A NOTE ON EMPLOYMENT AND UNEMPLOYMENT SITUATION AMONG SOCIAL GROUPS IN INDIA, NSS 50TH ROUND

SECTION ONE

INTRODUCTION

1.1 The National Sample Survey Organisation (NSSO) carried out its fifth quinquennial survey on employment - unemployment and household consumer expenditure in the 50th round conducted during the period July 1993 to June 1994. Based on the data collected from the 'central sample' (i.e. the samples surveyed by NSSO), five reports on employment - unemployment have already been brought out. The present issue deals with the employment - unemployment situation of the people belonging to different 'social groups'. It may be mentioned that for each household surveyed, information on the 'social group' to which the household belongs to was also collected in the survey. Either of the three types of 'social groups' i.e. 'scheduled tribe' (ST) or scheduled caste (SC) or 'other' to which the household belongs to according to the information provided by the respondent, was recorded against each household surveyed. Utilising this information, some selected tables were generated by social group. This issue is based on these tables thus generated from the central sample data.

1.2 Geographical Coverage : The fifth quinquennial survey covered the entire Indian Union excepting certain interior areas of Nagaland and Andaman & Nicobar Islands. In the state of Jammu

& Kashmir, only 3 districts, namely, Jammu, Kathua and Udhampur could be surveyed out of a total of 14 districts in the state. Thus the corresponding state/union territory level estimates and the country level results presented in this issue are based on the areas other than those left out from the survey.

1.3 Sample Size : The survey altogether covered 115,409 households (69,230 rural and 46,179 urban households) spread over 6983 sample villages and 4670 urban blocks in the central sample. Out of these 115,409 households surveyed at the national level, 11,979 households (10.4 per cent) belonged to the scheduled tribes and 17,461 households (15.1 per cent) to the scheduled castes (see para 4.2 of section 4 for details).

1.4 Contents: The present section consists of four sections including this introductory first section. The next section describes the conceptual framework of the survey. While section 3 describes the sample design and estimation procedure adopted in the survey, main findings on employment - unemployment situation among different social groups and their broad household and population characteristics are discussed in section 4. Charts/maps and summary statements relating to states/u. ts. are given at the end of section 4. The detailed tables for all-India are given in the part II.

SECTION TWO

CONCEPTUAL FRAMEWORK

2.1 The NSSO surveys on employment and unemployment aim to measure the extent of 'employment' and 'unemployment' in quantitative terms disaggregated by various household and population characteristics. The persons surveyed are classified in to various activity categories on the basis of the activities pursued by them during certain specified reference periods. Three reference periods are used in these surveys. These are (i) one year, (ii) one week and (iii) each day of the week. Based on these three periods three different measures are arrived at. These are termed as usual status, current weekly status, and the current daily status. The procedure adopted to arrive at these three measures are given below.

2.2 Classification according to usual status. In this approach the status of activity on which a person spent relatively longer time of the preceding 365 days from the date of survey is considered as the

**Usual Status :
Principal Status
and Subsidiary
Status**

principal usual status activity of the person. Accordingly, a person is considered 'working' or 'employed' if the person was engaged for a relatively longer time during the past year in any one or more work-related activities (economic activities). The person is considered as 'seeking or available' for work or 'unemployed' if the person was not working but was either seeking or was available for work for a relatively longer time during the past year. If the person was engaged in any non-economic activities for a relatively longer time of the reference year he/she is considered as 'out of labour force'. The specific activity category is determined on the basis of time spent criterion. i.e. the activity on which major time was spent being assigned as the usual status activity. A person categorised as 'worker' or 'employed' on the basis

of the principal status is called a 'principal status worker' or 'principal status employed'. A person categorised as a non-worker (i.e. unemployed or out of labour force) who pursued some economic activity in a subsidiary capacity is called a 'subsidiary status worker' or 'subsidiary status employed'. These two groups viz. principal status workers and subsidiary status workers together constitute 'all workers' according to the usual status classification.

The various activity categories along with the codes used for usual status classification are given in the box below.

<u>Code</u>	<u>Description</u>
[Activities for working(employed) persons]	
11	worked in household enterprise (self-employed) as an own account worker
12	worked in household enterprise (self-employed) as an employer
21	worked in household enterprise as a helper
31	worked as regular salaried/wage employee
41	worked as casual labour in public works
51	worked as casual labour in other types of works
[unemployed]	
81	seeking or available for work
[out of labour force activities]	
91	attended educational institutions
92	attended domestic duties only
93	attended domestic duties and was also engaged in free collection of goods (vegetables, roots, fire-wood, etc. for household)
94	rentiers, pensioners, remittance recipients, etc.

- 95 not able to work due to disability
- 96 beggars, prostitutes, etc.
- 97 others
- 99 infants of age 0-4 years.

Activities coded 11-51 are those applicable for persons who are classified as workers while 91-99 apply to those who are out of labour force. Detailed definitions of these categories are given elsewhere in this section. Code 81 is assigned to an unemployed.

For classification of persons according to current weekly status approach, they are assigned a unique activity status with reference to a period of 7 days preceding the date of survey. This is easily done in the case of persons having only one status during the reference week. But for persons pursuing more than one activity a priority-cum-major time rule was applied to obtain a unique activity status. Under the priority rule, the status of working got priority over the status of not working but seeking/available for work. Further the status of not working but seeking/available for work got priority over the status of not working and not seeking/available for work.

**current
weekly
status**

Within the broad category of working and not working, the detailed activity category was assigned by major time spent criterion. Using this procedure in the current weekly status (cws) a person is considered working or employed if the person was engaged for at least one hour on any one day of the previous week on any work related (economic) activity. A person who had not worked for even one hour on any one day of the week, but had been seeking or had been available for work at any time for at least one hour during the week was considered 'seeking/available for work'. Others were considered 'not available for work' or as out of labour force. For working or employed besides the codes used for usual activity 4 additional codes were used to reflect the weekly situation. These were as follows:

- 61 did not work due to sickness though there was work in household enterprise
- 62 did not work due to other reasons though there was work in household enterprise
- 71 did not work due to sickness but had regular salaried/wage employment
- 72 did not work due to other reasons but had regular salaried/wage employment For unemployed the codes were:
- 81 sought work
- 82 did not seek but was available for work For 'out of labour force' one additional code was used as:
- 98 did not work due to sickness (for casual workers only)

2.4 Classification according to current daily status approach

The activity pattern of people particularly in the unorganised sector is such that a person might be pursuing more than one activity during a week and sometimes even during a day. In the current daily status (cds), upto two activity statuses were assigned to a person on each day of the reference week. The unit of classification was thus 'half day' in the cds. In assigning the activity status on a day, a person was considered working for the entire day if he had worked 4 hours or more during the day. If he had worked one hour or more but less than 4 hours, he was considered working (employed) for half day and seeking/available for work (unemployed) or not available for work (not in labour force) for the other half day depending on whether he was seeking / available for work or not. On the other hand, if a person was not engaged in any work even for one hour but was seeking or available for work for 4 hours or more, he was considered unemployed for the entire day. If he was available for work for less than 4 hours only, he was considered unemployed for half day and not in labour force for the other half of the day. A person who neither had any work to do nor was available for work even for 'half' of the day was considered not in labour force for the entire day and was assigned one or two

**Current
Daily
Status**

non-economic activity status codes. The aggregate of person days classified under the different activity categories for all the seven days gave the distribution of person days by activity category during an average week over the survey period of one year. The codes used for describing the various activity categories under the cds were the same as those used for current weekly status classification.

2.5 As can be seen in the above paragraphs, central to the concept of identifying a worker is the engagement in any economic activity. The concept of economic activity as used in the NSS is explained now.

Economic activity is any activity that results in production of goods and services that adds value to national product. Such activities include production of all goods and services for market i.e. production for pay or profit and the production of primary commodities for own consumption and own account production of fixed assets, among the non-market activities. The entire spectrum of human activity falls in two categories: economic and non-economic activities. The economic activities have two parts:- market activities and non-market activities. Market activities are those that involve remuneration to those who perform it i.e. activity performed for pay or profit. These are essentially production of goods including those of Government services etc. Non market activities are the production for own consumption of primary products and own account production of fixed assets. The full spectrum of economic activities as defined in the UN system of National Accounts is not covered in the definition adopted for the current survey or in the previous surveys. The term economic activity as adopted in the 50th round survey include:

Concept of economic activity

- i) All the market activities described above i.e. the activities performed for pay or profit which result in production of goods and

services for exchange.

ii) Of the non-market activities,

a) all the activities relating to the agricultural sector (industry section 0 of NIC 1987) which results in production (including gathering of uncultivated crops, forestry, collection of firewood, hunting, fishing etc.) of agricultural produce for consumption and

b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools etc. for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own-account construction either in the capacity of a labour or a supervisor.

2.6 In this context, it may be noted that hitherto in NSS the term used was 'gainful activity'. The above definition is very close to the 'gainful activity' concept except for the inclusion of own-account production of fixed assets. The contribution of this component was found to be negligible from a separate tabulation of this component in the 43rd round survey and as such the comparability of the survey results will be unaffected by this change.

2.7 According to the international standards the term 'economically active population' comprises of persons of either sex who furnish the supply of labour for production of goods and services as defined in the United Nations system of national accounts and balances during a specified time reference period. According to these systems, the production of goods and services includes all production and processing of primary products, whether for market, for barter or for own consumption, the production of all other goods and services for the market and, in the case of households which produce such goods and services for the market, the corresponding production for own

consumption.¹ The definition adopted in the NSS follow the above approach very closely except for the 'processing of primary commodities for own consumption by the producers of these items' which is not covered by the NSS definition. Further the international standards use the term 'economically active population' as a generic term and use two other measures viz. the 'usually active population' in relation to a long reference period such as a year and the 'currently active population' measured in relation to a short reference period such as a week or a day. Generally the term 'labour force' is used to denote the currently active population. In this report the term labour force is meant to imply the population comprising the employed and the unemployed. In conventional terms, the employed, unemployed and those in the labour force are defined as follows.

2.8 Workers or employed : Persons who are engaged in any economic activity or who despite their attachment to economic activity have abstained for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities are also considered as workers.

2.9 Seeking or available for work or unemployed : Persons who owing to lack of work had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those 'seeking or available for work or as unemployed'.

2.10 Labour force and those out of labour force: Persons who are either 'working' or seeking

¹ *Surveys of economically active population, employment, unemployment and underemployment: An ILO manual on concepts and methods, ILO, Geneva, 1990.*

or available for work (i.e. unemployed) during the reference period constitute the labour force. Persons who were neither working and at the same time were not seeking nor available for work during the reference period are considered to be 'out of labour force'. The persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled, too young or too old, prostitutes, smugglers etc., and casual workers not working due to sickness etc.. However a domestic servant who is considered as a member of the employer's household is treated as a worker though he/she may be performing only household chores.

2.11 The status of persons engaged in various economic activities are classified as follows.

2.11.1 Self-employed in household enterprises: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are self-employed in household enterprises. The essential feature of self-employment is that the remuneration is determined wholly or mainly by sales or profits of the goods or services which are being produced. The self-employed persons are further categorised into three groups.

(a) **own-account workers:** They are the self-employed persons who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprise without hiring any labour. They may, however, have unpaid helpers to assist them in the activity of the enterprise.

(b) **employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprise by hiring labour.

(c) **helpers in household enterprises:** The helpers are mostly family members who

keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work. They do not run the enterprise on their own, but assist the related person living in the same household running the enterprise. Here it is to be noted that a departure was made in the case of identifying 'helpers' from the earlier surveys. Persons who worked in the capacity of 'helpers' but had a share in their family earnings were not considered as 'helpers' in the earlier rounds, but are considered so in the present survey.

2.11.2 Regular salaried/wage employee:

Persons working in other's farm or non-farm enterprises, both household and non-household, and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. This category not only includes persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.11.3 Casual labour: A person casually engaged in other's farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual labour. Depending on whether they are so employed in 'public works' sponsored by Govt. agencies or local bodies or in other types work, the casual workers are classified into the two groups viz. Casual labour in public works and casual workers in other types of work.

2.12 Certain other terms related to the different types of 'labour' are now explained.

2.13 Wage paid manual labour: A person who does manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) is a wage paid manual labour.

Persons who are self employed doing manual work is not treated as a wage paid manual labour.

2.14 Agricultural Labour: A person is considered engaged in agricultural labour if he/she follows one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- (i) farming
- (ii) dairy farming
- (iii) production of any horticultural commodity
- (iv) raising of livestock, bees or poultry
- (v) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the operation for market and delivery to storage or to market or to carriage for transportation to market of farm produce. Carriage for transportation refers to the first stage of the transport from farm to the first place of disposal. Working in fisheries is excluded from agricultural labour.

2.15 Rural labour: Manual labour, living in rural areas, working in agricultural and/or non-agricultural occupations in return for wages paid either in cash or in kind (excluding exchange labour) is considered as rural labour. Thus rural labour includes both agricultural labour and other labour.

2.16 Procedural changes in the present survey:

Apart from the changes in the definition and classification of the economically active persons mentioned above, a few other procedural aspects introduced in the classification of usual status and current weekly and daily status are explained now. These changes, it may be seen, do not in any way affect the comparability of the survey estimates with that of the previous rounds.

(a) In the past, for the identification of the usual status based on the major time criterion, a trichotomous classification of the population was followed. i.e. a person is classified into one of the three broad groups 'employed', 'unemployed' and out of labour force' based on the major time criterion. In this round, the procedure prescribed is a two stage dichotomous procedure which involves

a classification into 'labour force' and 'out labour force' in the first stage and thereafter the labour force into 'employed' and 'unemployed' in the second stage. While this could marginally affect the principal and subsidiary classification theoretically, it can be seen that the 'all workers' would remain the same.

