## प्रस्तावना

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) ने अपने 70वें दौर (जनवरी 2013-दिसम्बर 2013) में भारत के ग्रामीण क्षेत्रों में 'भू और पशुधन' पर राष्ट्रव्यापी सर्वेक्षण कराया। सर्वेक्षण का उद्देश्य भूमि-उपयोग तथा पशुधन के विभिन्न पहलुओं पर जानकारी एकत्रित करना तथा योजना एवं नीति-निर्माण हेतु महत्वपूर्ण उपयुक्त संकेतकों तथा उपयोगी इनपुटों का विकास करना था। यह रिपोर्ट अन्य प्रयोक्ताओं/अनुसंधानकर्ताओं के लिए भी आंकड़े प्रदान करती है। एनएसएसओ 8वें दौर (जुलाई 1954-अप्रैल 1955) से प्रत्येक दस वर्षों में भूमि तथा पशुधन पर सर्वेक्षण करा रहा है। भूमि तथा पशुधन पर एनएसएसओ द्वारा कराया गया नवीनतम सर्वेक्षण इस प्रकार का 7वां व्यापक सर्वेक्षण है।

2. एनएसएसओ द्वारा जिस प्रतिदर्श का सर्वेक्षण किया जाता है उसे परंपरागत तौर पर 'केन्द्रीय प्रतिदर्श' कहा जाता है। अधिकांश राज्यों ने भी 'राज्य प्रतिदर्श' के अंतर्गत समान या बड़े प्रतिदर्श आकार के आधार पर सर्वेक्षण किया। केन्द्रीय प्रतिदर्श आंकड़ों से प्राप्त सर्वेक्षण परिणाम एनएसएसओ द्वारा रिपोर्टों के रूप में प्रकाशित किए जाते हैं। 'भारत में भूसम्पत्ति एवं पशुधन धारिता के मुख्य संकेतक' नामक दस्तावेज दिसंबर, 2014 में प्रकाशित किया गया था। इसके अलावा, एनएसएस के 70वें दौर के सर्वेक्षण परिणामों के विभिन्न पहलुओं पर दो विस्तृत रिपोर्टें जारी करने की योजना है। वर्तमान रिपोर्ट 'भारत में पारिवारिक स्वामित्व एवं स्वकर्षित जोत' इस श्रृंखला में जारी की गई पहली रिपोर्ट है, जो भारत में पारिवारिक संपत्ति का स्वामित्व तथा स्वकर्षित जोत से संबंधित आंकड़ों पर आधारित अनुमानों की जानकारी देती है।

3. इस रिपोर्ट में अखिल भारत तथा विभिन्न राज्यों एवं संघ राज्य क्षेत्रों के अनुमानों के अलावा पिछले दौरों के अनुमानों को भी, जहां तुलनीय हो, दिया गया है। यह रिपोर्ट देश के ग्रामीण इलाकों में पारिवारिक संपत्ति के स्वामित्व, परिचालित जोत, भूमि उपयोग के पैटर्न, फसल उत्पादन/पशु-पालन, पारिवारिक परिचालित जोतों में मौसम के अनुसार भिन्नता के विभिन्न संकेतक भी उपलब्ध कराती है। पूरी रिपोर्ट में पांच अध्याय तथा तीन परिशिष्ट हैं। अनुमानों से संबंधित मुख्य निष्कर्ष अध्याय III से V में दिए गए हैं।

4. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण-साधन विकसित करने तथा यह रिपोर्ट तैयार करने का कार्य किया। क्षेत्र संकार्य प्रभाग (एफओडी) ने क्षेत्र कार्य किया। आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) ने किया। समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया।

5. मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 70वें दौर के कार्य दल के अध्यक्ष और सदस्यों और राष्ट्रीय सांख्यिकीय आयोग (एनएससी) की अत्यंत आभारी हूँ। मैं इस रिपोर्ट को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करती हूँ।

6. मैं आशा करती हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, अभिन्यास अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

## PREFACE

The National Sample Survey Office (NSSO) conducted a nation-wide survey on 'Land and Livestock Holdings' in its 70<sup>th</sup> round (January 2013-December 2013) in rural India. The objective of the survey was to collect information on different aspects of land use and livestock holdings, and develop suitable indicators and critical inputs as may be useful for planning and policy formulation. The report also provides data for other users/ researchers. The NSS surveys on Land and Livestock Holdings are conducted decennially from the 8<sup>th</sup> round of NSSO (July 1954 - April 1955) onwards. The current survey on Land and Livestock Holdings is the seventh such comprehensive survey conducted by NSSO.

2. The sample surveyed by the NSSO is traditionally referred to as the 'Central Sample'. Most of the States have also conducted this survey on Land & Livestock Holdings for an equal or larger sample size under the 'State Sample'. The results of the survey, generated from the Central Sample data, are brought out by NSSO in the form of documents/ reports. The document '*Key Indicators of Land and Livestock Holdings in India*' was brought out in December, 2014. Apart from this, two detailed reports are planned for release on varied aspects of the survey results of NSS 70<sup>th</sup> round data. The present report, 'Household Ownership and Operational Holdings in India', the first in the series, deals with the estimates based on the data relating to the household ownership and operational holdings in India.

3. Besides presenting the estimates at all India level and for different States and Union Territories (UTs), this report contains estimates of the previous rounds, wherever comparable. This report provides different indicators of ownership holding, operational holding, pattern of land use, crop production/animal farming, seasonal variation in household operational holding for the rural areas of the country. The report contains five chapters and three appendices. The main findings, relating to the estimates are presented in Chapters III to V.

4. Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) and the data processing and tabulation work was done by the Data Processing Division (DPD). Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

5. I am highly thankful to the Chairman and Members of the Working Group for NSS 70th round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

6. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated.

## मुख्य विशेषतायें

यह रिपोर्ट जनवरी 2013 से दिसम्बर 2013 के दौरान चलाए गए 70वें रा.प्र.स. के भूमि एवं पशुधन धारक (LHS) सर्वेक्षण पर आधारित है। यह सर्वेक्षण देश के केवल ग्रामीण क्षेत्रों में चलाया गया। इस सर्वेक्षण में 4529 (एफएसयू) (खण्ड) थीं। सर्वेक्षण की कुछ विशेषताएं निम्नलिखित हैं :-

### (क) पारिवारिक विशेषताएं

- 2013 के दौरान, करीब 156 मिलियन परिवार ग्रामीण क्षेत्रों में निवास करते थे, इनमें 7.41 प्रतिशत परिवार भूमिहीन थे (भूमि का स्वामित्व या तो बिल्कुल नहीं या 0.002 हेक्टेयर से कम था) [स्टेटमेंट 3.1]
- 2013 के दौरान सबसे अधिक प्रतिशत परिवार, इस तरह के परिवार थे, जो खेती/कृषि में स्व-नियोजित थे (42.92%) तत्पश्चात् मजदूरी/वेतनभोगी रोजगार के थे (32.36%), जबकि सबसे कम प्रतिशत परिवार 'पशुधन पालन में स्व-नियोजित' वर्ग के थे। [स्टेटमेंट 3.3]

### (ख) पारिवारिक स्वामित्व भू-जोत

- 2013 के दौरान ग्रामीण भारत में परिवारों द्वारा स्वाधिकृत कुल क्षेत्र 92.369 मिलियन हेक्टेयर प्राक्कलित किया था, जिसका औसत आकार प्रति स्वामित्व जोत 0.592 हेक्टेयर भूमि था। [स्टेटमेंट S4.1]
- ग्रामीण परिवारों का सबसे अधिक प्रतिशत (75.41%) उपान्त स्वामित्व के वर्ग में पड़ा, जिसमें कुल नीजी क्षेत्र का 29.75% कब्जे में था। [स्टेटमेंट 4.2]
- ग्रामीण भारत में, विभिन्न सामाजिक वर्गों द्वारा स्वाधिकृत भूमि का शेयर अनुसूचित जाति के लिए 13.06%, अनुसूचित जन-जाति के लिए 9.23%, अन्य पिछड़ी जाति के लिए 45.68% एवं अन्यो के लिए 32.03% था। [स्टेटमेंट 4.4]
- प्रति परिवार स्वाधिकृत भूमि का औसत क्षेत्र अनुसूचित जाति के लिए 0.650 हेक्टेयर, अनुसूचित जन-जाति के लिए 0.272 हेक्टेयर, अन्य पिछड़ी जाति के लिए 0.603 हेक्टेयर एवं अन्यो के लिए 0.816 हेक्टेयर था। [स्टेटमेंट 4.4]
- 3.09% परिवारों ने जुलाई '12 -दिसम्बर '12 एवं 3.26% परिवारों ने जनवरी '13 से जून '13 के दौरान भूमि-पट्टे-पर-देने की सूचना दी, जबकि 13.11% परिवारों ने जुलाई '12 से दिसम्बर '12 एवं 13.65% परिवारों ने जनवरी '13 से जून '13 के बीच भूमि-पट्टे-पर लिया। [स्टेटमेंट 4.6]
- पट्टे-पर-दिए गए भूमि का अधिकतम क्षेत्र 'उत्पादन पट्टा पर देने' की शर्तों पर आधारित था। (जुलाई '12-दिसम्बर '12 के दौरान 41% एवं जनवरी '13 -जून '13 के दौरान 38%)। [स्टेटमेंट S4.8]

**(ग) घरेलू स्वकर्षित भू-जोत**

- कृषि वर्ष जुलाई 2012 - जून 2013 के दौरान, ग्रामीण भारत में अनुमानित 108.8 मिलियन घरेलू स्वकर्षित जोत थीं, जिसका कुल व्याप्ति 98.6 मिलियन हेक्टेयर थी । [स्टेटमेंट 5.1]
- अनुमानित औसत प्रचालित जोत क्षेत्र (एचए) 0.907 हेक्टेयर था । [स्टेटमेंट 5.1]
- स्वकर्षित जोत का अधिकतम प्रतिशत जोत के सीमांत वर्ग में सभी स्वकर्षित जोत का 73.17% पाया गया (आकार : 0.002 हेक्टेयर से 1.000 हेक्टेयर) । [स्टेटमेंट 5.3]
- स्वकर्षित जोत के भू-रहित वर्ग में प्रचालित क्षेत्र का नगण्य भाग दिखाई दिया और स्वकर्षित जोत के सीमांत वर्ग में अधिकतम देखा गया जो कुल प्रचालित क्षेत्र का 27.7% था । [स्टेटमेंट 5.4]
- किरायेदार जोत, अर्थात् पूरा या अंशतः पट्टे-पर-ली गयी भूमि स्वकर्षित जोत का 13.7% में पाया गया। [स्टेटमेंट 5.6]
- पट्टे-पर लिये गये क्षेत्र का अधिकतम प्रतिशत 2012-13 के दौरान पट्टा के नियमों के तहत रुपया निर्धारित (41.1%) था । इसके बाद उत्पादन का भाग (28.7%) रहेगा । [स्टेटमेंट 5.9]
- भूमि के व्यवहार का प्रारूप यह दर्शाता है कि जो आकलित भूमि क्षेत्र फसल उत्पादन के लिए प्रयोग की गयी जुलाई '12 -दिसम्बर '12 के मौसम के दौरान करीब 94.7% था एवं जनवरी '13 -जून '13 के मौसम के दौरान करीब 79% था । [स्टेटमेंट 5.11]
- गैर-कृषि उद्देश्यों के लिए व्यवहृत भूमि क्षेत्र का प्रतिशत जुलाई '12 से दिसम्बर '12 और जनवरी '13 - जून '13 में क्रमशः 2.83% और 13.85% था । [स्टेटमेंट 5.11]
- 56.21% जुलाई '12 से दिसम्बर '12 एवं 57.74% जनवरी '13 से जून '13 के दौरान क्षेत्र का सर्वोच्च प्रतिशत अनाज उगाने के लिए प्रयुक्त हुआ । [स्टेटमेंट 5.12]
- जुलाई '12 - दिसम्बर '12 के दौरान 49% का क्षेत्र सिंचाई के लिए व्यवहार किया गया जबकि 74% क्षेत्र जनवरी '13 एवं जून '13 के बीच सींचा गया । [स्टेटमेंट S5.14]
- भूमिगत जल (ट्यूबवेल, कुआं आदि) सिंचाई का मुख्य स्रोत था, जिसमें कुल भूमि, क्षेत्र का 67% जुलाई '12 - दिसम्बर '12 के बीच सींचा गया एवं जनवरी '13 - जून '13 के बीच 71% सींचा गया। [स्टेटमेंट 5.13]

## HIGHLIGHTS

---

This report is based on the Land and Livestock Holdings Survey (LHS) conducted in the 70<sup>th</sup> round of NSS during January 2013 to December 2013. The survey was conducted only in the rural areas of the country. The survey covered 4529 FSUs. Some features of the survey are presented below:

### A. Household Characteristics

- During 2013, around 156 million households lived in rural areas, 7.41 per cent of these were landless households(owning either no land or less than 0.002 hectares) [Statement 3.1]
- During 2013, the highest percentage of households, belonged to the household type *self-employed in cultivation* (42.92%) followed by *wages/ salaried employment* (32.36%), whereas the lowest percentage of households belonged to the category of *self-employed in livestock farming*. [Statement 3.3]

### B. Household Ownership Holdings of Land

- The estimated total area owned by the households in rural India during the year 2013 was 92.369 million hectares, with an average size of 0.592 hectare land per ownership holding. [Statement S4.1]
- The highest percent of rural households (75.41%) fall in the *marginal* ownership category, owning 29.75 % of the total area owned. [Statement 4.2]
- The share of land owned in rural India by different social groups was 13.06% for *Scheduled Tribe*, 9.23% for *Scheduled Caste*, 45.68% for *Other Backward Class* and 32.03% for *others*. [Statement 4.4]
- The average area of land owned per household was 0.650 hectares for *Scheduled Tribe*, 0.272 hectares for *Scheduled Caste*, 0.603 hectares for *Other Backward Class* and 0.816 hectares for *others*. [Statement 4.4]
- 3.09% of households reported *leased-out* of land during Jul'12-Dec'12 and 3.26% during Jan'13-Jun'13, whereas 13.11% households reported *leased-in* of land during Jul'12-Dec'12 and 13.65% during Jan'13-Jun'13. [Statement 4.6]
- The maximum area of leased-out land was covered by the terms of lease *share of produce*. (41% during Jul'12-Dec'12 and 38% during Jan'13-Jun'13). [Statement S4.8]

### C. Household Operational Holdings of Land

- During the agricultural year July 2012- June 2013, rural India had an estimated 108.8 million household operational holdings, covering a total area of 98.6 million hectares of land. [Statement 5.1]
- The average area operated per holding (ha) was estimated at 0.907 hectares. [Statement 5.1]
- The highest percentage of operational holdings were found in the *marginal* category of holdings (size: 0.002 hectare to 1.000 hectares) comprising of 73.17% of all operational holdings. [Statement 5.3]
- A very negligible portion of operated area was seen in the *landless* category of operational holdings and the highest was observed in *marginal* category of operational holdings, constituting 27.7% of total operated area. [Statement 5.4]
- Tenant holdings, that is, holdings with partly or wholly leased-in land, were found in 13.7% of operational holdings. [Statement 5.6]
- The maximum percentage of leased-in area was covered by *fixed money* (41.1%) during 2012-13 as terms of lease followed by *share of produce* (28.7%). [Statement 5.9]
- The land use pattern shows that the estimated land area used for crop production was around 94.7% during the season Jul'12 - Dec '12 and around 79% during the season Jan'13-Jun'13. [Statement 5.11]
- Percentage area of land used for *non-agricultural* purposes was 2.83% and 13.85% during Jul'12-Dec'12 and Jan'13-Jun'13 respectively. [Statement 5.11]
- The highest percentage of area was used for growing *cereals*, 56.21% during Jul'12 - Dec '12 and 57.74% during Jan'13-Jun'13. [Statement 5.12]
- 49% of area was irrigated during Jul'12-Dec'12 whereas 74% of area was irrigated during Jan'13-Jun'13. [Statement S5.14]
- *Ground water (tube well, well etc.)* was found to be the most prevalent source of irrigation, covering 67% of total land area irrigated during Jul'12-Dec'12 and 71% during Jan'13-Jun'13. [Statement 5.13]

## Appendix A - Detailed Tables

Table No.	Title	Page
Table (1)	Number of villages surveyed and number of households estimated and surveyed for each State/UT	A1-A2
Table (2)	Per 1000 distribution of households by household classification, proportion of households operated land for agricultural activities and proportion of households operated land for Jhum cultivation during last 365 days for each type of household classification	A3-A45
Table (3)	Area of land by kind of possession for each social group	A46-A84
Table (4)	Per 1000 distribution of households by size class of household ownership holding, avg. area of homestead land per household, avg. area of land owned (excluding homestead land) per household, average area owned per household, estimated no. of holding, sample no. of holding, estimated no. of plots, sample no. of plots and estimated area of household holding for each size class of household ownership holding	A85-A213
Table (5)	Per 1000 distribution of households over household classification for each size class of household ownership holding	A214-A252
Table (6)	Number of plots and corresponding area of the households	A253-A330

	belonging to different size class of household ownership holding by kind of possession	
<b>Table (7)</b>	Per 1000 distribution of households reporting leasing-out of land and average area of such land by size class of household ownership holding for each social group	A331-A408
<b>Table (8)</b>	Per 1000 distribution of households reporting leasing-in of land and average area of such land by size class of household ownership holding for each social group	A409-A486
<b>Table (10)</b>	Percentage distribution of leased out land (excluding homestead) by terms of lease for each size class of household ownership holding	A487-A564
<b>Table (12)</b>	Percentage distribution of area of land leased out by use of lessee household for each size class of household ownership holding	A565-A566
<b>Table (13)</b>	Number per 1000 of operational holdings, avg. area per operational holding, avg. area owned and possessed per operational holding, avg. area operated per holding, no. of parcels per holding, joint holdings per 1000 of holdings, percentage of total area of household operational holdings of those households who operated jointly, to total area of operational holdings, avg. no. of permanent attached farm workers per household operational holding by size class of household operational holding	A567-A695
<b>Table (14)</b>	Per 1000 distribution of households with member(s) stayed away from the village for employment by size class of household operational holding for each social group	A696-A731
<b>Table (15)</b>	Per 1000 distribution of households with no. of member(s) other than the main operator those are associated with the household operational holding for each size class of household operational holding	A732-A770
<b>Table (16)</b>	Number of plots and corresponding area of the households belonging to different size class of household operational holding by kind of possession	A771-A848
<b>Table (17)</b>	Percentage distribution of area of land possessed by household by location of the plots for each size class of household operational holding	A849-A887
<b>Table (18)</b>	Number of households reporting land (excluding homestead) possessed but not owned per 1000 of households and average area of land(excluding homestead) possessed but not owned per households reporting such land over type of possession by size class of household operational holding	A888-A965

<b>Table (19)</b>	Percentage distribution of area of land possessed by duration of possession and no. of plots by duration of possession for each size class of household operational holding	A966-A967
<b>Table (20)</b>	Number of household operational holdings reporting at least one plot leased in per 1000 of household operational holdings under different terms of lease by size class of household operational holding	A968-A1045
<b>Table (21)</b>	Percentage area operated and leased in to total area operated by terms of lease for each size class of household operational holding	A1046-A1123
<b>Table (22)</b>	Percentage distribution of area of land possessed by households affected by flood / not flooded for each size class of household operational holding	A1124-A1201
<b>Table (23)</b>	Percentage distribution of land possessed by household by type of land use for each size class of household operational holding	A1202-A1279
<b>Table (24)</b>	Percentage distribution of land used for crop production/ livestock farming by types of crop production/ livestock farming for each size class of household operational holding	A1280-A1357
<b>Table (25)</b>	Percentage distribution of land operated for farming of animals by type of farming animals for each size class of household operational holding	A1358-A1435
<b>Table (26)</b>	Estimated area of land, number of household operational holdings and no. of plots used for growing more than one crop by size class of household operational holdings	A1436-A1513
<b>Table 27</b>	Percentage of irrigated area of land used for crop production by size class of household operational holding	A1514-A1591
<b>Table (28)</b>	Per 1000 distribution of jointly operated operational holdings by number of partner households for each size class of household operational holding	A1592-A1630
<b>Table (29)</b>	Per 1000 distribution of operational holdings by number of parcel for each size class of household operational holding	A1631-A1669
<b>Table (31)</b>	Per 1000 distribution of household operational holdings by type of holding for each size class of household operational holding	A1670-A1708
<b>Table (32)</b>	Per 1000 distribution of household operational holdings by main use of the holding for each size class of household operational holding	A1709-A1786
<b>Table (33)</b>	Number of operational holdings reporting permanent attached farm workers per 1000 of operational holdings and average	A1787-A1825

number(0.0) of permanent attached farm workers per operational holding reporting permanent attached farm workers by mode of payment for each size class of household operational holding

**Table (34)** Per 1000 distribution of household operational holdings of the whole agricultural year by period when agri. operation was carried out and the estimated area operated during different periods for each size class of household operational holding A1826-A1864

# CHAPTER ONE

---

## INTRODUCTION

### **1.0 The Report in Perspective**

1.0.1 The National Sample Survey Office (NSSO), as a part of its 70<sup>th</sup> round during the period January 2013 - December 2013, carried out an all India household survey on the situation of Land and Livestock Holdings in India. In this survey, a nation-wide household enquiry was conducted to generate estimates of various characteristics pertaining to Land and Livestock Holdings at the national and State/UT levels. Information on various facets of Land and Livestock Holdings in India was collected through a schedule of enquiry (Schedule 18.1) adopting the established concepts, definitions and procedures. Based on the data collected during the entire period of survey, estimates of various characteristics pertaining to Land Holdings for each State/UT and all India have been presented in this report.

