A Note on Household Assets and Liabilities as on 30.6.91: NSS 48th Round (January- December, 1992)

Section 1

Introduction

1. Perception

1.1.1 The All-India Debt and Investment Survey(AIDIS) was carried out as part of the 48th Round of the National Sample Survey Organisation(NSSO) during January to December 1992. This was the fifth such survey conducted at the all-India level. At present, the decennially conducted AIDIS is the only nationwide enquiry providing data on household assets, indebtedness and capital expenditure.

1.2.1 *Objective:* The main objective of the AIDIS is to generate reliable estimates on assets, liabilities and capital expenditure of the household sector. The survey provides the details of household liabilities required for formulation of credit policy of financial institutions and planning for development.

1.3.1 *Plan for release of results:* The present document is the first in a series of five documents to be brought out on the AIDIS conducted in the NSS 48th round. This document gives the survey estimates on assets and liabilities(cash loans) of rural and urban households as on 30th June 1991. In general, the estimates are provided - separately for rural and urban areas - for the country as a whole, as well as for all the states and union territories.

1.3.2 The second document of the series will be brought out in two parts - one for rural areas and the other for urban areas. It will cover several aspects of household indebtedness like number of households reporting cash loans and current liabilities, average amount of current liabilities and distribution of cash loans by various characteristics, such as rate of interest, duration of loan, credit agency etc. The third document would examine different aspects of the related flow variables by tabulating the number of households reporting current borrowings and repayments, amount of borrowings and repayments etc. by different variables like type of loan, nature of interest, type of security, type of mortgage etc. The fourth document report will deal with selected aspects of household assets and liabilities for different social groups. In the fifth document, some broad features of capital expenditure, sale and loss of physical assets by the rural and urban households during the agricultural year 1991-92 are proposed to be discussed.

2. Background

2.1.1 In order to study both the demand and supply sides of credit in the household sector, the Reserve Bank of India (RBI) had conducted the "All-India Rural Credit Survey", in

1951-52. Information on assets, economic activities, particulars of credit operations and the incidence of indebtedness in the rural areas was collected in the survey to assess the demand for rural credit. Further, data on the extent and mode of operations of different credit agencies were also collected to examine the supply side of the credit.

2.1.2 The first Rural Credit Survey was followed by a similar survey in 1961-62 by the RBI. The scope of the survey was extended to include capital expenditure in the household sector and other associated indicators of the rural economy. The second survey was thus called "All-India Rural Debt and Investment Survey".

2.1.3 The responsibility of conducting the third such survey was given to the National Sample Survey Organisation (NSSO). This organisation undertook the All India Debt and Investment Survey (AIDIS), after integrating it with the Land and Livestock Holding Survey (LHS), in its 26th round survey during July 1971-September 1972. During this survey, for the first time since its inception, the scope of the Debt and Investment Survey was extended by including urban areas as well. Since then, NSSO is regularly conducting AIDIS once in ten years. The fourth decennial survey on Debt and Investment was conducted in the NSS 37th round survey during the calendar year 1982. In this survey, data for AIDIS and LHS were collected from the same set of sample households.

2.1.4 The present AIDIS was also carried out along with the LHS in the NSS 48th round (1992). Although the objectives of the survey remained the same as those of the earlier surveys, some changes were made in the sampling design to suit the requirements of the AIDIS. First, an independent sample of

households was selected exclusively for the AIDIS for the rural areas to ensure better representation of the indebted households. Secondly, in urban areas, although both the surveys viz. AIDIS and LHS, were conducted on a common set of households, the sample of households was selected with the specific aim of generating reliable estimates for the AIDIS.

3. Scope

3.1.1 *Items of enquiry:* In the present AIDIS (1992), the NSSO collected information on the assets and liabilities of the households as on 30.6.1991. The details of all financial transactions, particularly cash borrowings and repayments, made during the agricultural year 1991-92 (AY 91-92) were collected along with the liabilities of the households. Besides, the survey gathered information on the amount of capital expenditure incurred by the households during the same reference period, under different heads, like residential plots, houses and buildings, farm business and non-farm business. Data on acquisition, disposal and loss of assets during this period were also collected in this survey.

3.2.1 *Geographical coverage:* The 48th Round was planned to cover the whole of Indian Union except

- (i) Ladakh and Kargil districts of Jammu & Kashmir,
- (ii) 768 interior villages of Nagaland (out of a total of 1119 villages) located beyond 5 kms. of a bus route,
- (iii) 172 villages in Andaman & Nicobar Islands (out of a total of 520 villages) which are inaccessible throughout the year.

However, the survey could not be conducted in certain districts of Jammu & Kashmir viz. Anantnag, Pulwana, Srinagar, Badgam, Baramula and Kupwara, and the district of Amritsar in Punjab due to unfavourable field conditions.

4. Method of data collection

4.1.1 The survey used the interview method of data collection from a sample of randomly selected households. The field workers paid two visits to each sample household during the period of survey with a gap ranging between 4 to 8 months. Two separate and slightly different schedules of enquiry were used for the two visits.

4.2.1 *Survey period:* The survey period for the 48th round was the calendar year 1992. In order to reduce recall error, particulars relating to the entire agricultural year were collected by visiting each sample household twice during the survey period. The first visit to the sample households was made during a period of 8 months, January to August, while the second visit was made during a shorter period of 4 months-September to December. The longer period for the first visit was kept in view of the higher workload for the field staff for this visit compared to the second one.

4.2.2 During the first visit to a sample household, the investigator collected information on assets owned on the date of survey as well as addition and depletion of assets during the period 1st July 1991 to the date of survey. Estimates of assets possessed by the households as on 30.6.1991 are based on these data. The survey used the same procedure for assessing the indebtedness of households as on 30.6.1991. The estimates of cash dues outstanding on 30.6.91 presented in this document are based on the first-visit data on

dues outstanding on the date of survey and borrowings and repayments made between 1st July 1991 and the date of survey, both days included.

4.2.3 In addition, the schedule canvassed during first-visit provided for collection of data on the amount and other particulars of borrowings and repayments made during the first half of the AY 91-92, i.e. during 1.7.1991 to 31.12.1991. The data on capital expenditure and acquisition, disposal and loss of assets of the households during 1.7.1991 to 31.12.1991 were also collected in the first visit.

4.2.4 During the second visit to the sample households, data were collected to assess the borrowing and repayments made and loans written off during the second half of the AY 91-92, i.e., during 1.1.1992 to 30.6.1992. Similarly, data on capital expenditure and acquisition, disposal and loss of assets during 1.1.1992 to 30.6.1992 were collected in the second visit. No provision was kept for the collection of information on assets in the schedule of the second visit. Other differences between the second and first visit schedules were mostly due to the fact that information pertained to two different halves of AY 91-92 in the two visits.

5. Valuation of Physical Assets

5.1.1 The survey evaluated a physical asset acquired prior to 30th June 1991 at the current market price of such an asset in its existing condition prevailing in the locality. An asset which was disposed of during the reference period (i.e. during 1.7.1991 to the date of survey) in a manner other than by sale was also evaluated at the current market price. If an asset was disposed of through sale during the reference period, the sale price was considered as the value of the asset.

5.1.2 On the other hand, if a physical asset was acquired by way of purchase or construction during the reference period, the purchase price or the total expenditure incurred on construction was taken as its value. To evaluate an asset acquired through own-account construction, the value of labour and materials supplied from the household stock, imputed at current market price, was included in the total expenditure.

5.1.3 For evaluation of an asset 'otherwise acquired', i.e. acquired in a manner other than by purchase or construction during the reference period, the investigators used the current price of the asset in its existing condition prevailing in the locality. However, if an 'otherwise-acquired' asset was sold during the reference period, the sales proceeds was taken as its value.

6. Reference Period

6.1.1 All the estimates of assets and liabilities presented in this report are for a fixed reference date of 30.6.1991. These are based entirely on the data collected during the first visit to the sample households. As stated in para 4, the position of assets and liabilities of sample households as on 30.6.1991 was derived from the stock data on the date of survey and the data on transactions during the intervening period.

6.1.2 The estimates of number of households presented in this issue are based on data with a moving reference point, from 1.1.1992 to 31.8.1992, which spans a period of eight months. These estimates, therefore, may be taken to represent the households existing as on 30.4.1992, the mid-point of the eight-month period.

7. Sample Design

7.1.1 The sample design adopted for the survey was essentially a stratified two-stage one for

both rural and urban areas. The census villages and urban blocks were the first stage units (FSUs) for the rural and urban sectors respectively, while households were the second stage sampling units (SSUs) in both the sectors. The selection of villages was done with probability proportional to population (with replacement), based mainly on the 1981 census list of villages. The selection of urban blocks was done with equal probability without replacement based on Urban Frame Survey (UFS) conducted by the NSSO on an on-going basis. The details of the sample design and estimation procedure adopted for the survey are given in Section 2 of this note.

7.2.1 *Sample size* - first stage units: In all, 9052 villages were planned to be surveyed in this round. Of these, 4328 villages were allocated to the central sample which was the part surveyed mainly by the NSSO field staff. The remaining villages were allocated to the state sample, which was the part to be surveyed by the state agencies. In the urban sector, the allocations for the central and state samples were 2484 and 3076 respectively. This document is based on the estimates obtained from the central sample alone. The number of villages and urban blocks actually surveyed as the central sample were 4231 and 2419 respectively.

7.2.2 *Sample size* - second stage units: For the AIDIS, 9 house-holds from every sample village and every urban block were planned to be surveyed. In the central sample, the actual number of households surveyed was 36425 in the rural sector and 20606 in the urban sector.

8. Concepts and Definitions

8.1.1 The concepts and definitions of some of the important terms used in the survey and relevant to this report are explained below :

8.2.1 *Household*: A household was a group of persons who normally lived together and took

food from a common kitchen. However, a boarding house, a hotel or a hostel was treated as a cluster of households, where each individual boarder formed a separate household. If, however, a group of persons among them normally pooled their income for spending, they together were treated as constituting a single household. Barracks of military and paramilitary forces, orphanages and vagrant-houses were excluded from the scope of the survey.

8.2.2 Household size: The size of a household was taken to be the number of members normally residing in it. This size included temporary stay-aways but excluded temporary visitors and guests of the household.

8.3.1 Household assets: Household assets represented all that were owned by the household and had money value. These could be of the nature of pure physical assets, pure financial assets or dues receivable on loans. Physical assets included land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment and durable household goods. Pure financial assets could be advances in cash and in kind, shares in companies and cooperative societies, banks etc., units of various mutual funds, national saving certificates and the like, contributions made towards provident fund, payment of insurance premia, deposits in companies, banks, post offices and with individuals.

8.3.2 However, the AIDIS does not include crops standing in the fields and stock of commodities held by the household in the household assets. Currency notes and coins in hand were also not considered as assets in any of the earlier surveys owing to difficulties in collecting reliable data on them. However, in the present survey, an attempt was made to collect the amount of cash in hand of the household, as on the date of survey. The estimates of household assets, presented in this

document, include the amount of cash held by the households as on the date of survey.

8.4.1 Household durable assets: All physical assets which are used for domestic purposes, having an expected life longer than one year or more and which cannot be purchased at a nominal price were defined as household durables. As an additional criterion, the low frequency of purchase of the commodity was used to identify a household durable asset. However, minor items like tins, bottles, knives etc., though lasting for a longer period, were excluded from household durable assets.

8.5.1 Liabilities: All claims against the household held by others were considered liabilities of the household. Thus, liabilities of a household included all loans of the household, irrespective of whether they were in cash or kind, unpaid bills of grocers, doctors, lawyers etc. Different kinds of liabilities are defined below :

8.5.2 Cash loans: All loans taken in cash were considered as cash loans, irrespective of whether those loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covered borrowings at specific rate of interest for a specific period of time. However, if a loan was contracted without any interest from relatives and friends, it was considered as cash loan. Dues payable by the household owing to hire-purchase of goods were treated as cash loans.

8.5.3 Kind loans: All loans taken in kind (except the cases of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or in kind were considered as kind loans payable.

8.5.4 Other liabilities: As distinguished from cash loans, 'other liabilities' comprised all kind loans payable by the household and also liabilities arising out of purchase of goods and

services for consumption from traders, doctors, lawyers etc. Some households buy goods from grocers, milkmen etc. on credit and make payment at regular intervals. All such dues payable by the household were considered as 'other liabilities', if they were not repaid within the due dates. Similarly, outstanding taxes, rent payable to Government, other public bodies, landlords etc., were included under 'other liabilities'. In addition, 'other liabilities' included trade debt arising out of various commercial transactions made by the household.

8.5.5 Current Liabilities: All "kind loans" and "other liabilities" of a household, as defined above, taken together constituted its current liabilities.

8.6.1 Household Type: The document presents estimates of assets and liabilities for different types of households. Two different classifications have been adopted for the rural and urban areas.

8.6.2 Classification of rural households: The rural households were initially classified into two types namely, cultivator and non-cultivator households.

Cultivator households: All rural households operating at least 0.002 hectare of land during the AY 91-92 were treated as 'cultivator households'.

Non-cultivator households: All rural households operating no land or land less than 0.002 hectare were considered as non-cultivator households. They were further classified into 'agricultural labour', 'artisan' and 'other' households according to the principal household occupation as per the National classification of occupations (NCO), 1968. Out of the occupations pursued by the members as their principal or subsidiary (on the basis of income) occupations, that accounting for the maximum earnings to the house-hold in the

reference year was considered as the principal house-hold occupation.

Agricultural labour: A person was considered to be an agricultural labourer, if he/she followed one or more of the following agricultural occupations in the capacity of a manual labourer:

- (a) cultivation of seasonal crops,
- (b) production of any horticultural commodity,
- (c) any productive activity performed on a farm as incidental to or in conjunction with farm operations, preparation for market and delivery of farm produce to storage or market or carriage for transportation to market.

Working in fisheries and plantations was excluded from agricultural labour. Further, 'carriage for transportation' referred only to the first stage of the transport from farm to the first place of disposal.

Artisans: Own account skilled workers and handicraftsmen engaged in any of the following occupations were considered as artisans:

- (a) spinners, weavers, knitters, dyers, winders, wrappers, carpet makers etc.
- (b) tailors, dress makers, upholsterers, sewers etc.
- (c) shoe makers, repairers and cutters and other leather workers etc.
- (d) carpenters, cabinet makers, wood working machine operators, cart builders, wheel wrights, coach & body builders, ship-wrights & boat builders and related workers
- (e) stone cutters & carvers

- (f) blacksmiths, tool-makers, and machine-tool operators
- (g) sheet metal workers
- (h) jewelry & precious metal workers and metal engravers
- (i) glass formers, potters and related workers
- (j) printers, compositors, type-setters and photo-type setters, printing press man, stereotypers, electro-typers, engravers, book binders, photographic & dark-room workers
- (k) construction painters
- (l) makers of musical instruments, turners basketry and brush makers, non-metallic mineral product makers, doll makers etc.
- (m) brick layers, stone masons, plasterers, tile-setters, cement finishers, roofers, insulators, glaziers, hut builders, thatchers and other construction workers. Own account workers were those who operated their enterprise without hiring anyone on salary or wages except occasionally.

Other rural households: All the remaining households were considered as 'other households'.

8.6.3 Classification of urban households: In urban areas, each household was first categorised in one of the following four groups, namely, self-employed, regular wage/salaried employee, casual labourer and 'others' as per the definitions given below :

Self-employed: Persons engaged in the farm or non-farm enterprises of their households are called self-employed workers. In urban areas, a household was considered as self-

employed, if more than 50% of its income during the 365 days preceding the date of survey was derived from self-employment of its members.

Regular wage/salaried household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting salary or wages on a regular basis (i.e. not on daily basis or on periodic renewal of work contract) are treated as regular salaried/wage employees. Urban households reporting that they had earned more than 50% of their income from regular wage/salaried employment of members were treated as 'regular wage/salaried' households.

Casual labour household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting wages under terms of daily or periodic work contract are treated as casual wage labourers. Urban households reporting that they had earned more than 50% of their income from casual wage employment of members were treated as 'casual labour' households.

Other urban household: All the remaining urban households were treated as 'other' households.

8.6.4 Major household type: The term refers to cultivator and non-cultivator (i.e. other than cultivator) households for the rural areas and self-employed and other (i.e. other than self-employed) households for the urban areas.

8.7.1 Household consumer expenditure: It is the expenditure of a household on domestic consumption only. It is the same as the expenditure covered in the consumer expenditure survey of the NSSO. Any expenditure incurred by the household on its enterprise account was excluded from consumer

expenditure. Unlike the regular Consumer Expenditure Survey of the NSSO, the present survey collected data on the household consumer expenditure through two direct questions on household consumption under two broad categories, viz., (i) out of purchases and (ii) out of home grown/home produced stock, free collection, transfer receipts etc.

8.7.2 Household monthly per capita consumer expenditure (MPCE): This was obtained from the household's total consumer expenditure during last 30 days divided by the household size and recorded in terms of rupees and paises.

8.8.1 Major states: The discussion on summary of survey results in Section 3, besides covering the national level estimates, deals with the estimates for relatively large states - in terms of population - as well. These states are referred to as major states in the discussion. They are as follows: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. In addition, the discussion also covers the estimates of urban Delhi.

9. Contents

9.1.1 This document contains three sections, including the present introductory section and a part - II Survey Results. Section 2 gives a fairly detailed description of the sample design and estimation procedure used for the survey. Section 3 discusses the main findings on household assets and liabilities obtained from the survey data. The detailed data, on which

this document is based, are presented in the Part-II Survey Results.

9.1.2 It would be in order to mention here that the cell figures in any of these detailed tables, when added up, may not exactly equal the figure shown against the 'total' column (or line) due to (i) rounding off and/or (ii) the presence of non-response cases. Footnotes have been given in the Part-II Tables wherever the non-response cases arise but are not shown separately in the tables.

9.2.1 Detailed Tables: The Part II of the document contains tables providing estimates of various items of assets as also of the total assets and liabilities of the households as on 30th June 1991 at the state and all-India level for rural and urban areas. Current liabilities are excluded from the purview of this report. As such, for this report, liabilities denote cash loans outstanding as on 30.6.91, which are hereafter referred to, in brief, as debt of households. The term 'indebted households' stands for those households which had some outstanding cash loans on 30.6.91.

9.2.2 All the estimates presented in this issue are based on the central sample data only. However, to get an idea of sub-sample variations, some key estimates, such as, the distribution of households classified by household asset holding, average value of total assets, number of indebted households per thousand households and average amount of debt per household for each major household type have been presented separately for each sub-sample in Table nos. 2R, 2U, 3R, 3U, 7R and 7U of the Part II Survey Results.

Section 2

Sample Design and Estimation Procedure

1 Sample Design

1.1.1 A stratified two-stage sampling design was adopted for the survey with the first stage units as census villages for rural areas and the Urban Frame Survey blocks for urban areas. Households formed the second stage units in both rural and urban areas.

1.2.1 *Sampling frame for first stage units (FSU's)*: In the rural sector, the sampling frame in most of the strata was the 1981 census list of villages. However, in Assam, where the 1981 census was not undertaken, and in a few districts of other states, where the available list as per 1981 census was incomplete, the 1971 census list of villages was used. In the urban sector, the sampling frames used in most cases were the lists of NSS Urban Frame Survey (UFS) blocks. However, the 1991 census houselisting enumeration blocks were considered as the sampling units for some of the new towns declared as urban areas in the 1991 population census.

1.3.1 *Stratification*: Each state/union territory (u.t.) was divided into one or more agro-economic regions by grouping contiguous districts which are similar with respect to population density and crop pattern. In Gujarat, however, some districts were sub-divided for the purpose of region formation on the basis of

location of dry areas and the distribution of tribal population in the state. The total number of regions formed in the India as whole was 78.

1.3.2 In the rural sector, within each region, each district with a rural population of less than 1.8 million according to the 1981 census formed a single basic stratum. Districts with larger population were divided into two or more strata, depending on population, by grouping contiguous tehsils, similar as far as possible in respect of rural population density and crop pattern. In Gujarat, however, in the case of districts extending over more than one region, the portion of a district falling in each region constituted a separate stratum even if the rural population of the district as a whole was less than 1.8 million. Further, in Assam, the strata formed for the earlier NSS rounds on the basis of 1971 census rural population exactly in the above manner, but with a cut-off of 1.5 million population, were retained as the strata for rural sampling.

