies like *Panchayat*, *Zilla Parisad,* City Corporation, Municipal authorities, etc., autonomous bodies like Universities, Education boards, and institutions like schools, libraries etc. set up by the government, panchayat, etc., are treated as public sector enterprise. Enterprises owned/ managed by a single or a group of private persons with no participation of the Government, local body etc. in it, both in terms of management and shares, are treated as private sector enterprises. An enterprise should not be treated as a public sector enterprise if it is run on a loan granted by government, local body, etc.

2.23.5 **Cooperatives**: A cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly-owned and democratically-controlled establishment. Examples could be:

- businesses owned and managed by the people who use their services (a consumer cooperative)
- organizations managed by the people who work there (worker cooperatives)
- second- and third-tier cooperatives whose members are other cooperative

For the purpose of this survey, only cooperatives registered under the 'Cooperative Societies Act' have been considered as eligible cooperatives.

[6] Body corporate broadly means a corporate entity which has a legal existence. This includes a private company, public company, Limited Liability Partnerships, foreign company, etc.

2.23.6 **Society:** Any group of persons associated for any literary, scientific or charitable purpose, registered under the Societies Registration Act 1860 or any State specific 'Societies Act' has been considered as Society for this survey.

2.23.7 **Trust**: An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees. For the purpose of this survey, only trusts registered under the Indian Trust Act 1882 or any State specific Act have been considered as eligible trusts.

2.23.8 **Club/Association/Body of individuals:** A club/association/body of individuals is a group of two or more people united by a common interest or goal. They may or may not be registered with any authority.

2.23.9 **Non-Profit Institutions (NPI):** Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate surpluses. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share any profits or other income which the NPI's receive. For this reason, they are frequently exempted from various kinds of taxes. NPIs are principally non-market producers but they may engage in market production also. Non-market production means production of goods and/or services at economically insignificant price. Non-profit institutions serving households (NPISHs) are legal entities that are principally engaged in the production of non-market services for households or the community at large and whose main resources are voluntary contributions/sponsorship.

2.23.10 **Self-help Groups**: A **self-help group** (**SHG**) is a financial intermediary usually composed of a number of local persons. Members make small regular savings contributions over a few months until there is enough capital in the group to begin lending. Funds are lent back to the members or at times to others. In India, many SHGs are 'linked' to banks for the delivery of microcredit.

2.23.10.1 **Activity of self-help groups:** Self-help groups are essentially engaged in the **financial intermediation** i.e. the activity of the SHG is focussed to provide loans to the members and the members can utilise the loan for the purposes - personal or entrepreneurial. However, an SHG may be formed initially and later all or some members may be engaged in group-based non-financial activities.

2.23.10.2 **Determination of eligibility of an SHG:** An SHG is considered as eligible establishment for the purpose of this survey if the total number of days of operation of that SHG is at least 15 days in the last 365 days. Working days include-

a) Days of meeting;
b) Days of interaction with the bank for purpose of deposit/withdrawal/loan/repayment etc.; and
c) Days of performing other jobs related to SHG like maintenance of register.

2.23.10.3 In case of SHGs, if any member (including office bearers) performs the activities of the SHG by drawing remuneration, they are treated as working owner/workers. Members of SHG who attend meetings regularly or participate in the activities of the SHG including decision-making process without taking any remuneration have not been treated as a worker for the purpose of this survey. Instead, they are considered as 'active members of SHG'.

2.24 **Investment Club:** Investment clubs are a group of people who pool their money to make investments. Usually, investment clubs are organized as partnerships where members usually meet on periodic basis and study different investments, to make investment decisions as a group. The decisions on buying and selling (investment) are made through voting process. Club meetings may be educational and each member may actively participate in investment decisions. The income and losses of the club are passed through to its partners and are reported on their individual tax returns.

Chapter Three
Summary of Findings

3.1 Introduction

3.1.1 This chapter contains the key indicators of ASUSE 2021-22. The estimates of different operational and economic characteristics of ASUSE 2021-22 are presented here. It is pertinent to mention that some of the ratio estimates like gross value added per establishment, gross value added per worker, annual emoluments per hired worker, fixed assets per establishments etc., in addition to the aggregate estimates, such as number of establishments, number of workers etc. are included among the economic characteristics. The value figures reported for the different economic parameters are at current prices only.

3.1.2 The detailed tables on the operational and economic parameters are generated at many layer of disaggregation, such as State/UT, 'sector', 'broad activity category' (BAC), 'activity category', and 'establishments type' and attached at **Appendix A**. It is important to note that, 'sector' consists of rural and urban; whereas, 'establishment type' contains own account establishments (OAE) and Hired Worker Establishments (HWE). As per coverage of ASUSE, the different 'broad activity categories' are manufacturing, non-captive electricity generation, trade and other services. Further, there are twenty five (25) activity categories under manufacturing, five (5) activity categories under trade and fifteen (15) activity categories under different types of services other than trade under the heading 'other services'. The detailed composition of these activity categories has been placed in Annexure-I at the end of Chapter 1.

3.1.3 It is observed that the sample size for non-captive electricity generation is very small. In fact, only nine (9) samples have been found belonging to this broad activity category. Accordingly, no separate estimates are presented for this BAC. However, the contribution of non-captive electricity generation sector is included in 'total' or 'all activities'. Further, estimates of Relative Standard Errors (RSEs) are also generated for important parameters and are included in detailed tables in Appendix A. Users are advised to observe these RSEs very carefully, particularly, at the disaggregated level and interpret/use the results accordingly with due caution.

3.1.4 The State/UT-wise detailed tables presented in 'Appendix A', *inter alia*, provide the estimates of the UT of Ladakh (which was created as a UT on 31st October, 2019 by Government of India) and Jammu & Kashmir, separately. Further, the State/UT-wise summary statements, for the purpose of this Report, are considered for the 'major States' only. The 'major states' are those states whose population was more than 1 crore as per Census 2011. Further, a few states have been split after 2011 and for them both Census 2011 population and total number of FSUs are considered while deciding 'major states'. In this context, it is to mention that erstwhile Andhra Pradesh has been split into two States, *viz*., Andhra Pradesh and Telangana in 2014. Accordingly, both Andhra Pradesh and Telangana have been included in the list of 'major states', as mentioned above. Moreover, erstwhile Jammu & Kashmir also had population of more than 1 crore as per Census 2011. Hence, Jammu & Kashmir has been included in the list of 'major states' for the purpose of this chapter. However, Ladakh is excluded as it had very less number of FSUs. The list of such 'major states' is given below. It may be mentioned that, NCT of Delhi is essentially an urban state and hence, the rural part of Delhi is very small. Accordingly, the estimates pertaining to Delhi rural may suffer from reliability and hence, may be used with caution (Refer statement 1).