(b) Previously the current weekly status of a person was first assigned on the basis of the response to a direct question on his/her participation in economic activities during the week and thereafter the daily time disposition data was collected from all those who were in the labour force (i.e. employed plus unemployed). Experts and users have been feeling that this procedure may, in some cases, lead to undetection of marginal participation of women in the household based economic activities, particularly in the rural areas. The procedure of data collection, therefore, was changed for the 50th round. In this round, the daily time disposition was collected first from all the persons in the household and the current weekly status was recorded on the basis of the daily time disposition during the week.

2.17 Data collected and survey instruments²:

The data for this survey was collected in the NSS Schedule 10 used for employment surveys. For this round, the schedule had 8 core blocks. Household characteristics like, household size, principal industry-occupation, social group, land possessed and cultivated, use of hired labour, monthly per capita expenditure etc. were recorded in Block 3. In the next Block the detailed demographic particulars including age, sex, educational level school attendance, principal and subsidiary statuses, the industry, occupation of the employed, distance to place of work etc. were recorded. Block 5 was used to record the daily time disposition. Apart from recording the different activities from among the various status codes explained in the earlier part of this section, the industry and type of 'operation' for rural areas were also recorded. For a day a maximum of two activity statuses could be recorded,

an activity status getting an intensity of 'half or full' depending on the time spent on it. No limits on the number of activities that could be reported in a week was specified. The current weekly status of the person derived from the various daily activity statuses followed in the week and the corresponding industry-occupation was also recorded in this block. Besides the above, the wage and salary earnings were also entered in this block. Block 6 was used to record the answers to certain probing questions to the unemployed. The unemployed for this purpose were those who had not worked on any day of the reference week. These probing questions included among other things the academic performance, particulars of work sought, details of past employment, reasons for unemployment, length of spell of unemployment, type of efforts made etc. Further probing questions on the usually employed on the qualitative aspects of employment were made in Block 7. These included occupational mobility, availability for additional work and reasons, extent of underutilisation of labour time, membership of trade unions, nature of employer, permanency of employment etc. A major innovation in this survey was the attempt to specifically collect information on the activity profiles of children. In order to build up the profile, the school attendance status of the children, reason for non-attendance, extent of participation in household chores, information on the type of work done and the industry in which worked, reason for working, economic benefits derived by the household from such work, its effect on studies etc. were ascertained for all children aged in the 5-14 years age group in the sample household. All this information was recorded in Block 8. In Block 9, the follow up questions were asked to or about those who reportedly were engaged in domestic duties. This block was canvassed as in the previous surveys. Block 10 was canvassed as part of the rural labour enquiry being undertaken for the Labour Bureau by the NSSO and which is integrated with the employment survey.

2 Instructions to field staff Vols I & II, NSS 50th round: Department of Statistics, New Delhi, June 1993.

SECTION THREE

SAMPLE DESIGN AND ESTIMATION PROCEDURE

3.1 The sample design adopted for this round¹ of survey was similar to that followed in the past surveys in its general aspects. The general scheme was a stratified two-stage design with the first stage units being villages in the rural areas and urban frame survey blocks (UFS) in the urban areas. The second stage units were the households.

3.2 Sampling frame for first stage units: The frame used for selection of first stage units in the rural sector was the 1991 census list of villages for all the four sub-rounds for 8 states/u.t.s viz. Andhra Pradesh, Assam, Kerala, Madhya Pradesh, Orissa, Uttar Pradesh, West Bengal and Chandigarh. However for Agra district of U.P. and the three districts, viz. Durg, Sagar, and Morena of M.P., samples were drawn using 1981 census list of villages. For Jammu & Kashmir samples for all the 4 sub-rounds were drawn using the 1981 census list as the 1991 census was not conducted in the state. For the remaining 23 states/u.t.s, the frame was 1991 census list for subrounds 2 to 4 and 1981 census list for sub-round 1 as the 1991 census list was not available for use at the time of drawing the samples. As usual, for Nagaland the list of villages within 5 kms. of the bus route and for Andaman and Nicobar Islands the list of accessible villages constituted the frame. In the case of urban sector the frame consisted of the UFS blocks and, for some newly declared towns where these were not available, the 1991 census enumeration blocks were used.

¹ *Sample Design and estimation procedure for 50th Round NSS (Mimteographed, National Sample Survey Organisation, 1994)*

3.3 Region formation and stratification: States were divided into regions by grouping contiguous districts similar in respect of population density and cropping pattern. In rural sector each district was treated a separate stratum if the population was below 2 million and where it exceeded 2 million, it was split into two or more strata. This cut off point of population was taken as 1.8 million (in place of 2 million) for the purpose of stratification for districts for which the 1981 census frame was used. In the urban sector, strata were formed, within each NSS region on the basis of population size class of towns. However for towns with population of 4 lakhs or more the urban blocks were divided into two classes viz. one consisting of blocks inhabited by affluent section of the population and the other consisting of the remaining blocks.

3.4 Selection of first stage units: Selection of sample villages was done circular systematically with probability proportional to population and sample blocks circular systematically with equal probability. Both the sample villages and the sample blocks were selected in the form of two or more independent sub-samples. In Arunachal Pradesh the procedure of cluster sampling has been followed. Further large villages/blocks having present population of 1200 or more were divided into a suitable number of hamlet-groups/sub-blocks having equal population content. Two hamlet-groups were selected from the larger villages while one sub-block was selected in urban sector for larger blocks.

3.5 Selection of households: While listing the households in the selected villages, certain relatively

affluent households were identified and considered as second stage stratum 1 and the rest as second stage stratum 2. A total of 10 households were surveyed from the selected village/hamlet-groups, 2 from the first category and remaining from the second. Further in the second stage stratum-2, the households were arranged according to the means of livelihood. The means of livelihood were identified on the basis of the major source of income as i) self-employed in non-agriculture, ii) rural labour and iii) others. The land possessed by the households was also ascertained and the frame for selection was arranged on the basis of this information. The households were selected circular systematically from both the second stage strata.

3.6 In the urban blocks a different method was used for arranging the households for selection. This involved the identification means of livelihood of households as any one of a) self-employed, b) regular salaried/wage earnings, c) casual labour, d) others. Further the average household monthly per capita consumer expenditure (mpce) was also ascertained. All households with MPCE of (i) Rs. 1200/- or more (in towns with population less than 10 lakhs or (ii) Rs. 1500/- or more (in towns with population 10 lakh or more) formed second-stage stratum 1 and the rest, second-stage stratum 2. The households of second-stage stratum 2 were arranged according to means of livelihood class and MPCE ranges before selection of sample households. A total of 10 households were selected from each sample block as follows :

(i) For affluent strata/classes : 4 households

from second-stage stratum 1 and 6 households from second-stage stratum 2,

(ii) For other strata/classes : 2 house-holds from second stage stratum 1 and 8 from second-stage stratum 2. Households were then selected circular systematically with a random start. Shortfall in the required number of household in any second-stage stratum was made up by increasing the quota for the other second stage stratum.

3.7 Work programme: The survey period of one year was divided into four sub-rounds of three months duration each as below.

Period of survey for the four sub-rounds	
<u>sub-round</u>	<u>period of survey</u>
1	July-September, 1993
2	October- December, 1993
3	January-March, 1994
4	April-June, 1994

Equal number of sample villages and blocks was allotted for survey in each of these sub-rounds. However in Andaman and Nicobar Islands , Lakshadweep, and rural areas of Arunachal Pradesh and Nagaland, the restriction of surveying the allotted households during the sub-round period was not strictly enforced.

* 26 nucleus villages were allotted.

3.8 No. of villages/blocks and persons surveyed The number of villages/blocks and persons surveyed in different States and Union Territories is given in Statement-X. The information relates to all the sub-rounds covered. As reported in para 1.2, in Jammu and Kashmir the survey work was undertaken in the districts of Jammu, Kathua and Udhampur only. The remaining 11 districts were not surveyed. Therefore the estimates pertaining to all India and Jammu and Kashmir will be exclusive of these districts.

3.9 Estimation Procedure

3.9.1 Estimation of aggregates at sub-sample level Aggregates are first estimated at sub-sample level according to the following estimation formulae, where \hat{Y} denotes the estimate - based on one sub-sample - of the aggregate of a given characteristic Y for the rural sector of a state/u.t.

$$\hat{Y} = \sum_s \frac{1}{n_s} \sum_i \frac{P_{si} D_{si}^*}{P_{si}} \sum_{t=1}^2 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{h_{sit}} y_{sitj}$$

For the rural sector of Arunachal Pradesh,

$$\hat{Y} = \sum_s \frac{1}{n_s} \sum_{i=1}^{n_s} N_{si} \sum_{t=1}^2 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{h_{sit}} y_{sitj}$$

For the urban sector of a state/u.t.,

$$\hat{Y} = \sum_s \frac{N_s}{n_s} \sum_{i=1}^{n_s} D_{si} \sum_{t=1}^2 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{h_{sit}} y_{sitj}$$

where

- y : observed value of some characteristic for a sample household
- s : stratum suffix
- t : second-stage stratum suffix
- i : sample village/block suffix
- j : sample household suffix
- D : number of hamlet - groups / sub - blocks formed in the surveyed village/block

- H : number of households listed in the second - stage sampling frame
- h : number of sample households surveyed
- p : population of sample village as in the sampling frame
- N : for the urban sector, number of blocks in the sampling frame
- n : number of sample villages/blocks surveyed in this sub-sample
- Psi : population of the s-th stratum as per frame used in the selection of i-th sample village of the stratum
- Nsi : for Arunachal Pradesh, number of sample villages in the sampling frame for s-th stratum which was used in selection of i-th sample village of the stratum
- D* : equals 1, if D = 1
equals D/2, if D > 1

3.9.2 Estimation of aggregates for the combined sample (pooling sub-samples) The combined sample estimate of an aggregate is obtained as the simple average of the corresponding sub-sample estimates.

3.9.3 Estimates of ratios The estimate of a ratio of the form $R = Y/X$, where Y and X are the population aggregates of two characters, is obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

where \hat{Y} and \hat{X} are estimates of Y and X obtained according to the procedure laid down in para 3.9.1. Examples of ratio estimates are rates and percentages.

SECTION FOUR

MAIN FINDINGS

4.1 General : As stated earlier, this issue primarily deals with the employment and unemployment situation during 1993-94 among the three social groups of persons viz. scheduled tribes (ST), scheduled castes (SC) and 'other'. It is appropriate to discuss the other broad indicators pertaining to household and population characteristics of the different social groups before studying their employment - unemployment situation. Therefore, variation by social group in the level/pattern of a few household/population characteristics like (i) distribution of households by 'household type' (i.e. nature/type of work from which the household derived maximum income during the 365 days preceding the date of survey), (ii) distribution of households by land possessed/land cultivated, (iii) distribution of persons by monthly per capita expenditure (MPCE), etc. is discussed first. Then the main findings with respect to the indicators of employment and unemployment are summarised in this section. It may be mentioned that while all-India summary results are presented along with the write-up, the corresponding results at the state/union territory level are given at the end of this section. Part II gives the corresponding detailed results for all-India. The state/union territory level detailed results by social group are not included in the part II as they are likely to be subject to large margins of error in view of inadequate sample size.

4.2 Number of Households Surveyed by Social Group : Before looking into the various survey results by social group at the state/union territory level, it is necessary to see the respective sample sizes based on which the survey results/estimates are obtained. Statement 1A gives the number of households surveyed in 50th round by social group

for different states/union territories/all-India with rural - urban break-up. It may be observed that there are fairly large number of cases with number of surveyed households from a social group being less than 10 even at the state/union territory level. As the estimates based on small sample sizes are not likely to be sufficiently reliable, the state/union territory level results for any social group with sample size (i.e. number of households surveyed) less than 10 are not presented in the issue. Such cases are indicated by the symbol '*' in the summary statements. The social group specific estimates for a state/union territory based on sample size of 10 to 19 households are, however, presented in the summary statements. The corresponding estimates, indicated with the symbol '@' in the summary statements, are to be used with a great deal of caution.

4.3 Households and Population

4.3.1 Distribution of Households and Persons by Social Group : Statements 2.1R/U give per thousand distribution of estimated number of households and persons by social group separately for the rural and urban areas of different states/union territories/all-India. It may be seen that about 10 per cent of our rural population belong to the scheduled tribes (ST) and about 20 per cent to the scheduled castes (SC). The corresponding proportions were 10 and 18 per cent respectively for STs and SCs according to the 1991 Census. In urban India, the share of STs/SCs in total population was much less - only about 3 per cent for STs and about 13 per cent for SCs (2 and 12 per cent respectively as per 1991 Census).

Statement 1A : Number of households surveyed in NSS 50th round by social group

Different states and union territories show a wide variation among them so far as the share of ST and SC population within the states/union territories is concerned (see statements 2.1R/U for details). It may further be seen that within a state/union territory, proportions of both ST and SC population are generally higher in the rural areas than in the urban areas.

4.3.2 Average Household Size From statement 2.1R, it may be noted that for rural India, share of ST/SC in total population is a little less than their corresponding shares in total number of households. On the other hand, the share of 'other' category of persons in total population is more than its share with respect to number of households. The above findings indicate that the average household size of the ST/SC households is less than that for the 'other' category of households. This feature is observed for a majority of the states/union territories. However, such discriminating feature is not always observed in urban areas (see statement 2.1U).