1.3.3 In the urban sector, strata were formed, again within NSS regions, on the basis of 1981 (1991 in some of the new towns) census population of towns. Each city with a population 10 lakhs or more formed a separate stratum by itself. The remaining towns of each region were grouped to form three different strata on the basis of 1981 (1991 in a few cases)

census population. The strata were formed as details stated below :

Composition of Urban Strata:

stratum no.	population size class of towns
1	all towns with population less than 50,000
2	all towns with population 50,000 to 1,99,999
3	all towns with population 2,00,000 to 9,99,999
4	all towns with population 1 million and above

1.4.1 *Allocation of sample:* A total all-India sample of 6,812 first stage units (4,328 villages and 2,484 urban blocks) - determined on the basis of investigator strength in different states/u.t.'s and the expected workload per investigator was initially allocated to the states/u.t.'s in proportion to central field staff available. The sample thus obtained for each state/u.t. was then allocated to its rural and urban sectors considering the relative sizes of the rural and urban population with almost double weightage being given for the urban sector. Within each sector of state/u.t., the allotted sample size was re-allocated to the different strata in proportion to the stratum population. All allocations were adjusted so that the sample size for a stratum was at least a multiple of 4 for the rural and urban sectors separately. This was done to accomplish equal sized samples in each sub-sample and sub-round. The only exception was Daman & Diu for which the first stage rural sample comprised 2 villages only.

1.5.1 *Selection of first stage units:* The selection of sample villages was PPS (with replacement) with population as the size variable, in the form of two independent sub-

samples. The sample blocks were selected by simple random sampling without replacement, also in the form of two independent sub-samples.

1.5.2 *Arunachal Pradesh:* For the rural areas of Arunachal Pradesh, a cluster sampling procedure was followed. The field staff were supplied with a list of sample "nucleus" villages and were advised to select clusters of villages, each cluster being formed around a nucleus village, according to prescribed guidelines. The nucleus villages were selected circular systematically with equal probability, in the form of two independent sub-samples.

1.6.1 *Selection of hamlet-groups/sub-blocks:* Large villages and blocks were divided into a suitable number of hamlet-groups and sub-blocks, respectively, having more or less equal population content. Two hamlet-groups were then selected from large villages, whereas only one sub-block was selected from the large blocks. The hamlet-groups were selected circular systematically and the sub-block with equal probability.

1.7.1 *Selection of households:* Two different procedures of selection of households were used for the rural and urban sectors. Different procedures for the two sectors were necessary, since in the rural sector schedules of enquiry for LHS survey and Debt & Investment survey were required to be canvassed in two separate sets of sample households, while in the urban sector, both the schedules were to be canvassed in the same set of sample households.

1.7.2 In the rural sector, nine households were selected from each sample village/selected hamlet groups. For selecting a sample of nine households, each sample village/hamlet group was subdivided into 7 AIDIS sub-strata on the joint consideration of "land possessed" and "indebtedness status" of the households; first,

all the households of the sample village/selected hamlet groups were divided into four LHS sub-strata by area of land possessed by them. Households possessing either no land or land less than 0.005 acre were grouped in sub-stratum 1. The rest of the households were then arranged in ascending order by area of land possessed and classified into three sub-strata, 2, 3 and 4, such that the total area of land possessed by the households in each of the 3 sub-strata was nearly the same. Each of the LHS sub-strata 1 and 2 was further divided into "indebted" and "not indebted" groups to form AIDIS sub-stratum 1 to 4. AIDIS sub-strata 5 to 7 are formed by first merging LHS substrata numbers 3 and 4 and then sub-divided by the merged group into 3 classes, viz., (a) indebted to institutional agencies with or without being indebted to non-institutional agencies, (b) indebted to non-institutional agencies alone and (c) not indebted. Independent sample of size 1,1,1,2,1,1&2 were selected circular systematically from the AIDIS sub-strata 1,2,3,4,5,6 and 7 respectively .

1.7.3 In the urban sector, a sample of 9 households was selected from each sample urban block/sub-block. The households of a sample block/sub-block were classified into 7 AIDIS sub-strata, considering the monthly per capita consumption expenditure (mpce) and indebtedness status of the households. For this, the households were first grouped in three mpce classes, viz., less than A, A to B and B & above. The cut-off points A and B were determined at the state-level on the basis of mpce obtained from the survey on consumer expenditure, NSS 43rd Round, such that the mpce classes, below A, A to B, and B and above, respectively constituted 30 p.c, 60 p.c, and 10 p.c. of the urban population of the state. These mpce classes were further sub-divided by indebtedness status of the households to form 7 AIDIS sub-strata. Independent samples were selected circular systematically from each of the sub-

stratum. The number of households was selected from sub-strata 1, 2, 3, 4, 5, 6 and 7 respectively 1, 1, 1, 1, 2, 2 & 1.

1.8.1 *Sample size:* In all, the survey covered 57,031 households spread over 6,650 sample villages/blocks. The number of sample villages and blocks surveyed, and the number of sample households surveyed, are given for different state/u.t.'s and all-India in Part-II Table 1R & 1U respectively for rural and urban sectors.

2 ESTIMATION PROCEDURE

2.1.1 The estimation procedure adopted in the 48th round for schedule 18.2 is briefly indicated here.

2.2.1 *Notations:* The notations used for describing the estimation procedure are given below :

- s : subscript for sth stratum
- i : subscript for ith village/block
- t : subscript for tth sub-stratum (i.e. household-strata within a village/block)
- j : subscript for jth sample house-hold
- L : total number of rural/urban strata in the state
- p : village population (used for sampling and as per frame)
- P : total population of a rural stratum (as per frame)
- N : total number of blocks in an urban stratum as per frame. This notation is also used for total number of villages in a rural stratum of Arunachal Pradesh as per frame
- n : number surveyed villages/blocks including depopulated and zero cases available for tabulation (excluding casualty and other not received cases)

C : number of census villages in a surveyed revenue village

D : number of hamlet-groups/sub-blocks formed

H : total number of households in the frame

h : number of surveyed households (available for tabulation) in a sub-stratum

x, y : values of characteristics

X or Y : total of x or y at the state level

\hat{y} : estimate of Y from the sample for rural sector

$D' = D$ if $D=1$

$=D/2$ if $D \geq 4$

2.2.2 Estimates of aggregates: As sampling procedures were different for the rural and the urban sectors, the estimation formulae used for the two sectors was also different.

2.2.3 Rural: For the states and u.t.s, other than Arunachal Pradesh and Lakshadweep, the estimates for the aggregate for the sth stratum is given by

$$\hat{Y}_s = \frac{P_s}{n_s} \sum_{i=1}^{ns} \frac{D'_{si}}{C_{si}} \frac{1}{P_{si}} \sum_{t=1}^7 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{hsit} y_{sitj}$$

For Arunachal Pradesh,

$$\hat{Y}_s = \frac{N_s}{n_s} \sum_{i=1}^{ns} \sum_{t=1}^7 \sum_{j=1}^{hsit} \frac{H_{sit}}{h_{sit}} y_{sitj}$$

and for Lakshadweep,

$$\hat{Y}_s = \frac{7}{n_s} \sum_{i=1}^{ns} \frac{D'_{si}}{C_{si}} \sum_{t=1}^7 \sum_{j=1}^{hsit} \frac{H_{sit}}{h_{sit}} y_{sitj}$$

2.2.4 Urban: For all the states, the estimate of aggregate of the sth stratum is given by

$$\hat{Y}_s = \frac{N_s}{n_s} \sum_{i=1}^{ns} D_{si} \sum_{t=1}^7 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{hsit} y_{sitj}$$

2.2.5 State/u.t. level estimates: The aggregate estimates at the state /u.t. levels were worked out separately for the rural and urban sectors. For both the sectors, the aggregate estimate at the state/u.t. level was obtained as

$$\hat{Y} = \sum_{s=1}^L \hat{Y}_s$$

2.2.6 Subsample estimates : Each subsample estimate was based on the data collected from the surveyed FSUs of the respective subsample. For each state/u.t. (or national level estimate) 2 subsample estimates were obtained separately for the rural and urban sectors. The formulae given above were used for this purpose, taking n_s as the number of surveyed FSUs of the respective subsample.

2.2.7 Combined estimate: The 'combined' estimates for the rural urban sectors of a state/u.t. (or national level estimate) were obtained as the simple averages of the subsamplewise estimates for the respective sectors. All the estimates presented in this report are based on the combined estimates of the aggregates, unless otherwise specified.

2.2.8 Estimates of ratios: Let X and Y be the respective totals of two characteristics x and y at the state/u.t./ national level.

Thus the estimate of ratio $R = Y/X$ is obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}} \quad \text{where } \hat{X} \text{ and } \hat{Y}$$

are the estimates of X and Y respectively. Both the subsample and the combined estimates of ratios were obtained in this way.

Section 3

Summary of Findings

1.0.1 The All-India Debt and Investment Survey (AIDIS) of NSSO is the principal source of data on assets, liabilities and capital expenditure of the household sector. The present document contains the survey results on value and composition of household assets as also estimates of the extent of indebtedness and average amount of cash loans as on 30th June 1991.

1.0.2 This section summarises the major findings of the survey and discusses the salient features relating to assets and outstanding cash loans of the households at the state and all-India level. Since the estimates on assets and outstanding cash loans of the households are presented by different categories of households, it would be appropriate to first examine the proportion of households falling under such categories in the rural and urban areas. The variations in household asset holdings by various correlates are then discussed in some detail. This is followed by a fairly detailed discussion on the composition of assets and size-distribution of assets. Finally, the section concludes with a brief discussion on household indebtedness and average debt per household in terms of cash dues outstanding on 30.6.1991.

2. OCCUPATIONAL CATEGORIES

2.0.1 All estimates in this document are presented separately for different types (called *occupational categories* in this Section) of households. For this purpose, the report uses two different classifications for rural and urban areas. The following paragraphs summarise the estimates relating to the occupational categories of households, separately for rural and urban areas.

2.1.1 *Categories of rural households:* The households in the rural sector were broadly classified as *cultivator and non-cultivator* households. The *cultivator* households were defined as those who operated some land (0.002 hectare or more) during the agricultural year 1991-92. Those who did not operate any land were considered as *non-cultivator* households and were further classified as (i) *agricultural labour* households (ii) *artisan* households and (iii) *other* rural households depending upon the occupation code of the household. The above definitions were somewhat different from those adopted in the NSS 37th round and 26th round., which were conducted during 1982 and Agricultural year (AY)1971-72 respectively. In those surveys, *cultivators* were defined as in the 48th round, but non-cultivators were

classified in the three categories mentioned above depending upon the major source of income of the household (during 365 days preceding the date of survey) with occupations differing somewhat from those adopted for the present survey.

2.1.2 Table 1 gives the percentage of *cultivator* and different *non-cultivator* households derived from the present survey and the two earlier rounds of AIDIS. The results of NSS 48th round indicate that there were more than 66% *cultivator* households and about 14% are *agricultural labour* households in 1991¹. Only about 3.8% were artisan households. It may be recalled that a *non-cultivator* household in the rural areas could be one whose members earned the most either from some agricultural

(*artisan*) or by pursuing some other gainful activity and operating less than 0.002 hectare of land in the rural areas (*others*).

2.1.3 The results presented in Table 1 reveal that in rural India there has been a sharp decrease in the proportion of *cultivator* households by about 10 percentage points during the decade ending 1991, although there was an increase in this proportion by about 4 percentage points in the earlier decade. Thus, compared to 1971, there has been a decrease of about 6 percentage points in this proportion during the two decades ending 1991.

2.1.4 It may be noted that the per thousand distribution of households by principal industry obtained on the basis of employment and unemployment (E and UE in brief) surveys of NSSO do not suggest the extent of fall in the percentage of "cultivator" households during the 1980s and that indicated by Table 1 above. The percentage of households with "agriculture" as principal industry in the E and UE surveys of NSSO registered a fall by only 2 percentage points - from 73 to 71 - during 1983 to 1993-94, assuming that the proportion of households under principal industry category "others" (i.e. households with no income from any gainful activity) remained constant at 4% over the period 1983 to 1987-88 (Sarvekshana, Special Number, Sept. 1990, pp 36-39). However, since the definition for "cultivators" as used in this report and that for "agriculture" as used in E and UE surveys of NSSO are not identical - the latter being based on the sector of the household's activity while the former on the extent of land operated by the concerned household - the findings of the present document and those of the E and UE surveys are strictly not comparable.

Table 1
Percentage distribution of rural households by occupational categories

household occupational category	percentage of households		
	1971 (26th)	1981 (37th)	1991 (48th)
<i>cultivators</i>	72.4	76.3	66.1
<i>non-cultivators:</i>			
: <i>agr. labour</i>	14.6	11.3	14.2
: <i>artisan</i>	2.4	1.6	3.8
: <i>other</i>	10.6	10.8	15.8
<i>all non-cultivators</i>	27.6	23.7	33.9
all households	100.0	100.0	100.0

Sources of estimates of 26th & 37th rounds:
RBI(1976) and NSS Report No. 318 respectively

occupations (as listed in para 8.6.2 of chapter 1) as manual labourers (*agricultural labour*) or as own account skilled workers engaged in various (see para 8.6.2 of Section 1) activities

¹ Strictly speaking, the estimates of number of households pertain to a moving reference point, as stated in Para 6 of Section 1. However, since all other estimates of this document relate to 30.6.91 for the present round, 1991 is given as the reference point for the estimates of number of households. This convention is followed for the earlier rounds as well.

2.1.5 The fact that an independent sample of rural households from each surveyed village was selected exclusively for AIDIS in the present round could have contributed to this fall in the estimate of proportion of *cultivator* households. In the earlier rounds, as the same set of households were surveyed for both the LHS and the AIDIS, the results of deeper probing for identification of operational holdings in the LHS could be used for the AIDIS as well. It seems likely that such a thorough probing could not be done on the independent sample of rural households selected for AIDIS in the 48th Round.

2.1.6 Among the *non-cultivator* households, the percentages in each category, viz., *agricultural labour* households, *artisan* households and other rural households are found to have increased during the period under reference. During 1981 to 1991, while the overall increase in proportion of *non-cultivator* households was by about 10 percentage points, *other* rural households showed an increase of about 5 percentage points, *agricultural labour* households about 3 percentage points, the balance of 2 percentage points being accounted for by the *artisan* households. It may be noted that although definitions for the various household types falling under *non-cultivator* households have got changed in 1991 on the basis of occupations - differing somewhat from those followed in the earlier AIDISs (1971 & 1981) -- the percentage of households falling under each type remain dimensionally comparable over the entire period. For example agricultural labour households, the proportions are 14.6% in 1971, 11.3% in 1981 and 14.2% in 1991. Similarly, for *artisan* households these are 2.4% in 1971, 1.6% in 1981 and 3.8% in 1991.

2.2.1 *Categories of urban households:* For the urban areas, the households have been categorised as *self-employed* and *others*.

Further, under '*self-employed*' the households are sub-classified into seven major occupational groups by following the occupation divisions of the National Classification of Occupations (1968). These groups are:

1. professional, technical and related workers,
2. administrative, executive and managerial workers
3. clerical & related workers,
4. sales workers,
5. service workers,
6. farmers, fishermen, hunters, loggers and related workers,
7. production and related workers, transport operators and labourers.

Table 2 gives the percentage distribution of households by their occupational category, derived from the present survey and the AIDIS of the 37th Round. Data for 1971 has not been presented in Table 2 since NSS 26th round results for urban sector was not released.

2.2.2 Table 2 shows that in the urban areas, over a third of the households were *self-employed* at the all-India level in 1991. Among the *self-employed* households, whose members were engaged as "production and related workers, transport equipment operators and labourers" and those engaged as "sales workers" formed the two most important groups. Each of these two were found to constitute a little over 11% of the urban households. The remaining 12% were distributed among the remaining *self-employed* categories. Out of these, "farmers etc." and "administrative etc." were found to be two important groups, each of which constituted about 4% of the urban households in 1991.

Table 2

Percentage distribution of urban households by occupational group

household occupational category	1981 (37th)	1991 (48th)
<i>self-employed:</i>		
professional etc.	1.7	1.6
administrative etc.	2.4	3.9
clerical etc.	0.8	0.2
sales workers etc.	10.6	11.3
service workers etc.	1.9	2.1
farmers etc.	4.0	3.7
production workers etc.	10.8	11.0
all self-employed	32.6	34.0
other urban households	67.4	66.0
all households	100.0	100.0

Sources of estimates of 37th round:
NSS Report No. 318

Note: Here, only effective households have been considered while deriving the percentages for the 48th Round. This holds true for all the tables presented in this Section, from which "not recorded" cases have been excluded uniformly.

2.2.3 In 1981, the pattern was quite similar to that in 1991 estimates, with the percentage of *self-employed* observed to be almost the same (33%). As in 1991, the same two occupational categories viz. 'sales workers' and 'production & related workers etc.' were the groups among the *self-employed* category. Each of them accounted for about 11% of the urban households. The category "farmers etc." had a share of about 4% in 1981.

2.3 Occupational categories -- inter-state comparison

2.3.1 *Changing proportion of cultivator households:* Table 3 shows the changes in the

percentage of *cultivator* households during the two decades ending 1991 for 17 major states.

2.3.2 A quick comparison of AIDIS'92 estimates with those of the AIDIS'82 could give a feeling that there has been an almost across-the-board drastic fall in the percentage of *cultivator* households. But a closer scrutiny of the estimates over the entire period ranging between 1971 and 1991 brings out a somewhat different picture.

2.3.3 No doubt, there has been a sharp fall during the period 1981-91, but a major part of it seems to be in the nature of annulling the increase noted -- very sharp indeed in some states -- during the earlier decade ending 1981. This observation may be borne in mind while looking at the changes in the percentage of *cultivator* households for states like Punjab (43% in 1971, 63% in 1981 and again 44% in 1991), Gujarat (64% in 1971, 80% in 1981 and 60% in 1991), Tamil Nadu (55% in 1971, 69% in 1981 and 44% in 1991) and West Bengal (66% in 1971, 78% in 1981 and 65% in 1991).

2.3.4 Having said this, there is no denying the fact there has been a fall in almost all the states in the percentage of *cultivator* households in 1991 even when this is compared to the 1971 estimates. The fall was little -- less than 1% -- in a few states like Uttar Pradesh and West Bengal. It was moderate -- up to 5% -- for some states like Himachal Pradesh, Gujarat, Rajasthan etc., and even significant -- more than 5% -- in some states, e.g. Tamil Nadu and Kerala (both exceeding 11%). However, there has also been a minor rise (less than 1%) in this percentage for a few states like Punjab, and Karnataka in 1991 over the corresponding 1971 estimates.

Table 3
Percentage of cultivator households obtained from AIDIS of 26th, 37th and 48th rounds

State	1971 (26th)	1981 (37th)	1991 (48th)
Andhra Pradesh	61.6	65.8	55.8
Assam	81.6	86.8	71.7
Bihar	80.4	77.4	69.8
Gujarat	64.0	79.6	60.4
Harayana	60.0	57.0	57.3
Himachal Pradesh	92.4	87.4	84.2
Jammu & Kashmir	93.9	83.3	86.3
Karnataka	68.7	75.1	69.3
Kerala	89.7	93.2	78.2
Madhya Pradesh	82.0	80.3	70.8
Maharashtra	68.8	67.4	60.2
Orissa	77.2	83.8	68.5
Punjab	42.9	63.3	43.7
Rajasthan	86.8	84.8	80.4
Tamil Nadu	55.4	68.9	43.8
Uttar Pradesh	77.8	78.4	76.4
West Bengal	65.8	78.4	65.2
India	72.4	76.3	66.1

Source: As for Table 1

2.3.5 In this apparent confusion of rise and fall of percentage over the two decades two distinct features stand out. Both of these clearly bring out a pattern characterising the estimates of all the three rounds. First, there are remarkably large state-wise variations from the all-India estimate for each of these rounds. The percentage of *cultivator* households to all rural households ranged from a low 43% (in Punjab) to a high 94% (Jammu & Kashmir) in 1971, a moderate 57% (in Haryana) to a high 93% (in Kerala) in 1981, and from mere 44% (in Tamil Nadu) to a significant 86% (in Jammu & Kashmir) in 1991. The all-India averages for the three rounds were 72%, 76% & 66% respectively.

2.3.6 Secondly, states with relatively high or low percent-age as compared to other states shown in the table, seem to have retained their

broad relative position in all the three rounds. For instance, very high percentage was seen for Himachal Pradesh -- in fact the second highest among the major states -- for all the three rounds viz. 92% in 1971, 87% in 1981 and 84% in 1991. On the other hand, very low percentage was seen for Haryana in all the three rounds viz. 60% in 1971 (third from bottom), 57% in 1981 (least) and 57% in 1991 (fourth from bottom).