### **1.1 Objective of the Land and Livestock Holdings surveys of NSSO**

1.1.1 The NSS 70<sup>th</sup> round survey on Land and Livestock Holdings (LHS) was conducted in rural areas of the country. The main objective of the survey on Land and Livestock Holdings (LHS) was to generate basic quantitative information on the agrarian structure of the country, which was relevant to land policy. The quantitative information collected in the Land and Livestock Holdings survey could be categorized into the three broad aspects of land ownership holdings, operational holdings and ownership of livestock. The survey on Land and Livestock Holding had been designed to collect information on (i) particulars of land (owned, leased-out, leased-in and otherwise possessed) of the household (ii) location of land (iii) area (iv) duration of possession (v) number of lessor/lessee households (vi) terms of lease (vii) land use during July 2012 to December 2012/January 2013 to June 2013/whole agricultural year (July 2012 to June 2013) (viii) whether irrigated (ix) sources of irrigation etc. Information on number of livestock, poultry, duckery, etc., owned by the household as on the date of survey was also collected. Besides collection of information on land and livestock, information was collected on some household characteristics such as (i) household classification (ii) social group (iii) religion (iv) whether the household operated any land on Jhum cultivation during last 365 days, etc. Some information on demographic particulars from each of the household members was also collected such as (i) sex (ii) age (iii) general education level (iv) whether associated with the household operational holding etc.

### **1.2 Genesis of Land and Livestock Holdings Survey of NSSO**

1.2.1 The Decennial survey on Land and Livestock Holdings is one of the important surveys conducted repeatedly by the NSSO. The first such survey was carried out in the 8<sup>th</sup> round of NSSO during July 1954 - April 1955. Land and Livestock Holdings survey of NSS 70<sup>th</sup> round is like a Decennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned. Including the Land and Livestock Holdings survey of NSS 70<sup>th</sup> round (January 2013 - December 2013), seven such comprehensive surveys on the Land and Livestock Holdings situation in India have so far been conducted by NSSO.

1.2.2 *Past Decennial Surveys*: The first survey on land holdings was taken up by the NSS in its 8<sup>th</sup> round (July 1954 - April 1955) as part of the World Agricultural Census initiated by the Food & Agricultural Organization (FAO) of the United Nations. In this survey, information on agricultural holdings was collected primarily to meet the requirements of the FAO. In addition, information on household ownership holdings was collected to provide the much-needed data for formulating land reforms policy for the country. A similar survey was conducted again in the 16<sup>th</sup> (July 1960-August 1961) and 17<sup>th</sup> (September 1961-July 1962) rounds of the NSS as a part of the World Agricultural Census Programme of 1960. Since then, NSSO has been regularly conducting land holding surveys every ten years or so. The next survey on land holding of NSSO was conducted in 26<sup>th</sup> round (July 1971-June 1972), simultaneously with a survey on Debt and Investment at the instance of the Reserve Bank of India. Thereafter, surveys on Land and Livestock Holdings were conducted in 37<sup>th</sup> round (January-December 1982), 48<sup>th</sup> round (January-December 1992) and 59<sup>th</sup> round (January-December 2003) respectively.

### **1.3 Scope of NSS 70<sup>th</sup> round Survey on Land and Livestock Holdings**

1.3.1 Using the information collected in this survey, different indicators of ownership holding, operational holding, pattern in land use, detailed types of crop production/animal farming activities of the households, seasonal variation in household operational holding, ownership of livestock, poultry, duckery, etc can be generated for the rural areas of the country.

1.3.2 These statistical indicators are required for planning, policy formulation and decision making at various levels within the government and outside. The results of the survey will be of use to the Department of Agriculture & Cooperation, Department of Animal Husbandry, Dairying & Fisheries, National Accounts Division, etc. These will also be used by various users, researchers and policy makers.

1.3.3 The major features of data collected in NSS 59<sup>th</sup> round were also collected in NSS 70<sup>th</sup> round. The land use pattern is not only dynamic but also multidimensional - it varies over its location, kind of possession, duration of possession, irrigation facility, flooding nature, etc. In order to reveal the multidimensional aspects of the Land and Livestock Holdings situation in India, the Land and Livestock Holdings schedule (Schedule 18.1) of NSS 70<sup>th</sup> round captured a range of information on the following aspects:

- i) *Particulars on household characteristics like household size, household classification, religion and social group of the household, etc.* For the households, information was collected on whether the household operated any land for agricultural activities during the last 365 days and whether any member of the household stayed away from the village continuously for 15 days or more for employment during the last six months. For the households with agricultural land operation, information was also collected on whether the household operated any land for jhum cultivation during the last 365 days.
- ii) *Demographic particulars of the household members like age, sex, general educational level.* For households with agricultural land operation, information was also collected on whether the member was associated with agricultural land operation.

iii) *Particulars of the land of the household and its operation.* For each plot belongs to the household, information on its location, kind of possession, area, duration of possession, number of lessor/lessee households, terms of lease, use of leased-out land by the lessee household, flooding nature, land use category, cropping pattern, multiple cropping characteristics, irrigation facilities along with its source was also collected wherever applicable.

iv) *Particulars on some general information of household operational holding like area of household operational holding, whether operated individually/jointly, if jointly then number of partners households and the percentage share of land of the household, type of holding, main use of the holding, number of parcels in the holding, number of permanent attached farm workers against wages payable in cash/kind and share of produce.*

v) *Particulars on livestock, poultry, duckery, etc., owned by the household like in livestock category adult and young cattle (male/female), adult and young buffalo (male/female), horse and pony, mule, donkey, camel, yak, mithun, elephant, sheep, goat pig, rabbit, etc. and in poultry birds category hen-cock-chicken, duck, etc.*

#### **1.4 Outline of NSS 70<sup>th</sup> round survey**

1.4.1 *Geographical coverage:* The survey covered the rural area of the whole of the Indian Union. Any estimate of the 70<sup>th</sup> round i.e. for 2012-13 is for rural India only. Wherever comparison is done with the previous rounds, the estimates of the previous rounds correspond to those of rural India only.

1.4.2 *Visits 1 & 2:* Each sample FSU was visited twice during this round. Since the workload of the first visit (i.e. visit1) was more, the first visit continued till the end of July 2013. Thus, period of the first visit was January – July 2013 and that of the second visit (i.e. visit 2) was August – December 2013.

1.4.3 *Sub-round:* The fieldwork of the 70<sup>th</sup> round of NSSO was of one year duration starting on 1<sup>st</sup> January, 2013 and ending on 31<sup>st</sup> December, 2013. The survey period of this round was divided into two sub-rounds. Sub-round one consisted of the first half of the survey period of each visit i.e. 1<sup>st</sup> January – 15<sup>th</sup> April 2013 for visit 1 and 1<sup>st</sup> August – 15<sup>th</sup> October 2013 for visit 2, while sub-round two consisted of the remaining period of the respective visits. Thus each sub-round was of three and a half months duration for visit 1 and two and a half months for visit 2. In each of these two sub-rounds, an equal number of sample villages (FSUs) was allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

#### **1.5 Comparability with previous round survey and other data sources**

1.5.1 Considering the volume and direction of the current demand of data on agricultural surveys, a few modifications in the content of the schedule of enquiry for the present survey *vis-a-vis* the earlier surveys on the same subject, were brought in. Accordingly, the presentation of results of the 70<sup>th</sup> round survey may differ to some extent in terms of content and classification, as compared to the last round. The major changes considered in the current round are:

- i. The 70<sup>th</sup> round survey was conducted only in the rural areas, whereas in the last (i.e. 59<sup>th</sup>) round both rural and urban areas were covered. Thus some information, like use of land in livestock farming in urban areas, will be missing in this round.
- ii. Classification of households into different types based on the source of major income of the household has been changed, making it oriented towards rural areas only.
- iii. In the current round, multiple operational holdings within a household were not distinguished and the household was treated as having only one operating unit considering all the land operated by all the household members together.
- iv. In 59<sup>th</sup> round survey, data was collected for 'kharif' and 'rabi' season from each sample household; whereas in the 70<sup>th</sup> round, data was collected for the two halves of the agricultural year 2012-13 as July - December, 2012 and January - June, 2013.
- v. Information on industry and occupation as per usual activity status (principal and subsidiary) for every member of the sample households, which was collected in the earlier round, was dropped in 70<sup>th</sup> round.
- vi. Classification of 'land use' adopted in the 59<sup>th</sup> round was more structured in the 70<sup>th</sup> round, in terms of 'major type of land use' and 'type of crop production/livestock farming'. Specific information on 'jhum cultivation' was additionally collected in 70<sup>th</sup> round.
- vii. Apart from these, information on 'flooding of the plot during July - December 2012 & January - June 2013', and on 'location of the plot' was also collected.

1.5.2 The estimates of various indicators for Telangana and the reorganised state of Andhra Pradesh are available for the first time from the 70<sup>th</sup> round survey. Therefore, comparable figures with the earlier rounds at the state level for these two States are not furnished. It may be noted that for the earlier rounds, estimates shown for the State of Andhra Pradesh correspond to the erstwhile Andhra Pradesh that existed before division.

1.5.3 Comparisons with data from earlier rounds results have been presented, wherever data of the previous rounds were available. However, certain results are presented for the major states and Telangana only; the major states being *viz.*, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. The detailed tables corresponding to such presentation can be seen in in Appendix A, provided as soft copy in the CD.

1.5.4 There is a sizeable divergence between NSS estimates of land area (eg. estimated area operated, area under crops, irrigated area, etc.,) and those given in the Land Use Statistics (LUS) provided by Directorate Of Economics & Statistics, Ministry Of Agriculture. It is noted that over successive rounds of NSS, LHS surveys, the divergence is increasing. A separate detailed examination is required to fully explain the reasons of this gap. However, the user may take note of the following points while comparing the results:

- (a) The estimates provided in this report are generated from the LHS conducted by NSSO from sample households belonging to rural areas of the Country only, and

exclude all such land holdings which belongs to the urban households. On the other hand, the LUS provides information based on the latest figures of geographical area of the State/Union Territories as provided by the Office of the Surveyor General of India.

(b) By the definition of the coverage of the LHS, land holdings belonging to Household sector only were considered for the survey excluding land holdings of Institutional sector (e.g., land holdings belonging to Government/public sector, co-operative societies, companies, etc).

(c) The Gross Cropped Area (or total cropped area or total area sown) in LUS represents the total area sown once and/or more than once in a particular year, i.e., the area is counted as many times as there are sowings in a year. In the LHS, area under crop production is determined for each plot by collecting information on use of land of the plot only once in each of the reference periods. However, if in a plot more than one type of crop is produced during the particular reference period, information was recorded only once for that plot with respect to the crop which produced or was expected to produce maximum yield in terms of value.

(d) The total/gross irrigated area is defined in the LUS is the total area under crops, irrigated once and/or more than once in a year. It is counted as many times as the number of times the areas are cropped and irrigated in a year. However, in LHS, a plot was considered as irrigated if the major part of the plot is irrigated. For an irrigated plot, the frequency of irrigation was not enquired in the survey.

## **1.6 Reports on Land and Livestock Holdings survey of NSS 70<sup>th</sup> round**

1.6.1 The results of the Land and Livestock Holdings surveys of NSSO, generated from the central sample data, are released in the form of reports. It has been planned to bring out the results of the Land and Livestock Holdings survey of NSS 70<sup>th</sup> round in two reports. In addition to these two reports, a document ‘Key Indicators of Land and Livestock Holdings in India’ showing the estimates of some key land and livestock holdings characteristics for each State/UT and all India obtained from NSS 70<sup>th</sup> round has already been brought out in December 2014. Of the two reports, the present one - first in the series of reports, deals with the national and State/UT level estimates of land holdings indicators in ownership status, operational status and their patterns, along with some aspects of seasonal variability of land holdings. The present report is the first one - dealing with the estimates based on the data relating to the household ownership and operational holdings in India. The report gives the results generated at the all India level and some important results for different States/Union Territories, *NE States* (Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura) and *Group of UTs* (Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Puducherry).

## **1.7 Contents of the report**

1.7.1 This report contains five Chapters, including the present introductory Chapter (Chapter One), and three Appendices. Chapter Two describes the concepts and definitions of the terms used in the survey in connection with the various items covered in this report. The summary of findings of NSS 70<sup>th</sup> round is presented and discussed in Chapters Three to Five. Chapter Three is on household characteristics. Discussions on the ownership holdings of land are

presented in Chapter Four, and the last chapter, *viz.* Chapter Five, deals with the operational holdings of land. The corresponding tables for all the State/UTs can be seen at the State Tables (having the same number as its corresponding statement table) presented after of Chapter Five. The detailed tables forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. Appendix C gives a facsimile of the schedule canvassed in the survey.

1.7.2 In Chapters Three to Five, the discussions are mainly centered on the estimates at the all India level and major States. A comparison with earlier survey results at the all India level has also been done in some cases. For the purpose of discussion in this report, 20 States have been considered as major States *viz.* Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh, and West Bengal. Along with the major States, estimates are also provided for North Eastern States (NE States): Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura and Group of Union Territories(Group of UTs): Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Puducherry.

1.7.3 The estimates presented in this report, in general, refer to the mid-point of the reference period (July 2012 - June 2013) of NSS 70<sup>th</sup> round, *i.e.*, 01.01.2013. In the NSS reports, the estimates of the Land Holdings characteristics are generally presented in both relative and absolute terms. It may be noted here that in tables containing figures like ‘per 1000 distribution’, ‘average area’, etc., the figures have been rounded off. Thus, while using the estimates from the survey results, it is to be noted that the accuracy of these estimates are limited to the number of significant digits available in such estimates. The estimates of the Land Holdings characteristics have been presented in the report for all the States and UTs together with Group of North-Eastern States and Group of UTs. While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States/UTs may not be adequate enough for getting sufficiently reliable estimates for some of the Land Holdings characteristics.

1.7.4 Statement S1.1 gives the number of villages surveyed and number of households surveyed during visit 1 and visit 2, to have an idea about the reliability of estimates for different characteristics at the State/UT level or for some characteristics at more disaggregated level for all India.

1.7.5 Appendix A contains the detailed tables of the report. For convenience of the user, the number given to the Appendix Tables are same as that of the Tabulation Plan. The survey estimates of the aggregates are presented in the margin of the detailed tables and these may be used to combine the estimates relative in nature to more significant digits. The cell-level figures in the detailed tables, when added up, may not exactly be equal to the figure shown against the ‘total’ column/row due to rounding off and/or presence of non-response cases. If there is no sample household in a particular category, the estimate in that category appears as zero (0) in the detailed tables. Estimates are also shown as zero (0), when they are greater than 0 but less than 0.5. Appendix A of the report is very voluminous and hence, the hard-copy of Appendix A does not form a part of the Report. The soft copy of Appendix A of the report is provided in CD.

**Statement S1.1 : Number of villages and households surveyed for each State/UT**

State/ UT	number of villages surveyed	number of sampled households	
		visit 1	visit 2
(1)	(2)	(3)	(4)
Andhra Pradesh	149	1184	1167
Arunachal Pradesh	47	340	340
Assam	214	1703	1701
Bihar	266	2100	2097
Chhattisgarh	85	656	650
Delhi	10	61	61
Goa	14	95	94
Gujarat	166	1319	1313
Haryana	78	592	588
Himachal Pradesh	88	648	641
Jammu & Kashmir	92	711	710
Jharkhand	102	786	779
Karnataka	170	1338	1328
Kerala	159	1238	1207
Madhya Pradesh	250	1960	1950
Maharashtra	330	2623	2612
Manipur	96	762	762
Meghalaya	68	535	535
Mizoram	47	346	344

## CHAPTER TWO

---

### CONCEPTS AND DEFINITIONS

**2.0** The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

**2.1 *House:*** Every structure, tent, shelter, etc. was a house irrespective of its use. It might be used for residential or non-residential purpose or both or even might be vacant.

**2.2 *Household:*** A group of persons normally living together and taking food from a common kitchen constituted a household. It included temporary stay-aways (those whose total period of absence from the household was expected to be less than 6 months) but excluded temporary visitors and guests (expected total period of stay less than 6 months). Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedure was adopted as guidelines:

(i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constituted a single-member household. If, however, a group of persons among them normally pool their income for spending, they together were treated as forming a single household. For example, a family living in a hotel was treated as a single household.

(ii) In deciding the composition of a household, more emphasis was placed on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person was different from the place of boarding, he or she was treated as a member of the household with whom he or she resided.

(iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) was considered as a member of the household with whom he or she resided even though he or she was not a member of the same family.

(iv) When a person sleeps in one place (say, in a shop or in a room in another house because of space shortage) but usually took food with his or her family, he or she was treated not as a single member household but as a member of the household in which other members of his or her family stayed.

(v) If a member of a family (say, a son or a daughter of the head of the family) stayed elsewhere (say, in hostel for studies or for any other reason), he/ she was not considered as a member of his/ her parent's household. However, he/ she was listed as a single member household if the hostel was listed.

**2.3 Household size:** The number of members of a household was its size.

**2.4 Household classification:** In NSS 70<sup>th</sup> Round information on ‘*household classification*’ was collected, instead of ‘*household type*’. The household classification was based on the source of major income of the household and it was classified into the following six categories, for rural areas:

1. self-employed in cultivation
2. self-employed in livestock farming
3. self-employed in other agricultural activities
4. self-employed in non-agricultural enterprise
5. wage/salaried employment
6. others (pensioners, remittance recipients, etc.)

