Preface

Household Consumption Expenditure Surveys (HCES) are being conducted by the National Statistics Office (NSO) on a regular basis since the inception of National Sample Survey in the year 1950 by the legendary scholar, Professor P. C. Mahalanobis. Data of HCES is the primary source of information to assess trends in economic well-being and to determine and update the basket of consumer goods and services and weights used for the calculation of the Consumer Price Index. Food consumption data compiled from HCES are an important source of information on food security and nutrition. The data of HCES is also used by various international organisations for compilation and updation of various indicators related development and economic well-being. The Food and Agricultural Organisation (FAO) uses it for compilation of indicator on Prevalence of Undernourishment and the World Bank utilizes HCES data for determination of level poverty.

With a view to meet the vital need of data requirement of various users, the Ministry of Statistics and Programme Implementation (MoSPI) decided to conduct two back-to-back surveys on the subject during August 2022 to July 2023 and August 2023 to July 2024. The report of the first survey undertaken in 2022-23 has already been published in June 2024. On completion of the second survey, a factsheet with key findings has been released in December 2024.

This publication is the detailed report of HCES 2023-24, providing estimates of various aspects of household consumer expenditure at both state and all-India levels. The report includes rural and urban averages of Monthly Per Capita Consumption Expenditure (MPCE) at the State/UT and all-India levels, as well as the absolute and percentage breakdown of MPCE by consumption categories and fractile classes for each State/UT and all-India.

The Household Survey Division (HSD) of the NSO developed the survey methodology, compiled and processed the survey data and prepared this document. The Field Operations Division conducted the fieldwork, while the Coordination and Quality Control Division liaison various survey activities.

I am grateful to the Chairman and members of the Steering Committee of National Statistical Commission and the Technical Advisory Group for household surveys for their valuable suggestions and guidance throughout the survey. I also express my gratitude to the officers of HSD, involved in preparing this report.

I hope this report will be valuable to policymakers, academics, researchers, and others interested in this subject. Suggestions for improving its content and coverage are highly appreciated.

Geeta Singh Rathore
Director General

प्रस्तावना

महान विद्वान प्रोफेसर पी. सी. महालनोबिस द्वारा वर्ष 1950 में राष्ट्रीय प्रतिदर्श सर्वेक्षण की शुरुआत के बाद से राष्ट्रीय सांख्यिकी कार्यालय (एनएसओ) द्वारा नियमित आधार पर घरेलू उपभोग व्यय सर्वेक्षण संचालित (एचसीईएस) किए जा रहे हैं। एचसीईएस का डेटा आर्थिक कल्याण में रुझानों का आकलन करने और उपभोक्ता मूल्य सूचकांक की गणना के लिए उपयोग की जाने वाली उपभोक्ता वस्तुओं की टोकरी और सेवाओं तथा भार को निर्धारित करने और अद्यतन करने के लिए सूचना का प्राथमिक स्रोत है। एचसीईएस से संकलित खाद्य उपभोग डेटा खाद्य सुरक्षा और पोषण पर सूचना का एक महत्वपूर्ण स्रोत है। एचसीईएस के डेटा का उपयोग विभिन्न अंतर्राष्ट्रीय संगठनों द्वारा विकास और आर्थिक कल्याण से संबंधित विभिन्न संकेतकों के संकलन और अद्यतन के लिए भी किया जाता है। खाद्य और कृषि संगठन (एफएओ) इसका उपयोग कुपोषण की व्यापकता पर संकेतक के संकलन के लिए करता है और विश्व बैंक गरीबी के स्तर के निर्धारण के लिए एचसीईएस डेटा का उपयोग करता है।

विभिन्न उपयोगकर्ताओं की डेटा आवश्यकता को पूरा करने के उद्देश्य से सांख्यिकी और कार्यक्रम कार्यान्वयन मंत्रालय ने अगस्त 2022 से जुलाई 2023 और अगस्त 2023 से जुलाई 2024 के दौरान इस विषय पर दो बैक-टू-बैक सर्वेक्षण आयोजित करने का निर्णय लिया है। वर्ष 2022-23 में किए गए पहले सर्वेक्षण की रिपोर्ट जून 2024 में पहले ही प्रकाशित हो चुकी है। दूसरे सर्वेक्षण के पूरा होने पर, प्रमुख निष्कर्षों वाली एक फैक्टशीट दिसंबर 2024 में जारी की गई है।

यह प्रकाशन एचसीईएस 2023-24 की विस्तृत रिपोर्ट है, जो राज्य और अखिल भारतीय स्तर पर घरेलू उपभोक्ता व्यय के विभिन्न पहलुओं का अनुमान प्रदान करती है। रिपोर्ट में राज्य/संघ राज्य क्षेत्र और अखिल भारतीय स्तर पर मासिक प्रति व्यक्ति उपभोग व्यय (एमपीसीई) के ग्रामीण और शहरी औसत के साथ-साथ प्रत्येक राज्य/संघ राज्य क्षेत्र तथा अखिल भारतीय स्तर पर उपभोग श्रेणियों और फ्रैक्टाइल वर्गों के अनुसार एमपीसीई का पूर्ण और पृथक प्रतिशत शामिल है।

एनएसओ के घरेलू सर्वेक्षण प्रभाग (एचएसडी) ने सर्वेक्षण पद्धति विकसित की, सर्वेक्षण डेटा को संकलित और संसाधित किया और यह दस्तावेज़ तैयार किया। क्षेत्र संकार्य प्रभाग ने फील्डवर्क का संचालन किया, जबकि समन्वय और गुणवत्ता नियंत्रण प्रभाग ने विभिन्न सर्वेक्षण गतिविधियों का समन्वय किया।

मैं राष्ट्रीय सांख्यिकीय आयोग की संचालन समिति के अध्यक्ष और सदस्यों तथा घरेलू सर्वेक्षणों के लिए तकनीकी सलाहकार समूह की आभारी हूँ, जिन्होंने सर्वेक्षण के दौरान बहुमूल्य सुझाव दिए और मार्गदर्शन किया। मैं इस रिपोर्ट को तैयार करने में शामिल एचएसडी के अधिकारियों के प्रति भी आभार व्यक्त करती हूँ।

मुझे आशा है कि यह रिपोर्ट नीति निर्माताओं, शिक्षाविदों, शोधकर्ताओं और इस विषय में रुचि रखने वाले अन्य लोगों के लिए मूल्यवान होगी। इसकी सामग्री और कवरेज को बेहतर बनाने के लिए सुझावों की अत्यधिक सराहना की जाती है।

गीता सिंह राठौर
महानिदेशक

HIGHLIGHTS

Introduction

- ✂ The National Sample Survey Office (NSSO) has been conducting Household Consumption Expenditure Survey (HCES) since the inception of National Sample Survey in the year 1950.
- ✂ Information collected in HCES helps to assess trends in economic well-being and to determine and update the basket of consumer goods and services. It is also used for the calculation of the weights for Consumer Price Indices.
- ✂ The latest survey (HCES: 2023-24) has been conducted during the period August, 2023 to July, 2024 in which information has been collected from 2,61,953 Households (1,54,357 in rural areas and 1,07,596 in urban areas) spread over all States and Union Territories in the country.
- ✂ Prior to this, a survey of similar scale was conducted during August 2022 to July 2023.

Indicator Compiled

The following indicators have been generated from HCES: 2023-24:

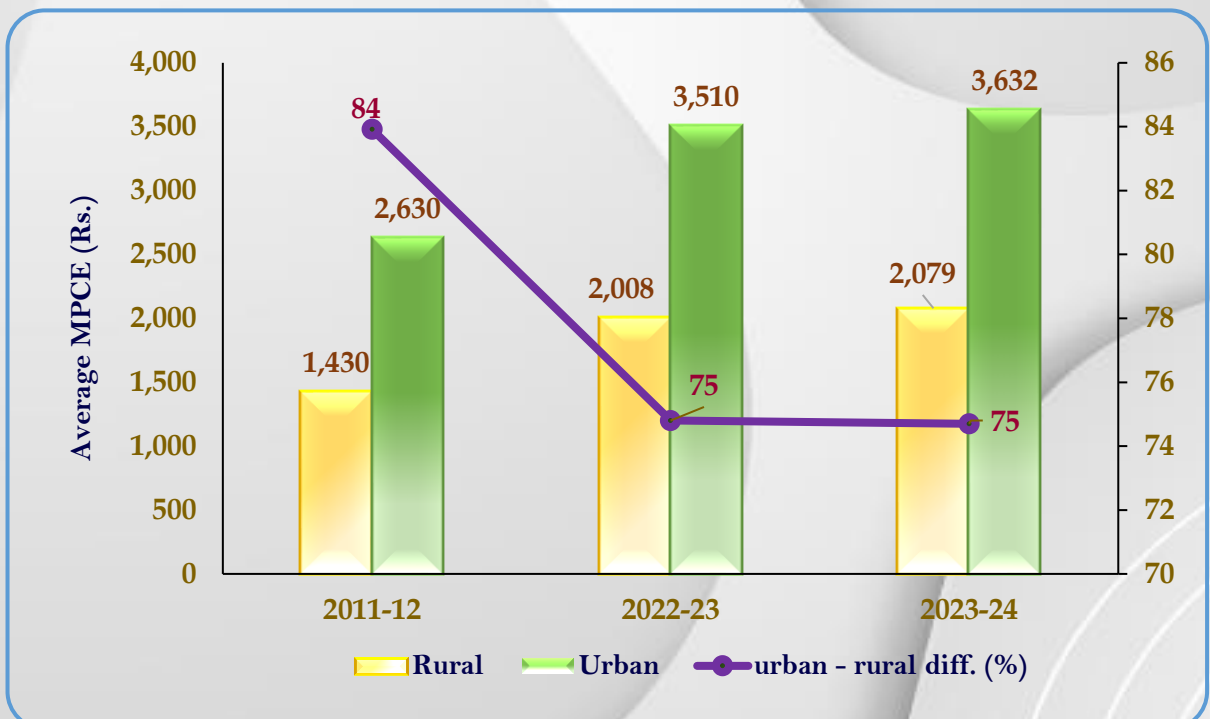

- ✂ **Average Monthly Per Capita Consumption Expenditure (MPCE) by;**
 - ✂ State/UT and All-India;
 - ✂ Fractile classes of MPCE;
 - ✂ Item category of consumption;
 - ✂ Household Type;
 - ✂ Social Group
- ✂ **Average Monthly Per Capita Quantity Consumption of selected items for;**
 - ✂ State/UT and All-India;
 - ✂ Fractile classes of MPCE;
 - ✂ Item category of consumption.

Average MPCE (Rs.) during 2011-12 to 2023-24: All-India

Average MPCE (Rs.) at nominal price

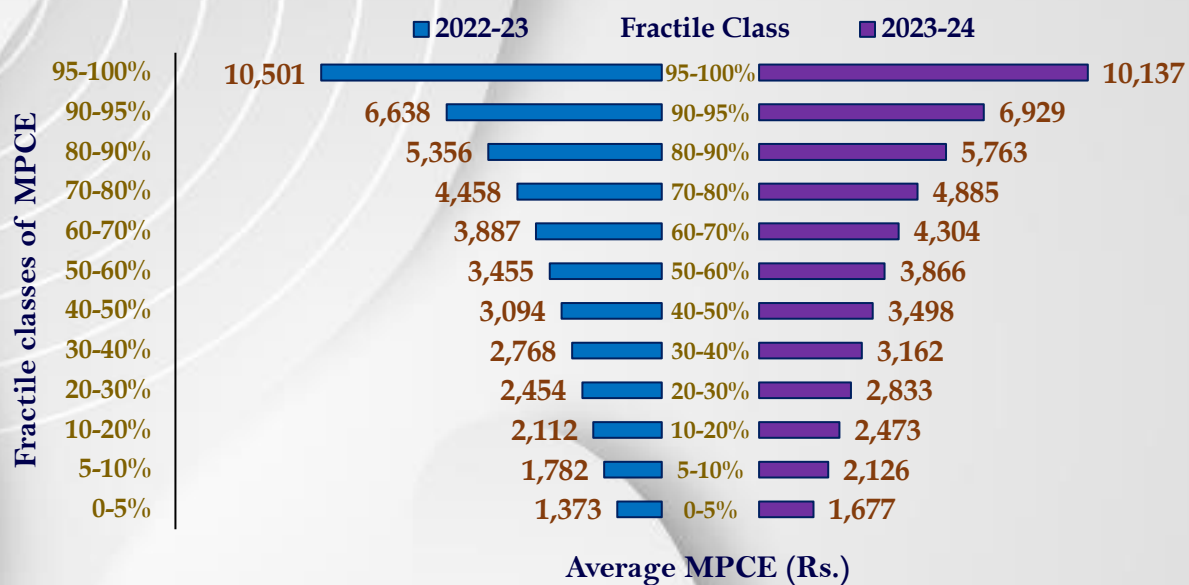

Average MPCE (Rs.) at 2011-12 prices

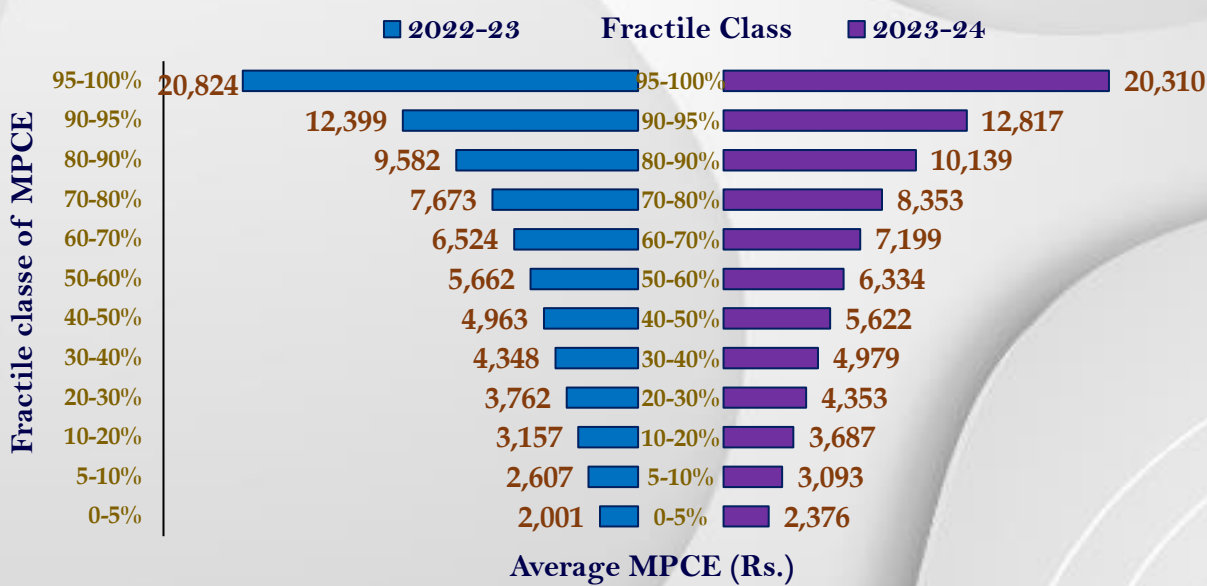

Average MPCE (Rs.) by Fractile classes in 2022-23 and 2023-24: All-India

Average MPCE (Rs.) across fractiles classes of MPCE for 2022-23 & 2023-24 - Rural

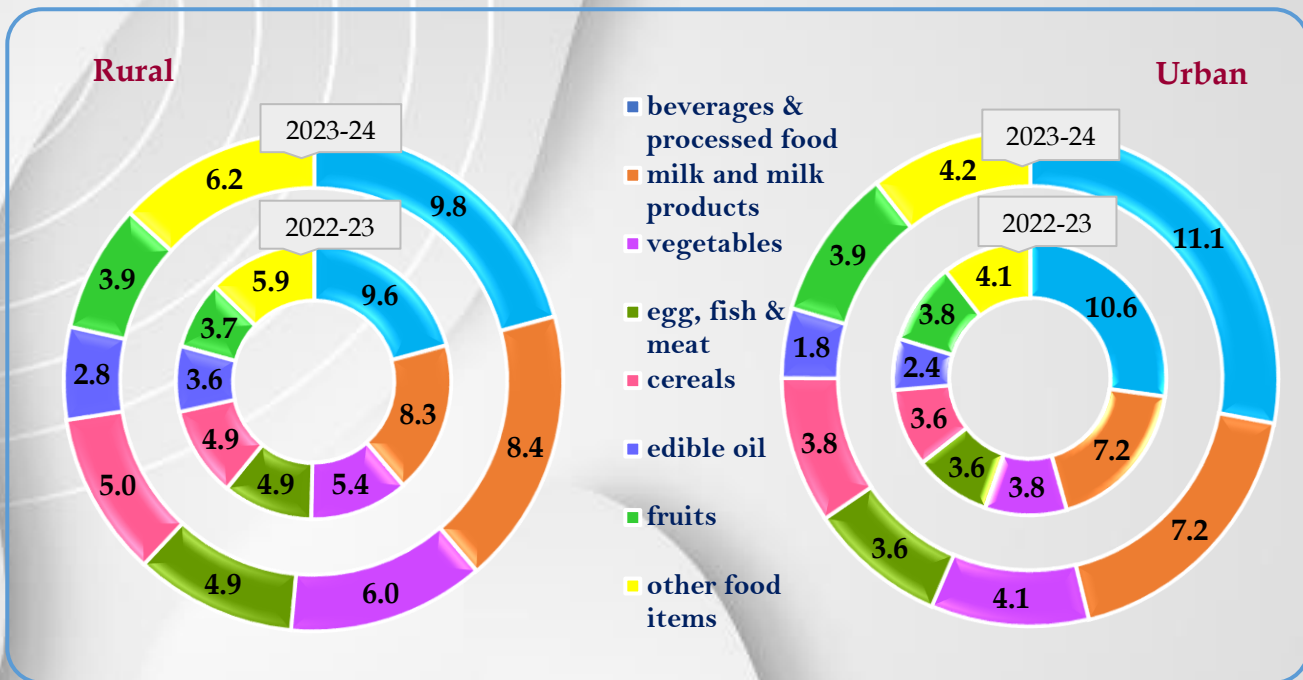

Average MPCE (Rs.) across fractiles classes of MPCE for 2022-23 & 2023-24 - Urban

