प्रस्तावना

राष्ट्रीय सांख्यिकीय कार्यालय (एनएसओ) ने भारत के ग्रामीण क्षेत्रों में, एनएसएस के 77वें दौर (जनवरी-दिसम्बर 2019) के दौरान पूछताछ की एकीकृत अनुसूची के साथ "परिवारों की भूमि एवं पशुधन धारिता एवं कृषक परिवारों की स्थिति के आकलन" पर एक सर्वेक्षण किया। इससे पूर्व भूमि एवं पशुधन धारक सर्वेक्षण (एलएचएस) तथा कृषक परिवार स्थिति के निर्धारण का सर्वेक्षण (एसएसएस) अलग-अलग कराये जाते थे। इन दोनों सर्वेक्षणों के एकीकरण से भूमि के उपयोग तथा ग्रामीण परिवारों की कृषि गतिविधियों से संबंधित जानकारीयाँ और भी विस्तृत रूप में प्राप्त होंगी। वर्तमान में एनएसएस 70वें दौर (जनवरी 2013-दिसंबर 2013) और एनएसएस 59 वें दौर (जनवरी 2003-दिसंबर 2003) में ये सर्वेक्षण हुए हैं।

2. इस रिपोर्ट में, जिसका शीर्षक है "ग्रामीण भारत में कृषक परिवारों की स्थिति और परिवारों की भूमि एवं पशुधन धृतियों का मूल्यांकन, 2019", केन्द्रीय प्रतिदर्श आँकड़ें पर आधारित सर्वेक्षण के निष्कर्षों को प्रस्तुत करती है। यह रिपोर्ट कृषक परिवारों की कृषि व्यापार से प्राप्ति और व्यय, गैर-कृषि व्यापार, खेती पर तकनीकी सलाह, ऋणग्रस्तता इत्यादि से संबंधित जानकारीयाँ उपलब्ध कराती है। कृषक परिवार सर्वेक्षण के दिन से 365 दिन पहले की अवधि के दौरान कृषि में स्वरोजगार गतिविधियों के द्वारा कृषि उत्पादन के आधार पर चिन्हित किए गए थे। इसके अलावा यह रिपोर्ट ग्रामीण क्षेत्रों के सभी घरों की घरेलू स्वामित्व वाली संपत्ति, कार्यशील संपत्ति, उपयोगी भूमि तथा पशुधन स्वामित्व से संबंधित जानकारीयाँ भी उपलब्ध कराती है।

3. सर्वेक्षण अभिकल्प एवं अनुसंधान प्रभाग (एसडीआरडी) द्वारा सर्वेक्षण पद्धति और इस रिपोर्ट को तैयार किया गया। सर्वेक्षण का क्षेत्र कार्य, क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया तथा आंकड़ा विधायन एवं सारणीयन कार्य, समंक गुणवत्ता आश्वासन प्रभाग (डीक्यूएडी) द्वारा किया गया है। सर्वेक्षण समन्वय प्रभाग (एससीडी) ने इस सर्वेक्षण से संबंधित विभिन्न कार्यकलापों का समन्वय किया है।

4. मैं एनएसएस के 77वें दौर के कार्यकारी समूह के अध्यक्ष महोदय एवं सदस्यों और राष्ट्रीय सांख्यिकीय आयोग (एनएससी) का सर्वेक्षण के विभिन्न चरणों के दौरान उनके मूल्यवान दिशा-निर्देश हेतु आभार व्यक्त करता हूँ। मैं एनएसओ के विभिन्न प्रभागों के अधिकारियों की भी सराहना करना चाहूँगा जो इस रिपोर्ट की रचना में शामिल थे।

5. मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति निर्माताओं, शिक्षाविदों, एवं शोधकर्ताओं द्वारा उपयोगी पायी जायगी।

नई दिल्ली

(अजय कुमार गुप्त)
महानिदेशक (एनएसएस)

Preface

The National Statistical Office (NSO) carried out a survey on “*Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households*” in the rural areas of India with an integrated schedule of enquiry during 77th round of NSS (January – December 2019). Prior to this, Land and Livestock Holding Surveys (LHS) and Situation Assessment Survey (SAS) of Agricultural Households used to be conducted as separate surveys. The integration of these two surveys will provide wider information base relating to land use and agricultural activities of the rural households. The recent NSS rounds in which these surveys were conducted are NSS 70th round (January 2013 – December 2013) and NSS 59th round (January 2003- December 2003).

This report titled “*Situation Assessment of Agricultural Households and Land and Livestock Holdings of Households in Rural India, 2019*” presents the survey findings based on the Central Sample data. The report provides information on receipt and expenditure of farm business, non-farm business, technical advice on farming, indebtedness, etc., for agricultural households. Agricultural households were identified on the basis of value of agricultural production from self-employment activities in agriculture during the 365 days prior to the date of survey. The report also provides information on household ownership holdings, operational holdings, land use and ownership of livestock for all the households in rural areas.

Survey Design and Research Division (SDRD) of NSO undertook the development of survey methodology and the preparation of this report. The field work of the survey was carried out by the Field Operations Division (FOD), while the data processing and tabulation work was conducted by the Data Quality Assurance Division (DQAD). The Survey Coordination Division (SCD) coordinated various activities pertaining to the survey.

I am highly thankful to the Chairman and Members of the Working Group for NSS 77th round and National Statistical Commission (NSC) for their valuable guidance provided at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this report.

I hope this Report will be found useful by planners, policy makers, academicians and researchers, etc.

New Delhi
September 2021

(Ajay Kumar Gupta)
Director General (NSS)

मुख्य बात

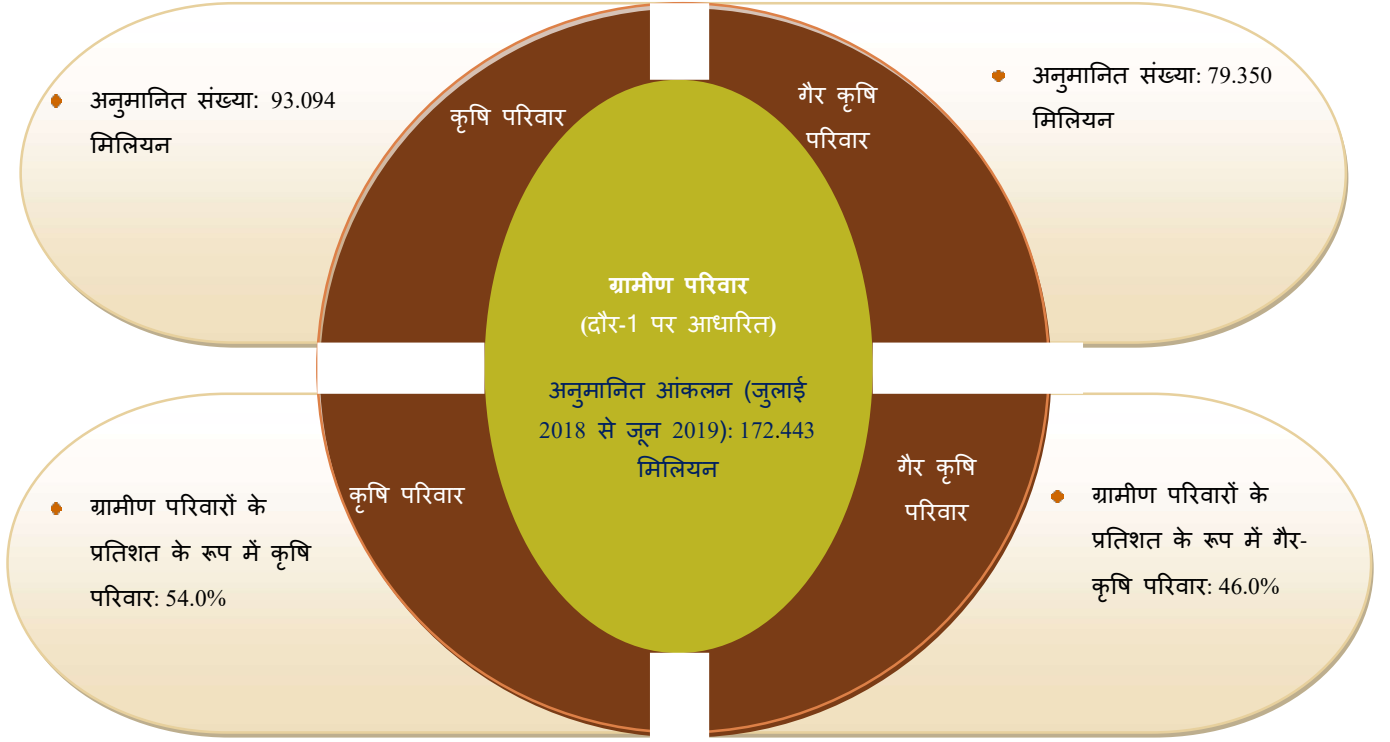

सर्वेक्षण अवधि

- राष्ट्रीय सांख्यिकीय कार्यालय (रासाका) ने एक एकीकृत अनुसूची पर सम्पूर्ण देश के ग्रामीण क्षेत्रों में भूमि एवं पशुधन धारित परिवारों एवं कृषि परिवारों की स्थिति निर्धारण पर एक सर्वेक्षण चलाया ।
- यह सर्वेक्षण जनवरी 2019 से दिसम्बर 2019 के दौरान चलाया गया ।
- कृषि वर्ष 2018-19 के दो दौरों (दौर-1 में जुलाई-दिसम्बर 2018 के सूचना एकत्रित किया गया एवं दौर-2 में जनवरी-जून 2019 के सूचना एकत्रित किया गया) में मूलतः सूचना एकत्रित किया गया एवं दो दौरों में उन्हीं प्रतिदर्श परिवारों से सूचना एकत्रित किया गया।

सर्वेक्षण की व्याप्ति

- ग्रामीण क्षेत्रों में दौर-1 में 58,035 परिवारों को मिलाकर 5,940 प्रथम चरण ईकाईयां सर्वेक्षित की गईं एवं दौर-2 में 56,894 परिवारों को मिलाकर 5,894 प्रथम चरण ईकाईयां सर्वेक्षित की गईं।
- यह सर्वेक्षण पूरे ग्रामीण भारत में फैला था सिवाय अण्डमान एवं निकोबार द्वीप समूह के ग्रामों के जो कि पहुंच के बाहर हैं ।