Table 4
Percentage of self-employed households obtained from AIDIS of 37th and 48th rounds

State	1981 (37th)	1991 (48th)
Andhra Pradesh	34.6	32.4
Assam	38.9	39.9
Bihar	36.6	39.0
Gujarat	32.8	34.5
Harayana	40.0	46.3
Himachal Pradesh	29.0	32.4
Jammu & Kashmir	44.5	28.2
Karnataka	36.0	29.2
Kerala	31.1	34.4
Madhya Pradesh	32.0	29.1
Maharashtra	25.9	29.0
Orissa	25.3	32.3
Punjab	44.5	43.1
Rajasthan	37.8	34.9
Tamil Nadu	27.5	28.4
Uttar Pradesh	42.1	47.9
West Bengal	24.3	33.4
Delhi	30.6	30.6
India	32.6	34.1

Source: As for Table 1

Note: As given under Table 2

2.3.7 It is well-known that *cultivator* households form a big chunk of the rural households in India. However, this high

preponderance of the *cultivator* households, as revealed from the survey, appears to be mainly due to the definition adopted in the survey for the *cultivator* households. It is quite likely that a good number of households earning major part of their income as agricultural labourer or artisans also held and operated a small piece of land. The survey treated all such households as cultivator households although their occupation code was other than that for cultivators.

2.4.1 Changes in proportion of urban self-employed households: Table 4 gives the percentage of *self-employed* urban households for the 18 major states (including Delhi) as estimated from the present survey and AIDIS of the 37th Round. The same two distinctive features as observed for the rural areas are seen in the urban areas also.

2.4.2 First, the estimates of both the rounds reveal a wide inter-state variation. The percentage of *self-employed* households to all urban households ranged between a low 24% (in West Bengal) to about 45% (in Jammu & Kashmir and Punjab) in 1981. In 1991, it varied between 28% (in Jammu & Kashmir) to 48% (in Uttar Pradesh).

2.4.3 Secondly, the relative positions of the states in respect of proportion of *self-employed* households seem to have remained largely unchanged during the decade ending 1991. While the proportion of *self-employed* households to all urban households was high in states like Uttar Pradesh, Punjab and Haryana (above 40% in each state during 1981 and 1991), states such as Maharashtra and Tamil Nadu (less than 30% in each state during 1981 and 1991) showed much lower proportions. Since the overall all-India proportion for *self-employed* households appears to have remained

nearly the same in 1991 compared to 1981, it is but natural that there would be a fall in this proportion for some states to counter-balance the rise in a majority of the important states. However, the remarkable fall for Jammu & Kashmir (from 44.5% in 1981 to 28.2% in 1991) stands out. This could probably be explained by the incomplete coverage owing to unusual political climate of the state during 1991 (Refer to paragraph 3.2.1 of Section 1). Two states viz. Haryana and Uttar Pradesh have shown a rise of 5-6 percentage points. Of these, in Haryana, households engaged as 'production workers etc.' have shown a sizable increase of about 10 percentage points whereas for Uttar Pradesh, a rise of more than 3 percentage points is seen for the group "administrative etc.". In fact, the last mentioned group has increased in several *other* states, showing a rise of about 4 percentage points in Punjab and Maharashtra (See Part-II Table 4.1U).

Table 5

Percentage (P) of households owning assets and average value of total assets (AVA) owned on 30.6.91

occupational category	P	AVA (Rs.)
Rural		
cultivator	100.0	1,42,308
non-cultivator	99.3	38,180
all rural households	99.8	1,07,007
Urban		
self-employed	99.9	1,89,710
others	98.7	1,20,928
all urban households	99.1	1,44,330

3. AVERAGE ASSETS HOLDINGS

3.1.1 For the purpose of the survey, both types of assets -- physical and financial -- owned by the households as on 30th June 1991 were enumerated. Under physical assets, land, buildings, livestock, agricultural implements & machinery, trans-port equipments and household durables were taken into account while shares and deposits etc., and cash and kind dues receivable and cash in hand were considered under financial assets.

3.1.2 Table 5 gives the average assets holdings(AVA) of the rural and urban households by occupational category. It also shows the percentage of households reporting ownership of some assets. Obviously, it is expected that a household must own one or the other type of asset covered in the survey. Yet, 2 in every thousand among rural households and 9 in every thousand among urban households do not appear to own any asset in 1991. How is this possible? It may be recalled that for the present survey, the date of owning of various items of assets was fixed as 30.6.91 -- about 6 to 14 months before an investigator actually paid his first visit to a sample household. Thus, the very definition precluded any "newly formed" sample household, i.e. a sample household which came into existence between 1.7.1991 and the date of survey, from owning any asset for the present survey. As regards the average value of total assets per household in 30.6.91, it was estimated as Rs. 1,07,007 in rural India and Rs. 1,44,330 in urban India.

3.1.3 In rural areas, the cultivator households show a much higher average value of assets than the non-cultivator households. The average value is seen to be Rs. 1.4 lakhs plus for

cultivators but only about Rs. 0.4 lakh for the remaining rural households. In urban areas, the self-employed households reported a higher average value (Rs. 1.9 lakhs) than "other" urban households (Rs. 1.2 lakhs).

Table 6
Average value of total assets (AVA) per rural household

state	AVA (Rs.000)	
	1981 (37th)	1991 (48th)
Andhra Pradesh	26	58
Assam	20	60
Bihar	32	98
Gujarat	37	103
Haryana	91	338
Himachal Pradesh	63	134
Jammu & Kashmir	59	163
Karnataka	33	107
Kerala	77	182
Madhya Pradesh	30	93
Maharashtra	35	93
Orissa	18	46
Punjab	97	329
Rajasthan	41	159
Tamil Nadu	20	62
Uttar Pradesh	45	139
West Bengal	21	62
India	36	107

Source of estimates of 37th round:
NSS Report No. 318

3.2 Inter-state comparison of AVA

3.2.1 *In rural areas:* The changes in the average value of assets (AVA) of the rural households over the decade ending 1991 are shown in Table 6 for 17 major states. In 1991,

Figure 1
Average value of assets of rural households in 1981 and 1991

Figure 2
Average value of assets of *urban* households in 1981 and 1991

AVA was highest in Haryana (Rs.3.4 lakhs), closely followed by Punjab (Rs.3.3 lakhs). Kerala (Rs. 1.8 lakhs), Jammu & Kashmir and Rajasthan (Rs.1.6 lakhs each) are three other states with high figures of AVA. The relative positions of the states in 1991 are observed to be roughly the same as in 1981. Rajasthan, showing a marked rise in 1991, is the only exception. The AVA for Rajasthan is found to shoot from just above the all-India figure in 1981 to the top bracket in 1991 (Figure 1)².

3.2.2 An inter-state comparison brings out some striking resemblance between the two time points 1981 and 1991. As in 1981, states of the Northern region, in general, show a much higher value of total assets per household than those in other regions. In fact, as in 1981, the lowest AVA in 1991, is observed for Orissa. Further, as in 1981, AVA for Andhra Pradesh, Assam Tamil Nadu and West Bengal -- each at about Rs. 60 thousand -- were just above that for Orissa (Rs. 46 thousand) in 1991.

3.2.3 In urban areas: Table 7 shows the changes in the AVA of the urban households over the decade ending 1991 for 18 major states. A state-wise analysis of AVA shows that it was highest in Delhi (Rs. 2.8 lakhs), followed by Punjab (Rs.2.6 lakhs), Kerala (Rs. 2.2 lakhs) and Jammu & Kashmir (Rs.2.0 lakhs). This pattern is seen to be almost the same as was observed in 1981 with small changes like Punjab having shot up from the fifth position in 1981 to the second in 1991. Similarly, Delhi has moved to the top rank in 1991 from the second position held by it in 1981.

Table 7
Average value of total assets (AVA) per urban household

state	AVA (Rs.000)	
	1981 (37th)	1991 (48th)
Andhra Pradesh	32	95
Assam	33	112
Bihar	36	99
Gujarat	43	160
Haryana	60	151
Himachal Pradesh	54	161
Jammu & Kashmir	84	202
Karnataka	42	125
Kerala	112	222
Madhya Pradesh	42	117
Maharashtra	43	165
Orissa	22	72
Punjab	55	256
Rajasthan	40	161
Tamil Nadu	34	120
Uttar Pradesh	38	158
West Bengal	28	101
Delhi	92	284
India	41	144

Sources of estimates of 37th round: NSS Report No. 318

3.2.4 On the whole, relative positions of the states, in terms of average assets holdings, between 1981 and 1991 show some similarities. Some of the states that showed relatively high value of assets per household in 1981 viz. Delhi, Kerala, Jammu & Kashmir continue to do so in 1991. The new addition to the top league is Punjab with Haryana getting relegated to the

² All value of assets/cash loans etc. refer to a fixed date, viz. 30.6.91 for the 48th round, 30.6.81 for the 37th round and 30.6.71 for the 27th round. However, for the sake of brevity, they are referred to as 1991, 1981 and 1971 respectively. This is done in the rest of this section.

10th position in 1991 from the 4th position occupied by it in 1981. Low figures for AVA is noticed in 1991 for Andhra Pradesh (Rs. 95 thousand) and Bihar (Rs.99 thousand). Moreover, Eastern region states like Orissa showing least average value of Rs.72 thousand in 1991, and West Bengal with about Rs.1 lakh in 1991, continue to occupy lowly positions as in 1981.(Figure 2)

3.3 Average value of assets by land owned

3.3.1 Table 6R in the Part - II shows the average value of assets (AVA) as on 30th June '91 for households of different land ownership classes of the rural areas. This table has been generated for the first time from the Debt and Investment Survey. This table indicates that the AVA increased with the size class of land owned for rural India as a whole. This picture was only to be expected, given the overwhelming importance of land as an item of asset in rural India.

3.3.2 *State-wise pattern* : Table 6 of the Part-II shows that the pattern seen at the national level holds good for most of the states. However, in some states like Assam, Orissa and Uttar Pradesh, the AVA is seen to fall slightly in second lowest ownership class, viz "less than 0.002 ha." compared to the lowest class, viz. "nil".

3.4 Average value of assets by monthly per capita consumer expenditure

3.4.1 Tables 5R & 5U in the Part - II shows the average value of assets (AVA) as on 30th June '91 for households of different monthly per capita consumer expenditure (mpce) classes. These tables, like the table on AVA by ownership of land, have been generated for the first time from the Debt and Investment Survey.

3.4.2 There are 12 mpce classes in the detailed tables in the Part-II Summary Results. However, for the purpose of better presentation, 5 mpce

size-categories -- out of these 12 classes -- have been determined and values of AVA for these categories have been presented in Tables 8 & 9 for the major states. Each of these categories correspond to roughly a fifth of all households -- separately for the rural and urban areas.

Table 8
Average value of assets of rural households by monthly per capita consumer expenditure (mpce) as on 30.6.91

in Rs.'000'

state	mpce (Rs.) class					
	less than 140	140-180	180-215	215-280	280 or more	all
Andhra Pradesh	34	42	52	61	117	58
Assam	26	33	59	76	80	60
Bihar	58	80	107	142	159	98
Gujarat	43	54	65	106	160	103
Harayana	105	147	181	335	434	338
Himachal Pradesh	102	95	131	153	155	134
Jammu & Kashmir	99	122	140	152	227	163
Karnataka	71	74	93	127	184	107
Kerala	82	89	119	180	347	182
Madhya Pradesh	53	67	93	110	166	93
Maharashtra	57	69	86	104	129	93
Orissa	29	40	54	64	76	46
Punjab	118	47	156	144	422	329
Rajasthan	96	85	130	136	238	159
Tamil Nadu	32	38	49	63	149	62
Uttar Pradesh	78	98	124	178	235	139
West Bengal	24	40	52	77	125	62
India	52	68	90	121	197	107

3.4.3 Table 8 shows that, in rural India, AVA has risen continuously over the mpce size-categories. Its value is found to be nearly four times, about Rs. 2 lakhs, in the top mpce category (above Rs. 280) compared to its value

of Rs. 52 thousand in the lowest mpce category (less than Rs. 140). Between the mpce categories, the rise of AVA is observed to be the steepest from the fourth to the fifth (last) category. This rise exceeds 50% in value terms, from about Rs. 1.2 lakhs to nearly Rs. 2 lakhs.

Table 9
Average value of assets of urban households by monthly per capita consumer expenditure (mpce) as on 30.6.91
in Rs.'000'

state	mpce (Rs.) class					all
	less than 185	185 - 255	255 - 385	385 - 520	520 or more	
Andhra Pradesh	28	59	108	151	211	95
Assam	55	83	87	187	120	112
Bihar	80	98	108	114	103	99
Gujarat	43	83	130	183	410	160
Haryana	99	90	119	196	343	151
Himachal Pradesh	78	176	188	84	199	161
Jammu & Kashmir	198	172	210	136	330	202
Karnataka	41	97	104	165	317	125
Kerala	88	145	233	335	412	222
Madhya Pradesh	43	90	120	160	289	117
Maharashtra	56	63	95	124	373	165
Orissa	41	25	60	136	135	72
Punjab	73	98	166	214	502	256
Rajasthan	55	93	202	174	214	161
Tamil Nadu	34	62	106	215	248	120
Uttar Pradesh	90	105	138	168	474	158
West Bengal	35	69	74	105	207	101
India	52	82	120	164	322	144

3.4.4 The picture is more or less the same for rural areas in all the states with only a few exceptions. For states like Himachal Pradesh, Punjab and Rajasthan, a fall in AVA is noticeable in the second lowest category, i.e. Rs. 140-180 compared to the lowest category. However, for

some of the states such as Haryana, Punjab, Jammu & Kashmir and Rajasthan which show an overall higher figure for AVA, the AVA in each of the mpce categories is substantially high -- mostly Rs. 1 lakh and above.

3.4.5 Urban India has a very similar story to tell. Like the rural sector, AVA shows a continuous rise over the 5 mpce categories, it being about six times (Rs. 3.2 lakhs) in the highest mpce category (above Rs.520) compared to Rs. 52 thousand, the figure for AVA in the lowest mpce category (less than Rs. 185).

3.4.6 Table 9 shows that Punjab, Kerala and Jammu & Kashmir had a substantially higher AVA at the state level compared to the national level figure. However, while for Punjab and Kerala, AVA is seen to rise gradually over the mpce categories, for Jammu & Kashmir, AVA in the various mpce categories are observed to rise or fall till the fourth one but with a high figure of at least Rs. 1.4 lakh in each of them. As in the case of all-India, the rise of AVA is observed to be the steepest in almost all the states from the fourth (Rs.385-520) to the top mpce category. While this rise is found to be 50% at the national level, it is observed to be as high as nearly 250% in some states like Punjab, Jammu & Kashmir and Uttar Pradesh.

4. COMPOSITION OF HOUSEHOLD ASSETS HOLDING

4.1.1 It would be of interest to study the importance of different items of assets to the various occupational categories of households as also to probe into any alteration in the importance of different assets during the last two decades. With these goals in view, the percentage shares of different items in the total assets derived from the present survey data along with those obtained from the earlier rounds in 1981 and 1971 for the rural sector and for NSS 37th round (1981) for the urban sector (since NSS 26th round results for urban

sector were not released) have been presented for all-India in Table 10.

4.1.2 The importance of agriculture both in national income and employment is well established and needs no elucidation. It is, therefore, no wonder that land is the most important component of assets owned by rural households. The results of the present as well as earlier surveys, presented in Table 10, bear testimony to this fact. The percent-age of the value of land to the value of total assets was between 62% to 67% during 1971 to 1991 -- way ahead of any other asset -- in the rural areas.

4.1.3 Next in order of importance were buildings which had share in the range of 18% to 21% during the two decades ending 1991. Thus, land and buildings taken together accounted for nearly 85% of the value of total assets owned by the rural households over the twenty-year period 1971 to 1991. Between these two items of assets, the share of buildings show a slight rise from 17.9% in 1971 and 20.7% in 1981 to 21.4% in 1991. No clear trend was evident for land, whose share is seen to dip from 66.7% in 1971 to 62.1% in 1981, only to rise somewhat to 64.2% in 1991.

Table 10

Percentage share of different items of assets in total household assets by occupational category of households from 26th, 37th and 48th rounds.

occupational category	year	Percentage share of different items of assets							
		land	building	other assets					total.
				livestock & poultry	machinery & equipment	household durables	financial assets	dues receivable	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Rural									
cultivator	1971	69.0	16.5	6.5	2.7	4.2	0.8	0.6	100.0
	1981	64.1	19.5	5.0	3.7	6.6	1.0	0.1	100.0
	1991	67.6	19.1	3.4	3.8	5.1	0.8	0.1	100.0
non-cultivator	1971	32.3	39.7	6.4	3.1	11.5	5.2	1.8	100.0
	1981	30.8	39.1	5.2	3.3	15.8	5.5	0.3	100.0
	1991	39.8	37.9	2.9	3.5	11.2	4.6	0.1	100.0
all households	1971	66.7	17.9	6.5	2.7	4.6	1.1	0.5	100.0
	1981	62.1	20.7	5.0	3.7	7.1	1.2	0.1	100.0
	1991	64.2	21.4	3.4	3.8	5.9	1.3	0.1	100.0
Urban									
self-employed	1981	34.6	37.3	1.1	8.0	13.1	5.3	0.7	100.0
	1991	36.0	40.8	0.7	7.5	10.2	4.1	0.7	100.0
others	1981	30.6	34.3	0.6	2.6	16.8	14.9	0.2	100.0
	1991	35.0	38.2	0.2	2.6	12.7	11.0	0.2	100.0
all households	1981	32.4	35.6	0.8	5.0	15.1	10.6	0.4	100.0
	1991	35.5	39.3	0.4	4.8	11.6	7.9	0.4	100.0

4.1.4 In rural areas, among other items of assets, to be henceforth referred to as other assets, a few groups have been made based on some commonality in the nature of underlying assets. Formation of such groups was required since the share of individual items of assets comprising such a group was not substantial enough to merit individual attention. For example, machinery equipments group comprised three items of assets viz., 'agricultural machinery etc.', 'non-farm business equipments' and 'all transport equipments', all of which are in the nature of capital goods. Another case in point is the financial assets group which consisted of two items in the nature of financial assets - shares and other financial assets. However, it is the individual item viz. household durables that took the pride of place among the constituents of other assets in 1981 and 1991. In fact, this item is found to have improved its relative position among such items since it had only the second highest share among such items/groups in 1971. Its share is seen to range from 4.6% to 7.1%, which reached a peak in 1981 but is found to have declined somewhat since then, to settle at 5.9% in 1991 (Figure 3).

4.1.5 Among the remaining four constituents under the "other assets", 'machinery & equipment' group and 'livestock' appear to be more important. Of these, the share of livestock seems to be steadily going down since the '70s, from 6.5% in 1971 to 5.0% in 1981 and then falling further down to 3.4% in 1991. The picture is just the reverse, although on a much muted scale, for the 'machinery & equipment' group. The share of this group rose from 2.7% in 1971 to 3.7% in 1981 and then marginally to 3.8% in 1991. The share of the remaining two viz., financial assets and dues re-ceived are too small throughout 1971 to 1991 to justify any separate attention.

4.1.6 A look at the pattern of change over the period 1971 to 1991, separately for *cultivator*

and *non-cultivator* households in Table 10, reveals that they are similar nature for both the occupational categories. As regards the *cultivator* households, their item-specific shares seem to be almost identical over the entire period. The item-specific values of the shares for *cultivator* households are very close to those for all rural households in each of the survey years.

4.1.7 The scene, however, is quite different in the case of *non-cultivator* households. For them, the item-specific pattern and values of shares are found to be at a marked variance for most items from all the rural households in any of the survey years. For *non-cultivator* households, the percentage share of 'buildings etc.' ranged between 38% to 40% between 1971 to 1991, which was nearly double the value of share of 'buildings etc.' for *cultivator* households, (about 17% to 19%) during this period. As could be expected, the share of 'land' was much less for *non-cultivator* households. It hovered around 31% to 32%, which was less than half the value of share corresponding to the *cultivator* households (64% to 69%) during 1971 to 1981. However, in the decade ending 1991, this share is found to have increased to 40%. Thus, while land and building continue to be the two key components among different items of assets in the *non-cultivator* households, their combined share was to the tune of 70% to 72% till 1981. This value is found to have increased to about 77% in 1991 but it still fell much short of the almost 85% share commanded by "land" and "buildings" for *cultivator* households throughout the period.

4.1.8 Among the 'other assets' for *non-cultivator* households, during 1971 to 1991, the share of financial assets hovered at about 5% while that of household durables varied between 11% to 16%. During the same period, the values of shares of these two constituents are seen to be much less in the *cultivator* households. These are observed to be in the range of 4% to 7% for

Figure 3
Composition of assets holding of rural household in 1971, 1981 and 1991

household durables and a meagre 1% for financial assets respectively. It is worth noting that *non-cultivators* include professionals, traders, money-lenders etc. and their larger share of buildings, household durables and financial assets than *cultivators* perhaps reflects this fact.