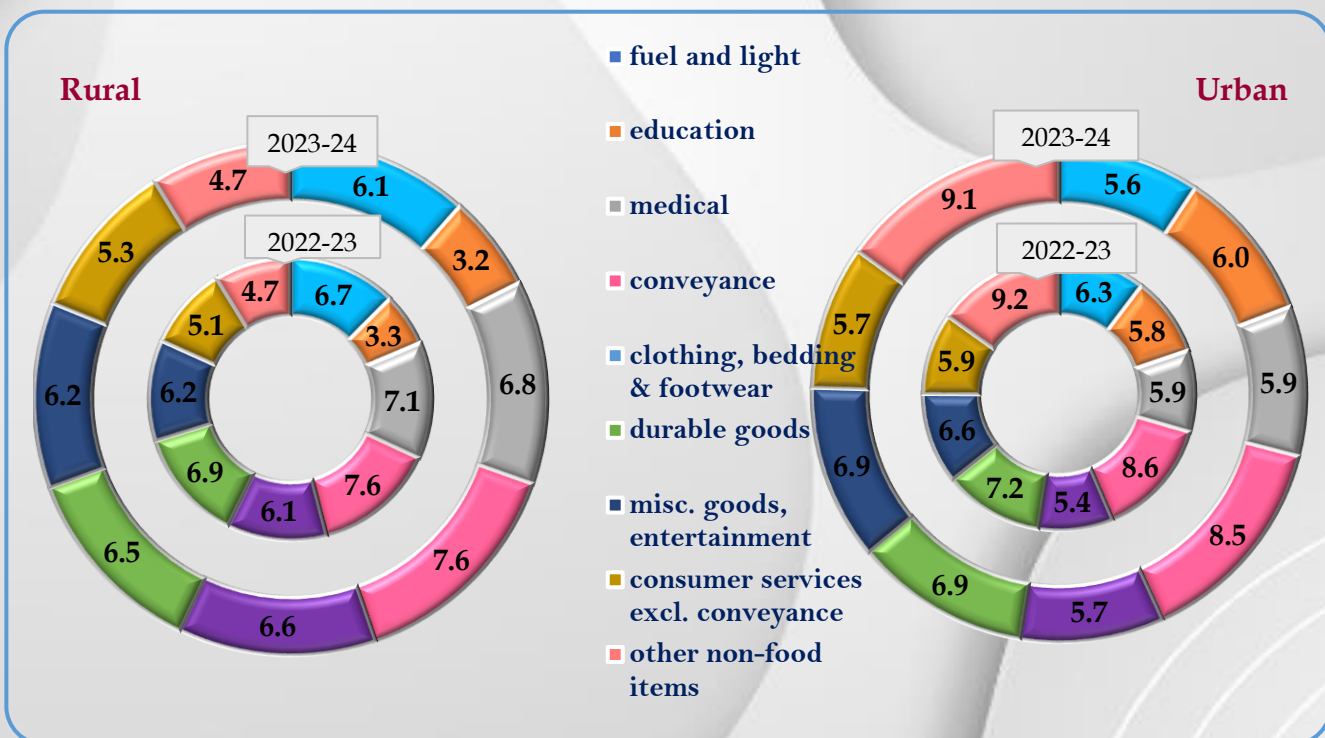

Trend in share of food items in average MPCE during 2022-23 & 2023-24: All-India

Food Items

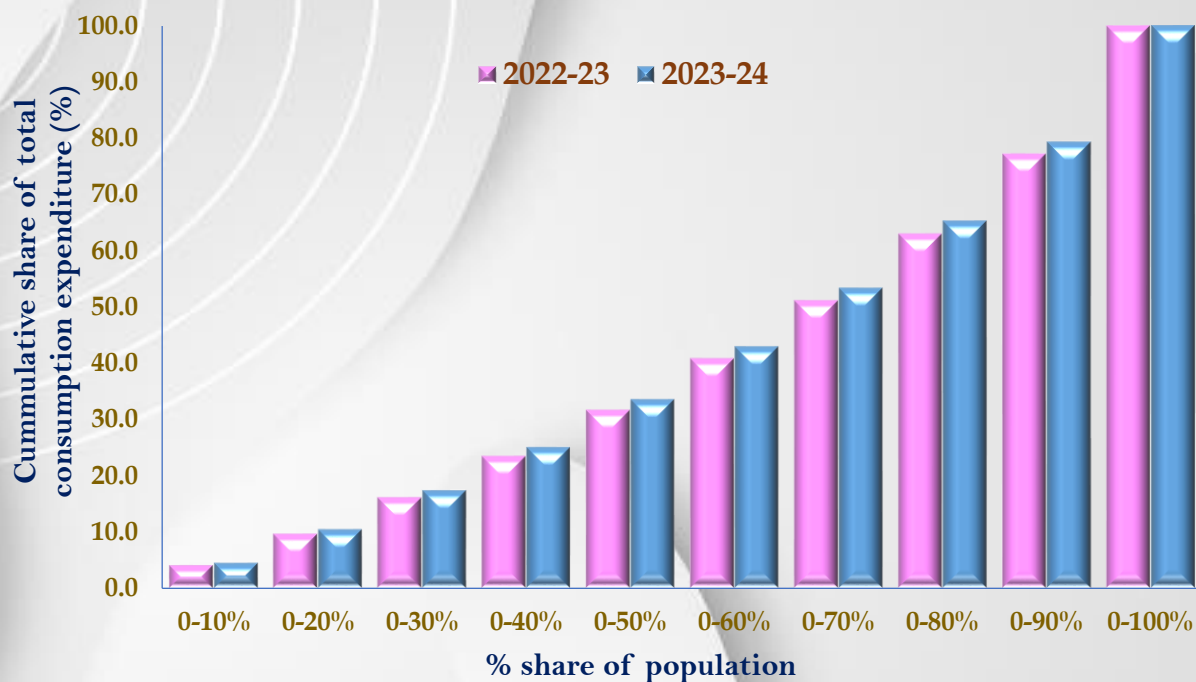

Non-food Items

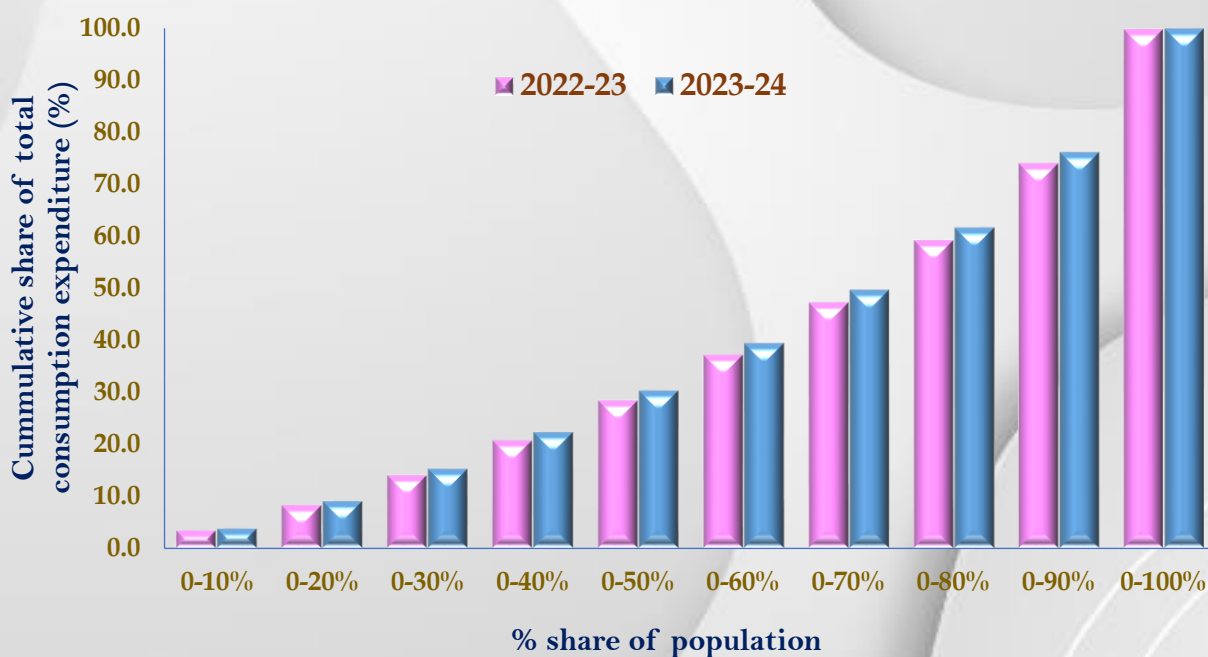

Cumulative share (%) of different decile classes in total consumption expenditure in 2022-23 and 2023-24: All-India

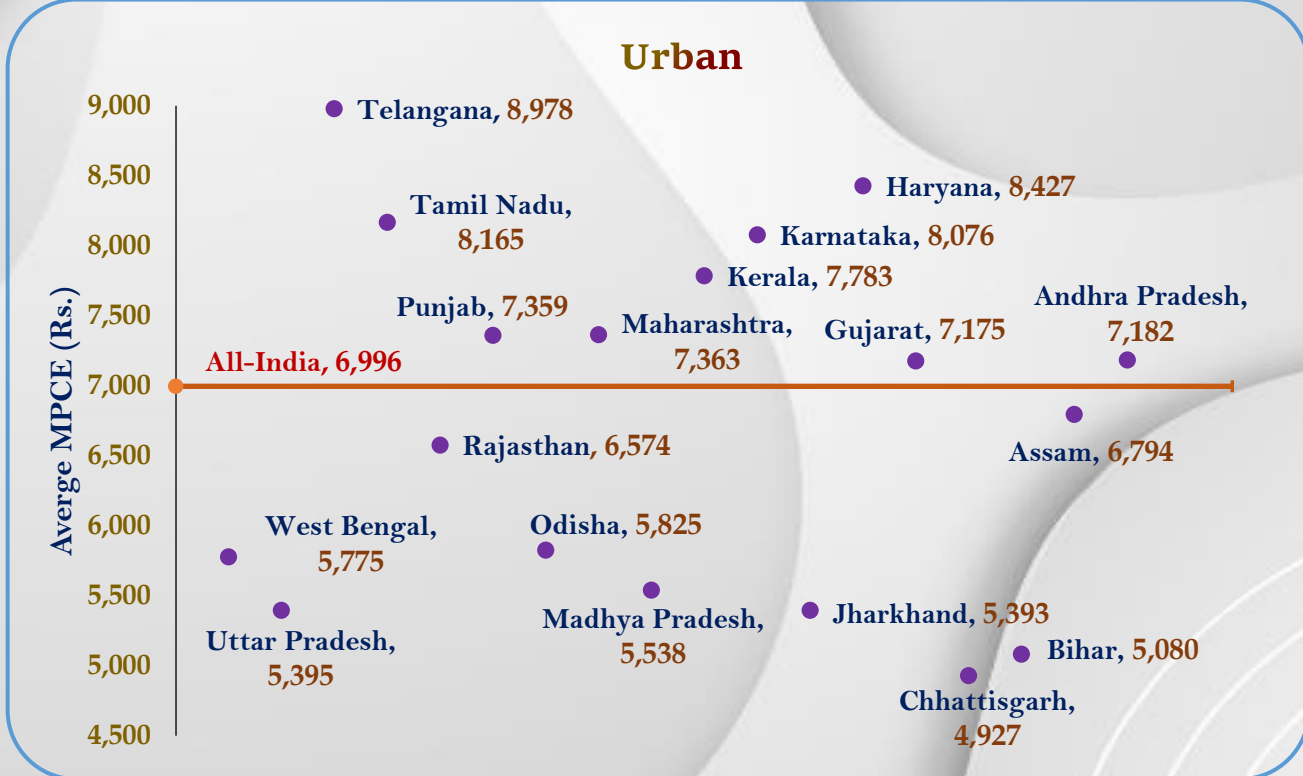

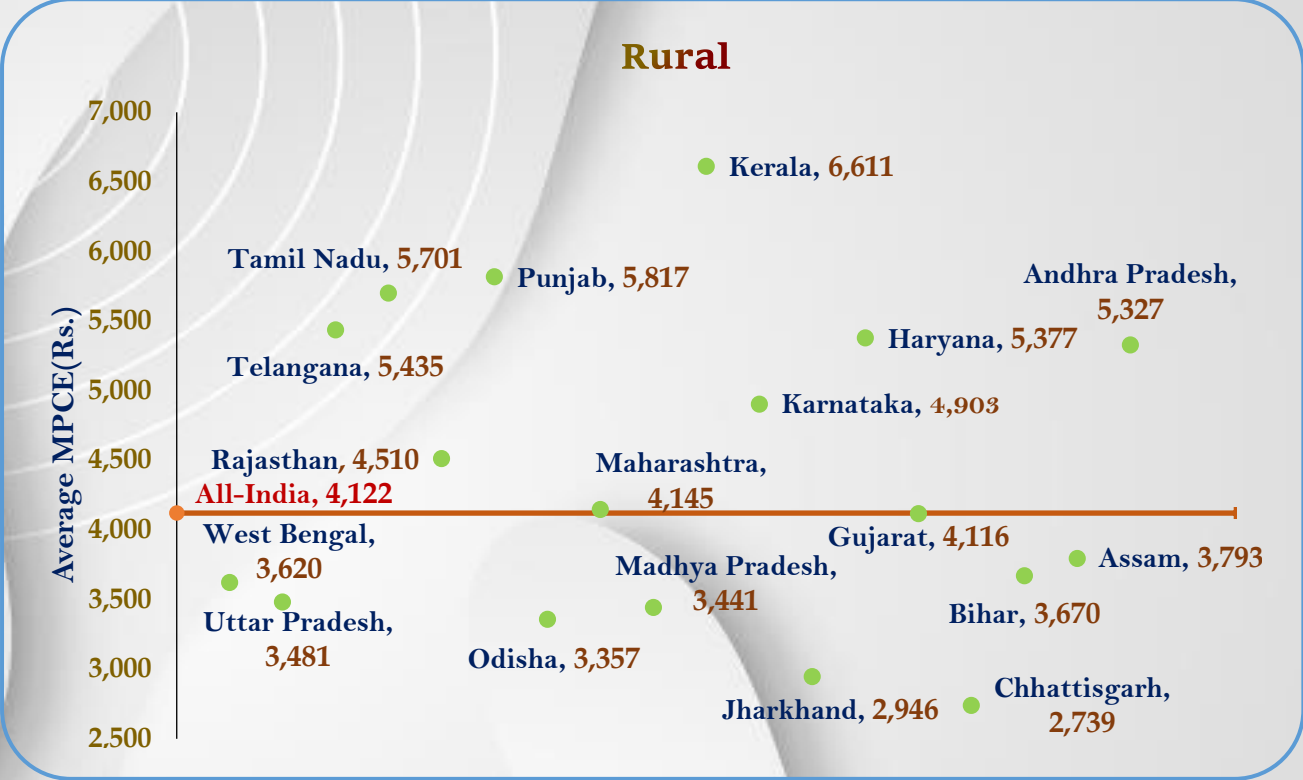

Rural

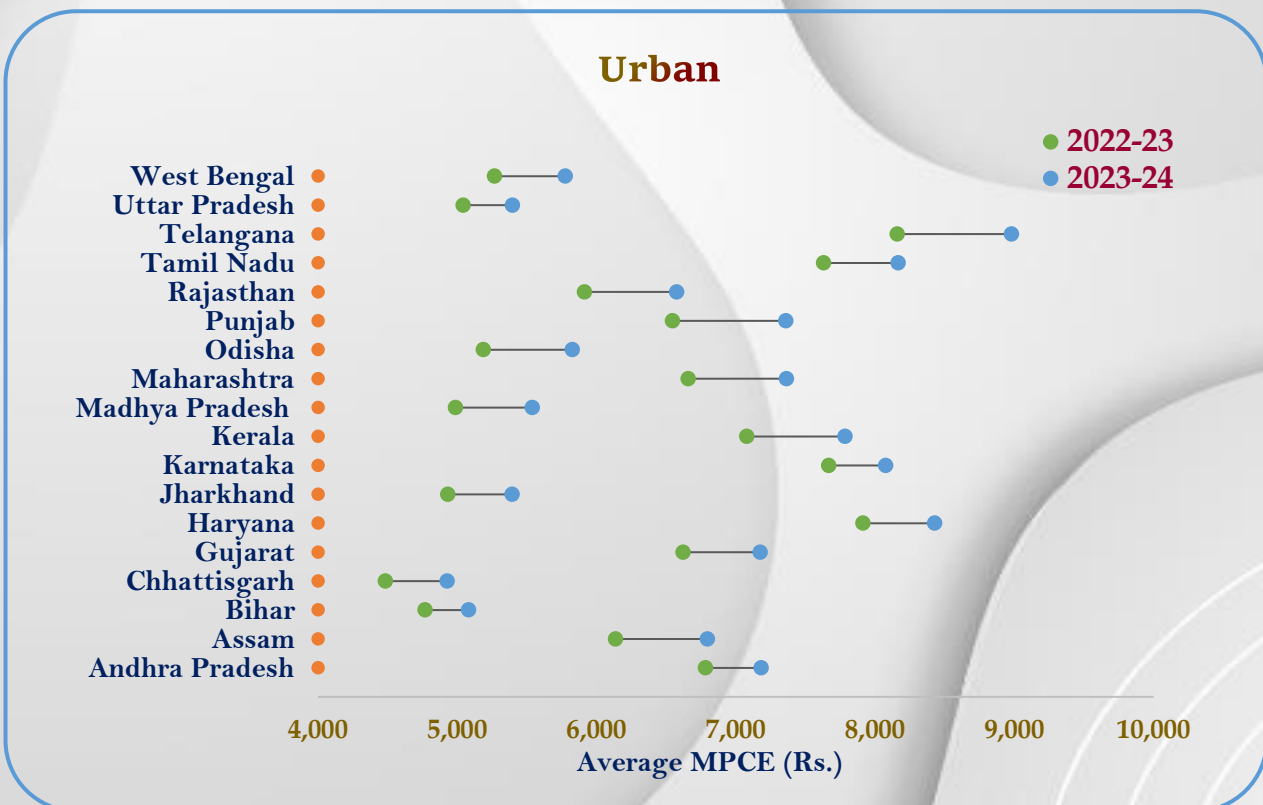

Urban

Average MPCE (Rs.) of major states and their relative position with All-India in 2023-24

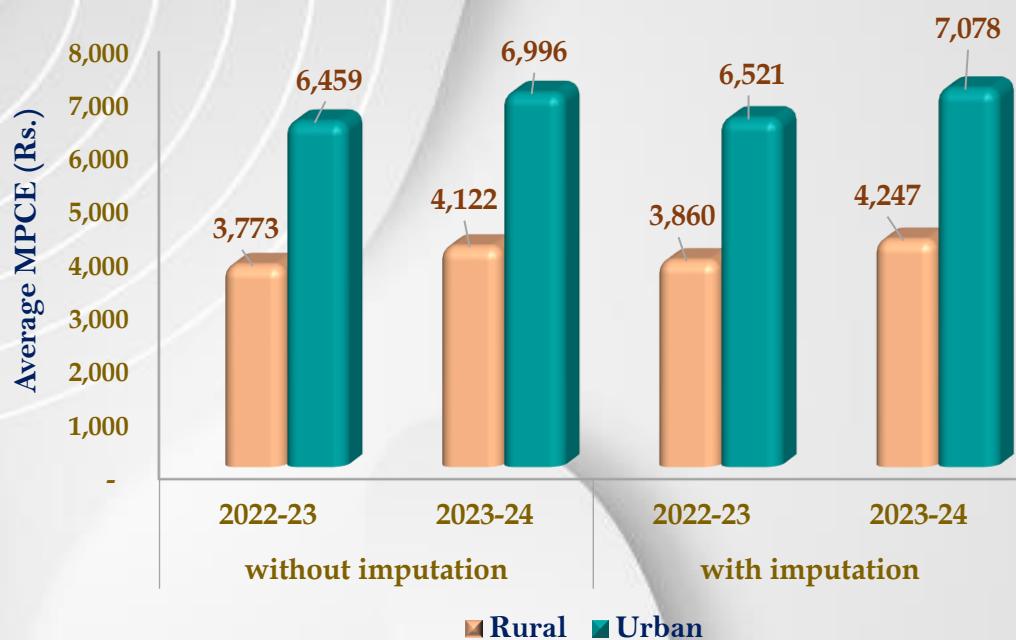

Average MPCE (Rs.) of major states in 2022-23 and 2023-24

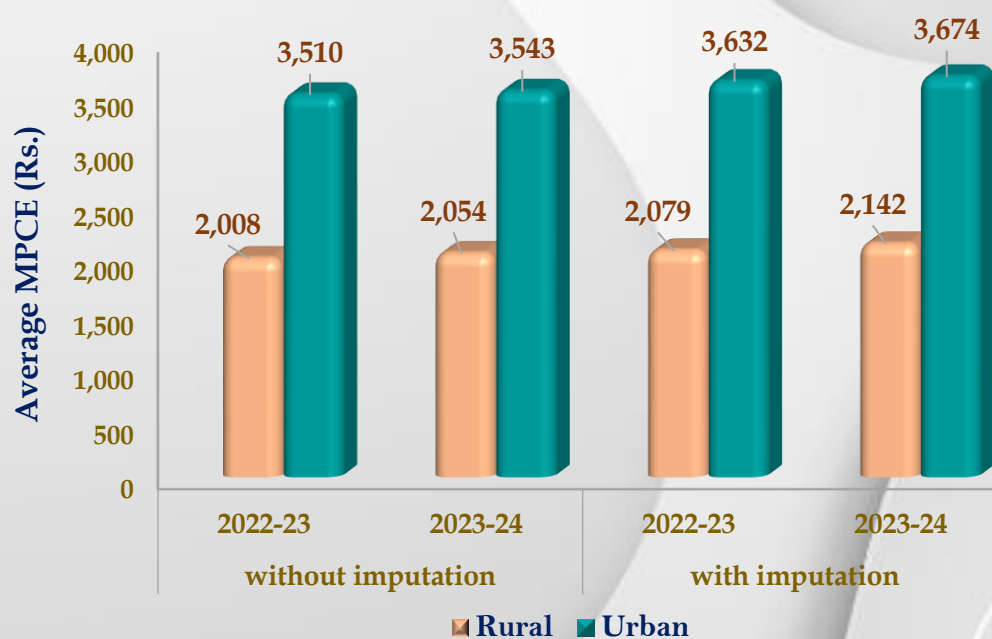

Comparison of average MPCE (in Rs.): Without and With imputation in nominal and real price: All-India

Average MPCE (Rs.) at nominal price

Average MPCE (Rs.) at 2011-12 price

Chapter One

Introduction

1.1 BACKGROUND

1.1.0 The Household Consumption Expenditure Survey (HCES) is designed to collect information on consumption and expenditure of the households on goods and services. HCES provides data required to assess trends in economic well-being and to determine and update the basket of consumer goods and services. It is also used to compute the weights for compilation of the Consumer Price Index. Data collected in HCES is a vital input in developing measures for welfare, poverty, inequality and also for formulating and monitoring economic and social welfare policies, especially for different segments of the population. Analysis of HCES data over times inform us about how the level of living and consumption behaviour of the households change over time, and about how levels of living vary among individuals and groups in the economy. Food consumption data compiled from HCES are an important source of information on food security and nutrition intake.