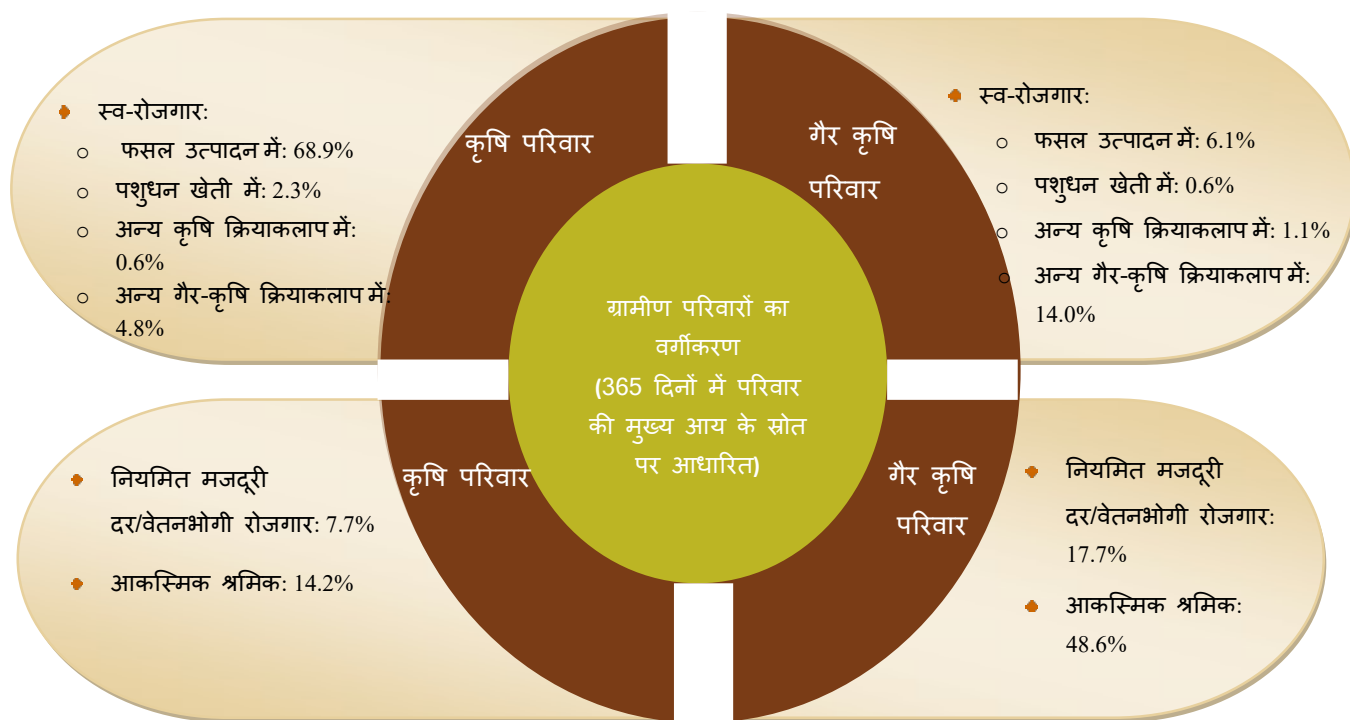

A. ग्रामीण परिवारों की आंकलित संख्या

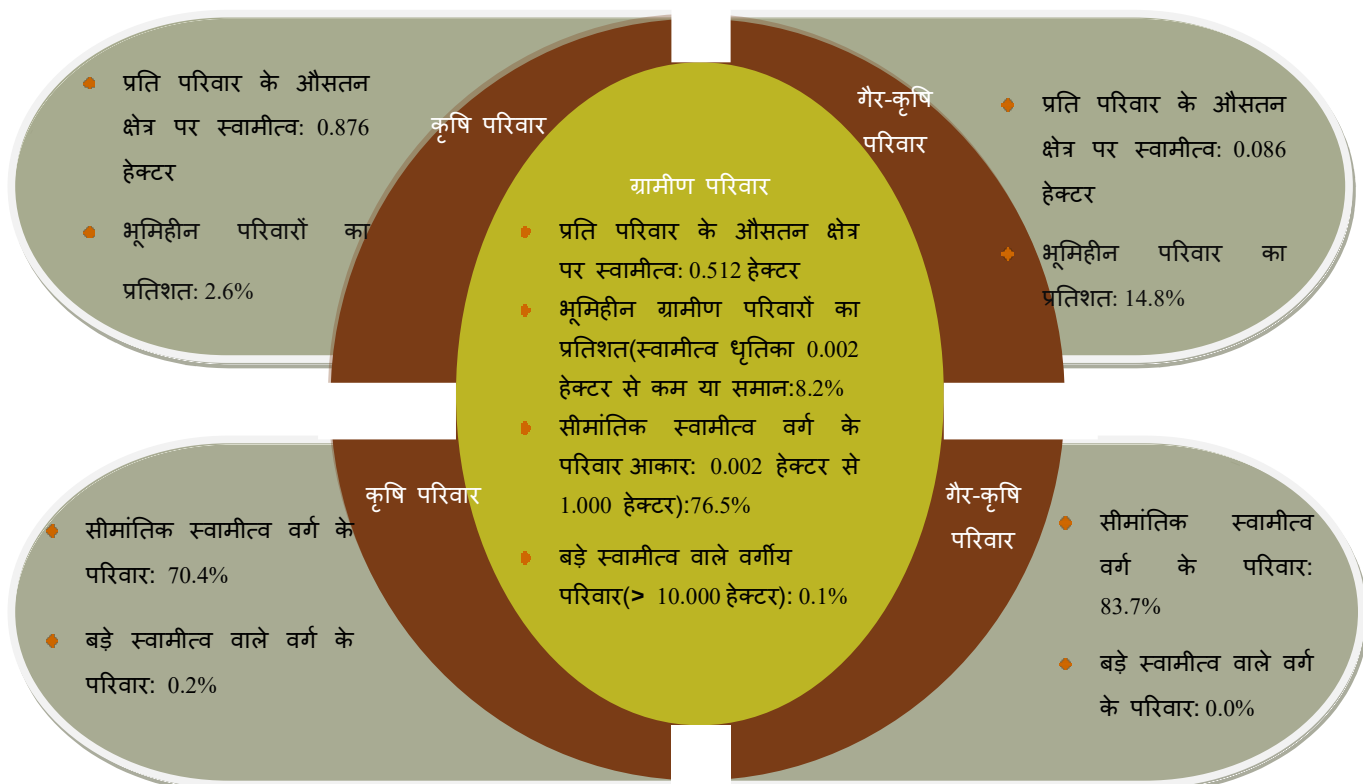

B. ग्रामीण परिवारों द्वारा धारित भूमि

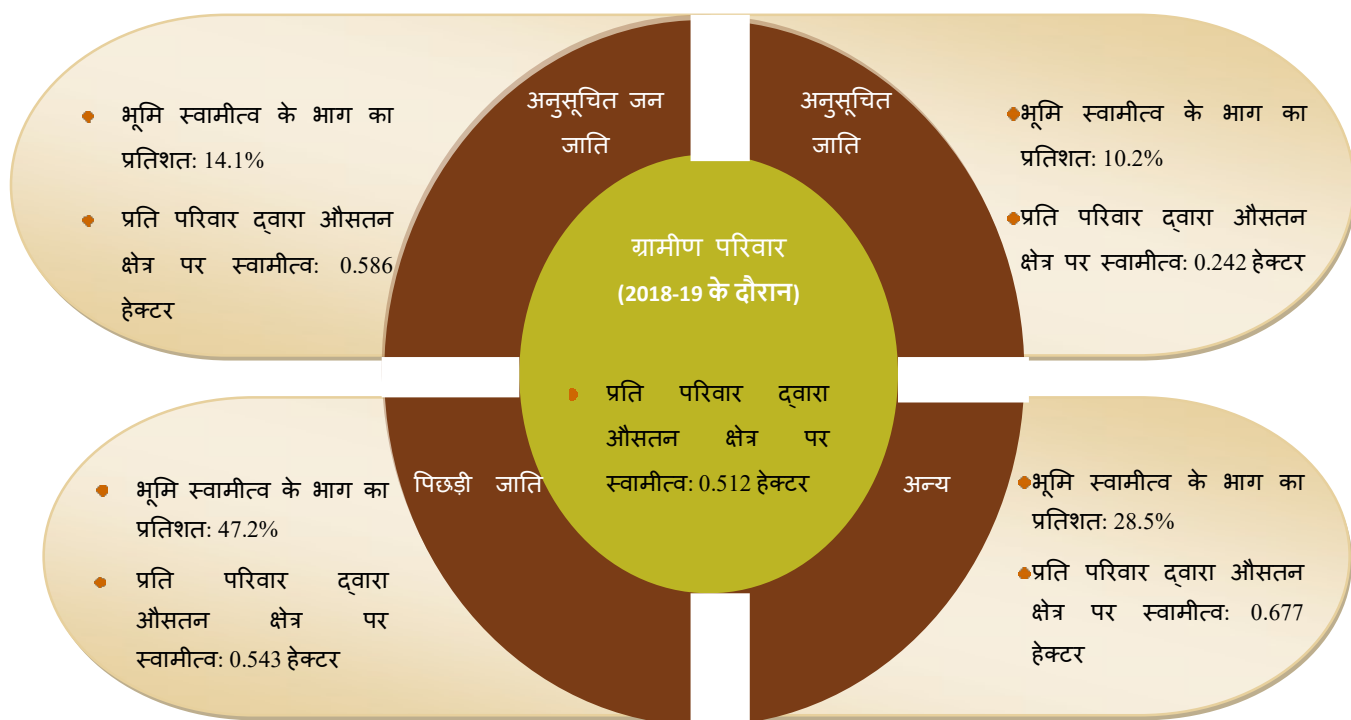

C. परिवार वर्गीकरण

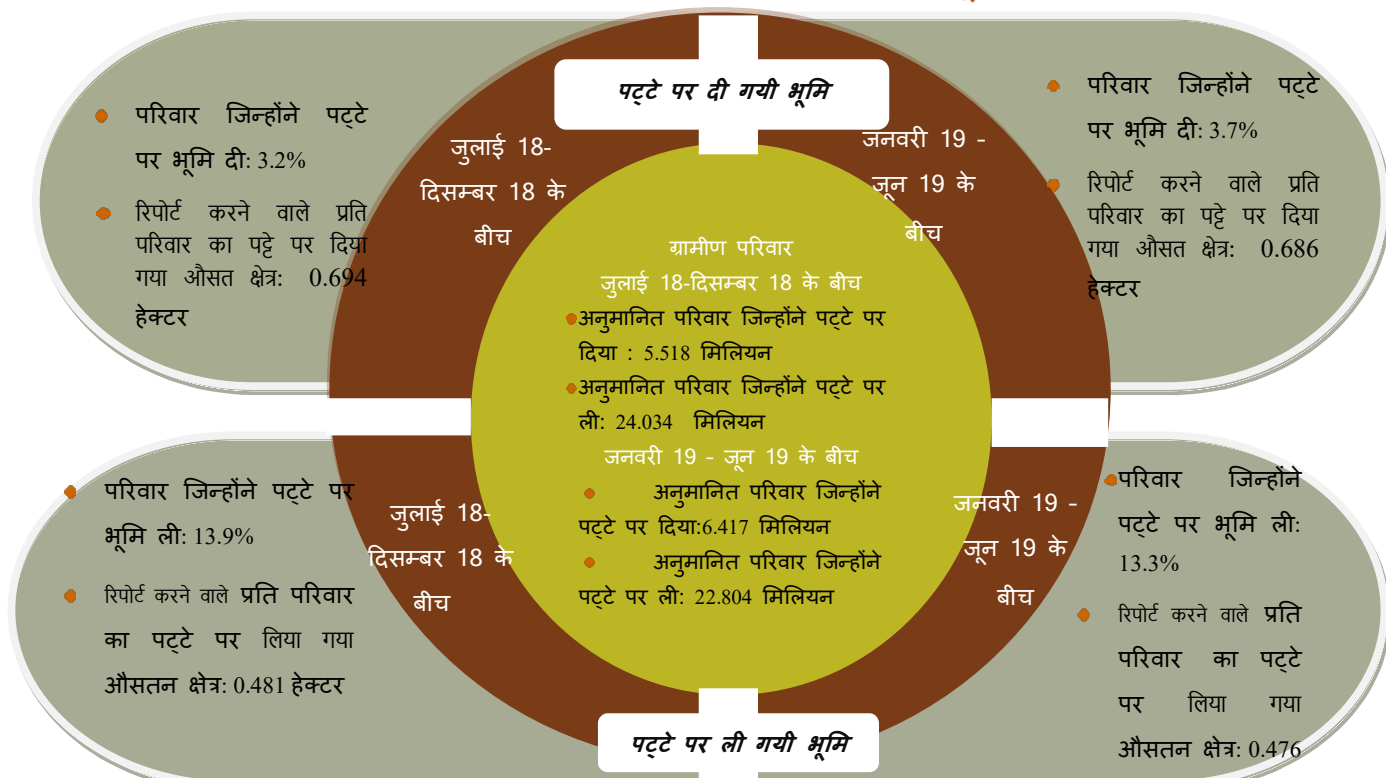

D. 2018-19 के बीच भूमि धृतियों के पारिवारिक स्वामीत्व

E. 2018-19 के बीच सामाजिक वर्ग द्वारा भूमि की धृतियों पर पारिवारिक स्वामीत्व

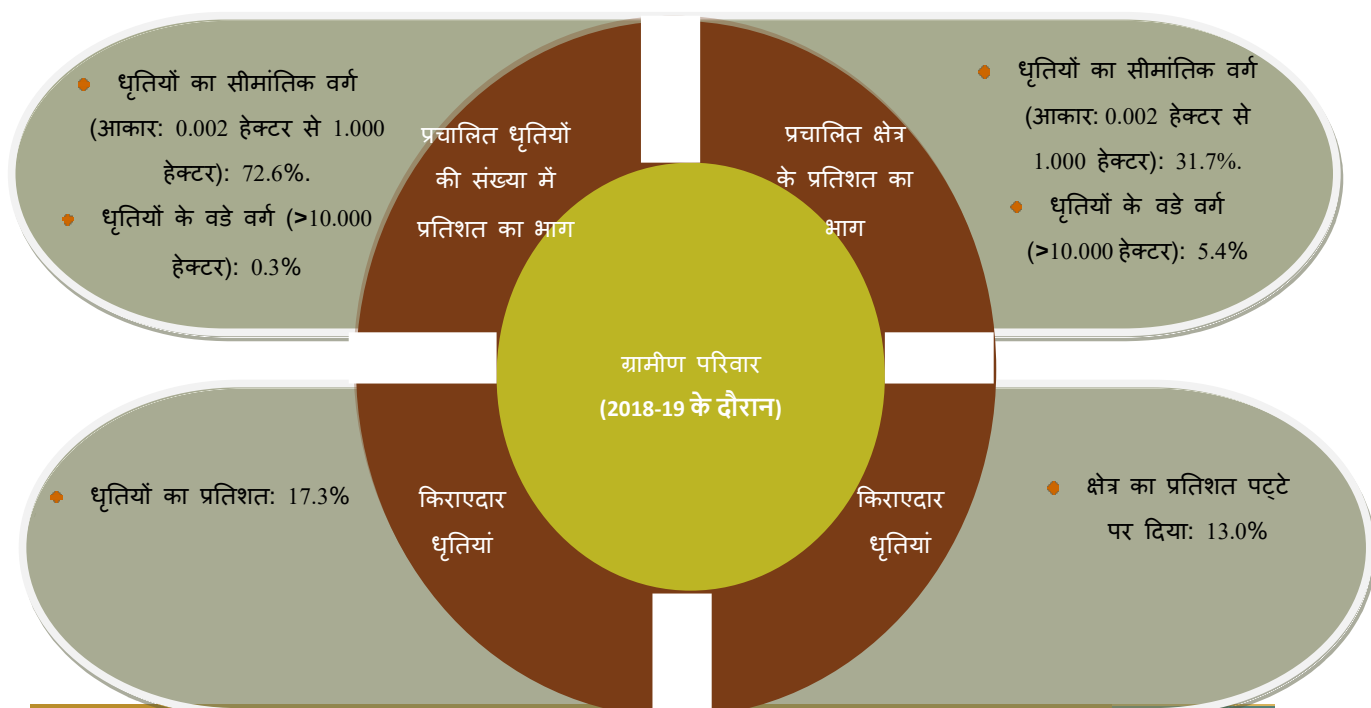

F. पट्टे पर दी गयी एवं पट्टे पर ली गयी भूमि

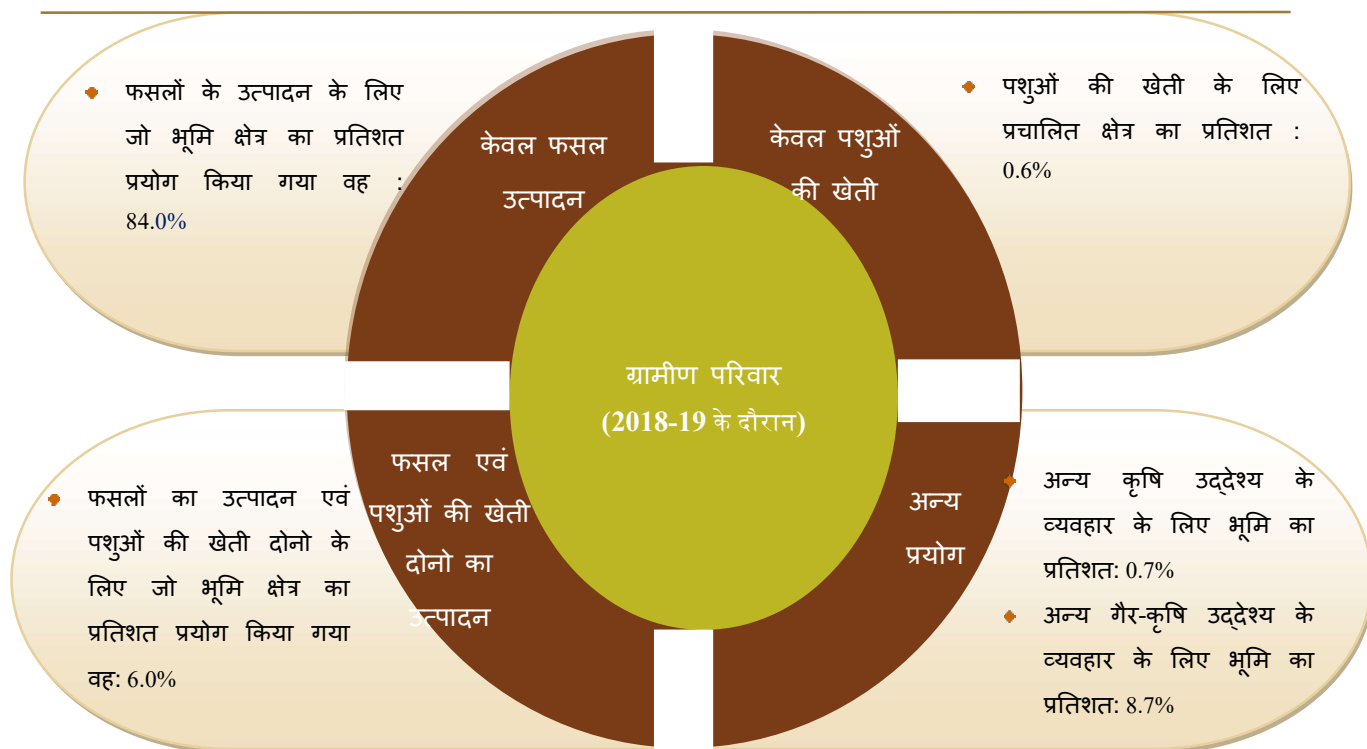

G. 2018-2019 के बीच परिवारों की भूमि का प्रचालन धृतियां

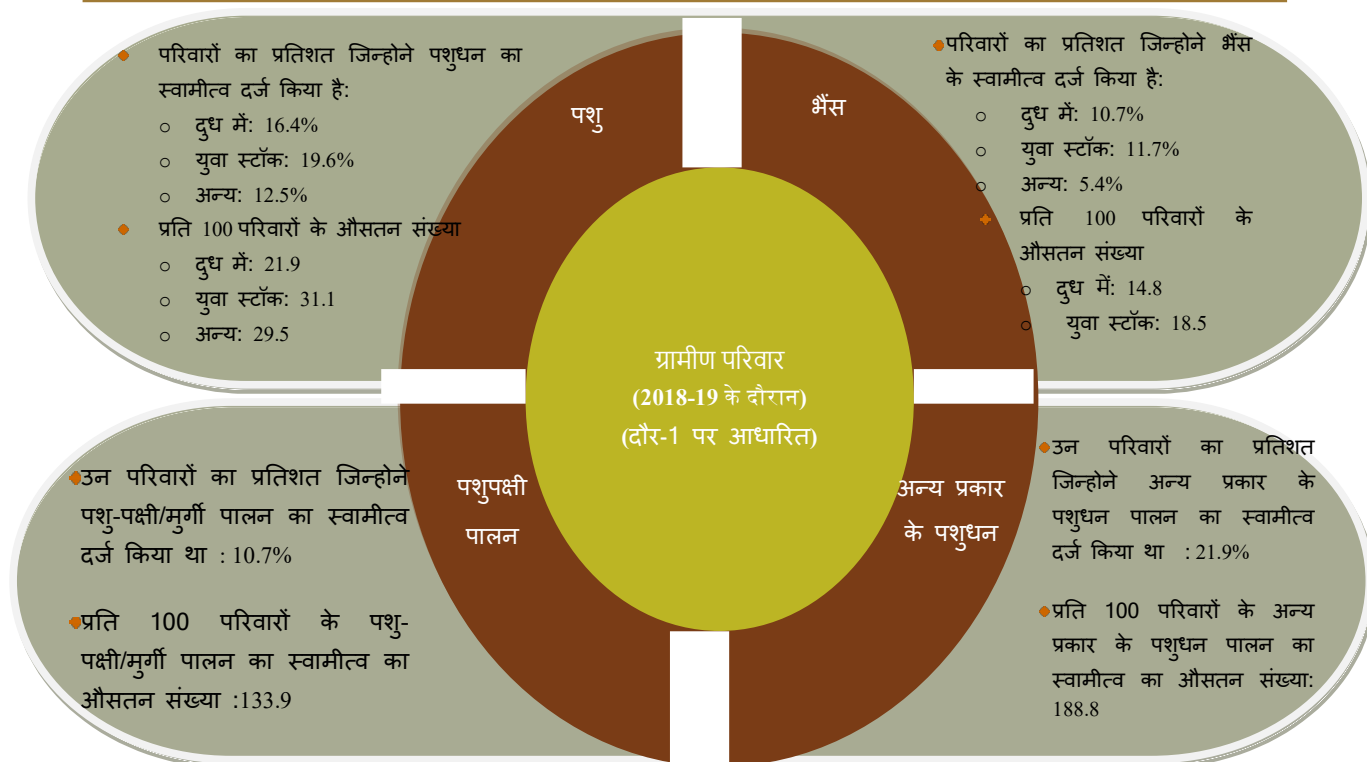

H. 2018-2019 के बीच भूमि की प्रचलात्मक धृतियां

I. 2018-2019 के बीच भूमि की प्रकार के उपयोग पर ग्रामीण परिवारों द्वारा धारित भूमि का वितरण

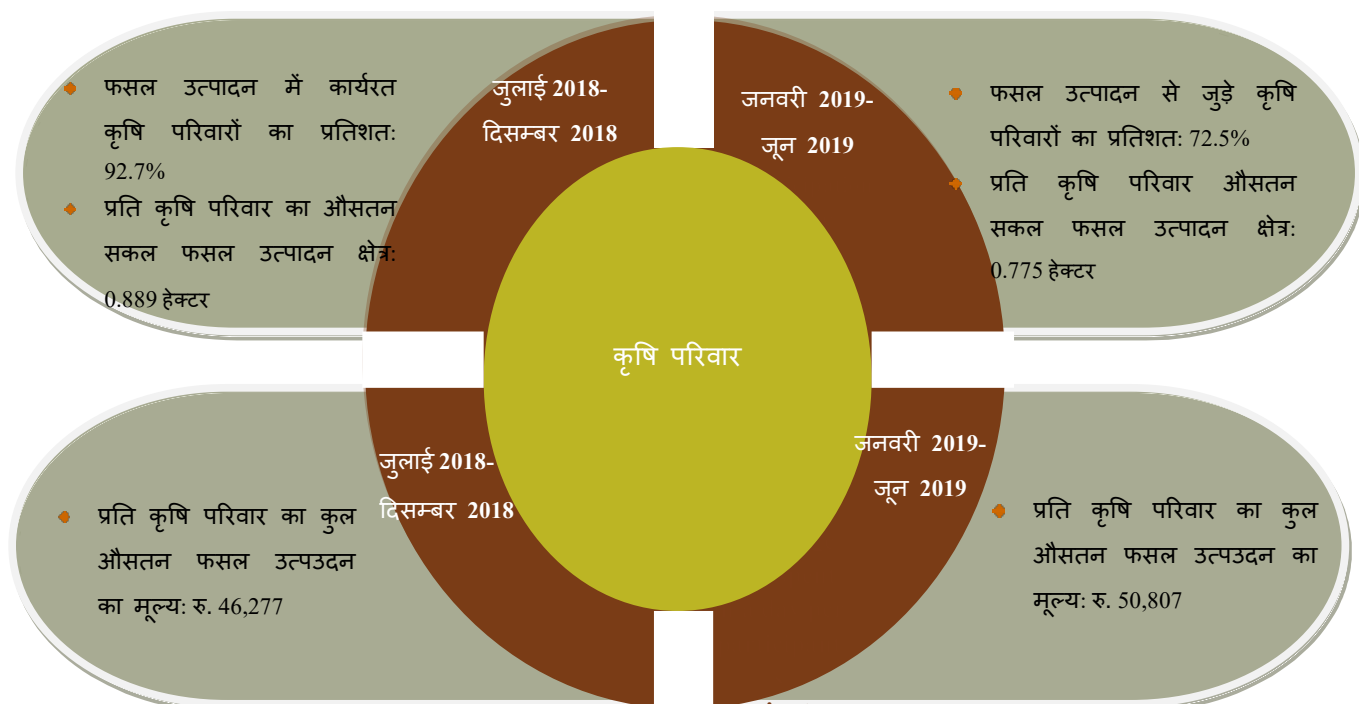

J. पशुधन का स्वामीत्व

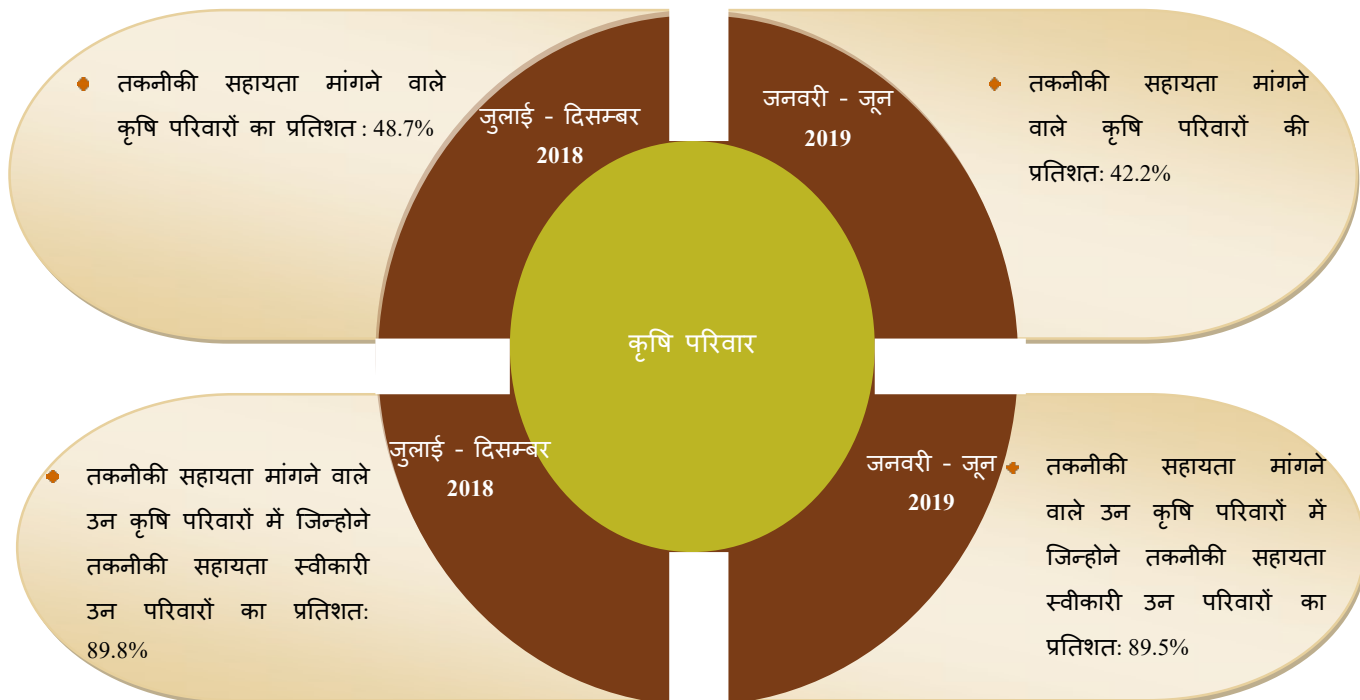

K. विभिन्न सामाजिक वर्गों में कृषि परिवारों का प्रतिशत भाग

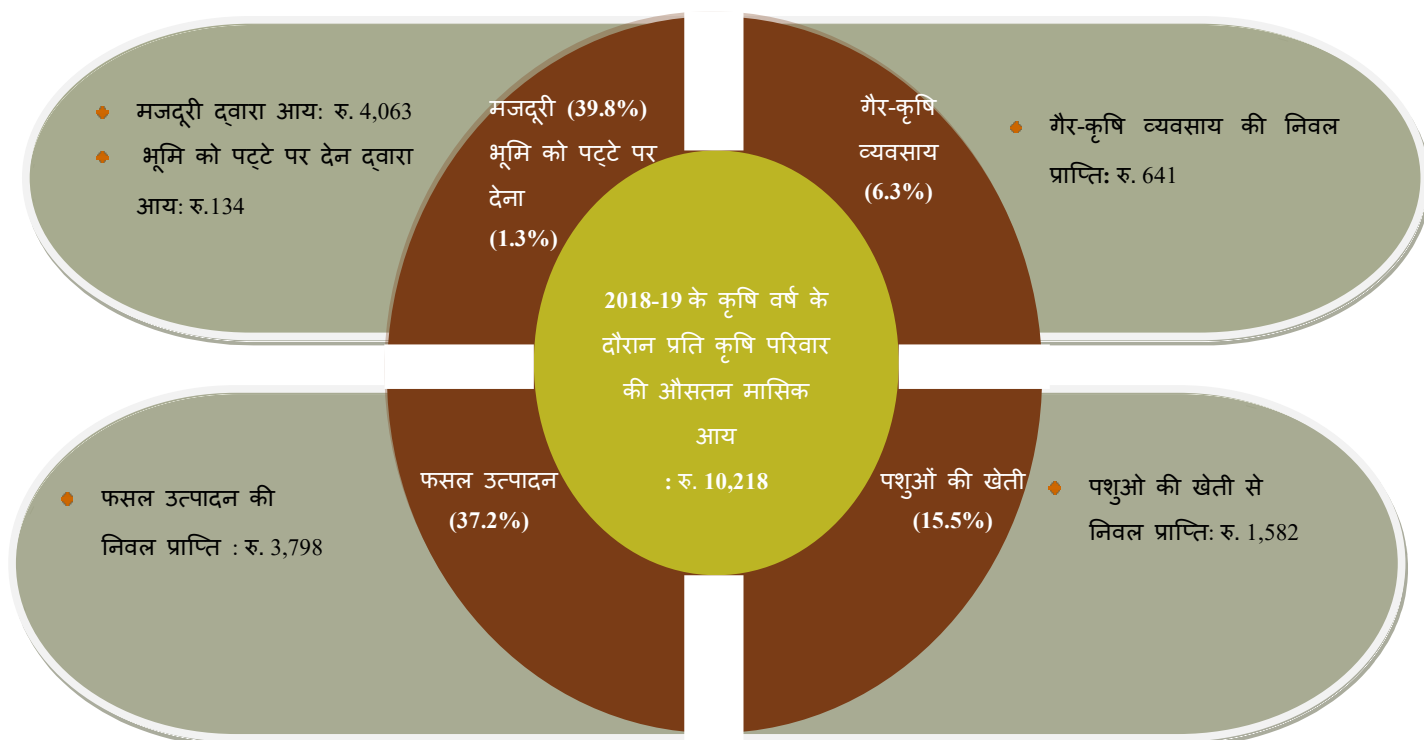

L. फसल उत्पादन से जुड़े कृषि परिवार

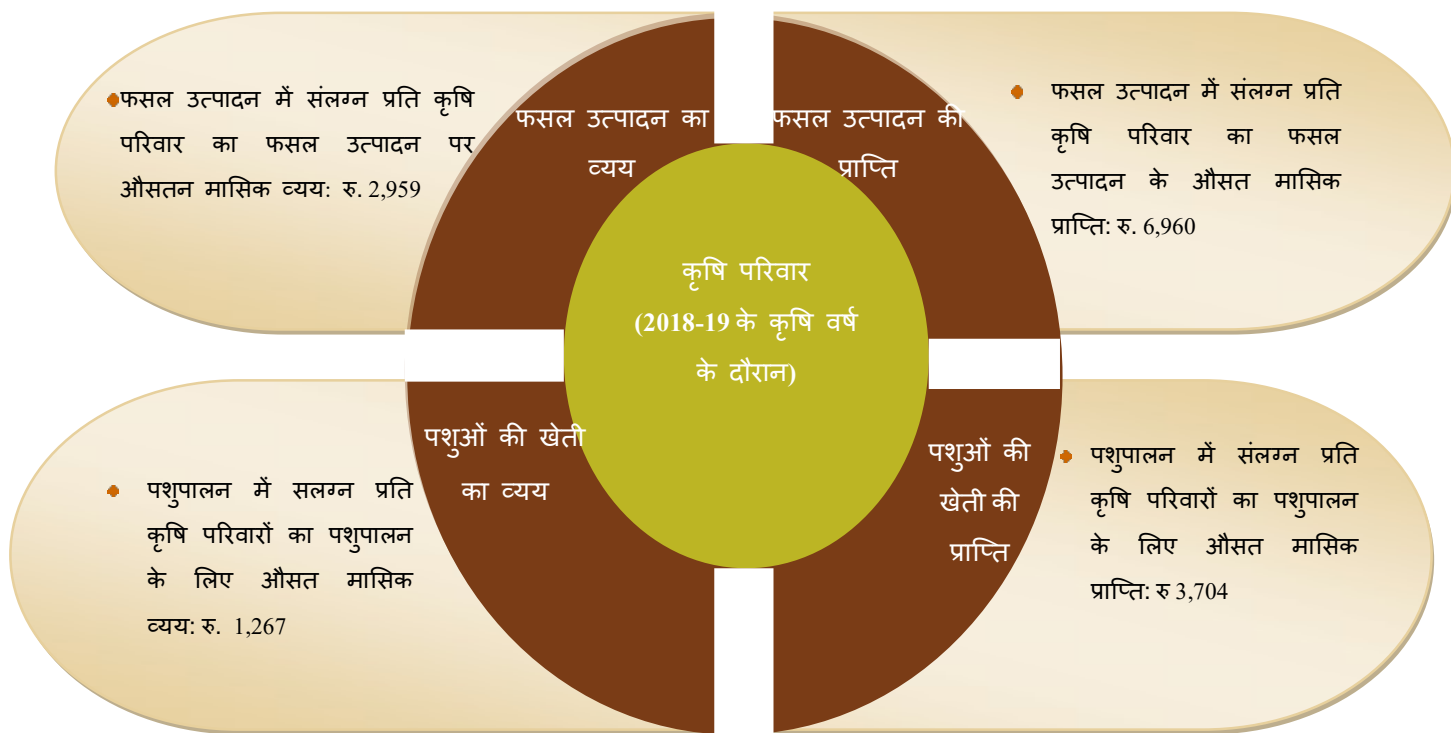

M. कृषि परिवारों द्वारा विभिन्न सुविधाएं/योजनाएं/तकनीकी सहायता मांगने की पहुँच

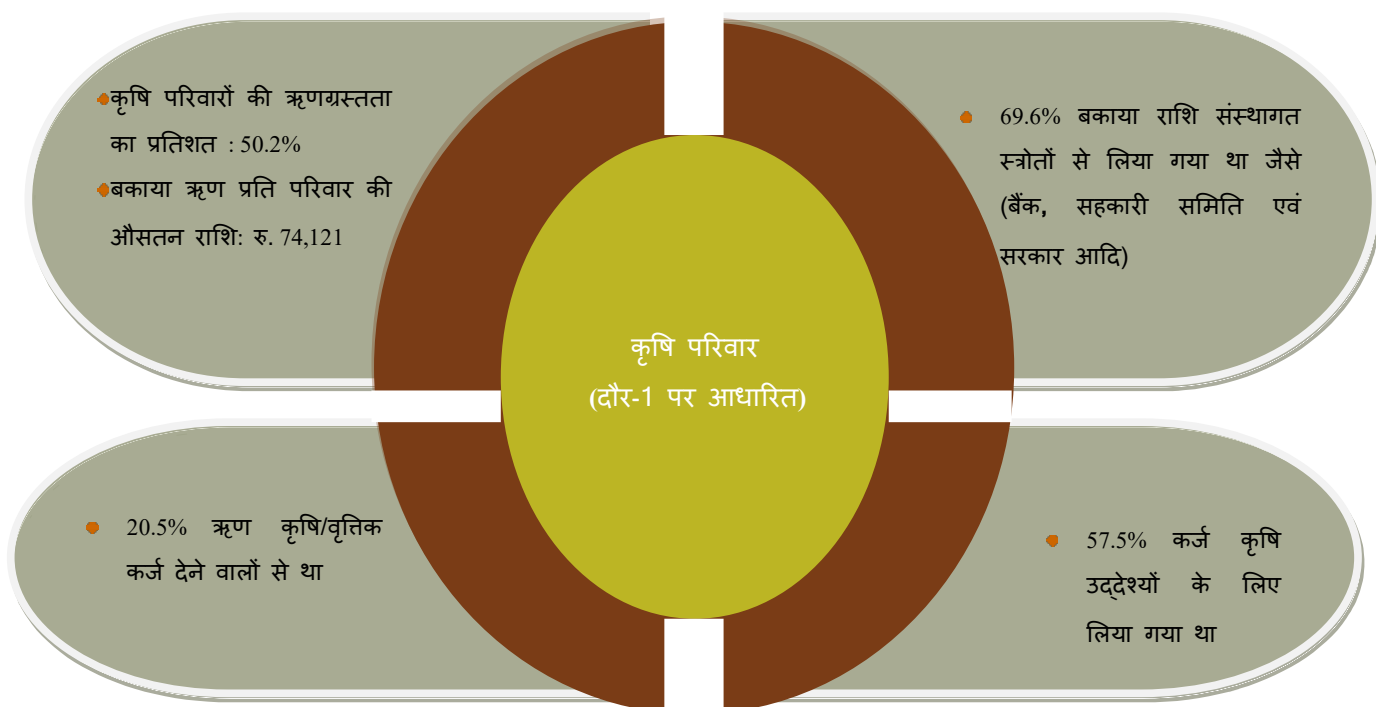

N. प्रति कृषि परिवार की औसतन मासिक आय

O. प्रति कृषि परिवारों की फसल उत्पादन एवं पशुओं की खेती पर मासिक औसतन व्यय एवं प्राप्तियां

P. कृषि परिवारों की ऋणग्रस्तता

HIGHLIGHTS

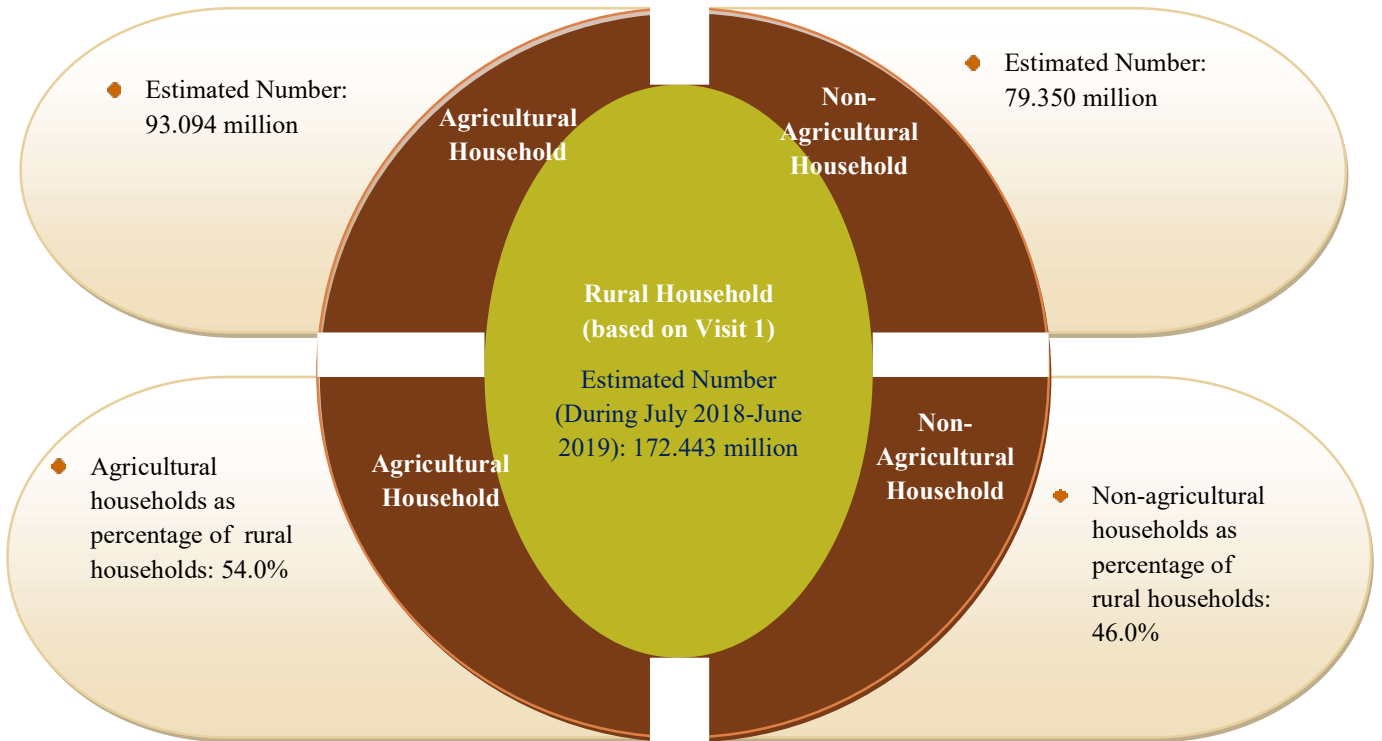

Survey Period

- ✚ The National Statistical Office (NSO) carried out a survey on Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households in the rural areas of the country with an integrated schedule of enquiry.
- ✚ The survey has been conducted during the period January 2019 to December 2019.
- ✚ Information was collected primarily for the agricultural year 2018-19 in two visits (visit-1: information was collected for July-December 2018 and visit-2: information was collected for January-June 2019) and information was collected from the same set of sample households in two visits.

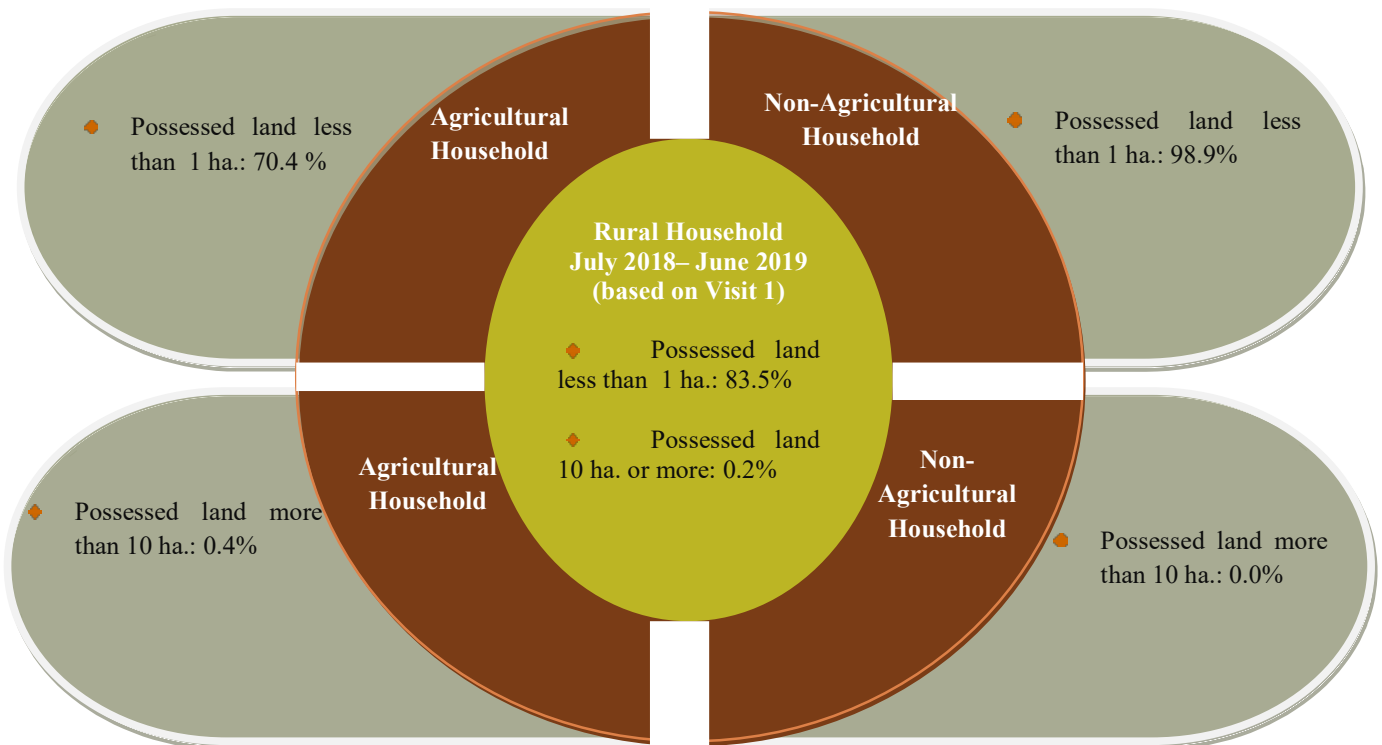

Coverage of Survey

- ✚ In the rural areas, 5,940 first stage units were surveyed in visit-1 covering 58,035 households and 5,894 first stage units were surveyed in visit-2 covering 56,894 households.
- ✚ The survey covered the whole of rural India except the villages in Andaman and Nicobar Islands which are difficult to access.

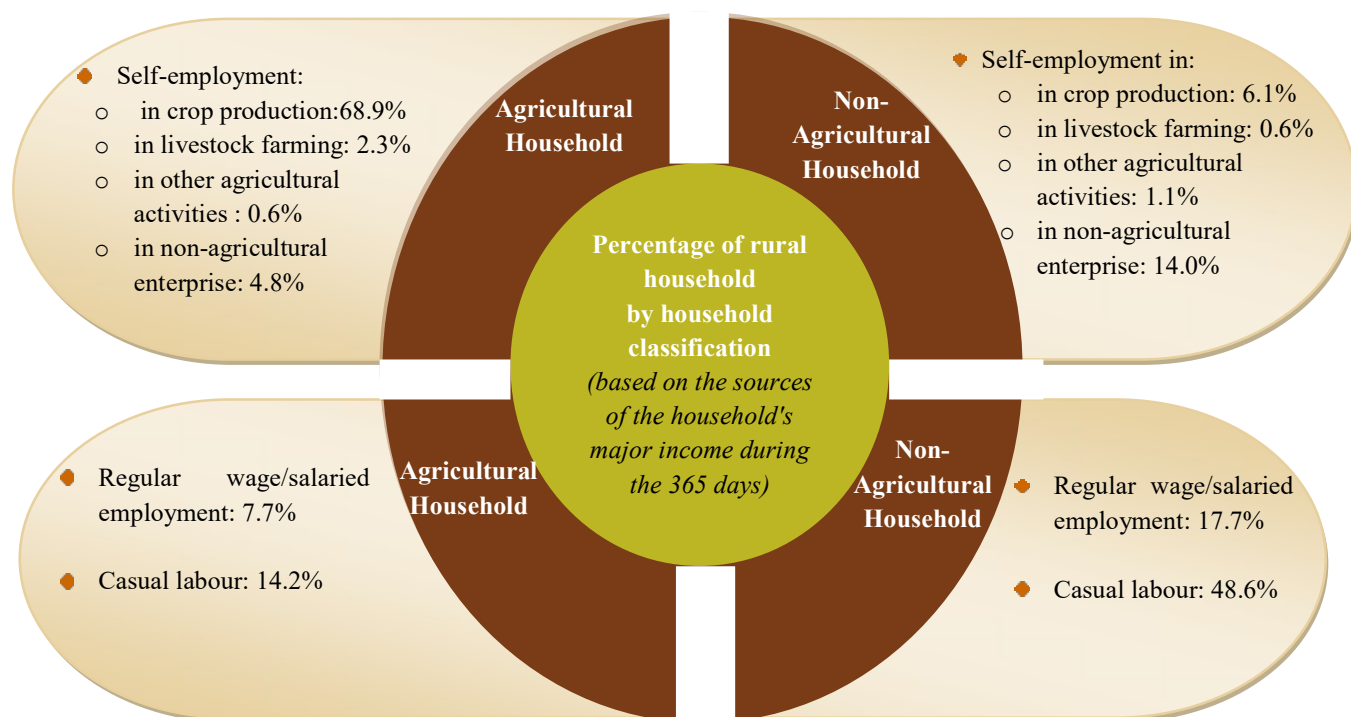

A. Estimated Number of Rural Households

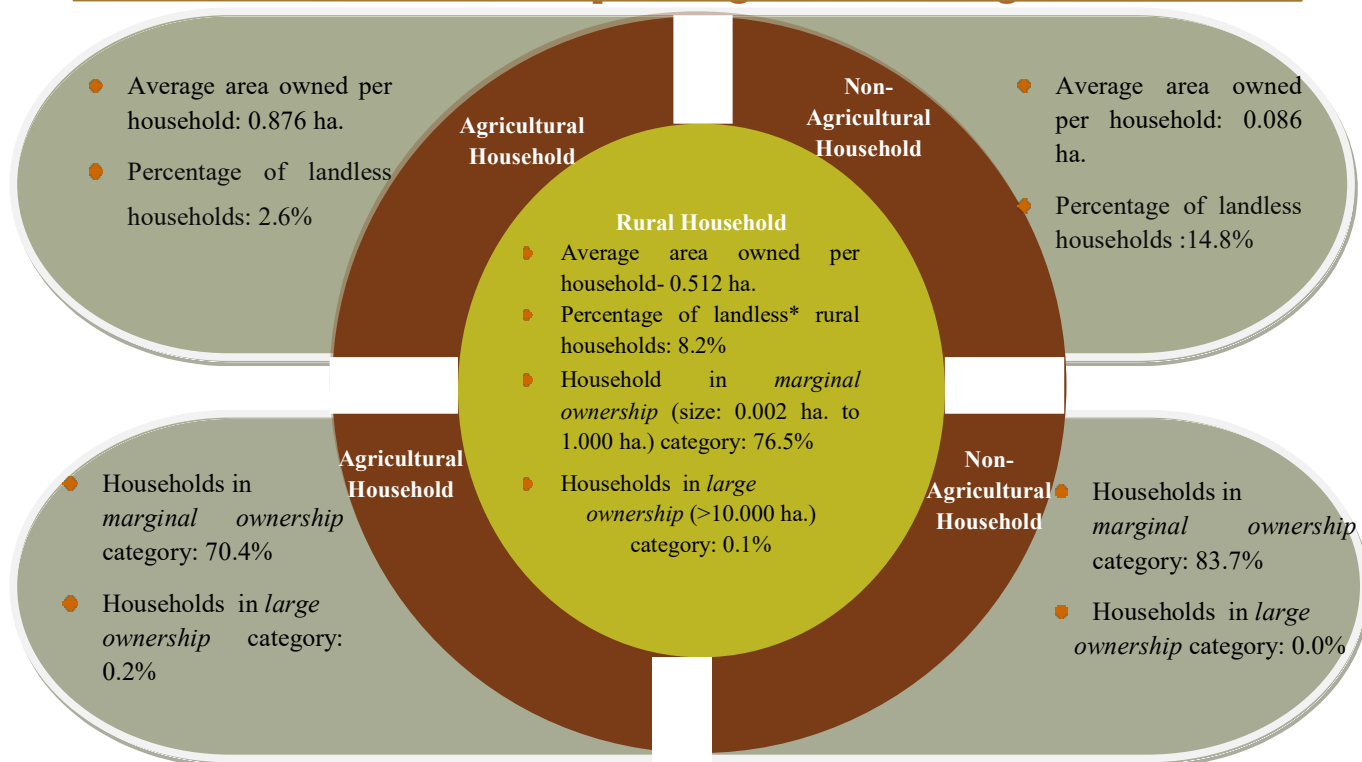

B. Land Possessed by Rural Households

C. Household Classification

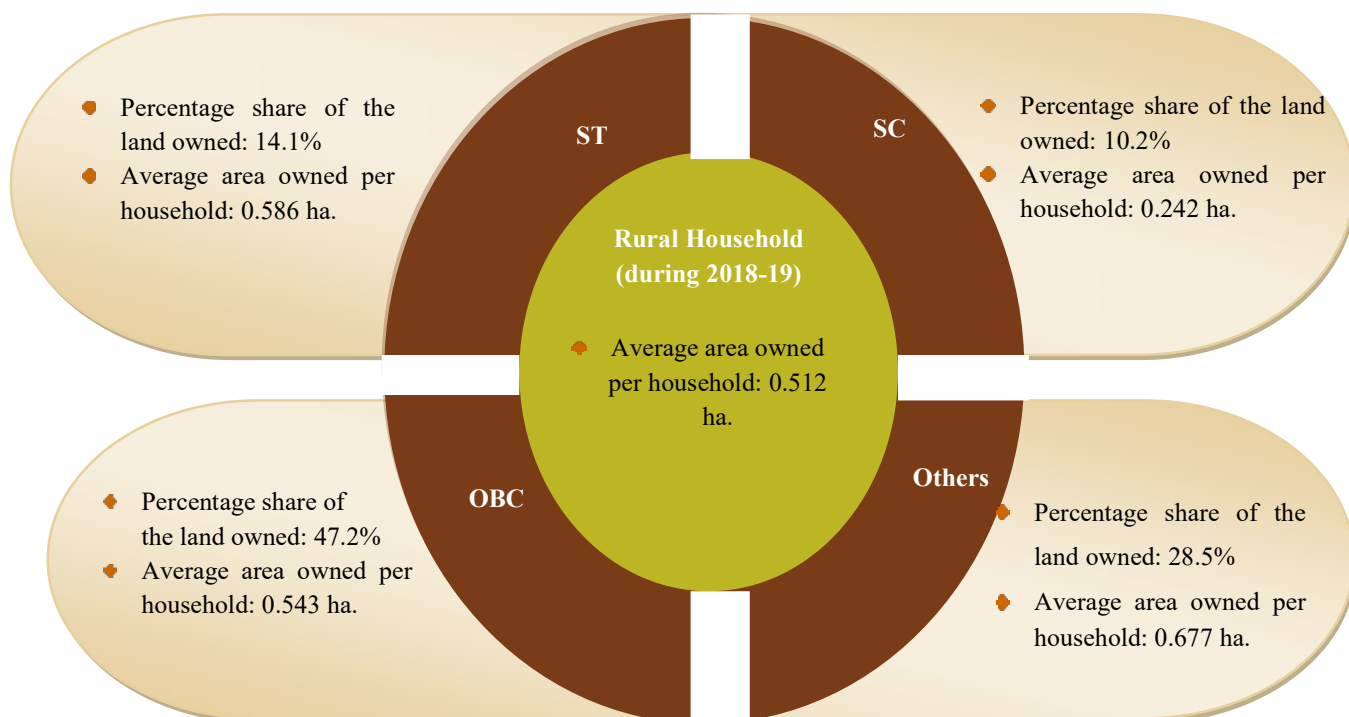

D. Household Ownership Holdings of Land During 2018-19

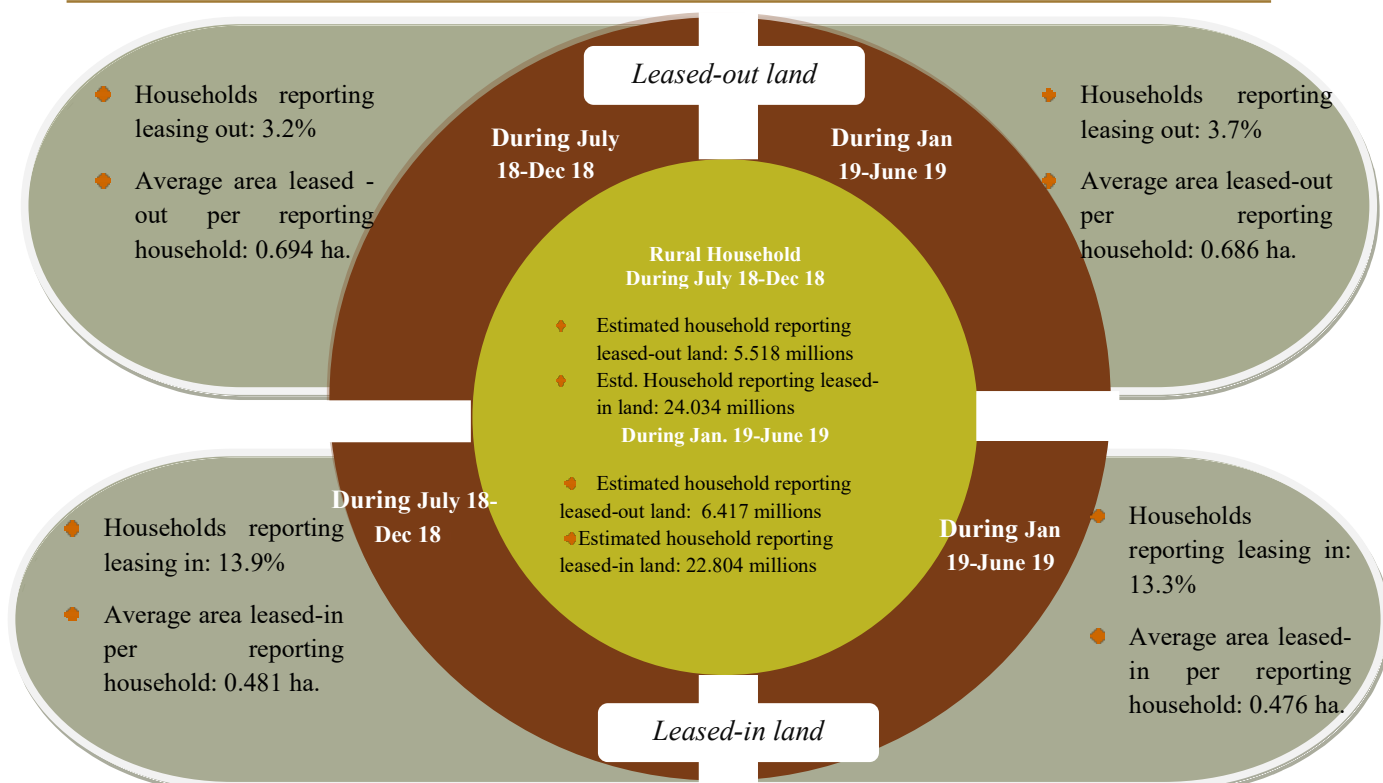

*those with area of ownership holdings 'less than or equal to 0.002 ha. are considered as 'landless'