Major States:

- Andhra Pradesh
- Assam
- Bihar
- Chhattisgarh
- Delhi
- Gujarat
- Haryana
- Jammu & Kashmir
- Jharkhand
- Karnataka
- Kerala

3.1.5 The reference period of the estimates generated for ASUSE 2021-22 refers to the financial year (FY) 2021-22 i.e. the period from April, 2021 to March, 2022. The data has been collected for three reference periods, namely, 'last 30 days', 'last calendar month' and 'last accounting year'. However, there was option for the establishments to provide the data for 'last 30 days' or 'last calendar month' if audited books of accounts is not maintained or is not finalized at the time of survey. However, there have been a few establishments, though very small in number (less than 1%), have supplied data from books of accounts pertaining to last financial year (FY). Thus, majority of the establishments has provided '30 days' data and hence, the estimates are essentially linked to FY 2021-22.

3.1.6 In this chapter, we briefly discuss some important facts and estimates of broad operational and economic indicators from this survey. In paragraph 3.2 the Sample number of Establishments and in paragraph 3.3 the estimated number of Establishments are provided. The ownership-wise estimates are discussed in paragraph 3.4. This is essentially the information of the establishments categorised based on various types of ownership such as 'proprietary', 'partnership', SHGs, etc. The information of social group of the owner, in case of 'proprietary' establishment, or that of the major partner in case of the 'partnership' establishment are presented in paragraph 3.5. The type of location of the establishment i.e., whether the establishment is located in the household premise or is located outside the household premise is discussed in paragraph 3.6. The various operational details of the establishments such as, number of months operated, number of working hours in a normal day, whether maintaining accounts, registration status etc., are discussed in paragraph 3.7. The information of establishments who has provided manufacturing services or other services on contract basis is provided in paragraph 3.8. The paragraph 3.9 is devoted to those establishments who are engaged in 'mixed activities'. Many times an establishment carries out more than one activity- one principal or major activity, and other(s) minor activity. Information of establishments involved in such activities are discussed in paragraph 3.9. The Non-profit Institutions (NPIs) in the unincorporated sector are discussed in paragraph. 3.10. Use of computer and internet for entrepreneurial activity are highlighted in paragraph 3.11. Thereafter, the estimates of different economic aggregate parameters such as workers, female workers, Gross Value Added (GVA) are discussed in paragraphs 3.12, 3.13 and 3.14, respectively. Key ratio estimates such as annual GVA per establishment and annual GVA per worker, both pertaining to market establishments, are discussed respectively in paragraphs 3.15 and 3.16. Further, annual emoluments per hired worker are shown in paragraph 3.17. Finally, the discussion on economic parameters is completed after describing fixed assets per establishment in paragraph 3.18 and outstanding loan per establishment in paragraph 3.19. Last but not the least, paragraph 3.20, containing the estimates of Relative Standard Error (RSE) for important key parameters, is included for gauging the reliability of the estimates.

3.2 Sample number of Establishments

3.2.1 A total number of 16,356 (8,468 in rural and 7,888 in urban) first stage units (FSUs) have been selected at all-India level for ASUSE 2021-22. Out of these, 16,199 FSUs (8,425 in rural and 7,774 in urban) have been surveyed; and the total number of establishments surveyed has been 4,16,269 (2,39,981 in rural areas and 1,76,288 in urban areas). Statement 1 gives the State/UT wise count of FSUs allotted and surveyed number of establishments.

3.2.2.It is worthwhile to mention that the survey period of ASUSE 2021-22, particularly initial a few months, was severely impacted by the second wave of the pandemic and, in turn, subsequent restrictions imposed by various Governments. As a result, this has affected the overall annual aggregate estimates of ASUSE 2021-22. In this context, please refer Statement 1-1 which gives estimated number of establishments and workers by different survey periods (canvassing period), i.e., April - June, 2021, July - September, 2021, October - December, 2021 and January - March, 2022. It can be seen that the first quarter of the survey, i.e., April - June, 2021 was suffered the most due to the pandemic and yielded very less number of establishments and workers. The overall annual estimates also got affected to a great extent due to this.

3.3 Estimated number of Establishments

3.3.1 ASUSE 2021-22 gives an estimate of 5.97 crore establishments belonging to unincorporated non-agricultural sector for the financial year (FY) 2021-22 (refer to Statement 2) for different broad activity categories (BAC). Out of these 5.97 crore establishments, 3.32 crore belong to the rural sector and 2.65 crore to urban sector. This indicates that more number of unincorporated non-agricultural establishments existed in the rural economy during FY 2021-22.

3.3.3 The share of manufacturing, trade and other services to the total estimated number of establishments stands at 28.90%, 37.69% and 33.42% respectively (see Statement 3). It is trading whose share is maximum to the estimated number of establishments in both rural (35.01%) and urban (41.03%) areas.

3.3.4 In ASUSE, the selected establishment may either be Own Account Establishment (OAE) or Hired Worker Establishment (HWE). It is found that, 5.13 crore establishments out of estimated 5.97 crore are OAEs. The OAEs, as mentioned before, are those establishments which have not employed at least one hired worker on a fairly regular basis. In fact, only 84 lakh establishments have been estimated as HWE. Further, most of the selected OAEs and HWEs are observed to be engaged primarily in trading.

3.3.5 Statements 4R, 4U and 4ALL give the top three (3) activity categories under respective BACs for ‘rural’, ‘urban’ and ‘combined rural and urban’, separately. It is clearly seen that, ‘Other retail trade’ (T5) and ‘Manufacture of wearing apparel’ (M6) are the top two (2) activity categories in terms of their contribution to the total number of establishments for rural, urban, and also combined rural and urban in ASUSE 2021-22. In rural areas, about 67% of the manufacturing establishments (i.e., those establishments producing goods) are engaged in the activities of manufacturing textile (M5), wearing apparel (M6) and tobacco products (M4); whereas in the urban, the major three manufacturing activities are activities of manufacturing of textile (M5), wearing apparel (M6) and food products (M2) with share of about 65% in terms of ‘number of establishments’. Among the establishment engaged in trading activities, the proportion of establishment engaged in the activity of ‘other retail trade’ (T5) is the highest in both rural (93%) and urban areas (84%). However, among the all types of activities, the proportion of establishment engaged in ‘other retail trade’ (T5) is the maximum in both rural (33%) and urban (34%).

3.3.7 The statements 6R, 6U and 6ALL give the position of top 3 State/UTs having the most number of unincorporated non-agricultural establishments across different combinations of sector, BAC and establishment type. Uttar Pradesh (14.66%), West Bengal (14.17%) and Bihar (7.18%) are the top 3 states in rural sector in terms of estimated number of establishments; whereas in urban sector it is Maharashtra (11.81%), Uttar Pradesh (10.90%) and West Bengal (9.99%) that tops the list. Again, for 'rural and urban combined', Uttar Pradesh (12.99%), West Bengal (12.31%) and Maharashtra (8.81%) have reported most number of unincorporated non-agricultural establishments during FY 2021-22.

3.3.8 Maximum number of HWEs, during FY 2021-22, has been observed in Maharashtra (13.29%). At the same time, Uttar Pradesh comprises of 13.46% of the total OAEs, thereby producing the most number of unincorporated non-agricultural OAEs in the country during the period April, 2021 to March, 2022. Uttar Pradesh further continues to top the list of having maximum number of establishments belonging to 'trade' (15.87%) and 'other services sector' (11.91%). However, it is West Bengal (16.56%) that has maximum number of manufacturing establishments during FY 2021-22.