4.3.3 Distribution of Households by Household Type : In NSS 50th round (1993-94), each surveyed household was categorised under an appropriate 'household type'. The type/nature of work which fetched maximum income to the

household during the reference period of 365 days preceding the date of survey determined its household type. The households were classified into 5 different household types for rural areas and 4 household types for urban areas. They were as follows :-

areas	different household types
rural	'self employed in agriculture', 'self employed in non-agriculture', 'agricultural labour', 'other labour' and 'others'
urban	'self employed', 'regular wage/salaried', 'casual labour' and 'others'

Distribution of Indian households by household type is given in statement 2.3A separately for each social group. The corresponding results for various states/union territories are given in statements 2.3R/U. In rural India, proportion of households depending on self employment was higher among 'other' households (58 per cent) compared to ST (44 per cent) and SC (31 per cent) households. On the other hand, proportion of 'rural labour' households was higher among ST (48 per cent) and SC (about 60 per cent) as compared to the 'other' households (30 per cent). In urban India too, proportion of households depending on self employment was higher for 'other' category (36 per cent) as compared to ST (22 per cent) and SC (25 per cent) households. Proportion of households depending on regular wage/salaried employment was almost the same for ST and 'other' category of households (44 per cent) as against 39 per cent among SC. Proportion of urban households depending on casual labour was higher among ST and SC (20 per cent and 28 per cent respectively) than among 'other' households (11 per cent).

¹ NSS estimates of proportion of ST or SC households/population are not strictly comparable with the corresponding figures available from 1991 Population Census due to the differences in definitions adopted. The NSSO classifies a household (and accordingly all persons within a household) as ST or SC if the informant reports the head of the household to be so. On the other hand, in the Population Census, a person enumerated was classified as belonging to ST or SC if he or she was covered in the list of STs/SCs furnished to the enumerator with respect to his/her state/union territory. The divergence of the NSS estimates of ST/SC households or population from the Census figures could partially be due to the limitation of the sample size to which the NSS estimates are subjected.

Households by Size Class

Land possessed by a household is likely to be a very good indicator of the economic status of the household, at least for the rural areas. Thus distribution of the households of different social groups by size class of land possessed is compared in statement 2.4A for rural India to see the variation among different social groups. It may be seen that the proportion of households possessing less than 0.01 hectare of land during 1993-94 was higher among both STs and SCs compared to the 'other'. The proportion of such households was the highest among SC (18 per cent). The corresponding proportion for ST households was about 13 per cent as against 11 per cent households with respect to the other social

group. It is seen that as high as 72 per cent of the SC households possessed land up to 0.40 hectare (1 acre). The corresponding proportions for ST and 'other' category of households were 43 per cent and 49 per cent respectively. It may also be noted that proportion of households possessing land of size more than 4.00 hectares was maximum for 'other' category of households (6 per cent) as compared to the ST (about 5 per cent) and SC households (1 - 2 per cent). A comparison of the said distribution at two time points i.e. 1987-88 and 1993-94 reveals that during the period 1987-94, the proportion of households under each of the following size classes of land possessed, viz., (i) 0.00 hectare, (ii) 0.41-1.00 hectare, (iii) 1.01 - 2.00 hectares, (iv) 2.01 - 4.00 hectares and (v) 4.01

hectares & above, had decreased except for class (i) above with respect to ST households and class (ii) with respect to 'other' category of households. Such decreases in proportion of households in the above categories of land possessed classes were compensated by an increase in the proportion of households in the land possessed class 0.01 - 0.40 hectare for each of the three social groups. The distribution of households of various social groups by size class of land possessed by state/union territory is shown in statement 2.4R.

Amount of land actually cultivated by a household appears to be a better indicator of the economic status of the household than the amount of land possessed by it. Distribution of households by size class of land cultivated is given in statement 2.5R for the rural areas of different

states/union territories/all-India. It may be seen that more than half (about 53 per cent) of the SC households cultivated land of size less than 0.01 hectare only during 1993-94 in rural India. The corresponding proportions for ST and 'other' category of households were 30 per cent and 36 per cent respectively. The proportions of households cultivating up to 0.40 hectare (i.e. 1 acre) of land were of the order of 48 per cent for ST, 76 per cent for SC and 53 per cent for 'other' category of households. The proportion of households cultivating larger holdings of size 4.01 hectares and above was maximum for 'other' category of households (a little more than 5 per cent). Between the two scheduled categories of households, the proportion of households operating such large holdings was higher among the households belonging to ST (4 per cent) than those belonging to SC (1 per cent).

@ Neo-Buddhists of the state of Maharashtra were not considered for obtaining the distribution in col.(4)

4.3.6 Distribution of Persons by Household Monthly Per Capita Expenditure (MPCE) Class

Household monthly expenditure, which serves as a proxy for household monthly income, reflects the standard of living of the members of a household to a large extent - the lower the value of the household consumer expenditure, the poorer are the members of the household. Based on the data on household consumer expenditure collected from the sample households surveyed in NSS 50th round (1993-94), distribution of persons by household MPCE class is obtained for each of the three social groups and the same is presented in statements 2.6R/U for different states/union territories/all-India. It is worth studying the said distributions for the different social groups side by side to see if there is any variation in the pattern of household MPCE among the social groups. This study assumes much more importance in view of the fact that the two indicators viz. household MPCE and the pattern of employment-unemployment are likely to be inter-dependent. It may be seen from statement 2.6R that in rural India, proportion of persons in each of the five lower MPCE classes (viz. less than Rs. 120, Rs. 120-140, Rs. 140-165, Rs. 165-190 & Rs. 190-210) was higher among STs and SCs than the 'other' social group. Between STs and SCs, proportions of persons in lower MPCE classes were higher among STs than the SCs. It may be seen that 9 per cent of STs living in rural India spent less than Rs. 120/- per month during the year 1993-94; the corresponding percentages for SCs and 'other' being 7 per cent and 3 per cent respectively. As high as 55 per cent of the STs in rural India spent up to Rs. 210/- per month during 1993-94. The corresponding percentages for the SCs and 'other' category of persons were 49 per cent and 33 per cent respectively. The proportion of persons in the highest MPCE class (i.e. those who spent more than Rs. 560/- per month) was higher among 'other' category of persons (6 per cent) than the STs and SCs (2 per cent each). In urban India too, proportion of persons in each of the six lower MPCE classes (i.e. less than Rs. 160, Rs. 160-

190, Rs. 190-230, Rs. 230-265, Rs. 265-310 & Rs. 310-355) was higher among STs and SCs than the 'other' category of persons. But contrary to the findings for the rural areas, in urban India, proportions of persons in these lower MPCE classes were higher among the SCs than STs. It may be noted from statement 2.6U that about 9 per cent of the SCs of urban India spent less than Rs. 160/- per month during 1993-94 as against the corresponding proportion of 7 per cent for the STs and 4 per cent for the 'other'. The proportion of persons spending more than Rs. 1055/- per month was 5 per cent for 'other' and only about 2 per cent for each of the STs and SCs.

4.3.7 Proportion of Households with no Literate Adult Member/Adult Female Member:

The activity pattern of the members of a household is likely to be related with their level of literacy. Statements 2.7R/U give proportions of households having no literate adult (age 15 yrs. and above) member and no literate adult female member for different social groups of households at the state/union territory/all-India level, separately for rural and urban areas. The proportion of households with no literate adult member/female member was much higher among households belonging to the scheduled categories as compared to the 'other' category in both rural and urban India. Between the two scheduled categories proportion of such households was higher among STs in rural India and among SCs in urban India.

4.3.8 Per Thousand Distribution of Persons (Age 15 Years and Above) by General Education

The educational level attained by a person is highly related to his or her employment prospects. Statements 2.8R/U give the state/union territory/all-India level distribution of persons of age 15 years and above by their educational level for each of the three social groups separately. The results for all-India are summarised in statement 2.8A below. It may be seen from this statement that proportion of illiterates among the persons of age 15 years and above was much higher among

the STs and SCs than the non-scheduled category of persons for both males and females in rural/urban areas of the country. Between the two scheduled categories, proportion of illiterates was higher among STs than SCs in the rural areas for both males and females. But in urban India, proportion of illiterates was higher among SCs than STs for both males and females. Proportion of persons with

educational level as graduate and above was higher among the 'other' category than the scheduled categories of persons for both males and females of rural/urban India. Between the two scheduled categories, proportion of persons with educational level as graduate and above was higher among the STs except for rural males for whom the said proportion was higher among SCs than STs.

Statement 2.8A : Per thousand distribution of persons of age 15 years and above by general education for different social groups

4.3.9 School Attendance Rates Among the Children in the Age-Group 5-14 Years : School attendance rate among the children is supposed to be one of the important social indicators for assessing the status of progress of any particular group of people under study. Statement 2.9A gives the school attendance rates among the children in the age-group 5-14 years for different social groups for India as per NSS 38th(1983), 43rd (1987-88) and 50th (1993-94) rounds. The corresponding state/union territory level estimates for the 50th round are presented in statements 2.9R/U. It may be seen that school attendance rate was much higher among the children (5-14 years) of 'other' category of households as compared to the households belonging to the scheduled categories. This is true for both males and females of rural/urban areas. Between the two scheduled categories of households, school attendance rates

for both males and females were higher among the households belonging to SCs than the STs in rural India. In urban India however, school attendance rates among the children were a little more in ST households than the households belonging to SC. It may further be observed that the school attendance rates steadily increased during the period 1983-94. The rate of increase is found to be much higher during the period 1988-94 as compared to the period 1983-88, and faster among groups with lower school attendance ratios.

4.4 Employed (Work - Force)

4.4.1 General : The NSSO generates three different estimates of 'employed' (or work - force) from the data collected through its quinquennial employment-unemployment surveys. They are :

Statement 2.9A : School attendance rates among the children in the age-group 5-14 yrs. (i.e. number of children attending the school per 1000 children in the age-group) for different social groups : India

@ Figures correspond to current enrolment rates.

* Neo-Buddhists of Maharashtra are not considered under SC for obtaining the estimates.

- (i) number of persons usually employed (i.e. those who had worked for a relatively longer period during a reference period of 365 days preceding the date of survey);
- (ii) average number of persons employed in a week (i.e. those who had worked at any time during a reference period of 7 days preceding the date of survey) and
- (iii) average proportion of person-days of work during the week (i.e. working person-days in a week of those who had worked at any time during the reference period of 7 days preceding the date of survey divided by 7).

Number of persons /person-days employed per thousand persons/person-days is referred to as work-force participation rate (WFPR) or worker population ratio (WPR).

4.4.2 In the 50th round survey, estimates of WPR by social group have been generated with respect to all the three approaches (i), (ii) and (iii) above, to be hereinafter referred to as usual status (US), current weekly status (CWS) and current daily status (CDS) approaches respectively. In the US approach, the estimates of usually employed are provided in two categories - usually employed in the principal status (PS workers) and usually employed in the subsidiary status (SS workers). The two categories together constitute the total usually employed (all workers).

4.4.3 The US approach adopted for classification of the population does not take into consideration the changes in the activity pattern caused by seasonal fluctuations. The estimates of WPR according to CWS/CDS approaches give the average weekly/daily picture of employment. It may be noted that the difference in the two rates of WPR according to CWS & CDS approaches give an idea about the extent of under-employment of those who had some employment during the week.

Statement 3.3A : Number of persons employed per 1000 persons (WPR) during 1993-94 for different social groups

4.4.4 Estimates of Employed According to US/CWS/CDS Approaches : For studying the disparities in the WPRs among various regions and social groups, according to US/CWS/CDS approaches, estimates of WPR (1993-94) for different states/union territories/all-India are presented in statements 3.3.1R/U (US approach-PS workers), 3.3.2R/U (US approach-all workers i.e. PS & SS workers combined), 3.3.3R/U (CWS approach) and 3.3.4R/U (CDS approach), separately for males and females. The estimates for India are summarized below in statement 3.3A.

4.4.5 It may be seen that in rural India, proportion of persons employed in the principal status according to US approach was higher among STs than SCs and 'other', for both males and females. For rural males, these proportions were 58 per cent for STs, 54 per cent for SCs and 53 per cent for 'other' category of persons. For rural females, the corresponding proportions were 37 per cent for STs, 25 per cent for SCs and 21 per cent for 'other'. In Urban India, the proportion of persons employed in the principal status according to US approach was of the same order for males (50 to 52 per cent) with respect to each of the three social groups whereas for urban females, it is seen that such

proportion was higher among the STs (18 per cent) than SCs (16 per cent) and 'other' (11 per cent).

4.4.6 A comparison of WPRs based on the two US approaches (i.e. employed based on PS workers and all workers) reveals that proportion of SS workers was much higher among females than the males in each of the three social groups for both rural and urban India.

4.4.7 Changes in the Employment Level : It is worthwhile to see if there has been any change in the employment level for different social groups over the past couple of years. For studying this, the proportions of usually employed as per NSS 38th, 43rd and 50th rounds are discussed below. Statement 3.6A gives the proportion of 'all workers' based on these three rounds for each of the three social groups for India. It may be seen from the above statement that proportion of 'all workers' according to the usual status remained almost same during the period 1993-94 as it was during the year 1983 for both males and females of different social groups except for SC females of rural India and ST females of urban India for whom a little decline in the proportions was observed.

Statement 3.6A: Number of persons usually employed per 1000 persons (WPR-all workers) for NSS 38th, 43rd and 50th rounds

4.5 Unemployed

4.5.1 General: As in the case of 'employed', for unemployed also, three kinds of estimates are obtained following the three different approaches. These are :

- i) number of persons usually unemployed based on 'usual status' approach,
- ii) number of persons unemployed on an average in a week based on the 'weekly status' approach and
- iii) average number of person-days of unemployment during the reference period of seven days preceding the date of survey.

The first estimate indicates the number of persons unemployed for a relatively longer period during a reference period of 365 days and approximates to an indicator of the chronic unemployment. Some of the unemployed on the basis of this criterion, might be working in a subsidiary capacity. One can, therefore, get another estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period. The former can be

called the usually unemployed according to the principal status (PS) and the latter, the usually unemployed excluding the subsidiary status workers (US adjusted); admittedly the latter estimate will be lower than the former. The estimate based on the weekly status gives the average weekly picture during the survey year and includes both chronic unemployment and also the intermittent unemployment of those categorised as usually employed caused by seasonal fluctuations in the labour market. The third estimate based on the daily status concept gives average level of unemployment on a day during the survey year. It is the most inclusive rate of 'unemployment' capturing the unemployed days of the chronically unemployed, the unemployed days of the usually employed who become intermittently unemployed during the reference week, and the unemployed days of those classified as employed according to the priority criterion of current weekly status. State/union territory/all-India level estimates of proportion of unemployed (PU), i.e. number of persons unemployed per thousand persons, as per the US, CWS and CDS approaches for different social groups are presented in statements 4.0.1R/U(PS), 4.0.2R/U(US adjusted), 4.0.3R/U(CWS) and 4.0.4R/U(CDS) respectively.