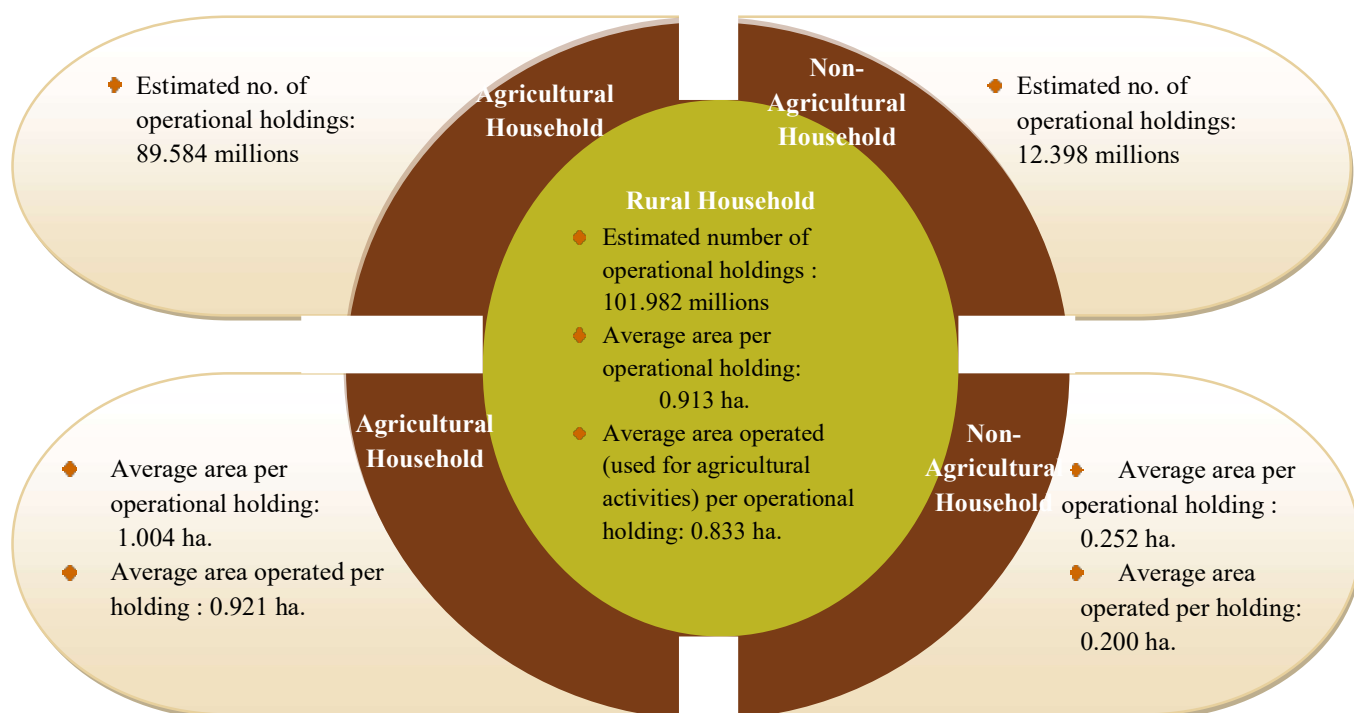

E. Household Ownership Holdings of Land by Social Group During 2018-19

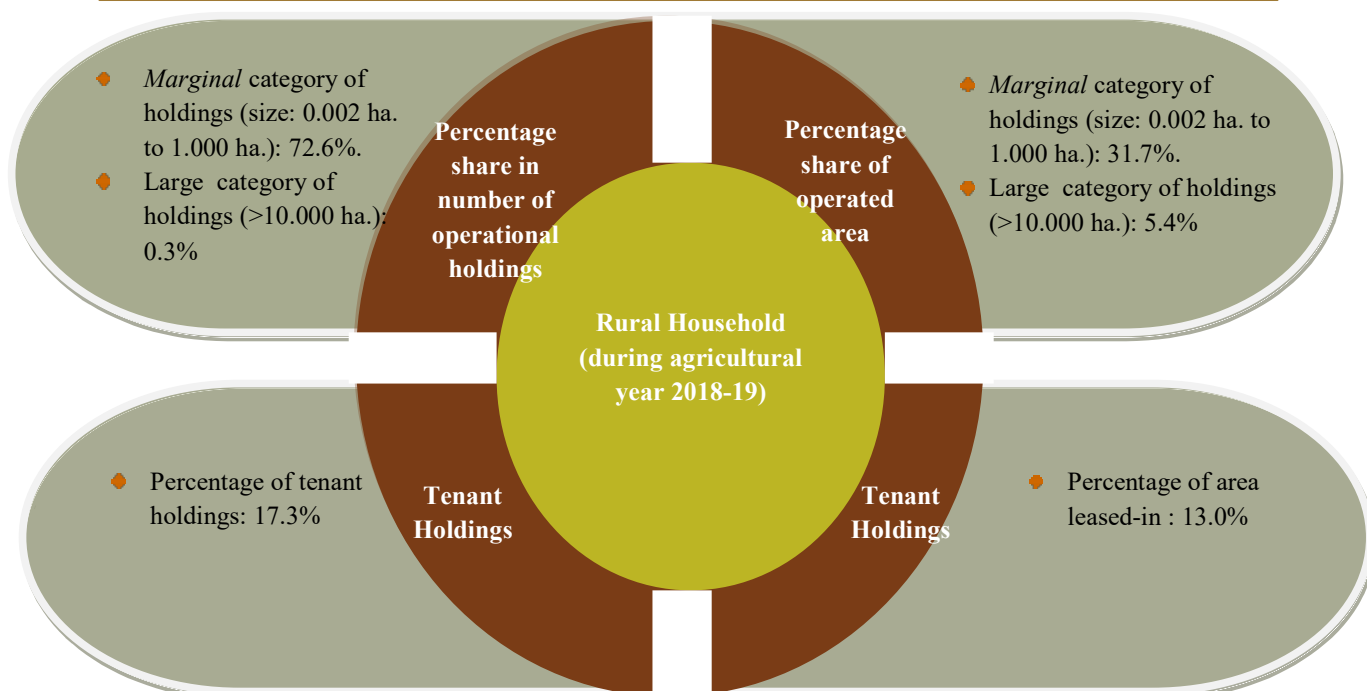

F. Leased-out and Leased-in Land

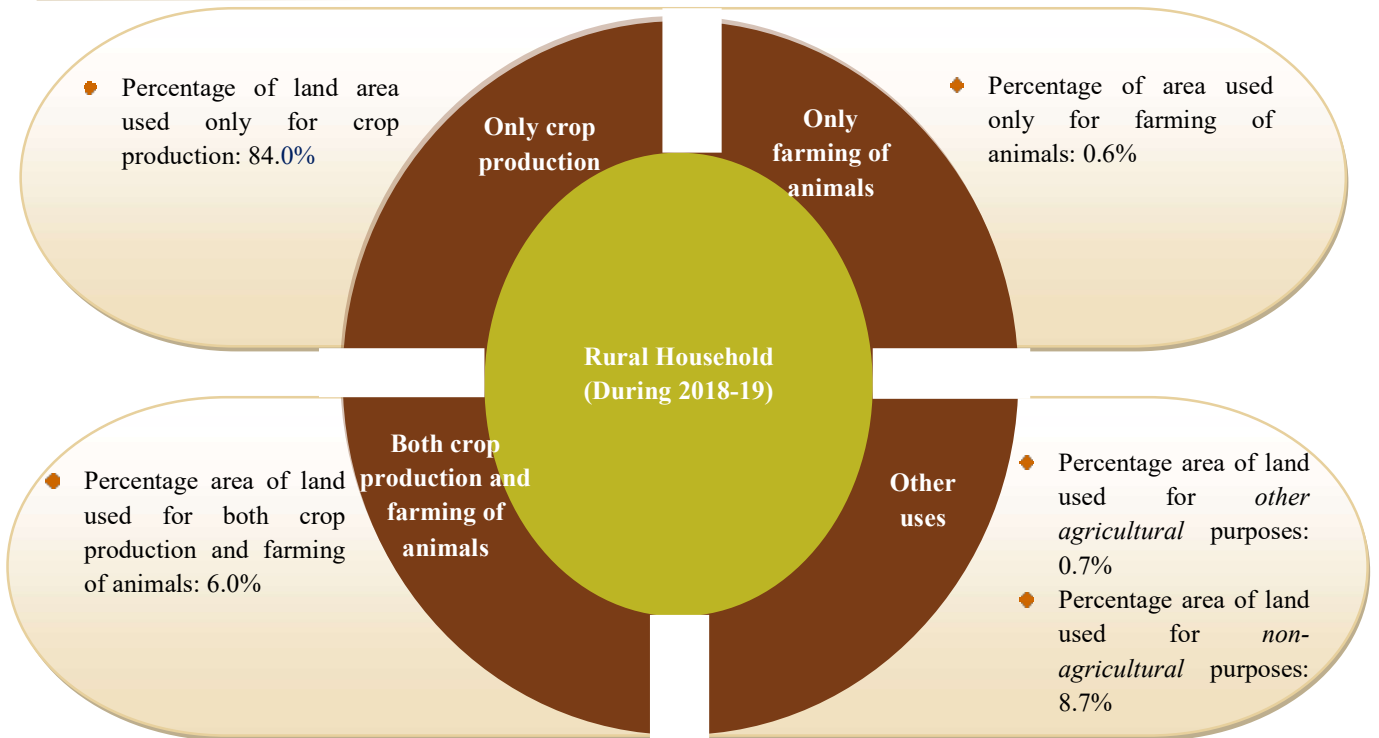

G. Households Operational Holdings of Land During 2018-2019

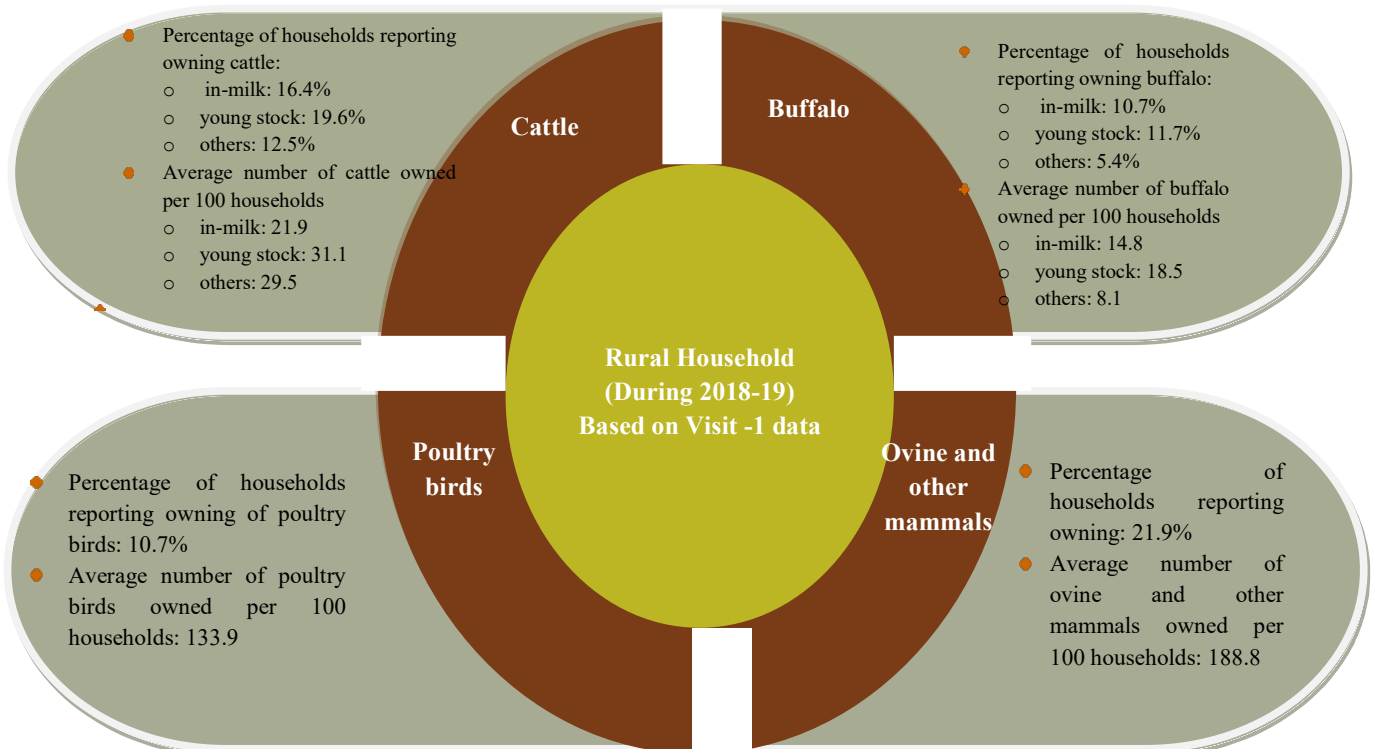

H. Household Operational Holdings of Land During 2018-19

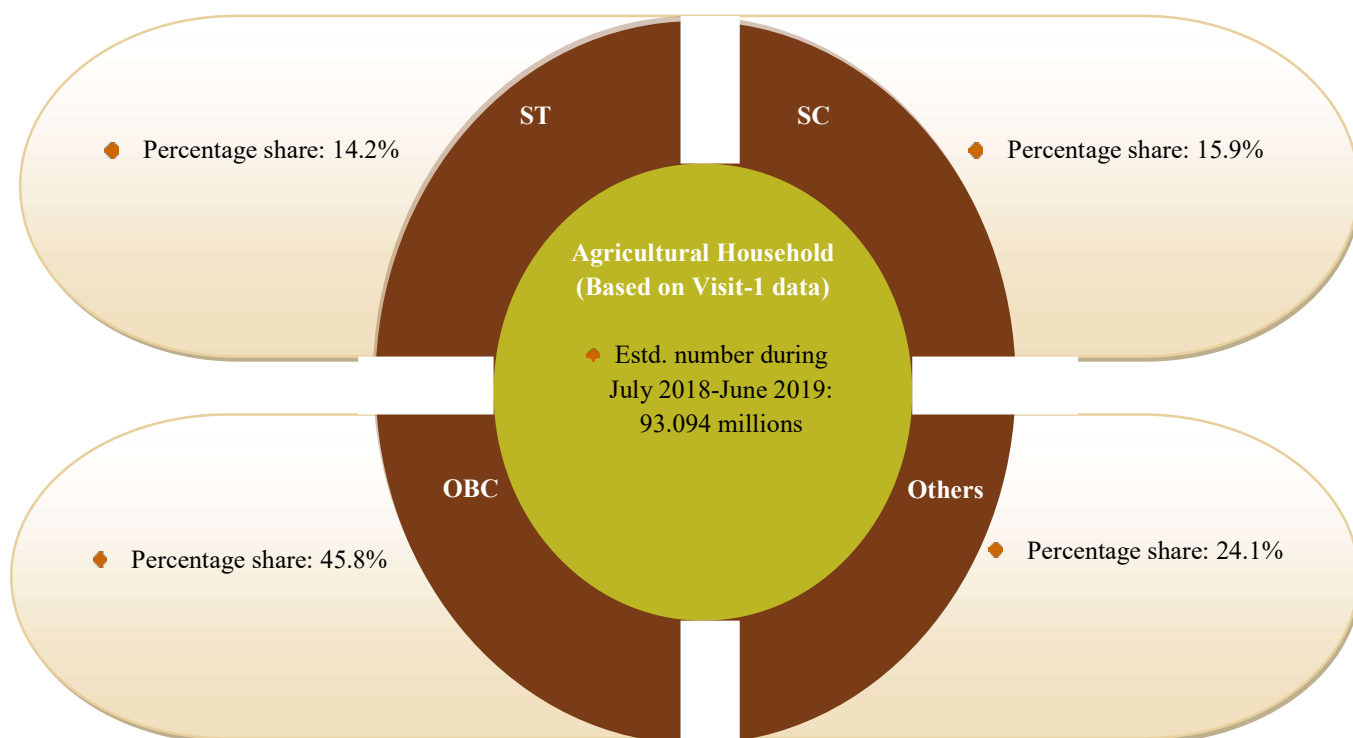

I. Distribution of Land Possessed by Type of Land Use During 2018-19

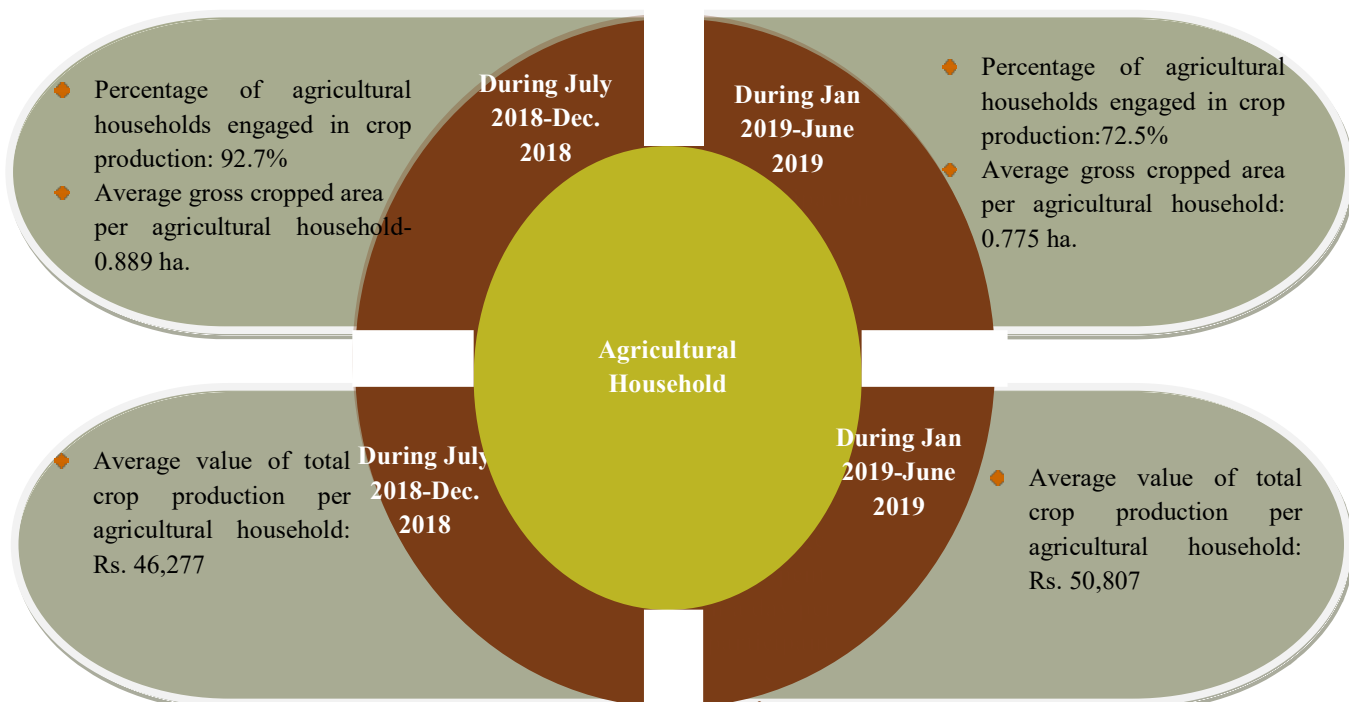

J. Ownership of Livestock

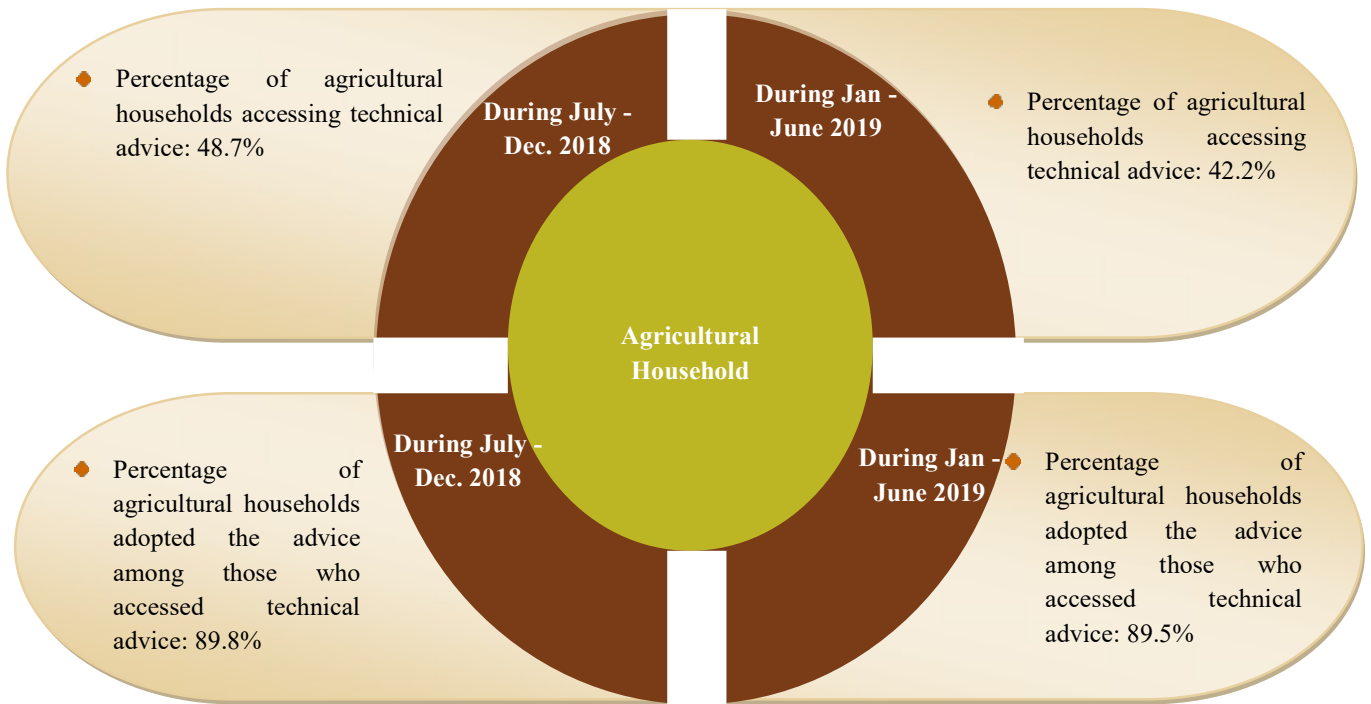

K. Distribution of Agricultural Households by Social Group

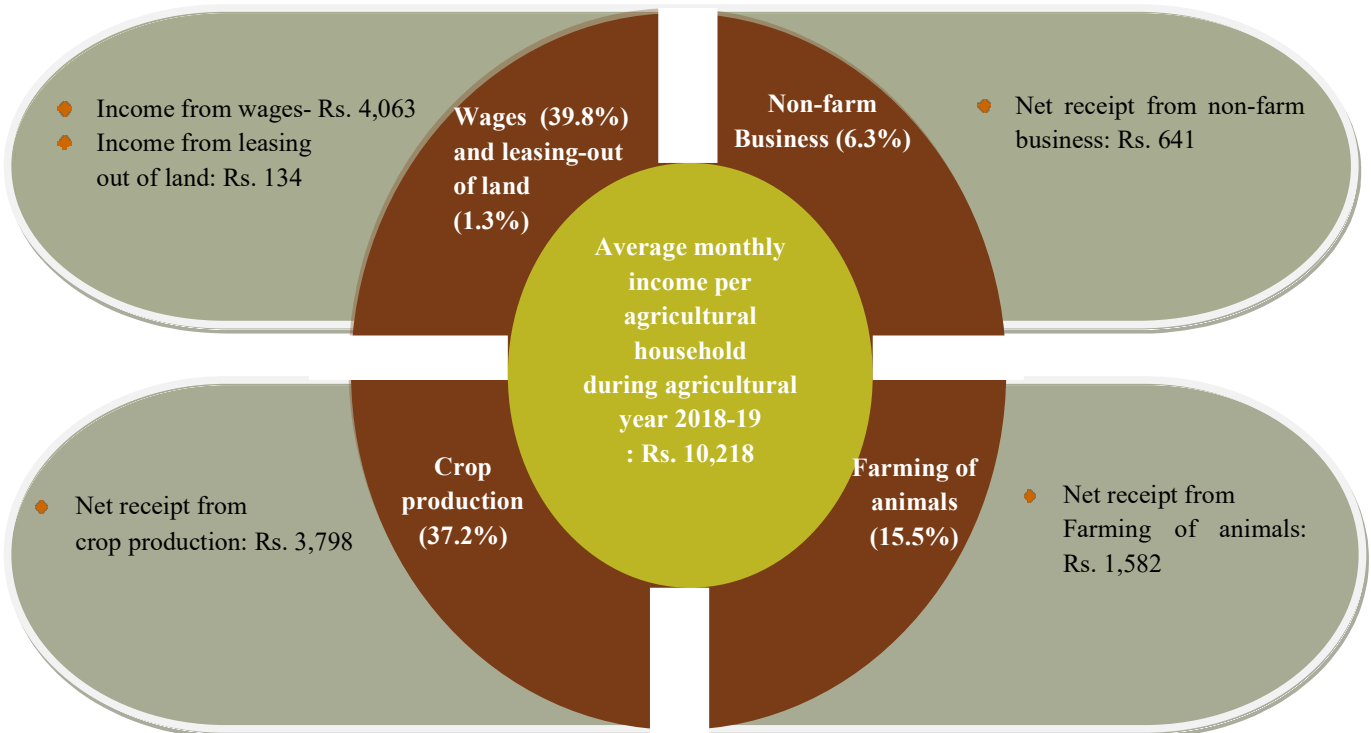

L. Agricultural Households Engaged in Crop Production

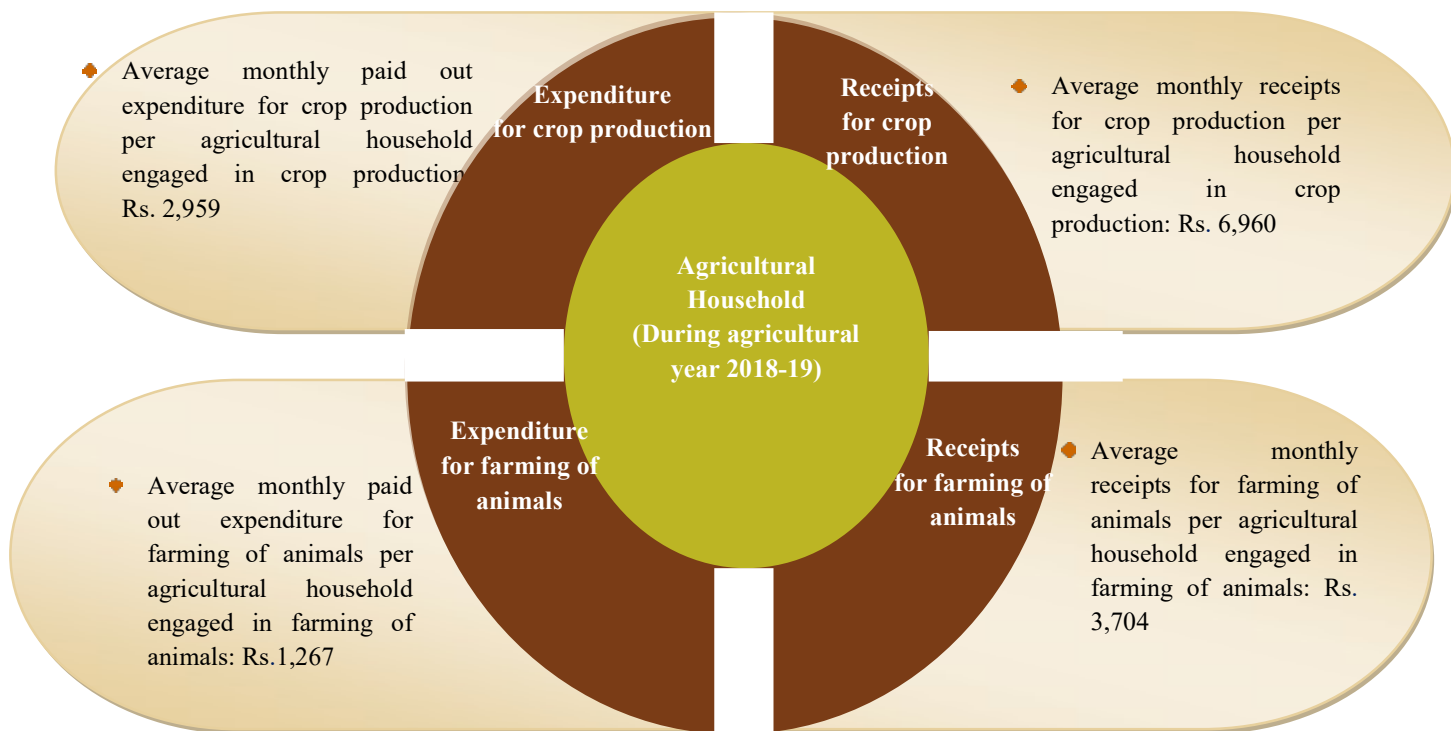

M. Access to Different Facilities/ Schemes/ Technical Advice by Agricultural Households

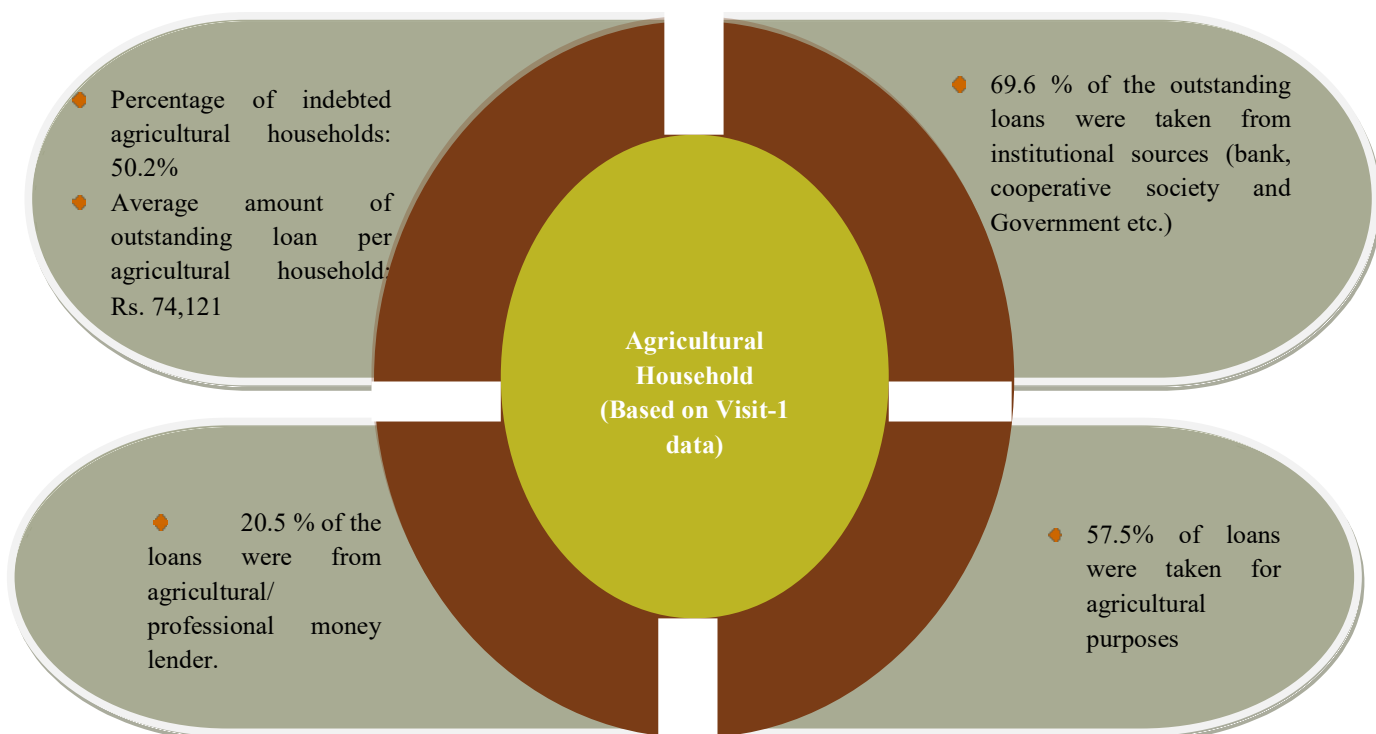

N. Average Monthly Income per Agricultural Household

O. Average Monthly Paid-out Expenditure and Receipts for Crop Production and Farming of Animals per Agricultural Households

P. Indebtedness of Agricultural Households

Chapter One

Introduction

Chapter One

Introduction

1.1 Background

1.1.1 The National Statistical Office (NSO), Ministry of Statistics and Programme Implementation (MoSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large-scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. In its 77th round of survey, conducted during the period 1st January 2019 to 31st December 2019, NSO carried out a survey on “*Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households*” in the rural areas of India with an integrated schedule of enquiry. Prior to this, Land and Livestock Holding Surveys (LHS) and Situation Assessment Survey (SAS) of Agricultural Households used to be conducted as separate surveys. The recent NSS Rounds in which these surveys were conducted are NSS 70th round (January 2013 – December 2013) and NSS 59th round (January 2003- December 2003).

1.2 Objective of the Survey

1.2.1 The integrated survey on *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households*, conducted in the rural areas of the country, had an objective of generating different indicators of ownership and operational holdings of rural households, including their ownership of livestock and various estimates related to the situation of agricultural households. Such indicators are related to:

- ◆ income, productive assets and indebtedness of agricultural households
- ◆ farming practices of agricultural households
- ◆ awareness and access to various technological developments in the field of agriculture.