1.1.1 In view of the recommendations of the National Statistical Commission (NSC), it was planned to undertake the next survey on household consumption expenditure during July, 2020 to June, 2021. Later, the Ministry of Statistics & Programme Implementation (MoSPI) decided to conduct two back-to-back surveys on the subject to facilitate a decision on revision of the base year for macro-economic indicators, like Gross Domestic Product (GDP), Consumer Price Indices (CPI) etc. However, the emergence of COVID-19 pandemic delayed the launch of the survey fieldwork. Subsequently, after return of

normalcy, two consecutive surveys have been planned during the period August, 2022 to July, 2023 and August, 2023 to July, 2024. After completion of the fieldwork of the first survey, a factsheet has been published by MoSPI in February, 2024 and thereafter, the detailed report of the survey along with the unit level data has been released in June, 2024. A factsheet containing summary results of HCES:2023-24 has been published in December 2023. This is the detailed report of HCES: 2023-24.

1.2 PAST SURVEYS

1.2.0 The National Sample Survey Office (NSSO) has been conducting surveys on household consumption expenditure since the inception of the National Sample Survey (NSS) in the year 1951. Thereafter, surveys on consumption expenditure had been conducted at regular intervals as part of NSS rounds, normally of one-year duration. The data on household consumption expenditure were collected in every round up to the 28th (1973-74). After the 26th round (1971-72) of the survey, the then Governing Council of NSSO decided to conduct the surveys on consumption expenditure and employment-unemployment together on a large scale, once in every five years. From the 42nd round (1986-87), on the basis of the recommendation of the Governing Council, NSS had started annual surveys of consumption expenditure in a smaller-scale with an abridged version of the schedule and thin sample. This annual series was continued till NSS 64th round (2007-08).

1.2.1 The quinquennial surveys were conducted and results were published in the 27th (1972-73), 32nd (1977-78), 38th (1983), 43rd (1987-88), 50th (1993-94), 55th (1999-'00), 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds of NSS, at roughly 5-year intervals. The last survey has been conducted in during August, 2022 to July, 2023 (2022-23). The survey of 2023-24 is the latest one on the subject.

1.3 SURVEY COVERAGE

1.3.1 Geographical Coverage

1.3.1.0 The survey covered the whole of the Indian Union except a few inaccessible villages in the Andaman and Nicobar Islands. The survey was conducted in 8,684 villages and 6,143 urban blocks covering 2,61,953 Households (1,54,357 in rural areas and 1,07,596 in urban areas). The distribution of the villages/urban blocks and households surveyed across different States/UTs for rural and urban areas is given in Table 1.1 at the end of this Chapter.

1.3.2 Population Coverage

1.3.2.0 All resident households located in the geographical territory of Indian union were considered in the survey with the following exclusions:

1.3.2.1 Floating population, i.e., persons without any normal residence, was excluded from the coverage of the survey. But persons residing in open spaces, roadside shelters, under bridges etc., more or less regularly in the same place were covered.

1.3.2.2 Foreign nationals as well as their domestic servants were excluded, if by definition the latter belonged to the foreign national's household. However, a foreign national who had become an Indian citizen for all practical purposes was covered.

1.3.2.3 Persons residing in barracks of military and paramilitary forces (like Police, Border Security Force, etc.) were kept outside the survey coverage. However, civilian population residing in their neighbourhood, including the family quarters of service personnel was covered.

1.3.2.4 Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were

covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered. Convicted prisoners undergoing sentence were kept outside the coverage of the survey.

1.4 QUESTIONNAIRES FOR THE SURVEY

1.4.1 HCES: 2023-24 has been conducted using three questionnaires identical to that of HCES:2022-23, namely, (i) Questionnaire: FDQ for Food items, (ii) Questionnaire: CSQ for Consumables and Services items, and (iii) Questionnaire: DGQ for Durable goods. These three questionnaires have been canvassed in the selected households in three separate consecutive monthly visits. A slightly modified version of Questionnaire: HCQ as used in HCES: 2022-23 after deleting items related to: (i) type of material used for construction of wall, floor and roof of the building, (ii) source of drinking water and time taken to fetch drinking water from the source, (iii) type of latrine used and type of access of the household to latrine, (iv) number of members of the household aged between 0 to 18 years died during the past 5 years preceding the date of survey etc. has been canvassed in HCES: 2023-24.

1.4.2 All possible six sequencing of the three questionnaires, namely, [(Q1, Q2, Q3), (Q1, Q3, Q2), (Q2, Q1, Q3), (Q2, Q3, Q1), (Q3, Q1, Q2) and (Q3, Q2, Q1)], where Q1 refers to FDQ, Q2 refers to CSQ and Q3 refers to DGQ, were used in the survey to eliminate any bias due to adoption of any particular sequencing of the questionnaires. The questionnaires are provided in Appendix D.

1.5 REFERENCE PERIOD

1.5.0 The consumption of any good or service by members of a household (individually or collectively) occurs in the form of a flow over time. The time period for which consumption is recorded is called the reference period. It may vary from item to item. As the respondents are asked to recall and report the volume of consumption over a fixed duration, the reference period is also called the recall period.

1.5.1 The reference periods used in the survey for different groups of items are given below:

Category	Item groups	Reference period
I	Edible oil; egg, fish & meat; milk and milk products; vegetables; fruits; spices; beverages and processed foods; pan, tobacco & intoxicants	Last 7 days
II	All other food items; fuel and light; miscellaneous goods and services including medical (non-hospitalization) and rents	Last 30 days
III	Clothing; bedding; footwear; education; medical (hospitalization); durable goods	Last 365 days

1.5.2. Together, these reference periods are termed as Modified Mixed Reference Period (MMRP). Other reference periods used in past NSS surveys on household consumption are: Uniform Reference Period (URP) and Mixed Reference Period (MRP).

1.5.3 In URP approach, the household consumption expenditure on each item is recorded for a reference period of “last 30 days” while in MRP, the household consumption expenditure on – (i) clothing and bedding, footwear, education, institutional medical care (i.e., on hospitalization) and durable goods is recorded for a reference period of “last 365 days”, and (ii) expenditure on all other items is recorded for a reference period of “last 30 days”.

1.6 HOUSEHOLD

1.6.0 A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (with total period of absence from the household to be less than 6 months during the survey period) but excludes temporary visitors and guests (with total period of stay less than 6 months during the survey period).

1.6.1 Each inmate of a hostel, mess, hotel, boarding and lodging house etc., is considered as a single member household except that a family living in a hotel (say) is considered as one household only; the same applies to the residential staff of such establishments. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes, etc., are considered as members of the households to which they last belonged.

1.7 HOUSEHOLD SIZE

1.7.0 The size of a household is the total number of persons staying in the household.

1.8 HOUSEHOLD CONSUMPTION EXPENDITURE

1.8.0 It is the expenditure incurred by a household on domestic consumption during the reference period. Expenditure incurred towards entrepreneurial activities of households is excluded from household consumption expenditure.

1.8.1 The expenditure on purchase and construction of residential land and building, interest payments, insurance premium payments, payments of fines and penalties, and expenditure on gambling including lottery tickets are also excluded. Money given as remittance, charity, gift, etc. is also not considered in consumption expenditure. However, consumption of items produced in own farm or household enterprise is valued and included in household consumption expenditure. Also, goods and services received as payment in kind or free from employer, such as rent-free accommodation and free medical care, and reimbursement of travelling allowance for self & family excluding allowance for business trips are considered in household consumption expenditure.

1.8.2 For items of food, pan, tobacco, intoxicants and fuel & light, household consumption is measured by the quantity of the item actually used or consumed by the household during the reference period, regardless of the expenditure incurred on it. For evaluating household consumption of all other items, a different approach is followed: the

expenditure made by the household during the reference period for the purchase or acquisition of goods and services, regardless of when the goods and services are used and by whom, is considered as household consumption.

18.3. However, for some items such as rent, telephone charges, consumer taxes and railway season tickets, etc. expenditure during the month is recorded as the amount that was last paid divided by the number of months for which the payment was made.

1.8.4 The consumption of an item may be out of (a) purchases made in cash or credit during the reference period; (b) home-grown stock; (c) receipts in exchange of goods and services; (d) any other receipt like gift, charity and (e) free collection. Home produced items are evaluated at ex-farm price.

1.8.5 It is pertinent to mention here that the consumption expenditure of a household on food items relates to the actual consumption by the members of the household and also for the guests during ceremonies or otherwise. Any transfer payment made by the household such as, transfers of food, fuel made by a household as charity, loan advance etc. are not considered as consumption of that household. However, meals prepared in a household and served to non-household members are an exception to this rule. Meals prepared in the household's kitchen and provided to the employees and/or others are considered in domestic consumption of employer (payer) households. There is a practical difficulty in estimating the quantities and values of individual items used for preparing the meals served to employees or others. Thus, to avoid double counting, 'cooked meals received as perquisites' from the employer household or as gifts or charity are not recorded in the recipient household. As a general principle, cooked meals purchased by the household from the market for consumption by the members and the guests are also recorded in the purchaser household.

1.8.6 All goods and services received as payment in kind or perquisites are included in the consumption of the recipient household as goods and services received in exchange of services, except for meals received from other households.

1.8.7 With a view to simplify data collection and valuation, consumption of food processed at home from one “item” to another, such as milk converted to curd, vegetables used for pickles, and rice used for making liquor etc. are recorded against the primary or ingredient item(s), such as milk instead of curd, vegetables instead of pickle etc.

1.9 VALUE OF CONSUMPTION

1.9.0 For food, pan, tobacco, intoxicants and fuel & light items, consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex-farm price. Value of consumption out of gifts, free collections, and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period. Such valuation is made by the field officials at the time of collection of the data.

1.10 MONTHLY PER CAPITA CONSUMPTION EXPENDITURE (MPCE)

1.10.0 The Monthly Per Capita Consumption Expenditure (MPCE) is defined as: total household monthly consumption expenditure divided by the household size. This measure serves as an indicator of the household’s level of living.

1.10.1 Each individual’s MPCE is defined as the MPCE of the household to which the person belongs. This assigns to each person a number representing his or her level of living. Thus, the intra-household allocation among the members of the household is ignored.

1.11 FRACTILES AND FRACTILE CLASSES OF MPCE

1.11.0 For any fraction $f(0 < f < 1)$, the corresponding fractile of the distribution of MPCE is the level of MPCE, Y_f , such that the proportion of population whose household MPCE lies below Y_f is f . A fractile class of MPCE is a segment of the population lying within two fractiles, f_1 and f_2 .

1.11.1 In this report, twelve fractile classes, represented as “0-5%”, “5-10%”, “10-20%”, ..., “95-100%” are used. Each of the first two classes contain 5% of the estimated population ranked by MPCE in ascending order, i.e., the bottom 5% of the estimated population belongs to the class “0-5%”. Each of the next eight classes contain 10% of the estimated population ranked by MPCE in ascending order. The last two classes contain 5% each of the estimated population in which the fractile class “95-100%” represents top 5% of estimated population when ranked by MPCE in ascending order.

1.11.2 Estimates are often generated separately, for different fractile classes to assess the variation of any characteristics with variation in MPCE. In this report, MPCE fractile classes, formed separately for different States/UTs and at all-India level for rural and urban sectors have been used.

1.12 ISSUES RELATED TO COMPARABILITY

1.12.0 HCES: 2022-23 has undergone some changes as compared to the previous surveys on consumption expenditure. A brief account of the changes made in this survey are given below. As a methodology identical to that of HCES: 2022-23 and the same set questionnaires (except for some modifications in Questionnaire HCQ) have been used in HCES: 2023-24, the following are required to be noted while comparing the results of HCES: 2023-24 with those of the surveys conducted in 2011-12 and earlier.

(i) **Item Coverage:** The questionnaire used in HCES: 2011-12 (NSS 68th round) had around 347 items. In HCES: 2022-23 & HCES: 2023-24, the questionnaire has been updated by inclusion of new items and merging some of the obsolete items together. The questionnaire of HCES: 2022-23 & HCES: 2023-24 contains 405 items.

(ii) **Changes in Questionnaire:** A single questionnaire has been used in all NSS surveys on household consumption expenditure prior to HCES: 2022-23. However, in HCES: 2022-23 & HCES: 2023-24, three separate questionnaires covering (i) food items, (ii) consumables and services items and (iii) durable goods have been used. Further, another questionnaire has been canvassed for collecting information on household characteristics as well as demographic particulars of the members of the households.

(iii) **Multiple Visits for Data Collection:** Contrary to the usual practice of single visit followed prior to 2022-23, three questionnaires, namely, FDQ, CSQ & DGQ have been canvassed at random in HCES: 2022-23 & HCES: 2023-24 in a selected household in three consecutive monthly visits in a quarter. The questionnaire HCQ has always been canvassed during the first visit along with one of these three questionnaires.

(iv) **Change in Mode of Data Collection:** Computer-Assisted Personal Interview (CAPI) method has been adopted in HCES: 2022-23 & HCES: 2023-24 while all earlier surveys on the subject have been conducted in Pen-and-Paper Personal Interview (PAPI) method.

1.13 MAJOR STATES

1.13.0 This refers to the 18 States of India which had a population of 25 million or more according to the Census of 2011. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh and West Bengal.

1.13.1 The state of Telangana was created in the year 2014 carving out from the state of Andhra Pradesh. However, considering the total population of Andhra Pradesh according to 2011 population Census, both Andhra Pradesh and Telangana have been included in the list of major states.

1.14 CONTENTS OF THIS DOCUMENT

1.14.0 This report is based on the Household Consumption Expenditure Survey conducted during August, 2023 to July, 2024. The report contains three Chapters with summary statements. This Chapter is the introductory one and provides a brief background of the survey in addition to elucidating some concepts and definitions used in the survey. Chapter 2 outlines the survey methodology and estimation procedure while the findings of the survey are discussed in Chapter 3. The detailed tables of indicators, namely, MPCE, per capita quantity consumption etc. at State/UT level are included in Appendix A. The detailed estimation procedure is presented in Appendix B. As a measure of efficacy of the estimates, the values of relative standard errors (RSE) of the MPCE figures for each State/UT are given in Appendix C and the survey questionnaires are included in Appendix D.

Table 1.1: Number of FSUs allotted and surveyed and number of households surveyed

State/UT/All-India	No. of FSUs (villages/blocks) allotted		Surveyed				
			No. of FSUs (villages/blocks)		No. of sample households		
	Rural	Urban	Rural	Urban	Rural	Urban	Rural + Urban
Andhra Pradesh	361	240	360	239	6,306	4,159	10,465

*: All India figures include rural households from uninhabited villages those have been considered as a special stratum.

Chapter Two

Survey Method & Estimation of MPCE

2.1 SAMPLING DESIGN

2.1.0 A multistage stratified sampling design, considering villages/urban blocks or sub-units of these as the first stage units has been used in the survey. The households are the ultimate stage units. Simple Random Sampling Without Replacement (SRSWOR) method is used for selecting the samples.

2.1.1 In order to ensure proper representation of households of different economic categories, all the households of a selected village/urban block are classified into three groups depending on a criterion based on (i) land possessed in rural areas and (ii) possession of car in urban areas as on the date of the survey. A total of 18 households with proportional representation from the three groups have been selected. The details of survey methodology and estimation procedure are provided in Appendix B.

2.2 ESTIMATION OF MPCE

2.2.0 The monthly per capita consumption expenditure (MPCE) of a household, defined as “*the total value of monthly consumption of goods & services of the household divided by the number of members of the household*” is based on the data collected from those households who provided information for all the three visits, i.e., the households from whom data pertaining to all the three questionnaires, namely, FDQ, CSQ and DGQ are available. The multiplier computed from the data of third visit is used for generation of the estimates.

2.2.1 It has been a practice in NSS household consumption expenditure surveys to impute the value figures at the time of collection of data in the field for consumption out of (i) home-grown/home-produced stock and (ii) gifts, free collection and goods received in exchange of goods and services etc. The same practice has been continued in HCES: 2022-23 & HCES: 2023-24 and accordingly, estimates of MPCE have been generated. These estimates are presented in Section I of Chapter 3.

2.2.2 The National Statistical Commission suggested to make some provision in the survey questionnaires of HCES to collect information on items/services received free of cost by the households through various Social Welfare Schemes. Accordingly, a separate provision for collection of information on the quantity of consumption for a number of items, received and consumed by the households free of cost through various social welfare programmes, has been made in HCES: 2022-23 & HCES: 2023-24. Consequently, the value figures for (i) food items: Rice, Wheat/Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of cost by the households has been imputed using an appropriate method, in addition to the items as mentioned in para 2.2.1 above.

2.2.3 Further, from January 2023, PDS items distributed to the NFSA beneficiaries have also been made free and consequently, the value figures of these items have also been imputed. Thereafter, as in HCES: 2022-23, another set of estimates of MPCE has been generated for HCES: 2023-24. These estimates, referred as 'MPCE estimates with imputation' are presented in Section II of Chapter 3.

2.2.4 It may be noted that the benefits provided under PM-JAY or any other state specific schemes provide cashless access to healthcare services to the beneficiary at the point of delivery of service, i.e., hospital and the beneficiary does not have any information on the cost of the services availed. For such schemes, entire premium is borne by the Government

and the beneficiary does not contribute. Since HCES is not a record-based survey, often it is not possible to ascertain the exact ailment or disease for which the benefit has been availed. Hence, in view of the complexity and appropriateness involved in imputation of the expenditure for such services, no attempt has been made to impute the expenditure of health services availed by the households free of cost. For similar reasons, the expenditure for free education services (i.e., reimbursement/waiver of school or college fees) has also not been imputed.