3.4 Type of Ownership

3.4.1 ASUSE is an establishment survey. Different types of ownerships captured in this survey are proprietary (male/female/transgender), partnership with members of the same household, partnership between members not all from the same household, Self-help groups, society/trust/club/association/ body of individuals/ membership organizations, co-operatives and others. Statement 7 gives the per 1000 distribution of establishments by type of ownership for different establishment types at all-India level.

3.4.2 It is evident that majority of the establishments in the unincorporated non-agricultural sector has been proprietary concerns during FY 2021-22 in both rural and urban economy. Overall, about 95% of the total establishments are proprietary. The participation of SHGs, through financial intermediation, are to the tune of 3% of total establishments.

3.4.4 The per 1000 distribution of establishments by type of ownership for major states is shown in Statement 8. This statement also shows that most of the establishments are proprietary across the State/UTs. In fact, barring only a few, the percentage share of proprietary establishments is more than 90% for all the State/UTs. Among the partnership establishments, the predominant prevalence is observed in Kerala followed by Gujarat among the major states. Further, it can be observed that Andhra Pradesh and Odisha are the States where more than 10% of the total unincorporated non-agricultural establishments are Self Help Groups (SHG).

3.4.5 A significant portion of unincorporated non-agricultural establishments is home-based and some of which may be headed by a female entrepreneur. It is important to observe the participation of female as owner of the establishment in the unincorporated economy. Statement 9, providing share of female headed establishments among the proprietary concerns across different BACs for the major states, have been generated for this purpose.

3.4.6 It is noticed that there are as many as 4 major States such as, Telangana (44.26%), West Bengal (31.72%), Andhra Pradesh (31.29%) and Karnataka (29.93%) where about 30% of the proprietary establishments have been run by female entrepreneurs during FY 2021-22. Moreover, in case of manufacturing, the percentage share of female headed proprietary establishments is more than 50% not only at all-India level but also for 11 different States out of 21 major States.

3.5 Social Group of Owners

3.5.1 Social group of owners of the establishments i.e. of proprietors (in case of proprietary concerns) and major partner (in case partnership concerns) have been collected in ASUSE 2021-22. 'Major partner' in case of partnership establishments is the major working owner. The criterion for determining 'major' has been the partner getting maximum share of the profit of the establishment, or bearing the maximum part of the loss. If all the partners share the profit/ loss of the establishment equally, the partner taking major decisions of the establishment is treated as the major partner. If the decisions are taken collectively, major partner is considered as the senior most partner by age. Statement 10 gives the per 1000 distribution of proprietary and partnership establishments by social group of owner/ major partner for each sector and establishment type.

The same trend is also noticeable across sector and establishment type.

3.6 Type of Location

3.6.1 Establishments belonging to unincorporated sector, tend to have different types of location for operating their businesses. Some establishments operate in the concerned household premise; whereas others tend to operate in a fixed premise which is outside the household. It is also very common for certain establishments (such as street vendors, rickshaw pullers, auto/taxi drivers etc.) to carry out their activities even without any fixed premises. Per 1000 distribution of establishments over these varied types of locations for different sectors and establishment type at all-India level is given in Statement 12. Per 1000 distribution of establishments by type of location at all-India level for different sectors is pictorially depicted in Figure 2.

3.6.2 Statement 12 reveals that overall about 42% of the total unincorporated establishments have operated within household premises during April, 2021- March, 2022; whereas about 44% establishments have been located outside household premises but they have operated on a fixed premise through permanent/temporary/without any structure.

3.6.3 About 82% of HWEs are located on a permanent structure outside household premise; whereas majority (about 47%) of the OAEs are home based. The percentage of HWEs, carrying out their operations on a permanent structure outside household premise, are 70.5% and 86.9% respectively in the rural and urban economy.

Figure 2: Per 1000 distribution of establishments by type of location (all-India)

3.6.4 The per 1000 distribution of establishments by type of location and sector for major States is given in Statement 13. It may be noted that during FY 2021-22, 37.6% of the unincorporated establishments in rural Andhra Pradesh has operated without any fixed premise, whereas home-based rural establishments (i.e., located within household premises) is highest in Telangana (73%) followed by Madhya Pradesh (71%) and Chhattisgarh (65%); whereas in urban sector there is a tendency of the unincorporated non-agricultural establishments to operate on a fixed premise across the State/UTs. In urban, the proportion of establishments operated in fixed premises but outside household is 55.9% at all-India level. However, this proportion varies from 40% to 78% in different major states of urban areas. In fact, 13 major states have more than all-India proportion of 55.9% in urban.

3.7 Operational Details of the Establishments

3.7.1 Various operational details of the unincorporated non-agricultural establishments such as, number of months operated during last 365 days, number of working hours in a normal day during the reference month, whether maintaining accounts, registration status etc., are captured in ASUSE. Per 1000 distribution of establishments by number of months operated during the last 365 days and by working hours in a normal day during the reference month for each sector and type of establishment are given respectively in Statement 14 and Statement 15.

3.7.2 From Statement 14, it is evident that 80% of the overall establishments have operated at least 9 months during the last 365 days. The corresponding percentages of establishments operating for at least 9 months during the last 365 days in rural and urban sector were 82.7% and 77.3% respectively. These are basically the perennial establishments which normally operate throughout the year. In addition to that, there are other seasonal and casual establishments also which operate during a fixed season or rather casually. Overall, there were only 1% establishments which have operated for less than three months during the last 365 days.

3.7.3 It is clear from Statement 15 that about 54% of the establishments has worked 8-11 hours daily during the reference period pertaining to FY 2021-22. In fact, most of the HWEs operated 8-11 hours daily in both rural and urban sector. It is interesting to note that there are about 10% establishments in rural and 6% in urban sector, which have run for less than 3 hours daily to manage their business.

3.7.4 Further, Statement 16 is generated to depict the per 1000 distribution of establishments maintaining accounts by sector and type of establishments. In this context, it is pertinent to mention that an establishment is treated as maintaining accounts only if it has audited or auditable accounts. As normally can be expected, majority (91.3% to be exact) of the unincorporated establishments do not maintain any audited accounts. The tendency of not maintaining audited accounts is much more glaring in respect of OAEs rather than HWEs. In fact, 19.1% of the rural HWEs, 30.4% of urban HWEs and 27.3% of overall HWEs maintain accounts. The data could be collected from the books of accounts in respect of only less than 1% of the total establishments.

3.7.5 Registration under different acts/authorities, which are numerous in count, for unincorporated establishments is not only an important aspect of maintaining administrative records for the Government but also essential for the establishments for availing of benefits under different Government schemes. ASUSE captures information regarding status of registration in respect of the surveyed establishments under various acts (such as, Shops & establishment Act, Indian trust Act 1882 (incl. State Public Trust Act), Societies Registration Act, 1860, Co-operative Societies Act, 1912, GST Act, etc.) and authorities (such as, Food safety and Standard Authority, Employee PF Organization, Employee State Insurance Corporation, State Directorate of Industries, Regional Transport Office, etc.). Percentage of establishments over registration under different acts/authorities for each BAC at all-India level is given in Statement 17.