**2.5 Homestead land (house-site):** (i) Homestead of a household was defined as the dwelling house of the household together with the courtyard, compound, garden, out-house, place of worship, family graveyard, guest house, shop, workshop and offices for running household enterprises, tanks, wells, latrines, drains and boundary walls annexed to the dwelling house. All land coming under homestead was defined as homestead land (house site). (ii) House site might constitute only a part of a plot. Sometimes, gardens, orchards or plantations, though adjacent to the homestead and lying within the boundary walls, might be located on a clearly distinct piece of land. In such cases, land under garden, orchard or plantation will not be considered as house site.

**2.6 Plot:** A distinct patch of land demarcated generally by a strip of raised land, commonly known as ‘ails’ or ‘bunds’ was defined as a plot. The plots of the household was categorised *owned and possessed, leased-in, otherwise possessed, or leased-out.*

**2.7 Ownership of land:** (i) A plot of land was considered owned by the household if permanent heritable possession, with or without the right to transfer the title, was vested in a member or members of the household. Land held in owner-like possession under long term lease or assignment was also considered as land owned. Thus, in determining the ownership of a plot of land two basic concepts were involved, namely,

- (a) Land owned by the household, i.e., land on which the household had the right of permanent heritable possession with or without the right to transfer the title, e.g., Pattadars, Bhumidars, Jenmos, Bhumiswamis, Rayat Sithibans, etc. A plot of land might be leased out to others by the owner without losing the right of permanent heritable possession.
- (b) Land held under special conditions such that the holder did not possess the title of ownership but the right for long term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long term lease for 30 years or more) was considered as being held under owner like possession. In the States where land reform

legislations had provided for full proprietorship to erstwhile tenants, they were considered as having owner like possession, even if they had not paid the full compensation.

(ii) Sometimes a plot might be possessed by a tribal in accordance with traditional tribal rights from local chieftains or village/district council. Again, a plot might be occupied by a tenant for which the right of ownership vests in the community. In both the cases, the tribal or other individual (tenant) was taken as owner, for in all such cases, the holder had the owner like possession of land in question.

**2.8 Land possessed:** Land possessed was given by land owned (including land under ‘owner like possession’) + land leased in - land leased out + land held by the household but neither owned nor leased in (e.g., encroached land).

**2.9 Land irrigated:** Irrigation was considered as a device of purposively providing land with water, other than rain water, by artificial means for crop production. Land irrigated was defined as the net irrigated area.

**2.10 Lease of land:** (i) Land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title was defined as land leased-out. It was defined as land leased-in if it was taken by a household on rent or free without any right of permanent or heritable possession. The lease contract might be written or oral. (ii) Sometimes orchards and plantations (defined later) were given to others for harvesting the produce for which the owner receives a payment in cash or kind. Such transactions were not treated as ‘lease’ for the purpose of the survey.

**2.11 Otherwise possessed land:** All public/institutional land possessed by the household without title of ownership or occupancy right came under *otherwise possessed land*. The possession was without the consent of the owner. Private land (i.e. land owned by the household sector) possessed by the household without title of ownership and occupancy right was not included in this category. All private land encroached upon by the household was treated as *leased-in* land.

**2.12 Jhum land and jhum cultivation:** The preparation of jhum land was done by cutting and clearing of forest areas and burning of the dried biomass by setting fire. The jhum land was used for growing crops of agricultural importance such as upland rice, vegetables or fruits. After a few cycles, the land loses fertility and a new area was chosen.

**2.13 Cultivation:** All activities relating to production of crops and related ancillary activities were considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber, cashew, coconut, pepper, coffee, tea etc.) were not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC-2008 classes 0111, 0112, 0113, 0114, 0116, 0119 and among class 0128 sub classes 01281, 01282, etc., were considered as cultivation.

**2.14 Livestock:** Livestock were those animals which were used for food, fibre, labour, etc. Animals kept as pets, snakes, reptiles, frogs, fishes were excluded from the coverage of livestock.

**2.15 Household Operational Holding:** Within a household, different household members might possess different plots but the household operated the plots as a single unit. For the purpose of the survey on LHS in NSS 70th round, information was collected for household operational holding considering all the land operated by all the household members together. Within a household, multiple operational holdings were not distinguished and this was considered as one operating unit. The following points might be noted for determination of household operational holding:

(i) Household operational holding constitutes of all land that was used wholly or partly for agricultural production and was operated (directed/managed) by one household member alone or with assistance of others, without regard to title, size or location. The land might be operated by members belonging to a single household or by members belonging to more than one household operating jointly. However, holdings operated as co-operative farms were not considered as operational holding in this survey. The holding might consist of one or more parcels of land (defined later), provided they were located within the country.

(ii) When a household was found to grow vegetables in kitchen garden only, or flowers in the courtyard, it was considered to possess an operational holding. Likewise, a household engaged exclusively in livestock keeping or poultry raising or pisciculture was considered to operate a holding, even if no crop production was undertaken by it during the reference period. But in all cases, an operational holding was related to some amount of land possessed by the household.

(iii) It is pertinent to note that the inclusion of the term ‘wholly or partly’ in the definition of household operational holding implies that once a household was identified to operate some land, all the plots possessed by the household during the major part of the reference period are taken into account, irrespective of whether all the plots included in the holding were put to agricultural production or not. Thus, if a household carried out any agricultural production during the reference period, plots possessed by the household during the major part of the reference period and put to uses other than agricultural production, such as house-sites, paths, buildings, etc., were also included in the operated area of the household operational holding.

(iv) Only when a household did not undertake any agricultural production on any part of the land possessed by it during the reference period, it was not considered to have any operational holding.

**2.16 Individual and joint operational holding:** If the household operational holding was managed by one or more members of a single household, it was taken as individual holding. It

was treated as a joint operational holding only when it was managed by members of more than one household.

**2.17 *Parcels:*** A parcel of a household operational holding was a piece of land surrounded entirely by land not forming part of the household operational holding. It might consist of more than one plot.

**2.18 *Orchards:*** A piece of land put to production of horticulture crops, viz., fruits, nuts, dates, grapes, etc. (other than those treated as plantation crops) was regarded as an orchard, if it had at least 0.10 hectare in size or was having at least 12 trees planted on it. It might be noted that in the case of such fruit trees where distance between the trees was quite large, say more than six metres as in the case of mangoes, the orchard was defined according to the minimum number of 12 trees planted in it, while, in cases, where the distance was less than six metres as in the case of bananas, papayas, grapevines etc., the orchard was defined on the basis of the minimum area of 1/10th of an hectare.

**2.19 *Plantations:*** Area devoted to production of plantation crops, viz., tea, coffee, cashew nut, areca nut, oil palm, clove and nutmeg, was treated as area under plantation. The size restriction given for orchards also applied for plantations.

**2.20 *Size class and category of land holdings:*** While presenting the detailed tables in Appendix A, 14 size classes of land holdings have been used. In order to study the change across size distribution, these 14 size classes are merged to form 6 broad size classes along the lines adopted in the Agricultural Census of India. The six broad size classes (called category of holdings) are as follows:

<b>category of holding</b>	<b>size</b>
landless*	less than or equal to 0.002 hectares
marginal	more than 0.002 but less than or equal 1.000 hectares
small	more than 1.000 but less than or equal to 2.000 hectare
semi-medium	more than 2.000 but less than or equal to 4.000 hectares
medium	more than 4.000 but less than or equal to 10.000 hectares
large	more than 10.000 hectares

\* 'less than or equal to 0.002 hectares' as classified under 'landless' category, also includes plots where area is not reported.

These broad size classes will henceforth be called *categories* of ownership/operational holdings.

**2.21 *Terms of lease:*** When a plot of land was leased-out by the sample household, the terms of lease on which the area was leased-out to the lessee household was recorded. Similarly, when a plot of land is leased-in by the sample household from a lessor household, the terms of lease on which such plot was leased-in from the lessor household was recorded. The terms of lease were for *fixed money*, for *share of produce*, for *service contract*, for *share of produce together with*

*other terms, under usufructuary mortgage, from relatives under no specified terms and under other term.* Leasehold under crop-sharing basis meant that the owner of land received a stipulated share of the produce but he/she did not participate in the work nor did he/she manage or direct or organise the agricultural operations on the plot of land which he/she had leased out.

Leasehold under service contract meant that an employer had given some land to an employee for cultivation in lieu of the services provided by him/her (including labour input) under the condition that the land could be retained so long as the employee continues to serve the employer and no other specific terms of lease was contracted.

The terms of lease for share of produce together with other terms, also include the cases of purchase agreement of the produce.

The term by which the mortgagor retained the ownership of land till the foreclosure of the deed but the possession of the land was transferred to the mortgagee was considered as leasing-out under usufructuary mortgage.

Sometimes, land owned by a household was looked after and used by a close relative. For example, a person staying away from his village might own a piece of land in the village which was looked after and used by his brother's household. All such land owned by the household but looked after and used by some relative's household, under no contract of payment of any kind to the owner, was treated as leasing-out to 'relatives under no specified terms'.

Lease on terms other than those mentioned above was treated as 'under other terms'. All rent free leases, other than to (or from) 'relatives under no specified terms', was treated as lease 'under other terms'. It might mentioned that if more than one portion of a plot was leased out under different terms to one lessee household, the code for the term which accounts for the major part of the area leased out was recorded.

## CHAPTER THREE

### HOUSEHOLD CHARACTERISTICS

#### 3.0. Introduction

3.0.1 Certain information on socio-economic condition of the sample households was collected in the Land and Livestock Holdings survey of NSS 70<sup>th</sup> round. Before discussing the characteristics of Land and Livestock Holdings of the country, a discussion of the socio-economic structure of the households of the country during 2013 may be pertinent. These discussions are mainly centered on the estimates at the all India level and major States. A comparison with earlier survey results at the all India level has also been done in some cases. In the ensuing paragraphs, estimates relating to some of the socio-economic characteristics of households are presented.

#### 3.1 Estimates of Households

3.1.1 Statement 3.1 presents the estimates of number of households and the estimates of number of landless households, at the all India level along with the corresponding results

<b>Statement 3.1: Estimated number of households and landless households in rural areas in the last two LHS Survey of NSS</b>		
Estimates	2003	2013
(1)	(2)	(3)
estimated number of households (million)	147.838	156.043
estimated no. of landless households (million)	14.836	11.558
percentage of landless households	10.00	7.41
<i>Land holdings 'less than or equal to 0.002 hectares' is classified under 'landless' category, also includes plots where area is not reported</i>		
<i>Source for 2003 data: NSS Report No. 491</i>		
<i>Ref: Table 4 of Appendix A</i>		

obtained from the NSS 59<sup>th</sup> round (2003). During 2013, around 156 million households lived in rural areas as against 147.8 million households during 2003. It is seen that the proportion of the landless households in the rural areas has declined

during 2013 by 3 percentage points compared to that of 2003: around 7.41 per cent of the total rural households were landless in 2013 as compared to 10 per cent in 2003.

<b>Statement 3.2: Percentage distribution of households by size category of land holdings for each household social groups</b>					
category of holdings(land size class in ha)	household social groups				
	ST	SC	OBC	others	all (incl nr)
(1)	(2)	(3)	(4)	(5)	(6)
landless(<=0.002)	9.41	7.18	6.98	7.40	7.41
marginal(0.002-1.000)	68.83	85.70	75.25	70.22	75.42

<i>Ref: Table 4 of Appendix A</i>					

3.1.2 *Distribution of households across land holding classes:* In Statement 3.2, the distribution of households, at the all India level, is given by land holding category for each household social group. The highest proportion of households belonged to the *marginal*

category of land holdings (75.42%) and the lowest proportion of households belonged to the *large* holdings (0.24%). This pattern was observed across all the household social groups. Moreover, the *marginal* and the *small* land holdings together accounted for more than 80% of

the households across all social groups. It is seen that the proportion of households in the relatively larger holdings (eg. *semi-medium, medium or large*) was higher (more than 10%) among *other* category of households than the remaining social groups.

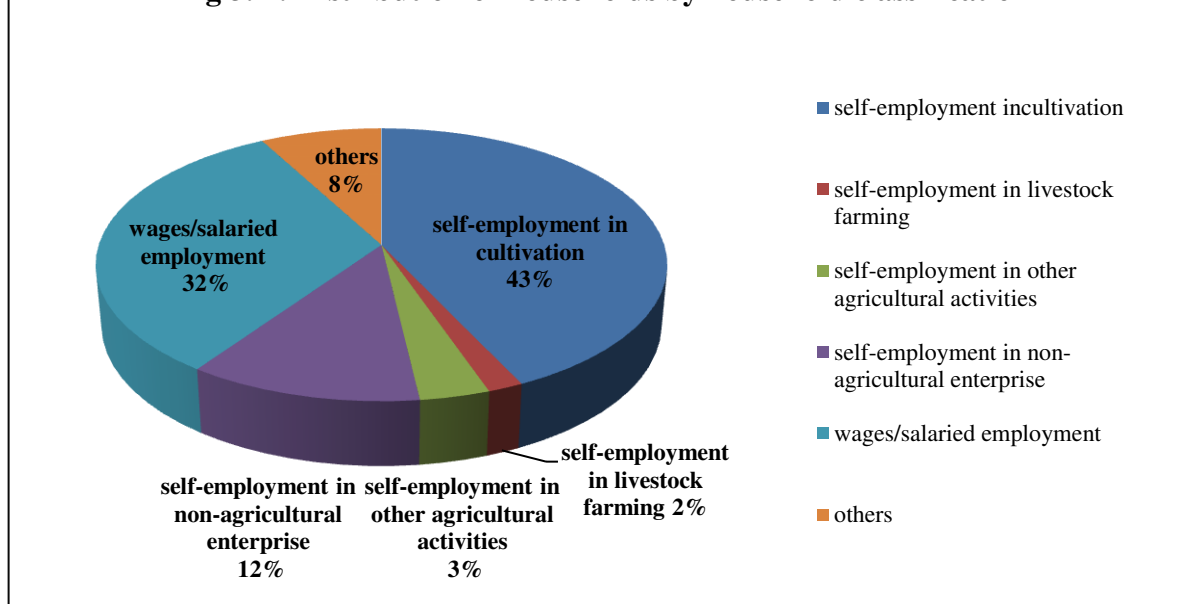

### 3.2 Household classification

3.2.1 In the NSS 70<sup>th</sup> round survey on Land and Livestock Holdings, households were classified into different economic categories depending on the nature of work from which the household derived its major income (net income and not gross income) during last 365 days, excluding the incomes of servants and paying guests. The household classifications used were *self-employment in cultivation, self-employment in livestock farming, self-employment in other agricultural activities, self-employment in non-agricultural enterprise, wage/salaried employment, others (pensioners, remittance recipients, etc.)*. Other agricultural activities included all the activities in the agricultural sector, except cultivation and livestock farming activities, like plantation, orchard, forestry, logging, fishery, etc. The estimated number of households and their distributions by *household classification* for each of the social groups for all India are given in Statement 3.3 below.

3.2.2 Statement 3.3 shows that, the highest percentage of households, at all India level, belonged to the category *self-employed in cultivation* (42.92%) followed by *wages/ salaried employment* (32.36%), whereas the lowest percentage of households belonged to the category *self-employed in livestock farming*. This pattern was observed for all the social groups except SC. In case of SC, the highest proportion of households were classified under *wages/ salaried employment* followed by *self-employed in cultivation*. Fig 3.1 gives the percent distribution of households by household classification.

Statement 3.3 : Percentage Distribution of households by household classification across different social groups							
Social Group	percentage distribution of households by household classification						total
	self-employed in				wages/ salaried employment	others	
	cultivation	livestock farming	other agricultural activities	non-agricultural enterprise			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
ST	50.95	0.75	3.70	5.54	32.90	6.17	100.00
SC	30.88	1.50	4.79	11.41	43.22	8.19	100.00
OBC	42.58	2.17	2.81	13.44	31.23	7.77	100.00
Others	49.90	1.67	3.49	11.27	24.82	8.85	100.00
all	42.92	1.75	3.47	11.59	32.36	7.91	100.00

Ref: Table 5 of Appendix A

**Fig 3.1 : Distribution of households by household classification**

3.2.3 The distributions of households by household classification for the major states are given in Statement S3.3. As seen from the statement, in rural India, more than 48% of the households have reported to have derived their major source of income from *self-employed* activities (*cultivation, livestock farming, other agricultural activities* and *non-agricultural enterprise*), in all the major states except for Tamil Nadu(43.5%) and Kerala(37.5%).

3.2.4 Within the *self-employed* households, in all the major states, majority of the households reported *self-employed in cultivation* except for the state of Kerala. The highest proportion of such households was in Chhattisgarh (66.1%) and the lowest in Kerala (6%). Households reporting their major source of income from *self-employed in non-agricultural enterprise* was recorded the highest in Jammu & Kashmir (23.5%) and the lowest of 2.2% in Chhattisgarh.

3.2.5 Kerala (47.4%) followed by Tamil Nadu (46.6%), reported the highest percentage of households who had reported *wages/ salaried employment* as their major source of income, whereas the lowest was reported for Chhattisgarh (23.6%).

**Statement S3.3 : Per 1000 distribution of households over household classification for major states**

per 1000 households by household classification

**3.3 Households whose members stayed away from the village for employment**

3.3.1 In NSS 70<sup>th</sup> round, information was collected from the households on whether any member of the household had stayed away from the village for employment continuously for at least 15 days, during last 6 months preceding the date of the survey. Statement 3.4 gives the percentage distribution of those households, where any member has stayed away from the village for employment for a period of at least 15 days, by category of operational land. It was seen that, for each social group, the maximum number of households reporting staying away of their members for employment was in the *marginal* category of land holdings and their proportion is remarkably high as compared to the other land holding categories.

**Statement 3.4 : Distribution of household operational holdings with member staying away for employment by size category over social groups**

category of operational holdings (land size in ha)	household social group				
	ST	SC	OBC	others	all (incl nr)
(1)	(2)	(3)	(4)	(5)	(6)
<b>percentage of household operational holding with members staying away for employment</b>	9.77	6.93	6.76	4.84	6.71
<b>percentage of household operational holding with member staying away for employment by category of land holdings</b>					
landless(<=0.002)	0	0	0	0	0

### 3.4 Household members associated with the Household Operational holding

3.4.1 For the households which had operated some land for agricultural activities during the last 365 days, information was collected for each household member aged 5 years and above on 'whether associated with household operational holding'. This information was collected for the reference period Jul'12 – Dec'12. Statement S3.5 gives the percentage distribution of households by number of members other than the main operator associated with the household operational holding for each major state. It was also observed that, at the all India level, for majority of the households (40.8%) only one member of the household was associated with the household operational holding, and for 24% of the households, three or more members of the household were associated with the household operational holding along with the main operator.