Statement 4.1A : Number of persons unemployed per 1000 persons (PU) during 1993-94 for different social groups

India approach	proportion of unemployed (PU)

Figures in parentheses give the corresponding unemployment rates (i.e. number of unemployed per 1000 persons in the labour force)

4.5.2 Estimates of Unemployed at All-India Level : The estimates of PUs as per the different approaches for each of the three social groups are summarised below in statement 4.1A for India. It may be seen that proportion of unemployed (PU) during 1993-94 was higher in urban areas of the country than in rural areas for both males and females of the different social groups, except for ST females according to CWS and CDS approaches and SC females according to CDS approach only. In rural India, proportion of chronically unemployed was highest for the 'other' category of persons for both males and females. Between the two scheduled categories of rural households, proportion of chronically unemployed among males was found to be higher among the

SCs than STs. However, for rural females, no significant difference in the proportion of chronically unemployed was observed between the two scheduled categories. Among urban males of the country, contrary to the rural areas, proportion of chronically unemployed was higher among the scheduled categories of persons than in the non-scheduled category. The said proportion of chronically unemployed (PS) among the urban males was highest for the STs (2.9 per cent) followed by the corresponding proportions of 2.6 per cent for SCs and 2.4 per cent for 'other' category of persons. For urban females, proportion of chronically unemployed was less for STs (0.4 per cent) than the persons belonging to the SCs/ 'other' category (1.0 - 1.1 per cent).

Statement 4.2A : Number of persons 'usually unemployed' per 1000 persons (PU) for different social groups based on NSS 38th, 43rd and 50th rounds according to usual status

(M: male; F: female)

Figures in parentheses give the corresponding unemployment rates (i.e. number of unemployed per 1000 persons in the labour force)

4.5.3 Changes in the Proportions of Unemployed Over the Period 1983-1994: For making an assessment as regards whether there has been any change in the proportion of unemployed over the past few years, the proportions of unemployed (PU) according to US approach based on three NSS rounds i.e. 38th (1983), 43rd (1987-88) and 50th (1993-94) for different social groups are presented in statement 4.2A for India. The corresponding proportions according to CWS and CDS approaches are given in statement 4.2B. The procedural change incorporated in the 50th round in the classification of persons under the three broad groups 'employed', 'unemployed' and 'out of labour force' (see section 2 for details) is perhaps not likely to affect the said comparability of the estimates of PUs adversely. It may be observed that during the period 1983-88, proportion of usually unemployed increased for both rural and urban males/females of the different social groups for the country except for ST males of urban India for whom there was apparently a decline in the proportion during the said period. The proportion

of usually unemployed in rural/urban India during the period 1988-94 shows a sharp decline for both males and females with respect to the different social groups except for (i) urban ST males as per the principal status and (ii) rural ST males/urban ST males/urban SC females/urban 'other' females as per the usual status (adjusted) for whom an increase in the proportion of unemployed is noticed during the period. So far as the estimates according to CWS and CDS approaches are concerned, it is only possible to comment on the changes in the proportion of unemployed during the period 1983-94 as a whole and not separately for the two time periods 1983-88 and 1988-94 since social group level estimates of PUs were not released for 1987-88. It may be seen from statement 4.2B that there has been a decline in the proportion of unemployed according to both CWS and CDS approaches during the period 1983-94 for all the categories except for urban SC females according to CWS approach and 'other' urban females according to both CWS and CDS approaches.

(M: male; F: female)

Figures in parentheses give the corresponding unemployment rates (i.e. number of unemployed per 1000 persons in the labour force)

Tables for CWS and CDS by social groups were not released for NSS 43rd round.

4.6 Labour Force

4.6.0 General: Labour force, or in others words, the 'economically active' population refers to the population which supplies or seeks to supply labour for production and therefore, includes both 'employed' and 'unemployed'. For measuring the labour force participation, all the three measures adopted for classification of the population viz. usual status, current weekly status and current daily status are used. The current daily status gives only the labour force person-days. Further, the labour force measured in terms of usual status includes persons who had for a relatively longer part of the year either worked or were looking for work and also those who had worked at least for some time from among the rest. Thus, on the basis of usual status, two estimates can be obtained - one based on the principal status only and other considering both the principal as well as the subsidiary statuses. For

seeing the labour force participation rates (LFPR) i.e. the number of persons in the labour force per 1000 persons by state/union territory/all-India X social group separately for males and females, reference may be made to statements 5.0.1R/U (usual principal status), 5.0.2R/U (usual principal and subsidiary statuses combined), 5.0.3R/U (CWS) and 5.0.4R/U (CDS) respectively. The estimates of LFPR for all-India according to the different approaches by social group are however summarised below in statement 5.0A. It may be noted that in rural India, proportion of economically active persons was highest among the STs followed by SCs. This is true for both males and females. For urban males of the country, proportion of economically active persons was a little higher among STs and 'other' (53-55 per cent) than SCs (52-53 per cent). For urban females, the above proportion was highest among STs followed by SCs as observed for rural India.

1. भारत में सामाजिक समूहों के बीच में रोजगारी
एवं बेरोजगारी की स्थिति। हि. 1-17
रा०प्र०स० 50वाँ दौर (जुलाई 93-जून 94)

भारत में सामाजिक समूहों के बीच में
रोजगारी एवं बेरोजगारी की स्थिति
रा. प्र. स. 50 वां दौर (जुलाई 93-जून 94)

सर्वेक्षण निष्कर्ष

4.1 सामान्य :

यह नोट 1993-94 के दौरान तीन सामाजिक समूहों के व्यक्तियों अर्थात् अनुसूचित जनजाति, अनुसूचित जाति तथा "अन्य" में रोजगार और बेरोजगारी की स्थिति से मुख्य रूप से संबंधित है। विभिन्न सामाजिक समूहों के परिवार तथा जनसंख्या विशेषताओं की उनकी रोजगार तथा बेरोजगारी की स्थिति पर अध्ययन से पूर्व उनसे सम्बंधित अन्य बृहद सूचकों पर चर्चा करना उचित है। अतः कुछ परिवार जनसंख्या विशेषताओं जैसा कि परिवार प्रकार अर्थात् काम की प्रकृति प्रकार जिससे सर्वेक्षण की तारीख से पूर्ववर्ती 365 दिनों के दौरान परिवार को अधिकतम आय प्राप्त हुई है, के अनुसार परिवारों का वितरण, (11) भूमि स्वामित्व/कृषि भूमि के अनुसार परिवारों का वितरण, (111) मासिक प्रति व्यक्ति व्यय आदि के अनुसार व्यक्तियों के वितरण पर पहले चर्चा की जाती है। इसके बाद इस अनुभाग में रोजगार और बेरोजगारी के सूचकों के संबंध में मुख्य निष्कर्षों का सार प्रस्तुत किया है। यहाँ यह उल्लेखनीय है कि जबकि समस्त भारत संक्षिप्त परिणाम आलेख के साथ प्रस्तुत किए गये हैं, राज्य/संघ शासित क्षेत्र स्तर के तदनुरूपी परिणाम इस अनुभाग के अंत में दिए गए हैं। परिशिष्ट सारणी समस्त भारत हेतु तदनुरूपी विस्तृत परिणाम दर्शाती है। सामाजिक समूह के अनुसार राज्य/संघ शासित क्षेत्र स्तर के विस्तृत

परिणामों को परिशिष्ट सारणी में शामिल नहीं किया गया है क्योंकि उनमें अपर्याप्त प्रतिदर्श आकार के मद्देनजर त्रुटि आने की काफी संभावना है।

4.2 सामाजिक समूह के अनुसार सर्वेक्षित परिवारों की संख्या

राज्य/संघ शासित क्षेत्र स्तर पर सामाजिक समूह के अनुसार विभिन्न सर्वेक्षण परिणामों की जांच-पड़ताल करने से पहले यह देखना आवश्यक है कि संगत प्रतिदर्श आकार उस पर आधारित है जिस पर सर्वेक्षण परिणाम/अनुमान प्राप्त किए जाते हैं। विवरण-1 क ग्रामीण शहरी ब्यौरा सहित विभिन्न राज्यो/संघ शासित क्षेत्रों/अखिल भारत हेतु सामाजिक समूह के अनुसार 50वां दौर में सर्वेक्षित परिवारों की संख्या दर्शाता है। यह देखा जा सकता है कि राज्य/संघ शासित क्षेत्र स्तर पर भी 10 से कम होते हुए एक सामाजिक समूह से सर्वेक्षित परिवारों की संख्या सहित मामलों की संख्या काफी अच्छी है। चूंकि, अनुमान लघु प्रतिदर्श आकारों पर आधारित है, अतः पर्याप्त विश्वसनीय होने की संभावना नहीं है, राज्य/संघ शासित क्षेत्र स्तर परिणाम किसी सामाजिक समूह हेतु प्रतिदर्श आकार सहित अर्थात् सर्वेक्षित परिवारों की संख्या जो कि 10 से कम है, अंक में प्रस्तुत नहीं किया गया है। इस प्रकार के मामले सारांश विवरणियों में X संकेत द्वारा दर्शाए गए हैं। तथापि राज्य/संघ शासित क्षेत्र आधारित प्रतिदर्श

आकार के 10 से 19 परिवारों हेतु सामाजिक समूह विशिष्ट अनुमानों को सारांश विवरणियों में प्रस्तुत किया गया है। तदनुसूची अनुमानों जो कि सारांश विवरणियों में @ संकेत के साथ दर्शाये गए हैं। बड़ी सावधानी के साथ प्रयोग किये जाने हैं।

4.3 परिवार तथा जनसंख्या

4.3.1 सामाजिक समूह के अनुसार परिवारों तथा व्यक्तियों का विवरण

ऐसा पाया गया है कि हमारी ग्रामीण जनसंख्या का लगभग 10 प्रतिशत अनु.जनजाति तथा लगभग 20 प्रतिशत अनु. जाति का है। 1991 की गणना के अनुसार अनु. जनजाति और अनु. जाति हेतु तदनुसूची संदर्भावधि समानुपात क्रमशः 10 और 18 प्रतिशत था। शहरी भारत में, कुल जनसंख्या में अनु. जनजाति/अनु.जाति का भाग काफी कम, अनु. जनजाति के लिए लगभग 3 प्रतिशत तथा अनु.जाति के लिए लगभग 13 प्रतिशत (1991 की गणना के अनुसार क्रमशः 2 और 12 प्रतिशत)। राज्य/संघ शासित क्षेत्रों में अनु.जनजाति तथा अनु.जाति जनसंख्या के भाग का संबंध है। भिन्न-भिन्न राज्यों तथा संघ शासित क्षेत्रों ने उनमें व्यापक भिन्नता दर्शाई है (विस्तृत विवरण हेतु देखें विवरण 2.1 आर/यू)। आगे यह भी पाया गया है कि एक राज्य/संघ शासित क्षेत्र में अनु.जनजाति तथा अनु. जाति दोनों की जनसंख्या का समानुपात सामान्यतया शहरी क्षेत्रों की तुलना में ग्रामीण क्षेत्रों में उच्चतर है।

4.3.2 औसत परिवार आकार

यह नोट किया जा सकता है कि ग्रामीण भारत हेतु कुल जनसंख्या में अनु.जनजाति/अनु. जाति का भाग परिवारों की कुल संख्या में उनके तदनुसूची भाग से कुछ कम है। दूसरी ओर कुल जनसंख्या में "अन्य" श्रेणी के व्यक्तियों का भाग परिवारों की संख्या के संबंध में इसके भाग से काफी अधिक है। उपर्युक्त निष्कर्ष दर्शाते हैं कि अनु.जनजाति/अनु.जाति के परिवारों का औसत परिवार आकार "अन्य" श्रेणी के परिवारों से कम है। यह विशेषता अधिकांश

राज्यों/संघ शासित क्षेत्रों के लिए पाई गई है तथापि, ऐसी अंतर समझने वाली विशेषता शहरी क्षेत्रों में हमेशा नहीं पाई जाती (देखें विवरणी 2.1 यू)

4.3.3 परिवार प्रकार के अनुसार परिवारों का वितरण

रा.प्र.सर्वे. 50वें दौर (1993-94) में, प्रत्येक सर्वेक्षित परिवार को एक उपयुक्त "परिवार प्रकार" के अंतर्गत श्रेणिबद्ध किया गया था। उस कार्य का प्रकार/प्रकृति जिससे सर्वेक्षण की तारीख से बाद के 365 की संदर्भावधि के दौरान परिवार में अधिकतम आय प्राप्त हुई में इसके परिवार प्रकार का निर्धारण किया है। परिवारों को ग्रामाण क्षेत्रों हेतु 5 विभिन्न परिवार प्रकारों तथा शहरी क्षेत्रों हेतु 4 परिवार प्रकारों में वर्गीकृत किया गया था। वे निम्नानुसार हैं :

क्षेत्र	विभिन्न परिवार प्रकार
ग्रामीण	"कृषि में स्व-नियोजित", "गैर-कृषि कार्यों में स्व-नियोजित", "कृषि श्रमिक", "अन्य श्रमिक" तथा "अन्य"
शहरी	"स्व-नियोजित", "नियमित मजदूरी/वेतन वाले", "नैमित्तिक श्रमिक", तथा "अन्य"

परिवार प्रकार के अनुसार भारतीय परिवारों का वितरण प्रत्येक सामाजिक समूह हेतु पृथकतः विवरणी 2.3 में दिया गया है। ग्रामीण भारत में, स्व-नियोजित पर आधारित परिवारों का समानुपात अनु.जनजाति (44 प्रतिशत) तथा अनु. जाति (31 प्रतिशत) परिवारों की तुलना में "अन्य" परिवार (58 प्रतिशत) में उच्चतर था। दूसरी ओर, "ग्रामीण श्रमिक" परिवारों का समानुपात "अन्य" परिवारों की तुलना में अनु. जनजाति में (48 प्रतिशत) तथा अनु.जाति में (लगभग 60 प्रतिशत) उच्चतर था/ शहरी भारत में भी स्व-नियोजित पर आधारित परिवारों का समानुपात अनु.जनजाति (22 प्रतिशत) तथा अनु.जाति (25 प्रतिशत) परिवारों की तुलना में अन्य 36 प्रतिशत उच्चतर /नियमित मजदूरी वेतन वाले रोजगार पर आधारित परिवारों का समानुपात अनु.जाति में 39

प्रतिशत के मुकाबले अनु.जनजाति तथा "अन्य" श्रेणी के परिवार का (44 प्रतिशत) था। नैमित्तिक मजदूरी पर निर्भर शहरी परिवारों का समानुपात अनु.

