प्रस्तावना

देश के नई सहस्राब्दि में पदार्पण करने के साथ ही कृषि मंत्रालय, भारत सरकार ने भारतीय किसानों के एक व्यापक सामाजिक-आर्थिक अध्ययन की योजना बनाई जिसका उद्देश्य किसानों के शैक्षिक स्तर, रहन-सहन का स्तर, कृषि पद्धतियाँ, उत्पादक परिसम्पतियों की मालिकियत, कृषि के क्षेत्र में जागरूकता के साथ-साथ आधुनिक प्रौद्योगिकी तक पहुँच, संसाधन उपलब्धता, ऋणगस्तता तथा बहुत से अन्य संबंधित मामलों का अध्ययन करना था। इन अपेक्षाओं को पूरा करने के लिए राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एन.एस.एस.ओ) ने 59वें दौर के एक भाग के रूप में ग्रामीण क्षेत्रों में जनवरी-दिसम्बर, 2003 के दौरान 'कृषक स्थिति का मूल्यांकन सर्वेक्षण' किया जिसमें किसान को एक ऐसे व्यक्ति के रूप में परिभाषित किया गया था जिसके पास कुछ भूमि हो और उस पर कार्य करता हो तथा कृषि संबंधी कार्यकलापों में संलग्न हो। इस सर्वेक्षण में किसानों को ऐसे परिवारों के जरिए शामिल किया गया जिसमें कम से कम एक सदस्य किसान हो।

2. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय ने 2003 के "स्थिति मूल्यांकन सर्वेक्षण" की पुनरावृत्ति के रूप में जनवरी-दिसम्बर, 2013 के दौरान अपने एनएसएस 70वें दौर में "कृषक परिवारों की स्थिति मूल्यांकन सर्वेक्षण" आयोजित किया। एनएसएसओ के केंद्रीय प्रतिदर्श के अलावा, अधिकांश राज्य सरकारों ने भी इससे मिलान वाले एक राज्य प्रतिदर्श द्वारा इस सर्वेक्षण में भाग लिया। इस सर्वेक्षण में, इस तथ्य को मानते हुए कि कोई भूमि न होने पर भी पर्याप्त कृषि कार्य किए जा सकते हैं, एक किसान की पात्रता के मापदण्ड के रूप में उसके पास भूमि होने की शर्त को समाप्त कर दिया गया। उसके स्थान पर "कृषि उत्पादन इकाई" की अवधारण को रखा गया जो फसलों का उत्पादन, पशुधन पालन तथा अन्य विशिष्ट कृषिजन्य कार्य करती हो। इस सर्वेक्षण का उद्देश्य भारत सरकार की नीतियों और कार्यक्रमों के संदर्भ में देश के ग्रामीण क्षेत्रों में कृषि परिवारों की स्थिति को भी शामिल करना था।

3. भारतीय कृषि परिवारों की स्थिति के महत्वपूर्ण संकेतक देने वाले भारत में कृषक परिवारों की स्थिति के मुख्य संकेतक, तथा इकाई स्तरीय आंकड़े कृषक परिवारों की स्थिति मूल्यांकन सर्वेक्षण के केन्द्रीय प्रतिदर्श आंकड़ों के आधार पर दिसम्बर, 2014 में जारी किए गए। इसके अलावा, कृषि परिवारों के विभिन्न पहलुओं पर तीन विस्तृत रिपोर्टें जारी करने की योजना है। वर्तमान रिपोर्ट, "भारत में कृषक परिवारों की कुछ विशेषताएँ", तीन रिपोर्टों की श्रृंखला में प्रथम है।

4. यह रिपोर्ट राष्ट्रीय तथा राज्य/संघ राज्य स्तर पर सर्वेक्षण में उल्लिखित कृषि परिवारों से संबंधित वृहत विशेषताएँ जैसे आय के प्रमुख स्रोत, भूमि स्वामित्व, राशन कार्ड का प्रकार तथा सामान्य शिक्षा, औपचारिक कृषि प्रशिक्षण, आमतौर पर किए जाने वाले प्रमुख क्रियाकलापों की स्थिति, रोजगार आदि के लिए घर से दूर रहने जैसी जनांकिकी विशेषताएँ, उपलब्ध कराती है। इस रिपोर्ट में तीन अध्याय तथा तीन परिशिष्ट हैं। इस रिपोर्ट में दिए गए अनुमानों से संबंधित प्रमुख निष्कर्ष अध्याय III में दिए गए हैं।

5. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण-साधन विकसित करने तथा यह रिपोर्ट तैयार करने का कार्य किया। क्षेत्र संकार्य प्रभाग (एफओडी) ने क्षेत्र कार्य किया। आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) ने किया। समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया।

6. मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 70वें दौर के कार्य दल के अध्यक्ष और सदस्यों और राष्ट्रीय सांख्यिकीय आयोग (एनएससी) की अत्यंत आभारी हूँ। मैं इस रिपोर्ट को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करती हूँ।

7. मैं आशा करती हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, अभिन्यास अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

Preface

As the country entered the new millennium, the Ministry of Agriculture, Government of India planned for a comprehensive socio-economic study of the Indian farmers. The areas of interest have been their educational level, level of living, farming practices, possession of productive assets, awareness as well as access to modern technology in the field of agriculture, resource availability, indebtedness and a host of other relevant issues. To meet these requirements, the National Sample Survey Office (NSSO) conducted the 'Situation Assessment Survey of Farmers' during January - December, 2003 in the rural areas as part of its 59th round, where 'farmer' was defined as a person who possesses and operates some land and is engaged in agricultural activities. In this survey, farmers were captured through selection of households having at least one family member as 'farmer'.

2. NSSO conducted 'Situation Assessment Survey of Agricultural Households' in its NSS 70th round during January – December, 2013 as a repeat survey of 'Situation Assessment Survey' of 2003. Apart from the Central sample canvassed by NSSO, most of the State Governments also participated in this survey by canvassing a matching state sample. In this survey, recognizing the fact that significant agricultural activity can be carried out without possessing any land, possession of land as an eligibility criterion of a farmer was dispensed with by replacing it with the concept of 'agricultural production unit' which produces crops, rears livestock or receives some value of produce from other specified agricultural activities. This survey also aimed at capturing the condition of agricultural households in the rural areas of the country in the context of policies and programmes of Government of India.

3. The *Key Indicators of Situation of Agricultural Households in India*, giving the important indicators of situation of Indian Agricultural households and the unit level data were released in December, 2014 based on the Central sample data of the Situation Assessment Survey of Agricultural Households. Apart from this, three detailed reports are planned for release on various aspects of agricultural households. The present report, namely, 'Some Characteristics of Agricultural Households in India' is the first in the series of three reports.

4. This report provides national and State/UT level broad features pertaining to agricultural households, like principal source of income, possession of land, type of ration card and demographic characteristics, like general education, formal training in agriculture, usual principal activity status, staying away from home for employment, etc., emerging from the survey. The report contains three chapters and three appendices. The main findings, relating to the estimates given in this report, are presented in Chapter III of the report.

5. Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) and the data processing and tabulation work was done by the Data Processing Division (DPD). Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

6. I am highly thankful to the Chairman and Members of the Working Group for NSS 70th round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

7. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated.

(Amarjeet Kaur)

मुख्य विशेषतायें

यह रिपोर्ट जनवरी 2013 से दिसम्बर 2013 के दौरान चलाए गए रा.प्र.स. के 70वें दौर के कृषि परिवारों पर स्थिति मूल्यांकन सर्वेक्षण (SAS) पर आधारित है। यह सर्वेक्षण, जो कि देश के ग्रामीण क्षेत्रों में अपने दो दौरों के साथ चलाया गया, 4529 ग्रामों में फैला था जिसमें 35200 परिवार शामिल थे। अखिल-भारतीय-स्तर पर कृषि वर्ष जुलाई 2012-जून 2013 तक किए गए सर्वेक्षण से उपलब्ध कुछ मुख्य बातें यहां दर्शायी गयी हैं :-

- ग्रामीण भारत में कृषि वर्ष जुलाई 2012 - जून 2013 में कृषि परिवारों की संख्या 90.2 मिलियन थी। इस अवधि के दौरान देश के कुल अनुमानित ग्रामीण परिवारों का करीब 57.8 प्रतिशत¹ कृषि परिवार थे।
[पैरा 3.2.1]
- जुलाई 2012-जून 2013 की अवधि के दौरान देश के कुल कृषि परिवारों में अन्य पिछड़ी जाति का सबसे अधिक प्राक्कलित हिस्सा (45.4 प्रतिशत था), तत्पश्चात् “अन्य” (24.9 प्रतिशत) एवं अनुसूचित जाति (16.3 प्रतिशत) थे।
[पैरा 3.2.2]
- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान 460.23 मिलियन अनुमानित व्यक्तियों के कृषि परिवार उन्हीं के थे, जिनका औसतन पारिवारिक आकार 5.1 था। भारत में कृषि परिवारों का लिंग अनुपात (1000 पुरुषों के मुकाबले महिलाएं) 948 था।
[पैरा 3.9.2]
- जुलाई 2012 - जून 2013 के कृषि वर्ष के दौरान करीब 69 प्रतिशत कृषि परिवारों के पास 1 हेक्टेयर या उससे कम धारित भूमि का कब्जा था। अन्य 17 प्रतिशत के पास 1.01 हेक्टेयर से लेकर 2.00 हेक्टेयर के मध्य भूमि थी। केवल 0.4 प्रतिशत कृषि परिवारों के पास 10 हेक्टेयर से अधिक भूमि थी।
[पैरा 3.3.2]
- कृषि परिवारों के 68.3 प्रतिशत के लिए कृषि क्रियाकलाप आय का मुख्य स्रोत था। (खेती (63.5 प्रतिशत), पशुधन क्रियाकलाप (3.7 प्रतिशत) एवं अन्य कृषि क्रियाकलाप (1.1 प्रतिशत)। मजदूरी/वेतन रोजगार 22 प्रतिशत कृषि परिवारों आय का मुख्य स्रोत था। 4.7 प्रतिशत कृषि परिवारों के लिए आय का मुख्य स्रोत ‘गैर-कृषि उद्यम’ था।
[कथन 3.7]
- 92.6 प्रतिशत कृषि परिवारों के पास वास भूमि के अलावा किसी अन्य प्रकार की भूमि का स्वामीत्व था। 6.7 प्रतिशत कृषि परिवार के पास केवल वास भूमि एवं अन्य 0.5 प्रतिशत के पास केवल ‘अन्य प्रकार की भूमि’ थी एवं 0.1 प्रतिशत कृषि परिवार भूमिहीन थे।
[कथन 3.12]
- देश में करीब 97 प्रतिशत कृषि परिवारों ने सर्वेक्षण की तारीख से 365 दिन पूर्व किसी ना किसी भूमि पर कृषि क्रियाकलापों का संचालन किया।
[कथन 3.12]

¹ रा.प्र.स के 70वें दौर के भूमि एवं पशुधन सर्वेक्षण के आंकलन पर 156.1 मिलियन ग्रामीण परिवारों के सम्बन्ध में।

- करीब 44 प्रतिशत कृषि परिवारों के पास एम जी नरेगा जॉब कार्ड था ।
[कथन 3.12]
- 78.5 प्रतिशत कृषि परिवारों के पास ग्राम के बाहर कोई भूमि नहीं थी ।
[कथन 3.17]
- 12.3 प्रतिशत कृषि परिवारों के पास सर्वेक्षण के समय कोई राशन कार्ड नहीं था । 4.9 प्रतिशत कृषि परिवारों के पास 'अंत्योदय' कार्ड थे एवं 36.4 प्रतिशत कृषि परिवारों के पास बीपीएल कार्ड थे ।
[कथन 3.19]
- कृषि परिवारों के सभी सदस्यों, जिनकी उम्र 7 वर्ष या अधिक थी, के बीच साक्षरता दर 68.1 प्रतिशत थी । पुरुष साक्षरता दर 77.5 एवं महिला साक्षरता दर 58.2 थी ।
[कथन 3.26]
- कृषि परिवारों के किसान सदस्यों, जिनकी आयु 7 वर्ष या उससे अधिक थी, साक्षरता दर 59.2 प्रतिशत थी । पुरुष साक्षरता दर 70.2 एवं महिला साक्षरता दर 41.4 थी ।
[कथन 3.26]
- सर्वेक्षण के समय कृषि परिवारों के 1.1 प्रतिशत सदस्य जिनकी उम्र 7 वर्ष या उससे अधिक थी, ने कृषि में कुछ औपचारिक प्रशिक्षण लिया । इसमें 7 प्रतिशत पुरुष एवं 0.4 प्रतिशत महिलाएं थी।
[कथन 3.28]
- जुलाई 2012 - दिसम्बर 2012 के दौरान कृषि में, सामान्य कार्यकलाप स्तर के अनुसार, कृषि परिवार के 38.2 प्रतिशत सदस्य स्व नियोजित थे (कार्यरत स्व-कार्यरत कामगार, नियोक्ता या निर्वेतन परिवार का कामगार) थे । यह पुरुष सदस्यों में 46.9 प्रतिशत एवं महिला सदस्यों में 29.0 प्रतिशत था ।
[कथन 3.29]
- जनवरी 2013 - जून 2013 के दौरान, सामान्य कार्यकलाप स्तर के अनुसार, देश में कृषि परिवारों के 34.5 प्रतिशत सदस्य कृषि में स्व नियोजित थे । इनमें 42.8 प्रतिशत पुरुष एवं 25.9 प्रतिशत महिलाएं थी ।
[कथन 3.29]
- कृषि परिवारों के सदस्यों में, 87.2 प्रतिशत व्यक्ति जिनकी आयु 7 वर्ष या उससे अधिक थी, ने कृषि वर्ष के दोनों अर्ध में वही सामान्य मुख्य क्रियाकलाप किया ।
[पैरा 3.11.7.2]
- जुलाई 2012 - दिसम्बर 2012 के दौरान वे व्यक्ति, जो कि कृषि में सामान्य मुख्य क्रियाकलाप स्तर के अनुसार स्व-नियोजित थे, इनमें 84.9 प्रतिशत जनवरी 2013 से जून 2013 तक एक ही मुख्य क्रियाकलाप स्तर में बने रहे । शेष में से 8.1 प्रतिशत आकस्मिक श्रम में गए एवं 5.3 प्रतिशत श्रमबल के बाहर चले गए ।
[पैरा 3.11.7.3]
- कृषि परिवारों के करीब 2 प्रतिशत सदस्य, जिनकी आयु 7 वर्ष या उससे अधिक थी, कृषि वर्ष के दोनों अर्ध में अपने सामान्य आवास स्थान से 15 दिन या उससे अधिक समय तक बाहर रहे ।
[पैरा 3.12.2]

- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान प्रति कृषि परिवार की औसतन मासिक आय रु 6426/- थी । यही जुलाई 2012 - दिसम्बर 2012 एवं जनवरी 2013 - जून 2013 के दौरान क्रमशः रु. 6642/- एवं रु. 6249/- थे ।

[कथन 3.38]

- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान प्रति कृषि परिवार की औसतन मासिक आय कृषि व्यवसाय (खेती एवं पशु-पालन) से निवल प्राप्ति लगभग 60 प्रतिशत थी । औसत मासिक आय की लगभग 32 प्रतिशत आय मजदूरी/वेतन से आय थी ।

[पैरा 3.13.3]

- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान प्रति कृषि परिवार का औसतन मासिक उपभोक्ता व्यय रु 6,223/- था । जुलाई 2012 - दिसम्बर 2012 एवं जनवरी 2013 - जून 2013 के दौरान यह क्रमशः रु 6116/- एवं रु 6371/- रहा ।

[कथन 3.38]

- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान उत्पादक परिसम्पत्तियों में औसतन निवल निवेश प्रति कृषि परिवार रु 513/- आकलित किया गया । यह जुलाई 2012 से दिसम्बर 2012 तक रु 556/- एवं जनवरी 2013 - जून 2013 तक रु 469 रहा ।

[कथन 3.38]

HIGHLIGHTS

This report is based on the Situation Assessment Survey (SAS) of Agricultural Households conducted in the 70th round of NSS during January 2013 to December 2013. The survey, conducted in the rural areas of the country in two visits, was spread over 4529 villages covering 35200 households. Some of the key estimates at the all-India level for the agricultural year July 2012 – June 2013 as obtained from this Survey are presented here:

- The number of agricultural households in rural India during the agricultural year July 2012- June 2013 was 90.2 million. These agricultural households were about 57.8 percent¹ of the total estimated rural households of the country.

[Para 3.2.1]

- Other Backward Classes had the highest estimated share (45.4 percent) in the total agricultural households in the country during the period July 2012- June 2013 followed by ‘Others’ (24.9 percent) and Scheduled Castes (16.3 percent).

[Para 3.2.2]

- Agricultural households, with an estimated 460.23 million persons belonged to them, had an average household size 5.1 during the agricultural year July 2012- June 2013. The sex ratio (number of females per 1000 of males) of agricultural households in India was 948.

[Para 3.9.2]

- About 69 percent of the agricultural households possessed land less than 1 hectare during the agricultural year July 2012- June 2013. Only 0.4 percent of the agricultural households possessed land 10 hectares or more.

[Para 3.3.2]

- Agricultural activity was reported to be the principal source of income for 68.3 percent of agricultural households (Cultivation (63.5 percent), Livestock activity (3.7 percent) and other agricultural activities (1.1 percent)). Wage/ salary employment was reported as the principal source of income by 22 percent of the agricultural households. ‘Non-agricultural enterprises’ was principal source of income for 4.7 percent of the agricultural households.

[Statement 3.7]

- 92.6 percent of the agricultural households possessed some other type of land along with homestead land. 6.7 percent agricultural households possessed only homestead land and another 0.5 percent had only ‘other type of land’. 0.1 percent of the agricultural households were landless.

[Statement 3.12]

¹With respect to 156.1 million rural households as estimated by the Land and Livestock Holdings Survey of NSS 70th round

- About 97 percent of the agricultural households in the country operated some land for agricultural activities during the 365 days prior to the date of survey.
[Statement 3.12]
- About 44 per cent of the agricultural households had MGNREGS job card.
[Statement 3.12]
- 78.5 percent of the agricultural households did not possess any land outside the village.
[Statement 3.17]
- 12.3 percent of the agricultural households did not possess any ration card at the time of the survey. *Antyodaya* card was possessed by 4.9 percent of agricultural households and 36.4 percent of agricultural households possessed BPL cards.
[Statement 3.19]
- Literacy rate among all members aged 7 years and above of agricultural households was 68.1 percent. Male literacy rate was 77.5 percent and female literacy rate was 58.2 percent.
[Statement 3.26]
- Literacy rate among farmer members aged 7 years and above of agricultural households was 59.2 percent. Among farmer members, male literacy rate was 70.2 percent and female literacy rate was 41.4 percent.
[Statement 3.26]
- 1.1 percent of the members aged 7 years and above of agricultural households had attended some formal training in agriculture at the time of the survey. The share was 1.7 percent among male members and 0.4 percent among female members.
[Statement 3.28]
- As per the usual activity status, 38.2 percent of the members of agricultural households were self-employed (own account worker, employer or unpaid family worker) in agriculture during July 2012- December 2012. The share was 46.9 percent among the male members and 29.0 percent among female members.
[Statement 3.29]
- As per the usual activity status, 34.5 percent of the members of agricultural households in the country were self-employed in agriculture during January 2013- June 2013. The share was 42.8 percent among the male members and 25.9 percent among female members.
[Statement 3.29]
- Among the members of agricultural households, 87.2 percent of the persons aged 7 years or more reported same usual principal activity status during both the halves of the agricultural year.
[Para.3.11.7.2]

- Of the persons who were self-employed in agriculture as per usual principal activity status during July 2012- December 2012, 84.9 percent remained in the same principal activity status during January 2013- June 2013. Of the remaining, 8.1 percent shifted to casual labour and 5.3 percent went out of labour force.