4.1.9 During 1981 to 1991, the percentage distribution of the shares of different items of assets in urban areas is found to be more or less similar to that of *non-cultivator* households in the rural areas with the exception of financial assets, livestock and to an extent, machinery & equipments. The financial assets appear to be of comparatively greater importance with a share of 8% to 11% in urban areas compared to about 5% for *non-cultivator* households. On the other hand, the share of livestock was only one-half to less than 1% in the urban areas as against 3% to 5% for the *non-cultivator* households in the rural areas. The share of machinery & equipment was about 5% for the urban households which was some-what more than its share of about 3.5% for the *non-cultivator* households in 1981 and 1991.

4.1.10 As seen from Table 10, in the urban areas, both *self-employed* and *other* urban households appear to be more or less equally affected by the change in shares for different items of assets over the two decades ending 1991. An increase (between 1.5% to 4%) is noticed for land and buildings and a decrease (between 1.2% to 4%) for financial assets and household durables is observed during this period. Little or no change in share is seen to occur in the remaining items/groups during this period. Further, within the urban sector, not much variation in the share of different items of assets to the total assets is noticed between the *self-employed* and other urban households except for two constituents. This is true for both 1981 and 1991. For the items categorised under 'machinery, equipments etc.', as expected, the share for *self-employed* households (8%) was found to be much higher than that for the other urban households (2.6%). As regards the group

'financial assets', it was found to command a much larger share (15% and 11% respectively in 1981 and 1991) in the assets holding of other urban households than among *self-employed* households (5% and 4% respectively in 1981 and 1991). (See Figure 4).

4.2 Inter-state variation: rural areas

4.2.1 Land and building: As seen from Table 11, in the rural areas, land, with 64% share at the national level, is clearly the predominant component for all the major states. In fact, its share is seen to be close to 75% in Punjab and Haryana and exceeds 50% for all but a handful of states, such as Gujarat, Himachal Pradesh and Tamil Nadu. But even in these few states the share found to be at least 45%.

Table 11
Percentage shares of land and building in total assets of rural households as on 30.6.91

state	percentage share			
	land	building	others	all
Andhra Pradesh	63	21	16	100
Assam	58	22	20	100
Bihar	70	20	10	100
Gujarat	45	30	25	100
Harayana	78	12	10	100
Himachal Pradesh	46	36	18	100
Jammu & Kashmir	56	27	17	100
Karnataka	60	25	15	100
Kerala	55	30	15	100
Madhya Pradesh	69	17	14	100
Maharashtra	65	18	17	100
Orissa	55	25	20	100
Punjab	73	16	11	100
Rajasthan	63	21	16	100
Tamil Nadu	49	29	22	100

West Bengal	58	28	14	100
India	64	21	15	100

Figure 4
Comparison of assets holding of Urban households in 1981 and 1991

4.2.2 "Building etc.", which accounted for a 21% share at the national level, is found to be the second most important component for all the major states presented in Table 11. Of these states, the share- of "building etc." was seen to exceed 35% for Himachal Pradesh, and was about 30% in Gujarat, Kerala and Tamil Nadu. In the remaining states, it was seen to account for more than a sixth of the total rural assets in the state, with the exception of Haryana and Punjab, where this share was found to be 12% & 16% respectively. This should cause no consternation since these are the very states where the share for land was nearly 75%.

4.2.3 *Other assets*: All other items of assets *other* than land and buildings, taken together, was seen to account for about 15% of the assets of rural households at the national level. However, these items were found to account for a relatively high share of 25% in Gujarat, 22% in Tamil Nadu and 20% each in Assam and Orissa, and a relatively low share of 11% in Punjab and 10% each in Bihar and Haryana. Incidentally, the last mentioned states are those where the share of land was found to be very high (at least 70%). Since, in quite a number of states, the absolute shares for a number of such items were found individually to be too small,

Table 12

Percentage shares (NLB) of different components of "other assets" in the total value of "other assets" of rural households as on 30.6.91

state	NLB shares (%)						% share	
	livestock & poultry	agricultural machinery	non-farm business equipment	transport equipment	household durables	financial assets	all	of other assets
Andhra Pradesh	26	12	3	9	45	6	100	16
Assam	33	3	2	5	42	15	100	20
Bihar	31	11	1	9	41	7	100	10
Gujarat	26	11	2	8	44	8	100	25
Haryana	27	38	1	5	26	3	100	10
Himachal Pradesh	19	3	3	5	53	16	100	18
Jammu & Kashmir	29	4	2	4	48	13	100	17
Karnataka	22	15	3	8	43	8	100	15
Kerala	3	2	2	7	70	15	100	15
Madhya Pradesh	34	20	2	9	28	7	100	14
Maharashtra	23	12	4	12	35	14	100	17
Orissa	20	4	2	8	33	33	100	20
Punjab	18	35	1	10	28	8	100	11
Rajasthan	25	19	2	7	43	4	100	16
Tamil Nadu	11	11	4	6	57	11	100	22
Uttar Pradesh	27	22	1	10	35	6	100	12
West Bengal	25	9	4	8	42	13	100	14
India	24	16	2	8	41	9	100	15

for each of these "other assets", their shares in the value of other assets have been presented in Table 12. These shares are hereafter referred to as NLB shares, indicating that these refer to shares in "other assets", i.e., assets excluding land and building. Shares of some items such as 'shares' and 'dues receivable' were found to be negligible or very low. Such items have therefore been merged with 'other financial assets' and a generic title 'financial assets' has been given to the conglomeration of all these items.

4.2.4 Table 12 shows that among the 'other assets', the most important item for almost all the important states was household durables which had a NLB share of 40% at the national level. Kerala (70%) and Tamil Nadu (57%) are seen to enjoy more NLB share of household durables than the national average while Haryana (26%) and Punjab and Madhya Pradesh (28% each) had much lower shares. In terms of absolute share, Tamil Nadu with a value of about 12.5% is found to have the largest value among all the states. The lower values of Haryana and Punjab were only to be expected in view of the very high absolute shares for land and building commanded by them. The explanation for Madhya Pradesh appears to lie in the fact that it had relatively high NLB share (34%) in livestock which was the second most important item among 'other assets' at the national level. Other states showing a relatively high NLB share of livestock were Assam, Bihar and Jammu & Kashmir with NLB shares of 33%, 31% and 29% respectively. In terms of absolute share of livestock in total assets as well, Assam, with a value of 6.5%, is found to top among all the states. Kerala, with 3% NLB share and about 0.45% of absolute share, is seen at the bottom. This should come as little wonder, since, as seen above, Kerala had the largest NLB share (70%) in household durables -- a value which is nearly equal to the sum of NLB shares for household durables and 'livestock' for most of the states.

4.2.5 'Agricultural machinery' is an item among 'other assets' which come next in importance to livestock at the national level. With its NLB share of 16% at the national level -- somewhat less than 24% for livestock -- its position is third from top among "other assets" in many states. As per expectation, Punjab (35%) and Haryana (38%), the most agriculturally prosperous states, stand head and shoulders above all the other states in the NLB share of agricultural machinery. Moreover, in states like Kerala, Assam, Orissa, Himachal Pradesh and Jammu & Kashmir where agricultural machinery is much less in use, the NLB share of agricultural machinery is almost negligible. The values for these states were found to lie between 2% to 4%.

4.2.6 The remaining items of assets seem to have little importance at the national level, since their combined share in total assets was less than 3% among all rural households. Even the NLB shares for them were found to be more or less uniform across the states, except for the 'financial assets' group. For 'non-farm business', it was found to range between a paltry 1% to 4%, while for 'transport equipments' it ranged mostly between 5% to 9%. For the 'financial assets' group, the NLB share appear to have varied a little more across the states, with most values falling within a range of 7% to 15%. Orissa was the only state to show outstandingly large NLB share (33%) for this group. Its NLB share of 33% is equivalent to about 6.5% absolute share in total assets. This is quite a respectable figure considering the fact that the all-India absolute share for this group stood at a paltry 1.35%.

4.3 Inter-state variation: urban areas

4.3.1 *Land and building:* A look at Table 13 for the urban areas reveals that, at the national level, 'buildings' is the largest component among all the items at the national level. In fact, it has

Table 13
Percentage shares of land and building in total assets of urban households as on 30.6.91

state	percentage share			all
	land	building	others	
Andhra Pradesh	35	35	30	100
Assam	45	27	28	100
Bihar	45	31	24	100
Gujarat	22	46	32	100
Harayana	42	39	19	100
Himachal Pradesh	43	33	24	100
Jammu & Kashmir	36	41	23	100
Karnataka	34	39	27	100
Kerala	47	31	22	100
Madhya Pradesh	38	36	26	100
Maharashtra	18	55	27	100
Orissa	29	29	42	100
Punjab	41	39	20	100
Rajasthan	35	40	25	100
Tamil Nadu	41	29	30	100
Uttar Pradesh	42	40	18	100
West Bengal	31	41	28	100
Delhi	50	31	19	100
India	36	39	25	100

pushed land to the second place in order of importance (i.e. shares in assets) in 1991. The lead in share is indeed marginal -- 39% for 'buildings' to 36% for 'land'. However, a look into the state-level shares exposes how tenuous is this lead. In as many as 10 out of the 18 major states being considered, land is found to be the leading component, with the shares being equal in 2 other states. Thus, in only 6 out of the 18 major states, 'building' was the top ranker.

Of these, in Maharashtra and Gujarat, while the share of 'building' standing at 55% and 46% respectively, were considerably more than the all-India figure of 39%, the share of land, standing at 18% and 22% respectively, were significantly the least values, among all states, for land. Interestingly, these happen to be the two most industrially advanced states in India. In Delhi, whose urban part comprise mostly the city and its suburbs, as expected, land is found to have the highest share, viz. 50%, which was much more than any other state. Kerala also has a high share in land -- about 47%. Comparatively low shares of 'buildings' are seen for Assam (27%), Tamil Nadu (29%) and Orissa (29%).

4.3.2 *Other assets*: Table 13 reveals that Orissa occupies a unique position among the states. Its share for each of the items -- land and building -- was comparatively at a lowly level of 29%. Consequently its share for the "other assets" stood at 42%. This figure is far more than the national average of 25%, and much higher than any other state in this respect. Gujarat, ranking just below it, in terms of share of other assets is seen to report only 32%. For reasons stated earlier while discussing the rural areas, the NLB shares of individual items under "other assets" are presented in Table 14.

4.3.3 The item 'household durables' and the group 'financial assets' matter the most among 'other assets'. The NLB shares of these two constituents of other assets were found to stand at 46% and 33% respectively. Of these, for household durables the NLB share for most states were found to hover between 37% to 50%. However, this value was found to be a high 61% for Kerala and Jammu & Kashmir, and 53% for Andhra Pradesh. For this item, however, in terms of absolute share, Andhra Pradesh, commanding about 16% of it, was found to be at the top of the league, followed closely by Orissa with an absolute share of 15.5%.

Table 14

Percentage shares (NLB) of different components of "other assets" in the total value of "other assets" of urban households as on 30.6.91

state	NLB shares (%)						
	livestock & poultry	agricultural machinery	non-farm business equipment	transport equipment	household durables	financial assets	all
Andhra Pradesh	1	1	6	11	53	28	100
Assam	2	0	3	14	45	36	100
Bihar	3	1	3	10	35	47	100
Gujarat	1	0	8	9	44	37	100
Harayana	3	2	8	9	50	28	100
Himachal Pradesh	2	1	1	9	46	40	100
Jammu & Kashmir	2	0	4	7	61	25	100
Karnataka	2	1	5	13	49	30	100
Kerala	1	1	4	9	61	26	100
Madhya Pradesh	2	3	6	15	38	35	100
Maharashtra	1	1	7	9	42	40	100
Orissa	2	0	2	24	37	35	100
Punjab	2	2	8	19	37	32	100
Rajasthan	3	2	3	17	46	29	100
Tamil Nadu	1	0	6	12	56	25	100
Uttar Pradesh	4	2	5	20	43	25	100
West Bengal	1	0	4	6	46	42	100
Delhi	0	0	9	9	43	38	100
India	2	1	6	12	46	33	100

4.3.4 For the group 'financial assets', the NLB shares were found to hover in the range of 28% to 40% for most of the states. For some states like Bihar (47%) and West Bengal (42%), the NLB share for this item were found to be above this range, while for Uttar Pradesh, Tamilnad Nadu and Jammu & Kashmir -- each showing 25% for this group -- were seen to be in the lowest rung. However, in terms of absolute share for 'financial assets', Bihar with about 11%, falls below Orissa (15%) and even Gujarat (about 12%), since the share for "other assets"

as a whole of these two states, are among the highest within all states as noted earlier.

4.3.5 Of the remaining constituents under other assets, 'transport equipments etc.' with a NLB share of about 12% at the national level may be regarded as next in importance to the 'financial assets' group. For most of the states, this NLB share was found to fall within the range 7% to 17% with Orissa(24%) and Uttar Pradesh(20%) surfacing at the top. In absolute terms, Orissa with a share exceeding 10% shows

that although the item 'transport equipment etc.', is almost insignificant at the national level (its absolute share being 3% for all urban households), it is an important constituent of 'other assets' at least among urban households of Orissa.

4.3.6 The remaining three items, viz., 'livestock', 'agricultural machinery' & 'non-farm business equipments' are found to be insignificant at the national, as well as, the state level. With their NLB shares standing at 2%, 1% and 6% respectively at the national level, they together are seen to account for less than 3% share of all assets of the urban households. Not much state-wise variation in the NLB shares is observable for either of these items. As such, in all states, all these items appear to have an insignificant absolute share.

5. SIZE DISTRIBUTION OF HOUSEHOLD ASSETS HOLDINGS

5.1.1 The relative importance of different categories of households at the all-India level can be studied with the help of their distribution

in various asset groups. Tables 15 & 16 give the percentage distribution of households over household asset holding by occupational categories, separately for rural and urban areas, at all-India level in 1991.

5.2 Rural Households

5.2.1 In the rural areas, it is seen that 7.5 % of the households own assets as low as Rs. 5000 or even less, valued at 1991 prices. Another 7.4 % belong to the asset group of Rs. 5000 - 10000. Thus, in 1991, less than one-sixth of the rural households are seen to own assets worth Rs. 10,000 or less. At the other end of the spectrum lie 28% of rural households who own assets worth Rupees one lakh and more. The remaining 57% are found to be distributed in the middle five asset groups ranging between Rupees ten thousand to one lakh.

5.2.2 Among the different categories, cultivators, numerically the most dominant type in the rural areas, are found to be more prosperous than *non-cultivators*. The value of total assets per *cultivator* household is found

Table 15
Percentage distribution of rural households by household asset holding for each occupational category as on 30.6.91

occupational category	household asset holding (Rs. 000)										
	less than 5	5 - 10	10 - 20	20 - 30	30 - 50	50 - 70	70 - 100	100 - 150	150 - 250	250 & above	all classes
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
cultivator	1.1	2.9	7.5	8.5	15.7	12.2	13.4	12.7	12.3	13.6	100.0
non-cultivator:											
agr. labour	23.9	22.9	26.0	10.9	9.8	3.2	1.8	0.8	0.5	0.1	100.0
artisan	19.3	12.5	17.4	13.6	16.0	7.6	6.7	4.1	2.4	0.4	100.0
others	16.4	11.1	17.2	10.7	12.8	9.4	7.8	6.1	4.8	3.7	100.0
total	19.9	16.2	21.0	11.1	11.9	6.6	5.1	3.7	2.7	1.8	100.0
all	7.5	7.4	12.1	9.4	14.4	10.3	10.6	9.7	9.1	9.6	100.0

to be Rs. 1.4 lakh, which is about 4 times the average value of total assets (Rs. 0.4 lakh) held by the *non-cultivator* households (see Table 5). However, among the cultivator households, there were some marginal cultivators belonging to the lowest two asset holding groups of less than Rs. 5,000 and Rs. 5,000 to 10,000. They are seen to constitute 1.1% and 2.9% of the total cultivator households. It may be noted in this context that some of these households might have been classified as cultivator households by virtue of their operating a small piece of land, although their main source of income could have come from a source other than cultivation.

5.2.3 *The non-cultivators*, who comprise 34% of the rural households (see Table 2), are seen to account for only 12% of the total assets owned by all households in the rural areas. Further, the pattern of asset holding reflects the sad plight of the *non-cultivator* households. As high as 36% of the *non-cultivators*, are seen to own assets worth only Rs. 10,000 or less. Among the different categories of *non-cultivator* households, the condition of the *agricultural* labour households appears to be the worst. A high 24% of them fall in the lowest asset group of Rs. 5,000 or less, with yet another 23% of them belonging to the asset

Table 16
Percentage distribution of urban households by household asset holding for each occupational category as on 30.6.91

occupational category	household asset holding (Rs. 000)										
	less than 5	5 - 10	10 - 20	20 - 30	30 - 50	50 - 70	70 - 100	100 - 150	150 - 250	250 & above	all classes

clerical etc.	0.2	14.0	8.0	9.1	6.2	12.2	10.0	17.1	10.4	12.7	100.0
sales workers	13.4	4.5	10.2	5.6	7.9	7.6	9.2	9.7	12.8	19.1	100.0
service workers	15.0	10.7	10.6	7.4	11.3	5.5	9.0	16.6	9.9	4.0	100.0
farmers etc.	2.3	1.6	3.1	5.0	7.5	3.3	7.7	17.1	18.2	34.2	100.0
<i>prod. workers etc.</i>	15.3	6.5	11.4	8.0	13.7	9.5	10.2	8.9	7.9	8.7	100.0
others	8.3	3.8	0.2	29.8	0.2	12.3	6.5	1.5	10.3	27.1	100.0
total	11.8	5.1	8.9	6.5	9.6	7.9	9.0	10.8	11.5	18.9	100.0
<i>others:</i>											
regular	13.5	6.4	8.3	7.5	11.5	8.6	9.1	10.9	9.9	14.2	100.0
casual	35.0	8.1	14.1	10.3	11.0	7.4	4.8	4.2	3.2	1.9	100.0
others	33.3	5.3	8.0	3.3	5.5	6.1	5.5	8.5	8.8	15.7	100.0
total	21.4	6.6	9.5	7.5	10.4	8.0	7.6	9.0	8.3	11.8	100.0
all households	18.1	6.1	9.3	7.1	10.1	8.0	8.0	9.6	9.4	14.2	100.0

group Rs. 5,000-10,000. However, the condition of the *artisans*, who are found to constitute only 3.8% of all rural households, appear to be a little better than that of the *agricultural labourers*. About 32% of the *artisan* households -- far less than 47% of the *agricultural labourers* -- belong to the asset group of up to Rs. 10,000. The status of *other non-cultivator* households, i.e., households other than *agricultural labour* and *artisan*, appear to be marginally better than the earlier two types of households. About 16% and 11% of these 'other' rural households fall in the asset groups less than Rs. 5,000 and Rs. 5,000-10,000 respectively. It may be noted that 15% of the rural households -- *cultivators* and *non-cultivators* -- own assets worth less than Rs. 10,000.

5.3 Urban Households

5.3.1 It is seen from Table 16 that in the urban areas, the percentages of households in the two terminal groups of the size-distribution of asset holding are found to be far more than those in the rural areas. However, in most of the middle groups the percentages are more in the rural areas. The percentage of urban households owning a meagre amount of less than Rs. 5,000 worth of assets is found to be 18% in 1991, which is about two and a half times the percentage of rural households falling in the same asset group. At the *other* end of the size bracket of asset holding of Rupees one lakh and above, the concentration of urban households is considerably more than that of the rural households. The percentage of households in this upper extreme group is seen to be 33% in the urban sector against 28% in the rural areas.

5.3.2 The percentage of urban households falling in the asset groups up to Rs. 10,000 is found to be less among the *self-employed* than for the other urban households. Between the two categories of households, the *self-employed*

are seen to exhibit a better performance in the sense that the average value of total assets per *self-employed* household is much higher (about Rs. 1.9 lakhs) than that for the *non-self* employed households. In fact, the self employed households, comprising 34 % of all urban households are seen to own about 45 per cent of the total urban assets.

5.3.3 Among the *self-employed*, the condition of those who were engaged as "service workers" and "production workers etc." is found to be far worse than that of the rest of the *self-employed* households in respect of asset holding. The pattern of asset holding of these households is found to be more akin to that of the *other* urban households. While between 5% to 27 % of house-holds are reported in the asset group of Rs. 10,000 or less for different self employed groups, the maximum percentage is reported by the category of households under "service workers" (27 %), followed by the group of 'production workers' (22%). Interestingly, the 'farmers' in the urban areas appear to be one of the most prosperous classes in terms of the accumulated value of assets owned by them. For the farmers, the percentage of households is found to be the lowest in the bottom three asset groups and again the highest in the top three asset groups except in the top group of Rs. 2.5 lakh & above, where it is found to closely follow the group 'professional, technical etc.' Although application of the criterion of overall higher value of assets per household would rank the two groups 'professionals etc.' and 'administrative etc.' higher than the 'farmers', these two groups are found to be more preponderant in almost all the lower four asset groups up to Rs. 30,000 than the farmers. However, higher incidence in the highest asset group and a middle group (Rs. 50 to 70 thousand) for these two occupational categories over the "farmers" appear to have tilted the overall balance in their favour.