2.3 METHOD USED FOR IMPUTATION OF VALUE

2.3.0 'MPCE estimates with imputation', as a second set of estimates of MPCE has been generated considering the imputed values of the following items, in addition to the items as mentioned in para 2.2.1 above:

Free Food Items			
Sl. No.	item	Sl. No.	item
1	rice-free (061)	8	ragi-free (067)
2	wheat/atta-free (062)	9	small millets-free (068)
3	coarse grains-free (070)	10	pulse-free (071)
4	jowar-free (063)	11	gram-free (072)
5	bajra-free (064)	12	salt-free (073)
6	maize-free (065)	13	sugar-free (074)
7	barley-free (066)	14	edible oil-free (075)
15	rice, wheat/atta, coarse grains, jowar, bajra, maize, barley, ragi, small millets and sugar distributed through PDS and recorded in Questionnaire FDQ with source code '7'		

Free Non-food Items			
Sl. No.	item	Sl. No.	item
1	Laptop/PC (S. No. 1, Q4.3.2)	5	Motorcycle/ Scooty (S. No. 5, Q4.3.2)
2	Tablet (S. No. 2, Q4.3.2)	6	Clothing (School Uniform etc.) (S. No. 6, Q4.3.2)
3	Mobile handset (S. No. 3, Q4.3.2)	7	Footwear (School Shoe etc.) (S. No. 7, Q4.3.2)
4	Bicycle (S. No. 4, Q4.3.2)		

2.3.1 The value figures of these free items have been imputed by identifying the unit price at which the beneficiary household would have bought the same if it is not received free of cost. While deciding on an appropriate method of imputation, it has been assumed that all households belonging to a particular sector, state and second stage stratum (SSS) are homogeneous in terms of purchasing power and have more or less similar consumption pattern. Besides, consideration of a representative unit price for each of the imputed items at Sector × State × Second Stage Stratum (SSS) level would also address the variation in state-level prices. Thus, the adopted imputation method has been essentially based on finding an item-wise unit price at which the majority of the households would have purchased the item during the reference period.

2.3.2 In the questionnaires of HCES, in addition to collection of information on quantity figures for items received free of cost, there is provision for gathering information on quantity and value of each of these items consumed by the households 'out of purchase' during the reference period. From these quantity and value figures of each of the items consumed by the households 'out of purchase', item-level unit prices (value/quantity) are calculated for all households belonging to a particular Sector × State × Second Stage Stratum (SSS) level combination. Thereafter, the modal unit price for a particular item is determined at Sector × State × SSS level. In the absence of availability of sufficient number of observations at Sector × State × SSS level, the modal unit values are determined at Sector × State level. Using these item-wise modal unit prices, the total value of consumption of a particular free item is imputed as:

$$\text{Imputed value} = \text{Quantity consumed} \times \text{Modal unit value.}$$

2.3.3 For computation of Mode, Kernel Density Estimation procedure has been used i.e., each discrete point (i.e., each unit value) has been replaced by Gaussian distribution (kernel). The probability density at any given point in the space is then estimated to be the sum of the kernels at the chosen point over all the discrete points (after proper normalization). The rule-of-thumb bandwidth estimator has been used to approximate the width of a kernel or bandwidth.

2.3.4 In most of the cases while computing unit prices, it has been observed that sufficient observations are not present for at least one SSS (out of three) at Sector × State level. Therefore, to maintain uniformity, the unit prices for each item are calculated at the Sector × State level.

2.3.5 The items that have been considered for imputation of the value figures of the items received free of cost are given in the tables below:

Free Items and corresponding item(s) considered for imputation: Food	
Item (value) imputed	Item(s) considered for imputation
rice-free (061) & rice-PDS (101)	rice-other sources (102)
wheat/atta-free (062) & wheat/atta-PDS (107)	wheat/atta-other sources (108)
coarse grains-free (070) & coarse grains – PDS (001)	coarse grains - other sources (002)
jowar-free (063) & jowar-PDS (055)	jowar-other sources (115)
bajra-free (064) & bajra-PDS (056)	bajra-other sources (116)
maize-free (065) & maize-PDS (057)	maize-other sources (117)
barley-free (066) & barley-PDS (058)	barley-other sources (118)
ragi-free (067) & ragi-PDS (059)	ragi-other sources (121)
small millets-free (068) & small millets-PDS (060)	small millets-other sources (120)
pulse-free (071)	items 140, 141, 143, 144, 145 & 148
gram-free (072)	gram whole-other sources (142)
salt-free (073)	salt-other sources (170)
sugar-free (074) & sugar-PDS (171)	sugar-other sources (172)
edible oil-free (075)	items 181, 184, 182 & 183

Note: Value figures of PDS items have been imputed for 'reported source code 7'.

Free Items and corresponding item(s) considered for imputation: Durables	
Item (value) imputed	Item(s) considered for imputation
Laptop/PC (S. No. 1, Q4.3.2)	item 622 with value > Rs. 5000
Tablet (S. No. 2, Q4.3.2)	item 622 with value > Rs. 5000
Mobile handset (S. No. 3, Q4.3.2)	Mobile handset (item 623)

Free Items and corresponding item(s) considered for imputation: Durables	
Item (value) imputed	Item(s) considered for imputation
Bicycle (S. No. 4, Q4.3.2)	Bicycle (item 600)
Motorcycle/ Scooty (S. No. 5, Q4.3.2)	Motorcycle, scooter (item 601)
Clothing (School Uniform etc.) (S. No. 6, Q4.3.2)	Unit value = (Total value reported in items 356 & 357 of Section 13.1)/number of members attending government institution as reported in Q4.2.3 of Section 4.2
Footwear (School Shoe etc.) (S. No. 7, Q4.3.2)	items 390 & 394 of Section 13.2

2.4 EFFICACY OF THE ESTIMATES OF MPCE

2.4.0 The efficacy of the estimates of average MPCE values for each State/UT has been measured in terms of Relative Standard Error (RSE), defined as:

$$RSE = \frac{\text{Standard Error}}{\text{Estimate}} \times 100 \%$$

2.4.1 The formula used for estimation of the RSE is provided in Appendix B. The estimated RSE values along with 95% confidence intervals for estimates of average MPCE figures are given in Appendix C.

Chapter Three

Summary of Findings

3.1 INTRODUCTION

3.1.0 The prime indicator generated from the Household Consumption Expenditure Survey (HCES) is the average Monthly Per Capita Consumption Expenditure (MPCE), compiled at various level of disaggregation, namely, sector, State/UT or with regard to various characteristics of the households like household type, social group, etc. In addition, share of expenditure incurred on consumption of different types of items, share in quantity of consumption of various food items are also compiled from the information collected in HCES. Accordingly, discussions on the survey findings in this chapter are confined predominantly to these parameters. In addition, trend in MPCE covering past few NSS surveys on household consumption expenditure along with pattern in inequality in household consumption expenditure are also included in this Chapter.

3.1.1 As discussed in para 2.2.2 of Chapter 2, information on the quantity of consumption for a number of items, received and consumed by the households free of cost through various social welfare programmes has been collected in HCES: 2022-23 and HCES: 2023-24. Consequently, the value figures for (i) food items: Rice, Wheat/Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of cost by the households have been imputed using an appropriate method.

3.1.2 As a consequence, two sets of estimates of MPCE have been generated from HCES: 2023-24. The first one is by adopting the usual NSS practice of imputation of the value figures at the time of collection of data in the field for consumption out of home-grown/home-produced stock and; gifts, free collection and goods received in exchange of goods and services, etc. These estimates are presented in Section I of the present Chapter.

3.1.3 Another set of estimates of MPCE has been generated utilizing the imputed value figures of the items as mentioned in para 3.1.1 above in conjunction with adoption of usual NSS practice of imputation of values figures for the items by the field personnel as explained earlier. These estimates, referred as 'MPCE estimates with imputation' are presented in Section II of this Chapter.

3.1.4 Since the 'MPCE estimates with imputation' are derived using the imputed values of the items as mentioned in para 3.1.1, the estimates of MPCE using the conventional NSS practice and 'MPCE estimates with imputation' will vary. *Accordingly, for any domain or classification, the fractile classes of MPCE for the two types of MPCE figures will not be identical due to the fact that the set of households in the corresponding fractile classes will not, in general, be identical. Hence, any comparison of either MPCE values or share of expenditure between the two sets of MPCE estimates across the fractile classes to assess the impact of social welfare schemes will not be meaningful. Consequently, estimates of MPCE values with imputation as well as various types of cross-classifications of the same by fractile classes of MPCE have not been generated.*

3.1.5 Further, the fractile classes for rural and urban areas have been determined separately. Similarly, state-specific fractile classes are also derived and state-wise estimates for these classes are given in the detailed tables in Appendix A.

3.1.6 Apart from the average MPCE, the survey data has also been used to generate estimates of various parameters, separately for households for different fractile classes of MPCE. Among these, the absolute and percentage break-up of MPCE over categories of

consumption items, and quantity and value of per capita consumption of different cereals are important indicators.

3.1.7 The discussions in this chapter covers the following for rural and urban sectors:

- (a) average MPCE and MPCE across fractile classes,
- (b) trend in level of consumption,
- (c) median and deciles of the distribution of population by MPCE,
- (d) average MPCE across household size,
- (e) share of various food and non-food item groups in total expenditure,
- (f) inter-state variation in food and cereal consumption,
- (g) trend in per capita quantity consumption of cereals,
- (h) inter-state variation of expenditure for different food and non-food items,
- (i) trend in pattern of consumption of broad item groups,
- (j) average MPCE across social groups,
- (k) average MPCE across household types,
- (l) inequality in distribution of MPCE,
- (m) comparison of two types of estimates of MPCE figures.

3.2 SECTION I: ESTIMATES OF MPCE

3.2.0 The estimates presented in this section have been generated without imputing the value figures of the items (as mentioned in Para 3.1.1) received free by the households through various social welfare programmes. The value figures shown in tables and statements throughout this chapter are expressed as nominal values, unless otherwise stated and represents expenditure in Indian Rupee as reported by the respondents.

3.2.1 AVERAGE MPCE: MAJOR STATES AND ALL-INDIA

3.2.1.0 The average MPCE in rural and urban India in 2023-24 has been estimated to be Rs. 4,122 and Rs. 6,996, respectively without considering the values of items received free of cost through various social welfare programmes (Table 3.1). Thus, the per capita expenditure level in the urban areas, in nominal terms, and ignoring rural-urban differences in price levels, has been about 70% more than that in the rural areas.

Fractile classes of MPCE	Rural		Urban	
	Upper limit (Rs.)	Average MPCE (Rs.)	Upper limit (Rs.)	Average MPCE (Rs.)
(1)	(2)	(3)	(4)	(5)
0-5%	1,968	1,677	2,834	2,376
5-10%	2,260	2,126	3,313	3,093
10-20%	2,665	2,473	4,032	3,687
20-30%	2,997	2,833	4,673	4,353
30-40%	3,326	3,162	5,294	4,979
40-50%	3,674	3,498	5,956	5,622
50-60%	4,067	3,866	6,738	6,334
60-70%	4,565	4,304	7,714	7,199
70-80%	5,242	4,885	9,080	8,353
80-90%	6,414	5,763	11,546	10,139
90-95%	7,607	6,929	14,521	12,817
95-100%	-	10,137	-	20,310
All classes	-	4,122	-	6,996

Note: Break-up of MPCE by fractile classes for each State/UT is given in Statement Tables 2R and 2U.

3.2.1.1 The average MPCE (Rs. 10,137) of the top 5% of the population is about 6 times of the average MPCE (Rs. 1,677) of bottom 5% of India's rural population. The gap in average MPCE between the bottom 5% and top 5% of the population is more pronounced in the urban areas than the rural areas: with average MPCE at Rs. 20,310 of top 5% of the population about 8.5 times of the average MPCE (Rs. 2,376) of the bottom 5% of the population in urban areas.

3.2.1.2 The increase in the average MPCE in 2023-24 from the level of 2022-23 has been the maximum for the bottom 5 to 10 % of India's population, for both rural and urban areas. A comparison of average MPCE across different fractile classes for HCES: 2022-23 and HCES: 2023-24 is given in Table 3.2.

Table 3.2: Average MPCE across fractile classes of MPCE in 2022-23 and 2023-24, All-India

Fractile classes of MPCE	2022-23		2023-24	
	Rural	Urban	Rural	Urban
(1)	(2)	(3)	(4)	(5)
0-5%	1,373	2,001	1,677	2,376
5-10%	1,782	2,607	2,126	3,093
10-20%	2,112	3,157	2,473	3,687
20-30%	2,454	3,762	2,833	4,353
30-40%	2,768	4,348	3,162	4,979
40-50%	3,094	4,963	3,498	5,622
50-60%	3,455	5,662	3,866	6,334
60-70%	3,887	6,524	4,304	7,199
70-80%	4,458	7,673	4,885	8,353
80-90%	5,356	9,582	5,763	10,139
90-95%	6,638	12,399	6,929	12,817
95-100%	10,501	20,824	10,137	20,310
All classes	3,773	6,459	4,122	6,996

3.2.1.3 The average MPCE figures for rural and urban areas of the 18 major states are shown in Table 3.3 for both the periods 2022-23 & 2023-24. It is observed that among the major states, MPCE is the lowest in Chhattisgarh in both the sectors rural as well as urban in

2022-23 & 2023-24 (for rural areas; Rs. 2,466 in 2022-23 & Rs. 2,739 in 2023-24 and for urban areas; Rs. 4,483 in 2022-23 & Rs. 4,927 in 2023-24). It is the highest in Kerala (Rs. 5,924 in 2022-23 & Rs. 6,611 in 2023-24) in rural areas and in Telangana (Rs. 8,158 in 2022-23 & Rs. 8,978 in 2023-24) in urban areas.

Table 3.2: Average MPCE and urban-rural differences in MPCE in 2022-23 and 2023-24, major States

Major State	2022-23			2023-24		
	Average MPCE (Rs.)		Urban-Rural differences (%) in MPCE	Average MPCE (Rs.)		Urban-Rural differences (%) in MPCE
	Rural	Urban		Rural	Urban

Telangana	4,802	8,158	70	5,435	8,978	65
Uttar Pradesh	3,191	5,040	58	3,481	5,395	55
West Bengal	3,239	5,267	63	3,620	5,775	60
All-India	3,773	6,459	71	4,122	6,996	70

Note: Average MPCE for each State/UT is given in Statement Tables 2R and 2U.

3.2.1.4 A wide variation in urban-rural difference in average MPCE is observed across the 18 major states in 2022-23 as well as in 2023-24. Among the 18 major states, there has been a decline in urban-rural gap in 11 states in 2023-24 from the level of 2022-23. The lowest

urban-rural gap in 2023-24 is observed in Kerala (about 18%) and highest in Jharkhand (around 83%).

3.2.2 TREND IN LEVEL OF CONSUMPTION IN NOMINAL AND REAL PRICES

3.2.2.0 In nominal prices, the average MPCE in 2023-24 has increased by about 9% in rural areas and 8% in urban areas from the level of 2022-23 while in 2011-12 prices the increase in MPCE, both in rural and urban areas has been around 4% from the level of 2022-23. Table 3.3 shows the trend in nominal and real values of MPCE for rural and urban India during the period 1999-'00 to 2023-24.

Table 3.3: Trend in MPCE since 1999-'00, All-India						
Sector	Average MPCE (Rs.) in					
	1999-'00 NSS (55 th round)	2004-05 NSS (61 st round)	2009-10 NSS (66 th round)	2011-12 NSS (68 th round)	2022-23	2023-24
(1)	(2)	(3)	(4)	(5)	(6)	(7)
At nominal price						
Rural	486	579	1,054	1,430	3,773	4,122
Urban	855	1,105	1,984	2,630	6,459	6,996
At real price (2011-12 price)						
Rural	978	1,054	1,239	1,430	2,008	2,079
Urban	1,823	1,946	2,358	2,630	3,510	3,632

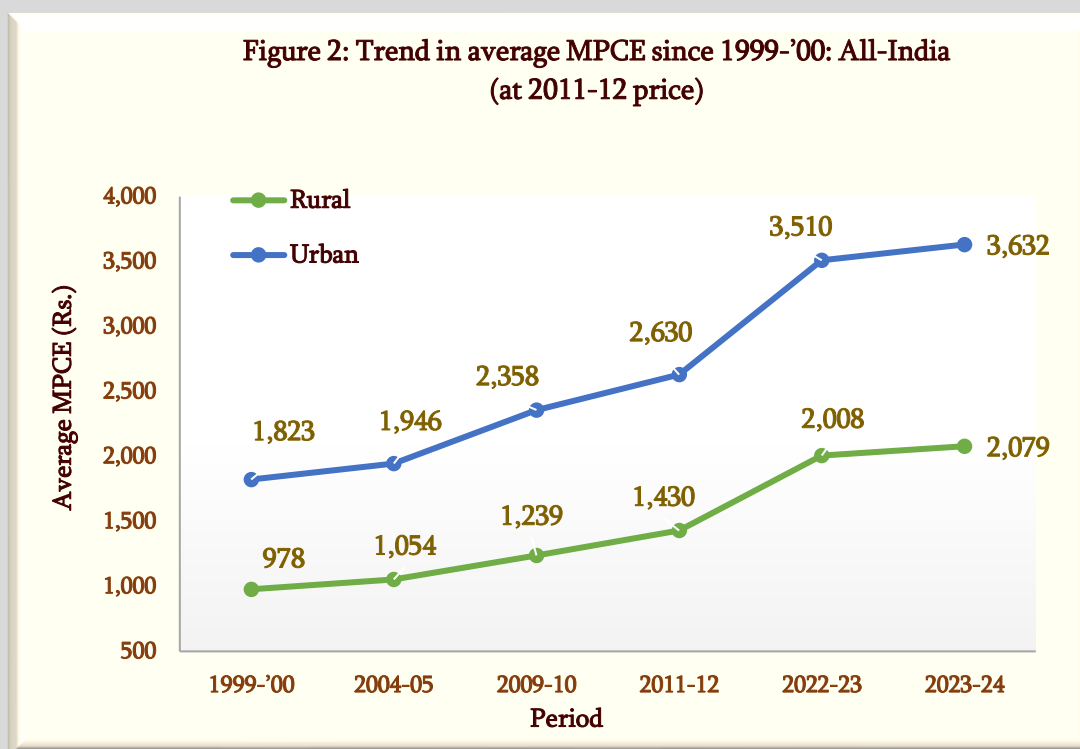

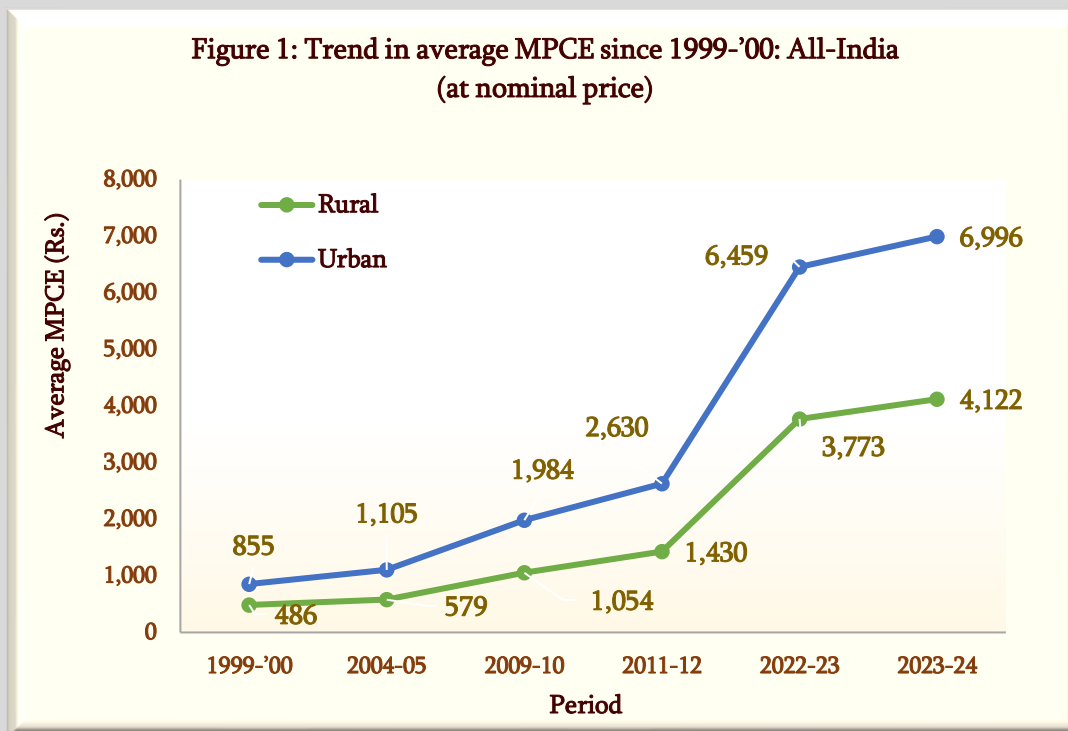

Note: (i) For the years 1999-'00 & 2004-05, estimates are based on Mixed Reference Period (MRP) and for the years 2009-10, 2011-12, 2022-23 and 2023-24, these are based on Modified MRP (MMRP).

