Quarterly Bulletin on Employment and Unemployment Indicators

1. Introduction

1.1 Periodic Labour Force Survey (PLFS)

1.1.1 Considering the importance of availability of labour force data at more frequent time intervals, National Sample Survey Office (NSSO) launched Periodic Labour Force Survey (PLFS) in April 2017. On the basis of PLFS¹, Quarterly Bulletins are brought out, corresponding to different quarters of the survey period, giving estimates of labour force indicators, viz., Labour Force Participation Rate (LFPR), Worker Population Ratio (WPR), Unemployment Rate (UR), distribution of workers by broad status in employment and industry of work in the Current Weekly Status (CWS) for the urban areas. Twenty-two Quarterly Bulletins starting from the quarter October - December 2018 upto the quarter January - March 2024 have already been released.

This Bulletin for the quarter ending June 2024 is the twenty-third in the series.

1.2 Indicators presented in this Bulletin

1.2.1 In this Bulletin indicators of employment and unemployment in current weekly status (CWS) are presented for the urban areas separately for the periods:

- April – June 2023
- July – September 2023
- October – December 2023
- January – March 2024
- April – June 2024

1.3 PLFS fieldwork during the quarter April – June 2024

The fieldwork for collection of information in respect of all the samples allotted for the period April-June, 2024 were completed timely for the first visit as well as revisit samples, except for 8 first visit FSUs; three in the State of Tripura; one each from States of Madhya Pradesh, Punjab, Odisha, Chhattisgarh and Telangana and 14 revisit FSUs (5 from State of Manipur, two from States of Telangana and Maharashtra and one each from States of West Bengal, Meghalaya, Tripura, Kerala & Karnataka), which were treated as casualty cases.

These aspects may be kept in mind while using the estimates of PLFS for the concerned quarter.

¹The 'Concepts and Definitions', 'Sample Design and Estimation Procedure' and Schedule of PLFS (Schedule 10.4) (first visit and revisit) may be perused as Appendix C, Appendix D and Appendix E, respectively in the Annual Report, PLFS: 2022-23, which is accessible at www.mospi.gov.in.

2. Key findings

2.1 Labour Force Participation Rate (LFPR) in current weekly status

2.1.1 Labour force refers to the part of the population which supplies or offers to supply labour for pursuing economic activities for the production of goods and services and therefore, includes both 'employed' and 'unemployed' persons. Labour Force Participation Rate (LFPR) is defined as the percentage of population in the labour force. Labour force according to *current weekly status* (CWS) is the number of persons either employed or unemployed on an average in a week of 7 days preceding the date of survey. In Statement 1, estimates of LFPR in CWS are presented.

2.2 Worker Population Ratio (WPR) in current weekly status

2.2.1 Worker Population Ratio (WPR) is defined as the percentage of workers in the population. The workforce measured in CWS gives the average picture of the workforce in a short period of one week during the survey period. The estimate of workforce in the CWS provides the number of persons who worked for at least 1 hour on any day during the 7 days preceding the date of survey. In Statement 2, estimates of WPR in current weekly status are presented.

2.3 Distribution of workers in current weekly status by broad status in employment

2.3.1 The workers in current weekly status are classified into three broad categories according to their status in employment. These broad categories are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Within the category of *self-employed* two sub-categories have been made as follows: (i) *own account worker and employer* combined together and (ii) *unpaid helper in household enterprises*. In Statement 3, distribution of the workers of age 15 years and above in CWS by status in employment are presented. It may be noted that self-employed persons who did not work either due to sickness or due to other reasons though they had self-employment work are included in column 4 of this Statement. Thus, the estimates given in column 4 may be higher than the sum of the estimates in column 2 and column 3.

2.4 Distribution of workers in current weekly status by broad industry of work

2.4.1 Three broad industries of work which have been considered here are agriculture sector (NIC-2008 codes 01-03), secondary sector including mining and quarrying (NIC-2008 codes 05-43) and tertiary sector (NIC-2008 codes 45-99). Distribution of workers of age 15 years and above in CWS, in these three broad industries of work are given in Statement 4.

2.5 Unemployment Rate (UR) in current weekly status

2.5.1 *Unemployment rate* (UR) is defined as the percentage of unemployed persons in the *labour force*. The estimates of unemployed in CWS give an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* (CWS) approach, a person was considered as unemployed in a week if he/she did not work even for 1 hour on any day during the reference week but sought or was available for work at least for 1 hour on any day during the reference week. In Statement 5, estimates of Unemployment Rate in CWS for the periods are presented.

3. Sample Size

3.1 Sample Size in urban areas in each of the survey period April – June 2023, July – September 2023, October – December 2023, January – March 2024 and April – June 2024: In urban areas, a rotational panel sampling design was used and in this rotational panel scheme each selected household in urban areas is visited four times – one with first visit schedule and other three with revisit schedule. In the Table below, the sample size in terms of FSUs (Urban Frame Survey blocks), households and persons in urban areas is given, separately for each of the survey period April – June 2023, July – September 2023, October – December 2023, January – March 2024 and April – June 2024. It may be noted that in each of these periods, besides the first visit sample (25 per cent of total sample size), samples in respect to three revisits (75 per cent of total sample size) were also surveyed.

Table: Sample size in urban areas in each of the survey period April – June 2023, July – September 2023, October – December 2023, January – March 2023 and April – June 2023 all-India