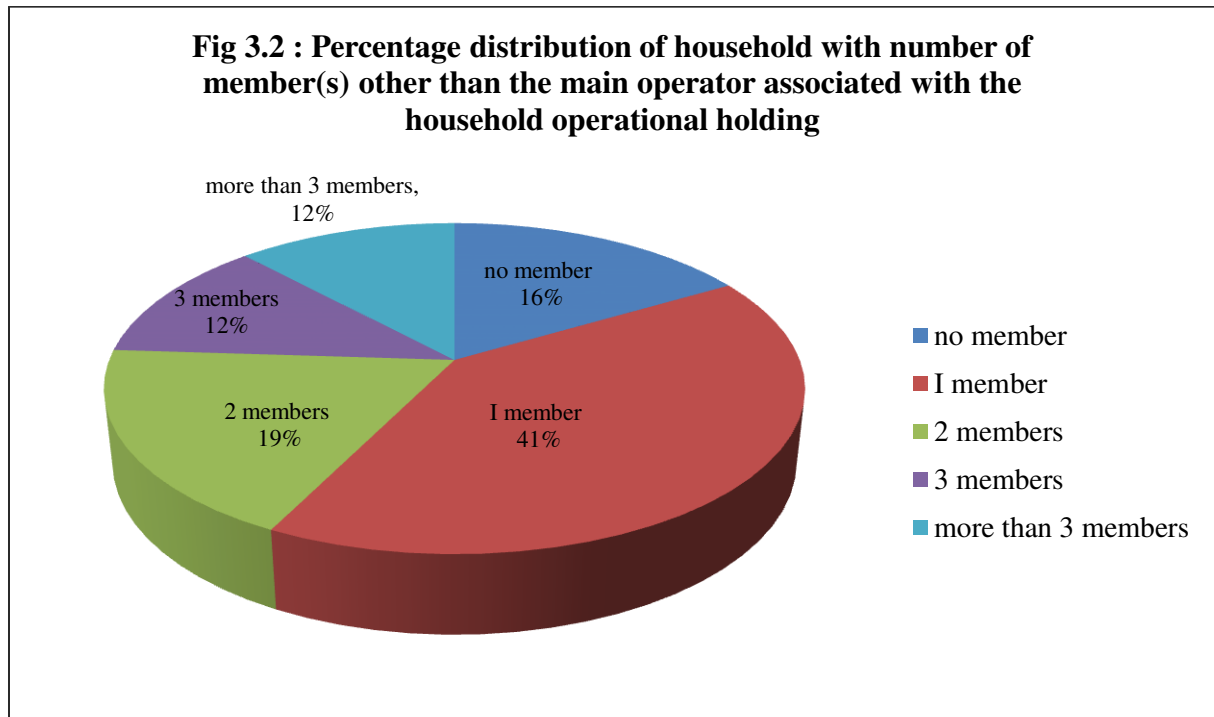

**Statement S3.5: Percentage distribution of households with number of member(s) other than the main operator associated with the household operational holding during for major states**

State/UT	Percentage distribution of households with number of members other than the main operator associated with the household operation holding					
	0	1	2	3	>3	all (incl nr)

Ref: Table 15 of Appendix A

3.4.2 As observed from Statement S3.5, Kerala shows the highest percentage of households (34.6%) and Jharkhand (6.3%) the lowest among the households where no household member is associated with the operational holding apart from the main operator. It is also observed that in Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra and Punjab, more than one-fourth of the households have three or more members associated with the operational holding apart from

the main operator. Fig 3.2 gives the percentage distribution of households with number of member(s) other than the main operator associated with the household operational holding.

## CHAPTER FOUR

### HOUSEHOLD OWNERSHIP HOLDINGS OF LAND

**4.0** Some important findings emerging from the survey on household ownership holdings in rural India are discussed in this chapter. It covers different aspects of ownership holdings in terms of alternative uses to which land is put, types and terms of lease, and their variation over size classes of ownership holdings. It also highlights the estimates of area under household ownership holdings, average size of holding, the number and proportion of landless households etc.

#### **4.1 Household ownership of land**

4.1.0.1 Land, with permanent heritable possession, with or without right to transfer the title, was considered as owned land. The land held in owner-like possession under a long-term lease or assignment (e.g. village land possessed by a tribal household as per traditional tribal rights or community land customarily operated by a tenant for a long period) was also treated as land owned. A household ownership holding includes all plots (or parts of plot) of land owned by a member of the household, whether the land is cultivatable or not. Thus a household ownership holding may include, besides cultivatable land, areas under forest, barren and uncultivable land, cultivatable waste land, land put to non-agricultural uses (viz. house sites, roads etc.), land growing miscellaneous tree crops, etc.

4.1.0.2 The estimates of area under household ownership holdings, average size of holding, and number and proportion of landless households are presented in Statement S4.1 for the major States across the last three LHS of NSS. Here, the households owning no land or land less than 0.002 hectares are termed as landless households. The estimated area owned by the rural households in India during 2013 was 92.369 million hectares (mha) with an average size of 0.592 hectare land per ownership holdings. Excluding the landless households, this average turned out to be 0.639 hectares. 7.41 percent of households owned practically no land or a very small holding.

4.1.0.3 As evident from Statement S4.1, during 2013, the average area owned per household varied over a wide range in the states, with West Bengal showing the lowest value (0.174 ha) and Rajasthan reporting the highest (1.483 ha). The states of Kerala, Bihar, Tamil Nadu, Odisha, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Andhra Pradesh and Uttar Pradesh reported an average area owned per household less than the national average was 0.592 ha. The states of Rajasthan and Madhya Pradesh reported average holding size exceeding one hectare. The percentage of landless households in the major states also varied over a wide range with the highest percentage in Andhra Pradesh (15.93%) and the lowest in Haryana(1.05%). Fig 4.1 and Fig 4.2 diagrammatically represents the average area owned per household and percentage of landless households respectively in the major states.

**Statement S4.1: Average size of household ownership holdings and percentage of landless households during the last three LHS of NSS for major states**

State/UT	average area (ha) owned per household			percentage of landless households			average area (ha) owned per household excluding landless households			Estimated area owned (mha)

Note: 1. Land holdings 'less than or equal to 0.002 hectares' is classified under 'landless' category, also includes plots where area is not reported.

2. For places indicated by a '-', data was not available

Ref: 1. Data for 2012-13 - Table 4 of Appendix A

2. Previous years' data: NSS Report No. 399 and 491

4.1.0.4 As seen from statement S4.1, in the last two decades, all the major states showed a decline in the average area owned (both including and excluding landless households), except for Assam, which has shown a marginal increase in both the cases. The percentage of landless households had registered a downward trend in the last two decades for all the major states, except for Andhra Pradesh, Jammu & Kashmir, and Uttarakhand where a marginal increase was observed; and for Kerala, which revealed a double increase in percentage landless households was observed in the last decade.

#### 4.1.1 Trends in household ownership of land

4.1.1.1 Data on ownership of land are being collected regularly by the NSSO since 8<sup>th</sup> round (1954-55). So far, including the present one, seven land holding surveys have been conducted. The results of these surveys contribute a fairly comparable set of data over quite a long period of time. For the NSS 8<sup>th</sup> round, a plot of land was considered to be owned by a member of the household only if he/she held it with permanent heritable possession, with or without right to transfer the title. The coverage of owned land remained unaltered through the rounds, except for one change introduced in the definition of owned land. The land held in owner-like possession under a long-term lease or assignment became a part of the land owned by the household since the 17<sup>th</sup> round (1961-62). In that round the terms 'assignment' or 'long-term lease' covered only those given by the Government. In the 26<sup>th</sup> round (1971-72), owner-like possession was elaborated to cover the following types of possession as well:

- land held under perpetual basis, hereditary tenure and long-term lease (ranging from 30 to 99 years),
- land held by tribals under traditional right from local chieftains, village councils or district councils,

- (c) land held by tenants who were granted full proprietary rights by the government under land reforms legislation, and
- (d) land held by tenants while ownership rights were with the community.

These types of possession, however, account for a very small share of area owned. But for the coverage of owner-like possession, the coverage of the term ‘ownership’ has remained unaltered since the 26<sup>th</sup> round.

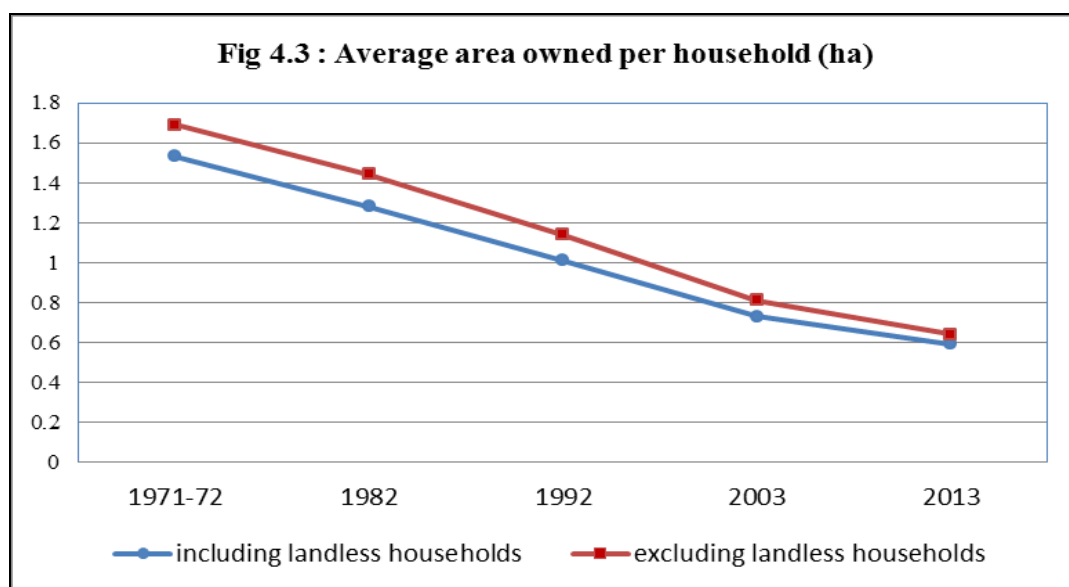

4.1.1.2 The basic estimates relating to ownership of land obtained from the above surveys are given in Statement 4.1. It may be observed that the total area owned (119.6 mha) estimated in 1971-72, had fallen to 92.4 mha in 2013, a fall of around 23 per cent.

<b>Statement 4.1: Some important characteristics of household ownership of land across the last five LHS Surveys of NSS</b>					
item	1971-72	1982	1992	2003	2013
(1)	(2)	(3)	(4)	(5)	(6)
1. Estimated area owned (mha)	119.636	119.736	117.354	107.228	92.369
2. Average area owned per household (ha)					
(a) including landless households	1.53	1.28	1.01	0.73	0.59
(b) excluding landless households	1.69	1.44	1.14	0.81	0.64
3. Percentage of landless households	9.60	11.30	11.30	10.00	7.41

*Ref: 1. Data for 2012-13 – Table 4 of Appendix A  
2. Previous years' data: NSS Report No. 491*

A decline of 14 % in the estimated area owned was seen from 2003 to 2013. Statement 4.1 reveals that during 2013, the average area owned per household decreased by more than half since 1971-72. A significant decline in the percentage of landless households was also observed in 2013, which was the lowest since 1971-72.

4.1.1.3 Figure 4.3 below shows the average area owned per household in hectares, (i) including landless households, and (ii) excluding landless households.

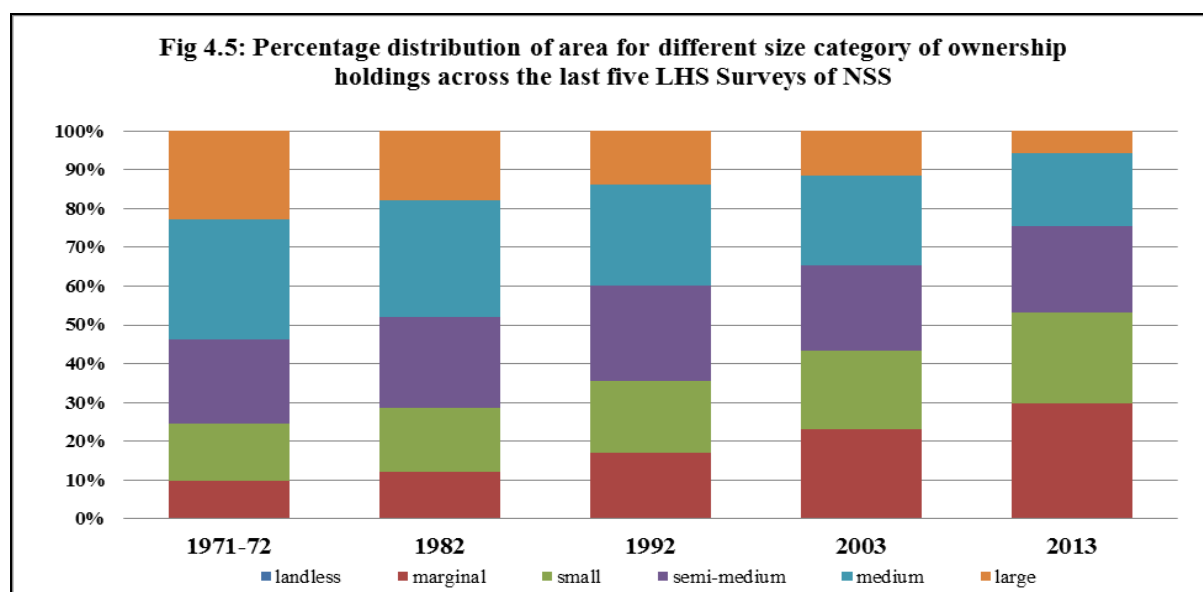

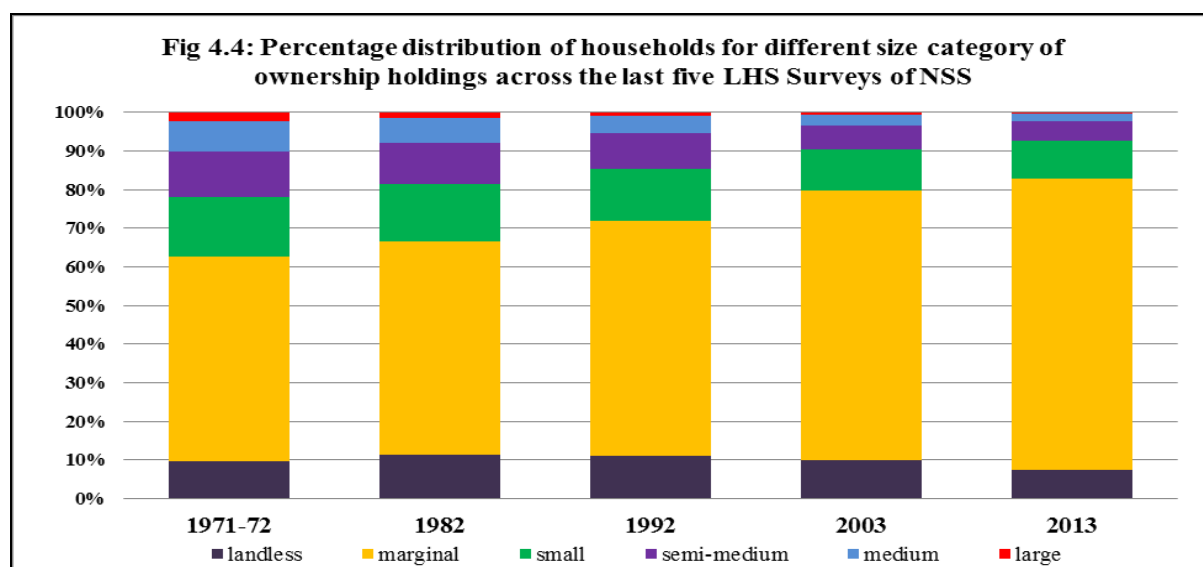

### 4.1.2 Trend in distribution of ownership holdings by category of land holdings

4.1.2.1 Statement 4.2 gives the percentage distribution of households and area owned by category of ownership holdings from all the Land Holding Surveys of NSS since 1971-72. It is observed from Statement 4.2 that the highest percent of households are seen in the *marginal* ownership category over the years till 2013, showing an increasing trend from 52.98% households in 1971-72 to 75.41% households in 2013. The maximum percentage of area owned was reflected for the *medium* category of land holdings from 1971-72 till 2003.

**Statement 4.2 : Percentage distribution of households and area owned over size category of ownership holdings across the last five LHS Surveys of NSS**

category of household ownership holdings	1971-72	1982	1992	2003	2013
(1)	(2)	(3)	(4)	(5)	(6)
Percentage distribution of households					
landless(<=0.002)	9.64	11.33	11.25	10.04	7.41
marginal(0.002-1.000)	52.98	55.31	60.63	69.63	75.41
small(1.000-2.000)	15.49	14.70	13.42	10.81	10.00
semi-medium(2.000-4.000)	11.89	10.78	9.28	6.03	5.01
medium(4.000-10.000)	7.88	6.45	4.54	2.96	1.93
large(>10.000)	2.12	1.43	0.88	0.53	0.24
Percentage distribution of area owned					
landless(<=0.002)	0	0	0	0.01	0.01
marginal(0.002-1.000)	9.76	12.22	16.93	23.01	29.75
small(1.000-2.000)	14.68	16.49	18.59	20.38	23.53
semi-medium(2.000-4.000)	21.92	23.38	24.58	21.97	22.07
medium(4.000-10.000)	30.73	29.90	26.07	23.08	18.83
large(>10.000)	22.91	18.01	13.83	11.55	5.81
Ref: 1. Data for 2012-13 – Table 4 of Appendix A					
2. Previous years' data: NSS Report No. 491					
*Till 2002-03, the 'marginal' category of land holding included 'landless' category also. In the above table, for better comparability, the estimates of the round for 'landless' is shown separately and excluded from 'marginal'.					

However, after four decades, the *marginal* category has become the maximum percent of area owned during 2013. It is also observed that, over the last five decades since 1971-72, the percentage distribution of households has progressively declined for all the category of ownership holdings except for the *marginal* holders; whereas percentage distribution of area owned has increased for all the category of holdings, except for the *medium* and *large* holdings recording 30.73% in 1971-72 to 18.83% in 2013 and 22.91% in 1971-72 to 5.81% in 2013 respectively. The *large* and *medium* holdings together, owned around 54% of the total land in 1971-72, which progressively declined over the years to reach to around 25% of the total land in 2013 while the proportion of households with *medium* and *large* holdings declined to around 2% from around 10% during this period. For different category of ownership holdings, the percentage of area owned and the percentage of households are diagrammatically represented in Fig 4.4 and 4.5 respectively.

4.1.2.2 The percentage distribution of households and area owned by broad category of land holding in the major States and all India for the years 2013, 2003, 1992, 1982 and 1971-72, as obtained from the NSS 70<sup>th</sup>, 59<sup>th</sup>, 48<sup>th</sup>, 37<sup>th</sup> and 26<sup>th</sup> round Land and Livestock Holdings Surveys respectively is given in Table S4.2.

4.1.2.3 As seen from the Table S4.2, the proportion of marginal holdings to total number of holdings increased in all the States during the last decade. An increasing trend in the percentage of area owned by marginal households is also observed in all the major states. The decline in the shares of the top three classes (*large, medium, semi-medium*), both in number and area of ownership holdings, is noticeable in almost all the major States, though the pace of decline was not uniform across at the states.

4.1.2.4 Andhra Pradesh, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Punjab and Rajasthan reported an increase in the proportion of area under *small* holdings during the period 2003 to 2013 along with the increase in the national level. The proportion of area under *semi-medium* holdings, increased marginally in the states of Andhra Pradesh, Assam, Gujrat, Haryana, Karnataka, Punjab, and Rajasthan.

### 4.1.3 Proportion of landless households

4.1.3.1 The percentage of landless households as estimated during 1971-72, 1982, 1992, 2003 and 2013 is given in

<b>Statement S4.3 : Percentage of landless households in the major states across the last five LHS Surveys of NSS</b>					
State	percentage of landless households				
	1971-72	1982	1992	2003	2013
(1)	(2)	(3)	(4)	(5)	(6)
Andhra Pradesh	7.0	11.9	11.9	14.3	15.93
Telangana					6.19
Assam	25.0	7.5	13.4	8.1	7.42
Bihar	4.3	4.1	8.6	7.6	5.33
Jharkhand					1.35
Gujarat	13.4	16.8	16.3	13.6	12.50
Haryana	11.9	6.1	3.7	9.2	1.05
Himachal Pradesh	4.4	7.7	10.4	15.0	14.23
Jammu & Kashmir	1.0	6.8	2.8	3.3	3.06
Karnataka	12.5	13.7	10.0	14.1	10.22
Kerala	15.7	12.8	8.4	4.8	9.35
Madhya Pradesh	9.6	14.4	15.2	12.1	5.56
Chhattisgarh					8.23
Maharashtra	10.4	21.2	19.6	17.7	12.84
Odisha	10.6	7.7	13.8	9.6	5.39

Rajasthan	2.9	8.1	6.4	5.7	3.89
Tamil Nadu	17.0	19.1	17.9	16.6	8.84
Uttar Pradesh	4.6	4.9	4.9	3.8	3.32
West Bengal	9.8	16.2	11.0	6.2	6.55
<b>NE States</b>					<b>6.07</b>
<b>Group of UTs</b>					<b>30.18</b>
<b>all India</b>	<b>9.6</b>	<b>11.3</b>	<b>11.3</b>	<b>10.0</b>	<b>7.41</b>

\*For 1971-72, 1982, 1992, 2000, Bihar included Jharkhand, Madhya Pradesh included Chhattisgarh, Uttar Pradesh included Uttarakhand and Andhra Pradesh included Telangana.