3.7.6 It is worthwhile to mention that an establishment could be registered under more than one acts/authorities simultaneously. Hence, the sum total of all the categories of registration in Table 31 and 32 of Appendix A may not necessarily be 1000 always.

3.7.7 It is quite revealing that about 71% of the estimated establishments during ASUSE 2021-22 in the unincorporated sector are not registered under any acts/authorities at all. The phenomenon of non-registration is quite high in the rural sector (particularly, in manufacturing and trade) and in the urban sector (particularly, in manufacturing).

3.8 Establishments providing Manufacturing services/Other services on Contract

3.8.1 Providing manufacturing services or other services on contract is a common phenomenon among the unincorporated non-agricultural establishments. . In such cases, the service provided by the establishment on contract is consumed by other establishments or other households. Statement 18 gives the percentage of establishments which undertook contract work of providing manufacturing services/other services during FY 2021-22 by establishment type and sector.

3.8.2 It is noticeable that about 30% of the overall establishments have provided services on contract. It is mostly the manufacturing establishments that are providing services on contract. Accordingly, Statement 19 is given below to highlight the activity categories, under manufacturing sector, which provides most of the manufacturing services on contract.

3.8.3 Perusal of Statement 19 reveals that at all-India level, high percentage of establishments providing manufacturing services on contract has been observed in respect of 'manufacture of tobacco products' (M4) (87.10%), 'manufacture of textiles' (M5) (65.10%), 'manufacture of machinery and equipment n.e.c.' (M20) (55.30%) and 'manufacture of paper and paper products' (M9) (53.70%). It is mostly the OAEs under these activity categories that provided manufacturing services on contract.

3.9 Establishments engaged in Mixed Activities

3.9.1 Because of inherent uncertainty in the unincorporated sector, establishments in this sector tend to engage in multiple activities to survive. The cases, where establishments cannot bifurcate accounts pertaining to multiple activities carried out by them, are treated as establishments engaged in mixed activities. In this context, it is pertinent to mention that activities, that are different at National Industrial Classification (NIC)-2008 2-digit level, are treated as separate activities for the purpose of the survey.

3.9.2 Statement 20 shows the per 1000 distribution of establishments pursuing mixed activities in each broad activity category and sector. It may be seen that, only 2.81% of the total establishments has been engaged in mixed activities during FY 2021-22. Among the BACs, it is the 'other services' where percentage of establishments engaged in mixed activities is the highest (3.36%).

3.9.3 The tendency for pursuing mixed activities is more among the OAEs rather than HWEs, as close to 83% of the establishments pursuing mixed activities are OAEs. This fact is well captured that OAEs, which are run mostly by the lone entrepreneur himself/herself, are engaged in multiple activities, but fails to maintain separate accounts; hence, ends up with involving in mixed activities. Further, the percentage of OAEs pursuing mixed activities is more in rural areas compared to urban areas.

3.10 Non-profit Institutions (NPIs) in the unincorporated sector

3.10.1 Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate surpluses. NPIs are principally non-market producers i.e. they sell their output at economically non-significant price; but there may be NPIs who may engage in market production also.

3.10.2 Statement 21 is presented to show the number of NPIs by type of major receipts and non-NPIs per 1000 of establishments in each broad activity category and sector. As is clearly evident, 99.3% of the overall estimated unincorporated non-agricultural establishments are non-NPIs. The same fact is also noticeable across the BACs and sector.

3.10.3 It is worthwhile to mention that, NPIs have been observed (although very few in number) during the conduct of ASUSE 2021-22, whose major receipt is not from grants/donations; but from other sources.

3.11 Use of Computer and Internet in the unincorporated sector

3.11.1 Use of modern technology through computer and/or internet is considered to be a major focus area for this sector. It is required for various activities ranging from managing the business more efficiently to sales expansion and improved visibility in digital platforms. It is seen that only about 14% of the total establishments has used internet for the purpose of entrepreneurial activities during FY 2021-22. Statement 22A and 22B have been given to show the degree of usage of computer and internet among these establishments for the purpose of entrepreneurial activities.

3.11.2 It is evident from Statement 22A that 22.1% of HWEs have used computer considering both rural and urban, whereas the corresponding figure for OAE is 2.8% which have used computer for business purposes during FY 2021-22. The percentage of HWEs using computer for business purposes is 10.9 in manufacturing, 22.1 in trade and 29.1 in other services. The OAEs, though very small in size, have used computer for business purposes. The percentage of OAEs using computer for business purposes is 0.4 in manufacturing, 1.8 in trade and 5.9 in other services. Further, the percentage of establishments using computer for business purposes is more in urban than its rural counterpart regardless of broad activity category and establishment type.

The percentage of HWEs using internet for entrepreneurial purposes is 25.2 in manufacturing, 37.3 in trade and 41.2 in other services. The percentage of OAEs using internet for entrepreneurial purposes is 5.5 in manufacturing, 10.3 in trade and 14.3 in other services. Figure 3 : Percentage share of broad activity categories to the estimated number of workers (all-India)

3.12.4 Statements 25R, 25U and 25All may be seen to ascertain the top three activity categories having highest share of workers under each broad activity categories. From these statements it is evident that, 'other retail trade' (T5) singly generated about one-third share of total employment in the unincorporated non-agricultural sector during FY 2021-22 at rural, urban and also at all-India level. It is followed by 'manufacture of wearing apparel' (M6) (8.26%) and 'other community, social and personal service activities'(S15) (7.26%) overall. Further, the proportion of workers, at all-India level, found to be maximum in 'other retail trade' (T5) among the HWEs (21.23%) as well as OAEs (37.19%).

3.12.5 From Statement 25All, it is observed that percentage share of workers in unincorporated manufacturing sector is maximum in the activity of 'manufacture of wearing apparel' (M6) (28.94%). It is also found that the share of workers in the activity of 'manufacture of wearing apparel' is highest (among those who pursue manufacturing activity) in both HWEs as well as OAEs. The corresponding figures for HWEs is 17.18% and that for OAEs is 34.46%. Among the establishments which are engaged in trading activity, the percentage share of workers is highest in 'other retail trade' (T5) for both HWEs as well as OAEs. The figures of share of 'other retail trade' in trading activity for HWEs is 64.37% and that for OAEs is 92.40%. Besides, the contribution of 'land transport'(S3) (7.04%) and 'food and accommodation service activities'(S2) (7.52%) are noteworthy in generation of employment at rural and urban economy respectively.

3.12.6 Statement 26 provides the percentage share of the major states to the total employment. It is supplemented by Statements 27R, 27U and 27All which identifies the top 3 State/UTs under each BAC in providing employment. It is revealed that Uttar Pradesh (13.38%), West Bengal (10.49%) and Maharashtra (10.09%) have been the top three States in terms of providing employment at all-India level. Uttar Pradesh again continues to be the top in terms of having workers in respect of trade (15.19%) and other services (12.49%). However, West Bengal generated most employment in manufacturing sector (14.31%).

3.12.7 The top States producing employment in respect of HWEs are Maharashtra (13.30%), Tamil Nadu (10.96%) and Uttar Pradesh (10.72%). However, in case of OAEs it is found that Uttar Pradesh (14.84%), West Bengal (12.21%) and Maharashtra (8.34%) are the states which have most number of working owners who are basically treated as workers of the OAEs (see Statement 27R, Statement 27U, Statement 27ALL for rural, urban, and both rural and urban combined).