[Para 3.11.7.3]

- About 2 percent of the members aged 7 years and above from the agricultural households stayed away from their usual place of residence for more than 15 days in each of the two halves of the agricultural year.

[Para 3.12.2]

- The average monthly income per agricultural household during the agricultural year July 2012- June 2013 was ₹ 6426/-. The same was ₹ 6642/- and ₹ 6249/-, respectively, during July 2012- December 2012 and January 2013- June 2013.

[Statement 3.38]

- Net receipt from farm business (cultivation and farming of animals) accounted for about 60 percent of the average monthly income per agricultural household during the agricultural year July 2012- June 2013. Nearly 32 percent of the average monthly income was contributed by income from wage/ salary.

[Para 3.13.3]

- The average monthly consumption expenditure per agricultural household during the agricultural year July 2012- June 2013 was ₹ 6223/-. The same was ₹ 6116/- and ₹ 6371/-, respectively, during July 2012- December 2012 and January 2013- June 2013.

[Statement 3.38]

- Average net investment in productive assets per agricultural household during the agricultural year July 2012- June 2013 was estimated as ₹ 513/-. The same was ₹ 556/- during July 2012- December 2012 and ₹ 469/- during January 2013- June 2013.

[Statement 3.38]

Chapter 1

Introduction

CHAPTER ONE

INTRODUCTION

1.1 Background

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. In its 70th round of survey, conducted during the period 1st January, 2013 to 31st December, 2013, NSSO carried out a Situation Assessment Survey of Agricultural Households. Prior to this, Situation Assessment Survey of farmers was conducted in NSS 59th round (January, 2003-December, 2003).

1.2 Objective of the Survey

1.2.1 At the beginning of this millennium, the Ministry of Agriculture, Government of India had planned for a comprehensive assessment of the situation of farmers in the country. The areas of interest were their level of living as measured by household consumer expenditure, income and productive assets, their indebtedness, farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture. To meet these requirements, the Situation Assessment Survey (SAS) of farmers was conducted by the NSSO during January to December, 2003, as a part of its 59th round.

1.2.2 The Situation Assessment Survey of Agricultural Households in NSS 70th Round (January, 2013- December, 2013) was conducted as a repeat survey of Situation Assessment Survey of farmers conducted in 59th round. The survey also aimed at capturing the condition of agricultural households in the country in the context of policies and programmes of Government of India.

1.2.3 The survey schedule was designed for collection of information on various aspects relating to farming and other socio-economic characteristics of agricultural households. Along with information on household consumer expenditure, income and productive assets, their indebtedness, farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture, information on crop loss, crop insurance and awareness about Minimum Support Price (MSP) was also collected during 70th round. The information was collected in two visits from the same set of sample households with a view to collect relevant information separately for the two major agricultural seasons in a year. The first visit was made during January to July, 2013 and the second during August to December, 2013. The survey, like in 59th round, was conducted in rural areas only.

1.3 Comparability of Results with Previous Round of SAS

1.3.1 ‘Situation Assessment Survey of Farmers’ conducted in NSS 59th Round defined ‘farmer’ as a person who operated some land (owned or taken on lease or otherwise

possessed) and was engaged in agricultural activities in broad sense of the term e.g., cultivation of field crops, horticultural crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc., on that land during last 365 days preceding the date of survey. If any member of a household was a farmer, the household was treated as a farmer household for the purpose of the survey. **The definition followed in NSS 59th Round had kept all agricultural activities (whether nominal or substantial) of households which did not possess and operate any land outside the scope of the survey.**

1.3.2 A critical analysis of the concepts and definitions followed in the Situation Assessment Survey of NSS 59th Round with respect to the changed scenario of agriculture in the country revealed the necessity of dropping the criterion of land possession for considering a household to be covered in the survey. Recognizing the fact that significant agricultural activity can be conducted without possessing any land, the definition of ‘farmer’ and ‘farmer households’ followed in NSS 59th Round was critically reviewed and the land possession as an eligibility criterion was dispensed with, replacing it with the concept of ‘agricultural production unit’ as one which produces field crops, horticultural crops, livestock and the products of any of the other specified agricultural activities.

1.3.3 With a view to keep the large number of households with insignificant agricultural activities out of survey coverage, it was decided to have a minimum value of agricultural produce for a household to qualify as an ‘agricultural production unit’. Based upon analysis of data of ‘Household Consumer Expenditure’ survey of NSS 66th Round (July, 2009 – June, 2010) considering average Monthly Household Consumer Expenditure (MHCE) for home grown consumption of some specific items, a cut off of Rs. 3000/- for value of annual agricultural produce was adopted, and the survey was renamed as ‘Situation Assessment Survey of Agricultural Households’.

1.3.4 An agricultural household for 70th Round survey was defined as a household receiving some value of produce more than Rs.3000/- from agricultural activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture etc.) and having at least one member self-employed in agriculture either in the principal status or in subsidiary status during last 365 days. However, as in NSS 59th round, households which were entirely agricultural labour households and households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services were not considered as agricultural households and they were kept outside the scope of the survey.

1.3.5 For recording the agricultural expenditure, SAS 2013 (70th Round) followed the actual expenditure (out of the pocket expenditure) in order to simplify the data collection. Accordingly, imputed figures in respect of consumption of input out of home stock or out of free collection as well as received in exchange or borrowed were not considered unlike in SAS 2003 (NSS 59th round). Instead, any such consumption of input was recorded with zero expenditure. Though with such method of accounting it would not be possible to derive true income of the household from agricultural activities, it would be sufficient to provide income from ‘paid expenditure’ approach.

1.3.6 The major differences in SAS of farmers (farmer households) conducted in 59th Round and SAS of agricultural households conducted in 70th Round are summarised as under:

- a) Possession of land was an essential condition for defining a person as farmer (farmer household) in 59th round, but an agricultural household as defined in NSS 70th round may or may not possess land.
- b) In 59th round, farmers having insignificant farming activities, like kitchen garden, etc., were excluded from the survey coverage. In order to eliminate households pursuing agricultural activities of insignificant nature in 70th round, households with at least one member self-employed in agriculture either in principal status or subsidiary status and having total value of produce during last 365 days more than Rs. 3000/- were only considered for inclusion in the survey coverage.
- c) In 59th Round, data was collected for 'kharif' and 'rabi' seasons from each sample household, whereas in 70th Round data was collected for two halves of the agriculture year 2012-13 as July to December, 2012 and January to June, 2013 from each sample household.
- d) In 70th Round, actual expenditure (out of pocket expenditure) incurred by the agricultural households for running farm and non-farm business was collected.

1.3.7 In the recent past, the State of Telangana has been carved out of erstwhile Andhra Pradesh. Separate estimates have been presented for the two new States. Thus, figures of Andhra Pradesh presented in this report are not comparable with the corresponding figures of 59th Round.

1.3.8 Due to the change in coverage and difference in some important concepts and definitions followed in the two rounds, the estimates of SAS 2013 (NSS 70th Round) are not strictly comparable with the same of SAS 2003 (NSS 59th Round). While making any comparison of estimates of these two rounds, sufficient care should be taken to account for these differences.

1.4 Reports of 70th Round Situation Assessment Survey (SAS) of Agricultural Households

1.4.1 The estimates of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the sample data. For the use in decision support, policy inferences and analysis, the key findings of Situation Assessment Survey of Agricultural Households of NSS 70th round was brought out within a year of completion of field work in a document titled '*Key Indicators of Situation of Agricultural Households in India*'. The detailed findings of the survey are planned for release in three other Reports. Besides this present report titled "*Some characteristics of agricultural households*", the tentative titles of the other two proposed reports are:

1. Some aspects of farming
2. Income, expenditure, productive assets and indebtedness of agricultural households

1.5 Contents of this Report

1.5.1 This report brings out some household characteristics like principal source of income, possession of land, type of ration card and demographic characteristics like general education, formal training in agriculture, usual principal activity status, staying away from home for employment etc., of agricultural households emanating from Situation Assessment Survey of Agricultural Households of NSS 70th Round. It contains three Chapters and three Appendices. Chapter Two gives the concepts and definitions followed in the Survey. Summary of findings of the Survey related to household characteristics of agricultural households are presented in Chapter Three. The detailed tables are presented in Appendix A. Appendix B provides the details of the sample design and estimation procedure for the survey. A copy of each of the schedules of enquiry –“Schedule -33” used in visit-1 and visit - 2 is given in appendix – C.

1.6 Features of the Survey: Schedule of Enquiry

1.6.1 The schedule of enquiry on ‘Situation Assessment Survey of Agricultural Households’ (Schedule 33) was designed to collect information on the economic conditions of agricultural households as measured by household consumer expenditure, income from productive assets and indebtedness, their farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture. Detailed information was collected in the survey on receipts and expenses of household’s farm and non-farm businesses to arrive at their income from these sources. Income from other sources, outstanding loan and consumption expenditure of the household were also collected. Along with the farming practices and preferences of the agricultural household, information on awareness about Minimum Support Price (MSP), crop insurance was also collected in the survey.

1.7 Features of the Survey: Scope and coverage

1.7.1 *Geographical coverage*

The Situation Assessment Survey (SAS) covered the rural areas of the country.

1.7.2 *Population coverage*: The following rules were adhered to:

1. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place were covered.
2. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household (see Chapter Two for definition of household).
3. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.

4. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered. Convicted prisoners undergoing sentence were outside the coverage of the survey.

1.7.3 Period of the Survey: The survey was conducted during the calendar year 2013 (1st January, 2013 to 31st December, 2013). The same household was visited twice during the survey period. The period of first visit (visit 1) was January to July 2013 and that of second visit (visit 2) was August to December 2013.

1.8 Sample Size

1.8.1 The number of sample villages surveyed by NSSO in 70th round was 4529. This is known as Central Sample. In addition to this, a “State Sample” was also surveyed by the State/UT Governments who participated in this survey. The results presented in this document are, however, based on central sample alone. For this particular survey, 8 households were selected in each sample village, for canvassing Sch.33 both in visit 1 and visit 2. A few households of visit 1 became “casualty” while surveying in visit 2. On all-India basis, a total of 35200 households were surveyed in visit-1 and 34907 of them could be surveyed in visit 2. State-wise number of villages surveyed and the number of households in which Schedule 33 was canvassed separately for visit 1 and visit 2 are given in *Statement 1.1*.

Statement 1.1: Number of villages surveyed and number of households surveyed for Schedule 33: NSS 70th round, Central sample

| state/UT | number of villages surveyed | number of households surveyed | |
|----------------------|-----------------------------|-------------------------------|--------------|
| | | visit 1 | visit 2 |
| (1) | (2) | (3) | (4) |
| Andhra Pradesh | 149 | 1164 | 1151 |
| Arunachal Pradesh | 47 | 314 | 312 |
| Assam | 214 | 1682 | 1681 |
| Bihar | 266 | 2084 | 2077 |
| Chhattisgarh | 85 | 632 | 630 |
| Delhi | 10 | 49 | 46 |
| Goa | 14 | 91 | 90 |
| Gujarat | 166 | 1317 | 1303 |
| Haryana | 78 | 591 | 587 |
| Himachal Pradesh | 88 | 626 | 622 |
| Jammu & Kashmir | 92 | 712 | 711 |
| Jharkhand | 102 | 772 | 770 |
| Karnataka | 170 | 1329 | 1322 |
| Kerala | 159 | 1236 | 1217 |
| Madhya Pradesh | 250 | 1941 | 1925 |
| Maharashtra | 330 | 2594 | 2574 |
| Manipur | 96 | 749 | 748 |
| Meghalaya | 68 | 522 | 522 |
| Mizoram | 47 | 345 | 344 |
| Nagaland | 44 | 352 | 352 |
| Odisha | 214 | 1684 | 1677 |
| Punjab | 94 | 727 | 725 |
| Rajasthan | 214 | 1674 | 1635 |
| Sikkim | 40 | 312 | 312 |
| Tamil Nadu | 246 | 1947 | 1933 |
| Telangana | 97 | 764 | 752 |
| Tripura | 104 | 831 | 829 |
| Uttarakhand | 39 | 299 | 295 |
| Uttar Pradesh | 618 | 4866 | 4787 |
| West Bengal | 326 | 2563 | 2556 |
| A & N. Island | 20 | 142 | 136 |
| Chandigarh | 8 | 46 | 46 |
| Dadra & Nagar Haveli | 8 | 64 | 64 |
| Daman & Diu | 8 | 51 | 49 |
| Lakshadweep | 10 | 64 | 63 |
| Puducherry | 8 | 64 | 64 |
| all India | 4529 | 35200 | 34907 |

Chapter2

Concepts and Definitions

CHAPTER TWO

CONCEPTS AND DEFINITIONS

2.1 Conceptual Framework

2.1.1 Reference Period: Information was collected primarily for the agricultural year 2012-13 in two visits, viz., visit 1 and visit 2. For crops, information on *expenses* and *receipts from cultivation* were collected for the period July to December 2012 in visit 1 and for January to June 2013 in visit 2. However, it was ensured that all the crops, whether principal or not, harvested during agricultural year 2012-13 were duly considered in either visit 1 or visit 2. The same reference period was used for collecting information on *productive assets*.

2.1.1.1 For other items of information, different reference periods were used, viz., ‘*as on the date of survey*’ for land possession and indebtedness, ‘*last 30 days*’ for farming of animals, non-farm business and consumer expenditure and ‘*last 365 days*’ for principal source of income. For information on *productive assets* and *expenses* and *receipts from cultivation*, the reference period was July to December 2012 in visit 1 and January to June 2013 in visit 2.

2.1.1.2 The estimates of number of households presented in this report are based on data with a moving reference point, from 01.01.2013 to 31.07.2013, which spans over a period of seven months. These estimates, therefore, may be taken to represent the number of households existing as on 15.04.2013, the midpoint of the seven month period.

2.1.2 Agricultural Household: For the purpose of Situation Assessment Survey (SAS) of NSS 70th round, an agricultural household was defined as a household receiving some value of produce from agriculture activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc.) during last 365 days. However, household which were entirely agricultural labour household were excluded from the coverage. In contrast to the definition of farmer used in 59th Round of NSS survey, the necessary condition of ‘land possession’ had been dispensed with in this round. In this connection, it was also important to note that apart from agricultural labourers, households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services were not considered as agricultural household and they were kept out of the scope of the survey. Further, to eliminate households pursuing agricultural activities of insignificant nature, households with at least one member self-employed in agriculture either in the principal status or in subsidiary status and having total value of produce more than ₹3000/- during the last 365 days were only considered for being selected for this survey.

2.2 Monthly Per Capita Consumer Expenditure (MPCE)

2.2.1 Monthly Per Capita Consumer Expenditure (MPCE) for a household, is its total consumer expenditure divided by its size and expressed on a per month (30 days) basis. A person’s Monthly Per capita Consumer Expenditure (MPCE) is understood as that of the household to which he or she belongs.

2.2.2 In all the reports of Sch.33 in NSS 70th round, estimates of some important parameters of the survey are being presented for decile classes of MPCE. These decile classes are formed based on the common households of both visit 1 and visit 2. Wherever State-wise estimates are presented, decile classes are worked out separately for different States.

2.3 Combined Aggregates of Estimates

2.3.1 In Schedule 33, information on various parameters has been collected with different reference period. Information on wage/ salary, receipts and expenditure from crop production, purchase and sale of productive assets are collected for the reference period of 6 months whereas, information on expenses and receipts for farming of animals, expenses and output for non-farm business and household consumer expenditure are collected for the reference period of last 30 days.

2.3.2 Wherever information was collected for the reference period of 30 days, combined estimates for the agricultural year July 2012- June 2013 were calculated as weighted mean of estimates for common households of visit 1 and visit 2, where weights are 7 and 5 respectively. For information collected for the reference period of 6 months, combined aggregates were calculated as simple average of estimates for common households of visit 1 and visit 2 estimates.

2.4 Other Concepts and Definitions

2.4.1 Household: A group of person normally living together and taking food from a common kitchen constituted a household. By "normally" it was meant that temporary visitors were excluded while temporary *stay-aways* was included. Thus, a son or a daughter residing in a hostel for studies was excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/host's household. "Living together" was usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria were in conflict. For example, a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage or otherwise, the household formed by such a person's family members was taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. was considered as a single-member household except that a family living in such an establishment was considered as one household only.

2.4.2 Household Size: The size of a household was defined as the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stay away and excluding temporary visitors).

2.4.3 Dwelling Unit: By dwelling unit, it was referred to an entire structure or only a part of a structure where a household usually resided. The said unit may be owned, hired or otherwise occupied. However, if any household was found living under trees, bridges, in pipes, etc., it was not treated as living in dwelling unit. It may be noted that a dwelling unit constructed on a plot of land which was taken under long-term lease, usually 30 years or more, was considered as being held in owner-like possession. Similarly, a dwelling unit

possessed by a household under a long-term lease was also treated as in owner-like possession.

2.4.4 Economic Activity: The entire spectrum of human activity falls into two categories: *economic activity* and *non-economic activity*. Any activity that results in production of goods and services that adds value to national product was considered as an economic activity. The economic activities have two parts - market activities and non-market activities. Market activities were those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. Non-market activities were those involving the production of primary commodities for own consumption and own account production of fixed assets. The term 'economic activity' in the NSS 70th round of survey of NSSO included:

(i) all the market activities, i.e., the activities performed for pay or profit which resulted in production of goods and services for exchange,

(ii) of the non-market activities-

(a) all the activities relating to the primary sector (i.e., **industry Divisions 01 to 09 of NIC-2008**) which resulted in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods, including threshing and storing of grains for own consumption.

and

(b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets included construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge.

2.4.5 Principal Source of Income: The principal source of income of the household was the source which yielded maximum income among various sources from which the household received any income during the 365 days prior to the date of survey. The different sources were (i) cultivation, (ii) livestock, (iii) other agricultural activity, (iv) wage/salaried employment, (v) non-agricultural enterprises, (vi) pension, (vii) remittances, (viii) interest and dividends and (ix) others (which included income from dividends, interest etc., as well as income from non-economic activities like begging, prostitution etc.,).

2.4.6 Principal Activity Status: The usual principal activity was determined with reference to the fixed period of July to December 2012 in visit 1 and with reference to January to June 2013 in visit 2. The activity status on which a person spent relatively longer time (major time criterion) during the fixed period July to December 2012 / January to June 2013, was considered the *usual principal activity status* of the person.

2.4.6.2 To decide the usual principal activity of a person, he/ she was first categorised as belonging to the labour force or not, during the reference period **on the basis of major time criterion**. Persons, thus, adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work'. For the persons belonging to

the labour force, the broad activity status of either 'working' or 'not working but seeking and/or available for work' was then ascertained again on the basis of the relatively longer time spent in the labour force during the reference period. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such activity was determined again on the basis of the relatively longer time spent.