Ref: 1. Data for 2012-13 – Table 4 of Appendix A

2. Previous years' data: NSS Report No. 491

statement S4.3 for the major states. At all India level, it was observed that the percentage of landless household estimated during 2013 (7.41%) was the lowest in the last five decades. The percentage of landless households had initially increased from 1971-72 to 1982, remained the same in 1992 and thereafter declined in 2003, with a further decline in 2013. Within the major states, no distinct increasing or decreasing pattern was observed in the percentage of landless households till 1992. However, after 1992 all the major states revealed a declining percentage of landless households, except Andhra Pradesh, Himachal

Pradesh, Kerala and Punjab, where the proportion of landless households have increased.

## 4.2 Number and area of ownership holdings by social group

4.2.1 Statement 4.4 provides the percentage distribution of land owned per household by household social group at all India level. As seen from the statement, around 44.82% households of the total estimated households belonged to *OBC*, owning an estimated 45.68% of total land holdings: the highest among all the social groups. The percentage of estimated households were the lowest for *Scheduled Tribe* (11.89%) and percentage of land owned was

the lowest for *Scheduled Caste* (9.23%). Average area owned per household was the highest for *others* (0.816 ha) and the lowest for *Scheduled Caste* (0.272 ha).

<b>Statement 4.4: Distribution of land owned per household by social group</b>					
Indicators	ST	SC	OBC	Others	all*
(1)	(2)	(3)	(4)	(5)	(6)
1. percentage of households	11.89	20.06	44.82	23.23	100.00
2. estimated total area of land owned (mha)	12.062	8.528	42.190	29.588	92.369
3. percentage area of land owned	13.06	9.23	45.68	32.03	100.00
4. Average area (ha) owned per household	0.650	0.272	0.603	0.816	0.592
*includes cases of social group not recorded					

Ref: Table 4 of Appendix A

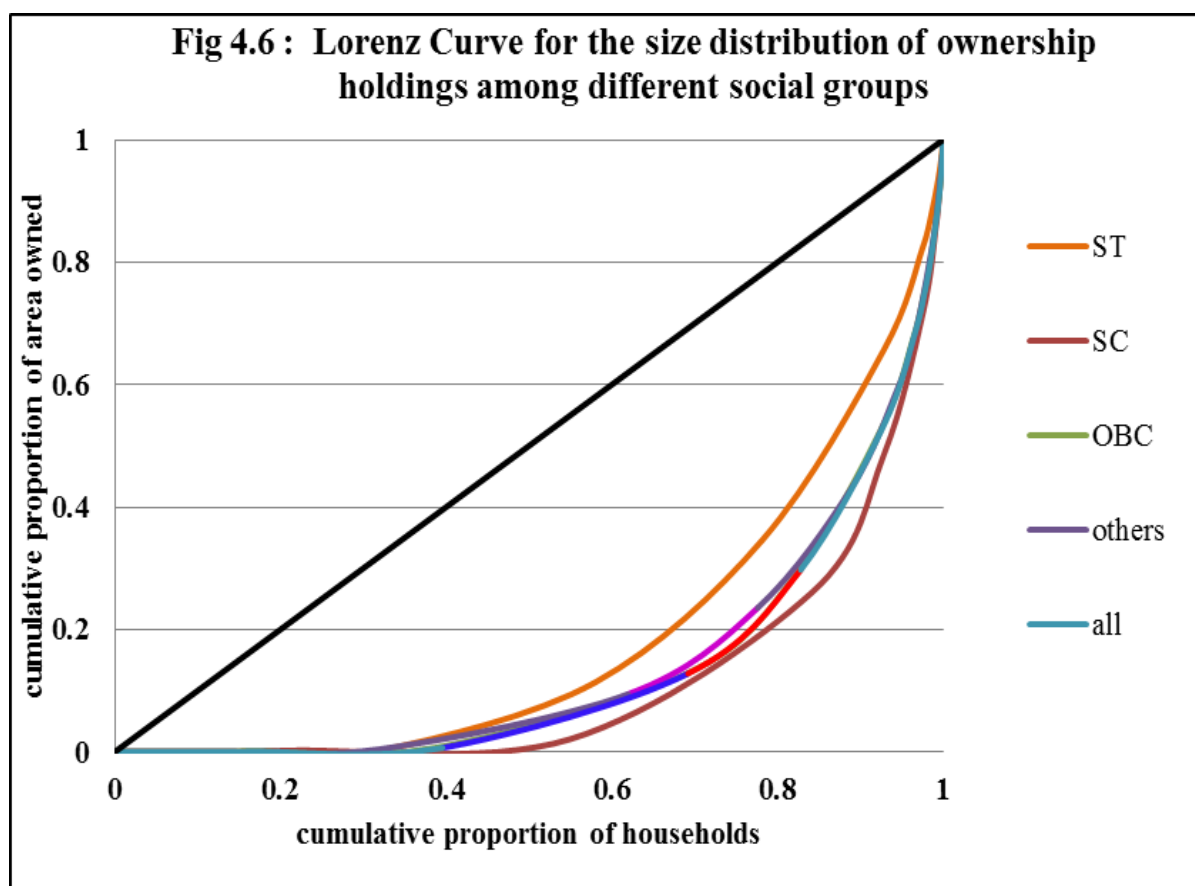

4.2.2 Statement 4.5 gives Gini's coefficient of concentration for each social group during 2013.

From the Gini's coefficients calculated for the ownership holdings of social groups, it is seen that the lowest disparity was among the *Scheduled Tribe* (0.62), whereas the highest was for the *Scheduled Caste* (0.75) and for *all* the social groups combined together was 0.72. The Lorenz Curve for the size distribution of ownership holdings among different social groups is given in Fig 4.6.

**Statement 4.5 : Gini's coefficient of concentration in ownership holdings for each social group**

Social Groups	Gini's coefficient
Schedules Tribe (ST)	0.62
Schedules Caste(SC)	0.75
Other Backward Class (OBC)	0.71
others	0.70
all	0.72

Ref: Table 4 of Appendix A

### 4.3 Incidence and extent of tenancy of land

4.3.1 Granting the right of using a piece of land to others, either on rent or free, by the owner without transferring the title is termed as lease of land. Such agreements, even when made orally, were considered as lease contracts. For the purpose of the survey, hereditary tenancy and long-term lease for 30 years or more were not treated as land leased, rather as land owned. On the other hand, private land encroached upon by a household was treated as leased-in land (free of rent). The survey estimates indicating extent of tenancy in rural India are presented in Statement 4.6.

4.3.2 It is seen that while 4.82 million (3.09%) households reported leasing out of land during Jul'12-Dec'12, 5.09 million (3.26%) households reported leasing out of land during Jan'13 – Jun'13. There is a large difference between area leased-out (3.89 mha during Jul'12-Dec'12 and 3.92 mha during Jan'13 – Jun'13) and area leased-in (9.89 mha during Jul'12-Dec'12 and 10.66 mha during Jan'13 – Jun'13). It may be mentioned here that while the collection of data on leasing out of land was strictly based on the information from the selected household only, those on leasing in may cover contracts involving land owned by urban households and non-household sector as well.

<b>Statement 4.6 : Incidence of tenancy in rural India</b>					
Sl no	characteristic	aggregate estimate		percentage of total households/ area owned	
		Jul'12- Dec'12	Jan'13- Jun'13	Jul'12- Dec'12	Jan'13- Jun'13
(1)	(2)	(3)	(4)	(5)	(6)
1.	households reporting leasing out (million)	4.82	5.09	3.09	3.26
2.	households reporting leasing in (million)	20.47	21.29	13.11	13.65
3.	area reported as leased out (mha)	3.89	3.92	4.28	4.28
4.	area reported as leased in (mha)	9.89	10.66	10.88	11.62
<i>Ref : Table 4,7, 8 of Appendix A</i>					

4.3.3 Statement 4.7 shows the percentage variation in leased-in and leased-out land in across the last five LHS of NSS. The estimates reveal that there is a declining trend in the percentage of households leasing in land over the three decades. The ratio of area leased-in to area owned by households has dropped from 1971-72 to 2003, but increased in 2013. The same pattern is seen in the ratio of area leased-out to area owned.

<b>Statement 4.7: Estimates of reported incidence of leasing out and leasing in of land by households across the last five LHS Surveys of NSS</b>						
Sl no	characteristic	1971-72	1982	1992	2003	2013*
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1.	Percentage of households leasing in land	25	18	15	12	14
2.	Percentage of area leased-in to total area owned	12	7	9	7	12
3.	Percentage of area leased-out to total area owned	6	4	5	3	4
*For 2013, the estimates of Jan'13- Jun'13 have been used.						
Ref: 1. Data for 2012-13 – Table 4, 7, 8 of Appendix A 2. Previous years' data: NSS Report No. 491						

4.3.4 Statement S4.7 gives the inter-State variation of the percentages of leased-in and leased-out households, average area leased in per leasing-in household and the ratio of area leased in to total area owned, for the major states. At all India level, 3.26% households reported leased-out land and 13.65% households reported leased-in land. The average area leased-in area per reporting household was 0.5 ha, while leased-in area as percent of total area owned was 11.62%.

4.3.5 A wide inter-state variation in the percentage of households reporting leased-in land during 2013 was observed from statement S4.7. Among the major states the highest percentage of leased-in households was reported in Andhra Pradesh (37.21%), and the lowest was reported in Jammu & Kashmir (3.03%). In case of households leasing out land, Karnataka (6.02%) registered the highest, closely followed by Haryana (5.48%). The state which revealed the lowest percentage of leased-out land among the major states was Jammu & Kashmir (0.52%).

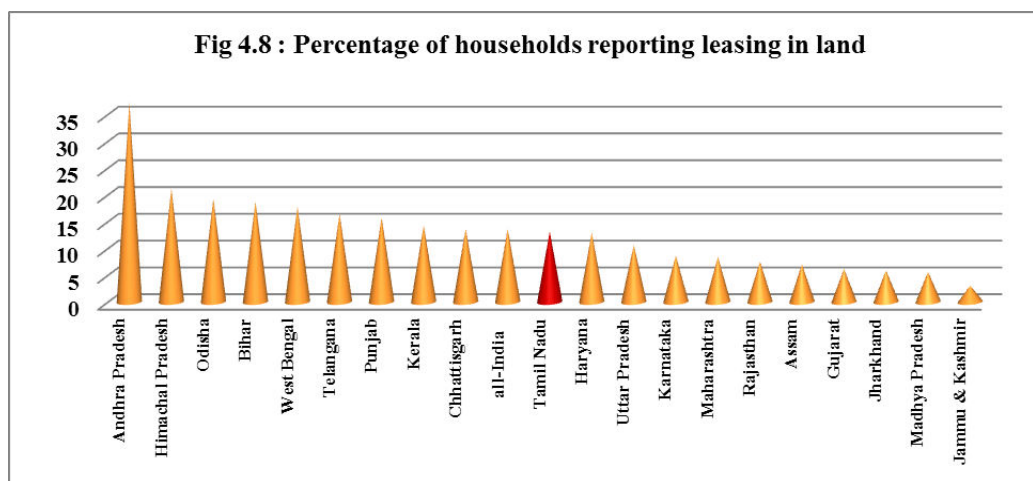

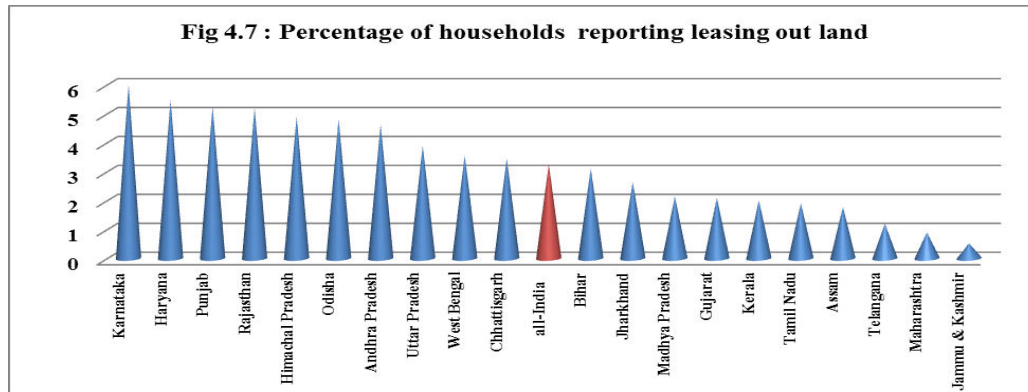

<b>Statement S4.7: State-wise incidence of tenancy</b>				
<b>State/UT</b>	percentage of households reporting		average area leased in per reporting household (ha)	leased-in area as percent of total area owned
	leased-out land	leased-in land		
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	4.64	37.21	0.779	59.03
Assam	1.78	7.04	0.397	4.50
Bihar	3.11	18.72	0.395	30.71
Chhattisgarh	3.46	13.66	0.537	9.30
Gujarat	2.10	6.15	0.833	6.38
Haryana	5.48	12.94	0.963	16.38
Himachal Pradesh	4.91	21.17	0.102	5.47
Jammu & Kashmir	0.52	3.03	0.034	0.24
Jharkhand	2.64	5.90	0.178	2.18
Karnataka	6.02	8.64	0.687	6.99
Kerala	2.01	14.29	0.148	10.26
Madhya Pradesh	2.14	5.61	1.081	5.41
Maharashtra	0.90	8.41	0.383	3.60
Odisha	4.82	19.28	0.403	20.47
Punjab	5.25	15.77	1.157	29.10
Rajasthan	5.22	7.56	1.242	6.36
Tamil Nadu	1.91	13.16	0.400	15.03
Telangana	1.20	16.45	0.793	18.59
Uttar Pradesh	3.90	10.64	0.394	8.61
West Bengal	3.57	17.80	0.167	17.29
<b>N E States</b>	<b>2.62</b>	<b>12.65</b>	<b>0.227</b>	<b>4.08</b>
<b>Group of UTs</b>	<b>1.00</b>	<b>27.53</b>	<b>0.282</b>	<b>54.52</b>
<b>all India</b>	<b>3.26</b>	<b>13.65</b>	<b>0.501</b>	<b>11.62</b>

the estimates of Jan'13- Jun'13 have been used

Ref: Table 4,7, 8 of Appendix A

4.3.6 It was observed that, among the major states, the average area leased-in per reporting household was more than 1.000 ha for the states of Madhya Pradesh, Punjab and Rajasthan. The lowest in this category was recorded for the state of Jammu & Kashmir where the average area leased-in per household was less than 0.1 ha.

4.3.7 Among the major states, the ratio of land leased-in to total area owned was higher than national average(11.62%) for Andhra Pradesh (59.03%), Bihar(30.71%), Punjab(29.10%), Odisha(20.47%), Telangana(18.59%), West Bengal(17.29%), Haryana(16.38%) and Tamil Nadu(15.03%) .The inter-state variation is diagrammatically represented in Fig 4.7 and Fig 4.8.

#### 4.4 Terms of lease

4.4.1 Land lease is a contract between two parties under certain terms of lease which are binding on both the parties. The specific terms of lease on which data were collected in the survey are for: (i) *fixed money*, (ii) *fixed produce*, (iii) *share of produce*, (iv) *service contract*, (v) *share of produce together with other terms*, (vi) *under usufructuary mortgage*, (vii) *from relatives under no specified terms* and (viii) *under other terms*.

4.4.2 Statement S4.8 gives the percentage distribution of area leased-out by terms of lease for the major states and all India. The percentage distributions of leased-out area over the first three specific terms of lease are given, and the rest has been put together as *Others*. From the Statement, it is observed that the all India level, more than three-fourth of area leased-out land was covered jointly by *share of produce*, *fixed money* and *fixed produce*, the maximum area being covered by *share of produce* in both the periods. *Fixed money* and *fixed produce* as terms of lease has increased marginally from Jul'12-Dec12 to Jan'13-Jun'13, whereas *share of produce* as terms of lease has decreased marginally in the same period.

4.4.3 It is seen that in rural India, among the major States, Haryana (92% during Jul'12-Dec'12 and 93% during Jan'13-Jun'13) has the highest area of leased-out land under terms of lease *fixed money*, followed by Gujarat and Punjab. The corresponding figures for Gujarat are 76% during Jul'12-Dec'12 and 75% during Jan'13-Jun'13 and for Punjab are 64% during Jul'12-Dec'12 and 78% during Jan'13-Jun'13. Under *fixed produce*, the maximum area of leased-out land was observed in Andhra Pradesh (35%) during both the seasons.

4.4.4 Under *share of produce* as terms of lease, which covered the largest area of leased-out land at the national level; it was observed that more than 80% of the leased-out land in Jharkhand and Bihar fell in this category, whereas the states of Andhra Pradesh, Punjab, Kerala, Jammu & Kashmir and Haryana, registered less than 4% leased-out area.

4.4.5 The most notable exceptions to the first three terms of lease (i.e. *fixed money*, *fixed produce* and *share of produce*) was seen in the states of Jammu & Kashmir and Kerala. In Jammu & Kashmir, 97% of leased-out land during Jul'12-Dec'12 and 94% of leased-out land during Jan'13-Jun'13 were under the terms of lease *others*, which means none of *share of produce*, *fixed money* and *fixed produce*. For Kerala this was 60% during Jul'12-Dec'12 and 64% during Jan'13-Jun'13.

**Statement S4.8: Percentage distribution of area leased-out by terms of lease for major states**

State/UT	Jul'12-Dec'12					Jan'13- Jun'13

## CHAPTER FIVE

---

### HOUSEHOLD OPERATIONAL HOLDINGS OF LAND

**5.0** This chapter discusses yet another facet of land holdings known as the *operational holdings*. The major findings of the enquiry on operational holdings are summarised in this chapter. Changes in certain characteristics across size distributions of operational holdings have been discussed in detail followed by the nature and extent of tenancy in the operational holdings, some aspects of the use of land holdings, etc. All of these are presented in the form of statements, and in some cases with accompanying diagrams.

#### 5.1 Estimates of operational holdings

5.1.1 Household operational holding has been defined as land that was used wholly or partly for agricultural production and was operated (directed/managed) by one household member alone or with assistance of others, without regard to title, size or location. Detailed discussion on definition of household operational holding can be seen in Chapter 2. Within a household, multiple operational holdings were not distinguished. The land might be operated by members belonging to a single household or by members belonging to more than one household operating jointly. However, holdings operated as cooperative farms were not considered as operational holding in this survey. A household growing vegetable in the kitchen garden or flowers in the courtyard, or raising livestock & poultry or carrying out pisciculture was considered to operate a holding, even if no crop production was undertaken by it during the reference period.

5.1.2 As distinct from a *household ownership holding*, which was restricted to the area of land owned by a household, *operational holding* encompasses all land - owned, leased in or otherwise possessed, i.e. land under physical possession of the household with the condition that some agricultural activity was carried out on any part of the land under its possession during the reference period. The major findings on this aspect are summarized in the ensuing paragraphs.