जनजाति तथा अनु.जाति में "अन्य" परिवारों (11 प्रतिशत) की तुलना में (क्रमशः 20 प्रतिशत और 28 प्रतिशत था)।

विवरण-1: परिवार के प्रकार के अनुसार विभिन्न सामाजिक समूह के परिवारों का प्रति हजार वितरण

भारत

ग्रामीण भारत

सामाजिक समूह	परिवार प्रकार के अनुसार परिवारों का प्रति 1000 वितरण							सभी
	में स्व-नियोजित			कृषि श्रमिक	अन्य श्रमिक	उप-जोड़ (ग्रा.श्रमि.)	अन्य	
	कृषि	गैर-कृषि	उप-जोड़					
अनु.जनजाति	380	59	440	378	101	479	82	1000
अनु.जाति	201	107	308	493	102	595	97	1000

सभी	337	434	132	97	1000	

4.3.4 भूमि स्वामित्व के आकार वर्ग के अनुसार परिवारों का वितरण

किसी परिवार के आर्थिक स्तर का एक परिवार के स्वामित्व में भूमि एक बहुत अच्छा सूचक है, कम से कम ग्रामीण क्षेत्रों में। अतः भूमि स्वामित्व के आकार वर्ग के अनुसार विभिन्न सामाजिक समूहों के वितरण में ग्रामीण भारत में विभिन्न सामाजिक समूहों में भिन्नता देखने हेतु विवरण-2 में तुलना की गई

है। यह भी देखा है कि 1993-94 के दौरान 0.01 हेक्टेयर से कम भूमि वाले परिवारों का समानुपात अन्यो की तुलना में अनु.जनजाति तथा अनु.जाति में उच्चतर थी। ऐसे परिवारों का समानुपात अनु.जाति (18 प्रतिशत) में उच्चतम था। अनु. जनजाति परिवारों हेतु तदनुरूपी समानुपात अन्य सामाजिक समूहों के परिवारों के संबंध में 11 प्रतिशत की तुलना में लगभग 13 प्रतिशत था। ऐसा देखा गया है कि

अनु.जाति के परिवारों में काफी उच्च 72 प्रतिशत के पास 0.40 हेक्टेयर (1 एकड़) तक भूमि का स्वामित्व था। अनु. जनजाति तथा तथा "अन्य" श्रेणी के परिवारों का तदनुरूपी समानुपात क्रमशः 43 प्रतिशत तथा 49 प्रतिशत था। यह भी नोट किया जा सकता है कि 4.0 हेक्टेयर से भी अधिक भूमि आकार के स्वामित्व वाले परिवारों का समानुपात अनु. जाति (लगभग 5 प्रतिशत) तथा अनु.जनजाति के परिवारों की (1-2 प्रतिशत) की तुलना में अन्य श्रेणी के परिवारों हेतु अधिकतम (6 प्रतिशत) था। दो बार प्वाइंट अर्थात् 1987-88 और 1993-94 में कथित वितरण की एक तुलना से पता चलता है कि 1987 से 1994 की अवधि के दौरान भूमि स्वामित्व के निम्नलिखित आकार वर्गों अर्थात्

(i) 0.00 हेक्टेयर, (ii) 0.41-1.00 हेक्टेयर, (iii) 1.01-2.00 हेक्टेयर, (iv) 2.01-4.00 हेक्टेयर तथा (v) 4.01 हेक्टेयर तथा इससे अधिक अनु. जनजाति परिवारों के संबंध में उपरोक्त वर्ग (1) तथा "अन्य" श्रेणी के परिवारों के संबंध में श्रेणी (11) को छोड़कर प्रत्येक में हास हुआ है। भूमि स्वामित्व की उपर्युक्त श्रेणियों में परिवारों के समानुपात में ऐसे हास की क्षतिपूर्ति तीन सामाजिक समूहों के प्रत्येक में भूमि स्वामित्व आकार 0.01-0.04 हेक्टेयर के परिवारों के समानुपात में वृद्धि हुई है। राज्य/संघ शासित क्षेत्र के अनुसार भूमि स्वामित्व के आकार वर्ग के अनुसार, विभिन्न सामाजिक समूहों के अनुसार परिवारों का वितरण विवरणी 2.4 आर में दर्शाया गया है।

विवरणी 2 :

ग्रामीण भारत में रहने वाले विभिन्न सामाजिक समूहों हेतु भूमि स्वामित्व के आकार वर्ग के अनुसार परिवारों का प्रति 1000 वितरण

भारत भूमि स्वामित्व (0.00 हेक्ट.) का आकार वर्ग	ग्रामीण सामाजिक समूह

कालम (4) में वितरण प्राप्त करने हेतु महाराष्ट्र राज्य के नव बौद्धों पर विचार नहीं किया गया था।

4.3.5 कृषि भूमि के आकार वर्ग के अनुसार परिवारों का वितरण :

एक परिवार द्वारा वास्तविक कृषि भूमि की

गणना, उसी परिवार द्वारा भूमि के स्वामित्व की तुलना में, आर्थिक स्थिति का ज्यादा बढ़िया सूचक प्रतीत होता है। ऐसा देखा गया है कि ग्रामीण भारत

में आधे से अधिक अनु.जाति के परिवार (लगभग 53 प्रतिशत) ने 1993-94 के दौरान केवल 0.01 हेक्टेयर से भी कम-भूमि आकार में खेती की। अनु.जनजाति और "अन्य" श्रेणी के परिवारों का तदनुरूपी समानुपात क्रमशः 30 प्रतिशत और 36 प्रतिशत था (0.40 हेक्टेयर) (अर्थात् 1 एकड़) तक काश्तकारी करने वाले परिवारों का क्रम अनु.जनजाति हेतु 47 प्रतिशत, अनु.जाति हेतु 76 प्रतिशत तथा "अन्य" श्रेणी के परिवारों हेतु 53 प्रतिशत थी। 4.01 हेक्टेयर तथा इससे अधिक आकार के बृहद जोतों पर काश्तकारी करने वाले परिवारों का समानुपात "अन्य" श्रेणी के परिवारों हेतु अधिकतम (5 प्रतिशत) से कुछ अधिक था। परिवारों के दो निर्धारित वर्गों के बीच में अनु.जनजाति से संबंधित परिवारों में ऐसी बृहद जोतों के प्रचालन वाले परिवारों का समानुपात (4 प्रतिशत) उच्चतर था और उसके बाद अनु.जाति से संबंधित का। प्रतिशत था।

4.3.6 मासिक प्रति व्यक्ति व्यय वर्ग के परिवारों के अनुसार व्यक्तियों का वितरण:

परिवारिक मासिक व्यय जिसे परिवार की मासिक आय हेतु परोक्षी के रूप में लिया गया, काफी सीमा तक परिवार के सदस्यों के जीवन-यापन के स्तर को प्रदर्शित करता है, परिवार का उपभोग व्यय जितना कम होगा, परिवार के सदस्य उतने ही गरीब माने जायेंगे। रा.प्र.सर्वे. 50वां दौर (1993-94) में सर्वेक्षित प्रतिदर्श परिवारों से संगृहीत परिवार उपभोग व्यय संबंधी आंकड़ों पर आधारित मासिक प्रति व्यक्ति व्यय वर्ग के परिवारों के अनुसार व्यक्तियों का वितरण तीन सामाजिक समूहों में से प्रत्येक हेतु प्राप्त किया गया। विभिन्न सामाजिक समूहों हेतु कथित वितरण का अध्ययन यह देखने के लिए कि यदि सामाजिक समूहों में मासिक प्रति व्यक्ति व्यय वाले परिवार के पैटर्न में कोई अंतर है तो साथ-साथ करना उपयोगी होगा। यह अध्ययन इस तथ्य के मद्देनजर अधिक महत्वपूर्ण प्रतीत होता है कि दो संकेतकों अर्थात् परिवार का मासिक प्रति व्यक्ति व्यय तथा रोजगार और बेरोजगारी का पैटर्न लगभग परस्पर निर्भर है। विवरणी 2.6 आर से यह

देखा जा सकता है कि ग्रामीण भारत में पांच निम्नतर मासिक प्रति व्यक्ति व्यय के प्रत्येक में (अर्थात् 120 रु., 120-140 रु., 140-165 रु., 165-190 रु. और 190-210 रु. से कम) में व्यक्तियों का समानुपात "अन्य" सामाजिक समूह से अनु.जनजाति तथा अनु.जाति में उच्चतर थी। यह देखा गया है कि ग्रामीण भारत में रहने वाले अनु.जनजाति के 9 प्रतिशत वर्ष 1993-94 के दौरान 120 रु. प्रति मास कम खर्च करते थे, अनु.जाति तथा अन्य हेतु तदनुरूपी प्रतिशत क्रमशः 7 प्रतिशत और 3 प्रतिशत था। ग्रामीण भारत में अनु. जनजाति हेतु 1993-94 के दौरान 210रु. प्रति मास तक खर्च करने वाले व्यक्तियों का प्रतिशत काफी ऊँचा 55 प्रतिशत है। अनु.जाति तथा अन्य श्रेणी के व्यक्तियों का तदनुरूपी प्रतिशत क्रमशः 49 प्रतिशत तथा 33 प्रतिशत था। उच्चतम मासिक प्रति व्यक्ति व्यय वर्ग में व्यक्तियों का समानुपात (अर्थात् वे जिन्होंने 560 रु. प्रति मास से भी अधिक व्यय किए) अनु.जनजाति तथा अनु.जाति (2 प्रतिशत) की तुलना में अन्य श्रेणी के व्यक्तियों में उच्चतर (6 प्रतिशत) था। शहरी भारत में भी छः निम्नतर मासिक प्रति व्यक्ति वर्गों (अर्थात् 160 रु. कम, 160-190 रु., 190-230 रु., 230-265 रु., 265-310 रु. और 310-355 रु.) अनु.जनजाति और अनु.जाति में अन्य श्रेणी के व्यक्तियों की तुलना में उच्चतर थी। किन्तु ग्रामीण क्षेत्रों के निष्कर्ष इसके विपरीत है, शहरी भारत में, इन निम्नतर मासिक प्रति व्यक्ति व्यय वर्गों में व्यक्तियों का समानुपात अनु.जनजाति की तुलना में अनु.जाति में उच्चतर थी। विवरणी 2.6 यू से यह नोट किया जा सकता है कि 1993-94 के दौरान शहरी भारत में अनु.जनजाति हेतु प्रतिशत तथा अन्य हेतु 4 प्रतिशत की तुलना में अनु.जाति के व्यक्तियों ने लगभग 9 प्रतिशत 160 रु. से कम खर्च किया। 1055 रु. प्रति मास से अधिक व्यय करने वाले व्यक्तियों का समानुपात अन्य हेतु 5 प्रतिशत तथा अनु.जनजाति तथा अनु.जाति प्रत्येक केवल लगभग 2 प्रतिशत था।

4.3.7 बिना किसी साक्षर व्यस्क सदस्य/साक्षर महिला सदस्य के परिवारों का समानुपात:

एक परिवार के सदस्यों के कार्यकलाप का पैटर्न उनकी साक्षरता के स्तर से संबद्ध रखता है। उन परिवारों का समानुपात जिनमें कोई भी साक्षर व्यस्क सदस्य/महिला सदस्य नहीं है, कि संख्या ग्रामीण और शहरी भारत दोनों में "अन्य" श्रेणी की तुलना में निर्धारित श्रेणियों से संबंधित परिवारों में

काफी उच्चतर थी। ऐसे परिवारों की दो निर्धारित श्रेणियों के मध्य समानुपात ग्रामीण भारत में अनु.जनजातियों में तथा शहरी भारत में अनु.जाति में उच्चतर थी। ऐसे परिवारों के निर्धारित श्रेणियों के मध्य समानुपात ग्रामीण भारत में अनु.जनजाति में तथा शहरी भारत में अनु.जाति में उच्चतर था।

विभिन्न सामाजिक समूहों हेतु सामान्य शिक्षा के अनुसार 15 वर्ष और इससे अधिक आयु के व्यक्तियों का प्रति हजार वितरण

भारत		रा.प्र.सर्वे. 50वां दौर						
सामान्य शिक्षा के स्तर के अनुसार (15+) के व्यक्तियों का प्रति हजार वितरण

4.3.8 सामान्य शिक्षा के अनुसार (15 वर्ष और इससे अधिक आयु) के व्यक्तियों का प्रति हजार वितरण