MRP: The estimate of MPCE is based on household consumption expenditure on – (i) clothing and bedding, footwear, education, institutional medical care, and durable goods recorded for a reference period of “last 365 days”, and (ii) expenditure on all other items recorded for a reference period of “last 30 days”.

MMRP: The estimate of MPCE is based on household consumption expenditure on edible oil, egg, fish and meat, vegetables, fruits, spices, beverages, refreshments, processed food, pan, tobacco and intoxicants recorded for a reference period of “last 7 days”, and for all other items, recorded for the same reference period as in case of Mixed Reference Period (except for milk & milk products for which 7-days reference period has been considered in HCES:2022-23).

(ii) For the years 1999-'00, 2004-05 and 2009-10 the rural and urban MPCE estimates have been inflated using CPI(AL) and CPI(IW-General) respectively, to obtain the MPCE values at 2011-12 price. The MPCE estimates of 2022-23 and 2023-24 have been deflated using CPI(R) & CPI(U) for rural and urban sectors respectively to obtain the MPCE values at 2011-12 price.

3.2.2.1 Figures 1 and 2 represent the trend in average MPCE since 1999-'00 at nominal prices and 2011-12 prices, respectively.

3.2.3 MEDIAN AND DECILES OF THE MPCE DISTRIBUTION: MAJOR STATES

3.2.3.0 Tables 3.4R & 3.4U show the nine deciles, denoted by P10, P20, ..., P90 of distributions of MPCE for rural and urban sectors for the major states in India. The median level of rural MPCE has been about Rs. 3,674, i.e., half of the rural population belongs to households with MPCE below this level. In urban India, the median level of MPCE is about Rs. 5,956 indicating that half of the urban population has MPCE below this level. About 61.3% of the rural population of India has MPCE below the rural average of Rs. 4,122 and 62.9% of the urban population has MPCE below the urban average of Rs. 6,996.

Table 3.4R: Deciles of the distribution of persons by MPCE by major states -Rural

Major State	Deciles of the distribution of persons by MPCE								
	P ₁₀	P ₂₀	P ₃₀	P ₄₀	P ₅₀	P ₆₀	P ₇₀	P ₈₀	P ₉₀

*P_k (for k = 10, 20, 30, ..., 80, 90) is the kth percentile of the distribution of persons by MPCE, that is, the MPCE level below which k% of the population lie.

3.2.4 MPCE AND HOUSEHOLD SIZE: ALL-INDIA

3.2.4.0 Figure 3 shows MPCE values for 10 different household sizes. A steady decline in MPCE figures is observed with an increase in the size of the household. The MPCE figures for single member households have been, on an average, the highest while it is observed to be the lowest for households with 10 or more members. The same scenario is found to be present in rural as well as in urban areas.

3.2.5 SHARES OF VARIOUS FOOD AND NON-FOOD ITEM GROUPS IN TOTAL EXPENDITURE: ALL-INDIA

3.2.5.0 Table 3.5 shows the absolute and percentage break-up of all-India rural and urban MPCE in 2023-24 into 10 broad groups of food items and 11 broad groups of non-food items. A graphical representation of the percentage share of food and non-food items in total MPCE is given in Figure 4. A similar break-up of MPCE for the States/UTs is given in Statement Tables 3 and 4.

3.2.5.1 It is observed that in 2023-24, in rural India, food accounted for about 47% of the value of the average rural Indian households' consumption. Among the food items, the contribution of beverages, refreshments and processed food has been the highest (9.84%) followed by milk & milk products (8.44%) and vegetables (6.03%) in rural India. The contribution of cereals and cereal substitutes in the expenditure has been about 4.99%.

Among non-food items, the maximum contribution has been of conveyance (7.59%) followed by medical (6.83%), clothing, bedding & footwear (6.63%) and durable goods (6.48%).

3.2.5.2 In urban India, the contribution of food in MPCE in 2023-24 has been about 40% and similar to rural India, the contribution of beverages, refreshments and processed food has been the highest (11.09%) in food expenditure followed by milk & milk products (7.19%) and vegetables (4.12%).

3.2.5.3 The share of non-food items in MPCE in urban India has been around 60%, about 7% more than that of rural India. Conveyance with 8.46% contribution has the largest share in non-food expenditure in urban India while other major components of non-food expenditure in urban India are miscellaneous goods & entertainment (6.92%), durable goods (6.87%), and rent (6.58%).

Table 3.5: Absolute and percentage break-up of MPCE by item groups in 2023-24: All-India

Item group	Average MPCE (Rs.)		Percentage share in MPCE (%)	
	Rural	Urban	Rural	Urban
(1)	(2)	(3)	(4)	(5)
cereals & cereal substitutes	206	263	4.99	3.76

all items	4,122	6,996	100.00	100.00

*includes gram #includes purchased cooked meals \$excludes tailoring charges &includes tailoring charges

3.2.5.4 While interpreting observations from Table 3.5 above, the following needs to be considered:

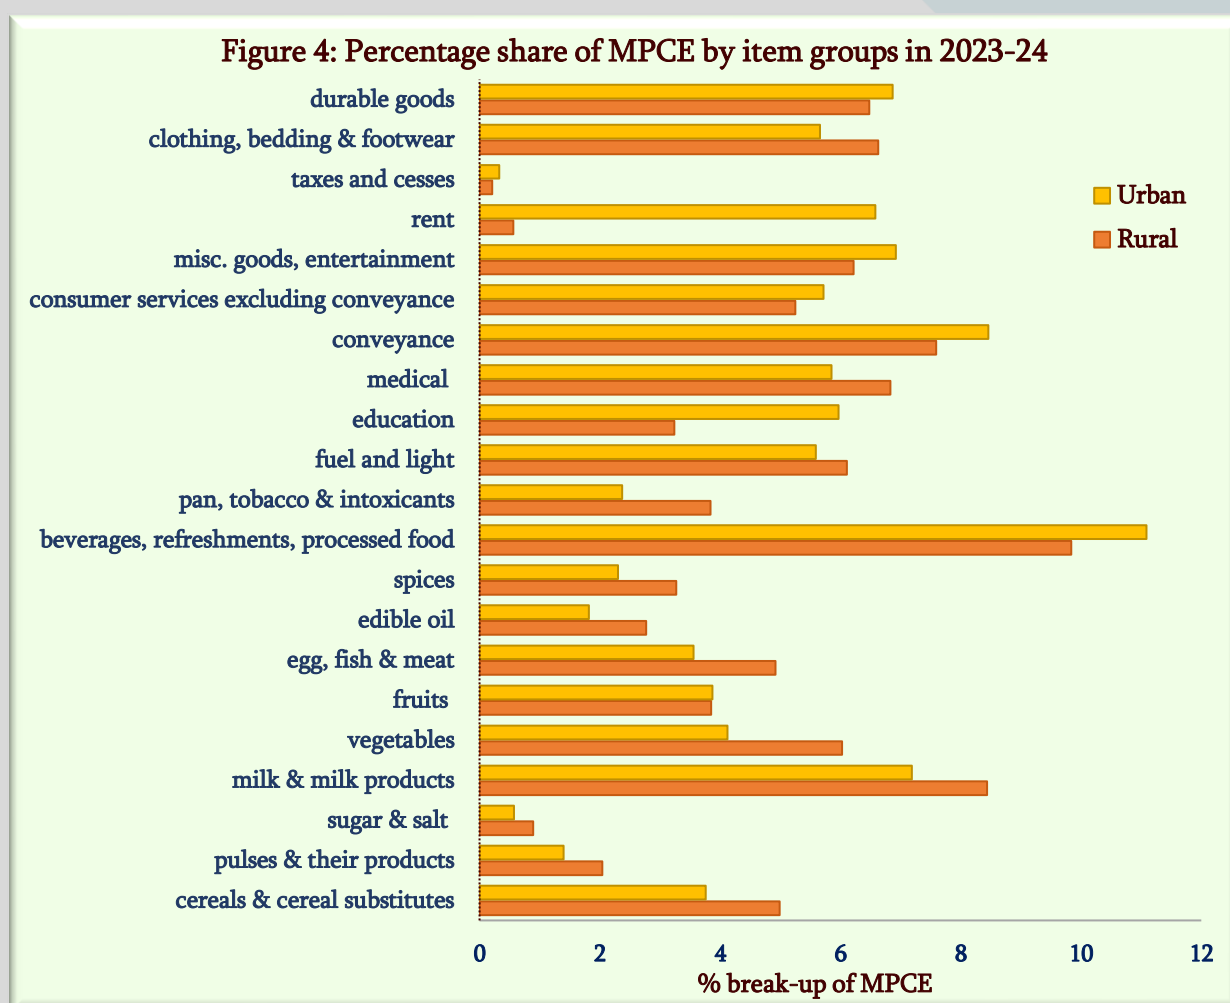

3.2.5.5 All averages are computed taking the entire estimated population in the denominator. This fact may be borne in mind, specially, for those items showing very low average expenditure, like 'rent' and 'taxes and cesses' in rural India. The actual number of consuming persons in the population is not considered here for any of the item groups. For some item groups such as cereals, consuming persons would mean nearly the entire population; for other items, such as tobacco, it would obviously be much smaller.

3.2.5.6 "Expenditure" on food includes the value of self-consumed home produce, calculated at ex-farm prices. It also includes the value of food collected free, for example, from forests, imputed at prevailing local retail prices. "Expenditure" on fuel, likewise, includes the value of home-grown firewood, calculated at ex-farm prices, and the value of firewood and other fuel collected free, imputed at local retail prices.

3.2.5.7 “Processed food” refers to purchased food items such as jam, pickles, etc., the quantities and values of the individual ingredients of which are not known well enough to be reported against the detailed items listed in the consumer expenditure schedule. All food processed at home is accounted against the ingredients. For example, a sweet prepared at home and consumed is accounted in the household’s (and the concerned State/UTs) consumption of cereals, sugar, milk, etc., but not in its consumption of processed food. Cooked meals and snacks purchased from outside are also considered in this category.

3.2.5.8 Spending on tailor-made clothing does not include tailoring charges, which are included in “consumer services”.

3.2.5.9 Figure 4 below shows the percentage share of broad item groups in total MPCE for rural and urban sector.

3.2.6 INTER-STATE VARIATION IN FOOD AND CEREAL CONSUMPTION: MAJOR STATES

3.2.6.0 Table 3.6 shows the percentage share of cereals and food as a whole in total expenditure for the major states. The share of food in total consumption expenditure of rural households varies from 40.32% (in Kerala) to 53.22% (in Assam). For urban sector, the share of food in consumption expenditure varies from 36.14% (in Maharashtra) to 48.79% (in Bihar).

3.2.6.1 The share of cereals in total expenditure in rural India varies from 2.56% (in Punjab) to 7.90% (in Jharkhand). In urban India, the share varies from 2.75% (in Haryana) to 5.84% (in Jharkhand).

Table 3.6: Percentage share of cereals and food in total consumption expenditure in 2023-24, major states

Major states	Rural		Urban	
	% share in total expenditure			
	cereals	food	cereals	food
(1)	(2)	(3)	(4)	(5)

3.2.7 TREND IN PER CAPITA QUANTITY CONSUMPTION OF CEREALS: ALL-INDIA

3.2.7.0 Table 3.7 below shows the comparison of per capita quantity consumption of cereals during last 30 days from the past five NSS surveys and HCES: 2023-24. A gradual decline in per capita quantity consumption of cereals in rural as well as urban areas has been observed during the period 1999-'00 to 2023-24.

Table 3.7: Trend in per capita quantity consumption of cereals since 1999-'00						
Sector	Monthly per capita cereal consumption (kg) in					
	1999-'00	2004-05	2009-10	2011-12	2022-23	2023-24

3.2.9 INTER-STATE VARIATION IN EXPENDITURE FOR DIFFERENT FOOD ITEMS: MAJOR STATES

3.2.9.0 Tables 3.9R and 3.9U below elucidate inter-state variation in food consumption pattern, with regard to contribution of cereals, processed food & beverages, milk & milk products, egg, fish & meat, vegetables and fruits to total food MPCE, separately for rural and urban sectors.

3.2.9.1 In rural sector, the share of the item category 'beverages, processed food etc.' in total food consumption has been maximum in 9 out of 18 major states. While the share of 'milk and milk products' has been the maximum in Gujarat, Haryana, Punjab, Rajasthan and Uttar Pradesh, in Kerala, 'egg, fish & meat' has the highest contribution. In urban sector also, the share of the item group 'beverages, processed food etc.' has been maximum in total food expenditure for almost all major states except for Chattisgarh, Haryana, Madhya Pradesh, Rajasthan and Uttar Pradesh where maximum share of consumption has been for milk & milk products.

Table 3.9R: Percentage share of selected food item groups in total food expenditure in 2023-24, major states - Rural

3.2.10 INTER-STATE VARIATION IN EXPENDITURE FOR DIFFERENT NON-FOOD ITEMS: MAJOR STATES

3.2.10.0 Tables 3.10R and 3.10U show inter-state variation in non-food consumption pattern, to the extent reflected in percentage share expenditure in total non-food MPCE with regard to monthly consumption expenditure on fuel & light, conveyance, education, medical, clothing, bedding & footwear, durable goods, and miscellaneous goods, separately for rural and urban sectors. For both rural and urban areas, conveyance has been found to be a major contributor to the total non-food expenditure of the households for almost all

the major states and it is closely followed by durable goods, medical, clothing, bedding & footwear and miscellaneous goods, entertainment.

Table 3.10R: Percentage share of expenditure of non-food items in total non-food expenditure in 2023-24, major states - Rural

3.2.11 TREND IN PATTERN OF CONSUMPTION OF BROAD ITEM GROUPS: ALL-INDIA

3.2.11.0 Tables 3.11R and 3.11U show changes in percentage composition of MPCE in terms of broad item groups as shown by the past five NSS surveys beginning with 1999-00 separately, for rural and urban sectors. The share of food is seen to have shrunk from 59.40% in 1999-00 to 47.04% in 2023-24 in the rural areas and from 48.06% to 39.68% in the urban areas during the corresponding period.

3.2.11.1 Although, there has been a decline in the share of food items like cereals, pulses & pulse products and sugar & salt over the period, the item category of “processed food, beverages, etc.” has shown a remarkable growth in contribution to total MPCE in 2023-24 when compared with the earlier periods. The decline in the share has been the steepest for cereals which has come down to 4.89% in 2022-23 from 22.16% in 1999-‘00 in rural India and for urban India, the corresponding share has declined to 3.62% in 2022-23 from 12.35% in 1999-‘00. Similar trend in consumption of cereals continues in 2023-24.

3.2.12 AVERAGE MPCE ACROSS SOCIAL GROUPS: MAJOR STATES

3.2.12.0 Table 3.12 presents state-wise average rural and urban MPCE across different social groups for major states in India. The variation in MPCE among the social groups is the highest in Kerala in rural areas and in Haryana in urban areas. It is the least in Assam among the major state for both the sectors. Monthly average value of consumption per person across different social groups for each State/UTs and All-India is given in Statement Table 8.

Table 3.12: Average MPCE (Rs.) by social group in 2023-24, major states

Major states	Rural					Urban				
	ST	SC	OBC	Others	all#	ST	SC	OBC	Others	all#

includes not reporting cases (i.e., those who have not reported social group).

3.2.13 AVERAGE MPCE ACROSS HOUSEHOLD TYPES: MAJOR STATES

3.2.13.0 Tables 3.13R and 3.13U present the average MPCE (rural and urban) by household type for each major state. It is observed that the households belonging to the 'regular wage/salary earning in non-agriculture' has the highest average MPCE (Rs. 5,005), followed by households with 'others' category (Rs. 4,747) in rural India. The rural households belonging to the category 'casual labour in agriculture' has the lowest MPCE (Rs. 3,652). In urban areas, the households of 'others' category has the highest average MPCE (Rs. 9,159) while it is the lowest for households of 'casual labour' category (Rs. 4,964).

3.2.13.1 Among the major states, the households belonging to the category 'others' has the highest average MPCE (Rs. 7,506) in Kerala, and it has the lowest average MPCE in the households belonging to the 'casual labour in agriculture' in Chhattisgarh (Rs. 2,606) in the rural areas. In the urban areas, the households belonging to the category 'others' has the highest average MPCE (Rs. 12,619) in Telangana, and it has the lowest average MPCE in the households belonging to the category 'casual labour' in Jharkhand (Rs. 3,440).

3.2.13.2 Monthly average value of consumption per person across different household type for State/UTs and All-India is given in Statement table 7.

Table 3.13R: Average MPCE (Rs.) by household type in 2022-23, major states -Rural

3.2.14 INEQUALITY IN DISTRIBUTION OF MPCE: ALL-INDIA

3.2.14.0 Table 3.14 gives the share of each all-India rural and urban fractile class in total consumption expenditure. A decline in the percentage share of consumption expenditure has been observed for the top three fractile classes of MPCE for rural as well as urban areas in 2023-24 from the level of 2022-23.

Table 3.14: Percentage share of consumption in different fractile classes of MPCE in 2022-23 and 2023-24: All- India

Fractile classes of MPCE	% share of consumption			
	Rural		Urban	
	2022-23	2023-24	2022-23	2023-24
(1)	(2)	(3)	(4)	(5)
0-5%	1.8	2.0	1.5	1.7
5-10%	2.4	2.6	2.0	2.2
10-20%	5.6	6.0	4.9	5.3
20-30%	6.5	6.9	5.8	6.2
30-40%	7.3	7.7	6.7	7.1
40-50%	8.2	8.5	7.7	8.0
50-60%	9.2	9.4	8.8	9.1
60-70%	10.3	10.4	10.1	10.3
70-80%	11.8	11.9	11.9	11.9
80-90%	14.2	14.0	14.8	14.5
90-95%	8.8	8.4	9.6	9.2
95-100%	13.9	12.3	16.1	14.5

3.2.14.1 Consumption inequality, both in rural and urban areas has declined from the level of 2022-23. The Gini coefficient has declined to 0.237 in 2023-24 from 0.266 in 2022-23 for rural areas and to 0.284 in 2023-24 from 0.314 in 2022-23 for urban areas. (Table 3.15). The values of the Gini coefficient for major states for rural and urban areas are given in Table 3.16.