The survey collected detailed information on receipts and expenditure of the agricultural households’ farm and non-farm businesses and receipts from all other economic activities pursued by their members to arrive at an estimate of average monthly income per agricultural household for the reference period (*i.e., for the agricultural year July 2018 – June 2019*).

1.3 Genesis of NSS Land and Livestock Holdings Survey (LHS) and Situation Assessment Survey (SAS) of Agricultural Households

1.3.1 Prior to NSS 77th round, the Land and Livestock Holdings Survey (LHS) and Situation Assessment Survey (SAS) of Agricultural Households used to be conducted through separate schedules of enquiry. They were repeated usually with a gap of 10 years.

1.3.2 The Decennial survey on Land and Livestock Holdings is one of the important surveys conducted repeatedly by the NSO. The first survey on land holdings was taken up by

the NSS in its 8th round (July 1954 - April 1955) as part of the World Agricultural Census initiated by the Food & Agricultural Organization (FAO) of the United Nations. In this survey, information on agricultural holdings was collected primarily to meet the requirements of the FAO. In addition, information on household ownership holdings was collected to provide the much-needed data for formulating land reforms policy for the country. A similar survey was conducted again in the 16th (July 1960-August 1961) and 17th (September 1961-July 1962) rounds of the NSS as a part of the World Agricultural Census Programme of 1960. Since then, NSO has been regularly conducting land holding surveys every ten years or so. The next survey on land holding of NSSO was conducted in 26th round (July 1971-June 1972). Thereafter, surveys on Land and Livestock Holdings were conducted in 37th round (January-December 1982), 48th round (January-December 1992), 59th round (January-December 2003) and 70th round (January – December 2013) respectively.

1.3.3 At the beginning of this millennium, the Ministry of Agriculture, Government of India had planned for a comprehensive assessment of the situation of farmers in the country. The areas of interest were income and productive assets, their indebtedness, farming practices, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture. To meet these requirements, the Situation Assessment Survey (SAS) of farmers was conducted by the NSSO during January - December 2003, as a part of its 59th round. The survey was repeated during NSS 70th round (January - December 2013) with some changes in the concept and definitions. However, the focus of assessing the situation of farming community remained the same in both these surveys.

1.3.4 NSO conducted the latest *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households* in its 77th round during January - December 2019 after NSS 70th round (January – December 2013) in which *Situation Assessment Survey (SAS) of Agricultural Households* and *Land and Livestock Holdings Survey (LHS)* were conducted.

1.4 Integration of the Schedule of Enquiry

1.4.1 In previous NSS rounds separate schedules for the *Situation Assessment Survey (SAS) of Agricultural Households* (Schedule 33) and *Land and Livestock Holdings Survey (LHS)* (Schedule 18.1) were canvassed in different rural households. Information on household ownership holdings, operational holdings and ownership of livestock were collected only in LHS, though the ownership of land of agricultural households, size of their operational holdings, their tenancy status, etc., are vital pieces of information for assessing the situation of farmers/ agricultural households. Accordingly, with an objective to generate a wider information base related to land use and agricultural activities of rural/ agricultural households the Working Group of NSS 77th round decided to use an integrated survey instrument (Schedule 33.1) which had provision for collecting detailed information on land use, ownership of livestock and aspects related to farming activities from the same set of households.

1.4.2 The integrated Schedule 33.1 was structured in such a way that, information on household and demographic characteristics, detailed information on land use and ownership of livestock were collected from all the surveyed households and detailed information on

receipt and expenditure with respect to farm and non-farm business and other aspects of farming, like, awareness and access to MSP, technical advice on farming, net expenditure on productive assets, crop loss and crop insurance etc., were collected only from a sub-set of the surveyed households that were identified on the basis of their receipt from the ‘*self-employment activities in agriculture*’ during the 365 days prior to the date of survey.

1.5 Collection of Information

The information was collected in two visits from the same set of sample households with a view to collect relevant information separately for the two halves of the agricultural year *July 2018 – June 2019*. The first visit was made during January -August 2019 and the second during September- December 2019.

1.6 Comparability of Results with Previous Round of LHS and SAS

1.6.1 With regard to the concepts and definition followed, the results of the survey on *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households* (Schedule 33.1) of NSS 77th round (*January – December 2019*) are broadly comparable with the corresponding estimates derived from the *Land and Livestock Holding Survey* (Schedule 18.1) and *Situation Assessment Survey of Agricultural Households* (Schedule 33) of NSS 70th round (*January – December 2013*). However, optimisation attempted in the integration of the survey instruments and refinement of concepts resulted in the following changes:

- In previous NSS Land and Livestock Holding Surveys, plot-wise information on land was collected from each household. Accordingly, all the details about each plot of land such as irrigation status, crops grown/livestock raised, terms of lease, etc., were available. Whereas, in NSS 77th round, all the plots that came under the same category of possession (*i.e. owned and possessed, leased-in, leased-out, otherwise possessed*) were clubbed together and reported as a single entry. Accordingly, details on major type of crop grown/livestock raised, major sources of irrigation, lease tenure for major part of the leased land, etc., are available for the corresponding category of possession as a whole.
- In previous rounds, all the plots recorded in visit-1 were repeated in visit-2 also. Additionally, the plots that were not reported during visit-1 but possessed /owned by the household during the major part of the reference period considered under visit-2 were separately listed during visit-2. However, in NSS 77th round, particulars of land of the household and its operation were separately collected with reference to the two halves of the agricultural year in two visits of the survey. Additionally, particulars of land of the household and its operation with reference to the entire agricultural year were collected in a separate but identical block.
- In NSS 77th round, details of ownership of livestock was collected separately for ‘cattle’, ‘buffalo’ (both as in-milk, young stock, others), ‘other large-heads’, ‘ovine and other mammals’, ‘poultry birds’ and ‘others’. In previous rounds, ‘in-milk’ category was not separately recorded for cattle and buffalo while under ‘other large-

heads', 'ovine and other mammals' and 'poultry birds detailed animal-wise information was collected.

1.6.2 The definition of agricultural households followed in NSS 77th round is identical with the definition used in the 'Situation Assessment Survey of Agricultural Households' of NSS 70th round where, an agricultural household was defined as an 'agricultural production unit' which produced field crops, horticultural crops, livestock and the products of any of the other specified agricultural activities with or without possessing and operating any land. This definition was different from the definition of farmer and farmer household as followed in the SAS of NSS 59th round which made the possession and operation of land as necessary condition for a household to be a farmer household. In order to exclude households with insignificant agricultural production from the coverage of agricultural households, the definition followed in NSS 70th round adopted an income cut-off for the receipts from the self-employment activities in agriculture by the household. In NSS 77th round, income cut-off used for identifying the agricultural households has been updated by adjusting for inflation.

1.6.3 An agricultural household for 77th Round survey was defined as a household receiving value of produce more than Rs. 4000/- from agricultural activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc.) and having at least one member self-employed in agriculture either in the principal status or in subsidiary status during last 365 days. Like in previous rounds, households which were entirely agricultural labour households and households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services were not considered as agricultural households and they were kept outside the scope of the survey.

1.6.4 In NSS 70th round land of household, as on the date of the survey, was collected only during visit-1 through five questions in the household characteristics blocks. The size class of land possessed (in ha.) for the two halves of the agricultural year as well as for the whole agricultural year 2012-13 were formed based on that information. However, in 77th round, in the integrated schedule particulars of the land of the households was collected separately for the two halves of the agricultural year as well as for the whole agricultural year 2018-19 in visit-1 and visit-2 respectively in line with earlier LHS schedules. The size class of land possessed (in ha.) for July –December 2018 were formed on the basis of information of Block 5 of the surveyed households of visit-1, for the January –June 2019 were formed on the basis of information of Block 5 of the surveyed households visit-2 and for the whole agricultural year 2018-19 size classes of land possessed were formed from Block 5.1 of visit-2 for the common households surveyed during visit-1 and visit-2.

1.6.5 For recording the expenditure on agricultural, both out of pocket expenditure (paid out expenses) and imputed expenditure (in case of farm saved seeds, manure, unpaid family labour, etc.) were collected in NSS 77th round. However, SAS 2013 (70th Round) followed the actual expenditure (out of pocket expenditure) approach. Accordingly, imputed figures in respect of consumption of input out of home stock or out of free collection as well as received in exchange or borrowed were not considered in NSS 70th round. Instead, for any such consumption of input zero expenditure was recorded.

1.6.6 Income received by the household member as ‘rent for land’ was collected in NSS 77th round and the same has been included in the average income per agricultural household. However, this information was not collected in the previous rounds.

1.6.7 With regard to the outstanding loans of agricultural households, information on the following was collected in NSS 77th round, viz., (i) purpose of the loan, (ii) tenure of the loan and (iii) interest rate. This information was not available from NSS 70th round.

1.6.8 Access to technical advice related to the agricultural activity undertaken by the household was collected in NSS 77th round irrespective of the type of agricultural activity undertaken by the household. However, in 70th round, this information was collected in respect of the technical advice received for crop production activity of the agricultural household.

1.6.9 While making any comparison of estimates of these two rounds, sufficient care should be taken to account for these differences.

1.7 Comparability of Some of the Estimates Obtained From NSS 77th Round (January 2019- December 2019) Survey on Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households with Administrative Data

It is noticed that administrative data also exist for some of the items for which estimates are obtained from NSS 77th round (January 2019- December 2019) survey on *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households*. Since the estimates obtained from this survey and the corresponding administrative data on these items are not comparable, the coverage of these items for both the survey and administrative data are provided in the following paragraphs:

1.7.1 Kisan Credit Card (KCC)

Administrative data coverage: Eligibility under KCC scheme are:

- i. Farmers - individual/joint borrowers who are owner cultivators;
- ii. Tenant farmers, oral lessees & share croppers;
- iii. Self Help Groups (SHGs) or Joint Liability Groups (JLGs) of farmers including tenant farmers, share croppers, etc.

NSS coverage: If any household member had a valid Kisan Credit Card as on the date of survey, the household has been considered to have KCC.

Scope of comparison: NSS 77th round covers only rural agricultural households and each household has been counted once if it has KCC, while the administrative data covers all these who are eligible for KCC.

1.7.2 Pradhan Mantri Fasal Bima Yojana (PMFBY)

Administrative data coverage: The Scheme can cover all Food & Oilseeds crops and Annual Commercial/Horticultural Crops for which past yield data is available. The scheme is

compulsory for loanee farmers for notified crops. However, it is voluntary for other/non-loanee farmers who have insurable interest in the insured crop(s).

NSS coverage: If the agricultural household produced some crops during the last 365 days which were under the coverage of the scheme but did not avail the insurance coverage, the agricultural household was not considered under PMFBY.

Scope of comparison: In the administrative data under PMFBY, the same farmer may be counted multiple times. In this survey each agricultural households in rural areas covered under PMFBY was counted only once irrespective of on how many instances the farmer(s) in that household insured the crop.

1.7.3 Soil Health Card (SHC)

Administrative data coverage: A SHC is meant to give each farmer soil nutrient status of his holding and advice him on the dosage of fertilizers and also the needed soil amendments, that the farmer should apply to maintain soil health in the long run. The card contains an advisory based on the soil nutrient status of a farmer's holding. A farmer can have one SHC for each of his holdings every three years.

NSS coverage: It was ascertained from the agricultural household in the rural areas whether it possesses Soil Health Card as on date of survey. If yes, the household was considered to have SHC.

Scope of comparison: In administrative data coverage, a farmer is issued one SHC for each of the holdings. Thus if a farmer have more than one holding, he/she can have as many SHCs as the number of holdings. Consequently, a household can have multiple SHCs depending on the number of farmers in the household as well as if the farmers have multiple holdings. In contrast, the 77th round survey data counts a household only once irrespective of how many SHCs are actually possessed by its members.

1.7.4 Mahatma Gandhi National Rural Employment Guarantee (MGNREG) Job Card

Administrative data coverage: Under the provisions of the MGNREG Act, the Gram Panchayat is to issue job cards to every registered household. The job cards shall be valid for a period of five years and will have provision for the addition/deletion of members eligible for work.

NSS coverage: If name of at least one member of the sample household is listed in any job card, the household was considered to have a job card.

Scope of comparison: NSS considers only the agricultural households in rural area whereas the administrative data covers all the MGNREG job card holders irrespective of the type of household or sector (rural/urban) in which the household resides.

1.7.5 Animal Health Cards (AHC)

Administrative data coverage: In order to make dairying more remunerative to the farmers a new scheme namely "National Mission on Bovine Productivity (NMBP)" was initiated in November 2016. One component of NMBP is 'Pashu Sanjivni' which is an Animal Wellness

Programme encompassing provision of Animal Health cards (Nakul Swasthya Patra) along with UID identification and uploading data on National Data Base.

NSS coverage: In NSS 77th round, information was collected on whether the agricultural household in the rural areas possesses Animal Health Card (*Nakul Swasthya Patra*) as on date of survey or not.

Scope of comparison: While counting the number of AHCs, administrative data considers *each animal* as a unit having a health card while NSS 77th round considers one household only once if it has AHC. Moreover, in the 77th round survey, only the agricultural households in rural areas were considered.

1.8 Comparability of the Estimates of percentage of indebted Agricultural Households obtained from NSS 77th Round Survey on Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households with the percentage of indebted households obtained from NSS 77th Round All India Debt and Investment Survey

1.8.1 In the 77th round of NSS, two surveys, namely, (i) Land and Livestock Holding of Households and Situation Assessment of Agricultural Households and (ii) All India Debt & Investment Survey (AIDIS) were conducted simultaneously during January- December 2019. In both of these surveys, information on indebtedness of the households was collected: while the first one collected information on indebtedness from the agricultural households in rural areas the later gathered information on indebtedness from all types of households both in rural and urban India.

1.8.2 In the Reports prepared on the basis of data collected from these surveys, estimates of percentage of indebted households are provided as follows:

- In this present Report (NSS Report No. 587) based on the survey on *Land and Livestock Holding of Households and Situation Assessment of Agricultural Households*, estimates of percentage of indebted agricultural households in rural areas are provided.
- In NSS Report No. 588 based on the *All India Debt & Investment Survey*, estimates of percentage of indebted households are provided for rural areas separately for cultivator households, non-cultivator households, besides providing the estimates of percentage of indebted households in urban areas.

1.8.3 It may be noted that coverage of *agricultural households* in Livestock Holding of Households and Situation Assessment of Agricultural Households and the coverage of *cultivator households* in All India Debt & Investment Survey are not same and as such these estimates are not comparable. Moreover, the estimates of percentage of indebted households obtained from the survey on Land and Livestock Holding of Households and Situation Assessment of Agricultural Households covers only the agricultural households in rural areas, unlike in the All India Debt & Investment Survey which covered the entire rural areas. These aspects may be kept in mind while interpreting the results. Definition of agricultural households used in the survey of Livestock Holding of Households and Situation Assessment

of Agricultural Households has already been provided in Para 1.6.3 above and definition of cultivator households used in All India Debt & Investment Survey is given below:

Definition of cultivator households in All India Debt & Investment Survey: All the households having area of land operated 0.002 hectares or more as recorded during the last 365 days preceding the date of survey was considered as ‘cultivator households’.

1.9 Geographical Coverage

1.9.1 *Geographical coverage:* The survey covered the rural areas of the whole of the Indian Union except the villages in Andaman and Nicobar Islands which were difficult to access.

1.10 Sample Design

1.10.1 A rural village was notionally divided into a number of sub-units (SU) of more or less equal population during the preparation of frame. Census 2011 population of villages was projected by applying suitable growth rates and the number of SUs formed in a village was determined apriori. The above procedure of SU formation was implemented in the villages with population *more than or equal to 1000 as per Census 2011*. In the remaining villages, no SU was formed.

1.10.2 A stratified two stage design was adopted in this survey. *The first stage units (FSU) were villages/sub-units (SUs)* as per the situation in the rural sector. The ultimate stage units (USU) were households.

1.10.3 For this survey, each district was a stratum. Within each district of a State/UT, rural stratum comprised all rural areas of the district.

1.10.4 Sub-stratification in the rural areas: Three groups of villages were formed within each stratum:

Group 1: all villages (Panchayat wards for Kerala) with Census 2011 population less than 250

Group 2: all villages (Panchayat wards for Kerala) with Census 2011 population more than or equal to 250 but less than 500

Group 3: remaining villages

The sample size for a rural stratum was allocated among 3 groups in proportion to population. Sub-strata was demarcated in Group 1, Group 2 and Group 3 respectively in such a way that each sub-stratum comprised a group of villages (all SUs of a village considered together) of the arranged frame with more or less equal number of cultivators. If number of FSUs in a particular Group was very small, no sub-stratum was formed in that Group. Further, in those sub-strata where allocations were very small, minimum allocation was 1 each.

1.10.5 A total of 5,950 FSUs in the rural areas were allocated at all-India level for the central sample. The total number of sample FSUs had been allocated to the States and UTs in proportion to population as per Census 2011 subject to a minimum sample allocation to each State/UT. For each State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per Census 2011. Stratum level allocation was adjusted to

multiples of 2 with a minimum sample size of 2. For this survey, it was planned that for each FSU, a total number of 10 households would be surveyed in visit-1 and the households surveyed in visit-1 would again be surveyed in visit-2.

Table : Sample size		
FSU/Households	Visit 1	Visit 2
FSU allotted	5950	
FSU surveyed	5,940	5,894
Households surveyed	58,035	56,894
Agricultural households surveyed	45,714	44,770

1.11 Contents of the Report

1.11.1 The report being brought out on the basis of data collected in visit-1 and visit-2 of the *Survey on Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households* of NSS 77th Round contains three Chapters and Four Appendices. Chapter Two gives the concepts and definitions followed in the Survey. Summary of findings of the Survey are presented in Chapter Three. The detailed tables forming the basis of this report are presented in Appendix A. The RSEs of some of the key indicators have been presented in Appendix B. Appendix C provides the details of the sample design and estimation procedure for the survey. A copy of each of the schedules of enquiry – “Schedule - 33.1” used in visit-1 and visit-2 is given in Appendix D.

1.11.2 While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States or UTs may not be adequate for getting sufficiently reliable estimates for some of the indicators. If there are no sample observation in a particular category or if there exist sample observations for a particular category but the estimates are zero when rounded (either in per cent or in per thousand, etc.), the corresponding estimated numbers are shown as zero (0).

Chapter Two

Concepts and Definitions

Chapter Two

Concepts and Definitions

2. Conceptual Framework

2.0 In respect of the selected households, information in this survey was collected through personal interview of the respondent(s) through two visits. The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 Reference Period: Information was collected primarily for the agricultural year 2018-19 in two visits, viz., visit-1 and visit-2. For crops, information on *expenses* and *receipts from cultivation* were collected for the period July to December 2018 in visit-1 and for January to June 2019 in visit-2. However, it was ensured that all the crops, whether principal or not, harvested during agricultural year 2018-19 were duly considered in either visit-1 or visit-2. The same reference period was used for collecting information on *productive assets*.

2.1.1 For other items of information, different reference periods were used, viz., ‘*as on the date of survey*’ for indebtedness, ‘*last 30 days*’ for farming of animals and non-farm business. For information on *land possession*, *productive assets* and *expenses* and *receipts from cultivation*, earnings from wages/salaried employment, earnings from pension/remittances the reference period was July to December 2018 in visit-1 and January to June 2019 in visit-2.

2.1.2 The estimates of number of households presented in this report are based on data with a moving reference period of the corresponding survey period (the survey period of January – August 2019 in visit 1 and survey period of September – December 2019 in visit 2) and the estimates, therefore, may be taken to represent the number of households existing as on the midpoint of the survey period.

2.1.3: Combined Aggregates Based on Visit-1 and Visit-2 Data: Information related to expenses for and income/receipts from various activities performed by the agricultural households are collected for different reference periods. For wage/ salaried employment, cultivation, purchase and productive assets the reference period is six months whereas, for farming of animals information was collected with a reference period of 30 days. For working out the combined aggregates, only the common households of *visit-1* and *visit-2* are considered. In respect of figures collected for the reference period of six months, the combined aggregate is calculated as a simple average of *visit-1* and *visit-2* figures. Wherever information is collected for the reference period of last 30 days combined aggregate is calculated as a weighted mean of

estimates for common households of *visit-1* and *visit-2* where the weights are 8 and 4 respectively as the survey period of *visit-1* and *visit-2* were 8 and 4 months, respectively.

2.2 Household and Household Size: A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household. The same principle was applicable for the residential staff of such establishments. However, if a group of persons among them pooled their income for spending, they were treated as forming a single household. A family living in a hotel was treated as a single household.

The size of a household is the total number of persons in the household.

2.3 Household’s Usual Consumer Expenditure (Rs.) in a Month:

Household’s usual monthly consumer expenditure is the sum total of monetary values of all goods and services consumed by the household on domestic account with a monthly regularity. Unusual expenditures, such as, expenditure on social ceremonies, capitation fee, hospitalization, etc., were excluded for deriving usual monthly consumer expenditure of the household. However, expenditure on household durable goods was included and monthly expenditure on durable goods was derived by apportioning the total expenditure made by the household on durable goods during last 365 days. For deriving household’s usual monthly consumer expenditure, information on regular monthly expenditure of the household for household purposes out of purchase, home grown and wages in kind, free collection, gift, etc., was collected along with the information on expenditure of the household for purchase of durable goods during last 365 days. In this survey, the usual monthly consumer expenditure of the household was collected through these four items:

A: usual consumer expenditure in a month for household purposes out of purchase

B: imputed value of usual consumption in a month from home grown stock

C: imputed value of usual consumption in a month from wages in kind, free collection, gifts, etc.

D: expenditure on purchase of household durables during last 365 days

From the information collected in these four items, usual monthly consumer expenditure of the household was derived as $[A+B+C+(D/12)]$.

Since this information on Household Usual Monthly Consumer Expenditure was collected through a four questions, it cannot be used to estimate the household consumer expenditure which is generally estimated based on detailed household consumer expenditure survey (Schedule 1.0 of NSS). Based on the information collected on Household Usual Monthly Consumer Expenditure, decile classes of Usual Monthly Per Capita Consumer Expenditure (UMPCE) were formed (with each decile class containing 10 per cent of the population) for rural sector.

2.4 Household Classification: Each household was classified on the basis of the sources of the household's major income during the 365 days preceding the date of survey. For this purpose, only the household's income from economic activities was considered; but the income of servants and paying guests were not taken into account. The households were classified as per the following:

self-employment in:

crop production
farming of animals
other agricultural activities
non-agricultural enterprise

regular wage/salaried earning in:

agriculture
non- agriculture

casual labour in:

agriculture
non- agriculture

others (pensioners, remittance recipients, student, engaged in domestic activities, etc.)

2.4.1 Procedure for determining household classification codes:

i) Firstly, the households, which had no income from economic activities, were classified under “others”.

ii) Out of the remaining households, the household’s income from economic activities was considered. A household was first categorized as ‘self-employed’, ‘regular wage/salary earning’ or ‘casual labour’ depending on the major source of its income during last 365 days from self-employment, regular wage/ salaried employment or casual labour employment, respectively.

- ◆ For a household, which had major income from self-employment (i.e., income from self-employment was more than the earning of each of regular wage/salary and casual labour), the broad household classification was self-employed.

- ◆ For a household, which had major income from regular wage/salary, the broad household classification was regular wage/salary earning.
- ◆ For a household, which had major income from casual labour, the broad household classification was casual labour.

iii) The household broadly classified as ‘self-employed’ was further classified into one of the four categories: ‘crop production’, ‘farming of animals’, ‘other agricultural activities’ or ‘non-agricultural enterprise’

a) If the major income of the household was from growing of field crops (including fodder crops), fruits, grapes, nuts, seeds, seedlings in the nurseries, bulbs, vegetables and flowers both in open and under glass, production of fodder crops, etc., or production of plantation crops like tea, coffee, cocoa, rubber, etc., or from forest production in parcels of land which form part of enumeration holding – *household classification was ‘crop production’*.

b) If the major income of the household was from production of livestock and livestock products, poultry and poultry products, fish, honey, rabbits, furbearing animals and silk-worm cocoons- *household classification was ‘farming of animals’*.

c) For the household having major income from agricultural activities other than crop production or livestock farming, *household classification was ‘other agricultural activities’*.

d) For the household having major income from self-employment in non-agricultural enterprises *household classification was ‘non-agricultural enterprise’*.

iv) Within each of the broad category of regular wage/salary earning and casual labour households, two specific household types, viz., ‘*in agriculture*’ and ‘*in non-agriculture*’ was distinguished, depending on their major income from agricultural activities (section A of NIC-2008) and non-agricultural activities (rest of the NIC-2008 sections, excluding section A) during last 365 days.

Specific household types for the households, whose major source of income during last 365 days was from regular wage/salary earning, were “regular wage/salary earning in agriculture” and “regular wage/salary earning in non-agriculture”. Specific household types for the households whose major source of income during last 365 days was from employment as casual labour were “casual labour in agriculture” and “casual labour in non-agriculture”.

2.5 Economic Activity: The entire spectrum of human activity falls into two categories: economic activity and non-economic activity. Any activity that results in production of goods and services that adds value to national product is considered as an economic activity. The economic activities have two parts - market activities and non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or

profit. Such activities include production of all goods and services for market including those of government services, etc. Non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets. The term ‘economic activity’ in the NSS 77th round of survey of NSO included:

(i) all the market activities, i.e., the activities performed for pay or profit which resulted in production of goods and services for exchange,

(ii) of the non-market activities,

(a) all the activities relating to the primary sector (i.e., **industry Divisions 01 to 09 of NIC-2008**) which resulted in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods, including threshing and storing of grains for own consumption.

and

(b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets included construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge.

2.5.1 The activities like prostitution, begging, etc., which may result in earning, were not considered as economic activities for the survey.

2.6 Principal Activity Status: The principal activity status relates to the activity status of a person during the fixed reference period of 6 months. The activity status on which a person spent relatively long time (major time criterion) during the six months (July to December 2018 for visit- 1 and January to June 2019 for visit-2) was considered the principal activity status of the person.

2.6.1 To decide the principal activity of a person, he/ she was first categorised as belonging to the labour force or not, during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force were assigned the broad activity status ‘neither working nor available for work’. For the persons belonging to the labour force, the broad activity status of either ‘working’ or ‘not working but seeking and / or available for work’ was then ascertained again on the basis of the relatively long time spent in the labour force during the 6 months reference period. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such activity was determined again on the basis of the ‘relatively long time spent’ criterion.

2.6.2 The detailed activity statuses were as follows:

Activity status	code
worked in households enterprise (self-employed) as own account worker	11
worked in households enterprise (self-employed) as employer	12
worked as helper in households enterprises (unpaid family worker)	21
worked as regular salaried/wage employee	31
worked as casual wage labour : in public works other than MGNREG public works	41
in MGNREG public works	42
in other types of work	51
did not work but was seeking and/or available for work	81
attended educational institutions	91
attended domestic duties only	92
attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle-feed, etc.) sewing, tailing, weaving, etc., for households use	93
rentiers, pensioners, remittance recipients, etc.	94
not able to work due to disability	95
others (including begging, prostitution, etc.)	97

2.6.3 Codes 11, 12, 21, 31, 41, 42 & 51 referred to the status 'employed', 81 to the status 'unemployed' and the remaining codes viz. 91 to 97 (excluding 96) referred to the 'not in labour force'.

2.7 Subsidiary Economic Activity Status: A person whose principal status was determined on the basis of the major time criterion during the fixed reference period of six months might have pursued some economic activity for 30 days or more during the reference period. The status in which such economic activity was pursued during the reference period July to December 2018/ January to June 2019 was the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, the major activity and status based on the relatively longer time spent criterion was considered. It may be noted that engagement in work in subsidiary capacity might arise out of the two following situations:

- i. a person might be engaged in a relatively longer period during the reference period in economic (non-economic activity) and for a relatively minor period, which was not less than 30 days, in another economic activity (any economic activity).
- ii. a person might be pursuing an economic activity (non-economic activity) almost throughout the reference period in the principal status and also simultaneously pursuing another economic activity (any economic activity) for relatively shorter time in a subsidiary capacity. In such cases, since both the activities were being pursued throughout the reference period and hence the duration of both the activities

were more than 30 days, the activity which was being pursued for a relatively shorter time was considered as his/ her subsidiary activity.

2.8 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in *household enterprises*. The essential feature of the self-employed was that they had *autonomy* (i.e., how, where and when to produce) and *economic independence* (i.e., market, scale of operation and money) for carrying out their operation. The remuneration of the self-employed consisted of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration was given by the revenue from sale of output produced by self-employed persons *minus* the cost of purchased inputs in production.

2.9 Regular Wage/ Salaried Employee: Persons worked in other's farm or non-farm enterprises (both household and non-household) and got in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) were the regular wage/ salaried employees. This category not only included persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.10 Casual Wage Labour: A person casually engaged in other's farm or non-farm enterprises (both household and non-household) and got in return wage according to the terms of the daily or periodic work contract was a casual wage labour.

2.11 Industry of the Economic Activity: For every household member who was engaged in economic activity in the usual status approach, information on industry of the economic activity was recorded. The sector of the economic activity in which a person was found engaged is his/her industry of work. For collection of information on industry, National Industrial Classification-2008 (NIC-2008) was used.

2.12 Earnings (received or receivable) from wages/salaried employment, pension/remittances and income received from lease rent of the land: Income receivable by the household members from sources such as wage/ salaried employment, pension, remittance, leasing out of land were captured.

2.12.1 Earnings (received or receivable) from wages/salaried employment for the work done during the period July to December 2018/ January to June 2019 from employment (Rs.): For all the persons who had worked in the capacity of wage/salary earners, total of the wages and salary earned during the period of July to December 2018 and during the period January to June 2019 were recorded. Earnings refer to the wage/ salary income (and not total earnings from other sources) receivable for the wage/ salaried work done during the reference period by the wage/ salaried employees and casual labourers. The wage/ salary already received or receivable might be in cash or kind or partly in cash and partly in kind. For recording the wages and salaries:

- i) The kind wages were evaluated at the respective current retail price.

- ii) Bonus (expected or paid) and perquisites evaluated at respective retail prices and duly apportioned for the reference period were also included in earnings.
- iii) For any economic activity, amount received or receivable as 'over-time' for the additional work done beyond normal working time were also be included.

2.12.2 Earnings (received or receivable) from pension/remittance during the period July to December 2018/ January to June 2019 (Rs.): Amount of pension and remittances received by the household members during the reference period were clubbed together. Pension included all type of pensions such as pension received by retired government employees, contributory pension under National Pension Scheme (NPS), Employee Pension Scheme (EPS) run under the Employee Provident Fund Organisation of India and other welfare pension schemes run by government agencies. Remittances are the transfers, in either cash or kind, to the households generally by former household members. However, remittances received from persons other than former household members and institutions were also be included. If such transfers were in the form of loans, these were not considered. The valuation of the remittances received in kind was done by considering the market value of the kind received by the household. If the cash remittances were in any foreign currency, exchange value of the cash remittances in Indian Rupee was arrived at to determine the amount of remittances.

2.13 Highest Level of Education: The highest level of education successfully completed by the member of the household considering all the general/ technical/vocational educational level was considered as the highest level of education.

2.13.1 A person who can both read and write a simple message with understanding in at least one language was considered as literate.

2.13.2 Persons who were literate through means other than formal schooling were considered as literate without formal schooling. Some persons achieved literacy by attending Non-formal Education Courses (NFEC) or Adult Education Centres (AEC) or by attending primary schools created under Education Guarantee Scheme (EGS). Persons who had become literate through attending Total Literacy Campaign (TLC) were also considered in this category.

2.13.3 For the purpose of this survey, the primary level was defined as Class I-V for all the States/UTs uniformly. Persons who had studied Oriental languages (e.g., Sanskrit, Persian, etc.) through formal education were classified appropriately at the equivalent level of education completed.

2.14 Formal Training in Agriculture: Any training in the field of agriculture, having a course structure, time schedule and *might* be issuing of certificate on successful completion conducted generally by a institution was considered as *formal training in agriculture* for the purpose of the survey.

2.15 Plot: A distinct patch of land demarcated generally by a strip of raised land, commonly known as 'ails' or 'bunds' was defined as a plot.

2.16 Homestead Land: Homestead of a household was defined as the dwelling house of the household together with the courtyard, compound, garden, out-house, place of worship, family graveyard, guest house, shop, workshop and offices for running household enterprises, tanks, wells, latrines, drains and boundary walls annexed to the dwelling house. All land coming under homestead was defined as homestead land. Sometimes, gardens, orchards or plantations, though adjacent to the homestead and lying within the boundary walls, might be located on a clearly distinct piece of land. In such cases, land under garden, orchard or plantation were not considered as homestead land.

2.17 Ownership of Land: (i) A plot of land was considered as owned by the household if permanent heritable possession, with or without the right to transfer the title, was vested in a member or members of the household. Land held in owner-like possession under long term lease or assignment was also considered as land owned. Thus, in determining the ownership of land two basic concepts were involved, namely,

(a) Land owned by the household, i.e., land on which the household had the right of permanent heritable possession with or without the right to transfer the title, e.g., Pattadars, Bhumidars, Jenmos, Bhumiswamis, Rayat Sithibans, etc. The land might be leased-out to others by the owner without losing the right of permanent heritable possession.

(b) Land held under special conditions such that the holder did not possess the title of ownership but the right for long term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long term lease for 30 years or more) was considered as being held under owner like possession. In the States where land reform legislations had provided for full proprietorship to erstwhile tenants, they were considered as having owner like possession, even if they had not paid the full compensation.

(ii) Sometimes a piece of land might be possessed by a tribal in accordance with traditional tribal rights from local chieftains or village/district council. Again, a piece of land might be occupied by a tenant for which the right of ownership vests in the community. In both the cases, the tribal or other individual (tenant) was taken as owner, for in all such cases, the holder had the owner like possession of land in question.

2.18 Land Possessed: Land possessed by a household is defined as land owned (including land under ‘owner like possession’) + land leased-in - land leased-out + land otherwise possessed (i.e. neither owned nor leased-in) by that household.