3.14 Estimated Gross Value Added (GVA) (Market establishments)

3.14.1 Gross Value Added (GVA) is one of the key measures to evaluate the performance of any sector of an economy. The GVA has been estimated for unincorporated non-agricultural sector from ASUSE 2021-22. Although the data was collected for different reference periods, *viz*. 'last 30 days', 'last accounting year', etc., by GVA we mean annual GVA which is in current prices. Statement 32 is generated below to display the percentage share of broad activity categories in total GVA by sector and establishment type. In this context, it is pertinent to mention that GVA has been compiled for market establishments belonging to unincorporated non-agricultural sector, which comprises of more than 99% of total establishments. 'GVA at basic price' has been calculated for all the establishments. GVA is defined as total output *minus* total input. Here, while computing 'Output' all the relevant receipts (including trade margin) *less* taxes on products and distributive expenses have been considered; whereas while computing 'input' all the relevant expenses incurred are considered.

3.14.2 The pie chart given in Figure 4 pictorially represents the contribution of the BACs in the overall GVA of unincorporated non-agricultural economy. Statement 32 reveals that trading has provided maximum value addition in the overall GVA at urban (46.38%) and all-India (43.16%) level for the unincorporated non-agricultural sector in ASUSE 2021-22; However, in rural area, highest share has come from other services (39.47%). More or less, about one-fifth of the total GVA has come from manufacturing across the sectors; the respective percentage share for rural, urban and combined being 23.18%, 19.32% and 20.70% respectively.

Figure 4 : Percentage share of broad activity categories to estimated GVA(market establishments) (all-India)

3.14.3 The top 3 activity categories generating maximum share of GVA under respective BACs across sector and establishment type are given in Statements 33R, 33U and 33All. At all-India level, 'other retail trade' (T5) (32.70%), 'education' (S13) (7.52%) and 'other wholesale trade' (T4) (6.21%) have registered maximum value addition, consuming about 46% of overall GVA. On the other hand, 'manufacture of wearing apparel' (M6) (20.77%), 'other retail trade' (T5) (75.77%) and 'education' (S13) (20.80%) generated most value addition for the concerned BACs *viz.* Manufacturing, trade and

other services respectively. In addition to that the role of 'land transport' (S3) (9.48%) in rural area and 'food and accommodation service activities' (S2) (6.28%) in urban area are worth mentioning for their decent contribution to GVA in the respective sector.

3.14.4 The percentage share of major states in the GVA for rural and urban, and also for each establishment type is shown at Statement 34 below. Further, the top 3 major states (in terms of GVA) under each BAC for rural, urban and combined sectors, along with the corresponding shares, are given in Statement 35R, 35U and 35All respectively. From there it can be seen that Maharashtra (11.69%), Uttar Pradesh (10.23%) and Gujarat (8.53%) together have contributed about one-third of overall GVA and by virtue of that, happens to be the top 3 GVA producing states during FY 2021-22. While Maharashtra continues its top position for providing maximum value addition in trade (11.46%) and other services (12.40%), it is Gujarat (14.76%) which has been the top producer of GVA in unincorporated manufacturing.

3.14.5 The top 3 states producing maximum GVA, during FY 2021-22, in urban area are Maharashtra (13.97%), Gujarat (10.86%) and Tamil Nadu (9.87%). However, Uttar Pradesh (13.13%), West Bengal (10.49%) and Rajasthan (9.98%) have been the top states in terms of the most value addition in rural non-agricultural economy pertaining to unincorporated sector.

3.14.6 It may be mentioned that unincorporated financial sector is covered in ASUSE survey. Hence, it may be important to adjust the financial sector output by a reference rate for Financial Intermediation Services Indirectly Measured (FISIM), preferably at a macro level. Moreover, it is understood that there may be different approach for selecting reference rates and thus, there is an element of subjectivity in it. Accordingly, the financial sector output, *vis-à-vis*, GVA is not adjusted by any reference rate in this report. Users may apply their discretion and judgement while applying reference rate on the financial sector output. However, it is worth mentioning that monthly average savings deposit rate for scheduled commercial banks, as given by Reserve Bank of India (RBI), pertaining to the reference period of ASUSE 2021-22 may be a reasonable choice. As matter of fact, as per RBI, the monthly average savings deposit rate for schedules commercial banks for FY 2021-22 stands at 2.85%.

3.15 Annual Gross Value Added (GVA) per Establishment (Market establishments)

3.15.1 Annual Gross Value Added (GVA) per establishment has also been calculated for market establishments.

3.15.2 Annual GVA per establishment figures are available for activity category-wise (vis-à-vis broad activity category-wise) at different combinations of sector and establishment type in Table 48 and for State/UT-wise values at different combinations of Broad Activity Category (BAC), sector and at establishment type in Table 49 of Appendix A.

3.15.3 Statement 36, given below, provides the GVA per establishment (in Rs.) by broad activity category, establishment type and sector. Perusal of Statement 36 brings out that, GVA per establishment, on average, at all-India level during FY 2021-22 has been Rs. 2,25,362. Expectedly, this figure is quite high for HWEs (Rs. 8,86,112) as compared to OAEs (Rs. 1,18,415). There is noticeable difference in producing value addition by a market establishment in urban sector (Rs. 3,26,480) in comparison to rural sector (Rs. 1,44,570).

3.15.4 Statement 37R, 37U and 37All are generated to display the top 3 activity categories under each BACs for different sectors and establishment types. It may be seen that 'warehousing and storage' (S5) has recorded maximum annual GVA per establishment in rural as well as at all-India level during FY 2021-22 in the unincorporated non-agricultural sector. The per establishment value addition, for urban sector, happens to be maximum in respect of 'manufacture of machinery and equipment n.e.c.' (M20).

3.17 Annual Emoluments per Hired Worker

3.17.1 Unincorporated sector is an important domain for employment generation and its contribution to overall labour force is significant. A hired worker employed in the unincorporated sector may be formal or informal depending on the conditions of employment. A formal hired worker is one who is eligible for paid leave and also eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. An informal hired worker is not eligible for paid leave and/or not eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. On the other hand, compensation consists of salary/wages, bonus, different allowances like dearness, house-rent, over-time, shift etc. paid in cash or kind and other type of payments like canteen facility, health care facility, recreation club facility, etc. some of which are normally paid in kind. Further, employer's contribution to ESIC fund, provident fund, and other social security benefits, etc. are also considered as part of compensation.

3.17.2 As per Statement 42, annual emoluments paid, on average, to a hired worker has been Rs. 1,26,647 during FY 2021-22. The emoluments paid per hired worker annually in those HWEs is more in urban area (Rs. 1,30,073) than rural area (Rs. 1,18,457). Among the different BACs, 'other services' has been the most remunerative for hired workers (engaged in HWEs) across the sectors generating Rs. 1,41,273, Rs. 1,46,831 and Rs. 1,45,017 for rural, urban and combined respectively. It is also noteworthy, that trade and manufacturing have produced more or less similar amount of remuneration to the hired workers deployed in HWEs.