एक व्यक्ति द्वारा प्राप्त शिक्षा का स्तर भविष्य में उनके रोजगार से पूरी तरह संबद्ध है। समस्त भारत हेतु परिणामों को विवरणी 3 में संक्षिप्त में दिया गया है। इस विवरणी से यह देखा जा सकता है कि 15 वर्ष और इससे अधिक आयु के व्यक्तियों में साक्षरता का समानुपात देश के ग्रामीण/शहरी क्षेत्रों में पुरुष और महिलाओं हेतु गैर-अनुसूचित श्रेणी के व्यक्तियों की तुलना में अनु.जनजाति तथा अनु.जाति में काफी उच्चतर था। दो निर्धारित श्रेणियों के मध्य निरक्षरों का समानुपात ग्रामीण क्षेत्रों में पुरुष और महिलाओं दोनों का अनु.जाति की तुलना में अनु.जनजाति में अधिक था। किन्तु शहरी भारत में निरक्षरों का समानुपात पुरुष और महिला दोनों का अनु.जाति और अनु.जनजाति में उच्चतर थे। स्नातक और इससे अधिक शैक्षिक स्तर के व्यक्तियों का समानुपात ग्रामीण और शहरी भारत के पुरुष और महिला दोनों हेतु निर्धारित श्रेणियों के व्यक्तियों से अन्य श्रेणियों में उच्चतर थी। स्नातक और इससे अधिक शैक्षिक स्तर के दो अनुसूचित श्रेणियों के मध्य व्यक्तियों का समानुपात ग्रामीण पुरुषों को छोड़कर जहाँ कथित समानुपात अनु.जनजाति की तुलना में अनु.जाति में उच्चतर था, शेष में अनुसूचित जनजाति में उच्चतर था।

4.3.9 5-14 वर्ष के आयु समूह के बच्चों के बीच स्कूल उपस्थिति की दर:

अध्ययन के अंतर्गत लोगों के किसी विशेष समूह की प्रगति के स्तर के मूल्यांकन हेतु एक महत्वपूर्ण सूचक बच्चों में स्कूल उपस्थिति समाजिक दर मानी गई है। विवरणी 4 रा.प्र.सर्वे. 38 वां (1983), 43 वां (1987-88) और 50 वां (1993-94) दौरों के अनुसार भारत के विभिन्न सामाजिक समूहों हेतु 5-14 वर्ष की आयु समूह में बच्चों में स्कूल उपस्थिति की दर विवरणी 4 में दी गई है। ऐसा देखा गया है कि अनुसूचित श्रेणी से संबंधित परिवारों की तुलना में "अन्य" श्रेणी के (5-14) वर्ष के बच्चों में स्कूल जाने

की दर काफी उच्चतर थी। यह ग्रामीण/शहरी क्षेत्रों के पुरुष और महिलाओं दोनों हेतु सच है। परिवारों की दो अनुसूचित श्रेणियों के मध्य स्कूल जाने वाले लड़के (पुरुष) और लड़कियां (महिलाओं) दोनों की दर ग्रामीण भारत में अनु.जनजाति की तुलना में अनु.जाति से संबंधित परिवारों में उच्चतर थी। तथापि, शहरी भारत में स्कूल जाने वाले बच्चों की दर अनु.जाति से संबंधित परिवारों की तुलना अनु.जनजाति के परिवारों में कुछ अधिक है। आगे यह भी पाया गया है कि 1983-84 की अवधि के दौरान स्कूल जाने वालों की दर में धीरे धीरे वृद्धि हुई है। वृद्धि की दर 1983-88 अवधि की तुलना में 1988-94 की अवधि के दौरान काफी उच्चतर पाई गई तथा निम्नतर स्कूल उपस्थिति अनुपात वाले समूहों में तीव्रतर था।

4.4 रोजगार प्राप्त (कार्य बल)

4.4.1 सामान्य

रा.प्र.सर्वे.सं. ने अपने पंचवार्षिक रोजगार-बेरोजगारी सर्वेक्षण के जरिए संगृहीत आंकड़ों से "रोजगार प्राप्त" (कार्य बल) के तीन निम्न भिन्न अनुमान तैयार किए गए हैं। वे हैं

- I. कार्यरत व्यक्तियों की वास्तविक संख्या (अर्थात् वे जिन्होंने सर्वेक्षण की तारीख से प्रारंभ करके 365 दिनों की संदर्भावधि के दौरान औरों की अपेक्षाकृत लम्बी अवधि के लिए कार्य किया था)।
- II. कार्यरत व्यक्तियों की औसत संख्या (अर्थात् वे जिन्होंने सर्वेक्षण की तारीख के बाद 7 दिन की एक संदर्भावधि के दौरान किसी भी समय कार्य किया था) तथा
- III. सप्ताह के दौरान कार्य के व्यक्ति दिवसों का औसत समानुपात (अर्थात् सर्वेक्षण की तारीख के बाद 7 दिवसों की संदर्भावधि के दौरान जिन्होंने एक सप्ताह में व्यक्ति दिवसों में किसी भी समय कार्य किया हो, को 7 से भाग करके निकाला गया था।

व्यक्तियों की संख्या/प्रति हजार व्यक्तियों पर कार्यरत व्यक्ति दिवस को कार्य बल भागीदारी दर या कामगार संख्या अनुपात के कार्य के रूप में उल्लेख किया गया है।

विवरणी - 4

विभिन्न सामाजिक समूहों हेतु 5-14 वर्ष के बच्चों की दर
(अर्थात् इस आयु समूह में प्रति 1000 बच्चों पर स्कूल जाने वाले बच्चों की संख्या)

भारत

सामाजिक (5-14 वर्ष) के बच्चों में स्कूल जाने वाले बच्चों की दर

@ वर्तमान नामांकन दरों के तदनुरूपी आंकड़े।

* अनुमान प्राप्त करने हेतु महाराष्ट्र के नव-बौद्धों को अनुसूचित जाति के अंतर्गत विचार नहीं किया गया है।

4.4.2 50वां दौर सर्वेक्षण में, सामाजिक समूह के अनुसार कार्य बल भागीदारी दर के अनुमान सभी तीनों अभिगमो (I), (II) और (III) के संबंध में तैयार किए गए हैं। उपरोक्त को इसमें तदन्तर क्रमशः सामान्य स्तर, चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर अभिगमों के रूप में उल्लेख किया है। सामान्य स्तर अभिगत में सामान्यतया रोजगार प्राप्त के अनुमान दो श्रेणियों - प्रमुख स्तर में सामान्यतया कार्यरत तथा गौण स्तर में सामान्यतया कार्यरत में रखा गया है। वे श्रेणियाँ एक साथ सामान्यतया कुल कार्यरत व्यक्तियों (सभी कामगारों) को गठित करती हैं।

4.4.3 संख्या के वर्गीकरण हेतु अपनाई गई सामान्य स्तर पद्धति में मौसमी परिवर्तन से कार्यकलाप पैटर्न में हुए परिवर्तन को ध्यान में नहीं रखा गया है। चालू साप्ताहिक स्तर/चालू दैनिक स्तर पद्धति के अनुसार कार्य बल भागीदारी दर के अनुमान रोजगार के औसत साप्ताहिक/चालू साप्ताहिक स्तर/चालू दैनिक स्तर प्रणाली के अनुसार कार्य बल भागीदार दर की दो दरों में अंतर उन लोगों के जिन्हें सप्ताह के दौरान कुछ रोजगार प्राप्त हुआ था, के अल्प रोजगार की सीमा के बारे में एक झलक दर्शाता है।

4.4.4 सामान्य स्तर/चालू साप्ताहिक स्तर/चालू

दैनिक स्तर प्रणाली के अनुसार रोजगार के अनुमान: सामान्य स्तर/चालू साप्ताहिक स्तर/चालू दैनिक स्तर प्रणाली के अनुसार विभिन्न क्षेत्रों तथा सामाजिक समूहों में कार्य बल भागीदारी दर में असमानताओं का पुरुष और महिलाओं हेतु पृथक-पृथक अध्ययन किया गया।

4.4.5 सामान्य स्तर प्रणाली के अनुसार प्रमुख स्तर में कार्यरत व्यक्तियों का समानुपात ग्रामीण भारत में पुरुष और महिलाओं दोनों हेतु "अनु.जाति" और तथा "अन्य" की तुलना में अनु.जनजाति में उच्चतर था। ग्रामीण पुरुषों में यह समानुपात अनु.जनजाति हेतु 58 प्रतिशत, अनु.जाति हेतु 54 प्रतिशत तथा अन्य श्रेणी के व्यक्तियों हेतु 53 प्रतिशत था। ग्रामीण महिलाओं हेतु तदनुरूपी समानुपात अनु.जनजाति हेतु 37 प्रतिशत, अनु.जाति हेतु 25 प्रतिशत तथा "अन्य" हेतु 21 प्रतिशत था। शहरी भारत में सामान्य स्तर प्रणाली के अनुसार प्रमुख स्तर में कार्यरत व्यक्तियों का समानुपात उसी क्रम में तीन सामाजिक समूहों प्रत्येक के संबंध में पुरुषों हेतु (50 से 52 प्रतिशत) था जबकि शहरी महिलाओं में यह देखा गया है कि अनु.जाति (16 प्रतिशत) तथा "अन्य" (11 प्रतिशत) की तुलना में यह समानुपात अनु.जनजाति में (18 प्रतिशत) उच्चतर था।

4.4.6 वे सामान्य स्तर अभिगमों (अर्थात् प्रमुख स्तर कामगारों तथा सभी कामगारों पर आधारित कार्यरत) पर आधारित कार्य बल भागीदारी दर की एक तुलना से पता चलता है कि ग्रामीण और शहरी भारत दोनों हेतु तीन सामाजिक समूहों के प्रत्येक समूह में गौण स्तर कामगारों का समानुपात महिलाओं में काफी उच्चतर था।

4.4.7 रोजगार स्तर में परिवर्तन :

यदि पिछले कुछ वर्षों के दौरान विभिन्न सामाजिक समूहों हेतु रोजगार के स्तर में कोई परिवर्तन हुआ हो तो यह देखना लाभप्रद है। इसके अध्ययन हेतु रा.प्र.सर्वे. 38वें दौर, 43वें दौर और 50 वें दौर के अनुसार सामान्यतया कार्यरत के समानुपात पर चर्चा नीचे दी गई है। विवरणी 6 भारत के तीन सामाजिक समूहों के प्रत्येक समूह हेतु इन तीन दौरों पर आधारित सभी कामगारों का समानुपात दर्शाता है। उपर्युक्त विवरणी से यह देखा जा सकता है कि ग्रामीण भारत की अनु.जाति की महिलाओं को छोड़कर विभिन्न सामाजिक समूहों के पुरुष तथा महिलाओं दोनों वर्ष 1993-94 हेतु सामान्य स्तर के अनुसार सभी कामगारों का समानुपात लगभग वैसा ही रहा जैसा वर्ष 1983 के दौरान था।

4.5 बेरोजगार

4.5.1 सामान्य

जैसा कि रोजगार प्राप्त के मामले में है बेरोजगार हेतु भी तीन प्रकार के अनुमान निम्नलिखित तीन विभिन्न अभिगमों से प्राप्त किए जाते हैं। वे इस प्रकार हैं :

- (I) "सामान्य स्तर" अभिगम पर आधारित सामान्यतया बेरोजगार व्यक्तियों की संख्या।
- (II) "साप्ताहिक स्तर" अभिगम पर आधारित सप्ताह में एक औसत बेरोजगार व्यक्तियों की संख्या तथा
- (III) सर्वेक्षण की तारीख के बाद 7 दिनों की संदर्भावधि के दौरान बेरोजगारों के व्यक्ति दिवसों की औसत संख्या

विवरणी - 5

तथा अनु.जनजाति की शहरी भारत की महिलाएँ जिनमें समानुपात की थोड़ी सी कमी देखी गई थी। अतः हम सभी संदर्भाविधि के दौरान गौण क्षमता में कार्यरत को छोड़कर बेरोजगारों का एक और अनुमान प्राप्त कर सकते हैं। प्रमुख स्तर के अनुसार पूर्ववर्ती को सामान्यतया बेरोजगार तथा बाद वाले को पहला अनुमान 365 दिनों की संदर्भाविधि के दौरान उपेक्षाकृत लंबी अवधि हेतु बेरोजगार व्यक्तियों का धोतक है तथा लगभग दीर्घकालिक बेरोजगारी का सूचक है। इस मापदण्ड के आधार पर कुछ बेरोजगार गौण क्षमता में कार्य कर रहे हो सकते हैं। गौण स्तर कामगारों को (सामान्य स्तर समायोजित) को छोड़कर बेरोजगार कहे, स्वीकार्य रूप से बाद वाले अनुमान पूर्ववर्ती की तुलना में निम्नतर होंगे। साप्ताहिक स्तर पर आधारित अनुमान

श्रमिक बाजार में मौसमी परिवर्तन के कारण सामान्यतया कार्यरत के रूप में श्रेणीबद्ध उन आंतरायिक बेरोजगारों को शामिल करके सर्वेक्षण वर्ष के दौरान औसत साप्ताहिक चित्र दर्शाता है। दैनिक स्तर संकल्पना पर आधारित तृतीय अनुमान पर आधारित सर्वेक्षण वर्ष के दौरान एक दिवस संबंधी बेरोजगार का औसत स्तर दर्शाता है। चालू साप्ताहिक स्तर की प्राथमिकता कसौटी के अनुसार कार्यरत के रूप वर्गीकृत उन दिनों को बेरोजगार तथा संदर्भ सप्ताह के दौरान आंतरायिक बेरोजगारों को भी जो सामान्यतः रोजगार में हैं, की बेरोजगारी, दीर्घकालिक बेरोजगारी के दिवसों की बेरोजगारी लेकर यह "बेरोजगारी" का एक अत्याधिक जोड़ने वाली दर है।