2.18.1 For the purpose of this survey, all the lands which were either ‘owned and possessed’ or ‘leased-in’ or ‘otherwise possessed’ or ‘leased-out’ by the households were considered irrespective of its use. The land of the household might be homestead land and other lands which might be used for agricultural purpose or for other purposes. The lands (which included ponds/other water bodies, area under forest, etc.) of the household might be used for agricultural

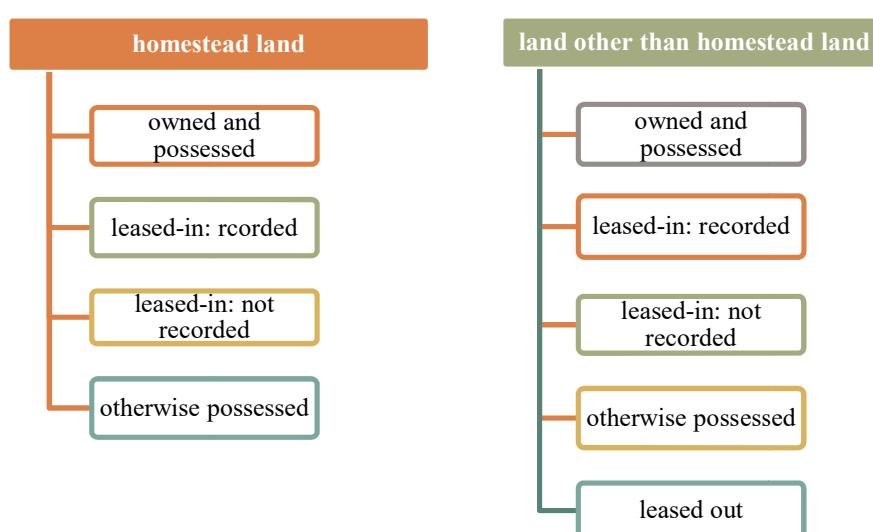

purposes like growing of field crops, vegetables, fruits, tea, coffee, cocoa, rubber, production of livestock, poultry, fish, aquaculture, honey, silk-worm cocoons, etc. The lands of the household might be used for purposes other than agriculture like those lands put to uses for buildings, paths, wells, land for running household enterprises and other non-agricultural uses, areas under forest/water bodies not used for agricultural purposes, culturable waste, used for miscellaneous tree crops and groves not covered under agricultural activities, permanent pastures and other grazing land, barren and unculturable waste, etc.

2.19 Land Leased-out and Leased-in: (i) Land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title was defined as land leased-out. It was defined as land leased-in if it was taken by a household on rent or free without any right of permanent or heritable possession. The lease contract might be written or oral. If the lease contract was written then it was considered as ‘recorded lease’ and if the lease contract was oral then it was considered as ‘non-recorded lease’.

(ii) Sometimes orchards and plantations were given to others for harvesting the produce for which the owner receives a payment in cash or kind. Such transactions were not treated as ‘lease’ for the purpose of the survey.

2.20 Otherwise Possessed Land: This was understood to mean all public/institutional land possessed by the household without title of ownership or occupancy right (i.e., encroached land). The possession was without the consent of the owner. Private land (i.e., land owned by the household sector) possessed by the household without title of ownership and occupancy right was *not* included in this category. All private land encroached upon by the household were treated as leased-in land.

The different categories of land of the household considered for this survey are summarised in the following diagram:

2.21 Agricultural Production: Agricultural production included:

- a) Growing of field crops (including fodder crops), fruits, grapes, nuts, seeds, seedlings in the nurseries, bulbs, vegetables and flowers both in open and under glass, production of fodder crops, etc.
- b) Production of plantation crops like tea, coffee, cocoa, rubber, etc.
- c) Forest production in parcels of land which form part of enumeration holding and
- d) Production of livestock and livestock products, poultry and poultry products, fish, honey, rabbits, furbearing animals and silk-worm cocoons. However, rearing pet animals was not considered as agricultural production.
- e) Growing of bamboo bushes, thatching grass, casurina trees, plants for fuel, plants used as reeds for matting.

2.22 Livestock: Livestock are those animals which were used for food, fibre, labour, etc. Animals kept as pets, snakes, reptiles, frogs, fishes were excluded from the coverage of livestock. In NSS 77th Round, information on number of livestock, poultry, duckery, etc., owned by the household as on the date of survey was collected in visit-1. The number of different categories of livestock and poultry birds owned by the household as on the date of survey was recorded. Livestock and poultry owned by the domestic servants, paying guests who are listed as normal members of the sample household were not considered.

2.23 Animal Farming: Animal farming was classified as *dairy, poultry/duckery, piggery, fishery* and *farming of other animals*.

2.24 Other Agricultural Activity: Other agricultural activities included all the activities in the agricultural sector, except cultivation and livestock farming activities, like activities of growing of plantation, orchard, forestry, logging, fishery, etc.

2.25 Shifting/Jhum Cultivation: Shifting cultivation is a primitive nature of cultivation which is known as jhum cultivation in north-eastern States of India whereas in others states it is known by different names like Bringa (Odisha), Valre (Rajasthan), Penda (Andhra Pradesh), Dahiya (Madhya Pradesh). The preparation of land for shifting/jhum cultivation is done by cutting and clearing of forest areas and burning of the dried biomass by setting fire. This land is used for growing crops of agricultural importance such as upland rice, vegetables or fruits. After a few cycles, the land loses fertility and a new area is chosen.

2.26 Forest: This included all area actually under forest on land classified under any legal enactment or administered as forest, whether state-owned or private. If any portion of such land

was not actually wooded but put to raising of field crops, it was treated under net sown area and not under forest. All area under social and farm forestry were included in this class.

2.27 Net Sown Area: For this survey, net sown area meant an area sown with field crops and area under orchards and plantations counting only once if the area sown was more than once in the same reference period. The net sown area covered area under seasonal crops, orchards and plantations.

2.28 Orchards: A piece of land put to production of horticulture crops, viz., fruits, nuts, dates, grapes, etc. (other than those treated as plantation crops), was regarded as an orchard, if it is at least 0.10 hectare (0.25 acre) in size or is having at least 12 trees planted on it. In the case of such fruit trees where distance between the trees was quite large, say, more than six metres as in the case of mangoes, the orchard was defined according to the minimum number of 12 trees planted in it, while, in cases, where the distance was less than six metres as in the case of bananas, papayas, grapevines etc., the orchard was defined on the basis of the minimum area of 1/10th of an hectare or 1/4th of an acre.

2.29 Plantations: Area devoted to production of plantation crops, viz., tea, coffee, cashew nut, areca nut, oil palm, clove and nutmeg, was treated as area under plantation. The size restriction given for orchards was also applicable for plantations for the purpose of the survey.

2.30 Area under Seasonal Crop: All the land under net sown area not coming under orchards or plantations was taken as area under seasonal crops.

2.31 Ponds and Other Water Bodies: Ponds and other water bodies meant lands which are perennially under water. These lands might be used for undertaking agricultural activities like crop production/fishing/aquaculture, etc., or it might be used for non-agricultural purposes.

If the water body was used for fishing & aquaculture then it was categorised as water body for fishing & aquaculture, otherwise it was treated for non-agricultural use.

2.32 Land Irrigated: Irrigation is the applications of controlled amounts of water to plants, other than rain water, at needed intervals for growing of crops and plants or for better growing of crops and plants. For this survey, area of land irrigated referred to the net irrigated area i.e., the area irrigated was counted only once if the area was irrigated more than once in the same reference period.

2.33 Household Ownership Holding: Household ownership holding constitutes of all lands owned by any member of the household i.e., lands either 'owned or possessed' or 'leased-out' by the household.

2.34 Household Operational Holding: Within a household, different household members might possess different lands. For the purpose of this survey, information was collected for household operational holding considering all the lands operated by all the household members together as a single operating unit. The following points were noted for determination of household operational holding:

(i) Household operational holding constitutes of all lands that was used wholly or partly for agricultural production and was operated (directed/managed) by one household member alone or with assistance of others, without regard to title, size or location. The land might be operated by members belonging to a single household or by members belonging to more than one household operating jointly. However, holdings operated as cooperative farms were not considered as operational holding in this survey. The holding might consist of one or more parcels of land, provided that they were located within the country.

(ii) When a household was found to grow vegetables in kitchen garden only, or flowers in the courtyard, it was considered to possess an operational holding. Likewise, a household engaged exclusively in livestock keeping or poultry raising or pisciculture was considered to operate a holding, even if no crop production was undertaken by it during the reference period. But in all cases an operational holding was related to some amount of land possessed by the household.

(iii) It is important to note that the inclusion of the term ‘wholly or partly’ in the definition of household operational holding implies that once a household was identified to operate some land, then all lands (irrespective of whether it was used for agricultural production or not) possessed by the household (i.e., ‘owned and possessed’ or ‘leased-in’ or ‘otherwise possessed’) during the major part of the reference period constituted the household operational holding. Thus, if a household carries out any agricultural production during the reference period, lands possessed by the household during the major part of the reference period and put to uses other than agricultural production, such as house-sites, paths, buildings, etc., were also included in the household operational holding.

(iv) Only when a household did not undertake any agricultural production on any part of the land possessed by it during the reference period, it was not considered to have any operational holding.

2.35 Size Class of ownership/operational holdings: In the detailed tables in Appendix A of this Report, the following class intervals for household ownership/ operational holdings are used wherever tables are presented by size class of household ownership/operational holdings:

size class of ownership/ operational holding (ha.)	
0.000	2.000-3.000
>0.000 & ≤0.002	3.000-4.000
0.002-0.005	4.000-5.000
0.005-0.040	5.000-7.500
0.040-0.500	7.500-10.000
0.500-1.000	10.000-20.000
1.000-2.000	>20.000

2.36 Size classes of ownership/ operational holdings used for presentation of the results in Chapter Three:

The following size classes of ownership/operational holdings have been used for presentation of the summary results in Chapter Three:

category of holding	size
landless*	less than or equal to 0.002 hectares
marginal	more than 0.002 but less than or equal 1.000 hectares
small	more than 1.000 but less than or equal to 2.000 hectare
semi-medium	more than 2.000 but less than or equal to 4.000 hectares
medium	more than 4.000 but less than or equal to 10.000 hectares
large	more than 10.000 hectares

* 'less than or equal to 0.002 hectares' as classified under 'landless' category, also includes plots where area is not reported.

These broad size classes will henceforth be called *categories* of ownership/operational holdings. It may be noted that 'land area' figures were collected in acres with two places of decimals. However, the area figures were converted to hectares at the time of tabulating the results with the following conversion factor: 1.00 acre=0.405 hectares. Due to this conversion factor no household can be classified in the size class '>0.000 & ≤0.002 (hectares)'. Since the lowest area figure that can be reported in 2 place of acre is 0.01 which when multiplied by the conversion factor 0.405 ha. takes the value 0.004 hectare. Thus, no household falls in the category of size class '>0.000 & ≤0.002 (hectares)'.

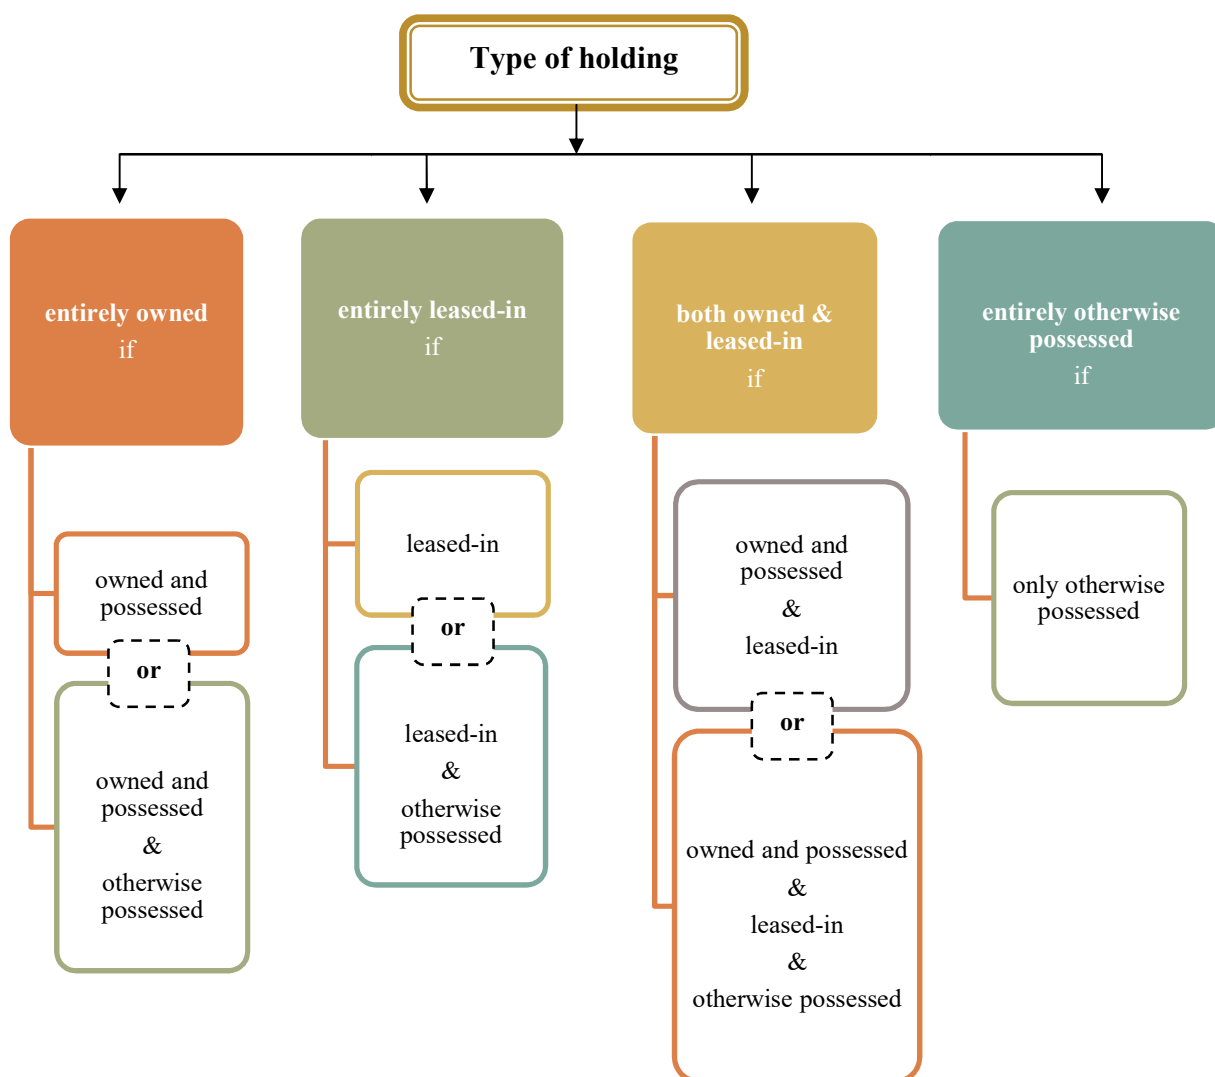

2.37 Size Class of Land Possessed: Different estimates obtained from this survey have been presented for seven size classes of land possessed.

size class of land possessed (in ha)	
Size classes (ha.)	Area included in each size class
< 0.01	0.000 ha. to 0.004 ha.
0.01 - 0.40	0.005 ha. to 0.404 ha.
0.41 - 1.00	0.405 ha. to 1.004 ha.
1.01 - 2.00	1.005 ha. to 2.004 ha.
2.01 - 4.00	2.005 ha. to 4.004 ha.
4.01 -10.00	4.005 ha. to 10.004 ha.
10.00+	10.005 and more

2.38 Type of Holding: An operational holding might be constituted of land owned and/or land leased-in by the household and in a few cases, might be constituted only of otherwise possessed land. Considering the type of possession of land included in the holding, an operational holding was classified in different types of holdings:

- entirely owned
- entirely leased-in
- both owned and leased-in
- entirely otherwise possessed

2.38.1 The following diagram may be of use for determining the type of holding of the household:

2.39 Individual and Joint Operational Holding: If the household operational holding was managed by one or more members of a single household it was taken as individual holding. An operational holding was considered as joint operational holding, if members of two or more households were involved in making major decisions on various aspects of agricultural operations carried out in the holding and were jointly responsible for running the holding.

2.40 Terms of Lease: When a plot of land was leased-out by the sample household, the terms of lease on which the area was leased-out to the lessee household was recorded. Similarly, when a plot of land is leased-in by the sample household from a lessor household, the terms of lease on which such plot was leased-in from the lessor household was recorded. The terms of lease were for *fixed money*, for *fixed produce*, for *share of produce*, *under no specified terms from relatives/to relatives and under other terms*.

2.40.1 It may be noted that the terms of lease ‘for share of produce’ meant that the owner of land receives a stipulated share of the produce but he/she did not participate in the work nor did he/she manage or direct or organise the agricultural operations of the land which he/she had leased-out. Sometimes, land owned by a sample household was looked after and used by a close relative. For example, a person staying away from his village may own a piece of land in the village which was looked after and used by his brother’s household. All such land owned by the sample household but looked after and used by some relative’s household, under no contract of payment of any kind to the owner, was treated as leasing-out to ‘relatives under no specified terms’ in respect of the sample household and with respect of the relative’s household the same land was treated as leased-in from ‘relatives under no specified terms’. All rent free leases, other than to (or from) ‘relatives under no specified terms’, was treated as leased ‘under other terms’.

2.41 Parcels: A parcel of a household operational holding is a piece of land surrounded entirely by lands not forming part of the household operational holding. It may consist of more than one plot.

2.42 Agricultural Household: For the purpose of this survey, an agricultural household was defined as a household having some production from agriculture activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc.) during last 365 days and having at least one member self employed in agriculture during last 365 days. It is important to note that households with only agricultural labourers, households receiving income entirely from coastal fishing, were not considered as agricultural households. Also, activities of rural artisans and agricultural services, activities of free collection/gathering were not treated as self employment activities in agricultural production for identification of agricultural household. Further, to eliminate households pursuing agricultural activities of insignificant nature, households with at least one member self-employed in agriculture either in the principal status or in subsidiary status and

having total value of agricultural produce more than Rs. 4000/- during the last 365 days were only considered for being covered as 'agricultural households'.

2.43 Pre-harvest Sale (Rs.): Farmers sometimes sold entire produce of a plot of land before harvesting. Information on land area used and value of such pre-harvest sales was collected for the survey.

2.44 Total Value of Output (Rs.): Value of produces for each major crop was calculated multiplying quantity with rate. For crops clubbed together as 'others', value was based on actual sale or assessment of the informant.

2.45 Value of by-products (Rs.): Value of by-products for 4 major crops and 'others', if any, were reported based on actual sale or assessment of the informant.

2.46 Agencies of Disposal for Agricultural Produce

2.46.1 Local Market (incl., local traders): These are local markets or mandis in small towns and cities to which farmers from nearby villages would bring the agricultural produce at harvest time and where traders would buy this produce from them. Local private trader refers to the private traders or households to which an agricultural household is selling off their produce.

2.46.2 APMC Market: Agricultural Produce Market Committee (APMC) is a statutory market committee constituted by a State Government in respect of trade in certain notified agricultural or horticultural or livestock products, under the Agricultural Produce Market Committee Act issued by that state government.

APMCs are intended to be responsible for (i) ensuring transparency in pricing system and transactions taking place in market area, (ii) providing market-led extension services to farmers, (iii) ensuring payment for agricultural produce sold by farmers on the same day, (iv) promoting agricultural processing including activities for value addition in agricultural produce, (v) publicizing data on arrivals and rates of agricultural produce brought into the market area for sale; and (vi) Setting up and promoting public private partnership in the management of agricultural markets. Agricultural markets *regulated* by APMCs are known as APMC market.

2.46.3 Input Dealers: Input dealers are those who are engaged in activities of providing agricultural inputs such as seeds, fertilizers, insecticides, cattle /poultry feed, fishing net, sprinkler/drip irrigation machinery, spare parts of oil engine/tractor/fishing boats, tools required for poultry/horticulture, etc.

2.46.4 Cooperatives and Government Agencies: These refer to cooperatives and Government agencies (e.g., Food Corporation of India (FCI), Jute Corporation of India (JCI), Cotton Corporation of India (CCI), National Agricultural Co-operative Marketing Federation of India Ltd. (NAFED), State Food Corporation, State Civil Supplies, etc., and various other procurement

agencies set up the State Governments for procurement of agricultural produce at regulated remunerative prices.

Regulated market is wholesale market where buying and selling is regulated and controlled by the state government/ local bodies through the market committee which includes representatives from farmers, traders, government local bodies and co-operatives. It aims at the elimination of unhealthy and unscrupulous practices reducing marketing charges and providing facilities to producers and sellers in the market.

In regulated market the sale of agricultural produce is undertaken either by open auction or by close tender method. These sales method ensure a fair and competitive price for the produce and prevent the cheating of farmers by market functionaries. By these methods, the sale is carried out under the supervision of an official of the market committee.

2.46.5 Farmer Producer Organisation (FPO): A Producer Organisation (PO) is a legal entity formed by primary producers, viz., farmers, milk producers, fishermen, weavers, rural artisans, craftsmen. A PO can be a producer company, a cooperative society or any other legal form which provides for sharing of profits/benefits among the members. In some forms like producer companies, institutions of primary producers can also become member of PO.

The main aim of PO is to ensure better income for the producers through an organization of their own. Small producers do not have the volume individually (both inputs and produce) to get the benefit of economies of scale. Besides, in agricultural marketing, there is a long chain of intermediaries who very often work non-transparently leading to the situation where the producer receives only a small part of the value that the ultimate consumer pays. Through aggregation, the primary producers can avail the benefit of economies of scale. They will also have better bargaining power vis-à-vis the bulk buyers of produce and bulk suppliers of inputs.

Farmers Producer Organisation (FPO) is one type of PO where the members are farmers. Small Farmers' Agribusiness Consortium (SFAC) is providing support for promotion of FPOs. Farmer Producer companies are FPOs registered under Indian Companies Act.

2.46.6 Private Processors: Private agencies/individuals engaged in agro processing are termed as private processors. Agro processing could be defined as set of techno-economic activities carried out for conservation and handling of agricultural produce and to make it usable as food, feed, fibre, fuel or industrial raw material.

2.46.7 Contract Farming Sponsors/ Companies: These are agencies engaged in contract farming where agricultural production is carried out on the basis of agreement between them (buyers) and farm producers. The essence of such an arrangement is the commitment of the producer/ seller to provide an agricultural commodity of a certain type, at a time and a price, and in the quantity required by a known and committed buyer. The company often also agrees to support the farmer through supplying inputs, assisting with land preparation, providing production advice and transporting produce to its premises.

2.47 Seeds: Expenditure incurred on seeds was recorded for 4 major crops on which output was recorded. When there are more than 4 crops, expenditure on seeds for crops other than 4 major crops were clubbed together and reported. Item ‘seeds’ also included seedling (baby plant).

2.48 Chemical Fertilizers: Chemical fertilizers are mostly inorganic material of natural or synthetic origin (other than liming materials) that is added to a soil to supply one or more plant nutrients essential to the growth of plants. Generally these are industrially manufactured chemicals containing plant nutrients. Some examples of chemical fertilizers are ammonium sulphate, ammonium phosphate, ammonium nitrate, urea, ammonium chloride, etc.

2.49 Bio-fertilizers: These are substances that contain living microorganisms which colonize the interior of the plant and promote growth by increasing the supply or availability of primary nutrient and/ or growth stimulus to the target crop, when applied to seed, plant surfaces or soil. Bio-fertilizers accelerate certain microbial processes in the soil which augment the extent of availability of nutrients in a form easily assimilated by plants. Examples of some of the bio-fertilizers available to farmers in India are given below:

- Nitrogen fixing bio fertilizers: e.g. Rhizobium, Bradyrhizobium, Azospirillum and Azotobacter sp.
- Phosphorous solubilising bio-fertilizers (PSB): e.g. Bacillus sp., Pseudomonas sp. and Aspergillus sp.
- Phosphate mobilizing bio-fertilizer: e.g. Mycorrhiza
- Potassium mobilizing bio-fertilizer (KMB)
- Zinc solubilising bio-fertilizer (ZSB)
- Plant growth promoting bio-fertilizers: e.g. Pseudomonas sp.

2.50 Manures: It refers to the natural substance that is obtained from the decomposition of the waste of plant and animals such as cow dung, etc. Manures contribute to the fertility of the soil by adding organic matter and nutrients, such as nitrogen that are utilized by bacteria, fungi and other organisms in the soil. Different types of manures are explained below:

- **Animal Manure:** Most animal manure consists of feces. Common forms of animal manure include farmyard manure (FYM) or farm slurry (liquid manure). FYM also contains plant material (often straw), which has been used as bedding for animals and has absorbed the feces and urine. Agricultural manure in liquid form, known as slurry, is produced by more intensive livestock rearing systems where concrete or slats are used, instead of straw bedding.
- **Compost:** It is the decomposed remnants of organic materials that have rotted into a natural fertilizer. It is usually of plant origin, but often includes some animal dung or bedding.
- **Green manures** are crops grown for the express purpose of plowing them in, thus

increasing fertility through the incorporation of nutrients and organic matter into the soil. Green manure is created by leaving uprooted or sown crop parts to wither on a field so that they serve as a mulch and soil amendment. The plants used for green manure are often cover crops grown primarily for this purpose. Typically, they are ploughed under and incorporated into the soil while green or shortly after flowering. Green manure is commonly associated with organic farming and can play an important role in sustainable annual cropping systems.

Other types of plant matter used as manure included the contents of the rumens of slaughtered ruminants, spent grain (left over from brewing beer) and seaweed.

2.51 Plant Protection Materials: Chemical And Bio-Pesticides: Plant protection chemicals included all pesticides, herbicides (kill weeds and other plants that are growing or competing with a desired species), insecticides (control or eliminate insects that affects plants or animals), fungicides (destroy fungi that infect plant or animals), rodenticides (kills mice, rats and other rodents), miticides (kills mites that live on plant, livestock) etc., as well as biotechnology products which help in controlling the thousands of weed species, harmful insects and numerous plant diseases that afflict crops. Examples of chemical plant protection materials are copper hydroxide, copper sulphate, lime sulphur, mineral oils, potassium permanganate, sulphur, potassium bicarbonate, etc. Some examples of bio-pesticides are: Azadirachtin extract (neem oil), plant oils (mint oil, pine oil, etc.), rapeseed oil, sticker/activator/spreader, etc.

2.52 Diesel, Electricity and Irrigation: Information on from where these were procured, quality/adequacy throughout the reference period, actual expenditure and imputed expenditure (if any) incurred by the household on diesel, electricity and irrigation used in crop production was recorded. If the total amount of electricity consumed during the reference period was not paid, the amount payable pertaining to the period was ascertained and recorded. If the exact amount of the bill was not known for reference period, the value was estimated based on the electric bills paid during the recent past. If the household generated own electricity (by using solar panel, etc.) for crop production and the actual expense incurred on electricity was not known, imputed value of the electricity was recorded.

2.53 Labour Human and Labour Animal: In ‘human labour’, the expenditure on payment of wages/salaries by the agricultural household for carrying out cultivation during the reference period was recorded. Payment of wages and salaries might be made for two different categories of labour:

- a) *Labour which was regular in nature:* This covered the payments made to persons working in farm and getting in return of salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract). The category not only included persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

- b) *Labour which was casual in nature*: Payments made to person(s) casually engaged in farm and getting wage according to the terms of the daily or periodic work contract was regarded as payments made for casual labour.

If it was paid in kind, the corresponding monetary value was evaluated at purchaser's price.

2.54 Minor Repair and Maintenance of Machinery and Equipment Used in Crop Production: Expenditures incurred on minor repair and maintenance of machinery & equipment used in crop production during the reference period were recorded. Expenditure on repair and maintenance did not include expenditure of a capital nature, which could enhance the longevity of the equipment. Replacement of major parts of the machinery and equipment were not included.

2.55 Interest on Loans Utilised for the Purpose of Crop Production: This was for recording the interest on working capital. Total interest paid or due to be paid for the reference period for all the loans utilized (the purpose for which the loan was taken might not necessarily be crop production) by the household for the crop production was considered, irrespective of the fact that any of the loans might have been repaid either fully or partly or found to be outstanding. However, unpaid interests prior to the reference period were not considered.

2.56 Cost of Hiring of Machinery and Equipment for Crop Production: Total rental paid or payable by the household on account of hiring of machinery and equipment for cultivation of crops was recorded.

2.57 Cost of Crop Insurance: Total premium paid by the household for crop insurance for the crops harvested during the reference period was recorded.

2.58 Lease Rent for Land Used for Crop Production: Total rent paid or payable by the household on account of hiring of land for crops harvested during the reference period was considered.

2.59 Other Expenses for Crop Production: Other expenses included charges paid for work done by others, cost of transportation, commission paid to the purchasing agents, etc.

2.60 Paid Out Expenses (Rs.): Total out of pocket expenditure incurred was recorded for each type of input.

2.61 Imputed Expenses (Rs.): In cases where no actual expenses were incurred by the household for any particular input (i.e., input used is from home stock or from free collection, for example: seeds from own stock, self and unpaid family labour, owned animal and machine labour, etc.) imputed expenses were reported. The method of imputation was as follows:

- **Seeds and manure (farm produced)** – valued at the prevailing market prices
- **Family Labour**- valued at the rate of wages paid for hired labour for similar work. Since the family labour might include labour done by men, women and children, the wage rates

might not be available directly. In such situations, the following *general rules* were followed for valuation of family labour:

- ✓ First all work done by men and women were converted into men equivalent.
- ✓ Work done by a youth below 15 years of age was taken as equivalent to half the adult.
- ✓ Work performed by a woman was taken as equivalent to 0.8 men equivalent.
- ⊕ **Owned Animal Labour**- Valued on the basis of cost of maintenance, which included cost of green and dry fodder and concentrates, depreciation on animal and cattle shed, upkeep labour charges and other expenses less value of manure and work done outside the farm.
- ⊕ **Owned Machine Labour**- Valued on the basis of cost of maintenance of farm machinery, which included diesel, electricity, lubricants, depreciation, repair and maintenance expenses
- ⊕ **Own irrigation** –Valued at on the basis of operational costs per hour
- ⊕ Exchange labour & exchange animal labour were treated as hired human labour and hired animal labour respectively.

2.62 Cost of ‘Animal Seeds’: Expenditure incurred on purchase of ‘animal seeds’ for cattle/buffalo, sheep, goat, piggery, etc., poultry & duckery and others were considered. Young animals purchased for the purpose of business only were considered here.

2.63 Animal Feed: Expenditure incurred on animal feed was collected for the following specific fodder items, namely (i) green fodder, (ii) dry fodder, (iii) concentrates (iv) other feed including minerals (salt, etc.) and medicines. If animal feeds were used from home stock or from free collection as well as received in exchange, imputed expenditure at local market price was recorded.

2.63.1 Green Fodder: Green fodder is obtained through crop cultivation. Some crops are grown exclusively for green fodder purpose. These includes Berseem, Lucerne, Cowpea, Guar, Rice bean, Velvet bean, Sorghum (fodder varieties like MP chari, Sorghum sudan grass (a hybrid developed by crossing sorghum and sudan grass), Sudax, Red chari), Napier bajra hybrid (a hybrid developed by crossing crops Napier grass & bajra), Maize (fodder varieties like African tall, J-1006, Vijay composite), Jowar, Oats, Chinese cabbage, Turnip, Fodder beet, all palatable grasses. Some crops that are primarily taken for human consumption are also used as green fodder for animals. These include maize, sugarcane, cowpea, oats, etc.

2.63.2 Dry Fodder: Dry residue of some crops is used as fodder. These include straws of wheat, paddy, sorghum, barley, jowar, gram, etc.

2.63.3 Concentrates: Concentrates generally include oil cake, crushed pulses, gram, grains, bran, husk, oil seed and gur.

2.64 Veterinary Services for Breeding and Health Services: Veterinary charges for artificial insemination of livestock were recorded. Veterinary charges for health services included medicine, vaccination, etc.

2.65 Labour Charges: Actual expenditure incurred by the household on payment of wages/salaries for carrying out animal farming activities during the reference period was recorded. If it is paid in kind, the corresponding monetary value was evaluated at purchaser's price. This also included expenditure incurred for engaging animal labour, if any, for the purpose of animal farming. If own labour or unpaid family labour was involved, its imputed value was reported.

2.66 Cost of Livestock Insurance: Total premium paid by the household for livestock insurance during the reference period was recorded. If the premium was paid annually, it was apportioned for the reference period of 30 days.

2.67 Other Expenses for Livestock: These included fuel and electricity, cost of transportation, commission paid to the purchasing agents, minor repair and maintenance of machinery and equipment including operation cost of own machinery, etc.

2.68 Minimum Support Price (MSP)

2.68.1 Minimum Support Price (MSP) is a form of market intervention by the Government of India to insure agricultural producers against any sharp fall in farm prices. MSP is announced by the Government of India at the beginning of the sowing season for certain crops on the basis of the recommendations of the Commission for Agricultural Costs and Prices (CACP).

2.68.2 If the surveyed agricultural household had reported harvesting of a crop (in block 6) for which MSP had been declared by Government of India, certain information related to the household's awareness and access to MSP (specific to that crop) was collected. The list of crops for which MSP had been declared by the Government of India for the agricultural year 2018-19 is given in Table 1 below:

Table 1: List of crops for which Minimum Support Price (MSP) has been declared by GOI

<i>crop description</i>	<i>Crop code</i>	<i>crop description</i>	<i>Crop code</i>	<i>crop description</i>	<i>Crop code</i>
<i>paddy</i>	<i>0101</i>	<i>urad</i>	<i>0203</i>	<i>de-husked coconut</i>	<i>1006</i>
<i>jowar</i>	<i>0102</i>	<i>moong</i>	<i>0204</i>	<i>sunflower seed</i>	<i>1007</i>
<i>bajra</i>	<i>0103</i>	<i>masur (lentil)</i>	<i>0205</i>	<i>safflower</i>	<i>1008</i>
<i>maize</i>	<i>0104</i>	<i>sugarcane*</i>	<i>0401</i>	<i>nigerseed</i>	<i>1010</i>
<i>ragi</i>	<i>0105</i>	<i>groundnut in shell</i>	<i>1001</i>	<i>toria</i>	<i>1012</i>
<i>wheat</i>	<i>0106</i>	<i>sesamum</i>	<i>1003</i>	<i>cotton</i>	<i>1101</i>
<i>barley</i>	<i>0107</i>	<i>rapseed/ mustard</i>	<i>1004</i>	<i>jute</i>	<i>1102</i>
<i>gram</i>	<i>0201</i>	<i>copra</i>	<i>1006</i>		
<i>arhar (tur)</i>	<i>0202</i>	<i>soyabean</i>	<i>1009</i>		

**Fair and remunerative price in case of sugarcane*

2.69 Progressive Farmer: Progressive farmers include the farmers' organizations, which might be commodity-specific – whether registered or unregistered. Many associations of growers of a particular commodity, e.g., grape, mango, onion, litchi, guava, exist in various parts of the country and these often serve as important sources of information for the farmers.