2.4.6.3 The detailed activity statuses were as follows:

| Activity status | code |
|---|------|
| worked in households enterprise (self-employed) as own account worker | 11 |
| worked in households enterprise (self-employed) as employer | 12 |
| worked as helper in households enterprises (unpaid family worker) | 21 |
| worked as regular salaried/wage employee | 31 |
| worked as casual wage labour : in public works other than MGNREG public works | 41 |
| in MGNREG public works | 42 |
| in other types of work | 51 |
| did not work but was seeking and/or available for work | 81 |
| attended educational institutions | 91 |
| attended domestic duties only | 92 |
| attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle-feed etc.) sewing, tailing, weaving, etc. for households use | 93 |
| rentiers, pensioners, remittance recipients, etc. | 94 |
| not able to work due to disability | 95 |
| others (including begging, prostitution, etc.) | 97 |

2.4.6.4 Codes 11, 12, 21, 31, 41, 42 & 51 referred to the status 'employed', 81 to the status 'unemployed' and the remaining codes viz. 91 to 97 (excluding 96) referred to the 'not in labour force'.

2.4.7 Subsidiary Economic Activity Status: A person whose principal usual status was determined on the basis of the major time criterion might have pursued some economic activity for 30 days or more during the reference period. The status in which such economic activity was pursued during the reference period July to December 2012/ January to June 2013 was the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, the major activity and status based on the relatively longer time spent criterion was considered. Engagement in work in subsidiary capacity might arise out of the two following situations:

- a person might be engaged in a relatively longer period during the reference period in economic (non-economic activity) and for a relatively minor period, which was not less than 30 days, in another economic activity (any economic activity).

- ii. a person might be pursuing an economic activity (non-economic activity) almost throughout the reference period in the principal status and also simultaneously pursuing another economic activity (any economic activity) for relatively shorter time in a subsidiary capacity. In such cases, since both the activities were being pursued throughout the reference period and hence the duration of both the activities were more than 30 days, the activity which was being pursued for a relatively shorter time was considered as his/ her subsidiary activity.

2.4.8 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in *household enterprises*. The essential feature of the self-employed was that they had *autonomy* (i.e., how, where and when to produce) and *economic independence* (i.e., market, scale of operation and money) for carrying out their operation. The remuneration of the self-employed consisted of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration was given by the revenue from sale of output produced by self-employed persons *minus* the cost of purchased inputs in production.

2.4.9 Regular Wage/ Salaried Employee: Persons worked in other's farm or non-farm enterprises (both household and non-household) and got in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) were the regular wage/ salaried employees. This category not only included persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.4.10 Casual Wage Labour: A person casually engaged in other's farm or non-farm enterprises (both household and non-household) and got in return wage according to the terms of the daily or periodic work contract was a casual wage labour.

2.4.11 Pension: These were, generally, post-retirement benefits that an employee received from employers. Besides, pension might be earned as social security measures, such as old age pension scheme, etc., or through pension income through investment in pension schemes.

2.4.12 Remittance: These were the transfers, in either cash or kind, to the households generally by former household members. However, remittances received from persons other than former household members and institutions were also included. If such transfers were in the form of loans, these were not considered. The valuation of the remittances received in kind was done by considering the market value of the kind received by the household. If the cash remittances were in any foreign currency, exchange value of the cash remittances in Indian Rupee was applied to arrive at the amount of remittances.

2.4.13 General Educational Level: General educational level was defined as the highest level of education successfully completed by the members of the household considering general/ technical/ vocational education.

2.4.13.1 A person who could both read and write a simple message with understanding in at least one language was considered literate. Those, who were not able to do so, were considered not literate.

2.4.13.2 Persons who were literate through means other than formal schooling were considered as literate without formal schooling. Some persons achieved literacy by attending Non-formal Education Courses (NFEC) or Adult Education Centres (AEC) or by attending primary schools created under Education Guarantee Scheme (EGS). Persons who had become literate through attending Total Literacy Campaign (TLC) were also considered in this category.

2.4.13.3 The criteria for deciding primary, middle, secondary, etc., levels were the same that was followed in the concerned states/union territories. Persons who attained proficiency in Oriental languages (e.g., Sanskrit, Persian, etc.) through formal but not through the general type of education were classified appropriately at the equivalent level of general education standard.

2.4.13.4 Formal Training in Agriculture: Any training in the field of agriculture, having a course structure, time schedule and *maybe* issuing of certificate on successful completion conducted generally by a institution was considered as *formal training in agriculture* for the purpose of the survey.

2.4.14 Usual Place of Residence: Usual place of residence (UPR) of a person was defined as a place (village/town) where the person had stayed continuously for a period of six months or more. Any member of a household might stay away from his/her usual place of residence for purpose of employment. For the purpose of determining the period of staying away, only those periods was considered for which the member stayed away from the household continuously for 15 days or more for employment or in search of employment only.

2.4.15 Ownership of Land: (i) A plot of land was considered to be owned by the household if permanent heritable possession, with or without the right to transfer the title, was vested in a member or members of the household. Land held in owner-like possession under long term lease or assignment was also considered as land owned. Thus, in determining the ownership of a plot of land two basic concepts were involved, namely,

(a) Land owned by the household, i.e., land on which the household was the right of permanent heritable possession with or without the right to transfer the title, e.g., Pattadars, Bhumidars, Jenmos, Bhumiswamis, RayatSithibans, etc. A plot of land might be leased out to others by the owner without losing the right of permanent heritable possession.

(b) Land held under special conditions such that the holder did not possess the title of ownership but the right for long term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long term lease for 30 years or more) was considered as being held under owner like possession. In the States where land reform legislations had provided for full proprietorship to erstwhile tenants, they were considered as having owner like possession, even if they have not paid the full compensation.

(ii) Sometimes a plot might be possessed by a tribal in accordance with traditional tribal rights from local chieftains or village/district council. Again, a plot might be occupied by a tenant, for which the right of ownership vests in the community. In both the cases, the tribal or other individual (tenant) was taken as owner, for in all such cases, the holder was the owner like possession of land in question.

2.4.16 Homestead Land: Homestead of a household was defined as the dwelling house of the household together with the courtyard, compound, garden, out-house, place of worship, family graveyard, guest house, shop, workshop and offices for running household enterprises, tanks, wells, latrines, drains and boundary walls *annexed* to the dwelling house. All land coming under homestead was defined as house site (homestead land). Sometimes, gardens, orchards or plantations, though adjacent to the homestead and lying within the boundary walls located on a clearly distinct piece of land. In such cases, land under garden, orchard or plantation was not considered as house site.

2.4.17 Lease of Land: (i) Land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title was defined as land leased-out. It was defined as land leased-in if it was taken by a household on rent or free without any right of permanent or heritable possession. The lease contract might be written or oral.

ii) Sometimes orchards and plantations were given to others for harvesting the produce for which the owner received a payment in cash or kind. Such transactions were not treated as 'lease' for the purpose of the survey.

2.4.18 Otherwise Possessed Land: This was understood to mean all public/institutional land possessed by the household without title of ownership or occupancy right. The possession was without the consent of the owner. Private land (i.e. land owned by the household sector) possessed by the household without title of ownership and occupancy right were *not* included in this category. All private land encroached upon by the household was treated as leased-in land.

2.4.19 Land Possessed: Land possessed was defined by land owned (including land under 'owner like possession') + land leased in - land leased out + land held by the household but neither owned nor leased in (e.g., encroached land).

2.4.19.1 Size Class of Land Possessed: Different estimates obtained from the survey have been presented for seven size classes of land possessed, namely, <0.01 ha., 0.01-0.40 ha., 0.41-1.00 ha., 1.01 – 2.00 ha., 2.01-4.00 ha., 4.01- 10.00 ha. 10.00 ha.+. The class limits are exclusive in the sense the class 0.01 -.40 covers land 0.01 to less than 0.40 ha. Similarly the class 0.41 -1.00 covers 0.40 ha. to less than 1.00 ha. Similarly the class 4.01- 10.00 ha. includes 4.00 ha. to less than 10.00 ha. The last class includes lands that are 10 ha. or more.

2.4.20 Agricultural Production: Agricultural production included:

- a) Growing of field crops (including fodder crops), fruits, grapes, nuts, seeds, seedlings in the nurseries, bulbs, vegetables and flowers both in open and under glass, production of fodder crops etc.
- b) Production of plantation crops like tea, coffee, cocoa, rubber etc.
- c) Forest production in parcels of land which form part of enumeration holding and
- d) Production of livestock and livestock products, poultry and poultry products, fish, honey, rabbits, furbearing animals and silk-worm cocoons. However, rearing pet animals were not considered as agricultural production.

2.4.21 Cultivation: All activities relating to production of crops and related ancillary activities were considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber, cashew, coconut, pepper, coffee, tea etc.) were not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC-2008 classes 0111, 0112, 0113, 0114, 0116, 0119 and among class 0128 sub classes 01281, 01282, etc., were considered as cultivation.

2.4.22 Livestock: Livestock were those animals which were used for food, fibre, labour, etc. Animals kept as pets, snakes, reptiles, frogs, fishes were excluded from the coverage of livestock.

2.4.23 Other Agricultural Activity: Other agricultural activities included all the activities in the agricultural sector, except cultivation and livestock farming activities, like activities of growing of plantation, orchard, forestry, logging, fishery, etc.

2.4.24 Farm Business: Farm business comprised household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g., paddy hulling and gur making. Although gur making was a manufacturing activity, this was covered under farm business for the purpose of this survey only when such activity was carried out in the farm by indigenous method. Such activities when they were carried out in non-household enterprises were to be excluded from the purview of the farm business. Farm business also included activities ancillary to agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied activities coming under Section A (Division 01 to Division 03) of the National Industrial Classification 2008.

2.4.25 Non-farm Business: Non-farm business was defined as all household economic activities other than those covered in the farm business. This covered manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business excluded such activities when they were carried out in non-household enterprises. All non-farm business enterprises, which were registered under section 2m(i) or 2m(ii) and section 85 of the Factories Act, 1948, were excluded from the scope of this survey. Further, Bidi and cigar manufacturing establishments registered under the Bidi and Cigar Workers (condition of employment) Act, 1966, were also kept outside the coverage of this survey.

2.4.26 Agricultural Labour: A person was considered to be engaged as agricultural labour, if he/ she followed one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- (i) farming
- (ii) dairy farming
- (iii) production of any horticultural commodity
- (iv) raising of livestock, bees or poultry
- (v) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce. Further, 'carriage for

transportation' referred **only to the first stage of the transport** from farm to the first place of disposal.

2.4.27 Different Sources of Drinking Water

2.4.27.1 Tap: An arrangement made by corporation, municipality, panchayat or other local authorities or any private or public housing estate or agency to supply water through pipe for household uses was considered as tap water. Drinking water carried through pipe from sources like well, tank, river, etc., by the owner / occupants only for convenience of the household, however, were not treated as tap water.

2.4.27.2 Tube Well/Borehole: Tube well or borehole was a deep hole that had been driven, bored or drilled, with the purpose of reaching groundwater supplies. Boreholes/tube wells were constructed with casing, or pipes, which prevent the small diameter hole from caving in and protect the water source from infiltration by run-off water. Water was delivered from a tube well or borehole through a pump, which may be powered by human, animal, wind, electric, diesel or solar means. Boreholes/tube wells were usually protected by a platform around it, which leaded spilled water away from the borehole and prevented infiltration of run-off water at the well head.

2.4.27.3 Protected Well/Unprotected Well: A well was considered as protected if it had generally the following protective measures to lower the risk of contamination:

- i. A headwall around the well with a properly fitting cover
- ii. A concrete drainage platform around the well with a drainage channel
- iii. A hand pump or bucket with windlass.

If instead of hand pump or bucket with windlass, electric pump was used to pump water from such wells, where the conditions (1) and (2) existed, it was considered as protected well.

2.4.27.4 Protected Spring/Unprotected Spring: A spring was considered protected, if it was protected from runoff, bird droppings and animals by a "spring box", which was constructed of brick, masonry, or concrete and was built around the spring so that water flows directly out of the box into a pipe or cistern, without being exposed to outside pollution. A spring which was not protected was called unprotected spring.

2.4.27.5 Rainwater Collection: Rainwater refers to rain that was collected or harvested from surfaces (by roof or ground catchment) and stored in a container, tank or cistern until used. Traditionally, rainwater collection had been practised in arid and semi-arid areas and had provided drinking water and water for other uses of the household. When such water was used for drinking purpose, the source of drinking water was considered as rainwater collection.

2.4.27.6 Surface Water: Surface water was water located above ground and includes rivers, dams, lakes, ponds, streams, canals and irrigation channels.

2.4.27.7 Others (tanker-truck, cart with small tank or drum, bottled water etc.): In 'tanker-truck', water was trucked to a locality and supplied from tanker. In 'cart with small tank or drum', water was supplied in small tank or drum to a locality by donkey carts,

motorized vehicles and other means. Drinking water packaged in bottles, jars, pouches, and similar containers was classified as bottled drinking water. However, tap water, well water, etc., kept by households in bottles, for convenience, was not treated as bottled drinking water.

2.4.28 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA):

The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) was an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) were formed by the State Governments. The Scheme provided at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult was defined a person who had completed his/ her eighteen years of age. Unskilled manual work was meant any physical work which any adult person was capable of doing without any special skill/ training. The implementing agency of the scheme might be any Department of the Central Government or a State Government, a ZilaParishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

Chapter3

Summary of Findings

CHAPTER THREE

SUMMARY OF FINDINGS

3.1 Introduction

3.1.1 The *Situation Assessment Survey of Agricultural Households* was conducted in NSS 70th round (January – December, 2013) to have a comprehensive picture of the agricultural households in India. The survey collected information on various aspects of farming, such as farming practices and preferences, availability of resources, awareness of technological developments and access to modern technology in the field of agriculture and level of living measured in terms of household consumer expenditure, income and indebtedness from the agricultural households in rural India. The survey, with its two visits, made a detailed assessment of the situation of the agricultural households for the agricultural year July 2012-June 2013.

3.1.2 This chapter presents estimates of some characteristics of agricultural households for the reference period. Most of the parameters for which estimates are presented in this report were collected only during the visit 1 of the survey. However, some demographic characteristics such as activity status of household members were collected during both the visits. In this chapter wherever State/UT-wise figures are presented, it is restricted to major States only. However, in the detailed tables (Appendix A) estimates are presented for those States for which number of sample households is at least 300. Figures for all the UTs have been clubbed and shown under the head ‘*Group of UTs.*’ as sample number of households for each of the UTs is less than 300. Social group wise figures are presented for a State/ Group of UTs only when the sample number of households in the Social Group was at least 100 during first *visit* of the survey.

3.2 Estimated Number of Agricultural Households

3.2.1 During the agricultural year July 2012- June 2013, rural India had an estimated total of 90.2 million agricultural households¹. These agricultural households were about 57.8 percent² of the total estimated rural households of the country during the same period. Uttar Pradesh, with an estimated 15.5 percent share of rural households in the country, accounted for about 20 percent of the total agricultural households in rural India. Among the major States, Rajasthan had the highest percentage of agricultural households (78.4 percent) among its rural households followed by Uttar Pradesh (74.8 percent) and Madhya Pradesh (70.8 percent). Kerala had the least percentage share of agricultural households (27.3 percent) among its rural households preceded by other southern States like Tamil Nadu (34.7 percent) and Andhra Pradesh (41.5 percent). Details are given in *Statement 3.1*.

¹The definition of Agricultural Household for the purpose of the survey is given in Para.1.3.4 of Chapter 1

²With respect to 156.1 million rural households as estimated by the Land and Livestock Holdings Survey of NSS 70th round

Statement 3.1: Percentage share of agricultural households and rural households in major States during the agricultural year July 2012- June 2013

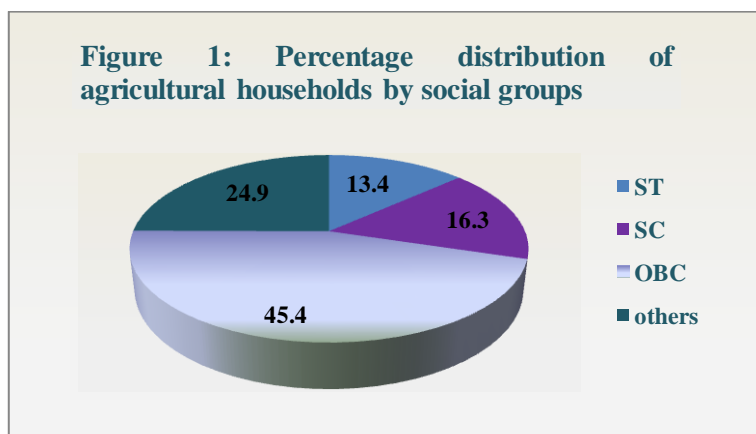

| State | percentage share (%) of | | agricultural households as percentage of rural households | estimated number (00) of | |
|--------------------|-------------------------|------------------|---|--------------------------|---------------------|
| | agricultural households | rural households | | agricultural households | rural households ** |
| (1) | (2) | (3) | (4) | (5) | (6) |
| Andhra Pradesh | 4.0 | 5.6 | 41.5 | 35968 | 86763 |
| Assam | 3.8 | 3.4 | 65.2 | 34230 | 52494 |
| Bihar | 7.9 | 9.0 | 50.5 | 70943 | 140611 |
| Chhattisgarh | 2.8 | 2.4 | 68.3 | 25608 | 37472 |
| Gujarat | 4.4 | 3.8 | 66.9 | 39305 | 58719 |
| Haryana | 1.7 | 1.7 | 60.7 | 15693 | 25849 |
| Jharkhand | 2.5 | 2.4 | 59.5 | 22336 | 37516 |
| Karnataka | 4.7 | 5.0 | 54.8 | 42421 | 77430 |
| Kerala | 1.6 | 3.3 | 27.3 | 14043 | 51377 |
| Madhya Pradesh | 6.6 | 5.4 | 70.8 | 59950 | 84666 |
| Maharashtra | 7.9 | 8.0 | 56.7 | 70970 | 125182 |
| Odisha | 5.0 | 5.0 | 57.5 | 44935 | 78120 |
| Punjab | 1.6 | 1.8 | 51.1 | 14083 | 27552 |
| Rajasthan | 7.2 | 5.3 | 78.4 | 64835 | 82722 |
| Tamil Nadu | 3.6 | 6.0 | 34.7 | 32443 | 93607 |
| Telangana | 2.8 | 3.2 | 51.5 | 25389 | 49309 |
| Uttar Pradesh | 20.0 | 15.5 | 74.8 | 180486 | 241328 |
| West Bengal | 7.1 | 9.1 | 45.0 | 63624 | 141359 |
| all India * | 100 | 100 | 57.8 | 902011 | 1561442 |

Ref: Table T1

*all India figures include all States and UTs which are not shown in the Statement

** The estimate of rural households as per the results of the Land and Livestock Holdings Survey of NSS 70th round

3.2.2 Agricultural Households by Social Group: Percentage distribution of agricultural households by social groups can be seen from Figure 1. *Other Backward Classes (OBC)* had the highest estimated share (45.4 percent) in the total agricultural households in the country during the period July 2012- June 2013. 16.3 percent of the agricultural households were from Scheduled Castes (SC) and 13.4 percent were from Scheduled Tribes (ST).