4.5.2 समस्त भारत स्तर पर बेरोजगारों के अनुमान

तीन सामाजिक समूहों के प्रत्येक समूह हेतु विभिन्न अभिगमों के अनुसार प्राथमिक यूनिटों के अनुमान संक्षिप्त रूप से नीचे विवरणी 7 में दी गई है। यह देखा गया है कि चालू साप्ताहिक स्तर के अनुसार अनु.जनजाति की महिलाओं तथा चालू दैनिक स्तर प्रणाली के अनुसार केवल अनु.जाति महिलाओं को छोड़कर विभिन्न सामाजिक समूहों के पुरुष तथा महिलाओं दोनों हेतु वर्ष 1993-94 के दौरान बेरोजगारी का समानुपात ग्रामीण क्षेत्रों की तुलना में शहरी क्षेत्रों में उच्चतर था। ग्रामीण भारत में, दीर्घकालीन बेरोजगारी का समानुपात पुरुष और महिला दोनों हेतु "अन्य" श्रेणी में उच्चतम था। ग्रामीण परिवारों की दो अनुसूचित श्रेणियों के मध्य पुरुषों में दीर्घकालिक बेरोजगारी समानुपात अनु.जनजाति की तुलना में अनु.जाति में उच्चतम पाई गई थी। तथापि, ग्रामीण महिलाओं हेतु दीर्घकालिक बेरोजगारी के समानुपात में दो अनुसूचित श्रेणियों के मध्य कोई विशिष्ट अंतर नहीं पाया गया था। ग्रामीण क्षेत्रों के विपरित देश के शहरी पुरुषों में दीर्घकालिक बेरोजगारी का समानुपात गैर-अनुसूचित श्रेणियों की तुलना में अनुसूचित श्रेणियों में उच्चतर था। शहरी पुरुषों में दीर्घकालिक बेरोजगारी का कथित समानुपात अनु.जनजाति हेतु (2.9 प्रतिशत) उच्चतम इसके बाद अनु.जाति हेतु 2.6 प्रतिशत तथा "अन्य" श्रेणी के व्यक्तियों हेतु 2.4 प्रतिशत था। शहरी महिलाओं हेतु दीर्घकालिक बेरोजगार का समानुपात अनु.जाति/अन्य श्रेणी से संबंधित व्यक्तियों की तुलना में (1.0-1.1 प्रतिशत), अनु.जनजाति हेतु कम (0.4 प्रतिशत) था।

4.5.3 1983-94 की अवधि में बेरोजगारों के समानुपात में परिवर्तन

पिछले कुछ वर्षों के दौरान बेरोजगारी के समानुपात में क्या कोई परिवर्तन हुआ, के बारे में मूल्यांकन करने हेतु विभिन्न सामाजिक समूहों हेतु तीन रा.प्र.सर्वे. दौरों अर्थात् 38वां (1983), 43वां. (1987-88) तथा 50वां (1993-94) पर आधारित सामान्य स्तर

अभिगम के अनुसार बेरोजगारों का समानुपात विवरणी 8 में प्रस्तुत है। चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर अभिगम के अनुसार तदनुरूपी समानुपात विवरणी 9 में प्रस्तुत है। तीन बृहद समूहों "रोजगार प्राप्त", "बेरोजगार" तथा "श्रम बल से बाहर" के अंतर्गत वर्गीकृत व्यक्तियों में 50वें दौर में शामिल कार्य प्रणाली परिवर्तन कथित प्रथम यूनिट के अनुमानों की तुलनीयता पर शायद विपरित प्रभाव न डाले। 1983 से 1988 की अवधि के दौरान शहरी भारत के अनु.जनजाति के पुरुषों को छोड़कर जिनका कथित अवधि के दौरान समानुपात में स्पष्ट तौर पर हास हुआ है। देश के विभिन्न सामाजिक समूहों के ग्रामीण और शहरी पुरुष/ महिला दोनों में सामान्यतया बेरोजगारी का समानुपात में वृद्धि पाई गई है। 1988-94 के अवधि के दौरान ग्रामीण शहरों भारत में सामान्यतया बेरोजगारी का समानुपात (I) प्रमुख स्तर के अनुसार शहरी अनु.जनजाति के पुरुषों तथा (II) ग्रामीण अनु.जनजाति पुरुषों/शहरी अनु.जनजाति पुरुषों/शहरी अनु.जाति महिलाओं सामान्य स्तर (समायोजित) के अनुसार शहरी अन्य महिलाओं जिनकी बेरोजगारी के समानुपात में अवधि के दौरान वृद्धि नोटिस में आई, को छोड़कर विभिन्न सामाजिक समूहों के संबंध में पुरुष और महिलाओं दोनों हेतु एक तीव्र हास दर्शाया है, जहां तक चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर अभिगमों के अनुसार अनुमानों का संबंध है, चूंकि सामाजिक समूह स्तर के दो समय अवधियों 1983-88 हेतु समग्र रूप से और पृथकतः नहीं, 1983-94 की अवधि के दौरान बेरोजगारों के समानुपात में परिवर्तन संबंधी टिप्पणी केवल संभव है। विवरणी 9 से यह देखा जा सकता है कि चालू साप्ताहिक स्तर प्रणाली के अनुसार शहरी अनु.जाति महिलाओं तथा चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर दोनों अभिगमों के अनुसार "अन्य" शहरी महिलाओं को छोड़कर सभी श्रेणियों हेतु 1983-94 की अवधि के दौरान चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर अभिगम दोनों के लिए बेरोजगारों के समानुपात में हास हुआ है।

कोष्ठक में दिए गए आंकड़े तदनुरूपी बेरोजगारी दरें (अर्थात् श्रम बल में प्रति 1000 पर बेरोजगारों की संख्या) दर्शाती हैं।

चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर हेतु सामाजिक समूह के अनुसार सारणियाँ 43वें दौर हेतु जारी नहीं किए गए थे।

4.6 श्रम बल

4.6.1 सामान्य

श्रम बल या अन्य शब्दों में "आर्थिक रूपी कार्य" उत्पादन हेतु श्रमिक सप्लाई करने जो सप्लाई करता है या मांगता है, को संख्या के रूप में माना जाता है इसमें "रोजगार" तथा "बेरोजगारी" दोनों शामिल हैं। श्रम बल सहभागिता को जानने हेतु संख्या के वर्गीकरण हेतु सभी तीनों श्रेणियाँ अपनाई गई अर्थात् सामान्य स्तर, चालू साप्ताहिक स्तर तथा चालू दैनिक स्तर प्रयुक्त की गई। चालू दैनिक स्तर केवल श्रम बल तथा व्यक्ति दिवस दर्शाता है। इसके अलावा, सामान्य स्तर के संदर्भ में जांचे गए श्रम बल में व्यक्ति जो वर्ष कि अपेक्षाकृत बृहद भाग में या तो कार्य कर रहे थे या काम की तलाश कर रहे थे तथा वे भी शेष में कम से कम कुछ समय कार्य किया था, इसमें शामिल थे। अतः सामान्य स्तर के आधार पर दो अनुमान प्राप्त हुए एक केवल प्रमुख स्तर तथा

दूसरा प्रमुख स्तर के साथ-साथ गौण स्तर दोनों पर आधारित विचार किया गया था। श्रम बल सहभागिता दरों अर्थात् श्रम बल प्रति 1000 पर व्यक्तियों की संख्या देखने हेतु सामाजिक समूह के अनुसार विभिन्न अभिगमों के अनुसार समस्त भारत हेतु एलएफपीआर के अनुमान को तथापि नीचे विवरणी 10 में संक्षिप्त रूप में दिया गया है। यह नोट किया जा सकता है कि ग्रामीण भारत में आर्थिक रूप से सशक्त व्यक्तियों का समानुपात अनु.जनजाति में उच्चतम था तथा इसके बाद अनु.जाति में था। यह पुरुष और महिलाओं दोनों के लिए सच है। देश में शहरी पुरुषों हेतु आर्थिक रूप से सशक्त व्यक्तियों का समानुपात अनु.जनजाति तथा अन्य जनजाति (52-53) प्रतिशत) की तुलना में कुछ उच्चतर (53-55 प्रतिशत) था। शहरी महिलाओं हेतु उपर्युक्त समानुपात जैसा कि ग्रामीण भारत हेतु पाया जाता है। अनु.जनजाति में उच्चतम तथा इसके बाद अनु.जाति में पाया जाता है।

विवरणी - 10

विभिन्न सामाजिक समूहों हेतु वर्ष 1993-94 के दौरान
श्रम बाल में प्रति 1000 व्यक्तियों पर, व्यक्तियों की संख्या

IV EMPLOYMENT AND UNEMPLOYMENT									
First quinquennial Survey									
1.1	Employment-Unemployed situation at glance	27	Oct. 72-Sep. 73	I	2	Oct. 1977	2	N	81 to 102
1.2	All India and State-wise results	27	Oct.72 - Sep. 73	III	3	Jan. 1980	11	N SR	75 to 85 S-7 to S-104
Second quinquennial survey									
2.1	Some key results	32	July 77- Jun. 78	II	2	Oct. 1978	6	N	35 to 55
2.2	Preliminary results for persons aged 15 to 59	32	July.77-June 78	II	4	April 1979	8	N SR	149 to 158 S-507 to S-606
2.3	Activity situation pertaining to Women usually engaged in domestic duties	32	July 77-June 78	IV	3 & 4	Jan. -Apr. 81	14	N SR	1 to 71 S-1 to S-249

1	2	3	4	5	6	7	8	9	10
2.4	Final results All India	32	July 77- June 78	V	1 & 2	Jul.-Oct. 81	15	N SR	1 to 49 S-1 to S-190
2.5	Selected important results for 8 States: A.P., Maharashtra, Bihar, Gujarat, Haryana, Punjab, Tamil Nadu & West Bengal	32	July. 77-June 78	VI	1 & 2	Jul.-Oct. 82	17	N SR	18 to 23 S-1 to S-192
2.6	Selected important results for 4 States : Kerala, M.P., Rajasthan & U.P.	32	July 77- June 78	VI	3 & 4	Jan.-Apr. 83	18	SR	S-89 to S-198
2.7	Selected important results for 5 States/Uts : Assam, Delhi, H.P. Karnataka & J & K.	32	July 77-June 78	VII	3	Jan. 1984	20	SR	S-79 to S-188
2.8	Selected important results for 9 States/Uts : Arunachal Pradesh, Goa, Daman & Diu, Manipur, Meghalaya, Orissa, Pondicherry, Tripura, Chandigarh and Nagaland.	32	July 77-June 78	VII	4	April 1984	21	N SR	7 to 11 S-1 to S-160
2.8	Employment/Unemployment situation in cities and towns during late seventies.	32	July 77-June 78	X	2	Oct. 1986	29	N SR	33 to 50 S-1 to S-115
Third quinquennial survey									
3.1	Preliminary results based on first two sub-rounds data	38	Jan.-Dec. 1983	IX	4	April 1986	27	N SR	S-103 to S-134 S-125 to S-213
3.2	Employment and unemployment (All India)	38	Jan.-Dec. 1983	XI	4	April 1988	35	N SR	1 to 73 S-1 to S-222
3.3	Additional 10 tables on employment & unemployment.	38	Jan.-Dec. 1983	XII	3	Jan.-Mar. 1989	38	SR	S-189 to S-245
3.4	Employment-Unemployment situation of Scheduled tribe and Scheduled caste population during early eighties.	38	Jan.-Dec. 1983	XIII	1	July-Sept. 1989	40	N SR	1 to 45 S-1 to S-144
3.5	Employment & Unemployment (9 State results)	38	Jan.-Dec. 1983	XIV	1	Jul-Sept. 90	44	N SR	5 to 9 S-1 to S-306
3.6	Employment & Unemployment (8 State results)	38	Jan.-Dec. 1983	XIV	2	Oct.-Dec. 90	45	N SR	1 to 6 S-1 to S-263

1	2	3	4	5	6	7	8	9	10
Fourth quinquennial survey									
4.1	Results of fourth quinquennial survey on employment and unemployment (All India)	43	July-87-June 88	Special No.		Sep. 1990		N SR	1 to 148 S-1 to S-424
4.2	Employment and Un-employment situation of scheduled tribe and scheduled caste population during late eighties.	43	July 87-Jun. 88	XV	2	Oct.-Dec. 91	49	N SR	1 to 102 S-1 to S-80
4.3	Results of fourth quinquennial survey on unemployment (18 states in 18 booklets)	43	Jul.-87-June 88	Special issue		January 1992	-	-	-
4.4	Results of fourth quinquennial survey on unemployment & un-employment for 9 major States.	43	July 87-Jun 88	XVI	2	Oct.-Dec. 92	53	N SR	1 to 11 1 to 486
4.5	Do remaining 9 States	"	"	"	3	Jan.-Mar. 93	54	N SR	1 to 11 1 to 486
4.6	A note on employment & unemployment situation in cities & towns during late eighties.	43	July 87-June 88	XVII	2	Oct.-Dec. 93	57	N SR	1 to 18 S-3 to S-63
Fifth Quinquennial Surveys									
5.1	Employment & un-employment in India 1993-94	50	1993-94	XX	1	Jul-Sept. 96	68	N SR	1 to 150 S-1 to S-423
5.2	Participation of Indian Women in household work and other specified activities, 1993-94	50	1993-94	XXI	2	Oct.-Dec. 97	73	N SR	65 to 89 S-266 to S-284
5.3	Economic activities and school attendance by children in India, 1993-94	50	1993-94	XXI	2	Oct.-Dec. 97	73	N SR	90 to 104 S-285 to S-345
V FAMILY PLANNING									
1.1	State results	28	Oct. 73-June 74	I	3	Jan. 1978	3	N SR	140 to 148 151-157 S-235 to S-398
1.2	All India results	28	Oct. 73-June 74	II	1	July 1978	5	SR	S-153 to S-163
1.3	Utilisation of Family Planning services	42	Jul.86- Jun. 87	XVI	1	Jul.-Sept.92	52	N SR	1 to 25 S-3 to S-49