5.1.3 It may be noted here that during 2002-03 (59<sup>th</sup> round), the area possessed by an operational holding for the major part of the reference period was taken as its 'area operated' while in 2012-13 (70<sup>th</sup> round) 'area operated' includes the area of the plots which were used for agricultural activities, i.e., *only crop production on jhum land, only crop production on land other than jhum land, only farming of animal/fishery, both crop production and farming of animal /fishery, and other agricultural uses*. This may be kept in mind while interpreting the information outlined here.

5.1.4 Thus, if a household carried out any agricultural operation during the reference period on a plot of land possessed by the household, then all the plots possessed by the household during

the major part of the reference period (including those which are put to uses other than agricultural production, such as house-sites, paths, buildings, etc.) were also included in the *area of the household operational holding*. However, when a household does not undertake any agricultural production on any part of the land possessed by it during the reference period, it will not be considered to have any operational holding. Only the area used for agricultural activities in the operational holding in a reference period is termed as *area operated* in that reference period.

<b>Statement 5.1 : Estimated number of operational holdings, area and area operated</b>				
Sl no	item	Jul'12-Dec'12	Jan'13-Jun '13	whole agricultural year
(1)	(2)	(3)	(4)	(5)
1.	no. of operational holdings (million)	105.922	99.887	108.784
2.	total area of operational holding (mha)	96.288	88.404	98.614
3.	total area operated (mha)	91.450	74.366	94.480
4.	average area per operational holding (ha)	0.909	0.885	0.907
5.	average area operated per holding (ha)	0.863	0.745	0.869

*Ref: Table 13 of Appendix A*

5.1.5 Statement 5.1 shows that there were around 108.8 million operational holdings in rural India during the 2012-13. These operational holdings consisted of 98.6 million hectare (mha) of land out of which 94.5 mha was operated. The average size of an operational holding was 0.907 hectare whereas the average area operated per holding was 0.869 hectare, indicating that less than 5% of the total area of the operational holding was not operated.

## 5.2 Trends in Operational Holdings

5.2.1 Data on operational holdings has been regularly collected by NSSO since 1954-55 (8<sup>th</sup> round). The definition of operational holdings has undergone some change since 1960-61(17<sup>th</sup> round) with respect to the coverage of 'operated land'. From 1981-82 (37<sup>th</sup> round) onwards, the definition of operated land was extended to include land encroached or occupied on squatter basis, which was referred to as '*otherwise possessed land*'. There is a problem of comparison between the estimates from the Land Holding Surveys (LHS) of NSSO of the 37<sup>th</sup> round (1981-82) with the those of the later rounds as the estimates of the 37<sup>th</sup> round were generated from the data collected only for the major crop season. On the contrary, the estimates from the 1970-71, 1991-92, 2002-03 and 2012-13 were obtained directly from the data collected for the entire agricultural year. On this count, the estimates of number of operation households during 1981-82 are probably lower in comparison with those of the other LHS.

5.2.2 Statement 5.2 gives some basic estimates relating to operational holdings of the last five LHS of NSS.

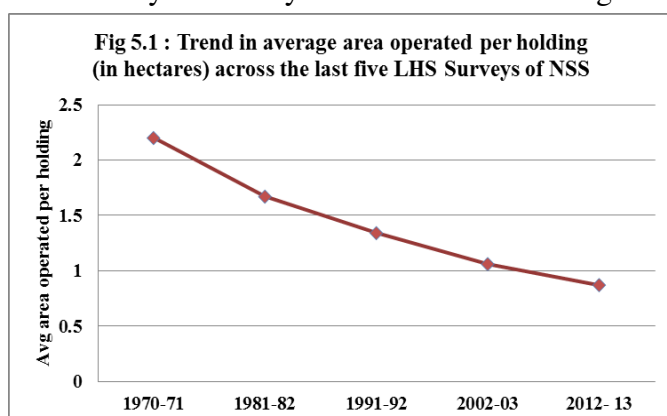

Statement 5.2 : Estimates of certain key characteristics of operational holdings across the last five LHS Surveys of NSS							
Sl no	item	1970-71	1981-82	1991-92	2002-03	2012-13	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	
1	Number of operational holdings(million)	57.07	71.04	93.45	101.27	108.78	
1.1	percentage increase in operational holdings	--	24.5	31.5	8.4	7.4	
2	Total area operated(mha)	125.68	118.57	125.10	107.65	94.48

		b leased-in land	24.68	15.20	10.99	9.90	13.69
7	In total area operated, percentage share of*	a area owned	89.43	91.08	90.44	92.70	87.75
		b area leased in	10.57	7.18	8.52	6.50	11.30
		c area otherwise possessed	--	1.74	1.04	0.80	0.95

\*For 2012-13 area of operational holdings in considered and the values correspond to Jan'13-Jun '13  
 Ref: 1. Data for 2012-13 – Table 13, 16 & 31 of Appendix A  
 2. Previous years' data: NSS Report No. 492

The number of operational holdings increased rapidly from 57.07 million in 1970-71 to 108.78 in 2012-13. However, the rate of growth of operational holdings, which accelerated over the three decades from 1970-71 to 1991-92 appears to have slowed down in the next two decades.

5.2.3 The total operated area of 125.68 mha in 1970-71 had dropped by around 5.6% in 1981-82 (118.57 mha). The estimate again showed a rise to 125 mha in 1990-91, but declined after that to 107.65 mha in 2002-03. The total operated area was 94.48 mha in 2012-13. This may be due to the change of definition of area operated (para 5.1.3). The tentative fall in percentage over a period of five decades is around 24.82%.

5.2.4 The consequence of rapid growth in the number of operational holdings with a limited land base is clearly shown by the estimates of average area operated per holding given in Statement

5.2. The average area operated has been on the decline from 2.20 hectares per holding during 1970-71 to 0.87 hectares in 2012-13. This is pictorially represented in Fig 5.1.

5.2.5 *Number of parcels per holding:* The estimates available from the last four LHSs show that the average rural holding, though smaller, is less

fragmented than it was earlier, the number of parcels per holding having dropped from 4.0 in 1981-82 to 2.0 in 2012-13.

5.2.6 *Trends in tenancy of land by operational holdings*: Since 1970-71 onwards, land tenure status of operational holdings has undergone significant changes. Statement 5.2 reveals that while the percentage of holdings with *partly or wholly owned* operated area changed little between 1970-71 (95.64%) and 2012-13 (97.29%), the proportion of holdings with *partly or wholly leased in* land (henceforth called 'tenant holdings') declined sharply from 24.65% to 13.69% during the same period.

5.2.7 The extent of tenancy measured in terms of percentage share of operated area is also given in statement 5.2. As seen from the statement, the incidence of leased-in to total operated area shows increase over time, the absolute area leased-in in 2012-13 works out to be smaller now compared to 1970-71, though larger than 2002-03. It may be noted that, the total operated area in 2012-13 is one-fourth smaller than 1970-71.

5.2.8 The percentage share of *area otherwise possessed* in total area operated, which is available from 1981-82 onwards only, showed a steadily decreasing trend from till 2002-03, and a marginal increase in 2012-13.

### **5.3 Size distribution of operational holdings**

5.3.1 Any significant change in agrarian structure should have some impact on the size distribution of land holdings. Here, the analysis has been done on the categories of operational holdings as defined in Chapter 2. The various aspects of this distribution are examined for any obvious structural changes. Statement 5.3 gives the changes in the size distribution of operational holdings shown across the last five LHS.

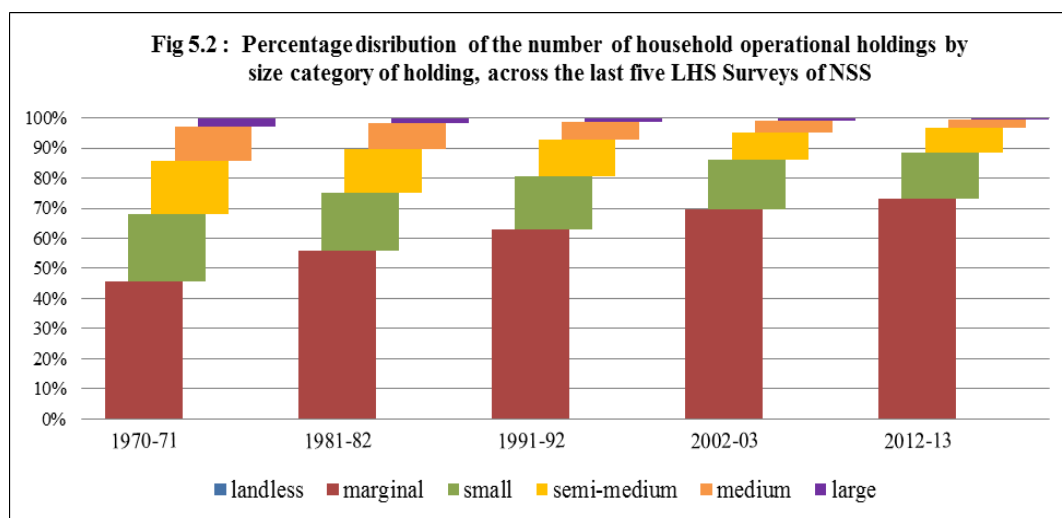

5.3.2 *Marginalisation of holdings*: A general feature of the size distribution of operational holdings is that the percentage of holdings decreases as the holding size increases. The percentage distributions of operational holdings given in Statement 5.3 reveal that the percentages of large, small, medium and semi-medium holdings have been declining steadily since 1970-71, the decline being the steepest for large holdings where the percentage share declined from 3.15% in 1970-71 to 0.4% in 2012-13. A crowding of holdings into the *marginal* category with the progress of time is apparent from statement 5.3. In this category, the percentage of operational holdings has increased from 45.8% in 1970-71 to 73.17% in 2012-13. This can be seen from the bar chart given in Fig 5.2. It may be noted here that the estimates of kharif season have been used for the year 2002-03 in Fig 5.2.

**Statement 5.3 : Percentage distribution of the number of household operational holdings by category of holding across the last five LHS Surveys of NSS**

category of holdings (land size in ha)	percentage of operational holdings					
	1970-71	1981-82	1991-92	2002-03		2012-13
				kharif	rabi	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
landless(<=0.002)						0.03
marginal(0.002-1.000)	45.80	56.00	62.80	69.80	70.00	73.17
small(1.000-2.000)	22.40	19.30	17.80	16.20	15.90	15.30
semi-medium(2.000-4.000)	17.70	14.20	12.00	9.00	8.90	8.10
medium(4.000-10.000)	11.10	8.60	6.10	4.20	4.40	3.04
large(>10.000)	3.10	1.90	1.30	0.80	0.80	0.37
all sizes	100	100	100	100	100	100

Ref: 1. Data for 2012-13 : Table 13 of Appendix A  
2. Previous years' data: NSS Report No. 492

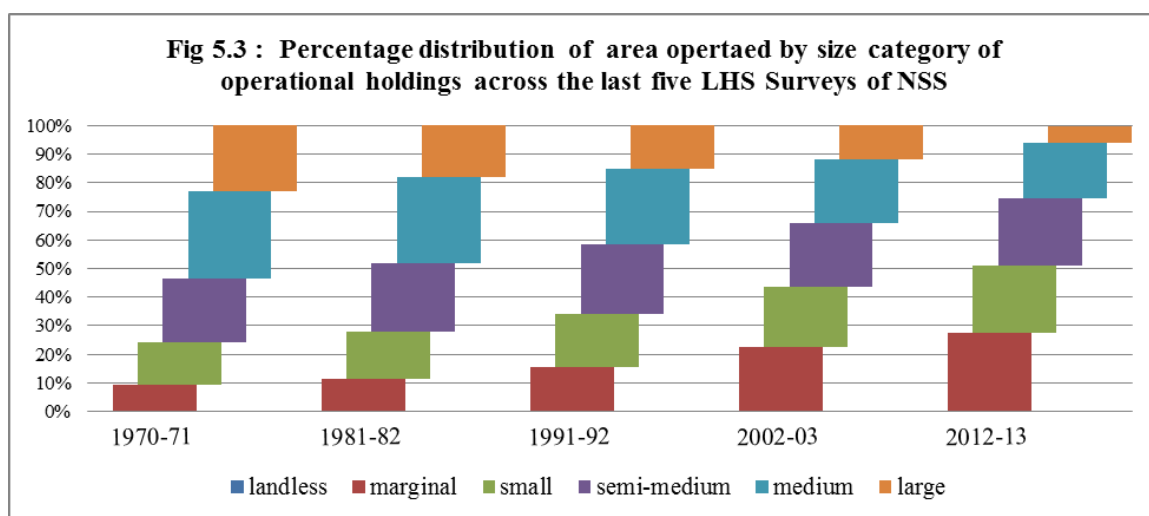

**5.3.3 Distribution of operated area:** Statement 5.4 gives percentage distribution of operated area by category of operational holdings from the last five Land Holding Surveys. It is seen that the shares of marginal holdings in total operated area, which was 9.2% in 1970-71, has risen rapidly over the last five decades to 27.71% in 2012-13, which is also a marginal increase in comparison to 2002-03. The share of small holdings are seen to be steadily increasing since 1970-71(14.8%) and has reached 23% in 2012-13; while the share of large holdings has been steadily declining from 23.44% in 1970-71, has reached a level of 6.02% in 2012-13. The share of area operated by medium holdings has declined steadily but more moderately, and the share of semi-medium holdings appears to be hovering around 22% during the last five rounds of LHS.

**Statement 5.4 : Percentage distribution of the operated area by category of operational holdings across the last five LHS Surveys of NSS**

category of holdings (land size in ha)	percentage of operated area					
	1970-71	1981-82	1991-92	2002-03		2012-13
				kharif	rabi	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
landless(<=0.002)						0.00
marginal(0.002-1.000)	9.20	11.50	15.60	22.60	21.70	27.71
small(1.000-2.000)	14.80	16.60	18.70	20.90	20.30	23.44
semi-medium(2.000-4.000)	22.60	23.60	24.10	22.50	22.30	23.50
medium(4.000-10.000)	30.50	30.20	26.40	22.20	23.10	19.33
large(>10.000)	23.00	18.20	15.20	11.80	12.50	6.02
all sizes	100	100	100	100	100	100

Ref: 1. Data for 2012-13 – Table 13 of Appendix A  
2. Previous years' data: NSS Report No. 492

This is represented in the bar chart given in Fig 5.3. It may be noted here that the estimates of kharif season have been used for the year 2002-03 in Fig 5.3. The percentage distribution of the of the operated area by category of operational holdings across LHS Surveys of NSS: 1970-71 to 2012-13 in the major states can be seen in Table S5.3.

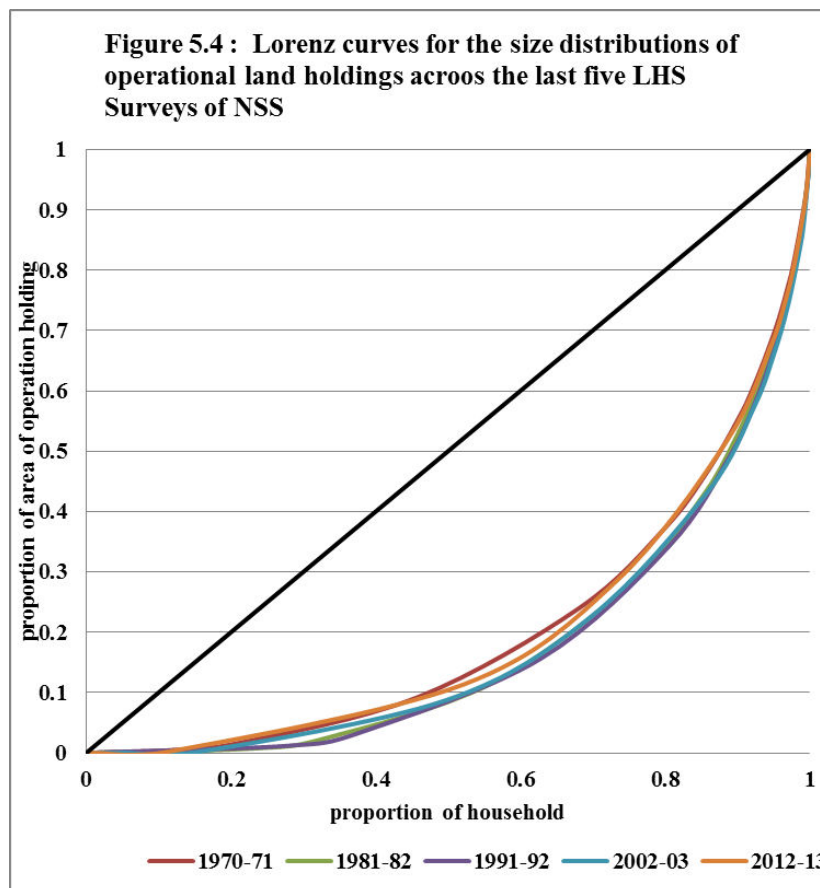

5.3.4 As seen from Table S5.3, there is a rise in the percentage of marginal holdings and a decline in percentage of holdings in all other categories. In all the major states, the share of area operated by medium and large holdings has declined. Except for Maharashtra, Madhya Pradesh, Rajasthan, Haryana and Punjab, the share of area operated by semi-medium holdings was also declining.

## 5.4 Degree of concentration of the operation holdings

5.4.1 It is inevitable that there will be considerable variations between the size and number of the operation holdings in different category of land holdings. These variations may be both within a specified LHS round as well as across rounds, in varying degrees. Thus it may be interesting to know the direction and degree of concentration of the operational holdings. For this, the Lorenz Curve and the Gini's coefficient of concentration have been obtained which is outlined below.

5.4.2 *Lorenz curve:* The Lorenz curves for the all India size distribution of operational land holdings in 1970-71, 1981-82, 1991-92, 2002-03 and 2012-13 are shown in Figure 5.4. For the previous rounds, the all India cumulative percentage distribution of operational holdings and area

operated, is taken from NSS Report No.407 and 492 and are used to construct the curves.

5.4.3 *Gini's coefficient of concentration:* To obtain overall measure of concentration in the size distribution, Gini's Coefficient of concentration is used. This is presented in Statement S5.5 for the major states across the last five LHS surveys of NSS viz., 1970-71, 1981-82, 1991-92, 2002-03 and 2012-13. Gini's coefficient also reveals that the degree of concentration in the operational holdings has increased from 1970-71 to 1981-82, but decreased in the

next three decades. It may be mentioned here that, since the coefficient for 2002-03 is based on the distribution of kharif holdings, the slight difference between the figures for 1991-92 and 2002-03 may not reflect a real fall in concentration during the intervening period.

5.4.4 The states of Chhattisgarh, Jammu & Kashmir and Jharkhand were not included as major states and Telangana was not in existence, in NSS report no. 492, and as such these figures are not available till 2002-03. To ensure proper comparability, it has been necessary to use, for

computation of the coefficient, the distribution of land holdings by *category*, which is available statewise for all five rounds. The coefficient for 1991-92 is here seen to be slightly *lower* than that for 1981-82. The Statement also brings out varying trends in Gini's coefficient across the States.