3.3 Land Possessed by the Agricultural Households

3.3.1 The area of land possessed by the agricultural households is an important indicator as the quantum of agricultural production is dependent on the area of land available for agricultural activities. Even though, the possession of land and its operation for agricultural activities was not an necessary condition for a household to be considered as Agricultural Household in the Situation Assessment Survey of 70th round, the survey, during its visit 1, collected information on land possessed by the agricultural household.

3.3.2 As per the results of the survey, about 69 percent of the agricultural households in rural India were estimated to have possessed land less than 1 hectare. Another 17 percent had land between 1.00 hectare and less than 2.00 hectares. Only 0.4 percent of the agricultural households were estimated to have possessed land 10 hectares or more. The agricultural household with land less than 1.00 hectares were highest among Scheduled Castes (82.7 percent) and lowest among 'Others' (63.6 percent). These results underline the fact that India is a land of marginal and small agricultural households. Details are in *Statement 3.2*.

Statement 3.2: Per 1000 distribution of agricultural households by size class of land possessed (ha.) during July 2012- June 2013

| social group | per 1000 distribution of agricultural households by size class of land possessed | | | | | | | | estimate number of agricultural households (00) |
|--------------|--|-------------|-------------|-------------|-------------|--------------|----------|-------------|---|
| | < 0.01 | 0.01 - 0.40 | 0.41 - 1.00 | 1.01 - 2.00 | 2.01 - 4.00 | 4.01 - 10.00 | 10.00 + | all sizes | |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) | (9) | (10) |
| ST | 19 | 229 | 408 | 225 | 96 | 22 | 1 | 1000 | 121186 |
| SC | 46 | 440 | 341 | 115 | 45 | 14 | 1 | 1000 | 146681 |
| OBC | 30 | 313 | 347 | 172 | 97 | 36 | 5 | 1000 | 409794 |
| Others | 11 | 299 | 326 | 179 | 118 | 61 | 7 | 1000 | 224350 |
| all | 26 | 319 | 349 | 171 | 94 | 37 | 4 | 1000 | 902011 |

Ref: Table 4 of Appendix A

Statement 3.3: Per 1000 distribution of agricultural households by social group for each size class of land possessed

| size class of land possessed (ha.) | per 1000 distribution of agricultural households by social group | | | | |
|------------------------------------|--|------------|------------|------------|-------------|
| | ST | SC | OBC | Others | all |
| (1) | (2) | (3) | (4) | (5) | (6) |
| < 0.01 | 94 | 280 | 522 | 104 | 1000 |
| 0.01 - 0.40 | 97 | 224 | 446 | 233 | 1000 |
| 0.41 - 1.00 | 157 | 159 | 452 | 232 | 1000 |
| 1.01 - 2.00 | 176 | 109 | 455 | 260 | 1000 |
| 2.01 - 4.00 | 138 | 77 | 472 | 313 | 1000 |
| 4.01 - 10.00 | 80 | 62 | 444 | 414 | 1000 |
| 10.00 + | 32 | 29 | 528 | 411 | 1000 |
| all sizes | 134 | 163 | 454 | 249 | 1000 |

Ref: Table 4 of Appendix A

3.3.3 Social Group-wise per thousand distribution of agricultural households for each size class of land possessed is given in *Statement 3.3*. It can be seen from this Statement that the proportion of Scheduled Castes (SC) and Scheduled Tribes (ST) agricultural households taken together is higher among bottom (size) classes of land possessed

compared to top (size) classes of land possessed. The proportion of SCs and STs taken together steadily reduces from 37.4 percent in the lowest size class of land possessed (<0.01

ha.) to 6.1 percent in the highest size class of land possessed (10.00 ha. or more). However, distribution of land possession among STs is slightly better than SCs.

3.3.4 *Statement 3.4* shows the percentage distribution of agricultural households by size class of land possessed in the major States. 91.5 percent of the agricultural households in West Bengal were estimated to have possessed land less than 1.00 hectare. Other major States with very high share of such agricultural households were Jharkhand (86 percent), Bihar (85.3 percent) and Kerala (83.9 percent).

Statement 3.4: Percentage distribution of agricultural households by size class of land possessed for major States

| State | size class of land possessed (ha.) | | | | | | | all sizes |
|------------------|------------------------------------|-------------|-------------|-------------|-------------|--------------|------------|------------|
| | < 0.01 | 0.01 - 0.40 | 0.41 - 1.00 | 1.01 - 2.00 | 2.01 - 4.00 | 4.01 - 10.00 | 10.00 + | |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) | (9) |
| Andhra Pradesh | 1.6 | 13.1 | 38.1 | 23.9 | 15.8 | 6.5 | 0.9 | 100 |
| Assam | 2.1 | 21.8 | 45.1 | 23.4 | 6.9 | 0.7 | 0.0 | 100 |
| Bihar | 2.0 | 47.9 | 35.4 | 10.6 | 3.3 | 0.7 | 0.0 | 100 |
| Chhattisgarh | 0.8 | 11.6 | 40.4 | 30.4 | 13.6 | 3.2 | 0.0 | 100 |
| Gujarat | 9.5 | 22.6 | 28.9 | 19.2 | 12.8 | 6.6 | 0.2 | 100 |
| Haryana | 6.2 | 26.0 | 23.1 | 17.5 | 18.0 | 8.8 | 0.5 | 100 |
| Jharkhand | 0.1 | 41.1 | 44.8 | 9.8 | 3.8 | 0.4 | 0.0 | 100 |
| Karnataka | 1.6 | 14.7 | 37.6 | 24.4 | 13.7 | 6.7 | 1.3 | 100 |
| Kerala | 0.0 | 51.6 | 32.3 | 11.6 | 4.0 | 0.4 | 0.0 | 100 |
| Madhya Pradesh | 3.5 | 10.6 | 37.5 | 26.3 | 16.0 | 5.2 | 0.8 | 100 |
| Maharashtra | 1.8 | 11.8 | 30.4 | 28.8 | 18.7 | 7.9 | 0.4 | 100 |
| Odisha | 1.1 | 29.2 | 51.0 | 13.8 | 3.7 | 1.2 | 0.0 | 100 |
| Punjab | 4.8 | 39.9 | 17.5 | 11.7 | 13.2 | 11.6 | 1.4 | 100 |
| Rajasthan | 2.4 | 19.4 | 33.7 | 18.0 | 15.0 | 9.8 | 1.7 | 100 |
| Tamil Nadu | 4.0 | 27.1 | 42.1 | 15.6 | 8.5 | 2.6 | 0.1 | 100 |
| Telangana | 0.9 | 8.6 | 40.5 | 25.1 | 18.9 | 5.1 | 0.8 | 100 |
| Uttar Pradesh | 3.9 | 48.5 | 29.9 | 11.6 | 4.7 | 1.3 | 0.1 | 100 |
| West Bengal | 0.7 | 59.4 | 31.4 | 6.6 | 1.6 | 0.2 | 0.0 | 100 |
| all India | 2.6 | 31.9 | 34.9 | 17.1 | 9.4 | 3.7 | 0.4 | 100 |

3.4 Distribution of Agricultural Households by Decile Classes of MPCE

3.4.1 Monthly consumer expenditure of the agricultural households was collected both during visit 1 and visit 2 of the survey. Decile classes of MPCE were worked out based on the combined data on consumer expenditure of common households of both visit 1 and

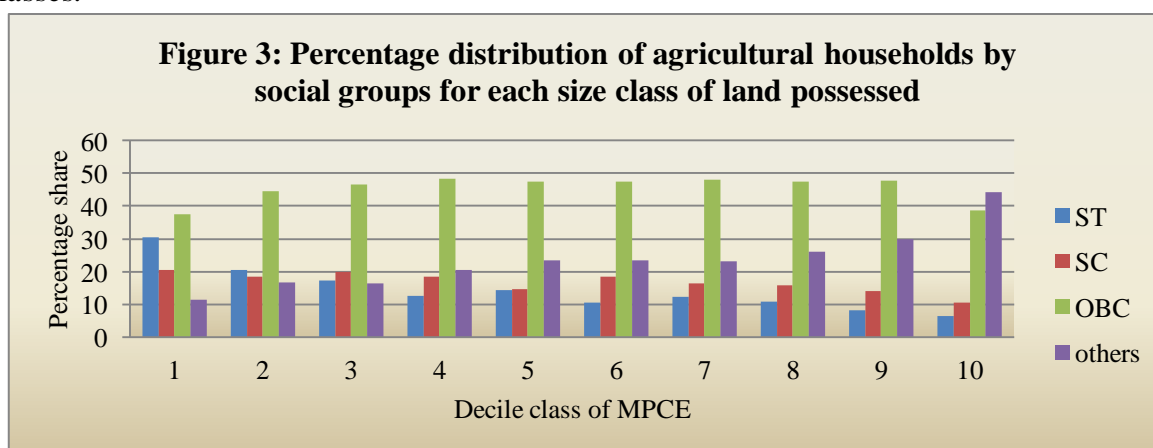

visit 2. Wherever estimates are presented state-wise for each decile class of MPCE, the decile classes were separately worked out for each state. Per 1000 distribution of agricultural households by social group for each decile class of monthly per capita consumer expenditure (MPCE) is presented in *Statement 3.5*. The bottom three

Statement 3.5: Per 1000 distribution of agricultural households by social group for each decile class of MPCE

| MPCE decile class | per 1000 distribution of agricultural households by social group | | | | |
|--------------------|--|------------|------------|------------|-------------|
| | ST | SC | OBC | others | all |
| (1) | (2) | (3) | (4) | (5) | (6) |
| 1 | 306 | 206 | 375 | 113 | 1000 |
| 2 | 205 | 184 | 444 | 168 | 1000 |
| 3 | 173 | 199 | 465 | 163 | 1000 |
| 4 | 126 | 184 | 484 | 205 | 1000 |
| 5 | 144 | 147 | 474 | 235 | 1000 |
| 6 | 106 | 184 | 474 | 235 | 1000 |
| 7 | 123 | 164 | 480 | 232 | 1000 |
| 8 | 108 | 157 | 475 | 260 | 1000 |
| 9 | 83 | 140 | 479 | 298 | 1000 |
| 10 | 65 | 105 | 388 | 442 | 1000 |
| all classes | 134 | 163 | 454 | 249 | 1000 |

Ref: Table 5 of Appendix A

decile classes had higher representation of ST and SC agricultural households compared to their shares in the 'all classes'. Whereas, their percentage share in the top two decile classes were very low. In fact, percentage share of ST agricultural households sharply declined from about 31 percent in the lowest class to little more than 6 percent in the highest class. The percentage share of SC agricultural households were around 20 percent in the first six classes (except the 5th class) and near about 15 percent in the next three classes. The share of OBC category was more or less uniform across the decile classes except for the first and last classes.

3.5 Principal Source of Income of Agricultural Households

3.5.1 Information on various activities from which the agricultural households had received some income during the 365 days prior to the date of the survey was collected during visit 1 of the survey. Sources included agricultural activities (cultivation, livestock and other

agricultural activities), non-agricultural enterprises, wage/salaried employment, pension, remittance and others. Number per 1000 of agricultural households engaged in various activities during the 365 days prior to the date of survey for each size class of land possessed is given in Statement 3.6.

Statement 3.6: Number per 1000 of agricultural households engaged in various activities during the 365 days prior to the date of survey

| size class of land possessed (ha.) | number per 1000 of agricultural households engaged in | | | | | |
|------------------------------------|---|------------|-----------------------------|------------------------------|---------------------------|------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/ salaried employment | others* |

Ref: Table 4 of Appendix A

3.5.2 Among various sources from which the agricultural households received any income during 365 days prior to the date of survey, the source which yielded maximum income was taken as *principal source of income*. Per 1000 distribution of agricultural households by their principal source of income during the 365 days prior to the date of survey for each size class of land possessed is given in Statement 3.7.

Statement 3.7: Per 1000 distribution of agricultural households by principal source of income during the 365 days prior to the date of survey for each size class of land possessed

| size class of land possessed (ha.) | per 1000 distribution of agricultural households by principal source of income | | | | | | |
|------------------------------------|--|-----------|-----------------------------|------------------------------|---------------------------|-----------|-------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/ salaried employment | others* | all |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
| < 0.01 | 16 | 229 | 27 | 108 | 564 | 55 | 1000 |
| 0.01 - 0.40 | 421 | 48 | 12 | 75 | 352 | 93 | 1000 |
| 0.41 - 1.00 | 692 | 23 | 9 | 36 | 200 | 41 | 1000 |

*others' includes pension and remittance also

Ref: Table 4 of Appendix A

3.5.3 At all India level about 93 percent of the agricultural households were estimated to have performed cultivation during the 365 days prior to the date of the survey and cultivation was the principal source of income for about 64 percent of the agricultural households. Even though, livestock activity was performed by nearly 72 percent of the agricultural households, only about 4 percent of the agricultural households reported this activity as their principal

source of income. Agricultural activity (cultivation, livestock activity and other agricultural activities taken together) was reported to be the principal source of income for about 68 percent of the agricultural households during the 365 days prior to the date of survey. About 50 percent of the agricultural households received some income from wage/salaried employment and it was the second highest reported principal source of income. 22 percent of the agricultural households reported wage/salaried employment as their principal source of income. 22 percent of the agricultural households reported wage/salaried employment as their principal source of income.

Figure 4: Percentage distribution of agricultural households by principal source of income

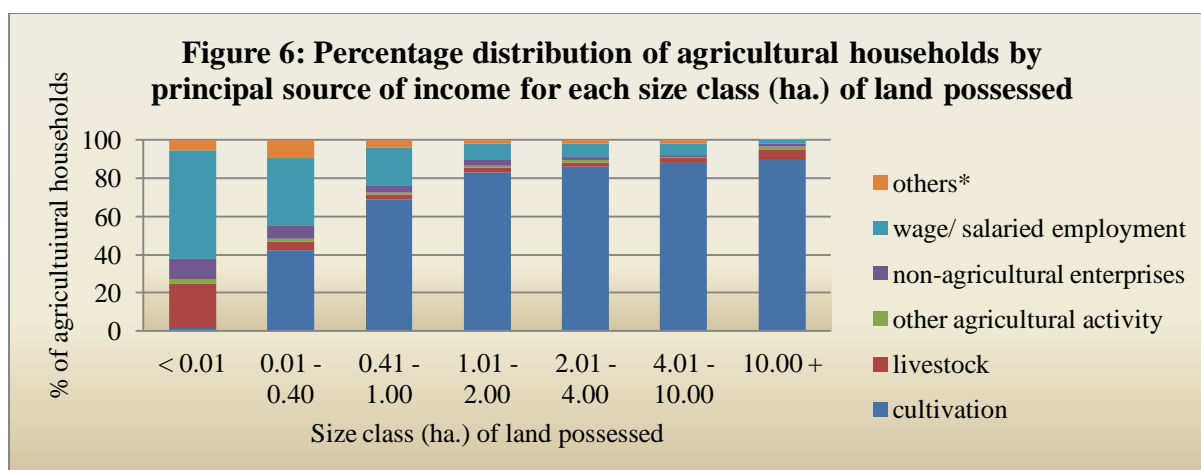

* 'Others' includes pension and remittances also

3.5.4 Dependence on cultivation as the principal source of income is largely determined by the extent of land possession. Majority of the agricultural households from each size class of land possessed reported to have performed cultivation, except the class of agricultural households having less than 0.01 hectare of land (which included landless agricultural households also). However, the percentage of agricultural households for which cultivation was the principal source of income steadily increased from 42.1 percent in the second bottom size class (0.01 – 0.40 ha.) to 89.4 percent in the highest size class of land possessed. Agricultural households having little land or no land reported to have much higher dependency on wage/salaried employment as the principal source of income as compared to the agricultural households from the higher size classes of land possessed. More than one-fifth of the agricultural households from the bottom size class of land possessed also performed livestock activity as a principal source of income; whereas, the share of livestock activity as the principal source of income was much lower in other land classes. (Ref: Table T2)

Figure 5: Percentage of agricultural households engaged in various activities for each size class of land possessed

* 'Others' includes pension and remittances also

* 'Others' includes pension and remittances also

3.5.5 The principal source of income of the agricultural households for the 365 days prior to the date of survey, as reported, did not show any dependence on MPCE decile classes. The results also did not show any influence of MPCE decile classes on reporting of *sources of income* except for wage/salaried employment in which case the percentage of households reporting it as a source of income steadily decreased from the lowest decile class to the highest decile class. Details are in Statement 3.8 and Statement 3.9.

Statement 3.8: Number per 1000 of agricultural households engaged in various activities during the 365 days prior to the date of survey for each decile class of MPCE

| MPCE decile class | number per 1000 of agricultural households engaged in | | | | | |
|--------------------|---|------------|-----------------------------|------------------------------|---------------------------|------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/ salaried employment | others* |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| 1 | 942 | 710 | 101 | 131 | 655 | 204 |
| 2 | 921 | 715 | 80 | 123 | 597 | 173 |
| 3 | 937 | 693 | 90 | 149 | 557 | 172 |
| 4 | 928 | 706 | 74 | 122 | 535 | 205 |
| 5 | 937 | 744 | 117 | 138 | 544 | 163 |

| all classes | 926 | 719 | 94 | 147 | 495 | 191 |

*others' includes pension and remittance also

Ref: Table 5 of Appendix A

3.5.6 Cultivation was reported to be the principal source of income by majority of the households uniformly over all MPCE decile classes. Even though livestock activity was reported as one of the sources of income by around 70 percent of the agricultural households almost uniformly from all the decile classes, only 2 to 5 percent of the households reported this activity as the principal source of income. Wage/salary employment was the second frequently reported activity as the principal source of income over all decile classes. (Refer Table T3)

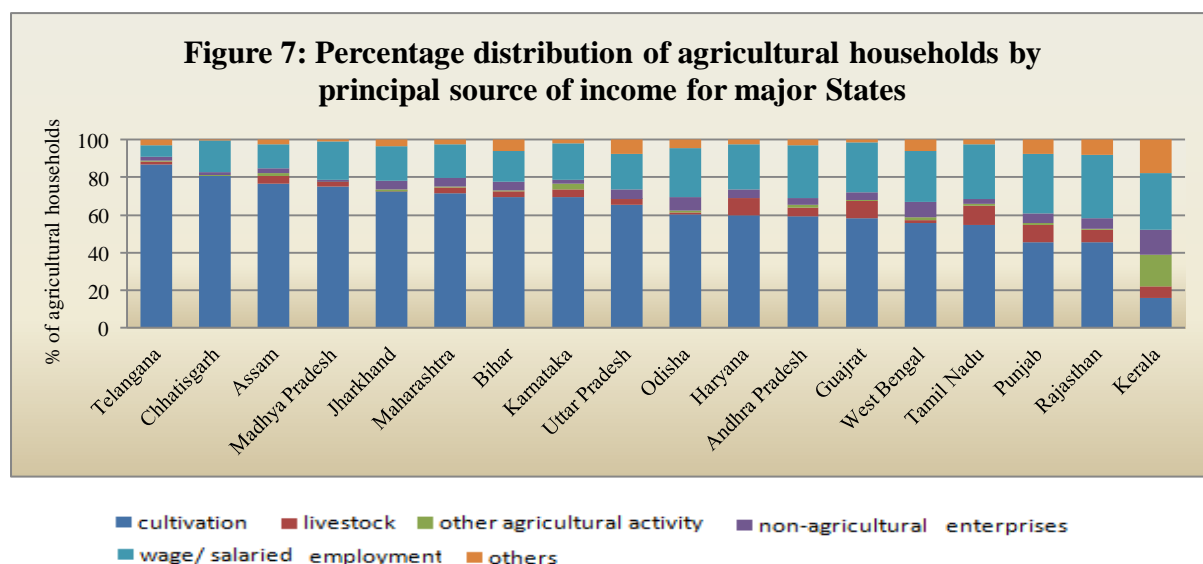

Statement 3.9: Per 1000 distribution of agricultural households by principal source of income during the 365 days prior to the date of survey for each decile class of MPCE

| MPCE decile class | per 1000 distribution of agricultural households by principal source of income | | | | | | |
|--------------------|--|-----------|-----------------------------|------------------------------|--------------------------|-----------|-------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/salaried employment | others* | all |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
| 1 | 632 | 21 | 7 | 28 | 276 | 36 | 1000 |
| 2 | 638 | 35 | 11 | 33 | 244 | 38 | 1000 |
| 3 | 662 | 31 | 6 | 53 | 217 | 31 | 1000 |
| 4 | 636 | 36 | 6 | 50 | 222 | 51 | 1000 |
| 5 | 631 | 29 | 9 | 37 | 249 | 44 | 1000 |
| 6 | 641 | 47 | 7 | 35 | 227 | 42 | 1000 |
| 7 | 654 | 31 | 6 | 58 | 185 | 65 | 1000 |
| 8 | 639 | 38 | 9 | 53 | 217 | 44 | 1000 |

| 10 | 578 | 49 | 24 | 60 | 204 | 85 | 1000 |
| all classes | 635 | 37 | 11 | 47 | 220 | 51 | 1000 |

*others' includes pension and remittance also

Ref: Table 5 of Appendix A

3.5.7 Cultivation followed by wage/salary employment was the activities reported by maximum number of agricultural households as the principal source of income in all major States except Kerala. More agricultural households in Kerala reported to have drawn their principal income from wage/salaried employment and other sources (pension, remittance, etc.) than cultivation. However, no wide variation among the major States was observed in the matter of reporting different activities (both agricultural and non-agricultural) as principal sources of their income during the 365 days prior to the date of the survey. (Refer Table T4)

3.5.8 Distribution of agricultural households by sources/the principal source of income have some variation among different social groups. Majority of the households from all the social groups reported agricultural activities like cultivation and livestock activity as one of the sources of income. However, a lesser percentage share of agricultural households from Scheduled Castes reported to have drawn their principal income from cultivation compared to agricultural households from the other social groups. The dependence on livestock activity as

the principal source of income was very low almost uniformly among all social groups. Details are given in *Statement 3.10* and *Statement 3.11*.