1	2	3	4	5	6	7	8	9	10
1.4.1	States : A.P., Assam, Bihar, Karnataka, M.P., Maharashtra, Manipur, Orissa, Tripura and West Bengal (10 States)	31	July 76-June 77	VII	2	Oct. 1984	23	N SR	10 to 14 S-1 to S-104
1.4.2	States : Gujarat, Haryana, H.P., J & K, Kerala, Punjab, Rajasthan, Tamil Nadu, U.P., Delhi, Goa & Pondicherry (12 States).	31	July 76- June 77	IX	1 & 2	Jul.-Oct. 85	25	N SR	1 to 2 S-1 to S-136
1.4.3	Results on irrigated household holding States and All India	31	July 76- June 77	IX	1 & 2	Jul.-Oct. 85	25	N SR	3 to 4 S-137 to S-152
VIII LANDHOLDING									
1.1	Survey result on land holding	26	July 71-Sep. 72	V	3 to 4	Jan.-Apr. 82	16	N SR	1 to 7 S-1 to S-293
1.2	Some aspects of household ownership holdings.	37	Jan.-Dec. 82	XI	2	Oct. 87	33	N SR	1 to 18 S-1 to S-175
1.3	Some aspects of household operational holdings.	37	Jan.-Dec. 82	XII	1	July 88	36	N SR	24 to 52 S-1 to S-191
1.4	Results on same Arpots of Household ownership holdings.	48	Jan.-Dec. 92	XIX	2	Oct.-Dec. 95	65	N [*] SR	43 to 77 S-1 to S-308
1.5	Operational land holdings in India, 1991-92: Salient features	48	1991-92	XX	3	Jun.-Mar. 97	70	N SR	1 to 44 65 to 229
1.6	Seasonal Variation in the operation of land holdings in India, 1991-92	48	1991-92	XX	3	Jan.-Mar. 97	70	N SR	45 to 64 231 to 436
1.7	Live-stock and Agricultural implements in Household operational holdings, 1991-92	48	1991-92	XXII	1	Jul.-Sep. 98	76	N SR	1 to 33 37 to 207
IX LIVESTOCK NUMBER AND PRODUCTS									
1.1	Number and Products	30	Jul.75-June 76	II	2	Oct. 78	6	N SR	69 to 79 93 to 105 S-235 to S-284
1.2	Pack animals	30	Jul. 75-Jun. 76	II	4	Apr. 79	8	N SR	140 to 148 S-459 to S-505
1.3	Household dairy enterprises	30	Jul.75-Jun.76	III	4	Apr. 80	12	N SR	145 to 153 S-259 to S-279

1	2	3	4	5	6	7	8	9	10
1.4	Number of boviness and yield of milk	30	Jul.75- Jun. 76	VIII	1	Apr. 84	22	N SR	1 to 18 S-1 to S-117
1.5	Estimates of birth, death and calling interval of bovies	30	Jul.75-Jun. 76	VIII	1	Jul. 84	22	SR	S-119 to S-173
1.6	Characteristics of household poultry enterprises	30	Jul.75-Jun.76	IX	3	Jan. 86	26	N SR	10 to 16 S-1 to S-49
1.7	Estimates of livestock and agricultural all implements classified by household operational holding	37	Jan.-Dec.82	XIII	3	Jan.-Mar. 90	42	N SR	44 to 63 S-115 to S-266
X MIGRATION									
1.1.	In-migration and out-migration rates	28	Oct. 73-Sep. 74	I	1	Jul. 77	1	N SR	33 to 41
1.2	Internal migration (All India)	38	Jan.-Dec. 83	XIII	3	Jan.-Mar.90	42	N SR	1 to 43 S-2 to S-114
1.3	Internal migration (All India)	43	Jul.87-Jun. 88	XV	4	Apr.-Jun. 92	51	N SR	1 to 49 S-1 to S-129
XI MORBIDITY									
1.1.	Notes and survey results	28	Oct. 73-June 74	IV	1 & 2	Jul.-Oct 1980	13	N SR	17 to 21 S-137 to S-180
1.2	Morbidity and utilisation of medical services	42	Jul. 86-June 87	XV	4	Apr.-June 1982	51	N SR	50 to 75 S-133 to S-157
XII NUTRITION									
1.1	Per capita per diem intake of nutrients	27	Oct.72-Sep. 73	VI	3 & 4	Jan.-Apr. 83	18	N SR	1 to 10 S-1 to S-88
1.2	Per capita and per consumer unit per diem intake of calorie protein and fat and perceptions of the people on adequacy of food	38	Jan.-Dec. 83	XIII	2	Oct.-Dec. 90	41	N SR	27 to 37 S-177 to S-258
XIII POWER AND ELECTRICITY									
1.1	Use of power for industrial/commercial purpose	31	July 76-June 77	III	4	April 1980	12	N SR	183 to 186 S-313 to S-382
1.2	Use of power (electricity/diesel)	31	July 76-June 77	IV	1 & 2	July-Oct. 80	13	N SR	22 to 276 S-3 to S-24
1.3	Use of electricity for domestic purposes.	31	July 76-June 77	IV	1 & 2	Jul.-Oct. 80	13	N SR	26 to 27 S-25 to S-136

1	2	3	4	5	6	7	8	9	10
1.4	General information on electrification in rural areas.	31	July-June 77	VII	3	Jan. 84	20	N SR	1 to 4 S-1 to S-78
XIV RURAL LABOUR									
1.1	Indebtedness of rural labour households	32	July 77-June 78	VIII	3 & 4	Jan.-Apr. 85	24	N SR	1 to 32 S-1 to S-129
1.2	Wages and earnings of rural labour household	32	Jul. 77-Jun. 78	X	4	Apr. 87	31	N SR	20 to 27 S-1 to S-109
XV NON-AGRICULTURAL ENTERPRISES									
1.11	Survey on self employed	29	Jul. 74-June 75	I	1	Jul. 1977	1	N	42 to 46
1.12	All India results on general characteristics.	29	Jul. 74-Jun. 75	II	3	Jan. 1979	7	SR	S-437 to S-456
1.13	Non-directory establishments and own account enterprises in mechanised passenger and goods transport activity	34	Jul. 79-Jun. 80	XI	3	Jan. 1988	34	N SR	86 to 92 S-3 to S-39
1.14	Non-directory establishment and own account enterprises in mechanised passenger and goods transport activity.	34	Jul. 79-Jun. 80	XI	3	Jan. 1988	34	N SR	98 to 104 S-57 to S-86

ARTICLES PUBLISHED IN SARVEKSHANA

Sl.	Name of article and author (s)	Issue No.	Vol.	No.	Month and year	Page No.
1	2	3	4	5	6	7
I	BACKWARD REGIONS AND WEAKER SECTIONS					
1.1	Weaker section of rural population-Some results of 25th round of National Sample Survey, S.K. Sinha	2	I	2	Oct. 1977	53 to 64
1.2	A Note on identification of economically backward regions in rural India- G.A. Kulkarni, B.S. Gill and S.K. Pillai	17	VI	1 & 2	Jul.-Oct. 1982	7 to 17
II	CONSUMER EXPENDITURE					
2.1	A note on inter-state variation in consumption level of rural households based on NSS 28th round consumer expenditure-S.Bhattacharya, A.B. Roy Choudhary and P.D. Joshi.	2	I	2	Oct. 1977	77 to 80
2.2	Consumption of cereals and energy content of food consumption- S.Sen, Gupta and P.D. Joshi.	5	II	1	July 1978	1 to 13
2.3	Changes in consumption expenditure : All India Rural (1960-61 to 1973-74)- Sharwan Kumar	10	III	2	Oct. 1979	9 to 14
2.4	A note on estimates of minimum (normative) per capita consumption based on NSS consumer expenditure survey- K.C. Seal and A.R. Rao.	17	VI	1 & 2	Jul.-Oct. 1982	1 to 6
2.5	Results of the methodological survey on integrated short schedule on consumer expenditure-Survey Design & Research Division, NSSO	34	XI	3	Jan. 1988	18 to 85
2.6	Measurement of general cost of living for urban India : All-India and different states- B.S. Minhas, L.R. Jain, S.M.Kansal and M.R. Saluja.	36	XII	1	Jul. 1988	1 to 23
2.7	Gender effect in Indian consumption pattern- S. Subramanian & A. Deaton	47	XIV	4	Apr.-June 1991	1 to 12
2.8	Effect of Reference Period on Engel Elasticities clothing and other items, by suchismita Ghose & Nikhilesh Bhattacharya	58	XVII	3	Jan.-Mar. 1994	35 to 39
2.9	Identification of Adult Goods and demographic Separability : the case of Rural Maharashtra by Manisha Chakraborty	65	XIX	2	Oct. -Dec. 95	31 to 41

1	2	3	4	5	6	7
III DEBT AND INVESTMENT						
3.1	Distribution of assets in rural India- G.A. Kulkarni, B.S. Gill and Shambhu Dayal	23	VIII	2	Oct. 1984	1 to 9
IV EMPLOYMENT, UNEMPLOYMENT AND MIGRATION						
4.1	NSS 27th round unemployment rates-the problem of interpretation and a few controversial issue - Sudhir Bhattacharya	1	I	1	Jul. 1977	14 to 20
4.2	Some aspects of internal annual migration in India - S.R. Mukherjee and S.K. Banerjee	6	II	2	Oct. 1978	23 to 34
4.3	A note on concept of work and estimates of work force an appraisal of the treatment of activity relating to non-marketed output by Paul Jacob	27	IX	4	Apr. 1986	11 to 15
V FAMILY PLANNING AND HEALTH						
5.1	Some aspects of practice of family planning revealed in NSS 28th round survey- Netai Chandra Das	7	II	3	Jan. 1979	119 to 128
5.2	Cohort fertility by age at marriage and marriage duration - N.C. Das	10	III	2	Oct. 1979	15 to 19
5.3	Injury Morbidity and Associated Burden of Treatment in Indian by Anial Grumbar	65	XIX	2	Oct.-Dec. 95	1 to 30
VI LAND HOLDINGS						
6.1	Trend in some characteristics of land holdings an analysis for a few states (I) - S.K. Sanyal	1	I	1	Jul. 1977	1 to 13
6.2	Trends in some characteristics of land holdings- an analysis for a few states (II) S.K. Sanyal	2	I	2	Oct. 1977	65 to 76
6.3	Analysis of indicators of tenancy in India- Sharvan Kumar	13	IV	1 & 2	Jul.-Oct. 1980	1 to 16
6.4	In equality in size distribution of land ownership by Dr. P.D. Joshi	62	XVIII	3	Jan.-Mar. 1995	1 to 5
VII LIVESTOCK NUMBER AND PRODUCTS						
7.1	A study of animals in milk and their yield rate in India - G.A. Kulkarni, B.S. Gill and Shambhu Dayal	26	IX	3	Jan. 1986	1 to 9
7.2	Catch of fish form inland water resources : problems of estimation in India condition - A. N. Ganguly and Paul Jacob	5	II	1	Jul. 1978	14 to 16

1	2	3	4	5	6	7
VII NUTRITION						
8.1	Nutrition situation in India during 1971-72 Ramakrishan Rao	7	II	3	Jan. 1979	111 to 118
8.2	Estimates of undernourished population from alternative sources - G.A. Kulkarni and Ashis Kumar	21	VII	4	April 1984	1 to 6
IX POVERTY, LEVEL OF LIVING						
9.1	A note on determination of poverty line based on NSS 27th round data - S. Sengupta and P.D. Joshi	9	III	1	Jul. 1979	1 to 3
9.2	On suitability of displaced log normal distribution in graduating the size of distribution of total consumer expenditure - P.D. Joshi	9	III	1	Jul. 1979	4 to 8
9.3	Disparities in level of living across states and social group in urban India during 1973-74 by N. Bhattacharya, G.S. Chatterjee and Padmaja Paul	29	X	2	Oct. 1986	1 to 14
9.4	Computational tools for Poverty measurement and analysis by Gaurav Datt.	61	XVIII	2	Oct.-Dec. 1994	1 to 10
X POWER AND ELECTRICITY						
10.1	A study on inequality in the consumption of electricity for domestic use in rural sector - B.S. Gill, Ashis Kumar and B.K. Giri	27	IX	4	Apr. 1986	1 to 10
XI PRICES						
11.1	Regional price indices based on NSS 28th round consumer expenditure survey data - S.S. Bhattacharya, P.D. Joshi and A.B. Roy Choudhary.	12	III	4	Apr. 1980	107 to 120
11.2	Rural and urban consumer price indices by commodity groups (states and all India 1970- 71 to 1983) - I.R. Jain and B.S. Minhas.	48	XV	1	Jul. - Sep. 1991	1 to 21
11.3	Food Demand Patterns and Pricing Policy in Maharashtra by Angas Deation Kirti Parikh and S. Subramanian.	61	XVIII	2	Oct.-Dec. 1994	11 to 34
XII SOCIAL CONSUMPTION						
12.1	A note on social consumption based on state sample report relating to NSS 35th round (1980-81) - V.K. Rajagopalan and D.K. Joshi	34	XI	3	Jan. 1988	1 to 17
12.2	An article on "Who Gets How much from P.D.S." How much Effectively Does it Reach the poor - by Kirti S. Parikh.	58	XVII	3	Jan.- Mar. 1994	1 to 34

1	2	3	4	5	6	7
XIII. SURVEY/SAMPLE DESIGN, ESTIMATION PROCEDURE						
13.1	Development of sample design of the Indian National Sample Survey during its first Thirty-two rounds (1950-77) - A.K. Bhattacharya.	3	I	3	Jan. 1978	131 to 139
13.2	Estimates of standard errors of selected estimates built up from NSS 27th round survey on employment and unemployment - K. Sankaranarayanan	7	II	3	Jan. 1979	107 to 110
13.3	Survey design for an enquiry on self-employment in non-agricultural enterprises : NSS 29th round (July 1974 - June 1975) by S. Banerjee and P.K. Basak	8	II	4	Apr. 1979	135 to 139
13.4	Survey on enterprises in trade, hotel and restaurant, transport, storage and warehousing and service sectors, NSS 34th round - Saibal Banerjee	10	III	2	Oct. 1979	20 to 23