3.17.3 Among the activity categories, as evident from Statement 43, 'manufacture of coke and refined petroleum products' (M11) has paid the most emoluments per hired workers at urban and at all-India level. In rural sector, 'education' (S13) has reported maximum income to the hired workers. On the other hand, 'wholesale and retail trade of motor vehicles and motor cycles' (T1) in trade and 'human health and social work activities' (S14) in other services have the maximum emoluments per hired worker.

3.18 Fixed Assets per Establishment

3.18.1 Role of assets, particularly fixed assets, is vital in any production process generating goods or services. The case of unincorporated sector is of no exception. In the absence of proper records in most of the cases, it is always a challenging task to capture market price of various fixed assets such as building, plant & machinery, transport equipment, furniture & fixture, software & database, ICT equipment, tools etc. used for entrepreneurial purpose in ASUSE survey. Now, the establishments may own or hire fixed assets for carrying out their economic activities. This section is devoted to

owned fixed assets only. However, detailed tables are included in Appendix A for hired fixed assets also.

3.18.2 Value figures presented in this report for fixed assets are based on market values. Statement 45 provides the figures on owned fixed assets per establishment for each BAC across different sector and establishment type. This shows that, unincorporated establishments, on average, have owned Rs. 2,81,013 worth of fixed assets per establishment during FY 2021-22. As one can expect, the fixed assets per establishment for HWEs has come out to be much higher at Rs. 10,49,020 as compared to the OAEs which stand at Rs. 1,54,419.

Activities like 'accommodation' (S1) (Rs. 60,944,69), 'warehousing and storage' (S5) (Rs. 22,87,077), that requires good amount of fixed assets for their basic operation, have been found at the top at all-India level considering all the activities during ASUSE 2021-22.The toppers for this indicator in rural and urban area are S5 (Rs. 53,90,381) and S1 (Rs. 67,13,361) respectively.

3.19 Outstanding Loans per Establishment

3.19.1 Any entrepreneurial activity requires financial capital both for asset formation and day to day activities. In order to have the requisite financial capital, the establishments generally avail loans from different institutions and individuals. The same applies for establishments in unincorporated sector also. However, it may be very challenging for unincorporated establishments, particularly the OAEs (which has happened to be the majority during FY 2021-22), to avail loans from different institutions.
3.19.2 Statement 48 gives the BAC wise outstanding loan per establishment by sector and establishment type. Outstanding loan per establishment, on average, appears to be Rs. 37,408 at all-India level during FY 2021-22. Notable fact is that, outstanding loan per establishment for HWEs (Rs. 1,85,342) is close to 5-times higher than the corresponding all-India figure. Among the BACs, the establishments engaged in 'other services' have highest value of outstanding loans per establishment (Rs. 66,115) followed by trade (Rs. 31,099) and manufacturing (Rs. 12,436).

3.19.3 The top 3 major states having maximum outstanding loans per establishment have been given by BAC and establishment type for the different sectors separately at Statements 49R, 49U and 49All. A close look at these statements reveal that, overall Kerala (Rs. 1,59,171), Rajasthan (1,58,530) and Tamil Nadu (82,704) are the states among the major ones which reported the maximum outstanding

loan per establishment during FY 2021-22 as per as the unincorporated non-agricultural sector is concerned. BAC-wise, Kerala in manufacturing (Rs. 52,548) and trade (Rs. 2,87,606) and Rajasthan (Rs. 5,55,184) in other services have maximum outstanding loan of per establishment.

3.20 Relative Standard Error (RSE)

3.20.1 Relative Standard Error (RSE) is a very useful indicator about the reliability of estimates generated from any sample survey. In case of ASUSE 2021-22, RSEs are generated for a number of important parameters both for aggregate and ratio. The RSEs for this survey are based on all the surveyed units excluding the out of coverage establishments which are very few in number.

3.20.2 The RSEs of estimated number of establishments, workers, GVA per worker (for market establishments) and GVA per establishments (market establishments) for the major State/UTs is presented in Statement 50. The estimates of RSE of 'estimated number of establishment', 'worker', 'GVA per worker', 'GVA per establishment' at all-India combining both rural and urban areas comprising of all activities are found to be 3.80%, 3.16%, 1.69%, and 2.57%, respectively. Further, the estimates of RSEs for different major States in rural and urban areas, as presented below, seems to be reasonable.

Statement 50: Estimated RSEs of selected parameters for different sectors pertaining to major states

Note on Sampling Design and Estimation Procedure

1.1 **Introduction:** NSSO conducted the first full-fledged survey of ASUSE i.e. ASUSE 2021-22 during April, 2021- March, 2022. In this context, it is pertinent to mention that the first full-fledged annual survey was planned to be conducted during April, 2020 – March, 2021. However, due to the pandemic the survey could not be launched during Financial Year 2020-21 and could only be initiated from April, 2021.

1.2 Survey Period:

1.2.1 The period of survey of ASUSE 2021-22 was April, 2021- March, 2022. Initially, the survey has been planned to be conducted through four sub-rounds as follows:

sub-round 1 :	April - June 2021
sub-round 2 :	July - September 2021
sub-round 3 :	October - December 2021
sub-round 4 :	January - March 2022

1.2.2 However, the second wave of the pandemic had stalled the field work of the initial phase of ASUSE 2021-22 in many States. Subsequently, the sub-round restriction of ASUSE 2021-22 was waived and necessary adjustments of weights have been made.

1.3 Schedules of Enquiry:

1.3.1 Following schedules of enquiry were canvassed:

Schedule LSU : list of households and non-agricultural establishments

Schedule ESU : establishment schedule

1.4 Sampling Frame:

1.4.1 Census 2011 list of villages was used as the sampling frame for rural areas. Auxiliary information such as number of workers, etc. available from Sixth EC frame was used for stratification, sub-stratification and selection of FSUs, for rural areas (except Kerala).

In rural areas of Kerala, list of Panchayat Wards as per Census 2011was used as sampling frame.

For all urban areas, the latest updated list of UFS blocks was used as the sampling frame.

1.5 Sampling Design:

1.5.1 A stratified multi-stage design was adopted for ASUSE 2021-22.

Rural sector: The first stage units (FSU) were the census villages in the rural sector. For rural part of Kerala, Panchayat wards were taken as FSUs.

Urban sector: The first stage units (FSU) were the latest updated UFS (Urban Frame Survey) blocks.

The ultimate stage units (USU) were establishments for both the sectors. In the case of large FSUs, one intermediate stage of sampling was the selection of three hamlet-groups (hg's)/sub-blocks (sb's) from each large FSU.

1.5.2 **Stratification of FSUs**:

A. Rural sector: (a) A special stratum, in the rural areas only, was formed at all-India level before the strata are formed within each State/UT. This stratum comprised of all the villages as per Census 2011 where no workers were found under survey coverage; and (b) The remaining villages within each NSS State region constituted a rural stratum.