Statement 3.10: Number per 1000 of agricultural households by source of income during the 365 days prior to the date of survey for each social group

| social group | number per 1000 of agricultural households engaged in | | | | | |
|--------------|---|------------|-----------------------------|------------------------------|---------------------------|------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/ salaried employment | others* |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| ST | 968 | 701 | 115 | 86 | 678 | 130 |
| SC | 879 | 680 | 80 | 135 | 641 | 229 |
| OBC | 919 | 734 | 87 | 150 | 458 | 187 |
| Others | 947 | 729 | 104 | 181 | 369 | 206 |
| all | 926 | 719 | 94 | 147 | 495 | 191 |

*others' includes pension and remittance also

Ref: Table 4 of Appendix A

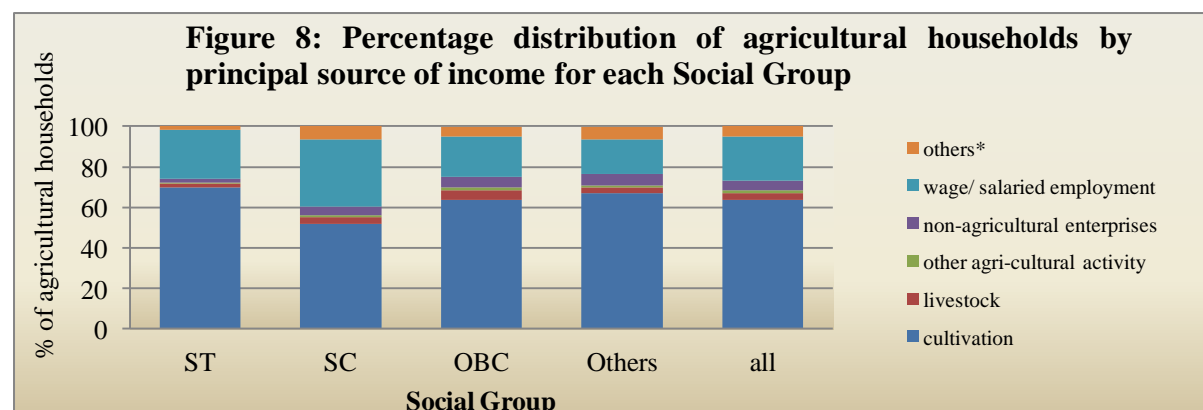

3.5.9 It can be seen from *Statements 3.10* and *3.11* that more households from SCs and STs reported wage salary employment as a source/ the principal source of their income than agricultural households belonged to OBCs and Others. However, dependence on 'non-agricultural enterprise' as a source/ the principal source of income showed a reverse trend during the reference period with more agricultural households from OBCs and Others reported this activity than agricultural households from Scheduled Castes and Scheduled Tribes.

Statement 3.11: Per 1000 distribution of agricultural households by principal source of income during the 365 days prior to the date of survey for each social group

| social group | per 1000 distribution of agricultural households by principal source of income | | | | | | |
|--------------|--|-----------|-----------------------------|------------------------------|---------------------------|-----------|-------------|
| | cultivation | livestock | other agricultural activity | non-agricultural enterprises | wage/ salaried employment | others | all |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
| ST | 698 | 18 | 8 | 17 | 243 | 16 | 1000 |
| SC | 518 | 34 | 10 | 40 | 335 | 63 | 1000 |
| OBC | 639 | 47 | 11 | 53 | 200 | 49 | 1000 |
| Others | 668 | 30 | 12 | 54 | 170 | 65 | 1000 |

* 'others' includes pension and remittances also

3.6 Type of Land Possessed by Agricultural Households:

3.6.1 Unlike in Situation Assessment Survey (SAS) 2003, possession and operation of land was not an essential condition for a household to be treated as an agricultural household for the purpose of SAS 2013. However, information on land possessed by the agricultural households as on date of survey and operation of such land for agricultural activities any time during the 365 days prior to the date of survey were collected from the selected households during visit 1 of the survey. *Statement 3.12* shows per 1000 distribution of agricultural households by type of land possessed for each size class of land possessed. It also gives (i) number of households having MGNREGS job card³ per 1000 of agricultural households and (ii) number of households operated any land during 365 days prior to the date of survey per 1000 of agricultural households.

Statement 3.12: Per 1000 distribution of agricultural households by type of land possessed and number per 1000 of agricultural households operated any land for agricultural activities

| size class of land possessed (ha.) | per 1000 distribution of agricultural households by type of land possessed | | | | | number per 1000 of agricultural households | |
|------------------------------------|--|--------------------------|-----------------|----------|-------------|--|-------------------|
| | homestead only | homestead and other land | other land only | no land | all | operated any land for agricultural activities during last 365 days | MG-NREGS Job card |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) | (8) |
| < 0.01 | 703 | 233 | 11 | 24 | 1000 | 466 | 383 |
| 0.01 - 0.40 | 100 | 895 | 5 | - | 1000 | 948 | 453 |
| 0.41 - 1.00 | 29 | 965 | 5 | - | 1000 | 994 | 463 |
| 1.01 - 2.00 | 20 | 976 | 1 | - | 1000 | 996 | 438 |
| 2.01 - 4.00 | 19 | 974 | 6 | - | 1000 | 998 | 414 |
| 4.01 - 10.00 | 20 | 972 | 9 | - | 1000 | 996 | 361 |
| 10.00 + | 2 | 941 | 57 | - | 1000 | 975 | 293 |
| all sizes | 67 | 926 | 5 | 1 | 1000 | 966 | 444 |

Ref: Table 7 of Appendix A

3.6.2 At all India level an estimated 0.1 percent of the agricultural households reported to have not possessed any land at the time of the survey. 6.7 percent of the agricultural households had only homestead land. However, most of the agricultural households (92.6 percent) reported to have possessed some other type of land along with homestead land. Another 0.5 percent had only other type of land.

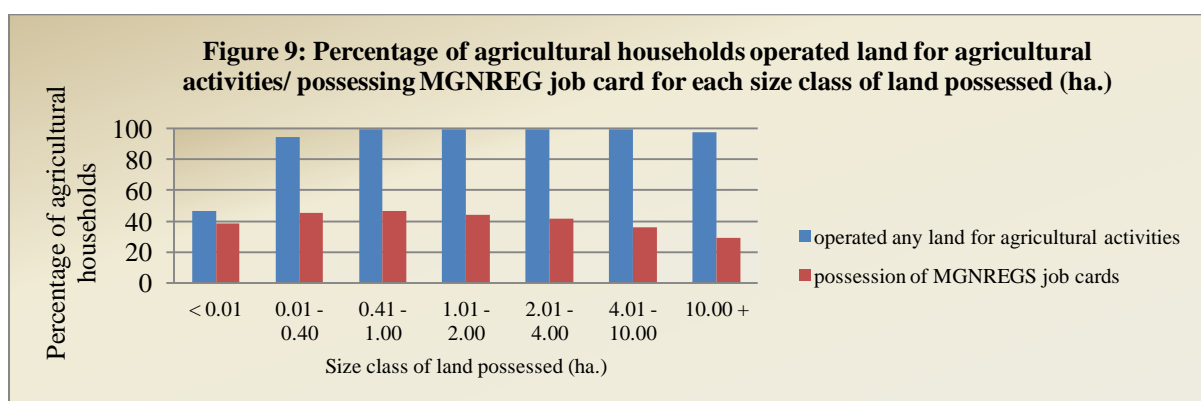

3.6.3 About 97 percent of the agricultural households in the country were estimated to have operated some land for agricultural activities during 365 days prior to the date of survey and 44 percent of estimated agricultural households in the country possessed MGNREGS job card at the time of the survey.

3.6.4 Among the agricultural households who possessed less than 0.01 hectares of land, about 70 percent possessed only homestead land. The share of landless agricultural households in the lowest size class of land possessed was estimated as 2.4 percent. Less than

³ The figures on MGNREGS job cards are based on the data collected from the agricultural households alone, which did not include pure agricultural labourer households. The state-wise figures may show a different trend if all the rural households are considered.

half of agricultural households in this class (46.6%) operated any land for agricultural activities during the 365 days prior to the date of survey.

3.6.5 The percentage of households possessing MGNREGS job card was lower for the lowest size class of land possessed (< 0.01 hectare) compared to the agricultural households with land possession between 0.01 ha. - 4.00 ha. The result is noteworthy in the context of larger dependency on wage/salary employment as a principal source of income for the households covered in lowest size class of land possessed.

3.6.6 *Statement 3.13* shows per 1000 distribution of agricultural households by type of land possessed for each social group. It also presents (i) number of households having MGNREGS job cards per 1000 of agricultural households and (ii) number of households operated any land during 365 days prior to the date of survey per 1000 of agricultural households.

Statement 3.13: Per 1000 distribution of agricultural households by type of land possessed and number per 1000 of agricultural households operated any land for agricultural activities for each social group

| social group | per 1000 distribution of agricultural households by type of land possessed | | | | number per 1000 of agricultural households | |
|--------------|--|--------------------------|-----------------|----------|--|------------------|
| | homestead only | homestead and other land | other land only | no land | operated any land for agricultural activities during last 365 days | MGNREGS Job card |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| ST | 45 | 943 | 7 | 0 | 986 | 688 |
| SC | 121 | 875 | 2 | 1 | 938 | 593 |
| OBC | 63 | 929 | 5 | 1 | 965 | 392 |
| Others | 49 | 945 | 4 | 0 | 977 | 311 |
| all | 67 | 926 | 5 | 1 | 966 | 444 |

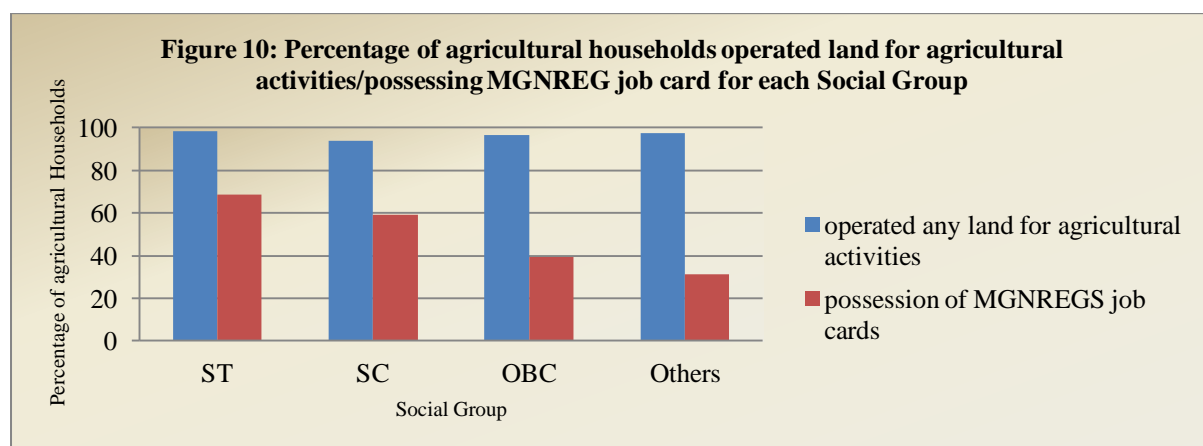

Ref: Table 7 of Appendix A

3.6.7 Percentage share of agricultural households possessing only homestead land among Scheduled Caste agriculture households were almost double or more than that in other social groups with 12.1 percent of the SC agricultural households reporting only homestead land. 0.1 percent of agricultural households among SCs and OBCs reported to have not possessing any type of land at the time of the survey. About 93 percent of agricultural households in the country possessed both homestead and other land at the time of the survey.

3.6.8 Around 98 percent of households from STs and Others Category were estimated to have operated some land during the 365 days prior to the date of the survey. A slightly lower share of agricultural households which were reported to have operated some land during the

365 days prior to the date of survey among SCs (93.8 percent) and OBCs (96.5 percent) is explained by the landless agricultural households among these social groups.

3.6.9 Possession of MGNREGS job card was more among STs (68.8 percent) and SCs (59.3 percent) than OBCs (39.2 percent) and other category (31.1 percent).

3.6.10 Per 1000 distribution of agricultural households by type of land possessed for each decile class of MPCE and number per 1000 of agricultural households operated any land for agricultural activities for each decile class of MPCE are given in *Statement 3.14*. More than 91 percent of agricultural households from all the decile classes were reported to have possessed some other type of land along with the homestead land at the time of the survey. An estimated 95 percent or more households from all the classes reported to have operated some land for agricultural activities during the 365 days prior to the date of survey. Share of agricultural households possessing MGNREGS job cards were comparatively higher in the bottom decile classes.

Statement 3.14: Per 1000 distribution of agricultural households by type of land possessed and number per 1000 of agricultural households operated any land for agricultural activities for each decile class of MPCE

| MPCE decile class | type of land possessed | | | | number per 1000 agricultural households having | |
|--------------------|------------------------|--------------------------|-----------------|----------|--|------------------|
| | homestead only | homestead and other land | other land only | no land | operated any land for agricultural activities during last 365 days | MGNREGS Job card |

Ref: Table 8 of Appendix A

3.6.10 In all major States excepting Gujarat, Haryana, Kerala, Punjab and Tamil Nadu more than 90 percent of the agricultural households had some other type of land along with the homestead land, whereas about 12 to 16 percent of agricultural households of these States possessed only homestead land. About 94 to 99 percent of agricultural households in all the States, except Haryana and Punjab, operated some land for agricultural activities during the 365 days prior to the date of survey. More than 65 percent of agricultural households from Andhra Pradesh, Chhattisgarh, Madhya Pradesh, Rajasthan, Tamil Nadu, Telangana and West Bengal had MGNREGS job cards at the time of the survey. Details are in Statement 3.15.

Statement 3.15: Per 1000 distribution of agricultural households by type of land possessed and number per 1000 of agricultural households operated any land for agricultural activities for major States

| States | type of land possessed | | | | number per 1000 of agricultural households | |

Ref: Table 6 of Appendix A

Figure 11: Percentage of agricultural households operated any land for agricultural activities / possessing MGNREGS job card for major States

3.6.12 Per 1000 distribution of agricultural households by type of land possessed for each principal source of income is given in *Statement 3.16*. The share of households having only 'homestead land' was highest among the households which have reported livestock activity as their principal source of income. 22.7 percent of agricultural households in this group had only homestead land at the time of the survey which is more than three times the average (6.7 percent) of all types of principal sources of income taken together. As available from the same Statement, the percentage of the households which reported to have operated some land for agricultural activities was also lowest (78.5 percent) among the households with 'livestock activity' as their principal source of income.

3.6.13 The estimated share of households reported possession of MGNREGS job card was highest (54.7 percent) among the households with 'wage/salaried employment' as their principal source of income, followed by households with 'other agricultural activity' as principal source of income (52.2 percent).

Statement 3.16: Per 1000 distribution of agricultural households by type of land possessed and number per 1000 of agricultural households operated any land for agricultural activities for each principal source of household income

| principal source of income | type of land possessed | | | | number per 1000 agricultural households having | |
|------------------------------|------------------------|---------------------------|-----------------|----------|--|-------------------|
| | home-stead only | home-stead and other land | other land only | no land | operated any land for agricultural activities during last 365 days | MG-NREGS job card |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| cultivation | 25 | 970 | 5 | 0 | 1000 | 430 |

3.7 Land Possession Outside Village

3.7.1 Information on land possessed by the agricultural households outside the village they were residing was also collected in the survey. If the surveyed household possessed any such land, its location (within State/outside State/within and outside State) was reported. At all India level, 78.5 percent of the agricultural households did not possess any land outside the village they were residing at the time of the survey. 17.5 percent of agricultural households had reported possessing land outside the village but within the State and 3.9 percent agricultural households had land outside the State.

3.7.2 The percentage of households reported to have possessed land outside the village had a positive relation with the size class of land possessed. Among agricultural households possessing 10 hectares or more land, about 46 percent reported land possession outside the village. The share steadily reduced over size classes to merely about 8 percent among the

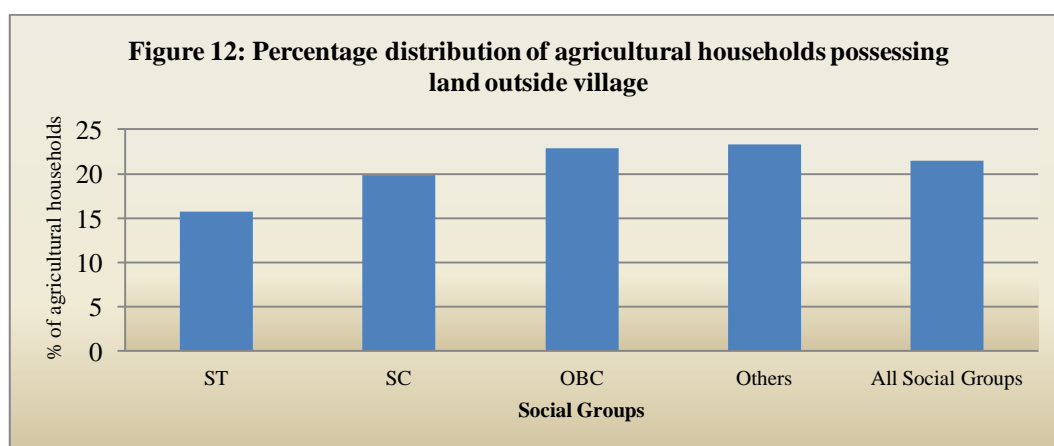

agricultural households possessing less than 0.01 hectare of land. The details are in *Statement 3.17*.