2.70 Government Extension Agent/ Agricultural Technology Managing Agency (ATMA): Extension agent/worker means an employee of the government in the Department of Agriculture/Horticulture/Animal Husbandry/Forestry/Soil Conservation or Agricultural Universities or ICAR Institutes, Agricultural Technology Management Agency (ATMA). Para-technicians/ para-veterinarians visiting from Government departments were classified under this category.

2.70.1 Agricultural Technology Managing Agency (ATMA) is a society of key stakeholders involved in agricultural activities for sustainable agricultural development in the district. It is a focal point for integrating Research and Extension activities and decentralizing day to day management of the public Agricultural Technology System (ATS). It is a registered society responsible for technology dissemination at the district level.

2.71 Krishi Vigyan Kendra (KVK): These are the centres set up by the State Agricultural Universities, Indian Council of Agricultural Research Stations, and Agricultural Research Stations of State Governments. These sometimes have Farmers' Training Centres also. The KVKs organize training, demonstration and on-farm trials on modern technological packages and on various aspects of modern agriculture. These institutions work as information-cum-service centers which make available information on new technologies in the form of booklets to the farmers. It also supplies certain inputs to the farmers which are not easily available in the market so as to make the farmer adopt the technology without any difficulty. Besides these, various agro-clinical services like soil, water, leaf and petiole analysis for effective nutrient utilization and disease and pest analysis are also provided by the KVKs.

2.72 Private Commercial Agents (Including Contract Farming Sponsors/ Companies, Drilling Contractors, etc.): Private commercial agents are mostly representatives of private research organization, contract farming sponsors/ companies, drilling contractor, etc.

Contract farming sponsors/ companies are agencies engaged in contract farming where agricultural production is carried out on the basis of agreement between them (buyers) and farm producers. The essence of such an arrangement is the commitment of the producer/ seller to provide an agricultural commodity of a certain type, at a time and a price, and in the quantity required by a known and committed buyer. The company often also agrees to support the farmer through supplying inputs, assisting with land preparation, providing production advice and transporting produce to its premises.

2.73 Cooperatives/ Dairy Cooperatives: Examples of some of the agricultural and dairy cooperatives in the country are given below (list is not exhaustive):

(i) Agricultural Cooperatives:

- ⊕ National Co-Operative Development Corporation (NCDC)
- ⊕ National Agricultural Co-operative Marketing Federation of India (NAFED)
- ⊕ Tribal Co-Operative Marketing Development Federation of India Ltd.
- ⊕ Indian Farmers Fertilizers Co-Operative Limited (IFFCO)
- ⊕ Krishak Bharati Co-Operative Limited (KRIBHCO)

(ii) Dairy Cooperatives:

- ⊕ Andhra Pradesh Dairy Development Cooperative Federation Ltd. (APDDCF)
- ⊕ Gujarat Cooperative Milk Marketing Federation Ltd. (GCMMF)
- ⊕ The Himachal Pradesh State Cooperative Milk Producers Federation Ltd.
- ⊕ The Kerala Cooperative Milk Marketing Federation Ltd.
- ⊕ Maharashtra Rajya Sahakari Dugdh Mahasangh Maryadit (MRSDMM)
- ⊕ Pradeshik Cooperative Dairy Federation Limited (UP) (PCDF)
- ⊕ Rajasthan Cooperative Dairy Federation Ltd. (RCDF)
- ⊕ West Bengal Cooperative Milk Producer's Federation (WBCMPF)
- ⊕ Bihar State Cooperative Milk Producers' Federation Ltd. (COMFED)
- ⊕ Haryana Dairy Development Cooperative Federation (HDDCF)
- ⊕ Karnataka Cooperative Milk Producers Federation Ltd. (KMF)
- ⊕ Madhya Pradesh State Cooperative Dairy Federation Ltd. (MPCDF)
- ⊕ The Orissa State Cooperative Milk Producer's Federation Limited
- ⊕ Punjab State Cooperative Milk Producer's Federation Ltd. (MILKFED)
- ⊕ Tamil Nadu Cooperative Milk Producer's Federation Ltd. (TCMPF)
- ⊕ Chhattisgarh State Co operative Dairy Federation Limited

2.74 Agriculture Clinics and Agriculture Business Centres (ACABC): The ACABC scheme was launched in 2002 and was targeted at young rural agriculture graduates who wanted to turn entrepreneurs seeking to provide fee-based agriculture services to farmers. The scheme involves mandatory training and subsidy to set up a rural service centre, often supported by a bank loan. ACABCs were to provide a range of services, including sale of inputs, agriculture advice, marketing support, etc. A mandatory two month training at the National Institute of Agricultural Extension Management (MANAGE), at Hyderabad was designed to instill the basis of business management among aspiring agriculture entrepreneurs.

2.75 Kisan Call Centre: In order to harness the potential of ICT in Agriculture, Ministry of Agriculture launched the scheme "Kisan Call Centres (KCCs)" on January 21, 2004. Main aim of the project is to answer farmers' queries on a telephone call in their own dialect. These call Centres are working in 14 different locations covering all the States and UTs. A countrywide common eleven digit Toll Free number 1800-180-1551 has been allotted for Kisan Call Centre. This number is accessible through mobile phones and landlines of all telecom networks including private service providers. Replies to the farmers' queries are given in 22 local languages.

2.76 Smartphone APP Based Information: These smartphone apps are available to farmers and all other stakeholders for extracting information related to agriculture from the web. They are also useful for remote location data entry where desktop PCs are not available. Such apps are developed through government agencies (like C-DAC, NIC, etc.) and independent Android enthusiasts/ private firms.

Some of the free smartphone apps made available in the *mKisan* portal are listed below:

- (i) **Apps for agriculture**
 - ⊕ Kisan Suvidha,
 - ⊕ PusaKrishi
 - ⊕ MKisan Application
 - ⊕ Shetkari Masik Android App
 - ⊕ Farm-o-pedia:
 - ⊕ Bhuvan Hailstorm App
 - ⊕ Crop Insurance mobile app
 - ⊕ Agri Market mobile app
- (ii) **Apps for horticulture**
 - ⊕ Sikkim Horticulture And Cash Crop Assistance
- (iii) **Apps for animal husbandry**
 - ⊕ Sikkim Allotment of Breeding Bull
 - ⊕ Application for Poultry
 - ⊕ Pashu Poshan
- (iv) **Other related apps**
 - ⊕ MSCS (Multi State Cooperative Societies)
 - ⊕ Digital Mandi India
 - ⊕ MNCFC
 - ⊕ Karnataka Bhoomi
 - ⊕ HP Soil Testing
 - ⊕ Intelligent Advisory System for Farmers
 - ⊕ Crop Info

2.77 Transactions in Livestock: An agricultural household might have purchased and sold livestock for various purposes. It was necessary to understand characteristics of such transaction and distinguish them for reporting in various blocks of this schedule. Purpose of such transactions was classified into three broad groups namely, for the purpose of business, for the purpose of acquiring productive asset and for the purpose of trading.

2.78 Farm Business: Farm business comprises household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g. paddy hulling and gur making. Although gur making is a manufacturing activity, this was covered under farm business for the purpose of this survey only when such activity was carried out in the farm by indigenous method. Such activities when they were carried out in non-

household enterprises were excluded from the purview of the farm business. Farm business included activities ancillary to agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied activities coming under Section A (Division 01 to Division 03) of the National Industrial Classification 2008.

2.79 Non-Farm Business: Non-farm business is defined as all household economic activities other than those covered in the farm business. This covered manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business excluded such activities when they were carried out in non-household enterprises. All non-farm business enterprises, which were registered under section 2m(i) or 2m(ii) and section 85 of the Factories Act, 1948 were excluded from the scope of this survey. Further, Bidi and cigar manufacturing establishments registered under the Bidi and Cigar Workers (condition of employment) Act, 1966 were also kept outside the coverage of this survey.

It may be noted that the ultimate sampling unit in this survey was the household. Information was collected on various characteristics of members of the household, of which some were related to their ownership, expenditure, receipts, sales, etc., on items related to farm business or non-farm business in such enterprises.

2.80 Expenses Incurred for Non-firm Business: Expenses incurred (paid or payable) towards running the non-farm business during the last 30 days was recorded. Expenses on inputs actually consumed were only considered.

2.80.1 Compensation to workers was reported only if they were actually payable. In respect of own account labour and unpaid family labour, the imputed expenses were not reported as expenses for non-farm business.

2.80.2 Depending on the type of non-farm business, expenses on inputs included raw materials used, cost of commodities traded, articles used for food and drink preparation, petrol, diesel, lubricants etc., minor repair and maintenance, electricity charges, fuel other than electricity, rent, travelling, freight and cartage expenses, communication expenses (telephone, fax, postal, courier, e-mail, etc.), consumable stores, packing materials, paper, printing and stationary expenses, service charges for work done by other establishments (e.g., legal, audit, advertising and other accounting services; warehousing expenses, etc.), cost of own construction (building, furniture and fixtures, etc.), interest, wages and salaries, etc.

2.81 Receipts (Rs.) from Non-firm Business: Receipts in terms of value of outputs during the reference period from running non-farm business of the household was collected. The value of output that was not sold was evaluated at price in the local market or based on the assessment of the informant. Value of products lost by theft/damage/destroyed by fire, etc., during the reference period was excluded.

2.81.1 Depending on the type of non-farm business, receipts from non-farm business included value of products and by-products manufactured, sale value of commodities traded, amounts receivable from contractor, receipts from sale of prepared food, refreshment and drinks, earnings from goods and passenger traffic, communication charges receivable from customers (STD/courier, fax, etc.), receipts for educational activity (like tuition fees, examination fees, capitation fees, etc.), receipts from consultation fees and medical services, receipts from services provided to others including commission charges, market value of own construction (on building, furniture and fixtures, etc.), value of consumption of goods/services produced or traded for own use, rent receivable on plant and machinery and other fixed assets, etc.

2.82 Net Receipts (Rs.) from Non-firm Business: Net receipts during the reference period from running non-farm business of the household were calculated after subtracting expenses from receipt.

2.83 Productive Assets: Assets represented all the things owned by the household which had money value, e.g. land, buildings, livestock, agricultural machinery and implements, etc. Assets which were used repetitively for producing goods or providing services were treated as productive asset. In this survey, information on productive assets used for farm and non-firm business were collected separately along with information on land and residential buildings.

2.84 Major Repairs / Improvement: The expenditure incurred on any major type of repairs or improvement (e.g. land) on one or more of the productive assets during the reference period was recorded. There might be some situations where the acquired land (acquired by whatever means) might need some kind of improvement for the purpose of farm business and this might result in some expenditure of the agricultural household during the reference period. In such a case, the expenditure included (i) value of purchase of all materials used for the purpose, (ii) amount paid for labour or service charges on that account, (iii) imputed value of goods and/or services supplied by the agricultural household. It is to be noted that normal repair and maintenance was excluded.

2.85 Loans: For the purpose of this survey, loans included borrowing in cash and/or kind (including hire purchases/credit purchase). Borrowings in kind were evaluated at current retail price prevalent in the local market. An advance payment received for forward delivery of goods also regarded as loan. Loans taken for any purpose was considered.

2.85.1 The following cases were not considered as a loan for the purpose of this survey:

- ⊕ Balances due on overdraft account or cash credit limits sanctioned by a bank.
- ⊕ If the original amount of an unsecured loan is less than Rs. 500/- and the said loan was proposed to be paid within a period of one month.
- ⊕ If the original quantity borrowed was less than 10 kg and the said quantity was proposed to be repaid within a period of one month.

2.86 Cash Loan: All loans taken in cash were considered as cash loans payable, irrespective of whether those loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covered borrowings at specific rate of interest for a specific period of time. However, if a loan was taken even at 'nil' rate of interest from relatives and friends, it was considered as cash loan. The loans might be taken against a security or without any security. Dues payable by the household owing to the purchase of goods under hire-purchase scheme was treated as cash loans.

2.87 Kind Loan: All loans taken in kind (except the case of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or in kind were considered as kind loans payable.

2.88 Scheduled Commercial Bank: The scheduled commercial banks are those banks which are included in the second schedule of RBI Act 1934 and which carry out the normal business of banking such as accepting deposits, giving out loans and other banking services. All loans taken from commercial banks, including nationalized banks, State Bank of India and its associates like State Bank of Rajasthan and State Bank of Mysore, and foreign commercial banks operating in India was considered as loans taken from 'scheduled commercial banks'.

2.89 Regional Rural Bank: Regional Rural Banks (RRBs) were setup with a view to developing the rural economy by providing credit and other facilities, particularly to the small and marginal farmers, agricultural labourers, artisans and small entrepreneurs. Being local level institutions, RRBs together with commercial and co-operative banks, were assigned a critical role to play in the delivery of agriculture and rural credit. The equity of the RRBs was contributed by the Central Government, concerned State Government and the sponsor bank. The function of financial regulation over RRBs is exercised by Reserve Bank and the supervisory powers have been vested with NABARD.

2.90 Cooperative Bank: When a cooperative society gets banking license, they can have deposit (savings and/or term) from members. Loan may be obtained from district or central cooperative banks, primary or central land development banks, or other types of cooperative banks.

2.91 Non-financial Company: It is an industrial concern as defined in Industrial Development Bank of India Act or a company whose principal activity is agricultural operations or trading in goods and services or real estate and which is not classified as financial or miscellaneous or residuary non-banking company.

2.92 Microfinance: Over the years, 'microfinance' has emerged as one of the important sources of institutional credit to the poor households and microenterprises. The terms microfinance and microcredit are often used interchangeably.

2.93 Chit Fund: A chit fund is a type of credit association system practiced in India. Chit fund schemes may be organized by financial institutions, or informally among friends, relatives, or

neighbors. In some variations of chit funds, the savings are for a specific purpose.

2.94 Self Help Group – Bank Linked: The provision of credit through self-help groups may be promoted by Government, banks or ‘not-for-profit’ NGOs. These SHGs are generally known as bank-linked (SHG-BL). SHG-bank linkage programme was initially promoted by the NABARD. SHG-BL, besides promoting thrift and lending to the poor, is also used for providing subsidised credit to the poor households under programmes.

2.95 Self Help Group – Non Banking Financial Companies: Provision of credit through self-help groups may alternatively be promoted by agencies which are private for-profit non-banking financial company (NBFC). NBFCs also lend to the poor households through SHGs which are specifically organised as joint liability groups (JLGs) for lending and recovering loans on behalf of the NBFCs

2.96 Co-operative Credit Society: It is an organisation created under the cooperative movement whose main objective is to provide financial help to its members.

2.97 Non-Banking Financial Company (NBFC): A NBFC is a company registered under the Companies Act, 1956 engaged in the business of loans and advances, acquisition of shares/stocks/bonds/debentures/securities issued by Government or local authority or other marketable securities of a like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of agriculture activity, industrial activity, purchase or sale of any goods (other than securities) or providing any services and sale/purchase/construction of immovable property.

2.98 Landlord: The credit agency for loans given by landlords to their own tenants was considered as loan from ‘landlord’. If the tenant took a loan from a person who was not his landlord, but belonging to the landlord class, the credit agency in such cases was ‘agricultural money lender’ or ‘professional money lender’, etc., depending upon the types of money lending business done by the landlord.

2.99 Agricultural Money Lender: An agricultural moneylender is a person whose profession is agriculture and who is also engaged in money lending business.

2.100 Professional Money Lender: A professional money lender is a person who earns the major part of his income from money lending.

2.101 Input Supplier: Input supplier is a person who supplies goods to producers on credit.

2.102 Relatives & Friends: If a loan was received from one of the relatives or friends free of interest it was considered as a loan taken from ‘relatives and friends’. If the loan had interest it was considered as taken from an ‘agricultural moneylender’, professional moneylender, ‘input supplier’, etc., depending upon the type of business carried out by the relative or friend.

2.103 Market Commission Agent/Traders: Commission agents are the key players between

the farmers and buyers for facilitating the auction, arranging for the payment to the farmers (sellers) and other facilities like loading/unloading and cleaning of the produce and delivery of the produce to the buyers. They also arrange the required equipments, machines and labour for weighing, filling and stitching the grain bags for which the farmers and buyers pay as per the rates prescribed under the Punjab Agricultural Produce Market Act, 1961. The capital intensive nature of green revolution technology increased the financial needs of the farmers and the procurement needs of the state due to substantial increase in the agricultural production. As a result, two inter-linked markets; credit market and product market emerged, where commission agents played a dominant role. The institutional sources alone could not meet the credit requirements of the farmers and they had to go for non-institutional credit, especially from commission agents.

2.104 Purpose of Loan: The purpose for which the loan was incurred by the household was recorded. The purpose of loan was defined as the occasion which prompted the households to contract the loan. Even if the loan was utilised for a purpose other than that for which it is borrowed, only the original purpose of borrowing was recorded

The various purpose categories are as follows:

- (i) **Capital expenditure in farm business:** The expenditure incurred on account of purchase of land, land rights, reclamation of land for farm business, new purchases, additions, major repairs and alterations and improvement of barns & animal sheds, orchards and plantations, wells, borewells, tubewells, irrigation resources, agricultural machinery and implements, transport equipment for farm business, purchase and other capital expenditure incurred on milch or working/breeding cows and buffaloes, egg-laying ducks and hens, etc., constitute the capital expenditure in farm business.
- (ii) **Revenue expenditure in farm business:** The expenditure incurred on account of purchase of seeds, manure, fodder, payment of wages, rent, land revenue, cess, water charges etc., hire charges of pumps, implements, etc., constitute the revenue expenditure in farm business.
- (iii) **Non-farm business:** Loans taken to meet the expenses of both capital and revenue expenditure in non-farm business are to be considered. The expenditure incurred on account of purchase of land, purchase and constructions, additions and alterations, major repairs of workplaces, workshops/manufacturing units, shops and other construction in relation to non-farm business, transport equipment, non-farm business equipment and accessories, etc., constitute the capital expenditure in non-farm business. Whereas, expenditure incurred on account of purchase of raw materials, merchandise, fuel & lubricants, payments of rent, salaries and wages, hire charges of implements and machinery, etc., constitute the revenue expenditure in non-farm business.
- (iv) **For housing:** The expenditure incurred by the household on account of purchase of residential plots; purchases, repairs, additions & alterations, and new construction of buildings for residential purposes constitute the expenditure on housing.

- (v) **For marriages and ceremonies:** The expenditure incurred by the household for marriages or other social ceremonies constitute this expenditure.
- (vi) **For education:** The expenditure incurred by the household on account of tuition fees, admission fees, purchase of books, notebooks & stationery, etc., for education constitute the expenditure on education.
- (vii) **For medical:** The expenditure incurred by the household on hospitalization, doctor's fees, purchase of medicines, medical diagnostic tests like scans, X-rays, ECG, EEG and other pathological tests constitute the expenditure on medical treatment.
- (viii) **Other consumption expenditure:** The expenditure incurred by the household on account of purchase of durable household assets, clothing for use of the household; etc., which are not covered in (iv) to (vii) above, constitute the other consumption expenditure.
- (ix) **Others:** 'Others' might include financial investment expenditure, expenditure on litigation, repayment of debt, etc.

2.105 Amount Outstanding Including Interest as on Date of Survey (Rs.): For each loan, the total amount due on the date of survey (i.e., the outstanding principal *plus* the interest due) was recorded. Initial discount allowed, if any, in the principal was taken into account while recording the total amount of loan outstanding on the date of survey. For credit purchase, it was first ascertained whether such credits are really due on the date of survey or not. Sometimes the payments were usually made to shopkeepers (for purchases of some items like milk, newspaper, etc.), or for house rent, electricity charges, doctors, maid servants, etc., once in a month or at the end of the month or after a fixed period of time, in all such cases, dues were considered only after the expiry of the stipulated due date of payment of such charges.

2.106 Kisan Credit Card: *Kisan Credit Cards* (KCC) are issued by the Banks to farmers on the basis of their land holdings so that the farmers might use them to readily purchase agricultural inputs such as seeds, fertilizers, pesticides, etc., and draw cash for their production needs. KCC Scheme aims at adequate and timely support from the banking system under a single window with flexible and simplified procedure to the farmers for their cultivation needs including purchase of inputs in a flexible and cost effective manner. The Model scheme, prepared by NABARD, is being implemented by commercial banks, Regional Rural Banks (RRBs) and cooperative banks. The scheme provides broad guidelines to the banks for operationalising the KCC scheme, implementing banks have the discretion to adopt the same to suit location specific requirements.

2.106.1 The cultivation needs of the farmers for which KCC can be made use of are indicated below:

- To meet the short term credit requirements for cultivation of crops;
- Post-harvest expenses;
- Produce marketing loan;
- Consumption requirements of farmer household;
- Working capital for maintenance of farm assets and activities allied to agriculture;

- ☛ Investment credit requirement for agriculture and allied activities.

2.106.2 Under the scheme, banks provide the Kisan Credit Cards (Smart card / Debit card (Biometric smart card compatible for use in the ATMs / Hand held Swipe Machines and capable of storing adequate information on farmers identity, assets, land holdings and credit profile etc.)) to farmers who are eligible for sanction of production credit of Rs.5000/- and above.

2.107 Soil Health Card: Soil Health Card (SHC) is a Government of India flagship scheme launched in February 2015 and promoted by the Department of Agriculture & Co-operation under the Ministry of Agriculture.

2.107.1 Under the scheme, the State/UT government issues soil cards to farmers across the country at an interval of 2 years. These cards will carry crop-wise recommendations of balanced doses of fertilizers to help farmers to improve productivity through judicious use of fertilizers and ameliorants. All soil samples are being tested in various soil testing labs across the country to check soil health, i.e., the strength and weaknesses (micro-nutrients deficiency) of the soil and suggest measures to deal with it. The result and suggestion are being mentioned in the soil health cards.

2.108 Animal Health Card (Nakul Swasthya Patra): National Mission for Bovine Productivity Scheme of Department of Animal Husbandry, Dairying and Fisheries, under its *Pashu Sanjivani* component targets to register 85 million animals in milk with UID and issue health card (*Nakul Swasthya Patra*) during the period 2016-2019. Scientific management of animals and controlling the spread of animal diseases are the expected outcomes of this scheme.

2.109 PM Fasal Bima Yojana: PMFBY gives insurance coverage to food crops (cereals, millets and pulses), oilseeds, annual commercial/horticulture crops. Different states have different list of crops which are brought under PMFBY.

2.110 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA): The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) are formed by the State Governments. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

Chapter Three

Summary of Findings

Chapter Three

Summary of Findings

3.0. Introduction

3.0.0 The Integrated Schedule of enquiry (Schedule 33.1) used in the survey of *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households* of NSS 77th round (January 2019 – December 2019), collected detailed information on ownership of land and livestock holdings and details of operational holdings of the rural households including agricultural households with reference to the agricultural year July 2018 – June 2019. In respect of the agricultural households, the Schedule collected information on their farm and non-farm business, and other aspects of farming like their awareness and access to various facilities such as Minimum Support Price (MSP), technical advices in the field of agriculture, details of crop loss and crop insurance, purchase and sale of productive assets, etc. for the reference period of the two halves of the agricultural year July 2018 – June 2019. In this Chapter various estimates are presented for the indicators related to ownership of land and livestock holdings, operational holdings, characteristics of agricultural households, different aspects of farming, income, expenditure, productive assets and indebtedness of agricultural households.

This Chapter is arranged in the following Sections:

- ◆ Section One: Some Characteristics of Rural Households
- ◆ Section Two: Household Ownership Holdings of Land and Operational Holdings
- ◆ Section Three: Ownership of Livestock by Rural Households
- ◆ Section Four: Some Aspects of Farming
- ◆ Section Five: Income, Expenditure, Productive Assets and Indebtedness of Agricultural Households

3.0.1 Presentation of Estimates

3.0.1.1 Presentation of State/UT Level Estimates

- ◆ In this Report State-wise figures have been presented for those States for which number of sample rural households is at least 300.
- ◆ Figures for all the North-Eastern (NE) States, except Assam, have been clubbed and are shown under the head ‘Group of NE States’. The figures of the ‘Group of NE States’ are for the following NE States: *Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura*. For these States, State-wise figures are also presented.
- ◆ Figures for all the UTs have been clubbed and are shown under the head ‘Group of UTs’ as sample number of rural households for each of the UTs is less than 300. The figures of the Group of UTs are for the following UTs: *Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep and Puducherry*.

- ◆ Social group wise figures are presented in respect of the States/Group of NE States/Group of UTs having at least 300 sample rural households only when the sample number of rural households in the respective Social Group was at least 100 during first visit of the survey.
- ◆ Estimates of Jammu and Kashmir include the part related to UT of Ladakh.
- ◆ Thus, the presentation of the results are made for the following States/Group of NE States/Group of UTs:

Andhra Pradesh	Karnataka	Rajasthan
Arunachal Pradesh	Kerala	Sikkim
Assam	Madhya Pradesh	Tamil Nadu
Bihar	Maharashtra	Telangana
Chhattisgarh	Manipur	Tripura
Gujarat	Meghalaya	Uttarakhand
Haryana	Mizoram	Uttar Pradesh
Himachal Pradesh	Nagaland	West Bengal
Jammu & Kashmir	Odisha	Group of N E States
Jharkhand	Punjab	Group of UTs

3.0.1.2 Presentation of Crop-wise Estimates

- ◆ Crop-wise estimates are presented for those selected crops which were reported by at least 1 percent of the surveyed agricultural households at all India level separately for the two halves of the agricultural year.
- ◆ Crop-wise estimates for different States, Group of NE States and Group of UTs are presented in the Detailed Tables (Appendix A) for maximum of five selected crops subject to the condition that at least 50 households had reported that crop.
- ◆ Wherever figures for ‘all crops’ are presented, these include all the crops reported by the households including those which are not classified as selected crops.
- ◆ Selected crops are: Paddy, Jowar, Bajra, Maize, Ragi, Wheat, Barley, Gram, Arhar (Tur), Urad, Moong, Masur (Lentil), Sugarcane, Potato, Onion, Groundnut, Sesamum, Rapeseed/Mustard, Coconut, Sunflower seed, Safflower, Soyabean, Nigerseed, Cotton, Jute.
- ◆ Thus the presentation of crop-wise estimates are made in respect of the following crops:

Paddy	Arhar(tur)	Groundnut
Jowar	Urad	Rapeseed/Mustard
Bajra	Moong	Coconut
Maize	Masur (lentil)	Soyabean
Ragi	Sugarcane	Cotton
Wheat	Potato	
Gram	Onion	

3.1 Section One: Some Characteristics of Rural Households

3.1.0 This Section presents estimates of some characteristics of rural households. In this Section, indicators are presented for both agricultural¹ and non-agricultural households.

3.1.1 Estimated Number of Rural Households

3.1.1.1 Survey Based Estimates of Agricultural and Non-Agricultural Households

In Statement 1.1, estimates of agricultural households, non-agricultural households and rural households obtained from design based estimates of the visit-1 data of the Survey are presented. Corresponding figures for each States/Group of UTs/Group of North-Eastern States are presented in Statement 1.1.1.

Statement 1.1: Estimates and percentage of agricultural households and non-agricultural households during agricultural year July 2018- June 2019			
Indicator	agricultural households	non-agricultural households	rural households
(1)	(2)	(3)	(4)
Estimated number (in Millions)	93.094	79.350	172.443
Percentage distribution	54.0	46.0	100.0

Ref: Table 2 of Appendix A

3.1.1.2 Rural Households by Social Group

As part of the household characteristics of the surveyed households, social group of the household as reported by the informant was recorded. It may be noted that the scope of the survey being all households without special focus on social groups, sample design was not tailored for netting in households belonging to special social groups. Thus the reliability of the results based on social groups is critically dependent on the sample size of households of different social groups which happened to be netted in a general-purpose representative sample of households. It may be noted that the number of sample households for a particular social group in a State/UT may not be adequate enough in providing sufficiently reliable estimates of the various indicators. This caution is sounded upfront for the interpretation of State level results for social groups.

The distribution of households by social group at all-India level, based on the visit-1 data of the survey, is presented in Statement 1.2 separately for agricultural households and non-agricultural households. Percentage distributions of agricultural households, non-agricultural households and rural households by social group for different State/Group of UTs/Group of North-Eastern States are presented in Statement 1.2.1.

¹ The definition of Agricultural Household for the purpose of the survey is given in Para.2.42 of Chapter Two.

Statement 1.2: Percentage distribution of agricultural households and non-agricultural households by social group for the agricultural year July 2018- June 2019

social group	agricultural households	non-agricultural households	rural households
(1)	(2)	(3)	(4)
estimated number (in Millions)			
ST	13.217	7.921	21.138
SC	14.788	22.519	37.306
OBC	42.622	33.980	76.601
others	22.467	14.931	37.398
all	93.094	79.350	172.443
percentage distribution			
ST	14.2	10.0	12.3
SC	15.9	28.4	21.6
OBC	45.8	42.8	44.4
others	24.1	18.8	21.7
all	100.0	100.0	100.0

Ref: Table 3 of Appendix A

3.1.2 Land Possessed by the Rural Households

3.1.2.1 Out of various categories of land reported against a rural household, land which are 'owned and possessed', 'leased-in' and 'otherwise possessed' are combined and termed as 'land possessed' by the household.

3.1.2.2 Statement 1.3 gives the percentage distribution of agricultural and non-agricultural households (based on the visit-1 data) by size classes of land possessed (ha.) at all-India level. Corresponding estimates combining all the social groups for different States/Group of UTs/Group of North-Eastern States are in Statement 1.3.1.

Statement 1.3: Percentage distribution of agricultural and non-agricultural households by size class of land possessed (ha.) for the agricultural year July 2018 – June 2019

size class of land possessed (ha.)	agricultural households	non-agricultural households	rural households
(1)	(2)	(3)	(4)
Social Group: ST			
< 0.01	0.3	29.2	11.1
0.01 - 0.40	24.5	63.5	39.1
0.40 - 1.00	44.2	4.5	29.3
1.01 - 2.00	21.3	2.6	14.3
2.01 - 4.00	7.9	0.2	5.0
4.01 - 10.00	1.6	0.0	1.0
10.00 +	0.1	0.0	0.1
all sizes	100.0	100.0	100.0
Social Group: SC			
< 0.01	1.4	28.7	17.9

3.1.3 Distribution of Rural Households by Household Classification

3.1.3.1 Based on the sources of the household's major income during the 365 days preceding the date of survey, each surveyed household has been classified into different *household classification*. For determining *household classification*, only the household's income from economic activities are considered. Though, staying-in domestic servants, paying-guests are considered as household members for the purpose of the Survey, their income are not taken into account while determining the household classification of the households they were enumerated in. The detailed procedure for working out the household classification as followed in the survey has been elaborated in Chapter Two of this report.

Percentage distribution of agricultural and non-agricultural households by household classification for different size classes of land possessed (ha.) is given in Statement 1.4 based

on the households surveyed during visit-1. Corresponding estimates for 'all size classes' for different States/Group of UTs/Group of North-Eastern States are given in Statement 1.4.1.

3.1.4 Education and Training

3.1.4.1 Literacy Rate among persons of age 7 years and above, percentage of persons of age 15 years and above with level of education secondary and above and percentage of persons of age 15 years and above with formal training in agriculture

Literacy rate is defined as the percentage of literates among persons of age 7 years and above. Level of education is the highest level of education successfully completed. In this survey, information about the household members who have attended some *formal training in agriculture* was collected during the visit-1 of the survey. Any training in agriculture generally conducted by an institution and having a course structure, time schedule and that might be issuing of certificate on successful completion was considered as *formal training in agriculture* for the purpose of the survey. Those who have completed the full duration of the training or attending the training at the time of the survey were classified as '*attended formal training in agriculture*'.

In Statement 1.5, indicators of education and training are presented for agricultural households, non-agricultural households and all rural households based on the visit-1 data of the survey. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States are in Statement 1.5.1.

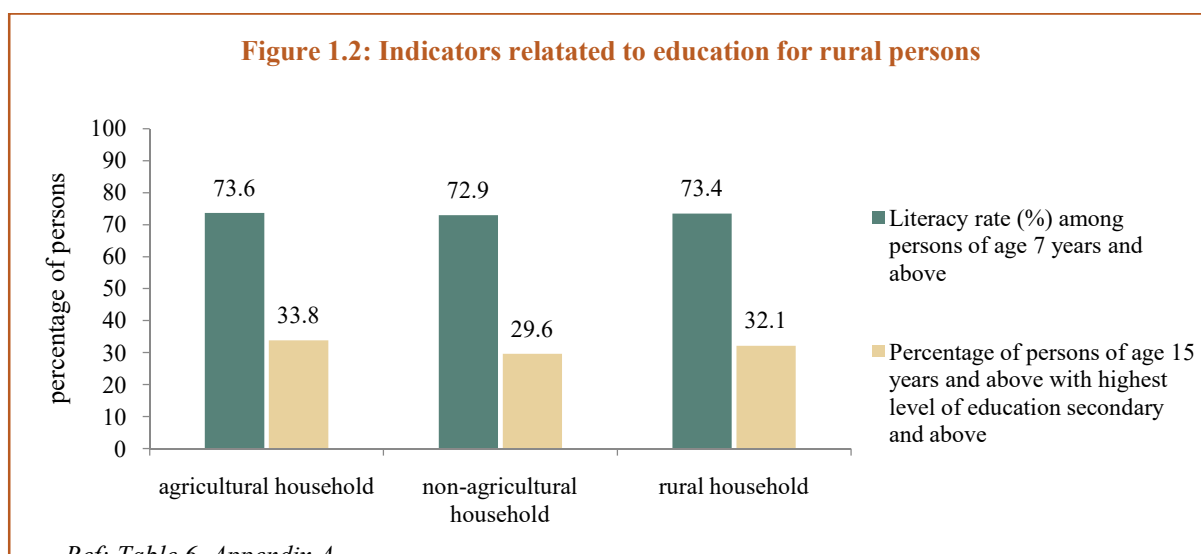

Statement 1.5: Indicators relating to level of education

category of households	literacy rate (in per cent) among persons of age 7 years and above			percentage of persons of age 15 years and above with highest level of education secondary and above			percentage of persons of age 15 years and above who have attended any formal training in agriculture		
	male	female	person*	male	female	person*	male	female	person*
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
agricultural households	81.9	65.0	73.6	40.4	27.0	33.8	1.1	0.3	0.7
non-agricultural households	80.0	65.9	72.9	35.0	24.1	29.6	0.3	0.1	0.2
rural households	81.1	65.4	73.4	38.3	25.9	32.1	0.8	0.2	0.5

Ref: Table 6 of Appendix A

Note: *Person also includes transgender

Literary rate (in %) for persons 7 years and above and percentage of persons of age 15 years and above with level of education secondary and above are given in Figure 1.2 separately for agricultural, non-agricultural and all rural households.