Table 3.15: Gini coefficient of total consumption expenditure in 2011-12, 2022-23 and 2023-24, All-India

Sector	Gini coefficient of consumption expenditure		
	2011-12	2022-23	2023-24
(1)	(2)	(3)	(4)
Rural	0.283	0.266	0.237
Urban	0.363	0.314	0.284

3.2.14.2 A comparison of the Lorenz curves for total consumption expenditure for the years 2022-23 and 2023-24 are shown in Figures 5R and 5U separately, for rural and urban India.

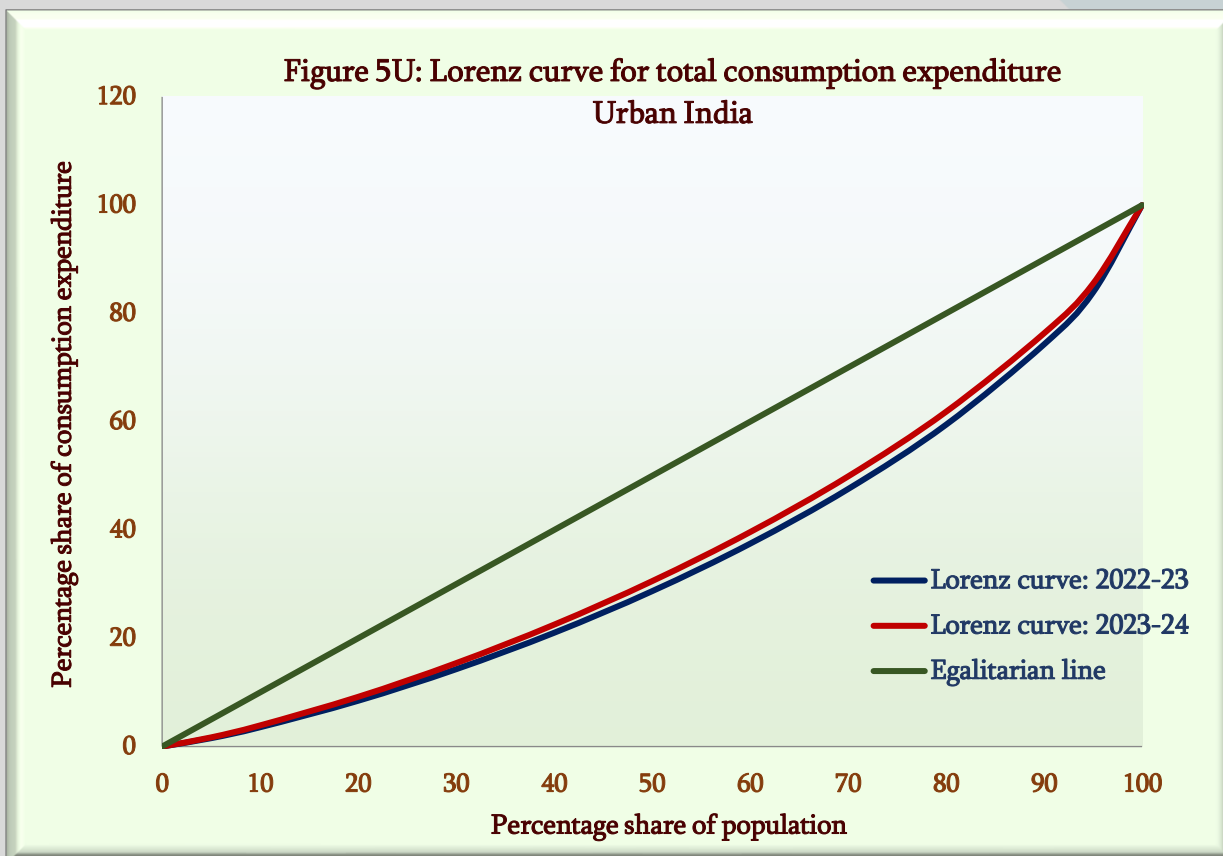

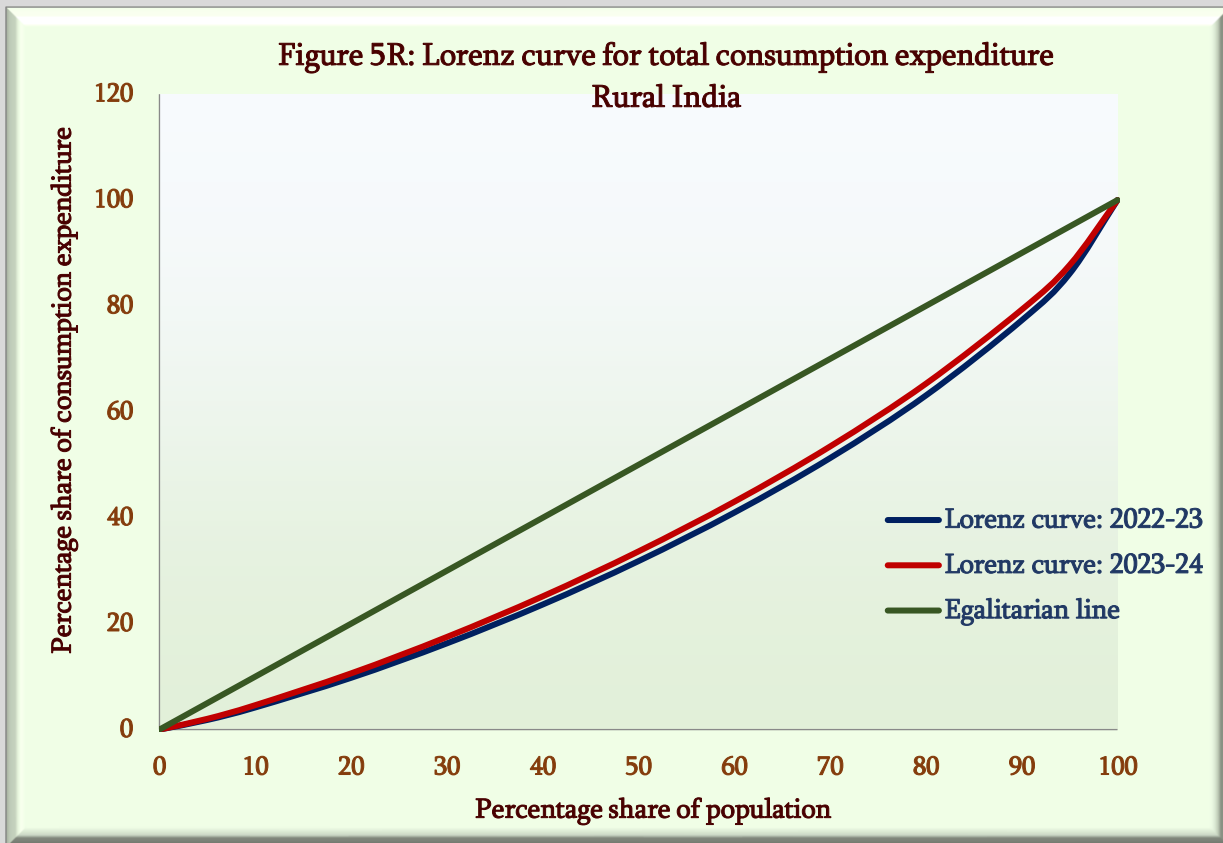

Table 3.16: Gini coefficient of total consumption expenditure in 2023-24, major states

Major state	Rural	Urban
(1)	(2)	(3)
Andhra Pradesh	0.196	0.240
Assam	0.183	0.243
Bihar	0.191	0.232
Chhattisgarh	0.211	0.273
Gujarat	0.210	0.233
Haryana	0.187	0.294

Maharashtra	0.229	0.288
Odisha	0.221	0.287
Punjab	0.190	0.218
Rajasthan	0.241	0.282
Tamil Nadu	0.210	0.249
Telangana	0.164	0.256
Uttar Pradesh	0.191	0.269
West Bengal	0.196	0.285
All-India	0.237	0.284

3.3 SECTION II: ESTIMATES OF MPCE - WITH IMPUTATION

3.3.0 The estimates of average MPCE presented here have been generated considering the imputed value figures of the items received free by the households through various social welfare programmes (as mentioned in para 3.1.1), in addition to the imputed values of consumption out of home produce, free collection, gifts etc. as explained in para 2.2.2 of Chapter 2. With a view to reduce redundancy and lessen burden of the readers, this section is not made an identical replica of Section I in terms of composition of sub-sections and contents thereof. Instead, in view of the fact that imputation is restricted to few selected items only, changes in the estimates of average MPCE figures by various cross-classifications with regard to different domains are presented in summarized tabular format along with a comparison with the MPCE figures discussed in Section I.

3.3.1 A separate data file containing the modal unit prices used for imputation of the value figures for (i) food items: Rice, Wheat/Atta, Jowar, Bajra, Maize, Ragi, Barley, Small Millets, Pulses, Gram, Salt, Sugar, Edible Oil and (ii) non-food items: Laptop/PC, Tablet, Mobile Handset, Bicycle, Motor Cycle/Scooty, Clothing (School uniform), Footwear (School shoe etc.) received free of cost by the households is being released with the unit level data. This would allow the users to generate estimates of MPCE and its various components with imputation at disaggregated levels.

3.3.2 COMPARISON OF TWO-SETS OF MPCE FIGURES: MAJOR STATES

3.3.2.0 A comparison of the average MPCE figures for major states using the conventional NSS approach as well as utilizing the imputed values of the items as mentioned in para 3.1.1 is given in Table 3.17. As a consequence of imputation, there is an

increase in the MPCE figures with imputation and this has also resulted in marginal decline in urban-rural differences in MPCE across all major states in rural as well as urban areas.

Table 3.17: Average MPCE and urban-rural differences in MPCE in 2023-24, major States

Major state	Average MPCE (Rs.)			Average MPCE (Rs.) with imputation		
	Rural	Urban	urban-rural differences (%) in MPCE	Rural	Urban	urban-rural differences (%) in MPCE
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	5,327	7,182	35	5,539	7,341	33
Assam	3,793	6,794	79	3,961	6,913	75
Bihar	3,670	5,080	38	3,788	5,165	36
Chhattisgarh	2,739	4,927	80	2,927	5,114	75
Gujarat	4,116	7,175	74	4,190	7,198	72
Haryana	5,377	8,427	57	5,449	8,462	55
Jharkhand	2,946	5,393	83	3,056	5,455	79
Karnataka	4,903	8,076	65	5,068	8,169	61
Kerala	6,611	7,783	18	6,673	7,834	17
Madhya Pradesh	3,441	5,538	61	3,522	5,589	59
Maharashtra	4,145	7,363	78	4,249	7,415	75
Odisha	3,357	5,825	74	3,509	5,925	69
Punjab	5,817	7,359	27	5,874	7,383	26
Rajasthan	4,510	6,574	46	4,626	6,640	44
Tamil Nadu	5,701	8,165	43	5,872	8,325	42
Telangana	5,435	8,978	65	5,675	9,131	61
Uttar Pradesh	3,481	5,395	55	3,578	5,474	53
West Bengal	3,620	5,775	60	3,815	5,903	55
All-India	4,122	6,996	70	4,247	7,078	67

Note: (i) 'Average MPCE' represents the MPCE figures generated following the usual NSS practice of imputation of the value figures at the time of collection of data in the field for consumption out of home-grown/home-produced stock and; gifts, free collection and goods received in exchange of goods and services, etc.

(ii) 'Average MPCE with imputation' represents the MPCE figures generated utilizing the imputed value figures of the items as mentioned in para 3.1.1 in conjunction with adoption of usual NSS practice of imputation of value figures for the items by the field personnel as explained earlier.

3.3.3 TREND IN LEVEL OF CONSUMPTION IN NOMINAL AND REAL PRICES: ALL-INDIA

3.3.3.0 Table 3.18 shows the trend in nominal and real values of imputed MPCE for rural and urban India during the period 1999-'00 to 2023-24.

Table 3.18: Trend in MPCE since 1999-'00, All-India								
Sector	Average MPCE (Rs.) in							
	1999-'00 NSS (55th round)	2004-05 NSS (61st round)	2009-10 NSS (66th round)	2011-12 NSS (68th round)	2022-23		2023-24	
					Average MPCE (Rs.)	Average MPCE (Rs.) with imputation	Average MPCE (Rs.)	Average MPCE (Rs.) with imputation
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
At nominal price								
Rural	486	579	1,054	1,430	3,773	3,860	4,122	4,247
Urban	855	1,105	1,984	2,630	6,459	6,521	6,996	7,078
At real price (2011-12 price)								
Rural	978	1,054	1,239	1,430	2,008	2,054	2,079	2,142
Urban	1,823	1,946	2,358	2,630	3,510	3,543	3,632	3,674

Note: (i) For the years 1999-'00 & 2004-05, estimates are based on Mixed Reference Period (MRP) and for the years 2009-10, 2011-12 and 2022-23, these are based on Modified MRP (MMRP).

MRP: The estimate of MPCE is based on household consumption expenditure on – (i) clothing and bedding, footwear, education, institutional medical care, and durable goods recorded for a reference period of “last 365 days”, and (ii) expenditure on all other items recorded for a reference period of “last 30 days”.

MMRP: The estimate of MPCE is based on household consumption expenditure on edible oil, egg, fish and meat, vegetables, fruits, spices, beverages, refreshments, processed food, pan, tobacco and intoxicants recorded for a reference period of “last 7 days”, and for all other items, recorded for the same reference period as in case of Mixed Reference Period (except for milk & milk products for which 7-days reference period has been considered in HCES:2022-23).

(ii) For the years 1999-'00, 2004-05 and 2009-10 the rural and urban MPCE estimates have been inflated using CPI(AL) and CPI(IW-General) respectively, to obtain the MPCE values at 2011-12 price. The MPCE estimates of 2022-23 have been deflated using CPI(R) & CPI(U) for rural and urban sectors respectively to obtain the MPCE values at 2011-12 price.

3.3.4 COMPARISON OF SHARES OF VARIOUS FOOD AND NON-FOOD ITEM GROUPS IN TOTAL EXPENDITURE: ALL-INDIA

3.3.4.0 Table 3.19 shows the absolute and percentage break-up of all-India rural and urban average MPCE and average MPCE with imputation for 2023-24 into 10 broad groups of food items and 11 broad groups of non-food items.

Table 3.19: Absolute and percentage break-up of MPCE by item groups in 2023-24: All-India

Item group	Average MPCE (Rs.)		Average MPCE (Rs.) with imputation		% share in total MPCE		% share in total MPCE with imputation

A Note for the Users of Unit Level Data of HCES: 2023-24

The objective of the Household Consumption Expenditure Survey (HCES): 2023-24 has been to collect information on consumption of goods and services by the households for generation of indicators for understanding the consumption and expenditure pattern, standard of living and well-being of the households. The main indicator compiled on the basis of the data collected through HCES is the Monthly Per Capita Consumption Expenditure (MPCE) of the household.

Like all other NSS surveys, in this survey too, there has been provision to collect information on household characteristics e.g., social group, religion, household type, etc. along with demographic particulars of household members, namely, age, marital status, highest educational level attained, etc. in Section 3 and Section 4 of the questionnaire HCQ. Information on these items of Sections 3 & 4 have been recorded by the survey enumerators on the basis of reporting by the respondents and no cross-check/validation of these has been done with the relevant documents. The purpose of gathering information on these auxiliary variables has been to generate estimates of the indicators related to the variables of interest by different types cross-classifications and not to generate any estimates like sex ratio, literacy rates, percentage of population by various social groups etc. on the basis of these auxiliary information. Consequently, data related to these auxiliary variables were recorded as reported by the respondent and not verified with any administrative record(s). Hence, the users of the unit level data are advised not to make use of the auxiliary information for estimation of indicators, as such an exercise would result in misleading and inappropriate conclusions.

The survey has also gathered auxiliary information on the following items:

- Online purchase/payment of some selected goods and services,
- Household's usual consumption expenditure in a month,
- Total expenditure incurred on online purchase/payment of food items/consumable & services items during the last 30 days and expenditure incurred on online purchase/payment of durable goods during the last 365 days etc.

The sole purpose of gathering on these items has been to check internal consistency and validation of the data and not to compile estimates/indicators based on this information. States/UTs have been regarded as the basic stratum in HCES: 2023-24. Thus, any attempt to generate estimates of MPCE below State/UT level may lead to inaccurate/inappropriate figures in the absence of availability of sufficient number of sample observations at district level and users should refrain from generating such estimates.

Summary Statement

List of Summary Statement

Statement no.	Description	Page no.
Statement 1	Average monthly per capita consumption expenditure (MPCE) by State/UT and sector	S1
Statement 2R/2U	Average MPCE over 12 fractile classes of MPCE for State/UT and All-India	S2
Statement 3R/3U	Break-up of monthly per capita consumption expenditure over broad categories of consumption items by State/UT	S4
Statement 4R/4U	Percentage break-up of monthly per capita consumption expenditure over broad categories of consumption items by State/UT	S16
Statement 5R/5U	Monthly average quantity of consumption of different cereals per person for State/UT and All-India	S28
Statement 6R/6U	Monthly average value of consumption of different cereals per person for State/UT and All-India	S30
Statement 7R/7U	Average MPCE (Rs.) across different household types for State/UT and All-India	S32
Statement 8R/8U	Average MPCE (Rs.) across different social groups for State/UT and All-India	S34
Statement 9	Average monthly per capita consumption expenditure and Gini Coefficient for per capita consumption expenditure by State/UT and sector	S36

Appendix A

Detailed Tables

List of Detailed Tables (hyperlinked with the corresponding excel tables)

Table no.	Description
Table A1	Number of FSUs surveyed and number of households surveyed
Table A2	Estimated number of households and persons by gender, and average MPCE for each fractile class of MPCE
Table A3	Percentage distribution of households by size for each fractile class of MPCE
Table A4	Quantity (kg.) of consumption of cereals and pulses per person for a period of 30 days for each fractile class of MPCE
Table A5	Value (Rs.) of consumption of cereals and pulses per person for a period of 30 days for each fractile class of MPCE
Table A6	Value of consumption (Rs.) of broad groups of food and non-food items per person for a period of 30 days for each fractile class of MPCE
Table A7	Percentage distribution of households in different all-India fractile classes for each State/UT
Table A8R/9U	Percentage distribution of persons by fractile class of MPCE and Average value of MPCE for different household types
Table A9	Percentage distribution of persons by fractile class of MPCE and Average value of MPCE for different social groups
Table A10S	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption by State/UT and All-India
Table A10F	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption over 12 fractile classes of MPCE
Table A10SW	Monthly per capita quantity and value of consumption at detailed item level for all items of consumption by State/UT and All-India-With Imputation

Appendix B

Survey Methodology & Estimation Procedure

Survey Methodology & Estimation Procedure

2.1 INTRODUCTION

2.1.0 The latest survey on household consumption expenditure (previously known as household consumer expenditure survey) was conducted during the period August 2023 to July 2024 in which information was collected from each sampled household in three questionnaires, namely, Questionnaire: FDQ (Food Items), Questionnaire: CSQ (Consumables & Services) and Questionnaire: DGQ (Durable Items) in three separate monthly visits in a quarter. Apart from these, another questionnaire, namely, Questionnaire: HCQ was canvassed to collect information on household characteristics.

2.2 SAMPLING DESIGN

2.2.0 In HCES: 2023-24, a multi-stage stratified sampling design was used where villages/urban blocks or sub-units of these were regarded as the First Stage Units (FSU) and the households were the Ultimate Stage Units (USU). Both the FSUs and USUs were selected with Simple Random Sampling Without Replacement (SRSWOR). 18 sample households were canvassed within an FSU.