Statement 3.17: Per 1000 distribution of agricultural households by land possession outside the village for each size class of land possessed

| size class of land possessed (ha.) | per 1000 distribution of agricultural households by land possession | | | | |
|------------------------------------|---|---------------|-------------------------------|-------------------------|-------------|
| | outside village | | | no land outside village | all |
| | within state | outside state | both within and outside state | | |
| (1) | (2) | (3) | (4) | (5) | (6) |
| < 0.01 | 35 | 43 | 0 | 922 | 1000 |
| 0.01 - 0.40 | 160 | 35 | 1 | 804 | 1000 |
| 0.41 - 1.00 | 180 | 46 | 0 | 774 | 1000 |
| 1.01 - 2.00 | 191 | 40 | 0 | 768 | 1000 |
| 2.01 - 4.00 | 195 | 29 | 1 | 775 | 1000 |
| 4.01 - 10.00 | 211 | 37 | 1 | 751 | 1000 |
| 10.00 + | 441 | 22 | 1 | 537 | 1000 |
| all sizes | 175 | 39 | 1 | 785 | 1000 |

Ref: Table 12 of Appendix A

3.7.3 Percentage of agricultural households reporting land possession outside the village was lower among SCs and STs compared to agricultural households among other social groups. The details are in *Statement 3.18*

Statement 3.18: Per 1000 distribution of agricultural households by land possession outside the village for each social group

| social group | per 1000 distribution of agricultural households by land possession | | | | |
|--------------|---|--------------|-------------------------------|-------------------------|-------------|
| | outside village | | | no land outside village | all |
| | within state | within state | both within and outside state | | |

Ref: Table 12 of Appendix A

3.8 Type of Ration Card

3.8.1 Information on type of ration card possessed by the agricultural households (such as *Antyodaya*, BPL and Others) at the time of the survey was collected during visit 1. The information collected at the time of the survey did not differentiate between different types of cards on the basis of PDS facilities attached to such cards. The survey Schedule did not have provision to report the cases of possessing multiple cards by the same household. Whenever multiple cards were possessed by the same household, only one type was reported.

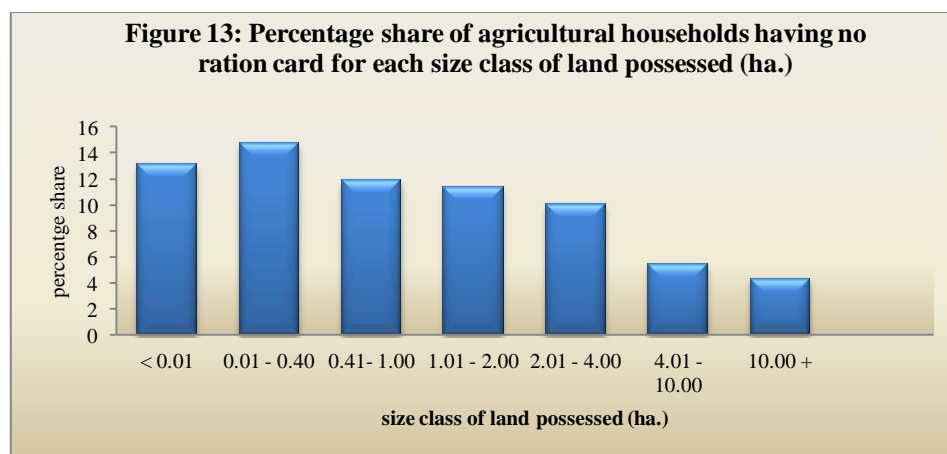

3.8.2 At all India level, about 12 percent agricultural households did not possess any ration card as on date of the survey. BPL card was possessed by about 36 percent of the estimated agricultural households. About 5 percent agricultural households possessed *Antyodaya* cards which were issued to *ultra-poor* households. The details are in *Statement 3.19*.

Statement 3.19: Per 1000 distribution of agricultural households by type of ration card possessed for each size class of land possessed

| size class of land possessed (ha.) | type of ration card | | | |
|------------------------------------|---------------------|------------|------------|----------------|
| | Antyodaya | BPL | others | no ration card |
| (1) | (2) | (3) | (4) | (5) |
| < 0.01 | 75 | 332 | 462 | 131 |
| 0.01 - 0.40 | 62 | 371 | 420 | 147 |
| 0.41 - 1.00 | 49 | 400 | 432 | 119 |
| 1.01 - 2.00 | 42 | 356 | 488 | 114 |
| 2.01 - 4.00 | 23 | 291 | 586 | 100 |
| 4.01 - 10.00 | 22 | 238 | 686 | 54 |
| 10.00 + | 29 | 173 | 754 | 43 |
| all sizes | 49 | 364 | 464 | 123 |

Ref: Table 7 of Appendix A

3.8.3 The percentage of agricultural households did not possess any ration card at the time of the survey was higher among the bottom size classes of land possessed as shown in *Statement 3.19*. Among the agricultural households having less than 0.01 hectare of land, the percentage share of households possessing either *Antyodaya* or BPL ration card (40.7 percent) was lower than the all India average (41.3 percent).

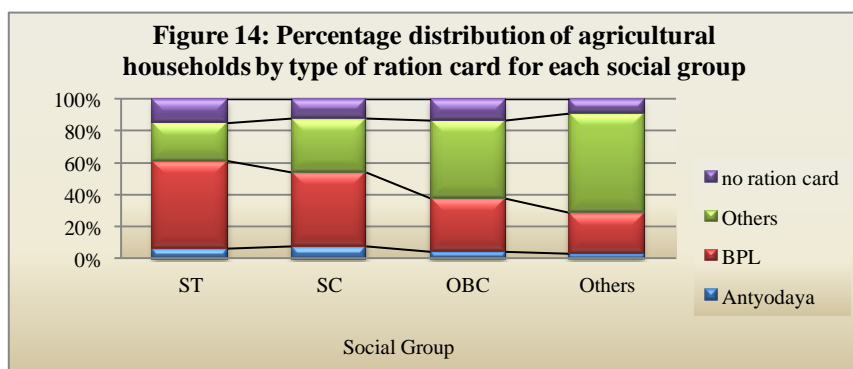

3.8.4 *Statement 3.20* gives per 1000 distribution of agricultural households by type of ration card for each social group. Percentage of agricultural household possessing *Antyodaya* or BPL card was higher among SCs and STs compared to other social groups. STs had the highest share of agricultural households having no ration card.

Statement 3.20: Per 1000 distribution of agricultural households by type of ration card possessed for each size class of land possessed

| social group | type of ration card | | | |
|--------------------------|---------------------|------------|------------|----------------|
| | Antyodaya | BPL | others | no ration card |
| (1) | (2) | (3) | (4) | (5) |
| ST | 64 | 549 | 237 | 150 |
| SC | 78 | 463 | 338 | 121 |
| OBC | 44 | 334 | 489 | 134 |
| Others | 32 | 256 | 622 | 90 |
| all social groups | 49 | 364 | 464 | 123 |

Ref: Table 7 of Appendix A

3.8.5 The percentage share of agricultural households having *Antyodaya*/BPL ration cards (45.9 percent) was highest among those whose principal source of income was reported to be 'wage/salaried employment'. Incidentally, the highest percentage share of agricultural households having no ration card (14.5 percent) also came from the same class. Details are in *Statement 3.21*.

Statement 3.21: Per 1000 distribution of agricultural households by type of ration card possessed for each principal source of income

| principal source of income | type of ration card | | | |
|------------------------------|---------------------|------------|------------|----------------|
| | Antyodaya | BPL | others | no ration card |
| (1) | (2) | (3) | (4) | (5) |
| cultivation | 43 | 373 | 462 | 122 |
| livestock | 25 | 328 | 574 | 73 |
| other agricultural activity | 43 | 359 | 542 | 57 |
| non-agricultural enterprises | 47 | 295 | 532 | 126 |
| wage/salaried employment | 70 | 389 | 396 | 145 |

| others | 42 | 374 | 470 | 113 |
| all | 49 | 364 | 464 | 123 |

Ref: Table 9 of Appendix A

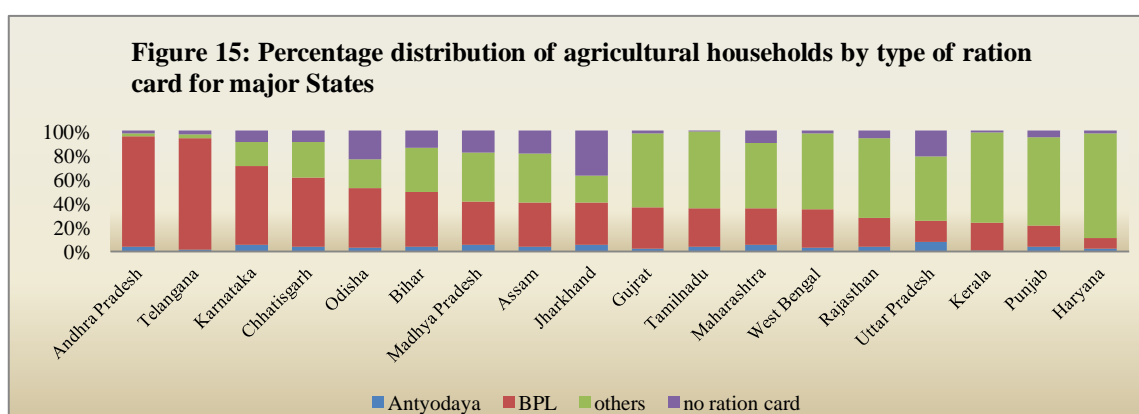

3.8.6 Per 1000 distribution of agricultural households by type of ration card for major States is given in *Statement 3.22*. Among the major States, more than 90 percent of

agricultural households from Andhra Pradesh and Telangana possessed BPL ration card. Agricultural households possessing *Antyodaya* card was highest in Uttar Pradesh (8.1 percent) followed by Karnataka (5.8 percent) and Jharkhand (5.8 percent). About 37 percent of agricultural households from Jharkhand and 24 percent of Odisha did not possess any ration card as on date of survey.

Statement 3.22: Per 1000 distribution of agricultural households by type of ration card possessed for major States

| States (1) | type of ration card | | | |
|------------------|---------------------|------------|---------------|-----------------------|
| | Antyodaya (2) | BPL (3) | others (4) | no ration card (5) |
| Andhra Pradesh | 37 | 918 | 22 | 23 |
| Assam | 40 | 369 | 403 | 188 |
| Bihar | 42 | 450 | 369 | 139 |
| Chhattisgarh | 41 | 570 | 299 | 90 |
| Gujrat | 26 | 340 | 616 | 18 |
| Haryana | 26 | 87 | 862 | 24 |
| Jharkhand | 58 | 350 | 224 | 369 |
| Karnataka | 58 | 651 | 196 | 95 |
| Kerala | 12 | 229 | 743 | 15 |
| Madhya Pradesh | 53 | 365 | 406 | 176 |

| all India | 49 | 364 | 464 | 123 |

Ref: Table 6 of Appendix A

3.9 Demographic Characteristics of Agricultural Households

3.9.1 In addition to the common demographic particulars like relation to head, sex, age, general education, etc., information on formal training in agriculture, principal and subsidiary activity status, staying away from home in search of employment, wages and salaries earned during the reference period were also collected in the survey. Though the designated block was canvassed during both the visits, only some selected information like principal and

subsidiary activity status, staying away from home in search of employment, wages and salaries earned during the reference period were collected during visit-2. No addition or deletion of household members listed during the visit-1 was allowed during visit-2.

3.9.2 With an estimated number of 460.23 million persons belonging to the agricultural households, the average household size of agricultural households in the country was estimated as 5.1. The average sex ratio (number of females to 1000 males) of agricultural household was 948 during the period. Details for different size class of land possessed are in *Statement 3.23*.

Statement 3.23: Average households size, sex ratio of agricultural households for each size class of land possessed (ha.)

| size class of land possessed (ha) | average household size | sex ratio | estimated number of persons (00) |
|-----------------------------------|------------------------|------------|----------------------------------|
| (1) | (2) | (3) | (4) |
| < 0.01 | 4.9 | 921 | 117562 |
| 0.01 - 0.40 | 4.9 | 988 | 1401104 |
| 0.41 - 1.00 | 5.0 | 943 | 1569327 |
| 1.01 - 2.00 | 5.3 | 900 | 815514 |
| 2.01 - 4.00 | 5.6 | 938 | 471102 |
| 4.01 - 10.00 | 6.1 | 947 | 203013 |
| 10.00 + | 6.7 | 974 | 24768 |
| all sizes | 5.1 | 948 | 4602390 |

Ref: Table 1 of Appendix A

3.9.3 Considering the distribution of households by decile classes of MPCE, highest average household size was observed among agricultural households that belonged to the bottom decile class (7.0). The average household size reduces steadily over the decile classes and reported the minimum (3.8) for the top decile class. In general, agricultural households belonged to the lower decile classes reported higher sex ratio compared to the agricultural households belonged to the higher decile classes. Details are in *Statement 3.24*.

Statement 3.24: Average households size, sex ratio of agricultural households for each decile class of MPCE

| MPCE decile class | average household size | sex ratio |
|--------------------|------------------------|------------|
| (1) | (2) | (3) |
| 1 | 7.0 | 1044 |
| 2 | 6.4 | 1046 |
| 3 | 6.0 | 903 |
| 4 | 5.5 | 976 |
| 5 | 5.4 | 946 |
| 6 | 5.0 | 926 |
| 7 | 4.8 | 925 |
| 8 | 4.5 | 901 |
| 9 | 4.2 | 887 |
| 10 | 3.8 | 936 |
| all classes | 5.1 | 948 |

Ref: Table 2 of Appendix A

3.9.4 For the purpose of analysis, the household members have been classified as farmers and non-farmers based on the activity status during two visits collected in the survey. Persons of age 7 years and above who were self employed in agriculture (i.e., worked as own account

worker or employer or helper (unpaid family worker) in household enterprises under NIC 2008 div. 01 to 03 (i.e., agriculture, forestry and fishing) either in principal status or subsidiary status) were defined as farmers for the purpose of this report. However, information on all important parameters related to the *Situation Assessment* (except demographic particulars) were collected and estimated for the **agricultural households** (not for farmers) only. Unlike in Employment Unemployment surveys of NSSO, the principal activity status in Situation Assessment Survey was determined with reference to a period of 6 months.

Statement 3.25: Estimated number of farmers among the member of agricultural households aged 7 years and above

| sex | farmers | all members* |
|----------------|---------------|---------------|
| | (in millions) | |
| (1) | (2) | (3) |
| male | 119.70 | 205.93 |
| female | 73.63 | 194.97 |
| persons | 193.33 | 400.90 |

*Based on the households visited during July- December 2012; Ref: Table 14 of Appendix A

3.9.5 As per this definition of farmers, about 48 percent of the estimated 400.9 million persons of aged 7 years and above were found to be farmers. The share of farmers among male members (of age 7 years and above) of the agricultural household was 58 percent against 38 percent among the female members.

3.10 Educational Characteristics of Agricultural Households

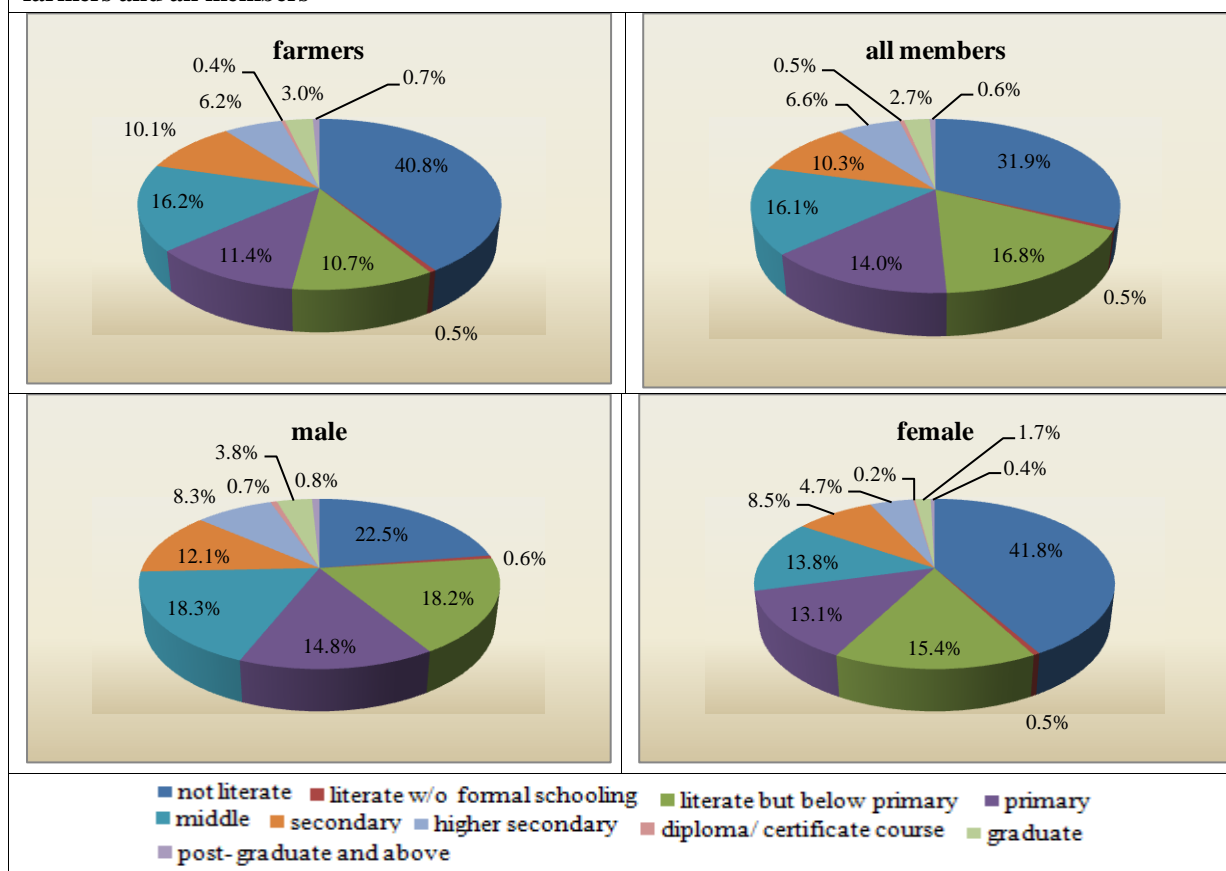

3.10.1 The level of general education of each of the members of the agricultural household aged 7 years or more was collected during the visit 1 of the survey. As per the results of the survey, an estimated 31.9 percent of persons aged 7 years and above of agricultural households in the country were found to be illiterate at the time of the survey. The share of illiterates among the male members of the agricultural households was estimated as 22.5 percent whereas, the share of illiterates was 41.8 percent among female members. Among farmers (who worked as own account worker or employer or helper (unpaid family worker) in household enterprises under NIC 2008 div. 01 to 03 (i.e., agriculture, forestry and fishing) either in principal status or subsidiary status) about 41 percent were illiterate. The share of illiterates among male and female farmers was estimated to be 29.8 percent and 58.6 percent, respectively. Per 1000 distribution of members of agricultural households (farmers/all members) by level of general education is given in *Statement 3.26*.