3.2 Section Two: Household Ownership Holdings of Land and Operational Holdings

3.2.1 Household Ownership Holdings of Land

3.2.1.1 Average Size of Household Ownership Holdings and Percentage of Landless Households

Land, with permanent heritable possession, with or without right to transfer the title, was considered as owned land. The land held in owner-like possession under a long-term lease or assignment (e.g., village land possessed by a tribal household as per traditional tribal rights or community land customarily operated by a tenant for a long period) was also treated as land owned. A household ownership holding includes all plots (or parts of plot) of land owned by a member of the household, whether the land is cultivatable or not. Thus, a household ownership holding may include, besides cultivatable land, areas under forest, barren and uncultivable land, cultivatable waste land, land put to non-agricultural uses (viz. house sites, roads, etc.), land growing miscellaneous tree crops, etc.

The average size of household ownership holdings, proportion of landless households and average area (ha.) owned per household excluding landless households, are presented in Statement 2.1 for the whole agricultural year 2018-19. Households with no land or with ownership holdings of area less than or equal to 0.002 ha. are considered as 'landless' in this Report. Estimates obtained from NSS 70th round (January 2013 – December 2013) and NSS 59th round (January 2003 – December 2003) are also presented in this Statement. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States are presented in Statement 2.1.1.

Statement 2.1: Average size of household ownership holdings and percentage of landless households during 2003, 2013 and 2019

year of survey	average area (ha.) owned per household	percentage of landless households	average area (ha.) owned per household excluding landless households
(1)	(2)	(3)	(4)
2019	0.512	8.2	0.558
2013	0.592	7.4	0.639
2003	0.725	10.0	0.806

Note: Land holdings 'less than or equal to 0.002 hectares' is classified under 'landless' category, also includes plots where area is not reported.

Ref: Table 31 of Appendix A for figures of 2019; Source : NSS Report No.571 for figures of 2013 and 2003

3.2.1.2 Rural Households by Different Ownership Holding Classes

Percentage distribution of rural households by different ownership holding classes, during July 2018-June 2019 is presented in Statement 2.2 for each household social group. Percentage distribution of households and area owned for different States/Group of UTs/Group of North-Eastern States is given in Statement 2.2.1.

Statement 2.2: Percentage distribution of rural households and percentage distribution of area owned by size category of ownership holdings for each household social group

average area (ha.) owned per household	0.586	0.242	0.543	0.677	0.512

Note: Percentage distribution may not add up to 100 due to rounding

Ref: Table 31 of Appendix A

3.2.3 Incidence and Extent of Tenancy of Land

3.2.3.1 Leased-Out Land and Leased-In Land

Land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title is defined as land leased-out. It is defined as land leased-in if it is taken by a household on rent or free without any right of permanent or heritable possession. The lease contract may be written or oral. If the lease contract is written, then it is considered

as ‘recorded lease’ and if the lease contract is oral then it is considered as ‘non-recorded lease’.

The survey collected information on the land leased-out and leased-in by the rural households. The extent of tenancy in rural India as estimated from the surveyed households of visit-1 and visit-2 during the two halves of the agricultural year 2018-19 are respectively presented in Statement 2.5. Estimates relating to leased-out land and leased-in land for different States/Group of UTs/Group of North-Eastern States are given in Statement 2.5.1.

Statement 2.5: Leased-out land and leased-in land				
indicator	leased-in land		leased-out land	
	July 18-Dec 18	Jan 19- Jun 19	July 18-Dec 18	Jan 19- Jun 19
(1)	(2)	(3)	(4)	(5)
estimated households reporting (million)	24.034	22.804	5.518	6.417
percentage of households reporting	13.9	13.3	3.2	3.7
average area per reported household (ha.)	0.481	0.476	0.694	0.686

Ref: Tables 33, 34 of Appendix A

3.2.3.2 Terms of Lease for Leased-Out Land

Land lease is a contract between two parties under certain terms of lease which are binding on both the parties. The specific terms of lease on which data were collected in the survey are: (i) for fixed money, (ii) for fixed produce, (iii) for share of produce, (iv) from relatives under no specified terms, and (v) under other terms.

Statement 2.6 gives the percentage distributions of leased-out area over different terms of lease during the two halves of the agricultural year July 2018 – June 2019 as obtained from the surveyed households of visit-1 and visit-2 separately. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States is given in Statement 2.6.1.

Statement 2.6: Percentage distribution of area of leased-out land by terms of lease		
terms of lease	July 18-Dec 18	Jan 19- Jun 19
(1)	(2)	(3)
fixed money	45.1	49.4
fixed produce	10.9	7.4
share of produce	24.0	27.3
under no specific terms from relatives	16.5	13.7
other	3.4	2.2
any terms of lease (incl. n.r.)	100.0	100.0

Note: Figures may not add up to 100 due to rounding/ not reported cases

Ref: Table 35 of Appendix A

3.2.4 Operational Holdings and Area Operated

3.2.4.1 Estimates of Operational Holdings and Area Operated: Household operational holding has been defined as land that was used wholly or partly for agricultural production and was operated (directed/managed) by one household member alone or with assistance of others, without regard to title, size or location. Within a household, multiple operational holdings were not distinguished. The land might be operated by members belonging to a single household or by members belonging to more than one household operating jointly. However, holdings operated as cooperative farms were not considered as household operational holding in this survey. A household growing vegetable in the kitchen garden or flowers in the courtyard or raising livestock & poultry or carrying out pisciculture was considered to operate a holding, even if no crop production was undertaken by it during the reference period.

As distinct from a household ownership holding, which was restricted to the area of land owned by a household, operational holding encompasses all land - owned, leased-in or otherwise possessed with the condition that some agricultural activity was carried out on any part of the land under its possession during the reference period.

It may be noted here that during 2002-03 (59th round), the area possessed by an operational holding for the major part of the reference period was taken as its 'area operated' while in 2012-13 (70th round) and 2018-19 (77th round) 'area operated' included the area of the plots which were used for agricultural activities, i.e., only crop production on jhum land, only crop production on land other than jhum land, only farming of animal/fishery, both crop production and farming of animal /fishery, and other agricultural uses. This may be kept in mind while interpreting the information outlined here.

Thus, if a household carried out any agricultural operation during the reference period on a plot of land possessed by the household, then all the plots possessed by the household during the major part of the reference period (including those which are put to uses other than agricultural production, such as house-sites, paths, buildings, etc.) were also included in the area of the household operational holding. However, when a household does not undertake any agricultural production on any part of the land possessed by it during the reference period, it was not considered to have any operational holding. Only the area used for agricultural activities in the operational holding in a reference period is termed as area operated in that reference period.

Statement 2.7 gives the estimated number of operational holdings, average area per operational holding and average area operated per holding at all-India level during the two halves of the agricultural year 2018-19 as well for the whole agricultural year. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States is given in Statement 2.7.1.

Statement 2.7: Estimated number of operational holdings, averaged area of operational holding and average area operated per operational holding

Indicator	July 18-Dec 18	Jan 19- Jun 19	Jul 18 – Jun 19
(1)	(2)	(3)	(4)
agricultural households			
estimated number of operational holdings (million)	91.022	75.744	89.584
average area per operational holding (ha.)	0.993	0.968	1.004
average area operated per operational holding (ha.)	0.901	0.751	0.921
non-agricultural households			
estimated number of operational holdings (million)	12.432	10.168	12.398
average area per operational holding (ha.)	0.234	0.230	0.252
average area operated per operational holding (ha.)	0.183	0.161	0.200
rural households			
estimated number of operational holdings (million)	103.454	85.913	101.982
average area per operational holding (ha.)	0.902	0.880	0.913
average area operated per operational holding (ha.)	0.815	0.682	0.833

3.2.4.2 Trends in Operational Holdings

Statement 2.8 gives estimated number and area of operational holdings during the agricultural years 2002-03, 2012-13 and 2018-19.

Statement 2.8: Estimated number of operational holdings, area and area operated			
Indicator	2018-19	2012-13	2002-03
(1)	(2)	(3)	(4)
Number of operational holdings (million)	101.982	108.78	101.27
Average area operated (ha.) per holding	0.833	0.87	1.06
Percentage of joint holdings	4.4	2.6	0.4
Number of parcels per holding	3	2	2.3
Percentage of operational holdings with partly or wholly	Owned	97.7	97.3
	Leased-in	17.3	13.7
In total area of operational holding, percentage share of	area owned	85.6	87.8
	area leased-in	13.0	11.3
	area otherwise possessed	1.4	1.0

Ref: Tables 36, 37 and 39 of Appendix A

Note: 1. Figures for previous years: NSS Report No.571

3.2.4.3 Size Distribution of Operational Holdings

The percentage distribution of number of operational holdings by category of holding (land size in area) during the agricultural years 2002-03, 2012-13 and 2018-19 is given in Statement 2.9. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States for 2018-19 is given in Statement 2.9.1.

Statement 2.9: Percentage distribution of number of operational holdings and percentage distribution of area operated by size category of operational holdings

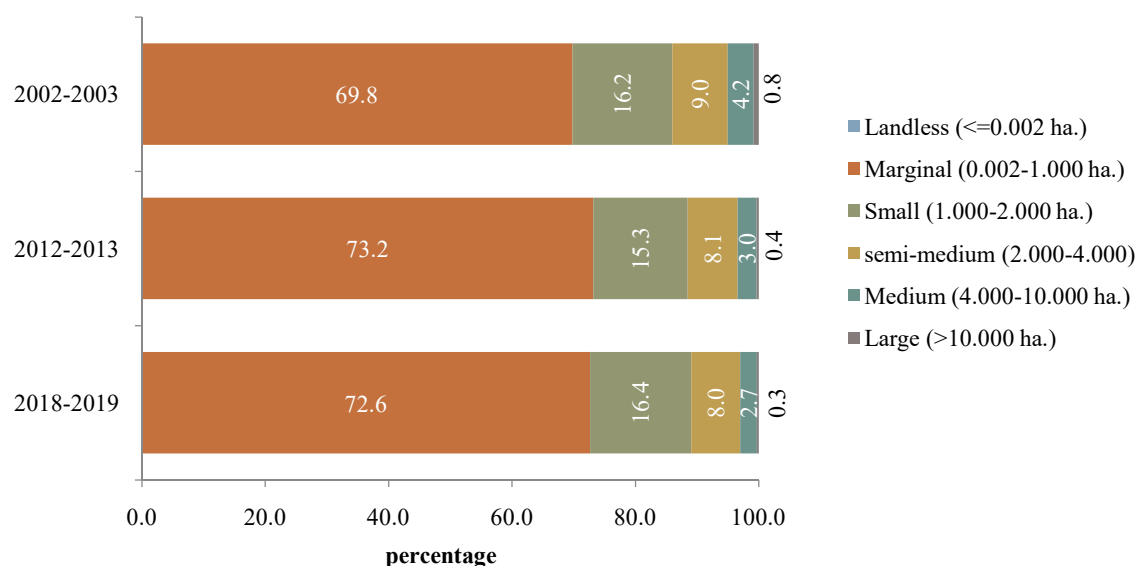

size category of operational holdings (in ha.)	percentage distribution of number of operational holdings				percentage distribution of area operated			
	2018-19	2012-13	2002-03		2018-19	2012-13	2002-03	
			kharif	rabi			kharif	rabi
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Landless (<=0.002)	0.0	0.0			0.0	0.0		
Marginal (0.002-1.000)	72.6	73.2	69.8	70.0	31.7	27.7	22.6	21.7

Large (>10.000)	0.3	0.4	0.8	0.8	5.4	6.0	11.8	12.5
all sizes	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Note: Figures may not add up to 100 due to rounding

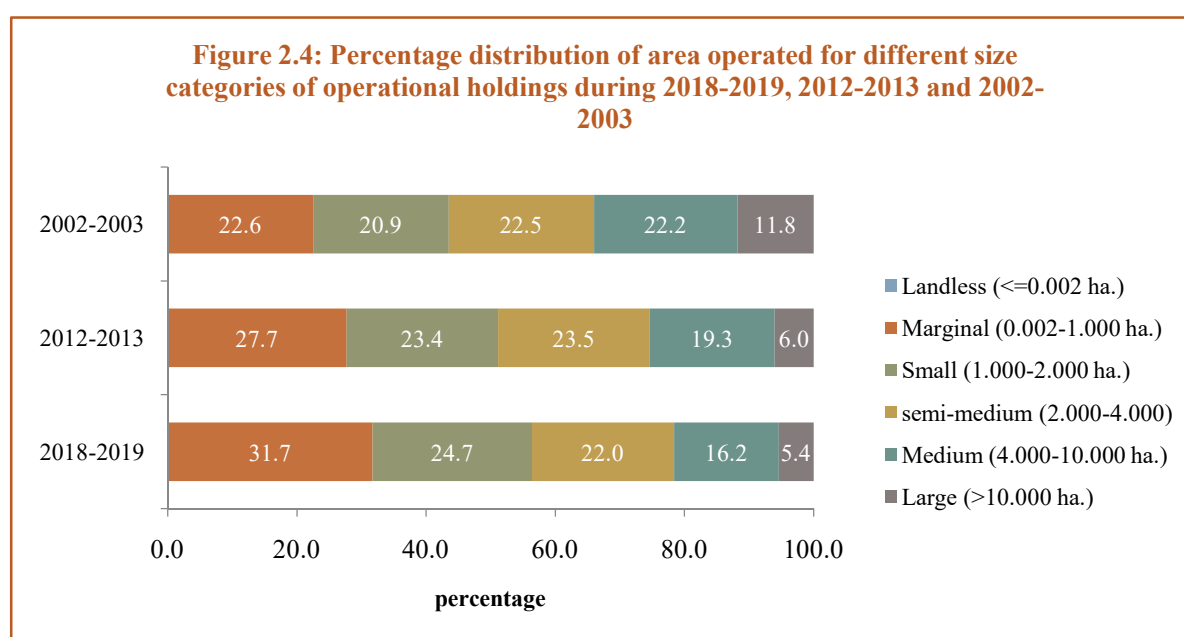

Ref: 1. Data for 2019 – Table 36 of Appendix A; 2. Previous years' data: NSS Report No. 571

For different category of operational holdings, the percentage distribution of area operated and the percentage distribution of household operational holdings for different size categories of operational holdings for the agricultural years 2018-19, 2012-2013 and 2002-2003 are respectively shown in Figures 2.3 and 2.4. It may be noted here that the estimates of kharif season have been used for the year 2002-03 in this figure.

Figure 2.3: Percentage distribution of number of household operational holdings for different size categories of operational holdings during 2018-2019, 2012-2013 and 2002-2003

Ref: Table 36, Appendix A for 2019 figure, NSS Report No. 571 for previous years' data

Ref: Table 36, Appendix A for 2019 figure, NSS Report No. 571 for previous years' data

3.2.4.4 Tenancy in Operational Holdings

The grant of the right to use a piece of land to others, either on rent or free, by the owner without transferring the title is termed land lease. Agreements of such lease, even when made orally, have been considered as lease contracts in this survey. On the other hand, hereditary tenancy and long-term lease for 30 years or more are not treated as leased-in land, but as land owned.

Statement 2.10 gives the incidence of tenancy of operational holdings for the agricultural years 2018-19, 2012-13 and 2002-03. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States is given in Statement 2.10.1.

Statement 2.10: Percentage of tenant holdings and area leased-in during 2018-2019, 2012-2013 and 2002-2003		
year	percentage of tenant holdings	percentage of area leased-in
(1)	(2)	(3)
2018-2019	17.3	13.0
2012-2013	13.7	11.3
2002-2003	9.9	6.5

'tenant holding' stands for an operational holding with wholly or partially leased-in area
Ref: Table 36, 37 and 39 of Appendix A

3.2.4.5 Distribution of Land Possessed by Type of Land Use

The specific land uses on which information was separately collected in the survey were-

- (i) only for crop production on jhum land,
- (ii) only for crop production on land other than jhum land,
- (iii) only for farming of animal

- (iv) both for crop production and farming of animal/ fishery
- (v) for other agricultural uses
- (vi) for other uses (non-agricultural).

The percentage distribution of area of land possessed by type of use is presented in Statement 2.11 for different size categories of operational holdings for two halves of the agricultural year as well as for the whole agricultural year 2018-19. The corresponding estimates for different States/Group of UTs/Group of North-Eastern States for all size classes of operational holdings are given in Statement 2.11.1.

Statement 2.11: Percentage distribution of area of land possessed by type of land use for different size categories of operational holdings

size category of operational holdings (in ha.)	only for crop production on jhum land	only for crop production on land other than jhum land	only for farming of animal	both for crop production and farming of animal/ fishery	for other agri. uses	for other uses (non agri. uses)	any type of land use (incl. n.r.)

3.3 Section Three: Ownership of Livestock by Rural Households

3.3.0 The Integrated Schedule of enquiry (Schedule 33.1) used in the survey of *Land and Livestock Holdings of Households and Situation Assessment of Agricultural Households* of NSS 77th round (January 2019 – December 2019) had provision to collect detailed information on the different types of livestock owned by the surveyed households at the time of the survey. Like in previous LHS surveys, this information was collected only during the first visit (Visit -1) of the survey.

3.3.1 Ownership of Livestock by Rural Households

3.3.1.1 Households Reporting Ownership of Livestock and Poultry

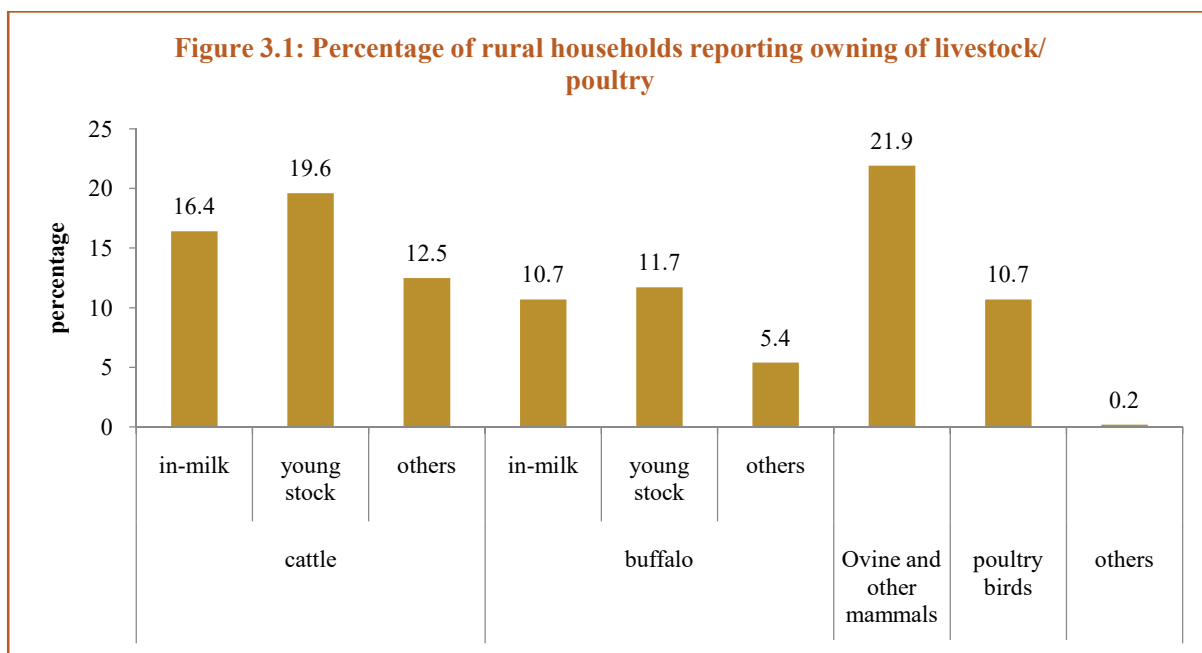

Statement 3.1 gives the percentage of households reporting owning of livestock and average number of livestock per 100 households in rural India. Percentage of households reporting owning of livestock and average number of livestock per 100 households for different States/Group of UTs/Group of North-Eastern States is given in Statements 3.1.1 and Statement 3.1.2 respectively.

Statement 3.1: Percentage of households reporting owning of livestock (P) and average number of livestock per 100 households (A)

Ref: Table 46, Appendix A

3.4 Section Four: Some Aspects of Farming

3.4.0 This section presents estimates related to the farming activities (i.e. crop production and farming of animals) performed by the agricultural households during the reference period.

3.4.1 Crop Production

3.4.1.1 The survey collected detailed information on the crop production activities of the agricultural households for the two halves of the agricultural year July 2018- June 2019. Separate information pertaining to the four major crops *harvested* during the reference period was collected from each agricultural household that reported crop production activity. If the agricultural household harvested more than four types of crops during the reference period, these were clubbed together and included in 'other'. Along with production, sale and details of inputs used for crop production, information on awareness of Minimum Support Price (MSP), crop insurance and access to technical advice sought/implemented with respect to the crops harvested by the agricultural households were separately recorded.

3.4.1.2 Twenty-Five selected crops were identified to present crop-wise estimates in this report. However, crop-wise estimates are presented to those selected crops which were reported by at least 1 percent of the surveyed agricultural households at all India level separately for the two halves of the agricultural year. Crop-wise estimates for different States, Group of UTs and Group of NE States are presented in the Detailed Tables (Appendix A) for maximum of five selected crops subject to the condition that at least 50 households had reported that crop. Wherever figures for 'all crops' are presented that includes all the crops reported by the households including those which are not classified as selected crops.

3.4.1.3 Selected crops are: Paddy, Jowar, Bajra, Maize, Ragi, Wheat, Barley, Gram, Arhar (Tur), Urad, Moong, Masur (Lentil), Sugarcane, Potato, Onion, Groundnut, Sesamum, Rapeseed/Mustard, Coconut, Sunflower seed, Safflower, Soyabean, Nigerseed, Cotton, Jute.

3.4.1.4 Statement 4.1 shows the average gross cropped area, harvested value and quantity produced for selected crops for the period July 2018- December 2018 and January 2019- June 2019. Percentage of agricultural households reporting crop production, average gross cropped area (ha.) per reporting household, percentage distribution of value of crop production and percentage distribution of agricultural households reporting crop production for different States/Group of UTs/Group of North-Eastern States for the two halves of the agricultural year July 2018- June 2019 is given in Statement 4.1.1.

Statement 4.1: Average gross cropped area, harvested quantity produced and value (Rs.) for agricultural households reporting production of selected crops

crop	percentage of agricultural households reporting production of crops	average per household reporting production of crops			
		gross cropped area (0.000 ha.)	harvested quantity produced (kg./no.) [#]	value of (Rs.)	
				harvested crop	total production*

coconut	1.9	0.175	880	10,012	10,468
cotton	1.3	1.137	963	47,691	48,298
all crops	72.5	0.775	xxx	47,712	50,807

* Total value of production includes value of harvested crop, pre-harvest sale and value of by-products.

[#]for all crops except coconut, harvested quantity is reported in kg and for coconut harvested quantity is reported in numbers.

Ref: Table 11 of Appendix A

3.4.2 Sale of Crops Produced

3.4.2.1 From the agricultural households that have reported crop production during any of the two halves of the agricultural year July 2018 – June 2019, details about the sale outcome of the harvested crop was collected crop-wise in respect of the four major crops reported by the household. While reporting the sale outcome, sale from the previous stock of the same type of crop made during the reference period was also considered. Out of the total quantity sold during the reference period for a particular crop (including the sale from previous stock), details of the agency to which major share of the quantity was sold (taking together multiple

disposals made to that agency), the quantity sold to that agency, sale value received, overall satisfaction with the sale outcome were reported under the head 'major disposal'. If the same type of crop is sold off to multiple agencies during the reference period, all such disposals (other than the major disposal) were clubbed together and reported under the head 'other disposal' where only quantity sold, and corresponding consolidated sale value were collected.

3.4.2.2 Percentage of crop producing agricultural households that have reported sale of their crops and their distribution by agency of major sale for the crops harvested during July 2018 – December 2018 and January 2019 – June 2019 is presented in Statement 4.2.

Statement 4.2: Percentage distribution of agricultural households that have reported sale of crops by agency of major disposal

Ref: Table 12 of Appendix A

3.4.2.3 In respect of the agricultural households that had reported sale of their crops harvested, details of sale outcome in terms of agency to which crop was disposed of, the level of satisfaction of the sale outcome, etc., were collected with reference to a maximum of four major crops for the two halves of the agricultural year July 2018 – June 2019. Statement 4.3 gives the percentage share of quantity of crops sold off to different agencies and their distribution by type of agency for the period July 2018 – December 2018 and January 2019 – June 2019.

Statement 4.3: Percentage distribution of quantity of crop sold by agricultural households under major disposal by agency of disposal

3.4.3 Sources of Agricultural Input

3.4.3.1 The survey collected information on various input materials used for the production of crops harvested during the reference period. In respect of the crops harvested during the reference period, information pertaining to various input materials (such as seeds, fertiliser,

manure, plant protection materials, fuel, electricity, labour, irrigation, etc.) even if used/incurred prior to the reference period was also collected.

Percentage distribution of agricultural households reporting use of seed by their agency of major procurement for selected crops during July 2018 – December 2018 and January 2019 – June 2019 is presented in Statement 4.5.

3.4.4 Awareness about Minimum Support Price (MSP)

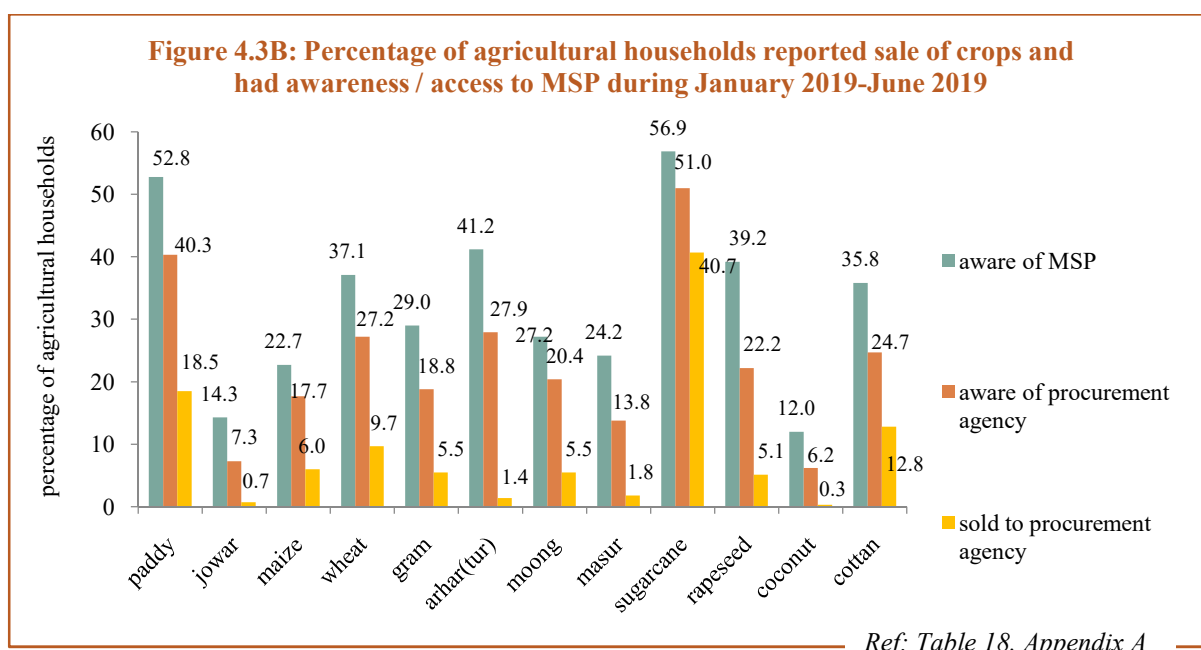

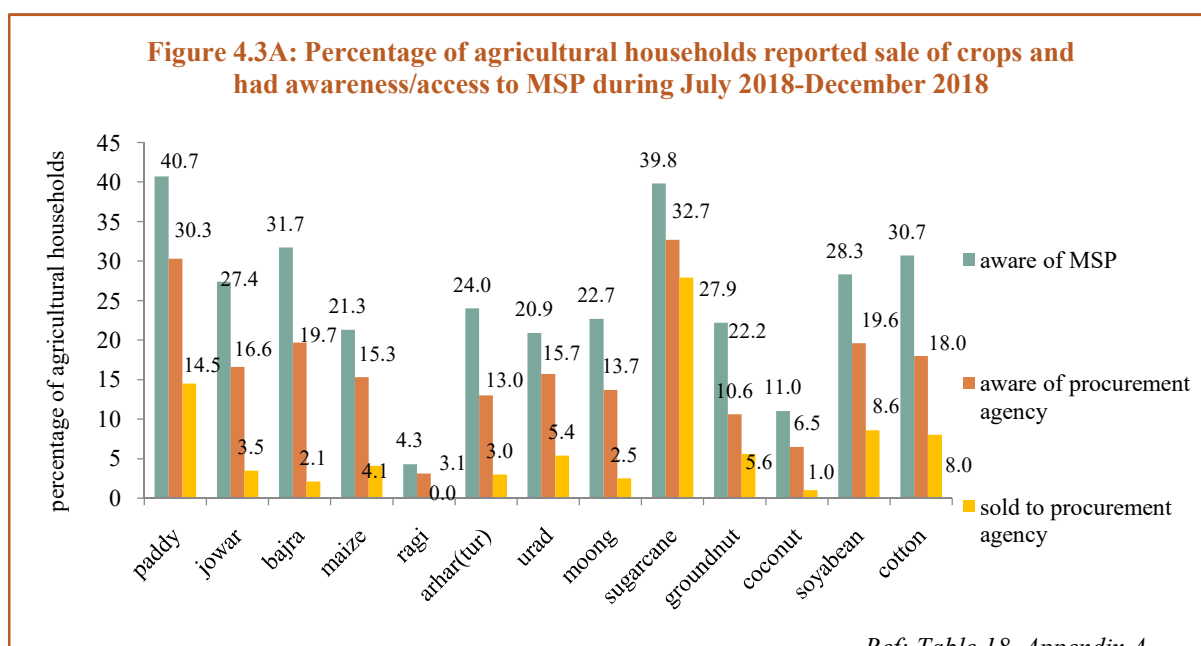

3.4.4.1 Minimum Support Price (MSP) is a form of market intervention by the Government of India to insure agricultural producers against any sharp fall in farm prices. If the surveyed agricultural household had reported harvesting of a crop for which MSP had been declared by Government of India, information on their awareness and access to the facility specific to the crops harvested by them was recorded in the survey. The results relating to MSP are presented in respect of the agricultural households which have reported sale of at least a part of their harvested crop.

3.4.4.2 Statement 4.9 gives estimates relating to awareness and other aspects about MSP during the period July 2018- December 2018 and January 2019-June 2019.

Statement 4.9: Percentage of agricultural households reported sale of crops and had awareness about MSP for selected crops				
crop	percentage of households among those reporting sale of crops			% of output sold under MSP
	aware of MSP	aware of procurement agency under MSP	sold to procurement agency

Ref: Table 18 of Appendix A

Percentage of agricultural households reported sale of crops and had awareness/ access to MSP during July - December 2018 and January -June 2019 are presented in Figures 4.3A and 4.3B respectively.

3.4.4.3 When an agricultural household that reported awareness about MSP and the procurement agencies specific to the crops harvested during the reference period did not make any sale to such procurement agencies, the reason for not selling was ascertained. The percentage of households that were aware about the procurement agency under MSP but did not sell to the agency by specific reasons during July 2018 - December 2018 and January 2019 – June 2019 is given in Statement 4.10.

Statement 4.10: Percentage of agricultural households who had awareness about procurement agency under MSP of selected crops but did not sell to procurement agency among the agricultural households who reported sale of crops

crop	aware about MSP	percentage of households who had awareness about procurement agency under MSP of selected crops but did not sell to procurement agency by reason						
		procurement agency not available	no local purchaser	poor quality of crop	crop already pre-pledged	received better price over MSP	others	total

3.4.6 Access to Technical Advice in the Field of Agriculture

3.4.6.1 The survey collected detailed information regarding the access of agricultural household to technical advices from various sources in relation to the agricultural activities undertaken by them during the two halves of the agricultural year July 2018 – June 2019.

Statement 4.15 gives the percentage of agricultural households accessing technical advices from various sources during the two halves of the agricultural year July 2018 – June 2019. Corresponding estimates for different States/Group of UTs/Group of North-Eastern States for the two halves of the agricultural year July 2018- June 2019 is given in Statement 4.15.1.

Statement 4.15: Percentage of agricultural households accessing technical advice from different sources

source of technical advice	July 2018 – December 2018		January 2019 – June 2019

3.5 Section Five: Income, Expenditure, Productive Assets and Indebtedness of Agricultural Households

3.5.0 This section presents estimates related to the agricultural households such as receipts from and expenditure incurred in farm and non-farm business. It also provides estimates of their indebtedness, productive assets and income generated from all economic activities including farm and non-farm business and wage/salary employment.

The information pertaining to income from different sources, expenditure incurred for farm and non-farm business, net expenditure in productive assets, which are presented in this section (except indebtedness) had been collected separately for the two halves of the agricultural year July 2018 - June 2019. In this section the estimates are presented for the whole agricultural year July 2018 - June 2019 based on the common households surveyed in both of visit-1 and visit-2. However, in the detailed tables (Appendix A), these estimates are presented separately for both the halves of the agricultural year and also for the combined period (whole agricultural year). The estimates of indebtedness of the agricultural households are presented 'as on date of survey', based on the households surveyed in visit-1.

For working out the combined aggregates, *only the common households of visit-1 and visit-2* were considered. In respect of figures collected for the reference period of six months (e.g., income from crop production, wage/ salary income, earning from leasing out of land), the combined aggregate is calculated as a simple average of visit-1 and visit-2 figures. Wherever information was collected for the reference period of last 30 days (e.g., income from farming of animals, non-farm business), combined aggregate is calculated as a weighted mean of estimates for common households of visit-1 and visit-2 where the weights are 8 and 4 respectively as the survey periods of visit-1 and visit-2 were 8 and 4 months, respectively.

3.5.1 Average Monthly Income per Agricultural Household

3.5.1.1 The survey collected information on the receipts and expenditure relating to crop production, farming of animals and non-farm business, separately for the two halves of the agricultural year July 2018 - June 2019. Income from wage/salary employment and income from leasing out of land were also recorded for the same period. Based on this information, average monthly income per agricultural household has been worked out for the agricultural year July 2018 - June 2019 by adding up income from wages/salary, income from leasing out of land, net receipt from crop production, farming of animals and non-farm business. Net receipt is worked out by deducting total expenses from total receipts for each source of income.