2.2.1 CONCEPT OF PANEL

2.2.1.0 The survey period of HCES: 2023-24 was divided into 10 panels, each consisting of three months. The compositions of the panels were as below:

Panel number	Time period	Panel number	Time period
Panel 1	August - October 2023	Panel 6	January - March 2024
Panel 2	September – November 2023	Panel 7	February - April 2024
Panel 3	October - December 2023	Panel 8	March - May 2024
Panel 4	November 2023- January 2024	Panel 9	April - June 2024
Panel 5	December 2023- February 2024	Panel 10	May - July 2024

2.2.1.1 In each of these panels, an equal number of FSUs were allotted for survey to ensure uniform spread of the sample over the entire survey period. Because of arduous field conditions, panel restriction was not strictly enforced in the Andaman and Nicobar Islands, Lakshadweep, Ladakh and rural areas of Arunachal Pradesh and Nagaland.

2.2.1.2 In the first month of any panel, Questionnaire: HCQ along with any one of the questionnaires, i.e., FDQ/CSQ/DGQ were canvassed in the selected households. During the second month of the panel, any one from the remaining two questionnaires was canvassed and in the last month, the last questionnaire was canvassed. The sequence of the questionnaires to be canvassed in each month of a panel for a particular FSU was decided randomly to eliminate bias that may arise due to the adoption of a particular sequencing for canvassing. Thus, all six possible sequences, i.e., [(Q1, Q2, Q3), (Q1, Q3, Q2), (Q2, Q1, Q3), (Q2, Q3, Q1), (Q3, Q1, Q2) and (Q3, Q2, Q1)], where Q1 refers to FDQ, Q2 refers to CSQ and Q3 refers to DGQ, were canvassed at random in the sample households.

2.2.2 CHOICE OF FIRST STAGE UNIT / SAMPLING FRAME FOR FIRST STAGE UNIT

2.2.2.0 The sampling frame for urban sector is the list of Urban Frame Survey (UFS) blocks as per latest Urban Frame Survey and for rural sector, it is the list of villages as per

Census 2011 updated by removing those villages which are urbanized and included in latest UFS (till the time of sample selection). Sometimes, with a view to ensure uniformity in the size of FSUs and operational convenience, large villages/UFS blocks are notionally divided into smaller units of more or less equal size, known as sub-units depending on a pre-defined criteria based on population in the village or number of households in the UFS block. The sector-specific criteria for sub-unit formation are as below:

Rural Sector

- (i) The number of SUs to be formed in the villages (with Census 2011 population of 1000 or more and except some States/UTs) are decided based on projected present population of the village. The criteria are given below:

Projected Population of the village	Number of SUs to be formed
less than 1200	1
1200 to 2399	2
2400 to 3599	3
...	...

- (ii) For rural areas of Himachal Pradesh, Sikkim, Andaman & Nicobar Islands, Ladakh, Parts of Uttarakhand (except four districts Dehradun, Nainital, Haridwar and Udham Singh Nagar), Jammu and Kashmir (seven districts Poonch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban) and Idukki district of Kerala; SU is formed in a village if population as per Census 2011 is more than or equals to 500. The criteria for the number of SU to be formed are as below:

Projected Population of the village	Number of SUs to be formed
less than 600	1
600 to 1199	2
1200 to 1799	3
...	...

Urban Sector:

- (i) SUs are formed in those UFS blocks having more than or equal to 250 households. The number of SUs to be formed within the UFS blocks is decided by the following criteria:

Number of Households in UFS Block	Number of SUs to be formed
less than 250	1
250 to 499	2
500 to 749	3
...	...

Thus, the list of Villages / UFS Blocks / Sub-Units (for those villages or UFS blocks where sub-units are formed within) together formed the sampling frame for First Stage Unit selection.

2. 2.3 STRATIFICATION OF FSUS

2.2.3.0 A State/UT is considered as a basic geographical unit for stratum formation in both the sectors for HCES:2023-24. The sector-specific stratification criteria are given below:

Rural Sector:

- (i) A **Special Stratum** comprising of all the uninhabited villages as per Census 2011 is formed at All-India level.
- (ii) From the remaining villages, two more strata are formed in each State/UT:
- (a) Stratum 1: Comprising of the villages within a distance of 5 Kms from the district headquarter or from a city/town with more than 5 lakh population. This stratum is not formed if there are less than 50 such villages in the State/UT.
- (b) Stratum 2: Rest of the villages.

Urban Sector: UFS blocks within each State/UT are divided into strata based on two criteria *i.e.*, Population as per Census 2011 and 'Affluence' status as indicated in UFS frame. The stratum compositions are as follows:

Strata Number	Strata Composition
Stratum 11:	'affluent' UFS blocks of all towns with population less than 50,000
Stratum 12:	remaining UFS blocks of all towns with population less than 50,000
Stratum 21:	'affluent' UFS blocks of all towns with population 50,000 or more but less than 3 lakhs
Stratum 22:	remaining UFS blocks of all towns with population 50,000 or more but less than 3 lakhs
Stratum 31:	'affluent' UFS blocks of all towns with population 3 lakhs or more but less than 10 lakhs
Stratum 32:	remaining UFS blocks of all towns with population 3 lakhs or more but less than 10 lakhs
Stratum 41, 42, 43...	Separate stratum for each of the Million plus towns, Odd and even numbers are given for affluent and non-affluent blocks respectively

2.2.4 SUB-STRATIFICATION OF FSUS

2.2.4.0 In the **rural sector**, three groups of villages are formed within each stratum, except special rural stratum at all-India level based on the following criteria:

Group	Population of the village (as per Census 2011)
1	less than 250
2	250 to 499
3	≥ 500

2.2.4.1 Further, the sample size for a particular rural stratum is distributed among these 3 groups in proportion to population and if the group-wise allocation is more than 20, 2 or more sub-strata are formed in each group. If the number of FSUs in a particular group is very small, no sub-stratum is formed.

2.2.4.2 In the **urban sector**, if the sample size allocated for an urban stratum is more than 20, 2 or more sub-strata are formed based on the number of FSUs within that stratum.

2.2.5 SAMPLE SIZE

2.2.5.0 8,684 FSUs in the rural areas and 6,143 in the urban areas have been surveyed in HCES:2023-24. The total sample size of 14,827 FSUs has been allocated to State/UTs in proportion to Census 2011 population, subject to a minimum allocation of 40 FSUs.

2.2.6 SELECTION OF FSUS WITHIN A STRATUM/SUB-STRATUM

2.2.6.0 The required number of FSUs from each of the sub-strata is selected by SRSWOR scheme. The selected sample is divided into 10 Panels with 2 dependent sub-samples within each Panel. Three sequences of questionnaires are canvassed in the FSUs belonging to sub-sample 1 and remaining three sequences are canvassed in FSUs sub-sample 2.

2.2.7 FORMATION OF SUB-DIVISION

2.2.7.0 It has been experienced that in some of the selected FSUs, the actual present population is significantly higher than the projected population/Census population that causes operational inconvenience for listing of all the households. In such a situation, the selected FSU is notionally sub-divided into several smaller units, called Sub-division. The

criteria for determining the number of Sub-divisions to be formed in the selected rural (except areas mentioned in Point ii Para 1.2.2) /urban FSU is given below.

Approx. present population of the selected	Number of Sub-divisions to be formed
less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
...	...

2.2.7.1 The criteria for determining the number of Sub-divisions in rural areas mentioned in Point (ii) of Para 1.2.2 is as below:

Approx. present population of the selected	Number of Sub-divisions to be formed
less than 750	1
750 to 1199	2
1200 to 1799	3
1800 to 2399	4
...	...

2.2.7.2 Only one Sub-division is selected randomly after forming the required number of Sub-divisions. Further, listing and selection of households are done in the selected Sub-division unit only.

2.2.8 FORMATION OF SECOND STAGE STRATA (SSS)

2.2.8.0 In order to ensure proper representation of households of different economic categories in the sample, all the households of a selected FSU are classified into three second stage stratum (SSS) with the following criteria:

SSS	Rural	Urban
SSS 1	Households with land possessed $> X$, where X is such that 5% of the households had land possessed more than X as per NSS 77 th round SAS survey. This was determined at State/UT level	Households owned one or more four-wheeler cars for non-commercial use as on date of listing whose combined purchase price was more than Rupees 10 lakhs
SSS 2	Households with land possessed $> Y$ and less than or equal to X , where Y is such that 20% of the households had land possessed more than Y as per NSS 77 th round SAS survey. This was determined at State/UT level	Households owned one or more four-wheeler cars for non-commercial use as on date of listing whose combined purchase price was less than or equal to Rupees 10 lakhs
SSS 3	Remaining households	Remaining households

2.2.8.1 A total of 18 households are surveyed from each of the selected FSUs. Allocation of the sample households among the three SSS is done in proportion to the number of households listed in the respective SSS.

2.2.9 SELECTION OF HOUSEHOLDS

2.2.9.0 The sample households from each SSS are selected by the SRSWOR scheme.

3. ESTIMATION PROCEDURE

3.1 NOTATIONS:

s	Subscript for s th stratum
t	Subscript for t th sub-stratum
r	Panel number [r= 1(1)10]
m	Subscript for sub sample
i	Subscript for i th FSU [SU/ village /panchayat ward/ block]
j	Subscript for j th second stage stratum in an FSU
k	Subscript for k th sample household under a particular second stage strata within an FSU/sub-division
D_1	Total number of sub-divisions formed in the sample FSU. $D_1 = 1$, if no Sub-division is formed in the SU
N	Total number of sub-unit (FSU) in any rural/urban sub-stratum
n	Number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum
H	Total number of households listed in a second-stage stratum of an FSU
h	Number of households surveyed in a second-stage stratum of an FSU
x, y	Observed value of characteristics x, y under estimation
\hat{X} , \hat{Y}	Estimate of population total X, Y for the characteristics x, y

3.1.0 Let, y_{stjkrm} be the observed value of the characteristic y for the kth household of the jth second stage stratum of the ith FSU of rth panel and mth sub-sample for the tth sub-stratum of sth stratum.

3.1.1 For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 FORMULAE FOR ESTIMATION OF AGGREGATES FOR A STRATUM × SUB-STRATUM:

3.2.1 Questionnaire LHQ (Rural/Urban):

3.2.1.0 For estimating the number of households in a stratum × sub-stratum possessing a characteristic:

$$\hat{Y} = \sum_{r=1}^{10} \sum_{m=1}^2 \left[\frac{N}{n} \times \sum_{i=1}^n D_1 \times y_{irm} \right]$$

where y_{irm} is the total number of households possessing the characteristic y in i^{th} FSU of r^{th} panel and m^{th} sub-sample respectively.

3.2.2 Formulae for Estimation of Aggregates for a stratum * sub-stratum Questionnaire HCQ, FDQ, CSQ and DGQ:

3.2.2.0 For j^{th} second-stage stratum of a stratum × sub-stratum:

$$\hat{Y}_j = \sum_{r=1}^{10} \sum_{m=1}^2 \left[\frac{N}{n_j} \sum_{i=1}^{n_j} \left[D_1 * \frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijkrm} \right] \right]$$

where n_j is the number of sample FSUs with non-void j^{th} second-stage stratum.

3.2.2.1 Aggregate \hat{Y} is obtained combining all the second-stage strata:

$$\hat{Y} = \sum_{j=1}^3 \hat{Y}_j$$

Note: Values of j for all the questionnaire is 3.

3.3 OVERALL ESTIMATE FOR AGGREGATES FOR A STRATUM × SUB-STRATUM:

3.3.0 Overall estimate for a stratum × sub-stratum (\hat{Y}_{st}) will be obtained as

$$\hat{y}_{st} = \sum_{r=1}^{10} \sum_{m=1}^2 \left[\sum_{i=1}^{n_{stj}} \frac{N_{st}}{n_{stj}} \times D_1 \times \sum_{j=1}^3 \frac{H_{stijrm}}{h_{stijrm}} \times \sum_{k=1}^{h_{stijrm}} y_{stijkrm} \right]$$

3.3.1 Overall Estimate for Aggregates for a stratum:

$$\hat{y}_s = \sum_t \hat{y}_{st}$$

3.4 OVERALL ESTIMATE OF AGGREGATES AT STATE/UT/ALL-INDIA LEVEL:

3.4.0 The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

$$\hat{Y} = \sum \hat{y}_s$$

3.5 ESTIMATION OF MONTHLY PER CAPITA CONSUMER EXPENDITURE (MPCE) FROM THREE QUESTIONNAIRES:

3.5.0 The monthly per capita consumption expenditure (MPCE) of a household, defined as “*the total value of monthly consumption of goods & services of the household divided by the number of members of the household*” is based on the data collected from those households who provided information for all the three visits, i.e., the households from whom data pertaining to all the three questionnaires, namely, FDQ, CSQ and DGQ are available. The multiplier computed from the data of third visit is used for generation of the estimates. Household size recorded at the time of canvassing of food questionnaire (FDQ) is considered for calculating MPCE.

3.5.1 Let E_1 , E_2 & E_3 be the total value of expenditure on food, consumable & services and durables items respectively for a particular sampled household, compiled from the three questionnaires, namely FDQ, CSQ & DGQ. Further, assume that P_1 , P_2 & P_3 be the number of household members (i.e., size of the household) recorded during the time of canvassing FDQ, CSQ and DGQ questionnaire, respectively.

3.5.2 Then the total monthly expenditure of the household, say, TE is computed as:

$$TE = E_1 + (E_2/P_2) \times P_1 + (E_3/P_3) \times P_1$$

3.5.3 Consequently, the MPCE of the household is computed as:

$$MPCE = TE/P_1.$$

3.6 ESTIMATES OF RATIOS:

3.6.0 Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the District/State/ UT/ all-India level.

Then the combined ratio estimates (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$

3.7 ESTIMATION OF ERRORS:

3.7.1 Formula for estimated variance (for Rural/Urban)

3.7.1.0 FSUs and USU (households) are selected by SRSWOR method. If i^{th} FSU has been selected, h_i unit is selected from this particular FSU x SSS by SRSWOR method. For simplicity of formula some obvious suffixes (r^{th} panel, m^{th} sub-sample) have been suppressed in following formulas for RSE (%) calculation.

(a) Formula for aggregate \hat{Y} (for Rural/Urban)

$$\widehat{Y}_{ij} = H_{ij} * \bar{y}_{ij} * D_{1si} \text{ and } \bar{y}_{ij} = \frac{\sum_1^{h_{ij}} y_{ijk}}{h_{ij}}$$

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s) = \sum_s \sum_t \sum_j V\hat{a}r(\hat{Y}_{stj})$$

$$\widehat{v}ar(\widehat{Y}_{stj}) = N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \left(\frac{1}{(n_{stj} - 1)} \sum_1^{n_{stj}} (H_{stij} * D_{1sti} * \bar{y}_{stij} - \frac{1}{n_{stj}} \right.$$

$$\left. \sum_1^{n_{stj}} H_{stij} * D_{1sti} \bar{y}_{stij} \right)^2 + \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{stij}^2 * D_{1sti}^2 \left(\frac{1}{h_{stij}} - \frac{1}{H_{stij} * D_{1si}} \right) s_{wij}^2$$

$$\text{where } s_{wij}^2 = \frac{1}{(h_{stij} - 1)} \sum_{k=1}^{h_{stij}} (y_{stijk} - \bar{y}_{stij})^2$$

(b) Formula for ratio \hat{R} (for Rural/Urban)

It may be noted that $X^2 \text{MSE}(\widehat{R})$ is unbiasedly estimated by $V(\hat{Y} - R\hat{X})$

$V(\hat{Y} - R\hat{X}) = v(\hat{u})$ where $u_{ijk} = (y_{ijk} - R_{xijk})$, $U_i = (Y_i - R X_i)$ and $U = (Y - RX) = 0$ at domain level (State).

$$\widehat{X^2 M\hat{S}E}(\hat{R}) = \widehat{V}(\hat{U}) \text{ at } R = \hat{R}$$

$$\widehat{Y}_{stij} = \frac{1}{N_{st}} * \sum_k y_{stijk} * n_{stj} * \text{multiplier and } \widehat{X}_{stij} = \frac{1}{N_{st}} * \sum_k x_{stijk} * n_{stj} * \text{multiplier}$$

$$M\hat{S}E(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t M\hat{S}E_{st}(\hat{R})$$

$$M\hat{S}E_{st}(\hat{R}) = \sum_j N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \frac{1}{(n_{stj}-1)} \sum_1^{n_{stj}} (H_{ij} D_{1si} \bar{u}_{ij} - \frac{1}{n_{stj}} \sum_1^{n_{stj}} H_{ij} D_{1si} \bar{u}_{ij})^2 + \sum_j \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{ij}^2 * D_{1si}^2 \left(\frac{1}{h_{ij}} - \frac{1}{H_{ij}*D_{1si}} \right) s_{uij}^2$$

where $s_{uij}^2 = \frac{1}{(h_{ij}-1)} \sum_{k=1}^{h_{ij}} (u_{ijk} - \bar{u}_{ij})^2$; $\bar{u}_{ij} = \bar{y}_{ij} - \hat{R} \bar{x}_{ij}$

3.7.2 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100 \qquad R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

4. MULTIPLIERS:

4.0 The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a Questionnaire type are given below.

Questionnaire	Sector	Formula for multipliers
LHQ	Rural/urban	$\frac{N_{st}}{n_{st}}$
HCQ, FDQ, CSQ and DGQ	Rural/urban	$\frac{N_{st}}{n_{stj}} * D_1 * \frac{H_{stij}}{h_{stij}}$
		$j = 1, 2, 3$

Note: Multipliers are computed on the basis of information available in the listing Schedule LHQ, irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

Appendix C

Relative Standard Error & Confidence Interval

Appendix D

Questionnaires of the Survey

GOVERNMENT OF INDIA
NATIONAL STATISTICAL OFFICE
HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY:2023-24
AUGUST, 2023 – JULY, 2024
QUESTIONNAIRE - HCQ: HOUSEHOLD CHARACTERISTICS

Section1: Identification of sample household

Information on items 1.1 to 1.7 and 1.9 will be available from the sample list. Information on items 1.10 to 1.12 will be available from the Questionnaire for listing (LHQ)

1.1. sector:	<input type="radio"/> rural <input type="radio"/> urban
1.2. state/u.t name:	
1.3. district name:	
1.4.name of sub-district/tehsil/town	
1.5. village name:	
1.6.investigator unit number /block number:	
1.7. sample sub-unit (SU) number:	
1.8. questionnaire number:	HCQ
1.9. serial number of sample FSU	
1.10. sample Sub-division number:	
1.11. second-stage stratum number:	
1.12. sample household number:	
1.13. survey code <i>[If 2 or 3 in 1.13 go to 1.14]</i>	<input type="radio"/> original -1, <input type="radio"/> substitute -2, <input type="radio"/> casualty -3
1.14. reason code for substitution/ casualty of the original household <i>(the interviewer will fill up this item if a substituted household is canvassed or the household is a casualty)</i>	<input type="radio"/> informant busy -1, <input type="radio"/> members away from home -2, <input type="radio"/> informant non-cooperative -3, <input type="radio"/> others -9

Section 3: Details of the household members

OBJECTIVES AND SCOPE

- To record basic demographics on gender, age, relationship to head of household, marital status, education level, no. of days stayed away from home, no. of meals usually taken for each member of the household listed in Section 2.

IMPLEMENTATION NOTES

- All the household members of the selected household will be listed and their related information will be recorded.
- Total number of members listed in Section 3 will be same as household size in Section 2.