**Statement S5.5 : Changes in Gini's coefficient on the size distribution of operational holdings across the last five LHS of NSS**

State	Gini's coefficient				
	1970-71	1981-82	1991-92	2002-03	2012-13
(1)	(2)	(3)	(4)	(5)	(6)
Andhra Pradesh	0.582	0.573	0.529	0.543	0.455
Assam	0.388	0.465	0.412	0.366	0.351
Bihar	0.511	0.534	0.525	0.421	0.376
Chhattisgarh					0.361
Gujarat	0.518	0.544	0.573	0.605	0.518
Haryana	0.436	0.571	0.645	0.675	0.598
Himachal Pradesh					0.334
Jammu & Kashmir					0.237
Jharkhand					0.350
Karnataka	0.509	0.562	0.577	0.543	0.509
Kerala	0.483	0.449	0.392	0.348	0.342
Madhya Pradesh	0.508	0.520	0.533	0.527	0.508
Maharashtra	0.514	0.570	0.570	0.526	0.474
Odisha	0.466	0.504	0.462	0.381	0.316
Punjab	0.398	0.685	0.694	0.706	0.670
Rajasthan	0.599	0.551	0.590	0.610	0.575
Tamil Nadu	0.480	0.555	0.527	0.508	0.480
Telangana					0.440
Uttar Pradesh	0.471	0.520	0.498	0.450	0.444
West Bengal	0.433	0.494	0.430	0.313	0.223
<b>all India</b>	<b>0.567</b>	<b>0.596</b>	<b>0.591</b>	<b>0.557</b>	<b>0.516</b>

shows the most pronounced increase in the concentration ratio since 1970-71 to 2002-03 and decrease slightly in 2012-13 but they still have higher coefficient of concentration among the states. In Haryana, the ratio rose substantially from 0.436 in 1970-71 to 0.675 in 2002-03 and thereafter decreasing slightly to 0.598 in 2012-13. In Punjab, the ratio increased sharply from 0.398 in 1970-71 to 0.706 in 2002-03 and thereafter decreasing slightly to 0.670 in 2012-13. In Gujarat, there has been a steady, though more gradual, rise in the index of concentration over the decades from 0.518 in 1970-71 to 0.605 in 2002-03 and further decreasing to 0.518 in 2012-13.

## 5.5 Tenancy in Operational Holdings

5.5.1 This section deals with the trends in incidence of tenancy and proportion of tenanted land under major terms of lease *vis-à-vis* size class of holdings. The granting of the right to use a piece of land to others, either on rent or free, by the owner without transferring the title is termed *land lease*. Agreements of such lease, even when made orally, are considered as lease contracts

5.4.5 As apparent from the statement, for the states of West Bengal, Bihar and Odisha, the index of concentration has fallen sharply since 1991-92. In Assam, Uttar Pradesh and Tamil Nadu, the index has fallen since 1981-82. In Kerala, there has been a steady decline in the index since 1970-71. For Karnataka, Madhya Pradesh (including Chhattisgarh till 2002-03), Maharashtra and Rajasthan, no clear trend is discernible.

5.4.6 The two most agriculturally developed states of Punjab and Haryana

in the LHS surveys of NSS. On the other hand, hereditary tenancy and long-term lease for 30 years or more are not treated as land lease, but as land ownership.

5.5.2 Statement 5.6 shows the incidence of tenancy by size category of operational holdings in 2012-13. At the national level, it is seen that total 13.7% of tenant holdings operate in 10.22% of total leased-in land. The *landless* class shows the lowest incidence of tenancy (2.6%) and the highest percentage of tenant holdings were seen in *large* holdings (21.8%). The percentage of tenanted land (area leased in) in operated area is also shown in Statement 5.6.

<b>Statement 5.6: Percentage of tenant holdings and area leased in by various size categories*</b>			
Category of operational holdings (land size in ha)	Percentage of		
	tenant holdings	area leased in*	share in leased-in area*
(1)	(2)	(3)	(4)
landless(<=0.002)	2.6	1.67	0
marginal(0.002-1.000)	13.2	10.73	30.26
small(1.000-2.000)	13.6	9.85	22.31
semi-medium (2.000-4.000)	18.0	10.01	22.01
medium(4.000-10.000)	14.8	9.52	18.14
large(>10.000)	21.8	12.25	7.28
<b>all sizes</b>	<b>13.7</b>	<b>10.22</b>	<b>100</b>
<i>'tenant holding' stands for an operational holding with wholly or partially leased-in area</i>			
<i>*Figures correspond to the period Jul'12-Dec'12</i>			
<i>Ref: Table 16 &amp; 31 of Appendix A</i>			

It is apparent from the statement that the *large* holdings registered the highest percentage of area leased-in (12.25%), although its share in the total leased-in area was the minimum (7.28%) amongst all the category of land holdings.

5.5.3 The percentage distribution of tenanted land by category of holdings in Statement 5.6 also reveals that the *marginal* category of holdings has a share of 30.26% leased in area which is the maximum percentage, followed by *small* holdings (22.31%) and *semi-medium* holdings (22.01%).

5.5.4 Statement S5.6 gives the survey estimates of percentage of tenant holdings and percentage share of tenanted land in operated area for the major states. The corresponding estimates of the last four LHS surveys are also given in the statement to observe trends, if any. At all India level in 2012-13 the tenant holding is 13.7% during the whole agricultural year which is higher than its previous two counterparts.

5.5.5 The share of leased in area in tenant holding is 10.2% which is higher than its previous three counterparts. During 2012-13, the percentage of tenant holdings was highest in Andhra

Pradesh; it was 42.3% during the whole agricultural year, followed by Bihar (28.0%) and West Bengal (21.7%). The percentage of leased in area in tenant holdings in 2012-13 recorded the highest in Andhra Pradesh (34.2%) and lowest for Jammu & Kashmir(0.01%).

**Statement S5.6 : Percentage of tenant holdings and operated area leased in for major states across the last five LHS Surveys of NSS**

State	percentage of tenant holdings				percentage share of leased-in area			
	1981-82	1991-92	2002-03	2012-13	1981-82	1991-92	2002-03	2012-13
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

Figures for 2012-13 corresponds to the period Jul'12-Dec'12

Ref: 1. Data for 2012-13 – Table 16 & 31 of Appendix A

2. Previous years' data: NSS Report No. 492

## 5.6 Trends in extent of tenancy by category of operational holdings

5.6.1 The percentages of tenant holdings by category of operational holdings from the five land holding surveys of NSS are given in Statement 5.7. After 1970-71, the percentage of tenant holdings has been continuously declining till 2002-03, and increased during 2012-13. From 25.7% in 1970-71 it has declined to 9.9% during 2002-03 and increased to 13.7% during 2012-13. On comparison with 2002-03 it is seen that during 2012-13, the percentage of tenant holdings has increased for all the categories of land holdings, the *large* holdings accounting for the highest percentage of 21.8% in 2012-13. The percentage increase in 2012-13 over 2002-03 for *small* holdings revealed an increase of around 3% whereas for all other higher categories of land holdings, the percentage increase was seen to be above 6%.

<b>Statement 5.7 : Percentage of tenant holdings by category of operational holdings, across last five LHS surveys of NSS</b>					
category of operational holdings (land size in ha)	percentage of tenant holdings				
	1970-71	1981-82	1991-92	2002-03	2012-13
(1)	(2)	(3)	(4)	(5)	(6)
landless(<=0.002)					2.6
marginal(0.002-1.000)	27.0	14.4	9.3	9.8	13.2

Ref: 1. Data for 2012-13 – Table 31 of Appendix A 2. Previous years' data: NSS Report No. 492					

5.6.2 Statement 5.8 shows the percentage of leased-in area by category of holdings from the five land holding surveys. The data for the whole agricultural year is not available and hence not presented. It is seen that, the *marginal* and the *small* categories has registered a steady decline up to 2002-03 and then an increase during 2012-13. However, for the *semi-medium*, *medium* and *large* holdings, the percentage of area leased-in declined from 1970-71 to 1981-82, increased during 1991-92, decreased during 2002-03 and finally increased during 2012-13. Statement 5.8 also reveals that during 2012-13, the percentage of area leased-in was more during Jan'13-Jun'13 than Jul'12- Dec'12.

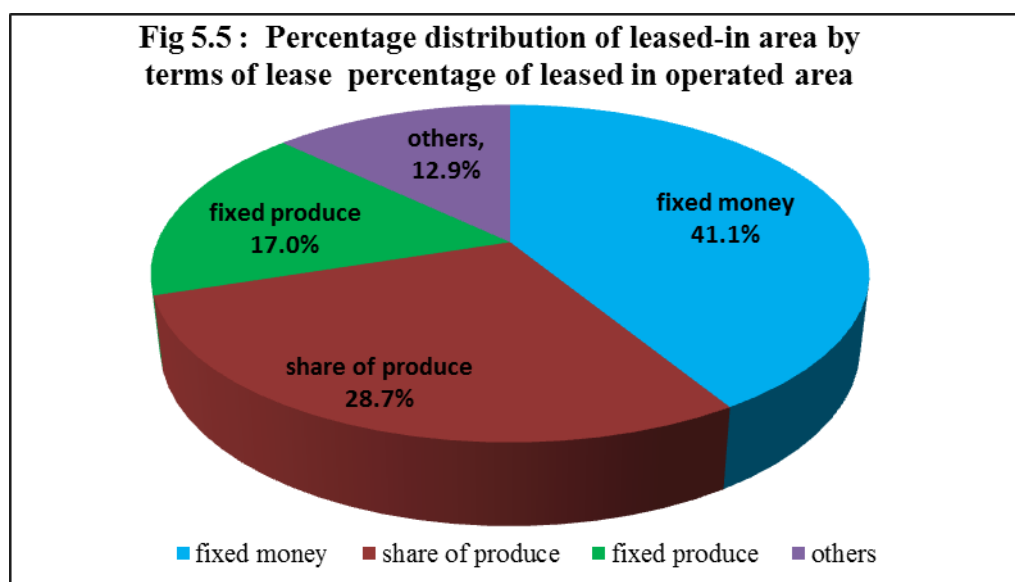

<b>Statement 5.8 : Percentage of area leased-in by category of operational holdings across last five LHS surveys of NSS</b>						
category of operational holdings (land size in ha)	percentage of area leased-in

## 5.7 Terms of lease

5.7.1 Leasing of land is contracted by two parties under certain terms of lease that are binding on both parties. In the present survey, leased-in land was classified by terms of lease for (i) *fixed money*, (ii) *fixed produce*, (iii) *share of produce*, (iv) *under service contract*, (v) *share of produce together with other terms*, (vi) *under usufructuary mortgage*, (vii) *from relatives under no specific terms*, and (viii) *under other terms*. Statement 5.9 gives the percentage distribution of leased-in area by various terms of lease. In the statement, the percentage distribution of leased-in operated area under first three specific terms of lease are presented, and the rest are put together as 'others'.

<b>Statement 5.9: Trends in percentage distribution of leased-in operated area by terms of lease across the last five LHS surveys of NSS</b>					
terms of lease	percentage distribution of leased in operated area				
	1970-71	1981-82	1991-92	2002-03	2012-13
(1)	(2)	(3)	(4)	(5)	(6)
fixed money	15.4	10.9	19.0	29.5	41.1
fixed produce	11.6	6.3	14.5	20.3	17.0
share of produce	47.9	41.9	34.4	40.3	28.7
others	25.1	40.9	32.1	9.9	12.9
<b>all terms</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>
<i>Figures for 2012-13 corresponds to the period Jul'12-Dec'12</i>					
<i>Ref: 1. Data for 2012-13 – Table 21 of Appendix A</i>					
<i>2. Previous years' data: NSS Report No. 492</i>					

As apparent from the above statement, *fixed money* (41.1%) was found to be the most prevalent practice of leasing land followed by *share of produce* (28.7%) and *fixed produce* (17.0%). The Statement 5.9 is pictorially represented in Fig 5.5 below.

5.7.2 *Rise in the share of 'fixed money' in tenanted land:* From the percentage distributions of leased-in operated area by terms of lease from the last five LHS of NSS given in Statement 5.9, it is seen that, over the last five decades, the terms of lease against *share of produce* is slowly losing importance, whereas *fixed money* as terms of lease is increasingly gaining importance.

5.7.3 *Inter-state variation in leasing under different terms:* The percentage distribution of leased-in operated area under four specific terms of lease and the rest put together in 'other' terms is given for major States in Statement S5.9. The distributions for the individual States reveal a wide variation over the country in the relative importance of different contracts.

5.7.4 In Punjab and Haryana - the two most agriculturally advanced states in the country - the most prevalent form of contract was *fixed money*. In Punjab about 94.5% of the tenanted land was contracted for fixed money during Jul'12- Dec'12 and 93.7% in Jan'13 – Jun'13. In Haryana about 79.5% of the tenanted land was contracted for fixed money in Jul'12- Dec'12 and 75.8% during Jan'13 – Jun'13.

5.7.5 *Share of produce* was found to be the most predominant form of tenancy in Assam and Karnataka. In Assam land so possessed accounted for 67.0% in Jul'12- Dec'12 and 55.8% in Jan'13 – Jun'13. In Karnataka land so possessed accounted for 63.4% in Jul'12- Dec'12 and 50.3% in Jan'13 – Jun'13. *Fixed produce* was reported as the most common form of tenancy in terms of leased-in area in Chhattisgarh ( 57.8% during Jul'12- Dec'12 and 61.6% during Jan'13 – Jun'13). While *share of produce* and *fixed money* tenancies were the main terms of leasing in most of the States, the term *leasing in from relatives under no specific terms* was very common in Himachal Pradesh (52.0% during Jul'12- Dec'12 and 46.2% during Jan'13 – Jun'13) and Kerala (36.4% during Jul'12- Dec'12 and 30.0% during Jan'13 – Jun'13).

**Statement S5.9: Percentage distribution of leased in operated area by terms of lease for major states**

State	Jul'12 – Dec'12						Jan'13 – Jun'13

## 5.8 Duration of possession

5.8.1 The period for which the land was actually possessed by the household without break was considered as the *duration of possession*. The durations considered for the purpose of the survey were- *less than one agricultural season, at least one agricultural season but less than one*

<b>Statement 5.10: Percentage distribution of area of land possessed by duration of possession</b>	
(1)	(2)
less than one agricultural season	1
at least one agricultural season but less than one agricultural year	2
at least one agricultural year but less than two agricultural years	2
two agricultural years or more	95
any duration of possession (incl n.r.)	100
<i>Figures corresponds to the period Jul'12-Dec'12</i>	
<i>Ref: Table 19 of Appendix A</i>	

*agricultural year, at least one agricultural year but less than two agricultural years, and two agricultural years or more.* Statement 5.10 gives the percentage distribution of possessed land at all India level by

duration of possession. As apparent from the statement, 95% area of possessed land was for duration of *two agricultural years or more*.

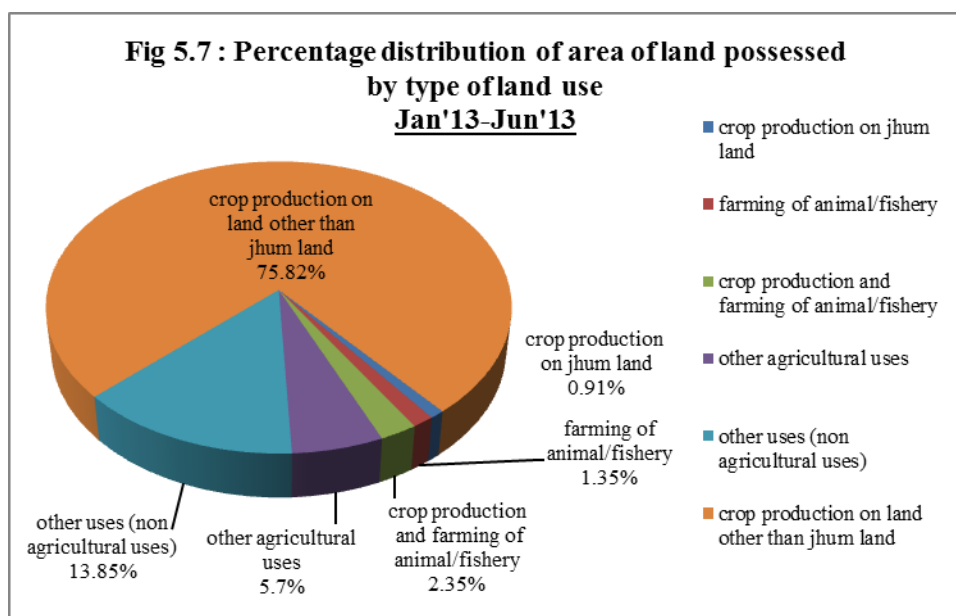

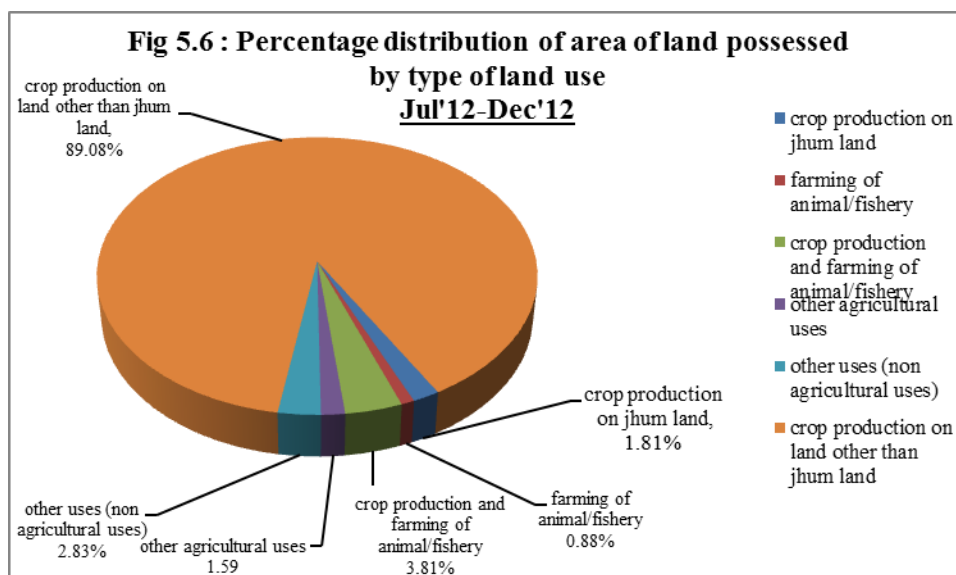

## 5.9 Land Use pattern

5.9.1 Land use refers to activities like growing crops, livestock farming/fishery, etc., carried out on the plot with the intention of obtaining products and/or benefits. In determining land use, reference was made to the activities carried out during the fixed reference periods of Jul'12-Dec'12 and Jan'13 –Jun'13. Statement 5.11 gives the all India percentage distribution of area of land possessed by type of land use during 2012-13. Land possessed has been defined as land under possession of the household (ie, land *owned and possessed*+ land *leased in* +land *otherwise possessed*(land held by the household but neither owned nor leased in, as in encroached land). - land *leased out* ).

<b>Statement 5.11: Percentage distribution of area of land possessed by type of land use</b>							
period	percentage distribution of area of land by type of land use						
	crop production on jhum land	crop production on land other than jhum land	farming of animal/ fishery	crop production and farming of animal/ fishery	other agricultural uses	other uses (non-agricultural uses)	all (incl nr)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Jul'12-Dec'12	1.81	89.08	0.88	3.81	1.59	2.83	100
Jan'13-Jun'13	0.91	75.82	1.35	2.35	5.70	13.85	100
<i>Ref: Table 23 of Appendix A</i>							

5.9.2 The land use pattern shows that the highest percentage of area is used for *crop production on land other than jhum land*, with 89.08% area during Jul'12 - Dec'12 and 75.82% area during Jan'13 - Jun'13; and lowest for *farming of animal/ fishery* (0.88%) during Jul'12 - Dec'12 and

crop production on *jhum* land (0.91%) during Jan'13 - Jun'13. The *crop production on jhum land* accounted for 1.81% area during Jul'12 - Dec'12 and 0.91% of area during Jan'13 - Jun'13. Land used under *other uses (non-agricultural uses)*, which showed 2.83% of total operated during Jul'12 - Dec'12, increased considerably during Jan'13 - Jun'13 to 13.85%. The above is diagrammatically represented in Fig 5.6 for Jul'12-Dec'12 and Fig 5.7 for Jan'13 -Dec'13.