B. Urban sector: In urban areas strata was demarcated within each NSS State region on the basis of size class of towns as per Census 2011. The tentative stratum numbers and their composition (within each NSS State region) are as follows:

stratum 1 :	all towns with population less than 50,000
stratum 2 :	all towns with population 50,000 or more but less than 3 lakhs
stratum 3 :	all towns with population 3 lakhs or more but less than 10 lakhs
stratum 4, 5, 6,... :	each city with population 10 lakhs or more

1.5.3 **Sub-stratification of FSUs**:

A1. Rural sector (Except Kerala): Four groups of villages were formed within each stratum, except special rural stratum as mentioned in para 1.5.2(a):

Group 1: all villages with at least one establishment appearing in the EC list frame used for service sector enterprises in NSS 74th round. The enterprises which could not be surveyed during canvassing of 74th round were excluded.

Group 2: out of the remaining, all villages with less than or equal to 10 workers under survey coverage as per EC-6.

Group 3: out of the remaining, all villages with 500 or more workers under survey coverage as per EC-6.

Group 4: remaining villages

The sample size for a rural stratum was allocated among 4 groups in proportion to number of workers in the group. Let r_1, r_2, r_3 and r_4 be the allocations to Group 1, Group 2, Group 3 and Group 4 respectively. The villages within each group were first arranged in ascending order of number of workers. For the four groups within each strata, '$r_1/2$'>1, '$r_2/2$'>1, '$r_3/2$'>1 or '$r_4/2$'>1 will imply formation of 2 or more sub-strata in a group. Sub-strata were demarcated in Group 1, Group 2, Group 3 and Group 4 respectively in such a way that each sub-stratum will comprise a group of villages of the arranged frame and have more or less equal number of workers.

A2. Rural sector (Kerala): If 'r' be the sample size allocated for a rural stratum, 'r/2' sub-strata were formed in that stratum. The panchayat wards within a stratum (NSS State region) as per frame were first arranged in ascending order of population as per census 2011. Then sub-strata 1 to 'r/2' were demarcated in such a way that each sub-stratum will comprise a group of Panchayat wards of the arranged frame and have more or less equal population.

A3. Urban Sector: For each stratum, there were two sub-strata based on the information as available from the latest available UFS blocks as follows:

sub-stratum 1: UFS blocks identified as Bazaar area (BA)/ Industrial area (IA)/ Hospital area (HA)/ Slum area (SA) which are likely to contain relatively higher number of establishments.
sub-stratum 2: remaining UFS blocks of the stratum

1.6 Sample Size and its allocation:

1.6.1 ASUSE 2021-22 was conducted following multi-stage stratified sampling where first stage units (FSUs) were 16,356 (8,468 in rural and 7,888 in urban).

1.6.2 **Allocation of total sample to States and UTs:** All-India sample size (FSUs) was allocated to different State/UTs in proportion to total number of non-agricultural workers under coverage as per EC-6. Total allocation and number of FSUs surveyed in earlier rounds were also taken into consideration.

1.6.3 **Allocation of State/UT level sample to rural and urban sectors:** State/UT sample sizes were allocated to rural and urban sectors of the State/UT in proportion to number of non-agricultural workers under coverage as per EC-6. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) were allocated to each State/UT.

1.6.4 **Allocation to strata:** Stratum allocations of State/UT for each sector was made in proportion to number of non-agricultural workers under coverage as per EC-6. Stratum level allocation were adjusted to multiples of 4.

1.6.5For special stratum formed at all-India level, as mentioned in para 1.5.2, 4 FSUs were allocated.

1.6.6 **Allocation to sub-strata:** Allocation was 4 for each sub-stratum in the rural/urban sector. However, the restrictions were waived in special cases, especially in the States of North Eastern Region.

1.7 **Selection of FSUs:** From each stratum/sub-stratum, required number of sample FSUs were selected by SRSWOR scheme.

Estimation Procedure

1 **Notations:**

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

i = subscript for i-th FSU [village/ block]

d = subscript for a segment (d = 1, 2, 9)

j = subscript for j-th second stage stratum in an FSU/ segment (j=1, 2, 3 ....., 18)

k = subscript for k-th sample establishment under a particular second stage stratum within an FSU/ segment

D = total number of hg's/ sb's formed in the sample FSU

D* = 0 if D = 1

= (D – 1)/2 for FSUs with D > 1

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum

E = total number of establishments listed in a second-stage stratum of an FSU / segment of sample FSU

e = number of establishments surveyed in a second-stage stratum of an FSU / segment of sample FSU (excluding casualty establishments)

x, y = observed value of characteristics *x*, *y* under estimation

$\hat{X}$, $\hat{Y}$ = estimate of population total X, Y for the characteristics *x*, *y*

Under the above symbols,

Y_{stidjk} = observed value of the characteristic y for the k-th establishment in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

2 **Formulae for Estimation of Aggregates for a particular stratum × sub-stratum:**

2.1 **Schedule LSU[1]: :**

Rural/Urban

(i) For estimating the number of establishments in a stratum × sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n}\sum_{i=1}^{n}\left[y_{i9} + y_{i1} + D_i^* \times y_{i2} \right]$$

where y_{i9}, y_{i1}, y_{i2} were the total number of establishments possessing the characteristic *y* in segments 9, 1 & 2 of the i-th FSU respectively.

2.2 **Schedule ESU:**

2.2.1 **Rural/Urban**:

Estimation formula for a sub-stratum of a State/UT:

(i) For establishments selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j}\sum_{i=1}^{n_j}\left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected establishments:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: For segment 9, an adjustment may be necessary if E ≠ e for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) in the above formulae may be replaced by $\frac{E_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$, where E_{i9j} = (number of establishments in the frame of segment 9 for j-th SSS of i-th FSU as per column (4) of Block

[1]LSU is the listing Schedule containing the list of establishments which was used as frame for 2nd stage stratification and selection of establishments.

6a of Schedule LSU) and e_{i9j} = (number of establishments actually surveyed for segment 9 of j-th SSS of i-th FSU as per column (6) of Block 6a of Schedule LSU)

$E_{i9j} = e_{i9j}$, if there was no casualty.

3 **Overall Estimate for Aggregates for a stratum**:

Overall estimate for a stratum ($\hat{Y}_s$) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4 **Overall Estimate of Aggregates at State/UT/all-India level**:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

5 **Estimates of Ratios**:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level.

Then the combined ratio estimate $(\hat{R})$ of the ratio $(R = \frac{Y}{X})$ is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

6 **Estimation of Errors**:

6.1 **Formula for estimated variance (for Rural/Urban)**:

6.1.1 The sampling scheme in ASUSE 2021-22 is SRSWOR. However, if the sampling fraction is small, then the difference between variance estimates using the SRSWR and SRSWOR becomes negligible. In such case, samples can be treated as drawn with SRSWR and variance estimates becomes simpler in form and easy to calculate. It has been observed that overall sampling fraction is quite low in the current situation and hence there is not much loss in accuracy of variance estimates if SRSWR is assumed.

With this view, formulae for estimates of variances are given below based on SRSWR scheme.