Section 3: demographic and other particulars of household members																
srl. no.	name of member	relation to head (code)	gender (male-1, female-2, transgender -3)	age (years)	marital status (code)	highest educational level attained (code)	if code 03 – 13 in col. (7), total year of education completed	whether used internet* from any location during last 30 days (yes-1, no - 2)	no. of days stayed away from home during last 30 days	no. of meals usually taken in a day	no. of meals taken during last 30 days					
											away from home				at home	
											free of cost			on payment		
											from school, balwadi, etc.	from employer as perquisites or part of	others			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	

Instruction: Codes for Section 3

- Col. (3) :** relation to head: self-1, spouse of head-2, married child-3, spouse of married child-4, unmarried child-5, grandchild-6, father/mother/father-in-law/mother-in-law-7, brother/sister/brother-in-law/sister-in-law/other relatives-8, servants/employees/other non-relatives-9
- Col. (6) :** marital status: never married – 1, currently married – 2, widowed – 3, divorced/separated – 4
- Col. (7):** highest educational level attained:
 - not literate (i.e. not able to read or write a simple message with understanding in any language) -01
 - literate with non-formal education (like NFEC, AEC, TLC, literate without any schooling, etc.)-02
 - literate with formal education
 - below primary-03
 - primary -04
 - upper primary/middle -05
 - secondary -06
 - higher secondary -07
 - diploma /certificate course (up to secondary)-08
 - diploma/certificate course (higher secondary)-10
 - diploma/certificate course (graduation & above)-11
 - graduate -12
 - post graduate and above -13

*applicable for persons of age >=3 years (i.e., Col. 5>=3)

Note: Information on Col. 10 – 16 is to be collected while canvassing the Questionnaire FDQ.

Section 4: Household characteristics

OBJECTIVES AND SCOPE

- To record household characteristics, owning of land and type of ration card possessed by the household.

IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

Section 4: Household characteristics		
Question no.	Question description and code structure	Recorded entry
Q4.1	<p>Whether any household member (excluding those employed by the household and paying guests) was engaged in economic activities during last 365 days?</p> <ul style="list-style-type: none"> o yes-1 o no-2 <p>If code is 1 in Q4.1 fill up Q4.2 to Q4.6 else go to Q4.10 (Instruction: Economic activity includes: (i) all the market activities, i.e., the activities performed for pay or profit which result in production of goods and services for exchange, (ii) of the non-market activities,</p> <p>(a) all the activities relating to the primary sector (i.e., industry Divisions 01 to 09 of NIC-2008) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods, including threshing and storing of grains for own consumption.</p> <p style="text-align: center;">and</p> <p>(b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets includes construction of own houses, roads, wells, etc. and of machinery, tools, etc. for household enterprise and also construction of any private or community facilities free of charge.)</p>	
Q4.2	<p>Write the description of the occupation of the economic activity of the household members which fetched the maximum earnings to the household during the last 365 days preceding the date of survey</p> <p>[Instruction: List all the occupations pertaining to economic activities pursued by the members. Out of the occupations listed that one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey would be considered as the principal household occupation.]</p>	Text Box
Q4.3	Record the 3-digit code of the occupation (as per National Classification of Occupation (NCO 2015)) recorded in Q4.2	DDM (3-digit code of NCO 2015)
Q4.4	<p>Write the description of the industry of activity corresponding to the occupation recorded in Q4.2, which fetched the maximum earnings to the household during the last 365 days preceding the date of survey</p> <p>[Instruction:</p> <ul style="list-style-type: none"> • If corresponding to the principal occupation there is only one industry of activity, record the description of that industry of activity. • If the principal occupation is pursued in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, should be considered as the principal industry of the household.] 	
Q4.5	Record the 5-digit code of the National Industrial Classification (NIC-2008) for the industry of activity recorded in Q4.4	DDM (5-digit code of NIC 2008)
Q4.6	<p>From which of the following broad activities maximum income was derived by the household during last 365 days preceding the date of survey?</p> <ul style="list-style-type: none"> o self-employment -1 	

Section 4: Household characteristics		
Question no.	Question description and code structure	Recorded entry
	<ul style="list-style-type: none"> ○ regular wage/salary earning -2 ○ casual labour -3 <p><i>[Instruction: for urban samples, go to Q4.10</i> <i>For rural samples,</i></p> <ul style="list-style-type: none"> ● if 1 in Q4.6, go to Q4.7 ● if 2 in Q4.6, go to Q4.8 ● if 3 in Q4.6, go to Q4.9] <p><i>(Note:</i> <i>self-employment: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are deemed to be self-employed in household enterprises.</i> <i>regular wage/salary earning: Persons working in other's farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular wage/salaried employees.</i> <i>casual labour: A person casually engaged in other's farm or non-farm enterprises (both household and non-household including in public works) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour.)</i></p>	
Q4.7	Whether the major income from self-employment was from agricultural sector or non-agricultural sector? <ul style="list-style-type: none"> ○ self-employment in agriculture -1 ○ self-employment in non-agriculture-2

1.14A. Is household available for survey?	<input type="radio"/> yes - 1	<input type="radio"/> no - 2

Section 2A: Household size (To be canvassed only in Visits -2 & 3)**OBJECTIVES AND SCOPE**

- To determine the household size of the sample household.

IMPLEMENTATION NOTES

- For each of the selected household total household size will be ascertained and recorded.

Q2A.1. How many persons are in the household, who are normally living together for six months or more or are expected to stay for six months or more and taking food from a common kitchen?	
<i>[Instruction: this number will be auto generated based on the household members listed against Section 3A]</i>	
List the names of the household members	
serial number	name of the household member
<i>will be auto generated based on the household members listed against Section 3A</i>	
<ul style="list-style-type: none"> Go to Section 3A 	

Section 3A: Details of the household members (To be canvassed only in Visits -2 & 3)

OBJECTIVES AND SCOPE

- To record basic demographics on gender, age, relationship to head of household, marital status, education level, no. of days stayed away from home, no. of meals usually taken for each member of the household listed in Section 2A.

IMPLEMENTATION NOTES

- All the household members of the selected household will be listed and their related information will be recorded.
- Total number of members listed in Sections 3A.1 & 3A.2 will be same as household size in Section 2A.

Section 3A.1: demographic and other particulars of the erstwhile household members																
srl. no.	name of member	relation to head (code)	gender (male-1, female-2, transgender -3)	age (years)	marital status (code)	highest educational level attained (code)	if code 03 – 13 in col. '@' Source code cannot be 2, 3 or 4 for these items. For home-produced, consumption should be recorded against ingredients.]</i></p> <p><i>[Instruction to enumerator: Total consumption of the item includes consumption of home produce. Consumption from home produce means <u>produce of cultivation or produce of livestock</u> (e.g. milk) and not food obtained in the home by processing of other food items (e.g. curd from milk, or pickles from vegetables, spices, etc., or milk-based sweets from milk and sugar. Thus there is no concept of home produce of liquid tea.]</i></p>						
Go to Section 7							

Section 7: Consumption of processed food during the last 7 days

OBJECTIVES AND SCOPE

- This section is for recording the quantity and value of consumption of served processed food and packaged processed food by the household during the last 7 days preceding the date of the survey.

IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

Section 7.1: Consumption of served processed food during the last 7 days				
Question no.	Question description and code structure			
Q7.1	What is the quantity and value of the <i>served processed food</i> purchased and/or consumed by the household during last 7 days?			
			quantity and value of the item purchased and/or consumed during last 7 days	
	Item	item code	total consumption	
			quantity (0.000)	value (Rs.)
	(1)	(2)	(3)	(4)
	cooked meals purchased at subsidized rate (no.)	076		
	cooked meals purchased (no.)	280		
	cooked meals received free in workplace ^{\$} (no.)	281		
	cooked meals received as assistance ^{\$} (no.)	282		
	cooked snacks purchased [samosa, puri, paratha, momo, roll, chowmein, idli, dosa, vada, chops, pakoras, pav-bhaji, vada-pao, etc.]	283		
	other served processed food**	284		
	served processed food: sub-total	289		
	<p>[Instruction to software: 1. [#] Source codes are: only purchase-1, only exchange of goods and services-5, only gifts/charities-6, others- 9 and given in dropdown list in software package.</p> <p>2. '**' includes chaat, golgappa (puchka/panipuri), bhelpuri, etc.</p> <p>3. '\$' Do not include cooked meals received from other households.</p> <p>4. Cooked meals purchased at subsidised rates available under different Government social welfare schemes like, Amma Canteen, Kalaignar, Maa Canteen, Shivbhojan scheme etc., or from Charitable organization are to be recorded against item 076.]</p>			

Section 7.2: Consumption of packaged processed food during the last 7 days				
Question no.	Question description and code structure			
Q7.2	What is the quantity and value of the <i>packaged processed food</i> consumed by the household during last 7 days?			
			quantity and value of the item consumed during last 7 days

GOVERNMENT OF INDIA
NATIONAL STATISTICAL OFFICE
HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY: 2023-24
AUGUST, 2023 – JULY, 2024
QUESTIONNAIRE - CSQ: CONSUMABLES & SERVICES

Note:(a) In order to record the present status of the surveyed household, information on survey code along with reason for substitution/casualty will be recorded in Section 1A, Questionnaire HCQ during Visits- 2 & 3.

(b) To record the change in composition of the household, information on demographic particulars will also be collected in the Sections 2A & 3A, Questionnaire HCQ during Visits- 2 & 3.

Section 4.2: General information on purchase/payment

OBJECTIVES AND SCOPE

- This section is for recording some basic information on purchase/payments made by the household.

IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

Section 4.2: General information on purchase/payment		
Question no.	Question description and code structure	Recorded entry
Q4.2.0	Whether the household procured kerosene using ration card during the last 30 days? o yes-1 o no-2	
Q4.2.1	Whether the household received subsidy on LPG cylinder during the last 3 months? o yes-1, if yes, no. of subsidized LPG cylinder received during the last 3 months preceding the date of survey (number) <input type="text"/> o no-2	
Q4.2.2	Whether the household received free electricity during the last 30 days? o yes-1 o no-2	
Q4.2.3	Whether any member of the household is attending/attended educational institution during last 365 days? o yes-1; if yes, number of members attending/attended Govt. institution <input type="text"/> number of members attending/attended Private institution <input type="text"/> o no-2

OBJECTIVES AND SCOPE

- This section is for recording the expenditure incurred by the household on purchase (including repair and maintenance) and construction of durable goods for domestic use during the last 365 days.

IMPLEMENTATION NOTES

- To be canvassed for all the selected households.

Section 14.1: Expenditure for purchase (including repair & maintenance) of personal goods for domestic use during the last 365 days									
Question no.	Question description and code structure								
Q14.1	What is the quantity and value of the items procured by the household for <i>personal use</i> during last 365 days?								
			first-hand purchase			cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)		no. of item purchased	value (Rs.)	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	spectacles/goggles, contact lenses	440							
	umbrella, raincoat, helmet	441							
	other minor durable-type goods (like torch, lock, lighter,etc.)	442							
	mobile handset	623							
	telephone instrument (landline)	624							
	PC/ Laptop/ tablet, other peripherals incl. software	622							
	clock, watch, smartwatch, fitness tracker	620							
	back-pack, handbags, vanity bags, purse, clutch, etc.	554							
	headphone, earphone, ear pod, airpod, bluetooth devices/speakers etc.	035							
	other machines for household work	621							
	any other personal goods(power banks, hair dryers, straightener/curler,trimmer, groomer, epilator, etc.)	625							
	other personal goods: sub-total	629							

Section 14.2: Expenditure for purchase (including repair & maintenance) of transport equipment for domestic use during the last 365 days									
Question no.	Question description and code structure								
Q14.2	What is the quantity and value of the <i>transport equipment</i> procured by the household for personal use during last 365 days?								
			first-hand purchase				second-hand purchase		
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)	cost of repair & maintenance (Rs.)	no. of item purchased	value (Rs.)	total expenditure (Rs.) (5)+(6)+(8)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	motor cycle, scooter	601							
	motor car, jeep	602							
	bicycle	600							
	tyres & tubes	603							
	other transport equipment	604							
	personal transport equipment: sub-total	609							
Section 14.3: Expenditure for purchase (including repair & maintenance) of sports goods for domestic use during the last 365 days									
Question no.	Question description and code structure								
Q14.3	What is the quantity and value of the <i>sports goods</i> procured by the household for personal use during last 365 days?								
			first-hand purchase				second-hand purchase		
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)	cost of repair & maintenance (Rs.)	no. of item purchased	value (Rs.)	total expenditure (Rs.) (5)+(6)+(8)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	exercise equipment: treadmill, fitness cycle, etc.	036							
	weighing machine	037							
	sports goods (badminton racket, shuttle cock, football, cricket bat, etc.) & toys	432							
	other sports goods	097							
	sports goods: sub-total	099							

Section 14.4: Expenditure for purchase (including repair & maintenance) of medical equipment for domestic use during the last 365 days

Question no.	Question description and code structure							
Q14.4	What is the quantity and value of the <i>medical equipment</i> procured by the household for personal use during last 365 days?							
		first-hand purchase			cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
item	item code	no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)		no. of item purchased	value (Rs.)	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
wheelchair	040							
massagers	041							
hearing aids & orthopaedic equipment	610							
nebulizer	042							
other medical equipment (blood pressure monitoring machine, etc.)	611							
medical equipment: sub-total	619							

Section 14.5: Expenditure for purchase (including repair & maintenance) of cooking & other household appliances for domestic use during the last 365 days

Question no.	Question description and code structure								
Q14.5	What is the quantity and value of the <i>cooking and other household appliances</i> procured by the household during last 365 days?								
			first-hand purchase			cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2	value (Rs.)		no. of item purchased	value (Rs.)	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	electric fan	580							
	electric air heaters & blowers	043							
	air conditioner	581							
	air cooler	044							
	air purifier	045							
	refrigerator/freezers	588							
	washing machine	585							
	inverter, generators, stabilizers	582							
	geysers & hot water systems, sterilizers	046							
	stove, gas burner, induction	586							
	water purifier	590							
	ventilation system such as exhaust, chimney, etc.	047							
	mixer/grinder, juicer, food processor	048							
	pressure cooker/pressure pan	587							
	electric iron, heater, toaster, micro-oven, electric kettle, vacuum cleaner, & other electric heating appliances	591							
	sewing machine	584							
	lantern, lamp, electric lampshade, emergency light	583							
	other cooking/household appliances	592							
	cooking & other household appliances: sub-total	599							

Section 14.6: Expenditure for purchase (including repair & maintenance) of crockery & utensils for domestic use during the last 365 days

Question no.	Question description and code structure							
Q14.6	What is the quantity and value of the <i>crockery & utensils</i> procured by the household during last 365 days?							
			first-hand purchase		cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2		value (Rs.)	no. of item purchased	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	stainless steel utensils	570						
	other metal utensils (non-stick cookware, etc.)	571						
	casseroles, thermos, flask, thermoware	572						
	water bottle/feeding bottle	050						
	other crockery & utensils (jars & containers, cutlery, dinner set, etc.)	573						
	crockery & utensils: sub-total	579						

Section 14.7: Expenditure for purchase and construction of furniture & fixtures for domestic use during the last 365 days

Question no.	Question description and code structure							
Q14.7	What is the quantity and value of the <i>furniture and fixtures</i> procured by the household during last 365 days?							
			first-hand purchase		cost of raw material and services for construction and repair (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2		value (Rs.)	no. of item purchased	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	bedstead	550						
	almirah, dressing table	551						
	chair, stool, bench, table	552						
	suitcase, trolley bag, duffle bag, trunk, etc.	553						
	carpet, daree & other floor mattings	555						
	paintings, drawings, engravings, etc.	556						
	other furniture & fixtures (couch, sofa, etc.)	557						
	furniture & fixtures: sub-total	559						

Section 14.8: Expenditure for purchase (including repair & maintenance) of goods for recreation for domestic use during the last 365 days									
Question no.	Question description and code structure								
Q14.8	What is the quantity and value of the items procured by the household for <i>recreation purpose</i> during last 365 days?								
			first-hand purchase		cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)	
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2		value (Rs.)	no. of item purchased		value (Rs.)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	television	560							
	camera & photographic equipment	561							
	CD, DVD, pen-drive, external hard disk	562							
	musical instruments	563							
	other goods for recreation (incl. radio, VCR/VCD/DVD player, home theatre system, play station, etc.)	564							
	goods for recreation: sub-total	569							

Section 14.9: Expenditure for purchase and construction of residential building, land and other durables for domestic use during the last 365 days									
Question no.	Question description and code structure								
Q14.9	What is the value of the items procured by the household for <i>residential purpose</i> during last 365 days?								
			first-hand purchase		cost of raw material and services for construction and repair (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)	
	item	item code	no. of item purchased	whether purchased on hire yes-1, no-2		value (Rs.)	no. of item purchased		value (Rs.)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	residential building & land (cost of minor repairs only)	632							
	bathroom and sanitary equipment	630							
	plugs, switches & other electrical fittings	631							
	other durables	633							
	residential building, land and other durables: sub-total	639							

Section 14.10: Expenditure for purchase (including repair & maintenance) of jewellery & ornaments for domestic use during the last 365 days								
Question no.	Question description and code structure							
Q14.10	What is the value of the <i>jewellery and ornaments</i> procured by the household during last 365 days?							
	item	item code	first-hand purchase		cost of repair & maintenance (Rs.)	second-hand purchase		total expenditure (Rs.) (5)+(6)+(8)
			no. of item purchased	whether purchased on hire yes-1, no-2		value (Rs.)	no. of item purchased	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
	gold /diamond /platinum jewellery	640						
	silver jewellery	641						
	jewels, pearls, precious stones	642						
	other jewellery and ornaments (artificial jewellery, etc.)	643						
	jewellery & ornaments: sub-total	649						

Section C1 : Summary information of item collected in Questionnaire - DGQ					
S. No.	Item description	reference			value (in Rs)
		Section	item code	column	during last 365 days
(1)	(2)	(3)	(4)	(5)	(6)
1.	clothing	13.1	379	4	
2.	footwear	13.2	399	4	
3.	bedding etc.	13.3	389	4	
4.	personal goods	14.1	629	9	
5.	transport equipment	14.2	609	9	
6.	sports goods	14.3	099	9	
7.	medical equipment	14.4	619	9	
8.	cooking & other household appliances	14.5	599	9	
9.	crocery & utensils	14.6	579	9	
10.	furniture & fixtures	14.7	559	9	
11.	goods for recreation	14.8	569	9	
12.	residential building, land and other durables	14.9	639	9	
13.	jewellery & ornaments	14.10	649	9	

Section C2: Contact details of the household and time taken to canvass the questionnaire

QC2.1	Mobile number of the informant										
	<i>(Same instruction is to be followed as mentioned in Questionnaire HCQ)</i>										
QC2.2	Alternate mobile number, if any										
	<i>(Same instruction is to be followed as mentioned in Questionnaire HCQ)</i>										
QC2.3	Landline number of the household										
	<i>(Same instruction is to be followed as mentioned in Questionnaire HCQ)</i>										
QC2.4	Time taken to canvass the Questionnaire - DGQ (in minutes)										Text box
QC2.5	Household's usual consumption expenditure in a month (in Rs.) <i>(to be used only for cross validation of the data)</i>										Text box
QC2.6	Total expenditure incurred on online purchase/payment of durable goods during the last 365 days (in Rs.)										Text box
QC2.7	Name of the informant <i>(Instruction: A pop-up with the details of household members as listed in Block 3/3A, Cols.1 & 2 will appear along with an option 'not a household member'. 'Srl. no .99 will be provided against non-household member', if he/she is the respondent. The enumerator should select the 'informant' from that list)</i>										
	Srl. no. of the household member		Name					Select the informant			
								<input type="radio"/>			
								<input type="radio"/>			
	99		not a household member					<input type="radio"/>			
QC2.8	Response code of the informant as assessed by SE/JSO					<input type="radio"/> informant co-operative and capable-1 <input type="radio"/> informant co-operative but not capable-2 <input type="radio"/> informant busy-3 <input type="radio"/> informant reluctant-4 <input type="radio"/> others-9