6. HOUSEHOLD INDEBTEDNESS

6.1.1 As stated earlier, this report also gives the basic estimates on the indebtedness of the households in terms of cash loan outstanding on 30.6.91. It may be noted that like most of the NSS estimates, these are based on information collected through the interview method and hence, in fact, refer to "reported indebtedness". The percentage of the indebted households, representing incidence of indebtedness (IOI), average amount of debt (AOD) per household and 'debt-asset' ratio for the rural and urban areas of India are presented in Table 17. The results of the 48th round survey show that at the all-India level on 30.6.91, the IOI for all households was about 23% in the rural areas and 19% in the urban areas. The AOD per household was seen to be much less in the rural sector than in the urban, the values being Rs. 1,906 and Rs. 3,618 respectively.

6.1.2 At any point of time, the outstanding debt of a household is potentially a charge upon its assets -- whether or not these are mortgaged or hypothecated to a person or an agency. For a given group of households, a question naturally arises -- how was the debt outstanding for them related to their assets on any given date? A study of the 'debt-asset' ratio is likely to provide an answer to this query. The 'debt-asset' ratio is defined as the average amount of debt outstanding on a given date for a group of households expressed as a percentage of the average amount of assets owned by them on the given date. Thus, this ratio reflects the burden of debt on any particular group of households on a given date. As on 30.6.91, the 'debt-asset' ratio at the all-India level was found to be 2.5% for urban areas and 1.8% in the rural areas. Thus on 30.6.91, it appears that urban India was more burdened by debt than the countryside.

Table 17
Incidence of indebtedness (IOI), Average amount of debt (AOD) and debt-asset ratio of rural and urban households as on 30.6.91

item	rural	urban
IOI	23.4%	19.3%
AOD(Rs.)	1,906	3,618
average assets (Rs.)	1,07,007	1,44,330
debt-asset ratio	1.78%	2.51%

6.2 Indebtedness of rural households

6.2.1 The IOI and AOD for the rural households of different occupational categories for the major states are presented in Table 18. The table shows a wide variation in both IOI and AOD over the occupational categories and states for the rural households as on 30.6.91.

6.2.2 *State-wise IOI:* Among the states in rural India, in 1991, the highest IOI is noticed in Andhra Pradesh (35%) followed by Kerala (31%), Rajasthan (30%) and Tamil Nadu (30%). Assam (6%) and Jammu & Kashmir (14%) are found to report very low IOI.

6.2.3 *State-wise AOD:* As regards the AOD, the two agriculturally prosperous states -- Haryana and Punjab -- show the two top values of Rs.4,397 and Rs.4,129 in the rural areas. On the *other* hand, the lower values for these averages are observed in many of the states of the eastern region. For example, this average values for Assam, Bihar and Orissa are lows of Rs.252, Rs.632 and Rs.1,054 respectively.

6.2.4 *Occupational categories:* Within the rural sector, indebtedness is found to be more

Table 18

Incidence of Indebtedness (IOI) and Average debt per household (AOD) for different occupational categories of major states as on 30.6.91

state	Rural					
	IOI (%)			AOD (Rs.)		
	cultivator	non-cultivator	all	cultivator	non-cultivator	all
Andhra Pradesh	39.9	27.8	34.6	3287	1755	2609
Assam	6.5	5.4	6.2	248	262	252
Bihar	17.2	14.0	16.2	712	447	632
Gujarat	21.4	9.1	16.5	2460	487	1678
Haryana	28.4	26.8	27.7	5486	2934	4397
Himachal Pradesh	21.8	20.1	21.5	1212	1227	1214
Jammu Kashmir	14.8	8.8	14.0	1151	768	1099
Karnataka	33.1	17.0	28.1	3244	931	2535
Kerala	32.8	23.5	30.7	3857	1910	3432
Madhya Pradesh	22.2	17.5	20.8	1961	699	1593
Maharashtra	29.0	12.5	22.4	2890	988	2133
Orissa	27.9	13.2	23.3	1367	374	1054
Punjab	30.0	21.4	25.1	7125	1803	4129
Rajasthan	31.3	25.4	30.2	3797	2629	3568
Tamil Nadu	38.8	22.4	29.6	3785	1420	2457
Uttar Pradesh	19.2	18.1	18.9	1654	956	1489
West Bengal	30.7	18.2	26.3	1543	960	1340
India	25.9	18.5	23.4	2294	1151	1906

widespread among the *cultivator* households than among their *non-cultivator* counterparts in all the states. At the all-India level, 26% and 19% among the *cultivator* and *non-cultivators* households respectively, are indebted. Also, compared to the *cultivator* households, the AOD is observed to be much less among the *non-cultivators*. Assam and Himachal Pradesh were exceptions, where the AOD for *non-cultivators* marginally exceeded that for *cultivators*. At the all-India level, AOD among *cultivator* and *non-cultivator* households are found to stand at Rs. 2,294 and Rs. 1,151 respectively on 30.6.91.

6.3 Indebtedness of urban households

6.3.1 Table 19 gives the IOI and AOD for urban households of different occupational categories of the major states as on 30.6.91.

6.3.2 *State-wise IOI*: Kerala (32%), Andhra Pradesh (31%), and Tamil Nadu (25%) are seen to top the list for extent of indebtedness in the urban sector also. Even in this sector, Assam (6%), is at the bottom rung, being closely accompanied by Bihar (8%), Jammu & Kashmir (9%) and Haryana (10%).

Table 19

Incidence of Indebtedness (IOI) and Average debt per household (AOD) for different occupational categories of major states as on 30.6.91.

states	IOI (%)			AOD (Rs.)		
	self-employed	others	all	self-employed	others	all
	Urban					
Andhra Pradesh	32.1	30.4	31.1	4759	4609	4665
Assam	10.6	3.0	6.2	4033	394	1913
Bihar	11.5	6.4	8.4	1862	795	1211
Gujarat	25.3	20.1	21.9	5503	3087	3920
Haryana	9.7	9.5	9.6	1335	2131	1760
Himachal Pradesh	17.6	14.5	15.5	2764	2237	2408
Jammu Kashmir	13.3	7.2	8.9	3909	812	1686
Karnataka	20.6	20.0	20.2	5648	3670	4247
Kerala	35.4	30.0	31.9	5435	5043	5178
Madhya Pradesh	15.6	13.3	14.0	2420	2063	2166
Maharashtra	20.1	21.7	21.3	4662	3874	4103
Orissa	22.6	10.9	14.7	3606	2212	2662
Punjab	16.4	12.9	14.4	6503	4092	5133
Rajasthan	16.6	13.2	14.3	2978	2745	2813
Tamil Nadu	22.3	26.4	25.0	5551	5459	5447
Uttar Pradesh	18.2	10.2	14.0	2483	1358	1915
West Bengal	14.3	18.5	17.1	1504	2020	1847
Delhi	22.0	15.9	17.7	20911	2225	7947
India	19.9	18.9	19.3	4434	3198	3618

6.3.3 *State-wise AOD*: In the urban sector, among the states, Delhi shows the highest value of AOD (Rs.7,947), followed by Tamil Nadu (Rs.5,447), Kerala (Rs.5,178), and Punjab (Rs.5,133) whereas Bihar, Jammu & Kashmir and Haryana are at the bottom league with average values of Rs. 1,211, Rs.1,686 and Rs. 1,760 respectively.

6.3.4 *Occupational categories*: In the urban sector, the values of IOI among the self-employed and that for the *other* urban households are seen to be more or less of the same order. However, the AOD of the *self-employed* is more by 40% than the corresponding value

for non *self-employed* households at the national level. However, wide variation is noticed among the states both in the case of IOI and AOD. While the spread of indebtedness is more among the *other* urban households in Maharashtra, Tamil Nadu and West Bengal, IOI is more among the *self-employed* households in the remaining major states. As regards AOD, Haryana, and West Bengal are the two exceptions which report higher averages for the '*other* households', while in the remaining major states, the averages are higher for the *self-employed* households. For Delhi and Assam, average for self-employed is nearly ten times -- and for Jammu & Kashmir, it is 5 times -- the

corresponding average for other urban households in the respective states. However, for most of the *other* states, relatively speaking, AOD for *self-employed* is not that high compared to the AOD value for *other* urban households.

6.4 Changes in household indebtedness

6.4.1 Rural households: The comparison of the present survey results with those of AIDIS-71 and AIDIS-81 are given in Table 20³. The table shows that IOI at all-India level in 1991 has somewhat increased over 1981 estimate in the rural areas, from 20% to 23%. However

the 1991 estimate is still far lower than the 1971 estimate of 43%. However, the state-wise pattern of the incidence of indebtedness has remained more or less the same since 1981. States like Andhra Pradesh, Kerala, Tamil Nadu and Rajasthan continue to be among the most indebted ones while Assam and Haryana among the least indebted lot in 1991 also. There appears to be no significant change in the state-wise pattern of indebtedness over the 80s which was strongly noticeable during the 70s. For example, Kerala was 2nd from bottom while J & K was at 6th from top in 1971. The relative positions changed drastically in 1981 when Kerala stood at second from top and Jammu & Kashmir at second from bottom.

Source: As for Table 1

³ In earlier rounds, 'other liabilities' were also included in the 'debt' of a household, over and above cash loans taken by it. To that extent, this exercise in comparison over different rounds suffers, as the earlier figures on the incidence and amount of indebtedness are strictly not comparable with those of 1991.

6.4.2 *Urban households*: Table 21 compares the estimates of percentage of indebted urban households of AIDIS-91 and AIDIS-81 rounds. The comparison is limited between the current round (1991) and the earlier one (1981) since survey results of NSS 26th round (1971) were not published. The percentage of indebted households is found to have made a marginal increase in 1991 to 19.3% from 17.4% in 1981 at the all-India level. However, the pattern of inter-state variation of indebtedness is seen to have remained almost the same as in 1981. Kerala, Tamil Nadu and Andhra Pradesh remain among the most indebted, while Assam, Bihar and Jammu & Kashmir among the least indebted states - be it 1981 or 1991.

6.5 Changes in 'debt-asset' ratio of rural households

6.5.1 Table 22 shows the changes in IOI and 'debt-asset' ratio of different occupational categories of rural households. It is seen that like the average value of total assets, the average amount of debt per household has increased significantly in the rural areas during the two decades ending 1991. The average amount of debt per household was reported as Rs. 1,906

in 1991 against Rs. 661 in 1981 and Rs. 500 in 1971. However, during 1971 to 1981, the increase in the total aggregate debt was less than proportionate to the increase in the aggregate value of total assets and therefore the debt-asset ratio diminished considerably from 4.43% in 1971 to a mere 1.83% in 1981.

6.5.2 The 'debt-asset' ratio in respect of cultivators in 1971 and 1981 was more or less the same as that of all households. The 'debt-asset' ratio is found to be more for the non-cultivators than that of the cultivators. Hence, the burden of debt was more for non-cultivators than for cultivators during the 70s. However, the ratio decreased from 8.42% to 2.28% during this decade for non-cultivator households. The monograph entitled "Indebtedness of rural households and availability of institutional finance" published by Reserve Bank of India (1977) notes that the 'debt-asset' ratio in respect of cultivators declined from about 7% to 4% for the rural sector of the country as a whole between the year 1962 and 1971. Thus, it could perhaps be concluded that a diminishing trend in the burden of debt ('debt-asset' ratio) has been continuing over the two decades ending 1981.

Source: As for Table 1

6.5.3 The picture in the second decade (i.e. the decade ending 1991) under study was quite different from the one presented above. During the period 1981-91, for the rural sector as a whole, the 'debt-asset' ratio remained almost static -- it was 1.78% in 1991 compared to 1.83% in 1981. However, a look at the estimates separately by occupational categories shows that there has been a marginal fall in this ratio for cultivator households from 1.80% in 1981 to 1.61% in 1991 at the national level. A relatively larger increase for this ratio from 2.28% in 1981 to 3.01% in 1991 for non-cultivator households at the national

level is observed. Thus, the debt burden of the non-cultivators, after diminishing during the 70s, has shown a rise during the 80s. However, this burden has been decreasing uniformly since 1961 for cultivator households.

6.5.4 *Changes in inter-state variation:* A state-wise analysis for this ratio for cultivator households reveal that in most states it has fallen in the 80s. This fall was found, in general, to be marginal, except in a few states like Karnataka (3.89% in 1981, 2.38% in 1991) and Tamil Nadu (5.36% in 1981, 3.66% in 1991) where the fall is

Source: As for Table 2

worth noticing. As regards the non-cultivator households., 10 states show a rise and the remaining 7, a fall in the ratio. However, this rise and fall here was sharper than those observed for the cultivator households. Very sharp rise is noticed during 1981-91 for some states like Andhra Pradesh (3.94% in 1981, 9.69% in 1991), Haryana (0.97% in 1981, 4.91% in 1991) and West Bengal (1.79% in 1981, 3.95% in 1991). In contrast, relatively steep fall was noticeable during 1981-91 in states like Gujarat (4.06% in 1981, 1.12% in 1991) and Maharashtra (9.77% in 1981, 3.21% in 1991).

6.6 Changes in 'debt-asset' ratio of urban households

6.6.1 An analysis of 'debt-asset' ratio of the urban households yields some interesting results. Table 24 gives the 'debt-asset' ratio of different occupational groups of urban households for 1981 and 1991. The 'debt-asset'

ratio for the urban sector as a whole appears to have remained almost unchanged during the 80s -- hovering around 2.5% at the national level. During this period it was always found to be higher for the urban households than for the rural households.

6.6.2 The ratio was almost the same for 'self-employed' households and other urban households, the percentages being 2.66% and 2.44% respectively in 1981 and 2.34% and 2.64% respectively in 1991. Thus the self-employed households were found to bear almost an identical debt burden to other urban households throughout the decade ending 1991.

6.6.3 *Changes in inter-state variation:* A state-wise analysis in Table 25 shows that while rise or fall in this ratio has occurred across states over the decade ending 1991, such fluctuations have, by and large, been moderate. Considering urban households as a whole, during the 80s, no relatively sharp rise or fall in this ratio could

Source: As for Table 2

be noticed for any state. However, a few such cases are found to occur when households are considered separately by their occupational category. For example, when the category *self-employed* households are considered alone, sharp rise in this ratio relative to their 1981 values is noticeable for Delhi (2.32% in 1981, 6.01% in 1991) and Assam (0.96% in 1981,

2.65% in 1991). In contrast, a sharp fall in the ratio is observed for Rajasthan from 3.14% in 1981 to 1.40% in 1991 for *self-employed* households. Similarly, when other urban households are considered separately, a relatively sharp rise is observable in the states of Andhra Pradesh (2.88% in 1981, 5.45% in 1991) and Karnataka (2.08% in 1981, 3.96% in 1991).

Notes:

1. P = Per thousand distribution of households
A = Average value (Rs.) of assets per household
2. Figures for the 'mpce not recorded' category not shown separately.
3. Figures for the 'type not recorded' category, i.e. households not classified in any specified household type are not shown separately.

3.	औसत परिसम्पत्ति जोत	8
4.	परिवारिक परिसम्पत्तियों की जोतों का संघटन	13
5.	परिवारिक परिसम्पत्ति की जोतों का आकार वितरण	21
6.	परिवारिक ऋण ग्रस्तता	24

निष्कर्षों का सार

1.01. रा.प्र.स.सं का अखिल भारत ऋण और निवेश सर्वेक्षण पारिवारिक क्षेत्र को परिसम्पत्तियाँ, देयताएँ और पूंजीगत व्यय सम्बन्धी आंकड़ों का प्रमुख स्रोत है। वर्तमान रिपोर्ट में, परिवार की परिसम्पत्तियों का मूल्य और संघटन के बारे में सर्वेक्षण परिणाम और 30 जून, 1991 की स्थिति के अनुसार ऋणग्रस्तता और नकदी ऋणों की औसत राशि के अनुमान निहित हैं।

1.02. इस अध्याय में सर्वेक्षण के प्रमुख निष्कर्षों का सार प्रस्तुत किया गया है और राज्य और अखिल भारत स्तर पर परिवारों की परिसम्पत्तियों और बकाया नकद ऋणों से सम्बन्धित विशेषताओं पर चर्चा की गई है। चूंकि परिवारों की परिसम्पत्तियों और बकाया नकद ऋणों

के अनुमान परिवारों की भिन्न-भिन्न श्रेणियों द्वारा प्रस्तुत किया जाता है, इस लिए सबसे पहले ग्रामीण और शहरी क्षेत्रों में ऐसी श्रेणियों के अन्तर्गत आने वाले परिवारों के समानुपात को जाँच करना उचित होगा। विभिन्न सापेक्षों के अनुसार परिवार की परिसम्पत्ति जोतों में विभिन्नताओं पर कुछ विस्तार में चर्चा की जाती है। इसके बाद परिसम्पत्तियों के संघटन और परिसम्पत्तियों के आकार वितरण के बारे में स्पष्ट रूप से विस्तृत चर्चा की जाती है। अन्त में 30.6.1991 को बकाया नकद ऋणोंके संदर्भ में प्रति परिवार पारिवारिक ऋणग्रस्तता और औसत ऋण के बारे में संक्षिप्त चर्चा के साथ यह अध्याय समाप्त होता है।

8.2.2. 1991

व्यावसायिक श्रेणियाँ

2.0.1. इस दस्तावेज में सभी अनुमान परिवारों के भिन्न-भिन्न प्रकारों (इस अध्याय में व्यावसायिक श्रेणियाँ कहलाती हैं) के लिए अलग-अलग प्रस्तुत किए जाते हैं। इस उद्देश्य के लिए अध्याय में ग्रामीण और शहरी क्षेत्रों के लिए दो भिन्न-भिन्न वर्गीकरण प्रयोग किए गए हैं। निम्नलिखित पैराग्राफों में ग्रामीण और शहरी क्षेत्र के लिए अलग-अलग परिवारों की व्यावसायिक श्रेणियों से सम्बन्धित अनुमानों का सार दिया गया है।

2.1.1 ग्रामीण परिवारों की श्रेणियाँ :

ग्रामीण क्षेत्रों में परिवारों को मोटे तौर पर कृषक और गैर कृषक के रूप में वर्गीकृत किया गया। कृषक परिवारों को ऐसे परिवारों के रूप में परिभाषित किया गया जो कृषि वर्ष 1991-92 के दौरान कुछ भूमि (0.002 हेक्टेयर अथवा अधिक) जोतते हैं। ऐसे परिवार जिनके पास जोतने के लिए कोई भूमि नहीं है उन्हें गैर कृषक परिवार माना गया और उन्हें परिवार व्यावसायिक कोड के आधार पर (I) कृषि श्रमिक परिवार (II) कारीगर परिवार और (III) अन्य ग्रामीण परिवार के रूप में वर्गीकृत किया गया था, उपर्युक्त परिभाषाएं रा.प्र.स. के 37वें और 26 में अपनाई गई परिभाषाओं से भिन्न थी जो क्रमशः 1982 और कृषि वर्ष 1971-72 में आयोजित किए गए थे। उन सर्वेक्षणों में, कृषकों को 48वें दौर की परिभाषा की तरह परिभाषित किया गया था परन्तु गैर-कृषक परिवारों को वर्तमान सर्वेक्षण के लिए अपनाई गई परिभाषा से कुछ भिन्न व्यवसाय वाले परिवारों (सर्वेक्षण की तिथि से पूर्व के 365 दिनों के दौरान) के आय के मुख्य स्रोत पर आधारित उपर्युक्त तीन श्रेणियों में वर्गीकृत किया गया था।

2.1.2 सारणी 1, में मौजूदा सर्वेक्षण और अखिल भारत ऋण और निवेश सर्वेक्षण को दो पूर्ववर्ती दौरों से प्राप्त

भिन्न-भिन्न कृषक और गैर कृषक परिवारों की प्रतिशतता दर्शायी गई है रा.प्र.स. के 48वें दौर के परिणाम दर्शाते हैं कि 1991 में 66%, से अधिक कृषक परिवार और लगभग 14%, कृषि श्रमिक परिवार थे। केवल 3.8% कारीगर परिवार थे। यह भी माना जा सकता है ग्रामीण क्षेत्रों में गैर कृषक परिवार ऐसा हो सकता है जो परिवार कुछ लाभकारी कार्यकलाप अपना कर कुछ कृषकीय व्यवसायों से शारीरिक कामगारों के रूप में (कृषि श्रमिक) अथवा (अध्याय का पूरा 2.6.2 में सूचीबद्ध) अपने आप दक्षता प्राप्त कामगार विभिन्न कार्यकलाप (देखें अध्याय। का पैरा 8.6.2) कारीगर से कुछ धन से कम भूमि (अन्य) जोतते हैं।