(a) **Formula for aggregate $\hat{Y}$ (for Rural/Urban)**:

$$\hat{Var}(\hat{Y}) = \sum_s \hat{Var}(\hat{Y}_s) = \sum_s \sum_t \hat{Var}(\hat{Y}_{st})$$

$$\hat{Var}(\hat{Y}_{st}) = \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} (N_{st}\hat{Y}_{sti} - \hat{Y}_{st})^2$$

(b) **Formula for ratio $\hat{R}$ (for Rural/Urban)**:

$$\hat{MSE}(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t \hat{MSE}st(\hat{R})$$

$$\hat{MSE}_{st}(\hat{R}) = \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[N_{st}(\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2,$$

where $N_{st}\hat{Y}_{sti} = \sum_j \sum_k y_{stijk} \times n_{st} \times multiplier,$

$$N_{st}\hat{X}_{sti} = \sum_j \sum_k x_{stijk} \times n_{st} \times multiplier$$

in the formula in (a) and (b) above.

Multiplier is as given in the table in para 7.

6.2 **Estimates of Relative Standard Error (RSE)**:

$$\hat{RSE}\left(\hat{Y}\right) = \frac{\sqrt{\hat{Var}\left(\hat{Y}\right)}}{\hat{Y}} \times 100$$

$$\hat{RSE}\left(\hat{R}\right) = \frac{\sqrt{\hat{MSE}\left(\hat{R}\right)}}{\hat{R}} \times 100$$

7. **Multipliers**:

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a schedule type are given below:

sch type	sector	formula for multipliers		
		segment 9	segment 1	segment 2
LSU	rural/ urban	$\frac{N_{st}}{n_{st}}$	$\frac{N_{st}}{n_{st}}$	$\frac{N_{st}}{n_{st}} \times D^{*}_{sti}$
ESU		$\frac{N_{st}}{n_{stj}} \times \frac{E_{sti9\,j}}{e_{sti9\,j}}$	$\frac{N_{st}}{n_{stj}} \times \frac{E_{sti1\,j}}{e_{sti1\,j}}$	$\frac{N_{st}}{n_{stj}} \times D^{*}_{sti} \times \frac{E_{sti2\,j}}{e_{sti2\,j}}$
		j = 1,2,3, ..., 18		

Multipliers are to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

7.1 **Adjustment of multipliers due to status of the establishment as 'out of coverage'**

Let

E = total number of establishment for a Second Stage Stratum (SSS)

e = total number of sample establishment for an SSS

m = total number of sample surveyed establishment out of coverage for an SSS

Then

(i) Proportion of sample establishment out of coverage = m/e in an SSS

(ii) Estimated number of establishment out of coverage = E*m/e in an SSS

Adjustments may be done in the following manner:

(i) Adjusted number of establishment within the coverage = (E - E*m/e) in an SSS

(ii) Adjusted number of sample establishment within the coverage = (e-m)

Thus, in such situation, **E** in the multiplier in para 5 above has been replaced by **E * (1 – m/e)** and **e** has been replaced by **(e – m)**.

8. **Treatment for zero cases, casualty cases etc.**:

8.1 While counting the number of FSUs surveyed (n_{st} or n_{stj}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in schedule LSU has been considered.

8.2 However, establishments are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and not be treated as surveyed in this respect.

8.3 *Casualty cases*: FSUs with survey code 7 as per schedule LSU are treated as casualties.

8.3.1 FSUs with survey codes 1 or 4 as per schedule LSU having number of establishments in the frame of j-th second stage stratum greater than 0 (i.e. E > 0) but number of establishments surveyed according to data file as nil (e =0), are taken as casualties for j-th second stage stratum.

8.4 *All the FSUs with survey codes 1 to 6 as per schedule LSU minus the number of casualties as identified in 6.3 and 6.3.1 are taken as the number of surveyed FSUs (n_{stj}) for that (stratum/sub-stratum) ×(second stage stratum).*

9. **Treatment in cases of void second-stage strata/sub-strata /strata**

9.1 A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum.

9.2 When a stratum/sub-stratum is void, the following procedure is recommended:

Case (I): Stratum/Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

(i) If a rural/urban sub-stratum is void then it may be merged with the other sub-stratum of the same Group of the stratum.
(ii) If a rural/urban stratum (district) is void due to all FSUs being casualty, it may be excluded from the coverage of the survey. The state level estimates are based on the estimates of districts for which estimates are available and remarks to that effect were added in appropriate places.

Case (II): Stratum/Sub-stratum void case at second stage stratum level (i.e. all the FSUs were casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a stratum/sub-stratum become casualties in this manner for a particular *second stage stratum*, the stratum/sub-stratum will become void.

9.3 If a complete rural/urban NSS Region is void due to all FSUs being casualty, it has been excluded from the coverage of the survey. The state level estimates would be based on the estimates of regions for which estimates are available and remarks to that effect may be added in appropriate places.

10. Special Note (for removal of sub-round restriction in ASUSE 2021-22):

In view of removal of sub-round restriction in ASUSE 2021-22, the following may be implemented for estimation:

Let, n_1, n_2, n_3, and n_4 be the original sub-round wise allocations of selected FSUs in a sub-stratum, which are normally equal and N is the size of the sub-stratum.

Suppose, $n_1^*, n_2^*, n_3^*,$ and n_4^* are the actual no. of FSUs surveyed from that sub-stratum in the rth sub-round, r=1, 2, 3 and 4

Further, r and i denotes respectively a sub-round and a FSU for a sub-stratum;

$\hat{Y}_{stri}$ denotes the annual estimates obtained from the enterprises surveyed in the i^{th} FSU belonging to the tth sub-stratum of sth stratum in the rth sub-round; and

Under the design adopted for the survey (SRSWOR),

Estimate of the tth sub-stratum of sth stratum from rth sub-round is,

$$\hat{Y}_{str} = \frac{N}{n_r^*} \sum_{i=1}^{n_r^*} \hat{Y}_{stri} \quad , \text{r=1, 2, 3 and 4}$$

10. 1 Overall Estimate for Aggregates for a sub-stratum:

The overall estimates $\hat{Y}_{st}$, of a sub-stratum, are taken as the simple average of the sub-round wise estimates of that sub-stratum, i.e.,

$$\hat{Y}_{st} = \frac{1}{4} \sum_{r=1}^{4} \hat{Y}_{str}$$

Special Cases:

$\hat{Y}_{st} = \frac{1}{3} \sum_{r=1}^{3} \hat{Y}_{str}$, if estimate is available of the tth sub-stratum of sth stratum from 3 sub-rounds only.

$\hat{Y}_{st} = \frac{1}{2} \sum_{r=1}^{2} \hat{Y}_{str}$, if estimate is available of the tth sub-stratum of sth stratum from 2 sub-rounds only.

$\hat{Y}_{st} = \hat{Y}_{str}$, if estimate is available of the t[th] sub-stratum of s[th] stratum from r[th] sub-round (r=1 or 2 or 3 or 4) only.

10.2 **Overall Estimate for Aggregates for a stratum**:

Overall estimate for a stratum ($\hat{Y}_s$) is obtained as

$$\hat{Y}_S = \sum_t \hat{Y}_{st}$$

10.3 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/UT/all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ (s stands for stratum) over all strata belonging to State/UT/all-India.

10.4 **Estimates of Ratios**:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level.

Then the combined ratio estimate $(\hat{R})$ of the ratio $(R = \frac{Y}{X})$ is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.