Statement 3.26: Per 1000 distribution of members of agricultural households aged 7 years or more by level of general education

| level of education | male | | female | | person | |
|-----------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| | farmers | all members | farmers | all members | farmers | all members |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| not literate | 298 | 225 | 586 | 418 | 408 | 319 |
| literate without formal schooling | 6 | 6 | 4 | 5 | 5 | 5 |
| literate but below primary | 119 | 182 | 88 | 154 | 107 | 168 |
| primary | 124 | 148 | 98 | 131 | 114 | 140 |
| middle | 187 | 183 | 123 | 138 | 162 | 161 |
| secondary | 126 | 121 | 60 | 85 | 101 | 103 |
| higher secondary | 83 | 83 | 28 | 47 | 62 | 66 |
| diploma/ certificate course | 6 | 7 | 1 | 2 | 4 | 5 |
| graduate | 43 | 38 | 9 | 17 | 30 | 27 |
| post- graduate and above | 9 | 8 | 3 | 4 | 7 | 6 |
| all level | 1000 | 1000 | 1000 | 1000 | 1000 | 1000 |

Ref: Table 14 of Appendix A

3.10.2 While considering the educational details at more disaggregate level, the percentage of persons with educational level below primary and primary are slightly higher in case of all members of agricultural households taken together than their farmer members, which probably indicates that some members of the agricultural households having below primary and primary level education (pursuing studies) did not participate in farming activities as identified by their status code at the time of survey. No such difference between these two classifications of members was observed in the case of other higher educational levels indicating most of them were engaged in farming activities as identified by their status codes. However, share of male members with different educational levels were consistently higher than the corresponding share of female members of the agricultural households.

Figure 16: Level of Education of members of agricultural households of age 7 years and above for farmers and all members

3.10.3 Comparing the literacy rate among farmers and all members for major States, it was observed that literacy rate among farmers (both male and female) were consistently lower compared to all members (both male and female) in all major States except Kerala. The female farmer literacy rate in Kerala (95 percent) was higher than the female literacy rate of all members (93.9 percent). It was also observed that female literacy rate among farmers was lower than the corresponding male literacy rate in all major States. Details are in *Statement 3.27*.

Statement 3.27: Percentage of literates among persons aged 7 years and above for major States

| State | farmers | | all members | | State | farmers | | all members | |
|----------------|---------|--------|-------------|--------|------------------|-------------|-------------|-------------|-------------|
| | male | female | male | female | | male | female | male | female |

| Madhya Pradesh | 58.1 | 25.1 | 66.4 | 48.5 | | | | | |

Ref: Table 14 of Appendix A

3.10.4 Formal Training in Agriculture: Information about household members of agricultural households who have attended some formal training in agriculture was collected during the visit 1 of the survey. The estimated share of persons who reported to have attended some kind of formal training in agriculture was very low at 1.1 percent at all India level. The share was slightly higher for farmer members (2 percent). The share of persons attended formal training in agriculture was higher for males than females. Among major States, southern States like Tamil Nadu (3.9 percent), Karnataka (2.6 percent) and Kerala (2.1 percent) had the highest share of persons among their agricultural households who have attended some kind of formal training in agriculture at the time of the survey. Details are in *Statement 3.28* below.

| Statement 3.28: Number per 1000 of persons aged 7 years and above attended formal training in agriculture | | | | | | |

Ref: Table 14 of Appendix A

3.11 Principal Activity Status

3.11.1 The usual principal activity of the members aged 7 years or more of agricultural households were determined with reference to the fixed period of July 2012- December 2012 in visit 1 and with reference to January 2013- June 2013 in visit 2. The activity status on which a person spent relatively longer time (major time criterion) during the fixed period July to December 2012/ January to June 2013, was considered as the usual principal activity status of the person. Per 1000 distribution of persons aged 7 years and above of agricultural households by principal activity status for the period July 2012- December 2012 and January 2013 – June 2013 is given in *Statement 3.29*.

Statement 3.29: Per 1000 distribution of persons aged 7 years and above among agricultural households by Principal Status during two halves of the agricultural year

| sex | per 1000 distribution of persons by principal activity status | | | | | | | | | |

*unemployed or out of labour force

Ref: Table 15 of Appendix A

3.11.2 As per the usual activity status, 38.2 percent of the members of agricultural households in the country were self-employed (own account worker, employer or unpaid family worker) in agriculture during July 2012- December 2012. Among male members of the agricultural households an estimated 46.9 percent were self employed in agriculture during the same period, whereas, the corresponding share in the female members was 29 percent.

3.11.3 During the period January 2013- June 2013, 34.5 percent of the members of the agricultural households were estimated to be self-employed in agriculture. During this period, estimated share of self-employed in agriculture was 42.8 percent for male members and 25.9 percent for female members.

3.11.4 At all India level 50 percent of the members of the agricultural households were estimated to be either unemployed or out of labour force during the July to December 2012. The share was 50.9 percent during January to June 2013. Estimated share of unemployed/ out of labour force during July to December 2012 was 34.7 percent among male members and 66 percent for female members of agricultural households. During the period January to June 2013, the corresponding shares were 35.3 percent and 67.4 percent for male and female members, respectively.

3.11.5 Per 1000 distribution of persons (separately for male and female members) by principal activity status for each size class of land possessed is given in *Statement 3.30 and Statement 3.31*. The share of male members who were self-employed in agriculture increased steadily with the increase in the size class of land possessed. Whereas, the percentage share of casual labour and out of labour force/unemployed among the male members showed an inverse relation with the size class of land possessed in general. In case of casual labour, more persons from the bottom size class were in the agricultural labour than non-agricultural labour unlike the male members in other size classes of land possessed.

Statement 3.30: Per 1000 distribution of household members aged 7 years or more by principal activity status
gender: male

| size class of land possessed (ha) | self-employed in agriculture | | regular salary/ wage employment | | casual labour | | | unemployed /out of labour force | all |

Ref: Table 16 of Appendix A

3.11.6 The share of self-employed in agriculture among female members increased with increase in the size class of land possessed and reached the highest for the size class 2.01 ha.

– 4.00 ha. and then showed a decreasing trend. In case of casual labour, percentage share of female members engaged in agricultural labour was higher than the share of female members engaged in non-agricultural labour in all size class of land possessed. It is note-worthy to mention that in case of male and female members, the share of out of labour force/unemployed was the least for the size class where the share of self employed in agriculture was the highest.

Statement 3.31: Per 1000 distribution of household members aged 7 years or more by principal activity status gender: female

| size class of land possessed (ha) | self-employed in agriculture | | regular salary/ wage employment | | casual labour | | | unemployed/ out of labour force | all |

3.11.7 Change in Principal Activity Status

3.11.7.1 As the principal activity status of the persons surveyed was determined with reference to a period of six months, the information was collected during both the visits so as to have the usual principal activity status of the household members with reference to the two halves of the agricultural year viz. July 2012- December 2012 and January 2013- June 2013. The data collected on this indicator during the two visits will enable examination on the *shift in activity status* usually perceived in respect of farmers in the country due to the seasonality of agriculture profession.

3.11.7.2 At all India level an estimated 87.2 percent of the persons aged 7 years or more among the members of agricultural households reported to have the same usual principal activity status during both the halves of the agricultural year. **(Refer Table 18 of Appendix A)**

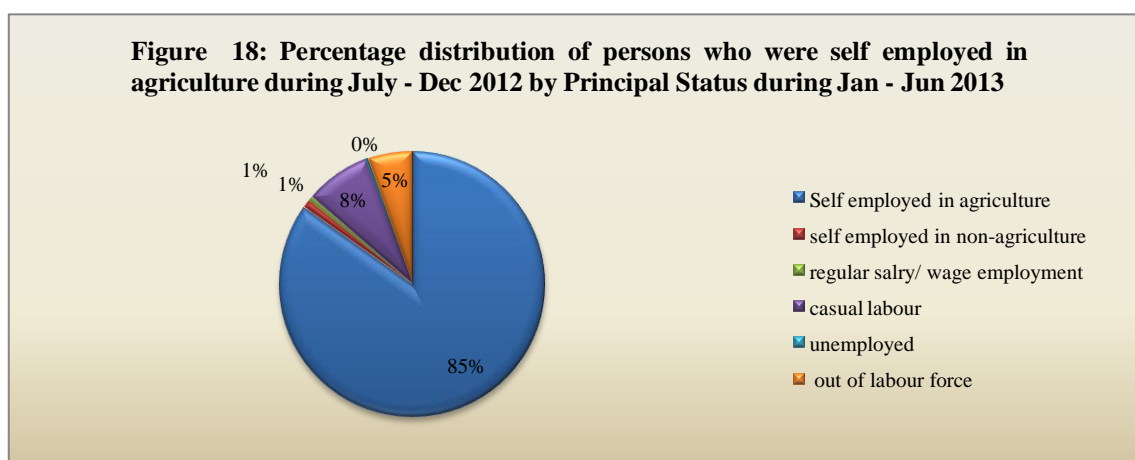

3.11.7.3 Since the focus of the survey was on persons who were self-employed in agriculture, the pattern of shift in their principal activity status over the two halves of agricultural year has been examined. Among the persons who were self-employed in agriculture during the first half of the agricultural year (i.e., July 2012- December 2012), 84.9 percent remained in the same principal activity (i.e., self-employed in agriculture) during the second half (January 2013- June 2013) also. Of the remaining, 8.1 percent shifted to casual labour (both agricultural and non-agricultural, including public works), and another 5.2 percent went out of labour force during the second half of the agricultural year. Details are given in *Statement 3.32*.

Statement 3.32: Percentage distribution of persons who were self-employed in agriculture during July-Dec 2012 by Principal Status during Jan-Jun 2013 for different size classes of land possessed

| principal activity status during January – June 2013 | | size class of land possessed (ha.) | | | | | | | all sizes |
|--|-----------------|------------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|

* other than public works

Ref: Table 18 of Appendix A

3.11.7.4 Considering the persons who were self-employed in agriculture during July – December 2012 over different size classes of land possessed, the share of persons who remained as self-employed in agriculture during January – June 2013 increased with increase

in the size class of land possessed except for the lowest (< 0.01 ha.) and the highest (10.00 ha. +) size classes as shown in figure below:

3.11.7.5 A major part of those shifted from the principal status '*self-employed in agriculture*' either became casual labour or went out of labour force during the second half of the agricultural year irrespective of the size class of land possessed they belonged to.

3.11.7.6 Among the major States, Chhattisgarh, Jharkhand, Odisha and West Bengal reported major shift in the Principal Status (PS) of persons during January- June 2013 who were self-employed in agriculture during July – December, 2012 compared to the other States. Details are in *Statement 3.33. (Refer Table T10)*

Statement 3.33: Percentage distribution of persons who were self employed in agriculture during July- Dec 2012 by Principal Status during Jan-Jun 2013 for major States

| State | self employed | | regular wage/ salaried employment | | casual wage labour in public works | casual labour in | | unemp-loyed | out of labour force | all |
|------------------|---------------|------------------|-----------------------------------|------------------|------------------------------------|------------------|------------------|-------------|---------------------|------------|

Figure 20: Percentage share of self employed in agriculture during January -June 2013 among persons who were self employed in agriculture during July- December 2012

3.12 Staying Away from the Usual Place of Residence for Employment

3.12.1 Information on staying away from the usual place of residence for more than 15 days for the purpose of employment in respect of persons aged 7 years and above, was collected for the two halves of the agricultural year (seasons).

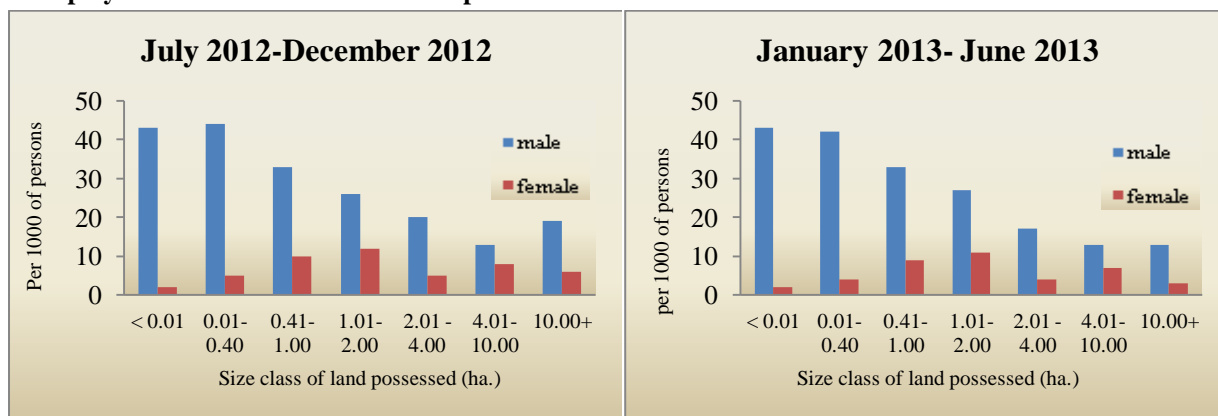

3.12.2 At all India level, 2 percent of persons aged 7 years and above belonged to the agricultural households stayed away from their usual place of residence for more than 15 days for employment (hereafter referred as 'persons stayed away from home for employment') during each of the two halves of the agricultural year July 2012- June 2013 (**Refer Table T11**). Per 1000 of persons who stayed away from home for employment for agricultural households in each size class of land possessed is given in *Statement 3.34*. The results indicated that the percentage share of persons who stayed away from home for employment belonging to the lowest three size classes were slightly higher than the all India average of 2 percent. Further this share decreased with the increase in size class of land possessed. The trend among the male members of the agricultural households was observed to be similar to that of persons (male + female); whereas, in case of female members, the percentage share was highest in the middle size class (1.01 ha.-2.0 ha.). The observed pattern was broadly similar in both the halves of agricultural year.

Statement 3.34: Per 1000 of persons aged 7 years and above stayed away from usual place of residence more than 15 days for the purpose of employment for each size class of land possessed

| size class of land possessed | July 2012 – December 2012 | | | January 2013 – June 2013 | | |
|------------------------------|---------------------------|----------|-----------|--------------------------|----------|-----------|
| | male | female | person | male | female | person |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |
| < 0.01 | 43 | 2 | 23 | 43 | 2 | 24 |
| 0.01- 0.40 | 44 | 5 | 24 | 42 | 4 | 23 |
| 0.41- 1.00 | 33 | 10 | 21 | 33 | 9 | 21 |
| 1.01- 2.00 | 26 | 12 | 19 | 27 | 11 | 20 |
| 2.01 - 4.00 | 20 | 5 | 12 | 17 | 4 | 11 |
| 4.01- 10.00 | 13 | 8 | 10 | 13 | 7 | 10 |
| 10.00+ | 19 | 6 | 11 | 13 | 3 | 8 |
| all sizes | 33 | 8 | 20 | 32 | 7 | 20 |

Ref: Table 19 of Appendix A

Figure 21: Per 1000 of persons aged 7 years and above stayed away for more than 15 days for the purpose of employment in each size class of land possessed

3.12.3 The per 1000 of persons stayed away from home for employment in each decile class of MPCE is given in *Statement 3.35*. It is observed that a higher share of persons belonged to the bottom decile classes stayed away from home for employment compared to that of the top decile classes. The pattern remained more or less similar both for male and female and also for the two halves of the agricultural year.

Statement 3.35: Number per 1000 of persons aged 7 years and above stayed away from home more than 15 days for the purpose of employment in each decile class of MPCE

| decile class of MPCE | July 2012 – December 2012 | | | January 2013 – June 2013 | | |
|----------------------|---------------------------|----------|-----------|--------------------------|----------|-----------|
| | male | female | person | male | female | person |
| (1) | (2) | (3) | (4) | (5) | (6) | (7) |

Figure 22: Number per 1000 of persons stayed away for more than 15 days for the purpose of employment in each decile class of MPCE

3.12.4 *Statement 3.36* shows per 1000 of persons stayed away from home for employment in each category of principal source of income. 35 out of 1000 persons belonged to the agricultural households whose principal source of income was 'wage/salary employment' stayed away from home for employment. The share was the least (5 out of 1000) among agricultural households whose principal source of income was 'livestock activity'. The trend was observed to be more or less the same for the two halves of the agricultural year.

Statement 3.36: Number per 1000 of persons aged 7 years and above stayed away from home more than 15 days for the purpose of employment for each principal source of income

| principal source of income (1) | July 2012 – December 2012 | | | January 2013 – June 2013 | | |
|-----------------------------------|---------------------------|---------------|---------------|--------------------------|---------------|---------------|
| | male (2) | female (3) | person (4) | male (5) | female (6) | person (7) |

Ref: Table 22 of Appendix A

*other than in public works

3.13 Average Monthly Income and Consumption Expenditure per Agricultural Households

3.13.1 The survey collected income of agricultural household receivable for the two halves of the agricultural year from various sources. It included net receipts from cultivation, farming of animals, non-farm business and income from wage/salary. Net receipt was worked out by deducting total expenses from total receipts for each source of income. Expenses included only the actual expenses incurred (out of the pocket expenses) for farm and non-farm business. Imputed expenses in respect of inputs out of home stock or out of free collection as well as receipt in exchange or borrowed were not considered for reporting expenses for the purpose of the survey. Income of the agricultural households from various other non-economic activities such as pension, remittances, etc. were not collected in the survey and not included in the average monthly income presented here.