सारणी - 1

व्यावसायिक श्रेणियों के अनुसार ग्रामीण परिवारों का प्रतिशत वितरण

परिवार	परिवारों की प्रतिशतता		
	1971 (26 वां)	1981 (37 वां)	1991 (48 वां)
को व्यावसायिक श्रेणी			
कृषक	72.4	76.3	66.1
गैर कृषक			
कृषि श्रमिक	14.6	11.3	14.2
कारीगर	2.4	1.6	3.8
अन्य	10.6	10.8	15.8
सभी गैर कृषक	27.6	23.7	33.9
सभी परिवार	100.0	100.0	100.0

26वें और 37वें दौरों के अनुमानों के स्रोत क्रमशः भारतीय रिजर्व बैंक (1976) और रा.प्र.सं. रिपोर्ट सं. 318

स्पष्ट शब्दों में परिवारों की संख्या के अनुमान अध्याय 1 के खंड 6 में लिखित चलित संदर्भ बिन्दु के संबंधित है। तथापि, चूंकि इस दस्तावेज के सभी अन्य अनुमान मौजूदा दौर के लिए 30.6.91 से संबंधित है। परिवारों की संख्या के अनुमानों के लिए 1991 को संदर्भ अवधि के रूप में दिया जाता है। यह परंपरा पूर्ववर्ती दौरों के लिए भी अपनाई गयी थी।

2.1.3 सारणी -1 में प्रस्तुत परिणाम दर्शाते हैं कि ग्रामीण भारत में 1991 में समाप्त हुए दशक के दौरान कृषक परिवारों के समानुपात में 10% प्वाइंट तक कमी हुई है यद्यपि पूर्ववर्ती दशक में इस समानुपात में लगभग 4 प्रतिशत प्वाइंट तक वृद्धि हुई थी। इस प्रकार, 1971 की तुलना में 1991 को समाप्त दो दशकों के दौरान इस समानुपात में लगभग 6 प्रतिशत प्वाइंट की कमी हुई है।

2.1.4 यह देखा जा सकता है कि रा.प्र.त. सं के सर्वेक्षण रोजगार और बेरोजगारी के आधार पर प्राप्त प्रमुख उद्योग के अनुसार परिवारों का प्रति हजार वितरण 1980 के दशक के दौरान कृषक परिवारों की प्रतिशतता में गिरावट की सीमा नहीं दर्शाता और यह उपर्युक्त सारणी से दिखाई पड़ता है। रा.प्र.स सं. के रोजगार और बेराजगारी सर्वेक्षणों में प्रमुख उद्योग के रूप में कृषि वाले परिवारों के प्रतिशत में 1983 से 1993-94 तक 73 से 71 दो प्रतिशत प्वाइंटों की गिरावट दर्ज की, ऐसा यह मानते हुए किया गया कि प्रमुख उद्योग श्रेणी अन्य के आधीन परिवारों का समानुपात अर्थात् किसी लाभकारी कार्यकलाप से कोई आय न प्राप्त करने वाले परिवार। 1983 से 1987-88 सर्वेक्षण, विशेषांक, सितंबर, 1980 पी पी 36-39 तक की अवधि में 4% पर स्थिर रहा। हालांकि, क्योंकि इस रिपोर्ट में प्रयोग की गई कृषक की परिभाषा और कृषि की परिभाषा जैसी रा प्र स सं के रोजगार और बेरोजगारी सर्वेक्षणों में प्रयोग की गई है। एक समान नहीं है। बाद का सर्वेक्षण परिवार के कार्यकलाप के क्षेत्र पर आधारित है जबकि पहले वाला संबंधित परिवार द्वारा जोती गई भूमि की सीमा पर आधारित है मौजूदा रिपोर्ट और रोजगार और बेरोजगारी के सर्वेक्षणों के निष्कर्ष तुलनीय नहीं है।

2.1.5 यह तथ्य कि मौजूदा दौर में अखिल भारत ऋण और निवेश सर्वेक्षण के लिए प्रत्येक चुने हुए गांव से ग्रामीण परिवारों का एक स्वतंत्र प्रतिदर्श चुना गया था, कृषक परिवारों के समानुपात के अनुमान में इस गिरावट के लिए उत्तरदायी हो सकता है। पूर्ववर्ती दौरों में, चूंकि भूमि जोत सर्वेक्षण और अखिल भारत ऋण और निवेश सर्वेक्षण दोनों समान परिवारों के सेट के लिए सर्वेक्षित किए गए थे, इसलिए भूमि जोत सर्वेक्षण में जुताई वाली जोतों के अभिनिर्धारण के लिए गहन अन्वेषणों के परिणामों को अखिल भारत ऋण और निवेश सर्वेक्षण के लिए भी प्रयोग किया जा सकता है। यह संभव लगता है कि ऐसा गहन अन्वेषण, 48वें दौर में अखिल भारत ऋण और निवेश सर्वेक्षण के लिए चुने गए ग्रामीण परिवारों के स्वतंत्र प्रतिदर्श पर किया जा सकता है।

2.1.6 गैर कृषक परिवारों में, प्रत्येक श्रेणी अर्थात् कृषि श्रमिक परिवार, कारीगर परिवार और अन्य ग्रामीण परिवारों के प्रतिशत में संदर्भाधीन अवधि के दौरान वृद्धि पाई गई। 1981 से 1991 तक की अवधि के दौरान जबकि गैर-कृषक परिवारों के समानुपात में समग्र वृद्धि लगभग 10 प्रतिशत प्वाइंट तक थी, फिर भी अन्य ग्रामीण परिवारों में लगभग 5 प्रतिशत प्वाइंटों की वृद्धि दर्ज हुई शेष 2 प्रतिशत प्वाइंट कारीगर परिवारों के लिए आंके गए। यह भी नोट किया जा सकता है कि यद्यपि व्यवसायों के आधार पर गैर कृषक परिवारों के अंतर्गत आने वाले विभिन्न परिवारों की किस्मों की परिभाषाएं 1991 में बदल दी गई थी, पूर्ववर्ती अखिल भारतीय ऋण और निवेश (1971 और 1981) में अपनाई गई परिभाषाओं से कुछ भिन्न है— प्रत्येक टाइप के अंतर्गत आने वाले परिवारों का प्रतिशत संपूर्ण अवधि के दौरान आयामी रूप से तुलनीय बना रहता है। उदाहरण के लिए कृषि श्रमिक परिवारों के समानुपात 1971 में 14.6%, 1981 में 11.3% और 1991 में 14.2% है, इसी प्रकार, कारीगर परिवारों के लिए यह समानुपात 1971 में 2.4%, 1981 में 1.6% और 1991 में 3.8% रहा।

2.2.1. शहरी परिवारों की श्रेणियां शहरी क्षेत्रों के लिए परिवारों को स्वनियोजित और अन्य के रूप में वर्गीकृत

किया गया है। इसके अतिरिक्त 'स्वनियोजित' परिवारों की व्यवसायों के राष्ट्रीय वर्गीकरण (1968) के निम्नलिखित व्यवसाय मंडलों के अनुसार सात प्रमुख व्यावसायिक समूहों में उप वर्गीकृत किया गया है। ये समूह निम्नलिखित हैं :-

1. व्यावसायिक, तकनीकी और संबद्ध कामगार
2. प्रशासनिक, कार्यकारी और प्रबन्धकीय कामगार
3. लिपिकीय और संबद्ध कामगार
4. बिक्री कामगार
5. सेवा कामगार
6. किसान, मछुआरे, शिकारी, लट्ठे बनाने वाले और संबद्ध कामगार
7. उत्पादन और संबद्ध कामगार, परिवहन संचालक और श्रमिक।

सारणी-2 मौजूदा सर्वेक्षण और 37वें दौर के अखिल भारत ऋण और निवेश सर्वेक्षण से प्राप्त व्यावसायिक श्रेणी के अनुसार परिवारों का प्रतिशत वितरण दर्शाती है। 1971 के आंकड़े सारणी 2 में प्रस्तुत नहीं किए गए हैं चूंकि शहरी क्षेत्र के लिए रा.प्र.सं. के 26वें दौर के परिणाम जारी नहीं किए गए थे।

2.2.2. सारणी 2 दर्शाती है कि शहरी क्षेत्रों में 1991 में अखिल भारत स्तर पर एक तिहाई परिवार स्व-नियोजित थे। स्वनियोजित परिवारों में से ऐसे परिवार जिनके सदस्य 'उत्पादन और संबद्ध कामगार, परिवहन उपस्कर' संचालक और श्रमिकों के रूप में 'बिक्री कामगार' के रूप में कार्यरत थे, दो अतिमहत्वपूर्ण समूह थे। दोनों में से प्रत्येक शहरी परिवारों का 11% से मामूली अधिक थे। शेष 12% को शेष स्व-नियोजित श्रेणी में वितरित किया गया। इनमें से 'किसान आदि' और 'प्रशासनिक आदि' दो महत्वपूर्ण समूह थे जिनमें से प्रत्येक 1991 में शहरी परिवारों का लगभग 4% थे।

सारणी -2

व्यावसायिक समूह के अनुसार शहरी परिवारों का प्रतिशत विवरण

परिवार की व्यावसायिक श्रेणी	1981 (37 वां)	1991 (48 वां)
स्व नियोजित		
व्यावसायिक आदि	1.7	1.6
प्रशासनिक आदि	2.4	3.9
लिपिकीय आदि	0.8	0.2
बिक्री कामगार आदि	10.6	11.3
सेवा कामगार आदि	1.9	2.1
किसान आदि	4.0	3.7
उत्पादन कामगार आदि	10.8	11.0
सभी स्वनियोजित	32.6	34.0
अन्य शहरी कामगार	67.4	66.0
सभी परिवार	100.0	100.0

37वें दौर के अनुमानों का स्रोत रा.प्र.स.रिपोर्ट सं. 318

टिप्पणी : यहां 42वें दौर के लिए प्रतिशता निकालने के लिए केवल कारगर परिवारों पर विचार किया गया है कि इस अध्याय में प्रस्तुत सभी सारणियों के लिए यह सच है इस से 'दर्जन किए गए' मामले समान रूप से निकाल दिए गए हैं।

2.2.3. 1981 में जो पैटर्न था 1991 में अनुमानों के समान था, स्व नियोजित परिवारों का प्रतिशत लगभग समान (33) देखा गया। 1991 के समान, दो समान व्यावसायिक श्रेणियों अर्थात् 'बिक्री कामगार' और 'उत्पादन और संबद्ध कामगार आदि' स्वनियोजित श्रेणी में थे। प्रत्येक का हिस्सा शहरी परिवारों का लगभग 11% था। 1981 में किसान आदि श्रेणी का भाग लगभग 4% था।

2.3 व्यावसायिक श्रेणियां-अंतर्राज्यीय तुलना

2.3.1 कृषक परिवारों का बदलता हुआ समानुपात

सारणी 3 17 प्रमुख राज्यों के लिए 1991 में समाप्त होने वाले दो दशकों के दौरान कृषक परिवारों के प्रतिशत में परिवर्तन दर्शाती है।

2.3.2 अखिल भारत ऋण और निवेश सर्वेक्षण 92 के अनुमानों की तुलना अखिल भारत ऋण और निवेश सर्वेक्षण 82 के अनुमानों से करने से यह महसूस होता है कि कृषक परिवारों के प्रतिशत में बोर्ड पर अत्यधिक गिरावट हुई है। 1971 और 1991 के मध्य की संपूर्ण अवधि में अनुमानों की गहन संवीक्षा से कुछ भिन्न तस्वीर उभरती है।

2.3.3. इसमें संदेह नहीं है कि 1981-91 के दौरान तेजी से गिरावट आई है परन्तु इसका अधिकांश भाग नोट की गई वृद्धि को निरस्त करते हुए प्रतीत होता है। 1981 में समाप्त पूर्ववर्ती दशक के दौरान कुछ राज्यों में वास्तव में यह गिरावट बहुत तेज थी। पंजाब (1971 से 43%, 1981 में 63% और पुनः 1991 में 44%, गुजरात 1971 में 55%, 1981 में 69% और 1991 में 44%) और पश्चिम बंगाल (1971 में 66%, 1981 में 78% और 1991 में 65%) जैसे राज्यों के लिए कृषक परिवारों के प्रतिशत में परिवर्तन को देखते समय, यह बात ध्यान में रखी जानी चाहिए।

2.3.4. ऐसा कहने के बाद, इस तथ्य को नकारा नहीं जा सकता कि 1991 में कृषक परिवारों के प्रतिशत में लगभग सभी राज्यों में 1971 के अनुमानों की तुलना में गिरावट आई है। यह गिरावट उत्तर प्रदेश और पश्चिम बंगाल जैसे कुछ राज्यों में 1% से भी कम रही। यह हिमाचल प्रदेश, गुजरात, राजस्थान आदि कुछ राज्यों में 5% से भी अधिक थी। तथापि, तदनुरूपी 1971 के अनुमानों की तुलना में 1971 में पंजाब और कर्नाटक जैसे कुछ राज्यों के लिए इस (1% से कम) में मामूली वृद्धि हुई है।

सारणी -3

26वें, 37वें और 48 वें दौर के अखिल भारतीय ऋण और निवेश सर्वेक्षणों से प्राप्त कृषक परिवारों का प्रतिशत

राज्य	1971 26वां	1981 37वां	1991 48वां
आंध्र प्रदेश	61.6	65.8	55.8
असम	81.6	86.8	71.7
बिहार	80.4	77.4	69.8
गुजरात	64.0	79.6	60.4
हरियाणा	60.0	57.0	57.3
हिमाचल प्रदेश	92.4	87.4	84.2
जम्मू और कश्मीर	93.9	83.3	86.3
कर्नाटक	68.7	75.1	69.3
केरल	89.7	93.2	78.2
मध्य प्रदेश	82.0	80.3	70.8
महाराष्ट्र	68.8	67.4	60.2
उड़ीसा	77.2	83.8	68.5
पंजाब	42.9	63.3	43.7
राजस्थान	86.8	84.8	80.4
तमिलनाडु	55.4	68.9	43.8
उत्तर प्रदेश	77.8	78.4	76.4
पश्चिम बंगाल	65.8	78.4	65.2
भारत	72.4	76.3	66.1

2.3.5. दो दशकों में प्रतिशत के बढ़ने और गिरने की इस अस्पष्ट उलझन में दो विशिष्ट लक्षण दिखाई पड़ते हैं। दोनों से एक स्पष्ट पैटर्न उभरता है कि जो सभी तीनों दौरों के अनुमानों की विशेषता दर्शाता है। पहली विशेषता, इन दौरों में से प्रत्येक के लिए अखिल भारत अनुमान से काफी बड़ी राज्यवार विभिन्नता है। कृषक परिवारों का सभी ग्रामीण परिवारों की तुलना में प्रतिशत 1971 में (पंजाब में) न्यूनतम 43% और (जम्मू और कश्मीर में) अधिकतम 94% के बीच रहा, 1981 से सामान्य 57% (हरियाणा में) से अधिक 93% (केरल में) के बीच में रहा और 1991 में केवल 44%

(तमिल नाडु में) से उल्लेखनीय 86% (जम्मू और कश्मीर में) के बीच रहा। तीनों दौरों के लिए अखिल भारत औसत क्रमशः 72%, 76% और 66% था।

2.3.6. दूसरे, सारणी में दर्शाए गए अन्य राज्यों की तुलना में अपेक्षाकृत उच्च अथवा न्यून प्रतिशत वाले राज्यों की सभी तीनों दौरों में सापेक्ष स्थिति कमोबेश वैसी ही बनी रही है। उदाहरण के लिए हिमाचल प्रदेश का प्रतिशत अत्यधिक देखा गया, जो वास्तव में प्रमुख राज्यों में सभी तीनों दौरों अर्थात् 1971 में 92% 1981 में 87% और 1991 में 84% दूसरे स्थान पर रहा। दूसरी ओर, हरियाणा में यह प्रतिशत सभी तीनों दौरों अर्थात् 1971 में 60% (नीचे से तीसरा) 1981 में 57% न्यूनतम और 1981 में 57% (नीचे से चौथा) में अत्यधिक न्यून रहा।

सारणी- 4

37वें और 48वें दौरों के अखिल भारतीय ऋण और निवेश सर्वेक्षण से प्राप्त स्व-नियोजित परिवारों का प्रतिशत

राज्य	1981 (37वां)	1991 (48वां)
आंध्र प्रदेश	34.6	32.4
असम	38.9	39.9
बिहार	36.6	39.0
गुजरात	32.8	34.5
हरियाणा	40.0	46.3
हिमाचल प्रदेश	29.0	32.4
जम्मू और कश्मीर	44.5	28.2
कर्नाटक	36.0	29.2
केरल	31.1	34.4
मध्य प्रदेश	32.0	29.1
महाराष्ट्र	25.9	29.0
उड़ीसा	25.3	32.3
पंजाब	44.5	43.1
राजस्थान	37.8	34.9
तमिलनाडु	27.5	28.4
उत्तर प्रदेश	42.1	47.9
पश्चिम बंगाल	24.3	33.4
दिल्ली	30.6	30.6
भारत	32.6	34.1

स्रोत : जैसा सारणी 1 के लिए।

टिप्पणी : जैसी सारणी 2 के अधीन दी गई है।

2.3.7. यह सुझाव है कि भारत में ग्रामीण परिवारों का एक बड़ा भाग कृषक परिवारों का है। तथापि, कृषक परिवारों की यह उच्च बहुलता जैसी सर्वेक्षण से प्रतीत होती है, कृषक परिवारों के लिए सर्वेक्षण में अपनाई गई परिभाषा के कारण दिखाई पड़ती है यह पूरी संभावना है कि कृषि श्रमिकों अथवा कारीगरों के रूप में अपनी आय का बड़ा भाग अर्जित करने वाले अधिसंख्यक परिवारों के पास भूमि का छोटा सा टुकड़ा हो। सर्वेक्षण ने ऐसे सभी परिवारों को कृषक परिवार माना, यद्यपि उनका व्यवसाय कोड कृषकों के कोड से भिन्न था।

2.4.1 शहरी स्वनियोजित परिवारों के समानुपात में परिवर्तन: सारणी 4, मौजूदा सर्वेक्षण और 37वें दौर के अखिल भारत ऋण और निवेश सर्वेक्षण से अनुमानित 18 प्रमुख राज्यों (दिल्ली सहित) के लिए स्वनियोजित शहरी परिवारों का प्रतिशत दर्शाती है। वहीं दोनों विशेष लक्षण जो ग्रामीण क्षेत्रों में देखे जाते हैं, शहरी क्षेत्रों में भी दिखाई पड़ते हैं।

2.4.2 पहली बात यह है कि दोनों दौरों के अनुमान बड़ी अन्तर्राज्यीय विभिन्नता दर्शाते हैं। सभी शहरी परिवारों के मुकाबले स्व-नियोजित परिवारों का प्रतिशत 1981 में न्यूनतम 24% (पश्चिम बंगाल) और अधिकतम लगभग 45% (जम्मू और कश्मीर तथा पंजाब में) के बीच रहा। 1991 में यह 28% (जम्मू और कश्मीर में) से 48% (उत्तर प्रदेश में) के बीच रहा।

2.4.3 दूसरे, स्वनियोजित परिवारों की सापेक्ष स्थिति 1991 को समाप्त दशक के दौरान मोटे तौर पर अपरिवर्तनीय बनी रही। जब कि सभी शहरी परिवारों की तुलना में स्वनियोजित परिवारों का समानुपात उत्तर प्रदेश, पंजाब, हरियाणा (1981 और 1991) के दौरान प्रत्येक राज्यों में 40% से ऊपर) जैसे राज्यों में ऊंचा रहा, महाराष्ट्र और तमिलनाडु (1981 और 1991 के दौरान प्रत्येक राज्य में 30% से कम) जैसे राज्यों ने काफी न्यून समानुपात दर्शाए। चूंकि 1981 की तुलना में 1991 में स्व-नियोजित परिवारों का समग्र अखिल भारत समानुपात लगभग वही बना रहा, इस लिए वह

स्वभाविक है कि कुछ राज्यों के लिए अधिकांश महत्वपूर्ण राज्यों में बढ़ोत्तरी को प्रति संतुलित करने के लिए इस समानुपात में गिरावट आएगी। तथापि, जम्मू और कश्मीर के लिए यह उल्लेखनीय गिरावट (1981 में 44.5% से 1991 में 28.2% तक) बनी रही ऐसा 1991 के दौरान राज्य में असमान्य राजनैतिक वातावरण के कारण हो सकता है। अध्याय। का पैराग्राफ 3.2.1 देखें) हरियाणा और उत्तर प्रदेश दो राज्यों ने 5-6%, प्वाइंटों की वृद्धि दर्शायी है। इनमें से हरियाणा में, उत्पादन कामगार आदि के रूप में कार्यरत परिवारों लगभग 10% प्वाइंटों की बढ़ी वृद्धि हुई जबकि उत्तर प्रदेश 10% प्वाइंटों से अधिक है। वास्तव में, अंतिम लिखित समूह अनेक अन्य राज्यों में बढ़ा है और पंजाब और महाराष्ट्र में इसमें लगभग 4% प्वाइंटों की वृद्धि हुई हैं। (देखें परिशिष्ट-सारणी 4.1 यू)