**5.9.3 Area used under different crops:** As apparent from the above statement, crop production accounts for the highest percentage of land used for agricultural purpose. As such, it may be interesting to observe the distribution of area under different types of crops. Statement 5.12 gives the percentage distribution of area of land by type of crop production and livestock farming,

during 2012-13. It can be seen from Statement 5.12 that the highest percentage of area was used for growing *cereals*, followed by *other crops* during both the periods Jul'12 - Dec'12 and Jan'13

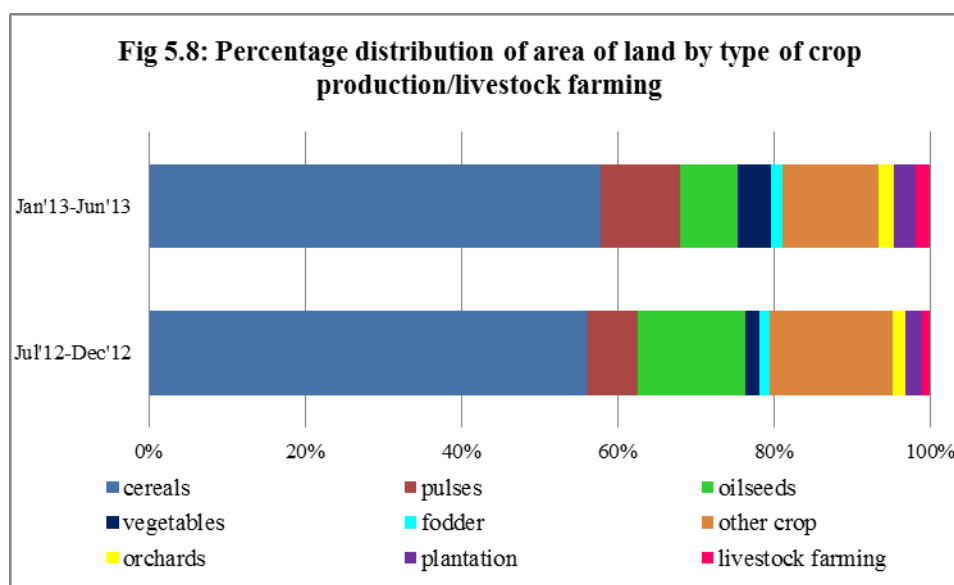

**Statement 5.12 : Percentage distribution of area of land by type of crop production and livestock farming**

Crop type/animal farming	percentage of land use		aggregate area (mha) of land used	
	Jul'12-Dec'12	Jan'13-Jun'13	Jul'12-Dec'12	Jan'13-Jun'13
(1)	(2)	(3)	(4)	(5)
cereals	56.21	57.74	50.559	40.097
pulses	6.30	10.20	5.666	7.082
oilseeds	13.75	7.34	12.365	5.096
vegetables	1.85	4.25	1.664	2.952
fodder	1.34	1.51	1.203	1.051
other crop	15.76	12.32	14.176	8.558
orchards	1.60	1.95	1.443	1.352
plantation	2.13	2.81	1.913	1.952
livestock farming	0.99	1.81	0.891	1.257
<b>all (incl n.r)</b>	<b>100</b>	<b>100</b>	<b>89.950</b>	<b>69.446</b>

Ref : Table 24 of Appendix A

- Jun'13. Area under *oilseeds* covers 13.75% of land during Jul'12-Dec'12, which became almost half during Jan'13-Jun'13. Aggregate area used for crop production/livestock farming is 20% more during Jul'12 - Dec'12 as

compared to Jan'13-Jun'13. The percentage shares of area used for *oilseeds* and *other crop* was substantially higher during Jul'12-Dec'12 than Jan'13-Jun'13. However, the percentage of land used for growing pulses, during Jul'12-Dec'12(6.30%) was lower than that of Jan'13-Jun'13(10.20%). The percentage share of land used for growing vegetables increased more than twice during Jan'13-Jun'13(4.25%) as compared to Jul'12-Dec'12(1.85%). Fig 5.8 gives the percentage distribution of area of land by type of crop production/livestock farming, during 2012-13.

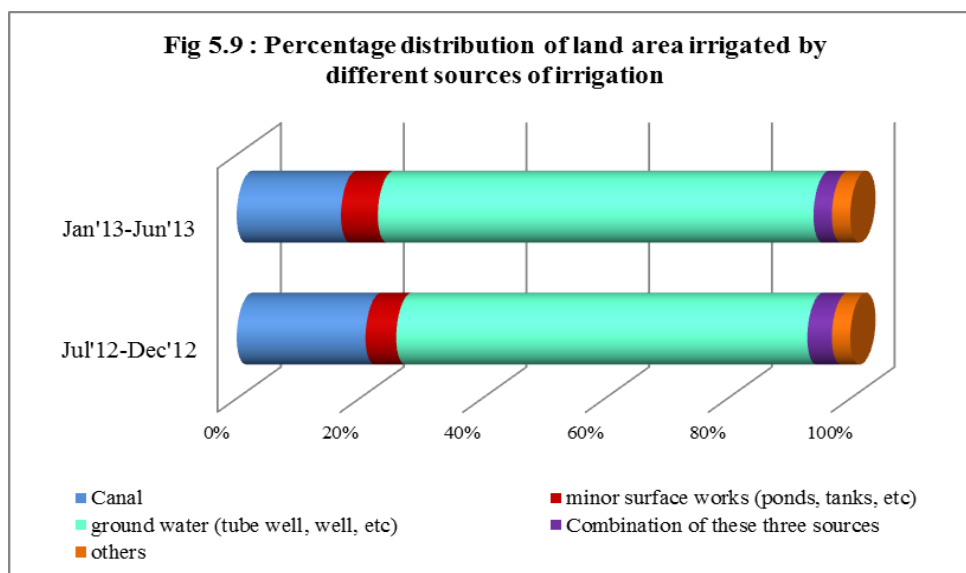

## 5.10 Irrigation used for crop production

5.10.1 Irrigation refers to purposefully providing land with water, other than rain, for improving crop production. Uncontrolled land flooding by overflowing of rivers or streams is not considered irrigation. However, when rainwater or uncontrolled overflow from rivers and streams is collected and later used on the land for crop production, it is considered irrigated. A plot will be considered as irrigated if the major part of the plot is irrigated. For an irrigated plot, the corresponding source of irrigation was recorded.

Statement 5.13: Percentage distribution of land area irrigated by different sources of irrigation						
period	Percentage distribution of land area irrigated					
	Canal	minor surface works (ponds, tanks, etc)	ground water (tube well, well, etc)	Combination of these three sources	others	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Jul'12-Dec'12	21	5	67	4	3	100
Jan'13-Jun'13	17	6	71	3	3	100

*Ref : Table 27 of Appendix A*

5.10.2 Statement 5.13 gives the percentage distribution of land area irrigated, by different sources of irrigation during 2013. As seen from the table, *ground water (tube well, well, etc.)* is the major source of irrigation in India (67% during Jul'12- Dec'12 and 71% during Jan'13 – Jun'13), followed by *canal* (21% during Jul'12- Dec'12 and 17% during Jan'13 – Jun'13). These two sources accounts for 88% of the total irrigated land both during Jul'12-Dec'12 and Jan'13-Jun'13. This is pictorially represented below in Fig 5.9 below.

5.10.3 Statement S5.14 gives the irrigated cultivated area as percentage of total cultivated area and household operational holdings using irrigation facilities as a percentage of household operational holdings engaged in crop production, for each major state. It may be mentioned here that 'area under cultivation' excludes area under *orchards* and *plantations*, and as such is smaller than 'area under crop production'. During Jul'12- Dec'12, 49% of area under cultivation was irrigated, which increased to 74% during Jan'13 – Jun'13. At the national level, 59% of the household operational holdings used irrigation facilities during Jul'12- Dec'12, as against 75% during Jan'13 – Jun'13.

**Statement S5.14 : Percentage of irrigated cultivated area and percentage of household operational holdings using irrigation facilities**

State	Jul'12 – Dec'12		Jan'13 – Jun'13	
	percentage of		percentage of	
	irrigated cultivated area	household operational holdings using irrigation facilities	irrigated cultivated area	household operational holdings using irrigation facilities
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	46	68	66	76
Assam	26	27	32	34

<b>all India</b>	<b>49</b>	<b>59</b>	<b>74</b>	<b>75</b>

Ref : Table 27 of Appendix A

5.10.4 As seen from the above, in Punjab almost all the cultivated area was irrigated (99% of total cultivated area was irrigated during both Jul'12- Dec'12 and Jan'13 – Jun'13), followed by Uttar Pradesh(91% during Jul'12- Dec'12 and 96% during Jan'13 – Jun'13), Bihar(91% during Jul'12- Dec'12 and 94% during Jan'13 – Jun'13)and Haryana(87% during Jul'12- Dec'12 and 93% during Jan'13 – Jun'13). The least area irrigated was in Jharkhand (13%) during Jul'12- Dec'12 and Jammu & Kashmir (22%) during Jan'13 – Jun'13.

# STATE TABLES

# Appendix B

**Sample Design and Estimation Procedure**

# SAMPLE DESIGN AND ESTIMATION PROCEDURE

---

## 1. Introduction

1.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods, started its seventieth round from 1<sup>st</sup> January 2013. The survey continued till 31<sup>st</sup> December 2013.

1.2 **Subject Coverage:** The 70<sup>th</sup> round (January 2013 - December 2013) of NSS was earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households. The last survey on these subjects was conducted in 59<sup>th</sup> round of NSS (January 2003 - December 2003).

We describe below the relevant Sample Design and Estimation Procedure for the Survey of Land and Livestock Holdings (Schedule 18.1).

## 2. Outline of Survey Programme

2.1 **Geographical coverage:** The NSS 70<sup>th</sup> round survey on Land and Livestock Holdings covered the whole rural area of the Indian Union.

2.2 **Visits 1 & 2:** Each sample FSU was visited twice during the Land and Livestock Holdings survey of this round. Since the workload of the first visit (i.e. visit 1) was more, the first visit continued till the end of July 2013. Thus, period of the first visit was January – July 2013 and that of the second visit (i.e. visit 2) was August – December 2013.

The listing schedule (sch 0.0) was canvassed only in the first visit. Each sample household was visited twice. Visit 1 and visit 2 schedules were canvassed in the same set of sample households during first and second visit respectively. Contents of the schedules for the two visits were not same since the information relate to two different seasons.

2.3 **Sub-rounds:** The survey period of the round were divided into two sub-rounds. Sub-round one consisted of the first half of the survey period of each visit i.e. 1<sup>st</sup> Jan -15<sup>th</sup> April 2013 for visit 1 and 1<sup>st</sup> August – 15<sup>th</sup> October 2013 for visit 2 while sub-round two consisted of the remaining period of the respective visits. Thus, each sub-round was of three and a half months duration for visit 1 and two and a half months for visit 2.

In each of these two sub-rounds equal number of sample villages were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep and rural areas of Arunachal Pradesh and Nagaland.

The villages visited in the first sub-round of first visit were revisited during the first sub-round of the second visit. Similarly, villages of sub-round 2 of visit 1 were revisited in sub-round 2 of visit 2.

**2.4 Schedules of enquiry:** During this round, the following schedules of enquiry were canvassed:

- Schedule 0.0 : list of households
- Schedule 18.1 : land and livestock holdings (rural only)
- Schedule 18.2 : debt and investment
- Schedule 33 : situation assessment survey of agricultural households (rural only)

### 3. Sample Design

**3.1 Outline of sample design:** A stratified multi-stage design was adopted for the 70<sup>th</sup> round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector. The ultimate stage units (USU) were households. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs) from each rural FSU.

**3.2 Sampling Frame for First Stage Units:** *For the rural sector*, the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the term ‘village’ would mean Panchayat wards for Kerala) constituted the sampling frame.

#### 3.3 Stratification:

(a) Stratum had been formed at district level. Within each district of a State/ UT a rural stratum comprising of all rural areas of the district was formed.

(b) However, a special stratum in the rural sector only was formed at State/UT level before district- strata were formed in case of each of the following 20 States/UTs: Andaman & Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Delhi, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Lakshadweep, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. This stratum comprised all the villages of the State with population less than 50 as per census 2001.

(c) In case of rural sectors of Nagaland one special stratum was formed within the State consisting of all the interior and inaccessible villages. Similarly, for Andaman & Nicobar Islands, one more special stratum had been formed within the UT consisting of all inaccessible villages. Thus for Andaman & Nicobar Islands, two special strata had been formed at the UT level:

- (i) special stratum 1 comprising all the interior and inaccessible villages
- (ii) special stratum 2 containing all the villages, other than those in special stratum 1, having population less than 50 as per census 2001.

### 3.4 Sub-stratification:

**Rural sector:** Different sub-stratifications were done for ‘hilly’ States and other States. Ten (10) States were considered as hilly States. They were: Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Sikkim, Meghalaya, Tripura, Mizoram, Manipur, Nagaland and Arunachal Pradesh.

(a) sub-stratification for hilly States: If ‘r’ be the sample size allocated for a rural stratum, the number of sub-strata formed was ‘r/2’. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to ‘r/2’ was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

(b) sub-stratification for other States (non-hilly States except Kerala): The villages within a district as per frame were first arranged in ascending order of *proportion of irrigated area in the cultivated area of the village*. Then sub-strata 1 to ‘r/2’ was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal *cultivated area*. The information on irrigated area and cultivated area was obtained from the village directory of census 2001.

(c) sub-stratification for Kerala: Although Kerala is a non-hilly State but because of non-availability of information on irrigation at FSU (Panchayat Ward) level, sub-stratification by proportion of irrigated area was not possible. Hence the procedure for sub-stratification was same as that of hilly States in case of Kerala.

**Urban sector:** There was no sub-stratification for the strata of million plus cities. For other strata, each district was divided into 2 sub-strata as follows:

sub-stratum 1: all towns of the district with population less than 50000 as per census 2011

sub-stratum 2: remaining non-million plus towns of the district

**3.5 Total sample size (FSUs):** 8042 FSUs (4534 in rural and 3508 in urban) were allocated for the central sample at all-India level.

**3.6 Allocation of total sample to States and UTs:** The total number of sample FSUs were allocated to the States and UTs in proportion to population as per census 2011 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators as well as comparability with previous round of survey on the same subjects was also kept in view.

**3.7 Allocation of State/ UT level sample to rural and urban sectors:** State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2011* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) was allocated to each state/ UT.

**3.8 Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per census 2011. Allocations at stratum level were adjusted to multiples of 2 with a minimum sample size of 2.

For special stratum formed in the rural areas of 20 States/UTs, as discussed in para 3.3 (b), 2 FSUs were allocated to each.

For special stratum 1 in the rural areas of Nagaland and Andaman & Nicobar Islands, 4 and 2 FSUs were allocated respectively.

### **3.9 Allocation to sub-strata:**

**3.9.1 Rural:** Allocation was 2 for each sub-stratum.

**3.9.2 Urban:** Stratum allocations were distributed among the two sub-strata in proportion to the number of FSUs in the sub-strata. Minimum allocation for each sub-stratum was 2.

### **3.10 Selection of FSUs:**

For the rural sector, from each stratum x sub-stratum, required number of sample villages were selected by Simple Random Sampling Without Replacement (SRSWOR) procedure.

For the urban sector, FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR) from each stratum x sub-stratum.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples were allocated among the two sub rounds.

**3.11 Formation and selection of hamlet-groups/ sub-blocks:** In case hamlet-groups/ sub-blocks were formed in the sample FSU, the same was done by more or less equalizing population. While doing so, it was ensured that the hamlet-groups/ sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks were formed in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks.

### **3.12 Formation of second stage strata and allocation of households for Schedule 18.1: Land & Livestock Holdings Survey (LHS) (rural only):**

3.12.1 Four SSS were formed for schedule 18.1 based on four land possessed codes. SSS number was same as the land possessed code.

Each household was given a land possessed code according to the following criteria:

<b>land possessed code</b>	<b>criterion:</b> area of the land possessed by the household as on the date of survey
1	less than 0.005 hectare
2	equal to or more than 0.005 hectare but less than 1.000 hectare
3	equal to or more than 1.000 hectare but less than 2.000 hectares
4	equal to or more than 2.000 hectares

3.12.2 **Allocation and selection of sample households:** The total number of households surveyed in an FSU as below.

Two households were selected from each SSS for schedule 18.1. In case of hamlet group formation, one household was selected from each hg × SSS for schedule 18.1. The number of SSS, allocations and sampling scheme is shown below:

<b>schedule type</b>	<b>number of SSS</b>	<b>number of sample households surveyed (rural)</b>	<b>sampling scheme within each SSS</b>
18.1	4	8 (2 households from each SSS)	SRSWOR

3.12.3 **Selection of households:** From each SSS the sample households for each of the schedules were selected by SRSWOR.

## 4. Estimation Procedure

### 4.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)]

d = subscript for a hamlet-group (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg

D = total number of hg's formed in the sample FSU

D\* = (D – 1) for FSUs with D > 1

N = total number of FSUs in any rural sub-stratum

n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$ ,  $\hat{Y}$  = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols are suppressed in following paragraphs where they are obvious.

## 4.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum × sub-stratum:

### 4.2.1 Schedules 18.1:

#### 4.2.1.1 Rural:

(i) For j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

*Note:* i) Schedules 18.1 were canvassed in rural sector only

ii) Values of j for Sch 18.1 are as follows:

j = 1, 2, 3 or 4;

4.2.1.2 *Estimates in respect of joint operational holdings:* In the case of joint operational holdings operated by the sample household jointly with other household(s), the value of a characteristic of the operational holding is first multiplied by the percentage share of land of the sample household(s) and then the higher estimates are built up.

### 4.3 Overall Estimate for Aggregates for a sub-stratum:

Overall estimate for aggregates for a sub-stratum ( $\hat{Y}_{st}$ ) based on two sub-samples is obtained as:

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

#### 4.4 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum ( $\hat{Y}_s$ ) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

#### 4.5 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

#### 4.6 Estimates of Ratios:

Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) is obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

4.7 **Estimates of Error:** The estimated variances of the above estimates are as follows:

4.7.1 **For aggregate  $\hat{Y}$ :**  $V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s) = \sum_s \sum_t V\hat{a}r(\hat{Y}_{st})$  where  $V\hat{a}r(\hat{Y}_{st})$  is given by

$V\hat{a}r(\hat{Y}_{st}) = \frac{1}{4}(\hat{Y}_{st1} - \hat{Y}_{st2})^2$ , where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

4.7.2 **For ratio  $\hat{R}$ :**

$M\hat{S}E(\hat{R}) = \sum_s \sum_t M\hat{S}E_{st}(\hat{R})$  where  $M\hat{S}E_{st}(\hat{R})$  is given by

$$M\hat{S}E_{st}(\hat{R}) = \frac{1}{4\hat{X}^2} \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

## 4.7.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

## 5. Multipliers:

5(a) Two sets of multipliers are obtained:

- (i) For visit 1 only
- (ii) For visit 2 only

Hence, household multiplier is equal to:

- (i) visit 1 multiplier for all estimation based only on the visit 1 households
- (ii) visit 2 multiplier for all estimation based only on the visit 2 households
- (iii) visit 2 multiplier for generating combined estimates based on the common set of households of visit 1 and visit 2.

5(b) The formulae for multipliers at stratum/sub-stratum/second-stage stratum for a sub-sample and schedule type are given below:

sch type	sector	formula for multipliers	
		hg 1	hg 2
18.1	rural	$\frac{N_{st}}{n_{stmj}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$
		(j = 1, 2, 3, 4)	

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristic,  $D_{stmi}^* = 0$  in the relevant multipliers and there is only one multiplier for the village.