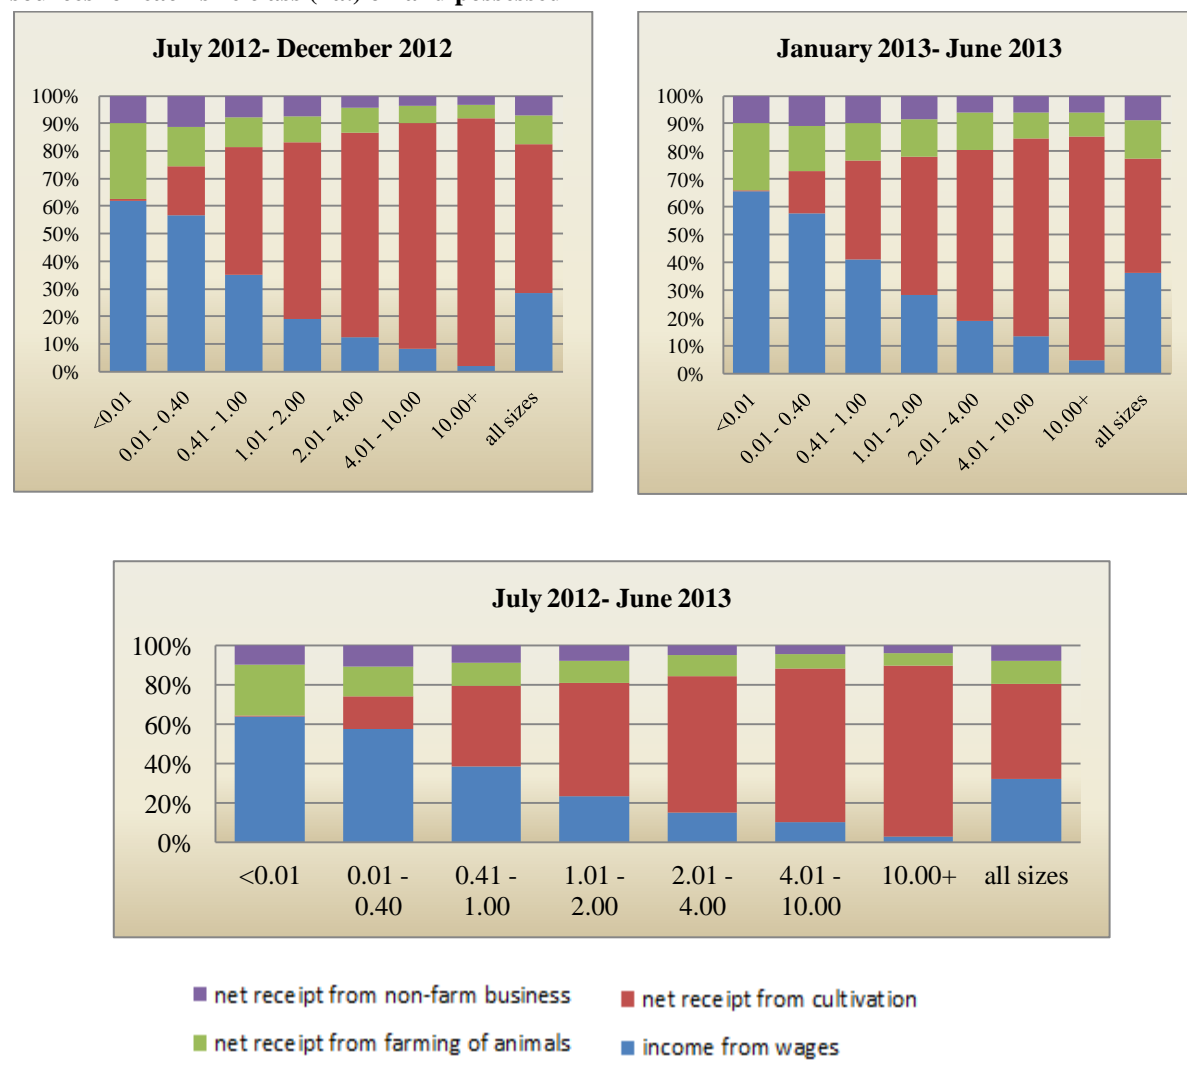

3.13.2 The average monthly income from different sources and average monthly consumer expenditure of agricultural households for the agricultural year July 2012- June 2013 and its two halves for each size class of land possessed are given in *Statement 3.38*. The Statement also gives the average monthly net investment in productive assets by the agricultural households during the period.

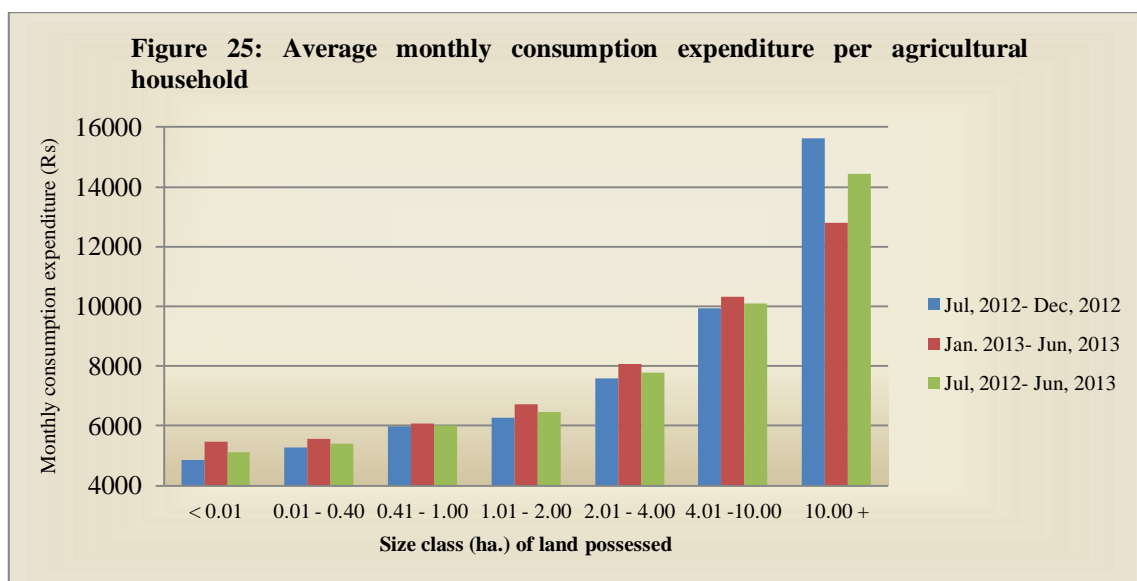

3.13.3 During the agricultural year July 2012- June 2013, nearly 60 percent of the average monthly income per agricultural household was estimated to have generated from farm business (cultivation and farming of animals). Nearly 32 percent of the average monthly income per agricultural household was contributed by income from wage/salary employment. Agricultural households in the lower size classes of land possessed were mostly dependent on wage/salary employment than farm business (cultivation and farming of animals) for their income during the agricultural year July 2012- June 2013. For the households belonging to the lowest size class, farming of animals fetched more income than cultivation during this reference period. Percentage share of income from cultivation/farm business in the average monthly income increased with increase in land possession. Major part of the average monthly income of the agricultural households belonged to the highest land class was from

cultivation. Share of income from non-farm business in the average monthly income decreased with increase in land size. Similarly net investment in productive assets per agricultural household increased with increase in land size.

Figure 24: Percentage distribution of average monthly income per agricultural households by different sources for each size class (ha.) of land possessed

3.13.4 The monthly consumption expenditure of the agricultural households was collected during both the visits of the survey. Along with the value of consumption out of purchase, value/imputed value of home produced stock, receipts in exchange of goods and services, gifts and loans and free collection were also considered for working out the average monthly consumption expenditure. The average monthly consumption expenditure per agricultural household during the agricultural year July 2012- June 2013 was estimated as ₹6223/-. The same was estimated as ₹6116/- and ₹6371/- respectively for the two halves of the agricultural year. During the agricultural year July 2012- June 2013, the average monthly consumption expenditure of the agricultural households possessing less than 0.01 hectares of land was ₹5108/-. It increased with the size class of land possessed to ₹14447/- for the agricultural households possessing land 10 hectares or more.

3.13.5 Information on net investment in productive assets by the agricultural household during the two halves of the agricultural year was collected in the survey. Productive assets comprised of assets used in farm & non-farm business and residential buildings including land. Net Investment was worked out by deducting any receipt from sale of productive assets from the expenditure incurred in purchase and major repair/improvement of productive assets during the reference period.

3.13.6 At all India level average net investment in productive assets per agricultural household during the agricultural year July 2012- June 2013 was estimated as ₹513/-. Average net investment in productive asset per agricultural household during the period July 2012- December 2012 was slightly higher at ₹556/- compared to that of ₹469/- during January 2013- June 2013.

Statement 3.38: Average monthly income (₹) from different sources, consumption expenditure (₹) and net investment in productive assets (₹) per agricultural household during July 2012- June 2013 for each size class of land possessed

| period | size class of land possessed (ha.) | income from wages/salary (₹) | net receipt from cultivation (₹) | net receipt from farming of animals (₹) | net receipt from non- farm business (₹) | total income (₹) | total consumption expenditure (₹) | net investment in productive assets (₹) |

Appendix B

**Note on Sample Design and
Estimation Procedure**

NOTE ON SAMPLING DESIGN AND ESTIMATION PROCEDURE

1. Introduction

1.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods, started its seventieth round from 1st January 2013. The survey continued till 31st December 2013.

1.2 **Subject Coverage:** The 70th round (January 2013 - December 2013) of NSS was earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households. The last survey on these subjects was conducted in 59th round of NSS (January 2003 - December 2003).

2. Outline of Survey Programme

2.1 **Geographical coverage:** This survey covered the whole of the rural areas of Indian Union.

2.2 **Visits 1 & 2:** Each sample FSU was visited twice during this round. Since the workload of the first visit (i.e., visit 1) was more, the first visit continued till the end of July 2013. Thus, period of the first visit was January – July 2013 and that of the second visit (i.e., visit 2) was August – December 2013.

The listing schedule (sch. 0.0) was canvassed only in the first visit. Schedules 18.1, 18.2 and 33 were canvassed in independent sets of sample households. Each sample household was visited twice. Visit 1 and visit 2 schedules were canvassed in the same set of sample households during first and second visit, respectively. Contents of the schedules for the two visits were not same since the information relate to two different seasons.

2.3 **Sub-rounds:** The survey period of the round were divided into two sub-rounds. Sub-round one consisted of the first half of the survey period of each visit i.e. 1st Jan -15th April 2013 for visit 1 and 1st August – 15th October 2013 for visit 2 while sub-round two consisted of the remaining period of the respective visits. Thus, each sub-round was of three and a half months duration for visit 1 and two and a half months for visit 2.

In each of these two sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep and rural areas of Arunachal Pradesh and Nagaland.

The villages/blocks visited in the first sub-round of first visit were revisited during the first sub-round of the second visit. Similarly, villages/blocks of sub-round 2 of visit 1 were revisited in sub-round 2 of visit 2.

2.4 Schedules of enquiry: During this round, the following schedules of enquiry were canvassed:

- Schedule 0.0 : list of households
- Schedule 18.1 : land and livestock holdings (rural only)
- Schedule 18.2 : debt and investment
- Schedule 33 : situation assessment survey of agricultural households (rural only)

3. Sample Design

3.1 Outline of sample design: A stratified multi-stage design was adopted for the 70th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector. and Urban Frame Survey (UFS) blocks in the urban sector.-The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs.)/ sub-blocks (sbs) from each rural/ urban FSU.

3.2 Sampling Frame for First Stage Units: *For the rural sector*, the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the term ‘village’ would mean Panchayat wards for Kerala) constituted the sampling frame. *For the urban sector*, the latest updated list of UFS blocks (2007-12) was considered as the sampling frame.

3.3 Stratification:

(a) Stratum had been formed at district level. Within each district of a State/ UT, generally speaking, two basic strata were formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2011 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum.

(b) However, a special stratum in the rural sector only was formed at State/UT level before district- strata were formed in case of each of the following 20 States/UTs: Andaman & Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Delhi, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Lakshadweep, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil

Nadu, Uttar Pradesh and West Bengal. This stratum comprised all the villages of the State with population less than 50 as per census 2001.

(c) In case of rural sectors of Nagaland one special stratum was formed within the State consisting of all the interior and inaccessible villages. Similarly, for Andaman & Nicobar Islands, one more special stratum had been formed within the UT consisting of all inaccessible villages. Thus for Andaman & Nicobar Islands, two special strata had been formed at the UT level:

- (i) special stratum 1 comprising all the interior and inaccessible villages
- (ii) special stratum 2 containing all the villages, other than those in special stratum 1, having population less than 50 as per census 2001.

3.4 Sub-stratification:

Rural sector: Different sub-stratifications were done for ‘hilly’ States and other States. Ten (10) States were considered as hilly States. They were: Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Sikkim, Meghalaya, Tripura, Mizoram, Manipur, Nagaland and Arunachal Pradesh.

(a) sub-stratification for hilly States: If ‘r’ be the sample size allocated for a rural stratum, the number of sub-strata formed was ‘r/2’. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to ‘r/2’ was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

(b) sub-stratification for other States (non-hilly States except Kerala): The villages within a district as per frame were first arranged in ascending order of *proportion of irrigated area in the cultivated area of the village*. Then sub-strata 1 to ‘r/2’ was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal *cultivated area*. The information on irrigated area and cultivated area was obtained from the village directory of census 2001.

(c) sub-stratification for Kerala: Although Kerala is a non-hilly State but because of non-availability of information on irrigation at FSU (Panchayat Ward) level, sub-stratification by proportion of irrigated area was not possible. Hence the procedure for sub-stratification was same as that of hilly States in case of Kerala.

Urban sector: There was no sub-stratification for the strata of million plus cities. For other strata, each district was divided into 2 sub-strata as follows:

sub-stratum 1: all towns of the district with population less than 50000 as per census 2011

sub-stratum 2: remaining non-million plus towns of the district

3.5 Total sample size (FSUs): 8042 FSUs (4534 in rural and 3508 in urban) were allocated for the central sample at all-India level.

3.6 Allocation of total sample to States and UTs: The total number of sample FSUs were allocated to the States and UTs in proportion to population as per census 2011 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators as well as comparability with previous round of survey on the same subjects was also kept in view.

3.7 Allocation of State/ UT level sample to rural and urban sectors: State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2011* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) was allocated to each state/ UT.

3.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per census 2011. Allocations at stratum level were adjusted to multiples of 2 with a minimum sample size of 2.

For special stratum formed in the rural areas of 20 States/UTs, as discussed in para 3.3 (b), 2 FSUs were allocated to each.

For special stratum 1 in the rural areas of Nagaland and Andaman & Nicobar Islands, 4 and 2 FSUs were allocated respectively.

3.9 Allocation to sub-strata:

3.9.1 Rural: Allocation was 2 for each sub-stratum.

3.9.2 Urban: Stratum allocations were distributed among the two sub-strata in proportion to the number of FSUs in the sub-strata. Minimum allocation for each sub-stratum was 2.

3.10 Selection of FSUs:

For the rural sector, from each stratum x sub-stratum, required number of sample villages were selected by Simple Random Sampling Without Replacement (SRSWOR) procedure.

For the urban sector, FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR) from each stratum x sub-stratum.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples were allocated among the two sub rounds.

3.11 Formation and selection of hamlet-groups/ sub-blocks: In case hamlet-groups/ sub-blocks were formed in the sample FSU, the same was done by more or less equalizing population. While doing so, it was ensured that the hamlet-groups/ sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks were formed in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks.

3.12 Formation of second stage strata and allocation of households

3.12.1 Schedule 18.1: Land & Livestock Holdings Survey (LHS) (rural only):

Four SSS were formed for schedule 18.1 based on four land possessed codes. SSS number was same as the land possessed code.

Each household was given a land possessed code according to the following criteria:

| land possessed code | criterion: area of the land possessed by the household as on the date of survey |
|---------------------|---|
| 1 | less than 0.005 hectare |
| 2 | equal to or more than 0.005 hectare but less than 1.000 hectare |
| 3 | equal to or more than 1.000 hectare but less than 2.000 hectares |
| 4 | equal to or more than 2.000 hectares |

3.12.2 Schedule 33: Situation Assessment Survey of Agricultural Households (SAS) (rural only):

Only 'agricultural households' were considered for this schedule. The agricultural households were divided into four SSS based on land possessed codes similar to LHS second stage strata.

3.12.3 Schedule 18.2: Debt and Investment Survey (AIDIS):

Three SSS were formed both in rural and urban sector: (i) households indebted either to institutional agencies only or to both institutional and non-institutional agencies, (ii) households indebted to non-institutional agencies only and (iii) households without any indebtedness.

3.12.4 Allocation and selection of sample households: The total number of households surveyed in an FSU is given below for each schedule type:

Two households were selected from each SSS for schedule 18.1 and 33. In case of hamlet group formation, one household was selected from each hg \times SSS for schedule 18.1 and 33. For schedule 18.2, the number of sample households were 6, 4 and 4 from SSS 1, 2 and 3 respectively. In case of hamlet group/sub-block formation, the number of sample households were 3, 2 and 2 from each (hg/sb) \times SSS for schedule 18.2. The number of SSS, allocations and sampling scheme by schedule type are illustrated in the following table.

| schedule type | number of SSS | number of sample households surveyed | | |
|---------------|---------------|--------------------------------------|--------------------------------------|---------------------------------|
| | | rural | urban | sampling scheme within each SSS |
| 18.1 | 4 | 8 (2 households from each SSS) | ---- | SRSWOR |
| 18.2 | 3 | 14 (SSS1 = 6, SSS2 = 4, SSS3 = 4) | 14 (SSS1 = 6, SSS2 = 4, SSS3 = 4) | |
| 33 | 4 | 8 (2 households from each SSS) | ---- | |

3.12.5 Selection of households: From each SSS the sample households for each of the schedules were selected by SRSWOR.

4. Estimation Procedure

4.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb

k = subscript for k-th sample household under a particular second stage stratum within an FSU/
hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = (D – 1) for FSUs with D > 1

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding
casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or
sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-
block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage
stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th
sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols are suppressed in following paragraphs
where they are obvious.

4.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum × sub-stratum:

4.2.1 Schedules 18.1 / 33:

4.2.1.1 Rural:

(i) For j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: i) Schedules 18.1 and 33 were canvassed in rural sector only

ii) Values of j for different schedules are as follows:

for sch. 18.1/33, j = 1, 2, 3 or 4;

4.2.1.2 Estimates in respect of joint operational holdings: In the case of joint operational holdings operated by the sample household jointly with other household(s), the value of a characteristic of the operational holding is first multiplied by the percentage share of land of the sample household(s) and then the higher estimates are built up.

4.3 Overall Estimate for Aggregates for a sub-stratum:

Overall estimate for aggregates for a sub-stratum (\hat{Y}_{st}) based on two sub-samples is obtained as:

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

4.4 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum (\hat{Y}_s) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4.5 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

4.6 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$

4.7 Estimates of Error: The estimated variances of the above estimates are as follows:

4.7.1 For aggregate \hat{Y} : $\hat{V}\hat{a}r(\hat{Y}) = \sum_s \hat{V}\hat{a}r(\hat{Y}_s) = \sum_s \sum_t \hat{V}\hat{a}r(\hat{Y}_{st})$ where $\hat{V}\hat{a}r(\hat{Y}_{st})$ is given by

$\hat{V}\hat{a}r(\hat{Y}_{st}) = \frac{1}{4}(\hat{Y}_{st1} - \hat{Y}_{st2})^2$, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

4.7.2 For ratio \hat{R} :

$M\hat{S}E(\hat{R}) = \sum_s \sum_t M\hat{S}E_{st}(\hat{R})$ where $M\hat{S}E_{st}(\hat{R})$ is given by

$$M\hat{S}E_{st}(\hat{R}) = \frac{1}{4\hat{X}^2} \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

4.7.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\hat{V}\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

5. Multipliers:

5(a) Two sets of multipliers are obtained:

- (i) For visit 1 only
- (ii) For visit 2 only

Hence, household multiplier is equal to:

- (i) visit 1 multiplier for all estimation based only on the visit 1 households
- (ii) visit 2 multiplier for all estimation based only on the visit 2 households

(iii) visit 2 multiplier for generating combined estimates based on the common set of households of visit 1 and visit 2.

5(b) The formulae for multipliers at stratum/sub-stratum/second-stage stratum for a sub-sample and schedule type are given below:

| sch type | sector | formula for multipliers | |
|-------------|--------|--|--|
| | | hg / sb 1 | hg / sb 2 |
| 18.1 / 33 | rural | $\frac{N_{st}}{n_{stmj}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$ | $\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$ |
| | | (j = 1, 2, 3, 4) | |

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristic, $D_{stmi}^* = 0$ in the relevant multipliers and there is only one multiplier for the village.