सारणी-5

30.6.91 को परिसम्पत्तियों के स्वामित्व वाले परिवारों का प्रतिशत और कुल परिसम्पत्तियों का औसत मूल्य

व्यावसायिक श्रेणी	कुल परिसम्पत्तियों का औसत मूल्य (रुपए)	
	ग्रामीण	
कृषक	100.3	1,42,308
गैर कृषक	99.3	38,180
सभी ग्रामीण परिवार	99.8	1,44,330
	शहरी	
स्वानियोजित	99.9	1,89,710
अन्य	98.7	1,20,928
सभी शहरी परिवार	99.1	1,44,330

औसत परिसम्पत्ति जोत

3.1.1 सर्वेक्षण के उद्देश्य के लिए, 30 जून 1991 की स्थिति के अनुसार परिवारों के स्वामित्व में भौतिक और वित्तीय परिसम्पत्तियों की परिगणना की गई। भौतिक परिसम्पत्तियों के अधीन, भूमि, भवन, पशुधन, कृषि उपकरण और मशीनरी, परिवहन उपकरण और घरेलू टिकाऊ वस्तुएं गिनी गई जब कि शेयर और जमा राशियां आदि और प्राप्य नकदी और वस्तुएं तथा नकद धन को वित्तीय परिसम्पत्तियों में रखा गया।

3.1.2 सारणी-5 व्यावसायिक श्रेणी के अनुसार ग्रामीण और शहरी परिवारों की औसत परिसम्पत्ति जोत दर्शाती है। यह कुछ परिसम्पत्तियों का स्वामित्व सूचित करने वाले परिवारों का प्रतिशत दर्शाती है। यह आशा की जाती है कि परिवार का सर्वेक्षण में कवर की गई परिसम्पत्तियों की एक अथवा अन्य किस्म का स्वामित्व होना चाहिए। फिर भी, 1991 में ग्रामीण परिवारों में प्रति एक हजार में से 2 और शहरी परिवारों में प्रति 10000 में से 9 के पास कोई परिसम्पत्ति प्रतीत नहीं होती। यह ऐसे संभव है। यह भी स्मरण किया जा सकता है कि मौजूदा सर्वेक्षण के लिए परिसम्पत्तियों की विभिन्न मदों को प्राप्त करने की तारीख 30.6.91 निर्धारित की गई— जो प्रतिदर्श परिवार में किसी अन्वेषक के वास्तव में किए गए पहले दौर से 6 से 14 महीने पहले थी। इस प्रकार कोई परिमाणों नए तैयार प्रतिदर्श परिवार अर्थात् ऐसा प्रतिदर्श परिवार को मौजूदा सर्वेक्षण के लिए किसी परिसम्पत्ति को हासिल करके 1.7.1991 और सर्वेक्षण की तारीख के मध्य अस्तित्व में आया, को प्रति बाधित करती थी। जहां तक 30.6.91 में प्रति परिवार कुल परिसम्पत्तियों के औसत मूल्य का संबंध है, यह ग्रामीण भारत में 1,07,007 रुपए और शहरी भारत में 1,44,330 रुप में आंका गया।

3.1.3. ग्रामीण क्षेत्रों में कृषक परिवार गैर कृषक परिवारों की अपेक्षा परिसम्पत्तियों का और अधिक ऊंचा

औसत मूल्य दर्शाते हैं। औसत मूल्य 1.4 लाख रुपए से अधिक कृषकों के लिए और शेष ग्रामीण परिवारों के लिए केवल 0.4 लाख रुपए ही देखा गया है। शहरी क्षेत्रों में, स्वनियोजित परिवारों ने अन्य शहरी परिवारों (1.2 लाख रु.) को अपेक्षा और अधिक ऊंचा औसत मूल्य (1.9 लाख रुपय) सूचित किया गया।

सारणी-6

3.2 कुल परिसम्पत्तियों के औसत मूल्य की अन्तर्राज्यीय तुलना

3.2.1. ग्रामीण क्षेत्रों में:- 1991 को समाप्त हुए दशक में ग्रामीण परिवारों की परिसम्पत्तियों के औसत मूल्य में 17 प्रमुख राज्यों के लिए परिवर्तन अंक सारणी-6 में दर्शाया गया है। 1991 में कुल परिसम्पत्तियों का औसत मूल्य हरियाणा (3.4 लाख रु.) में अधिकतम, इसके बाद पंजाब (3.3 लाख रु.) का स्थान था। केरल (1.8 लाख रु.), जम्मू और कश्मीर और राजस्थान (1.6 लाख रुपये प्रत्येक) तीन अन्य राज्य औसत मूल्य के ऊंचे आंकड़े वाले राज्य थे। 1991 में राज्यों की सापेक्ष स्थितियां मोटे तौर पर समान देखी गईं जैसी 1981 में थी। 1991 में उल्लेखनीय वृद्धि दर्शाने वाला राज्य राजस्थान एक अपवाद है। राजस्थान के लिए कुल परिसंपत्तियों के औसत मूल्य 1981 में अखिल भारत आंकड़ों से कुछ ऊपर पहुंच गए और 1991 में सर्वोपरि हो गए।

3.2.2 अंतर्राज्यीय तुलना दो समय बिन्दुओं 1981 और 1991 के बीच काफी समानता दर्शाती है। 1981 के समान, उत्तरी क्षेत्र को दर्शाती है।

राज्यों ने समान्य तथा अन्य क्षेत्रों के परिवारों की अपेक्षा काफी अधिक कुल परिसंपत्तियों का मूल्य दर्शाया। वास्तव में, 1981 की तरह 1991 में भी कुल परिसंपत्तियों का औसत मूल्य न्यूनतम था। इसके अतिरिक्त, 1981 की तरह आंध्र प्रदेश, असम, तमिलनाडु और पश्चिम बंगाल प्रत्येक लिए यह लगभग 60 हजार रुपये था जो 1991 में उड़ीसा (46 हजार रुपये) से मामूली अधिक था।

3.2.3 शहरी क्षेत्रों:- सारणी 7 दर्शाती है कि 18 प्रमुख राज्यों के लिए 1991 को समाप्त दशक के दौरान शहरी परिवारों की परिसंपत्तियों के औसत मूल्य में परिवर्तन हुआ। कुल परिसंपत्तियों का औसत मूल्य दर्शाती है। कि यह दिल्ली में अधिकतम (2.8 लाख रुपये) पंजाब था और इसके बाद (2.6 लाख रुपये) केरल (2.2 लाख रुपये) और जम्मू और कश्मीर (2.0 लाख रुपये) था। इसका पैटर्न 1981 के पैटर्न के समान ही देखा गया केवल पंजाब में मामूली परिवर्तन हुआ जो 1981 में पांचवें स्थान से उपर उठकर 1991 में दूसरे

स्थान पर पहुंच गया। इसी प्रकार दिल्ली 1981 में दूसरे स्थान से उपर उठकर 1991 में शिखर पर पहुंच गयी।

सारणी -7

प्रति शहरी परिवार कुल परि संपत्तियों का औसत मूल्य

37वें दौर के अनुमानों का स्रोत रा. प्र. सं. सं. 318

3.2.4 समग्र रूप से, औसत परि संपत्तियों की जोतों के संदर्भ में राज्यों की 1981 और 1991 के मध्य सापेक्ष स्थितियां कुछ समानता दर्शाती है। कुछ राज्यों जैसे दिल्ली, केरल, हरियाणा, जम्मू और कश्मीर ने प्रति परिवार परिसंपत्तियों का अपेक्षाकृत उच्च मूल्य दर्शाया और 1991 में भी जारी रहा। शिखर के स्थानों में नया नाम पंजाब का है, 1991 में हरियाणा चौथे स्थान गिरकर 10 वें स्थान पर आ गया, यह स्थान

1981 में हरियाणा के पास था। कुल परि संपत्तियों के औसत मूल्य के न्यून आंकड़ें 1991 में आंध्र प्रदेश (95 हजार रुपये) और बिहार (99 हजार रुपये) में रहे। इसके अलावा पूर्वी क्षेत्र के राज्य जैसे उड़ीसा ने 1991 में 72 हजार रुपये का न्यूनतम औसत मूल्य दर्शाया और पश्चिम बंगाल ने 1 लाख रुपये दर्शाया, दोनों का स्थान 1981 की तरह न्यून स्थान बना रहा।

3.3 भूमि स्वामित्व के अनुसार परिसम्पत्तियों का औसत मूल्य

3.3.1. परिशिष्ट में सारणी 6 आर, ग्रामीण क्षेत्रों की भूमि स्वामित्व की भिन्न-भिन्न श्रेणियों के परिवारों के लिए 30 जून 1991 की स्थिति के अनुसार परि संपत्तियों का औसत मूल्य दर्शाती है। इस सारणी को पहली बार

ऋण और निवेश सर्वेक्षण से सूचित किया गया है। यह सारणी दर्शाती है कि परिसम्पत्तियों का औसत मूल्य समग्र ग्रामीण भारत के लिए भूमि स्वामित्व के आकार वर्ग के साथ, बढ़ा है। यही तस्वीर उभरने की आशा थी चूंकि ग्रामीण भारत में परि संपत्ति के एक मद के रूप में भूमि के महत्व में अत्याधिक वृद्धि हुई।

3.3.2 राज्य वार पैटर्न: परिशिष्ट की सारणी 6 दर्शाती है कि राष्ट्रीय स्तर पर दृष्टिगोचर हो रहा पैटर्न अधिकांश राज्यों के लिए भी ठीक रहा। हालांकि असम, उड़ीसा और उत्तर प्रदेश जैसे कुछ राज्यों में कुल परि संपत्तियों का औसत मूल्य में द्वितीय न्यूनतम स्वामित्व वर्ग '0.002 हेक्टेयर से कम' में न्यूनतम की अर्थात् 'शून्य' की तुलना में मामूली गिरावट आयी है।

ओर 9 में प्रस्तुत किया गया है। इनमें से प्रत्येक श्रेणी ग्रामीण और शहरी क्षेत्रों के लिए अलग-अलग सभी परिवारों के पांचवें भाग के तदनुरूपी है।

3.4.3 सारणी 8 दर्शाती है कि ग्रामीण भारत में परि संपत्तियों का औसत मूल्य मासिक प्रति व्यक्ति उपभोक्ता व्यय आकार श्रेणी में लगातार बढ़ा है। यह मूल्य उच्च मासिक प्रति व्यक्ति व्यय श्रेणी (280 रूपये से अधिक) में न्यूनतम मासिक प्रति व्यक्ति उपभोक्ता व्यय (140 रूपये से कम) में 52 हजार रूपये मूल्य की तुलना में अधिक पाया गया मासिक प्रति व्यक्ति उपभोक्ता व्यय श्रेणियों के मध्य परिसम्पत्तियों का औसत मूल्य में वृद्धि चौथी से पांचवी श्रेणी (अंतिम) तक अत्यधिक तीव्र रही। यह वृद्धि मूल्य संदर्भ में 50 प्रतिशत से अधिक थी जो लगभग 1.2 लाख रूपये से 2 लाख रूपये तक थी।

3.4.4 तस्वीर सभी राज्यों में ग्रामीण क्षेत्रों के लिए कुछ अपवादों के साथ कमोबेश समान है। हिमाचल प्रदेश, पंजाब और राजस्थान जैसे राज्यों के लिए द्वितीय न्यूनतम श्रेणी अथवा 140 - 180 में न्यूनतम श्रेणी की तुलना में परिसंपत्तियों के औसत मूल्य में गिरावट दिखाई पड़ी है। हालांकि हरियाणा, पंजाब, जम्मू और कश्मीर तथा राजस्थान जैसे कुछ राज्य जो परिसंपत्तियों के औसत मूल्य के लिए समग्र रूप से ऊचे आकड़े दर्शाते हैं। प्रत्येक मासिक-प्रति व्यक्ति उपभोक्ता व्यय श्रेणी में परिसंपत्तियों का औसत मूल्य पर्याप्त रूप से अधिक अधिकांशतः एक लाख रुपये और अधिक है।

3.4.5. शहरी भारत के पास भी बताने के लिए वैसी ही कहानी है। ग्रामीण क्षेत्र की तरह परिसंपत्तियों का औसत मूल्य 5 मासिक प्रति व्यक्ति उपभोक्ता व्यय श्रेणियों में लगातार वृद्धि दर्शाता है। यह अधिकतम मासिक प्रति व्यक्ति उपभोक्ता व्यय श्रेणी (520 रुपये से अधिक) में 52 हजार रुपये की तुलना में लगभग छह गुणा (3.2 लाख रुपये) हैं, यह आंकड़ा न्यूनतम मासिक

प्रति व्यक्ति उपभोक्ता व्यय श्रेणी (185 रुपये से कम) का है।

3.4.6 सारणी 9 दर्शाती है कि पंजाब, केरल और जम्मू और कश्मीर का राष्ट्रीय स्तर के आंकड़ों की तुलना में राज्य स्तर पर काफी ऊंचा औसत मूल्य था। हालांकि पंजाब और केरल के लिए परिसंपत्तियों का औसत मूल्य मासिक प्रतिव्यक्ति उपभोक्ता व्यय श्रेणियों में लगातार बढ़ा है, जम्मू और कश्मीर के लिए विभिन्न मासिक प्रति व्यक्ति उपभोक्ता व्यय श्रेणियों में औसत मूल्य में चौथी श्रेणी तक उझाल और गिरावट देखी गई किन्तु प्रत्येक में कम से कम 1.4 लाख रूपयों का उच्च आंकड़ा देखा गया। अखिल भारत स्तर पर परिसंपत्तियों का औसत मूल्य में वृद्धि चौथी (385-520 रुपये) से आखिरी मासिक प्रति व्यक्ति उपभोक्ता व्यय श्रेणी तक लगभग सभी राज्यों में तेजी से बढ़ती हुई देखी गई। जब कि यह वृद्धि राष्ट्रीय स्तर पर 50% पाई गई, यह पंजाब, जम्मू और कश्मीर और उत्तर प्रदेश जैसे कुछ राज्यों में लगभग 250% तक देखी गई।

परिवारिक परिसम्पत्तियों की जोतों का संघटन

4.1.1. गत दो दशकों के दौरान परिवारों की विभिन्न व्यावसायिक श्रेणियों की परिसम्पत्तियों की भिन्न-भिन्न मदों के महत्व का अध्ययन करने और भिन्न भिन्न परिसंपत्तियों के महत्व में किसी परिवर्तन का पता लगाना रुचिकर होगा। इन उद्देश्यों को ध्यान में रखते हुए सारणी 10 में वर्तमान सर्वेक्षण और ग्रामीण क्षेत्र के लिए 1981 और 1971 में पूर्ववर्ती दौरों से प्राप्त आंकड़ों से प्राप्त कुल परिसम्पत्तियों में भिन्न-भिन्न मदों का प्रतिशत भाग और शहरी क्षेत्र (चूंकि शहरी क्षेत्र के लिए रा. प्र. सं. के 26 वे दौर के परिणाम जारी नहीं किए गए थे) लिए रा. प्र. सं. के 37वें दौर 1981 के लिए आंकड़े अखिल भारत के लिए प्रस्तुत किए गए हैं।

4.1.2 राष्ट्रीय आय और रोजगार दोनों में कृषि का महत्व सुस्थापित है और इसके स्पष्टीकरण की आवश्यकता नहीं है। इस लिए यह कोई हैरानी की बात नहीं है कि भूमि ग्रामीण परिवारों के स्वामित्व वाली परिसंपत्तियों का अति महत्वपूर्ण संघटक है सारणी-10

में वर्तमान और पूर्ववर्ती सर्वेक्षणों के परिणाम इस तथ्य के साक्ष्य हैं। 1971 से 1981 तक की अवधि के दौरान भूमि के मूल्य और कुल परिसंपत्तियों के मूल्य का प्रतिशत ग्रामीण क्षेत्रों में अन्य परिसंपत्तियों के काफी अधिक 62 प्रतिशत से 57 प्रतिशत के बीच था।

4.1.3. महत्व के क्रम में अगले भुवन थे, जिनका 1991 को समाप्त दो दशकों के दौरान 18 प्रतिशत से 21 प्रतिशत तक भाग था। इस प्रकार 1971 से 1991 तक के 20 वर्षों की अवधि में ग्रामीण परिवारों के स्वामित्व वाली कुल परिसम्पत्तियों के मूल्य का लगभग 85 प्रतिशत भूमि और भवनों के हिस्से में आता है। परिसम्पत्तियों की इन दो मदों के मध्य, भवनों का भाग 1971 में 17.9 प्रतिशत से थोड़ा अधिक और 1981 में 20.7 प्रतिशत से 1991 में 21.4 प्रतिशत रहा। भूमि के लिए कोई स्पष्ट रुख नहीं था जिसका भाग 1971 में 66.7 प्रतिशत से 1981 में 62.1 प्रतिशत तक गिर गया, 1991 में कुछ वृद्धि होकर 64.2 प्रतिशत हो गई।

4.1.4 ग्रामीण क्षेत्रों में सबसे अन्य परिसम्पत्तियों के रूप में उल्लिखित परिसम्पत्तियों की अन्य मदों में से कुछ समूहों को निहित परिसम्पत्तियों की प्रकृति में कुछ समानता के आधार पर बनाया गया है। ऐसे समूहों का निर्माण अपेक्षित था चूंकि ऐसे समूह को समाहित करने वाली परिसम्पत्तियों की अलग अलग मदों का भाग अलग से ध्यान देने के लिए पर्याप्त नहीं था। उदाहरण के लिए, मशीनरी उपस्कर समूह में परिसम्पत्तियों की तीन मदें अर्थात् "कृषि मशीनरी आदि" "गैर फार्म व्यापारिक उपस्कर और सभी परिवहन उपस्कर" शामिल है जो सभी पूंजीगत माल स्वरूप की है। अन्य मामला वित्तीय परिसम्पत्ति समूह का है जिसमें वित्तीय परिसम्पत्तियों के स्वरूप की दो मदें-शेयर तथा अन्य वित्तीय परिसम्पत्तियों शामिल है। तथापि, यह एक मद परिवार के टिकाऊ सामान है जिसका 1981 और 1991 में अन्य परिसम्पत्तियों के संघटकों में गौरव पूर्ण स्थान बन गया है। वास्वत में इस मदने, ऐसी मदों में से सापेक्ष स्थिति में कुछ सुधार कर लिया है चूंकि इसका 1971 में ऐसी मदों/समूहों में द्वितीय अधिकतम अंश था। इसका अंश 4.6 प्रतिशत से 7.1 प्रतिशत के बीच देखने में आया है जो 1981 में शिखर पर पहुंच गया था परंतु तब से कुछ घट गया है और 1991 में 5.9 प्रतिशत तक पहुंच गया है।

4.1.5 "अन्य परिसम्पत्तियों" के अंतर्गत शेष चार संघटकों में से मशीनरी और उपस्कर समूह ओर पशुधन अधिक महत्वपूर्ण दिखाई पड़ता है। इसमें से, पशुधन का भाग 70 के दशक से लगातार घट रहा है जो 1971 में 6.5 प्रतिशत से 1981 में 5.0 प्रतिशत और आगे और गिरकर 1991 में 3.4% हो गया। यह तस्वीर मशीनरी और उपस्कर समूह के लिए बिल्कुल उल्टी है, यद्यपि यह ज्यादा अस्पष्ट पैमाने पर है। इस समूह का अंश 1971 में 2.7 प्रतिशत से बढ़कर 1981 में 3.7% और 1991 में आंशिक रूप से बढ़कर 3.8 प्रतिशत तक पहुंच गया। शेष दो अर्थात् वित्तीय परिसम्पत्तियों और प्राप्त करने योग्य बकाया राशि के अंश, किसी पृथक ध्यान को उपयुक्त ठहराने के लिए 1971 से 1991 तक अत्यधिक लघु बने रहे।

4.1.6 1971 से 1991 तक की अवधि में परिवर्तन के पैटर्न पर सारणी 10 में कृषकों और गैर कृषकों के लिए अलग अलग दृष्टि डालने पर स्पष्ट होता

है कि दोनों व्यावसायिक श्रेणियों के लिए समान स्वरूप है। जहां तक कृषक परिवारों का संबंध है उनका मद विशिष्ट अंश संपूर्ण अवधि में लगभग समान रहा। कृषि परिवारों के लिए शेयरों का मद- विशिष्ट मूल्य सर्वेक्षण वर्षों के प्रत्येक वर्ष में सभी ग्रामीण परिवारों के शेयरों का काफी समान है।