3.5.1.2 Unlike in NSS 70th round, imputed expenses in respect of farm saved inputs such as seeds, manure, unpaid family labour (both human and animal), etc., were also recorded in this round while collecting expenses in respect of farm business. Accordingly, two sets of income estimate for the agricultural households, (i) considering only the out-of- pocket expenses (paid out expenses) and (ii) considering both the out-of-pocket expenses (paid out expenses) and imputed expenses, are worked out from the data obtained from this survey.

3.5.1.3 The survey also collected information on income of agricultural households from 'leasing out of land' which was not collected in previous rounds of the *Situation Assessment*

Surveys (SAS). The income estimates presented based on the survey results of NSS 77th round also includes income of agricultural households from ‘leasing out of land’.

3.5.1.4 Though, information on earnings of the agricultural households from non-economic activities/sources like pension, remittance, etc., was collected in this round, the same is not included in the estimates of income presented in this Section.

3.5.1.5 Due care may be exercised while comparing the estimates of income of agricultural households presented in this report with similar estimates published from previous rounds of Situation Assessment Surveys (SAS) due to the additional sources of income/ type of expenditure considered for this round.

3.5.1.6 The average monthly income (where net receipt is obtained considering ‘paid out expenses’ approach) from different sources per agricultural household for the agricultural year July 2018 - June 2019 for each size class of land possessed are given in Statement 5.1A. The corresponding estimates for all the size classes for different States/Group of UTs/Group of North-Eastern States is given in Statement 5.1A.1.

Statement 5.1A: Average monthly income (Rs.) from different sources per agricultural household during July 2018 - June 2019 for each size class of land possessed (ha.)
(where net receipt is obtained considering ‘paid out expenses’ approach)

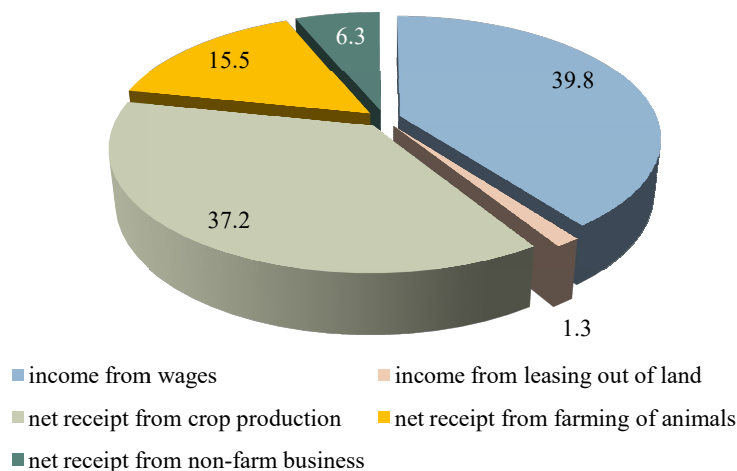

size class of land possessed (ha.)	income from wages	income from leasing out of land	net receipt from crop production *	net receipt from farming of animals*	net receipt from non-farm business	total income

all sizes	4,063	134	3,058	441	641	8,337

* both the paid out expenses and imputed expenses were considered for working out net receipt

Ref: Table 23B of Appendix A

3.5.2 Average Expenditure on Productive Assets and Receipts from Sale of Productive Assets by Agricultural Households

3.5.2.1 Productive assets are those assets that are used repeatedly for the production process. Assets considered for farm business included various agricultural machinery and implements, livestock among others. The immovable assets like land and building were separately accounted for farm business and non-farm business.

3.5.2.2 The survey collected information on the expenditure incurred (both by way of purchase and major repair/improvement) on various productive assets used for crop production, livestock activity and for the household non-farm business during both halves of agricultural year July 2018 - June 2019. Corresponding to each such asset, any receipt by the household by way of sale was also reported to work out the 'net expenditure' on productive assets. The survey also collected similar information related to residential building including land. It may be noted that, the expenditure on productive assets presented in this Report does not include expenditure incurred on residential land and building.

3.5.2.3 The average monthly expenditure incurred on productive assets used in farm and non-farm business per agricultural household reporting expenditure on productive assets during July 2018 - June 2019 and average monthly receipts from sale of productive assets used in farm and non-farm business per agricultural household reporting sale of productive assets for each size class of land possessed is presented in Statement 5.2. The corresponding estimates for all size classes for different States/Group of UTs/Group of North-Eastern States are given in Statement 5.2.1. A graph presenting percentage distribution of monthly expenditure on productive assets by type of asset per agricultural household is given in Figure 5.3.

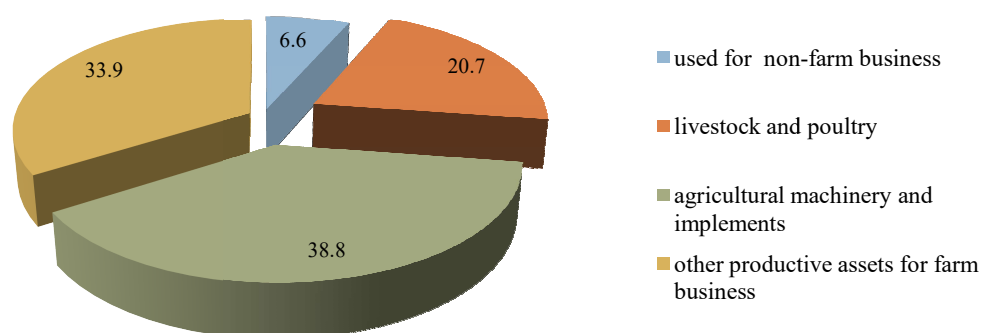

Statement 5.2: Average monthly expenditure (Rs.) on productive assets per agricultural household reporting expenditure on productive assets and receipt from sale of productive assets used in farm and non-farm business per agricultural household reporting sale of productive assets during July 2018 – June 2019

size class of land possessed (ha.)	average monthly expenditure incurred on productive assets (Rs.)						receipts from sale of productive assets (Rs.)	monthly average net expenditure on productive asset per agricultural household
	used for farm business				used for non-farm business	total		
	livestock and poultry	agricultural machinery and implements	other productive assets*	total				
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
< 0.01	551	204	26	781	104	885	1,691	67
0.01 - 0.40	121	66	59	246	32	279	8,866	-289
0.40 - 1.00	137	137	223	498	47	545	1,702	230
1.01 - 2.00	186	351	255	792	57	848	2,640	401
2.01 - 4.00	224	1,003	798	2,026	83	2,109	7,630	911
4.01 - 10.00	501	1,736	1,362	3,598	217	3,816	2,728	2,327

all sizes	167	313	273	752	53	806	4,559	221

Note: *Other productive assets include land for farm business, building for farm business and fish tank used for farm business

Ref: Tables 24 and 25 of Appendix A

Figure 5.3: Percentage distribution of monthly expenditure on productive assets by type of asset per agricultural household

Ref: Table 25, Appendix A

3.5.3 Expenses and Receipts for Crop Production

3.5.3.1 As part of collecting information on various economic activities undertaken by the agricultural households, detailed information including receipts and expenditure in respect of the crops harvested by the agricultural households during the two halves of the agricultural year was collected separately during the two visits of the survey. Item-wise expenditure on each of the agricultural inputs used for crop production was collected in the survey,

separately for the two halves of the agricultural year. Even if some expenses were incurred prior to the reference period for crops harvested during the reference period, the same was considered for reporting. Imputed expenses, wherever applicable, for crop production on unpaid family labour, farm saved seeds and manure, etc., along with the paid out expenses, was also collected in this Survey. Since *Situation Assessment Survey* of NSS 70th round only considered the paid out expenses for farm business, due care may be taken while comparing the estimates on expenditure for farm business generated from this round with the similar estimates of the previous NSS Round. As in case of the previous surveys, the estimates related to crop production presented in this report also includes estimates related to agricultural production from plantation/orchard crops.

3.5.3.2 The receipts from crop production included value of (i) harvested quantity of crops, (ii) pre-harvest sale and (iii) by-products. The value of harvested quantity was ascertained either by sale price (if at least some quantity of the produce was sold off during the reference period) or by using the local market price for the specific crop and its type.

3.5.3.3 Statement 5.3A gives the average monthly expenses and receipts for crop production during the agricultural year July 2018 - June 2019. The corresponding estimates for all the size classes for different States/Group of UTs/Group of North-Eastern States is given in Statement 5.3A.1. In order to maintain comparison with the estimates of expenses for crop production generated from previous rounds of Situation Assessment Surveys, the estimates of expenses presented in this Statement is based only on the paid out expenses.

Statement 5.3A: Average monthly expenses and receipts for crop production per crop producing agricultural household during the agricultural year July 2018 - June 2019 for each size class of land possessed (ha.)

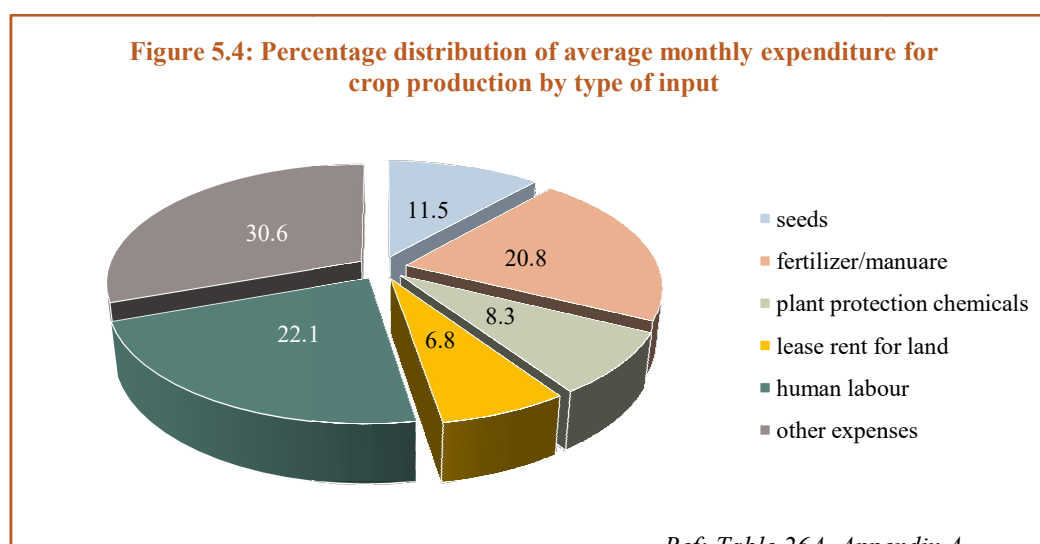

size class of land possessed (ha.)	expenses (only paid out) (Rs.)											total receipts (Rs.)
	seeds	fertilizer / manure	plant protection chemicals	irri- gation	minor repair and maintenance*	inte- rest	lease rent for land	labour human	animal	all other ex- penses [#]	total expenses

Ref: Table 26B of Appendix A

3.5.4 Expenses and Receipts for Farming of Animals

3.5.4.1 The survey collected detailed information on animal farming activities undertaken by the agricultural households. Information on item-wise disposal of produce and value of output from farming of animals during 30 days prior to the date of survey was collected from the surveyed agricultural households during both the visits of the survey. Information on the item-wise expenditure incurred during the same period was also collected for input used in farming of animals. As in the case of crop production, information on both paid out expenditure and imputed expenditure were collected separately for farming of animals also. Based on the common households surveyed during both the visits, average monthly expenditure for and receipts from farming of animals for the agricultural year July 2018 - June 2019 were estimated.

3.5.4.2 Statement 5.4A provides the average monthly paid out expenditure (in Rs.) on farming of animals per agricultural household engaged in farming of animals during the agricultural year July 2018 - June 2019 for different size classes of land possessed (ha.). The percentage distribution of average monthly paid out expenses for all the size classes for different States /Group of UTs/Group of North-Eastern States is given in Statement 5.4A.1. Percentage distribution of average monthly paid out expenditure for farming of animals per agricultural household engaged in farming of animals by type of input during July 2018 - June 2019 for 'all' size class is given in Figure 5.5.

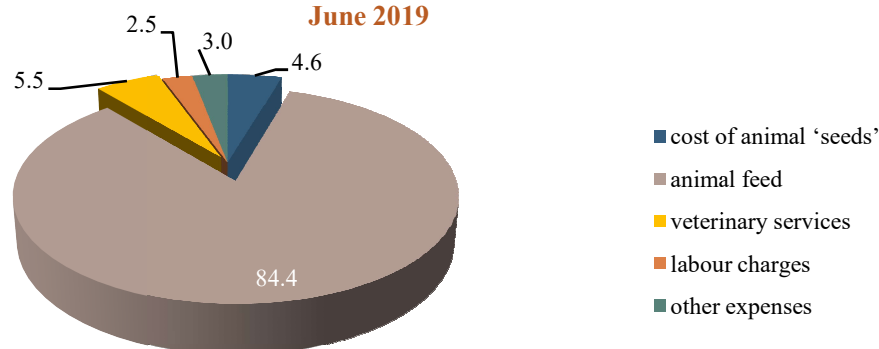

Statement 5.4A: Average monthly paid out expenditure for farming of animals per agricultural household engaged in farming of animals by type of input during July 2018 - June 2019 for different size classes of land possessed (ha.)

size class of land possessed (ha.)	average monthly paid out expenditure (Rs.) by type of input					
	cost of animal 'seeds'	animal feed	veterinary services	labour charges	all other expenses*	total expenses
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Ref: Table 27A of Appendix A

Percentage distribution of average monthly receipts from farming of animals per agricultural household engaged in farming of animals by type of livestock product during July 2018 - June 2019 is presented in Figure 5.6.

3.5.5 Net Receipt from Household Non-Farm Business

3.5.5.1 In order to estimate the total monthly income of agricultural households, information on non-agricultural economic activities performed by the agricultural households during the reference period was also collected in the survey. While information on income from wage/salaried employment was collected against each of the members of the agricultural household, detailed expenses and value of output related to non-agricultural entrepreneurial activities performed by the household were recorded separately for each such activity.

3.5.5.2 Estimates of average monthly expenses for non-farm business, receipts and net receipt from non-farm business per agricultural household reporting non-farm business during the period July 2018 - June 2019 for different size classes of land possessed (ha.) are presented in Statement 5.6. The corresponding estimates for all the size classes for different States/Group of UTs/Group of North-Eastern States is given in Statement 5.6.1.

Statement 5.6: Average monthly expenses and receipts per agricultural household from non-farm business for each size class of land possessed during the period July 2018 – June 2019

size classes of land possessed (ha.)	expenses (Rs.)	receipts (Rs.)	net receipts (Rs.)	percentage share of agricultural households engaged in non-farm business
(1)	(2)	(3)	(4)	(5)
< 0.01	12,469	19,057	6,588	11.7

all sizes	20,798	27,792	6,993	9.2

Ref: Table 28 of Appendix A

3.5.6 Indebtedness of Agricultural Households

3.5.6.1 Information on the amount of outstanding loan as on date of survey (i.e., the day on which data was collected from the household) was collected from each of the surveyed agricultural households during the first visit. Along with the outstanding amount, information on source, nature, purpose, etc., of the loan was also collected. The amount of outstanding loan reported in the survey also included outstanding interest. Situation Assessment Survey of NSS 70th round did not collect information on the purpose for which the loan was taken, which was recorded in 77th round.

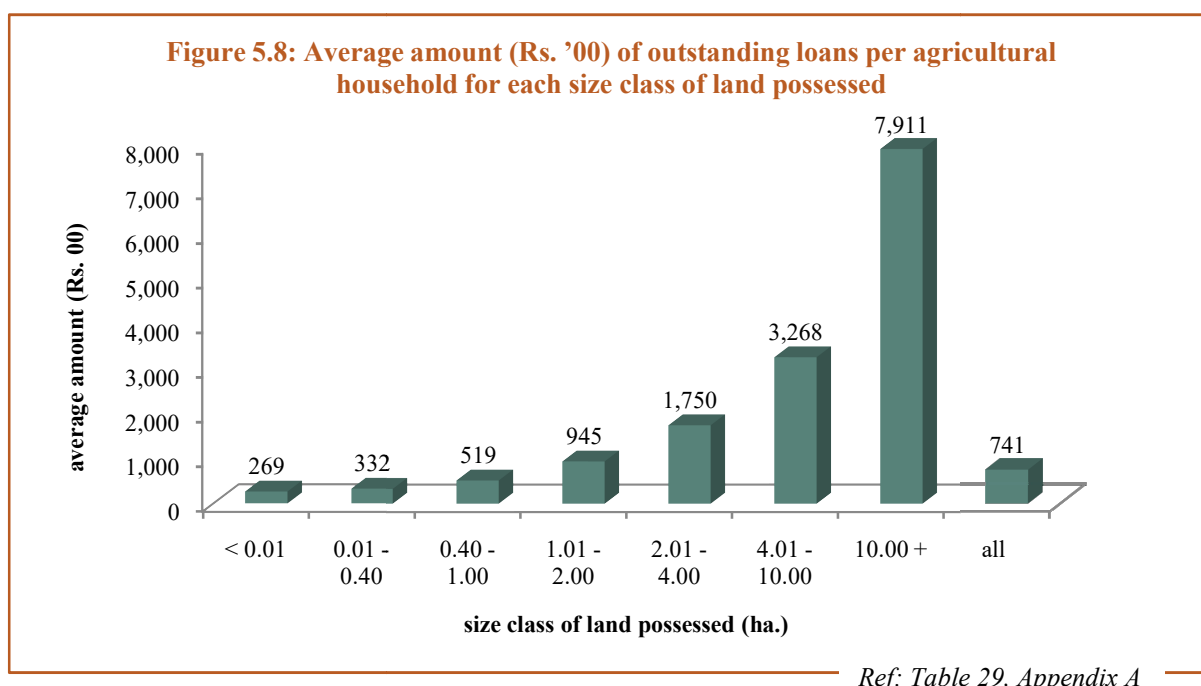

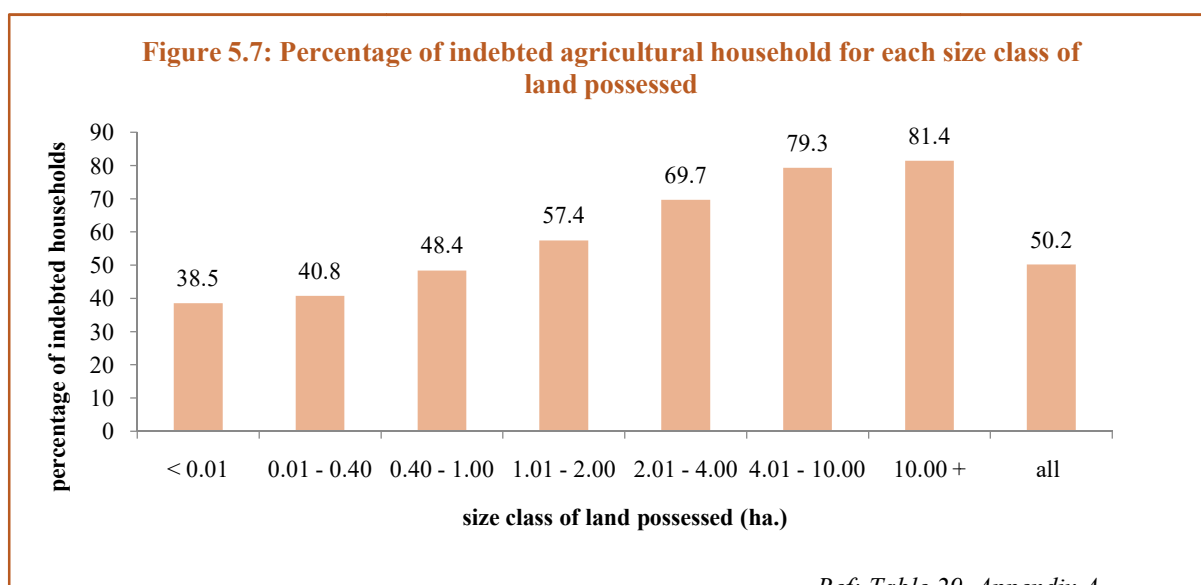

3.5.6.2 Statement 5.7 provides the average amount of outstanding loan per agricultural household and percentage of indebted agricultural households for each size class of land possessed (ha.). Average amount (Rs.) of outstanding loan per agricultural household and percentage of indebted agricultural households for all the size classes for different States /Group of UTs/Group of North-Eastern States is given in Statement 5.7.1.

Statement 5.7: Percentage of indebted agricultural households and average amount (Rs.) of outstanding loans per agricultural household for each size class of land possessed

size class of land possessed (ha.)	average amount (Rs.) of outstanding loan per agricultural household	percentage of indebted agricultural households	percentage distribution of indebted agricultural households
(1)	(2)	(3)	(4)
< 0.01	26,883	38.5	0.5

1.01 - 2.00	94,498	57.4	20.2
2.01 - 4.00	1,75,009	69.7	12.0
4.01 - 10.00	3,26,766	79.3	4.5
10.00 +	7,91,132	81.4	0.6
all sizes	74,121	50.2	100.0

Ref: Tables 2 and 29 of Appendix A

In Figures 5.7 and 5.8, percentage of indebted agricultural households and average amount (Rs. '00) of outstanding loans per agricultural household for each size class of land possessed is presented respectively.

3.5.6.4 Source of Loans

The survey collected information on the sources of outstanding loans reported by the agricultural households. Different sources considered for the purpose of the survey are as under:

Institutional Sources:

- ◆ scheduled commercial bank
- ◆ regional rural bank
- ◆ co-operative society
- ◆ co-operative bank

- ◆ insurance companies
- ◆ provident fund
- ◆ employer
- ◆ financial corporation/institution
- ◆ NBFCs including micro-financing institution
- ◆ bank linked SHG/JLG
- ◆ non-bank linked SHG/JLG
- ◆ other institutional agencies

Non-Institutional Sources:

- ◆ landlord
- ◆ agricultural moneylender
- ◆ professional moneylender
- ◆ input supplier
- ◆ relatives and friends
- ◆ Chit-fund
- ◆ Market commission agent/traders
- ◆ other

Statement 5.8 gives the percentage distribution of amount of outstanding loans by the source from which it was taken for different size classes of land possessed (ha.) In Figure 5.9, percentage distribution of amount of outstanding loan per agricultural household by source of the loan (i.e. institutional and non-institutional) is presented. The corresponding estimates for all the size classes for different States/Group of UTs/Group of North-Eastern States is given in Statement 5.8.1.

Statement 5.8: Percentage distribution of amount of outstanding loans by sources of loan taken for each size class of land possessed (in ha.)

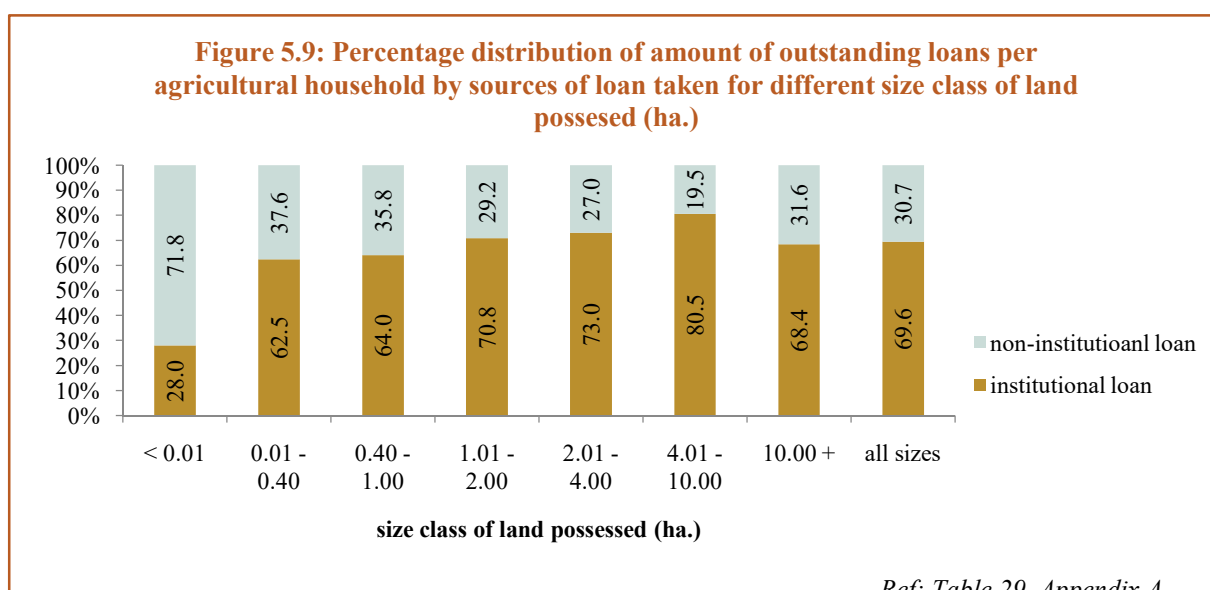

size class of land possessed (ha.)	Institutional sources						Non-institutional sources				all	average amount of outstanding loan (Rs.) per agri.hhs
	scheduled commercial bank	regional rural bank	co-operative society	co-operative bank	SHG (bank linked/non-linked)	Other institutional agencies*	Agricultural money lender	Professional money lender	Relatives and friends	Other non-institutional agencies [#]

all sizes	44.5	8.1	6.7	3.9	3.2	3.2	6.5	14.0	5.7	4.5	100.0	74,121

*Other institutional sources include insurance companies, provident fund, employer, financial corporation/institution, NBFC-including micro financing institution and other institutional agencies.

[#]Other non-institutional agencies include landlord, input dealer, chit-fund, market commission agent/ trader and others

Note: Figures may not add up to 100 due to rounding/ not reported cases

Ref: Table 29 of Appendix A

3.5.6.5 Purpose of Loans

3.5.6.5.1 The purpose of loan is defined as the occasion which prompted the households to contract the loan. Even if the loan is utilised for a purpose other than that for which it is borrowed, only the original purpose of borrowing was considered. If more than one purpose is involved, the purpose for which the major part of the loan was originally intended to be spent was recorded. Statement 5.9 gives the percentage distribution of amount of outstanding loan by source of loan for different size classes of land possessed (ha.). The corresponding estimates for 'all size class' for different States /Group of UTs/Group of North-Eastern States is given in Statement 5.9.1. Share of amount of outstanding loan amount taken for agricultural and non-agricultural purposes for different size class of land possessed (ha.) is depicted in Figure 5.10.

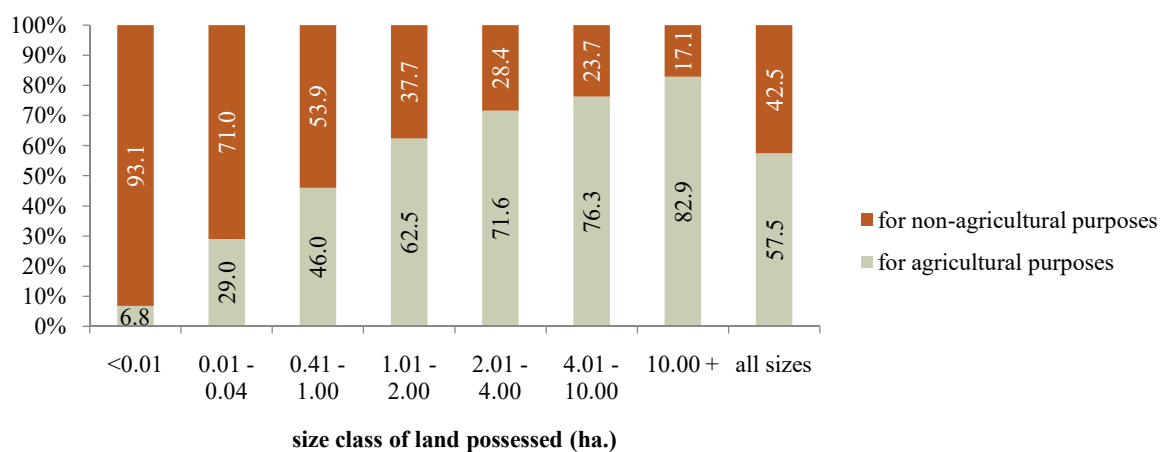

Statement 5.9: Percentage distribution of amount of outstanding loans by purpose of loan taken for each size class of land possessed (in ha.)

size class of land possessed (ha.)	percentage distribution of amount of outstanding loan amount by purpose of loan								
	capital expenditure in farm business	revenue expenditure in farm business	non-farm business	for housing	marriages and ceremonies	education and medical	other consumption expenditure	others	all

Appendix A

Appendix Tables

Appendix A: Detailed Tables

Table No.	Title
1	Number of villages surveyed and number of households surveyed
2	Estimated number of households (agricultural, non-agricultural and all) for each size class (ha.) of land possessed
3	Estimated number of households (agricultural, non-agricultural and all) for different social groups
4	Estimated number of households (agricultural, non-agricultural and all) for each decile class of Usual Monthly Per Capita Expenditure (UMPCE)
5	Per 1000 distribution of households by household classification for different size classes of land possessed
6	Number per 1000 of persons attended formal training in agriculture, number of literate per 1000 persons of age 7 years and above and per 1000 distribution of persons aged 15 years and above among rural households by level of education for each State/UT
7	Per 1000 distribution of persons of age 15 years and above among rural households by principal activity status during two halves of the agricultural year 2018-2019 for each size class of land possessed
8	Per 1000 distribution of persons of age 15 years and above among rural households by cross classification of Principal Status (PS) during two halves of the agricultural year 2018-2019
9	Number per 1000 of agricultural household which accessed technical advice and their per 1000 distribution by type of technical advice
10	Number per 1000 of agricultural household that adopted the advice among those who accessed technical advice
11	Average gross cropped area, average value of total crop production and average quantity of crop production per agricultural household reporting crop production for selected crops
12	Per 1000 distribution of agricultural households reporting sale of crops and per 1000 distribution of quantity sold by agency of major disposal for selected crops
13	Per 1000 distribution of agricultural households reporting sale of selected crop by level of satisfaction of the sale outcome (in respect of major disposal only)
13A	Number per 1000 crop producing agricultural households reporting disposals of selected crop to different agencies by level of satisfaction of the sale outcome for each agency of disposal (in respect of major disposal only)
14	Per 1000 distribution of agricultural households reporting use of seed by their

Table No.	Title
	agency of procurement for selected crops (in respect of major procurement only)
15	Per 1000 distribution of agricultural households reporting use of different farming resources by their agency of procurement (in respect of major procurement only)
16	Per 1000 distribution of agricultural households reporting use of purchased seed by their quality for selected crops (in respect of major procurement only)
16A	Per 1000 distribution of agricultural households reporting use of purchased seed by their quality for agency of procurement (in respect of major procurement only)
17	Per 1000 distribution of agricultural households reporting use of different purchased farming resources by their quality (in respect of major procurement only)
18	Per 1000 distribution of agricultural households reporting sale of crops by awareness about MSP for selected crops
19	Per 1000 distribution of agricultural households not insuring their crops by reason for selected crops
20	Per 1000 distribution of agricultural households by status of crop insurance for selected crops
21	Number per 1000 of agricultural households which experienced crop loss and per 1000 distribution of agricultural households experienced crop loss by cause for selected crops
22	Number per 1000 agricultural households which insured additionally and experienced crop loss for selected crops
23A	Average monthly income (in Rs.) per agricultural household for each size class of land possessed (considering only the paid out expenditure)
23B	Average monthly income (in Rs.) per agricultural household for each size class of land possessed (considering both the paid out and imputed expenditure)
24	Average monthly net expenditure on productive assets (in Rs) per agricultural household for each size class of land possessed
25	Average expenditure incurred and average receipt from sale of assets used for farm and non-farm business per reported agricultural household by size class of land possessed
26A	Average monthly paid out expenses and receipts for crop production per agricultural household reporting crop production by size class of land possessed
26B	Average monthly expenses (both paid out and imputed) for crop production per agricultural household reporting crop production by size class of land possessed
27A	Average monthly paid out expenses and receipts (in Rs) on farming of animals per agricultural household reporting farming of animals during a period of 30 days by size class of land possessed
27B	Average monthly expenses (both paid out and imputed) and receipts (in Rs) on farming of animals per agricultural household reporting farming of animals during a

Table No.	Title
	period of 30 days by size class of land possessed
28	Average expenses (Rs.) for and receipts (in Rs.) from non-farm business per agricultural household engaged in non-farm business during a period of 30 days by size class of land possessed
29	Per 1000 distribution of amount of loan outstanding by source of loan taken for different size classes of land possessed (ha.)
30	Per 1000 distribution of amount of loan outstanding by purpose for which the loan was taken for different size classes of land possessed (ha.)
31	Per 1000 distribution of households by size class of household ownership holding, average area of homestead land owned per household, average area of land owned (excluding homestead land) per household, average area owned per household and estimated area of household ownership holding for each size class of household ownership holding
32	Percentage distribution of area of the households belonging to different size class of household ownership holding by kind of possession
33	Per 1000 distribution of households reporting leasing-out of land and average area of such land by size class of household ownership holding for each social group
34	Per 1000 distribution of households reporting leasing-in of land and average area of such land by size class of household ownership holding for each social group
35	Percentage distribution of leased out land by terms of lease for each size class of household ownership holding
36	Number per 1000 of operational holdings, average area per operational holding, average area owned and possessed per operational holding, average area operated per holding, no. of parcels per holding, joint holdings per 1000 of holdings, total area of operational holdings, average number of crops harvested per household operational holding by size class of household operational holding
37	Percentage distribution of area of land for the households belonging to different size class of household operational holding by kind of possession
38	Per 1000 distribution of household operational holdings by main use of the holding for each size class of household operational holding
39	Per 1000 distribution of operational holdings by type of possession for each size class of household operational holding
40	Number of households reporting land (excluding homestead) possessed but not owned per 1000 of households and average area of land (excluding homestead) possessed but not owned per household reporting such land over type of possession by size class of household operational holding
41	Percentage distribution of area of leased in land by terms of lease for each size class of household operational holding

Table No.	Title
42	Percentage distribution of land possessed by household by type of land use for each size class of household operational holding
43	Percentage of irrigated area (considering major source of irrigation) of land used for crop production by size class of household operational holding
44	Per 1000 distribution of household operational holdings of the whole agricultural year by period when agri. operation was carried out and the estimated area operated during different periods for each size class of household operational holding
45	Number of households reporting owning of livestock of different types per 1000 households for each size class of household operational holding
46	Average number of livestock owned per 1000 households by size class of household operational holding
47	Percentage distribution of land used for crop production/ livestock farming by of major type of crop produced/ animal farming undertaken for each size class of household operational holding
48	Percentage distribution of land operated for farming of animals by major type of farming of animals undertaken for each size class of household operational holding
49	Number per 1000 of agricultural households with access to different facilities/ Schemes