4.1.7 हालांकि गैर कृषि परिवारों के मामले में काफी भिन्न दृश्य है। इसके लिए, मद विशिष्ट पैटर्न और शेयरों का मूल्य किसी सर्वेक्षण वर्ष में सभी ग्रामीण परिवारों से अधिकांश मदों के लिए काफी विभिन्नता लिए हुए पाया गया है। गैर-कृषक परिवारों के लिए "भवन आदि" का प्रतिशत अंश 1971 से 1991 के बीच 38 प्रतिशत से 40 प्रतिशत के बीच रहा जो इस अवधि के दौरान कृषक परिवारों (लगभग 17 प्रतिशत से 19 प्रतिशत तक) के लिए "भवन आदि" के शेयर का मूल्य लगभग दुगुना था। जैसा कि आशा थी "भूमि" का गैर कृषक परिवारों के लिए अंश काफी कम था। यह 31 प्रतिशत से 32 प्रतिशत के लगभग था जो 1971 से 1981 के बीच कृषक परिवारों (64 प्रतिशत से 69 प्रतिशत तक) के तदनुरूप शेयर के मूल्य के आधे से कम था। तथापि, 1991 में समाप्त होने वाले दशक में यह भाग 40 प्रतिशत तक बढ़ गया। इस प्रकार जब कि गैर कृषक परिवारों में मदों की भिन्न भिन्न मदों में भूमि और भवन दो प्रमुख संघटक बने रहे, फिर भी, इनका संयुक्त भाग 1981 तक 70 प्रतिशत से 72 प्रतिशत के बीच रहा यह मूल्य 1991 में लगभग 77 प्रतिशत बढ़ा किन्तु यह इस अवधि के दौरान कृषक परिवारों के लिए "भूमि" और "भवन" के लगभग 85 प्रतिशत अंश से काफी कम था।

4.1.8 1971 से 1991 के तक के दौरान गैर कृषक परिवारों के लिए अन्य परिसम्पत्तियां में वित्तीय परिसम्पत्तियों का अंश लगभग 5 प्रतिशत रहा जबकि परिवार के टिकाऊ सामान का शेयर 11 प्रतिशत से 16 प्रतिशत के बीच रहा। उसी अवधि के दौरान, दोनों संघटकों के शेयरों का मूल्य कृषक परिवारों में काफी कम देखने में आया है। इनका शेयर टिकाऊ सामान के लिए 4 प्रतिशत से 7 प्रतिशत के बीच और वित्तीय परिसंपत्तियों के लिए मामूली 1 प्रतिशत था। यह ध्यान देने की बात है कि गैर कृषकों में व्यवसायी, व्यापारी, महाजन आदि शामिल हैं और कृषकों की अपेक्षा उनका

भवनों परिवार के टिकाऊ सामान और वित्तीय परिसम्पत्तियों का बड़ा भाग शायद यही तथ्य को प्रतिबिम्बित करता है।

4.1.9 1981 से 1991 तक की अवधि के दौरान शहरी क्षेत्रों में परिसम्पत्तियों की भिन्न भिन्न मर्दों का भाग ग्रामीण क्षेत्रों में गैर कृषक परिवारों की अपेक्षा कमोवेश समान पाया गया। इसमें वित्तीय परिसम्पत्तियों, पशुधन और कुछ सीमा तक मशीनरी और उपस्कर अपवाद हों। शहरी क्षेत्रों में वित्तीय परिसम्पत्तियों में 8 से 11 प्रतिशत भाग गैर कृषक परिवारों के लिए लगभग 5 प्रतिशत की तुलना में अपेक्षाकृत अधिक महत्वपूर्ण है। दूसरी ओर, पशुधन का शेयर शहरी क्षेत्रों में केवल आधा से 1 प्रतिशत से कम था जो ग्रामीण क्षेत्रों में गैर कृषक परिवारों के लिए 3 प्रतिशत से 5 प्रतिशत से काफी कम था। शहरी परिवारों के लिए मशीनरी और उपस्कर का भाग लगभग 5 प्रतिशत था जो 1981 और 1991 में गैर कृषक परिवारों के लिए लगभग 3.5 प्रतिशत के भाग से कुछ अधिक था।

4.1.10 जैसा सारणी 10 में देखा गया है। शहरी क्षेत्रों में स्वनियोजित और अन्य शहरी परिवार 1991 में समाप्त हुए दो दशकों में परिसम्पत्तियों की भिन्न-भिन्न मर्दों के लिए भागों में परिवर्तन द्वारा कमोवेश प्रभावित दिखाई पड़ते हैं। इस अवधि के दौरान भूमि और भवन के लिए वृद्धि (1.5 से 4 प्रतिशत के बीच) नोट की गई और वित्तीय परिसम्पत्तियों और परिवार के टिकाऊ सामान के लिए कमी (1.2 से 4 प्रतिशत के बीच) नोट की गई। इसके अतिरिक्त, शहरी क्षेत्र में दो संघटकों के स्वनियोजित और अन्य शहरी परिवारों के मध्य परिसम्पत्तियों की भिन्न-भिन्न मर्दों ओर कुल परिसम्पत्तियों में विभिन्नता देखी गई। यह 1981 और 1991 दोनों के लिए सच है। "मशीनरी, उपस्कर आदि" के अन्तर्गत श्रेणीकृत मर्दों के लिए जैसी आशा थी, स्वनियोजित परिवारों (8 प्रतिशत) का भाग से अधिक पाया गया। जहां तक "वित्तीय परिसम्पत्तियों" समूह का संबंध है, यह स्वनियोजित परिवारों में अन्य शहरी परिवारों को परिसम्पत्ति जोतों में काफी बड़ा भाग (1981 और 1991 में क्रमशः 15 प्रतिशत और 11 प्रतिशत) देखा गया जो स्वनियोजित परिवारों में (1981 और 1991 में क्रमशः 5 प्रतिशत और 4 प्रतिशत) था।

4.2 अन्तर्राज्यीय भिन्नता: ग्रामीण क्षेत्र

4.2.1 भूमि और भवन जैसा कि सारणी 11 से देखा गया है, ग्रामीण क्षेत्रों में भूमि 64 प्रतिशत भाग के साथ, राष्ट्रीय स्तर पर सभी प्रमुख राज्यों के लिए प्रमुख संघटक है। वास्तव में, इसका भाग पंजाब और हरियाणा में 75 प्रतिशत के करीब है, और गुजरात, हिमाचल प्रदेश और तमिलनाडु जैसे कुछ मुट्ठी भर राज्यों को छोड़ कर, 50 प्रतिशत से अधिक है। इन कुछ राज्यों में भी इनका भाग कम से कम 45 प्रतिशत रहा।

सारणी 11

30.6.91 की स्थिति के अनुसार ग्रामीण परिवारों की कुल परिसम्पत्तियों में भूमि और भवन का प्रतिशत भाग

	प्रतिशत भाग			
	भूमि	भवन	अन्य	सभी
आंध्र प्रदेश	63	21	16	100
असम	58	22	20	100

उत्तर प्रदेश	68	20	12	100
पश्चिम बंगाल	58	28	14	100
भारत	64	21	15	100

4.2.2 "भवन आदि" जिसका राष्ट्रीय स्तर पर शेयर 21 प्रतिशत है, सारणी 11 में प्रस्तुत प्रमुख राज्यों के लिए दूसरा अति महत्वपूर्ण संघटक है। इन राज्यों में से "भवन आदि" शेयर हिमाचल प्रदेश के लिए 35 प्रतिशत से अधिक, गुजरात, केरल और तमिलनाडु में लगभग 30 प्रतिशत देखा गया। शेष राज्यों में हरियाणा और पंजाब को छोड़ कर जहां यह भाग क्रमशः 12 प्रतिशत और 16 प्रतिशत पाया गया राज्य में कुल ग्रामीण परिसम्पत्तियों के छोटे भाग से अधिक आंका गया। यह कोई चिंता की बात नहीं है चूंकि ये वे राज्य हैं जहां भूमि का भाग लगभग 75 प्रतिशत है।

4.2.3 **अन्य परिसम्पत्तियां:** अन्य सभी मर्दें कुल मिलाकर राष्ट्रीय स्तर पर ग्रामीण परिवारों की परिसम्पत्तियों का लगभग 15 प्रतिशत आंकी गई। हालांकि इन मर्दों का भाग अपेक्षाकृत अधिक रहा जो गुजरात में 25 प्रतिशत तमिलनाडु में 22 प्रतिशत असम और उड़ीसा प्रत्येक में 20 प्रतिशत था यह पंजाब में 11 प्रतिशत और बिहार और हरियाणा प्रत्येक में 10 प्रतिशत रहा जो अपेक्षाकृत काफी कम है। इसी प्रकार सबसे बाद में उल्लिखित राज्य वे हैं जहां भूमि का भाग काफी अधिक (कम से कम 75 प्रतिशत) पाया गया। चूंकि, अनेक राज्यों में ऐसी, अनेक मर्दों के निश्चित भाग अलग-अलग

सारणी-12

30.6.91 की स्थिति के अनुसार ग्रामीण परिवारों की अन्य परिसम्पत्तियां के कुल मूल्य में "अन्य परिसम्पत्तियों" के भिन्न-भिन्न संघटकों का प्रतिशत अंश (एन एल बी)

भारत	24	16	2	8	41	9	100	15

बहुत कम थे इसलिए प्रत्येक "अन्य परिसम्पत्तियों" के लिए "अन्य परिसम्पत्तियों" के मूल्य में उनके भाग सारणी-12 में प्रस्तुत किए गए हैं। ये भाग इसके बाद एन एल बी कहलाएंगे दर्शाते हैं कि ये अन्य परिसम्पत्तियों अर्थात् भूमि और भवन को छोड़कर अन्य मदों का कितना भाग है "शेयर" और "प्राप्त करने योग्य बकाया धन राशि" जैसी कुछ मदों का नगण्य अथवा अत्यधिक कम देखा गया। इसलिए ऐसी मदों को "अन्य वित्तीय परिसम्पत्तियों" मद में शामिल कर दिया गया है और इन सभी मदों के समूह को सामान्य नाम वित्तीय परिसम्पत्तियां दिया।

4.2.4 सारणी-12 दर्शाती है 'अन्य परिसम्पत्तियां' में सभी महत्वपूर्ण राज्यों के लिए सबसे महत्वपूर्ण मद परिवार की टिकाऊ वस्तुएं थी जिनका एन एल बी भाग राष्ट्रीय स्तर पर 40% था। केरल (70%) और तमिलनाडु (57%) का परिवार की टिकाऊ वस्तुओं का एन एल बी भाग राष्ट्रीय औसत की अपेक्षा अधिक देखा गया जबकि हरियाणा (26%) और पंजाब और मध्य प्रदेश (28%) प्रत्येक का काफी कम भाग था। निश्चित भाग के संदर्भ में तमिलनाडु का स्थान 12.5% मूल्य के साथ सभी राज्यों में सबसे पहला था। हरियाणा और पंजाब के कम मूल्य होने की आशा इस वजह से थी कि भूमि और भवन के लिए उनका निश्चित भाग अपेक्षाकृत अधिक था। मध्य प्रदेश के लिए यह व्याख्या इस तथ्य में निहित प्रतीत होती है इसका पशुधन में अपेक्षाकृत अधिक एन एल बी भाग (34%) था जो राष्ट्रीय स्तर पर 'अन्य परिसम्पत्तियों' में द्वितीय अति महत्वपूर्ण मद थी। पशुधन के अपेक्षाकृत अधिक एन एल बी भाग दर्शाने वाले अन्य राज्य असम, बिहार और जम्मू कश्मीर थे जिनका एन एल बी भाग क्रमशः 33%, 31% और 29% था। कुल परिसम्पत्तियों में भी पशुधन का निश्चित भाग के संदर्भ में भी असम का स्थान सभी राज्यों में 6.5% मूल्य के साथ पहला था। 3% एनएलबी भाग और लगभग 0.45% निश्चित भाग के साथ केरल का स्थान सबसे न्यून था। यह हैरानी की बात है चूंकि, जैसा ऊपर देखा गया है, केरल का परिवार की टिकाऊ वस्तुओं में एन एल बी भाग (70%) सबसे बड़ा था— यह मूल्य अधिकांश राज्यों के परिवार की टिकाऊ वस्तुओं और (पशुधन) के कुल एन एल बी भाग के लगभग बराबर था।

4.2.5. 'कृषि मशीनरी' 'अन्य परिसंपत्तियों' में एक ऐसी मद है जो राष्ट्रीय स्तर पर पशुधन के बाद महत्वपूर्ण

मानी जाती है। राष्ट्रीय स्तर पर 16% के एन एल बी भाग के साथ-पशुधन के लिए 24% से कुछ कम सहित इसकी स्थिति अनेक राज्यों में 'अन्य परिसंपत्तियां' में तीसरा स्थान है। उम्मीद के अनुसार पंजाब (35%) और हरियाणा (38%) जो कृषि क्षेत्र के समृद्धिशाली राज्य हैं। कृषिगत मशीनरी के एनएलबी भाग में अन्य सभी राज्यों से सर्वोपरि है। तथापि, केरल, असम, उड़ीसा, हिमाचल प्रदेश और जम्मू और कश्मीर जहां कृषिगत मशीनरी बहुत कम प्रयोग होती है, एनएलबी शेयर लगभग नगण्य है। इन राज्यों के लिए मूल्य 2% से 4% के बीच पाए गए।

4.2.6 परिसम्पत्तियों की शेष मदों का राष्ट्रीय स्तर पर मामूली महत्व है चूंकि सभी ग्रामीण परिवारों में कुल परिसम्पत्तियों में उनका संयुक्त भाग 3% से भी कम है। वित्तीय परिसम्पत्तियों समूह को छोड़कर उनका एन एल बी भाग भी सभी राज्यों में कमोबेश समान पाया गया। कृषि उपस्कर व्यापार के लिए यह केवल 1% से 4% तक था जबकि 'परिवहन उपस्कर' के लिए यह अधिकांशतः 5% से 9% के बीच था। 'वित्तीय परिसम्पत्तियां' समूह के लिए एन एल बी भाग राज्यों में काफी भिन्नता लिए हुए था जो 7% से 15% के बीच रहा। इस समूह के लिए उड़ीसा ही केवल ऐसा राज्य था जिसका एन एल बी भाग (33%) अपेक्षाकृत अधिक था। 33% का एन एल बी भाग कुल परिसम्पत्तियों में लगभग 6.5% निश्चित भाग के समकक्ष है। इस तथ्य को ध्यान में रखते हुए कि इस समूह का समस्त भारत का निश्चित भाग केवल 1.35% ही है, यह काफी सम्मानजनक आंकड़ा है।

4.3 अन्तर्राज्यीय भिन्नता: शहरी क्षेत्र

4.3.1 भूमि और भवन: शहरी क्षेत्रों के सर्वेक्षण से पता चलता है कि राष्ट्रीय स्तर पर 'भवन' राष्ट्रीय स्तर पर सभी मदों में सबसे बड़ा संघटक है। वास्तव में, 1991 में इसने भूमि का महत्व के क्रम (अर्थात् परिसम्पत्तियों में भाग) में दूसरे स्थान पर धकेल दिया है। भाग में अग्रणीयता वास्तव में मामूली है—'भवनों' के लिए 39 प्रतिशत की तुलना में भूमि के लिए 36% हालांकि, राज्यस्तर पर इसके भाग को देखने पर पता चलता है कि यह अग्रणीयता कितनी सूक्ष्म है। 18 प्रमुख राज्यों में जिन पर विचार किया जा रहा है। 10 राज्यों में भूमि दो अन्य राज्यों में बराबरी के साथ एक अग्रणीय संघटक पाया गया। इस प्रकार 18 प्रमुख राज्यों में से

सारणी-13

30.6.91 की स्थिति के अनुसार शहरी परिवारों की 'अन्य परिसम्पत्तियों' के कुल मूल्य में 'अन्य परिसम्पत्तियों के भिन्न-भिन्न संघटकों का प्रतिशत अंश (एल एल बी)

राज्य	पशुधन और कुक्कुट पालन	कृषि मशीनरी	कौषतर व्यापार उपस्कर	परिवहन उपस्कर	परिवार की टिकाऊ वस्तुएं	वित्तीय सभी परिसम्पत्तियाँ	कुल
आंध्र प्रदेश	1	1	6	11	53	28	100
असम	2	0	3	14	45	36	100

मध्य प्रदेश	2	3	6	15	38	35	100
महाराष्ट्र	1	1	7	9	42	40	100
उड़ीसा	2	0	2	24	37	35	100
पंजाब	2	2	8	19	37	32	100
राजस्थान	3	2	3	17	46	29	100
तमिलनाडु	1	0	6	12	56	25	100
उत्तर प्रदेश	4	2	5	20	43	25	100
पश्चिम बंगाल	1	0	4	6	46	42	100
दिल्ली	0	0	9	9	43	38	100
भारत	2	1	6	12	46	33	100

केवल 6 राज्यों में 'भवन' का स्थान पहला था। इनमें से महाराष्ट्र और गुजरात में जबकि 'भवन क्रमशः 55% से 46% है, फिर भी

4.3.4 "वित्तीय परिसम्पत्तियां" समूह के लिए अधिकांश राज्यों का एन एल बी भाग 28% से 40% के बीच पाया गया। बिहार (47%) और पश्चिम बंगाल (42%) जैसे कुछ राज्यों के लिए इस मद का एन एल बी भाग इस सीमा के ऊपर पाया गया जबकि उत्तर

प्रदेश, तमिलनाडु और जम्मू और कश्मीर प्रत्येक राज्य का इस समूह के लिए 25% भाग न्यूनतम देखा गया। हालांकि 'वित्तीय परिसम्पत्तियां' के लिए निश्चित भाग के संदर्भ में बिहार 11% भाग के साथ उड़ीसा (15%) से नीचे आता है और गुजरात भी (लगभग 12%) भाग के साथ नीचे ही आता है चूंकि इन दो राज्यों के लिए समग्र रूप से 'अन्य परिसम्पत्तियां' का भाग, पूर्व में नोट किए अनुसार, सभी राज्यों में अधिकतम है।

4.3.5 अन्य परिसम्पत्तियों के अंतर्गत शेष संघटकों में से 'परिवहन उपस्कर' लगभग 12%, एन एल बी भाग के साथ राष्ट्रीय स्तर पर 'महत्व में वित्तीय परिसम्पत्तियां' समूह से अगला है। अधिकांश राज्यों के लिए यह एन एल बी भाग उड़ीसा (24%) और उत्तर प्रदेश (20%) को सर्वोच्च स्थान पर ले गया और पर 7% से 17% के बीच रहा। निश्चित संदर्भ में, उड़ीसा 10% भाग के साथ बढ़ते हुए दर्शाता है कि यद्यपि राष्ट्रीय स्तर पर 'परिवहन उपस्कर आदि' मद महत्वहीन है। (इसका निश्चित भाग सभी शहरी परिवारों के लिए 3 है)। फिर भी यह उड़ीसा के शहरी परिवारों में कम से कम 'अन्य परिसम्पत्तियों' का महत्वपूर्ण संघटक है।

4.3.6 शेष तीन मदें, पशुधन, कृषि मशीनरी और कृषितर व्यापार उपस्कर राष्ट्रीय स्तर और राज्य स्तर पर महत्वहीन पाई गई। राष्ट्रीय स्तर पर क्रमशः 2%, 5% और 6% एन एल बी भाग के साथ इनका शहरी परिवारों की कुल सम्पत्तियों का 3% से भी कम भाग था। इन मदों के एन एल बी भागों में राज्यवार भिन्नता अधिक दिखाई नहीं पड़ती है। सभी राज्यों में इन सभी मदों का महत्वहीन निश्चित भाग दिखाई पड़ता है। अखिल भारत आंकड़े 39% से अधिक है, भूमि का मान क्रमशः 18% और 22% से अधिक है, जो सभी राज्यों में भूमि के लिए न्यूनतम मूल्य थे। रूचिकर बात यह है कि ये दोनों राज्य भारत के औद्योगिक रूप से अत्यधिक विकसित राज्य हैं। दिल्ली में, जिसके शहरी भाग में अधिकांशतः शहरी और अर्द्धशहरी भाग शामिल है, उम्मीद के अनुसार भूमि का उच्चतम भाग अर्थात् 50% है जो किसी भी अन्य राज्य से अधिक है। केरल का भी भूमि में ऊंचा भाग

लगभग 47% है। असम (27%), तमिलनाडु (29%) और उड़ीसा (29%) के लिए 'भवन' का अपेक्षाकृत न्यून भाग है।

4.3.2 अन्य परिसम्पत्तियां:

उड़ीसा का राज्यों में अद्वितीय स्थान है। भूमि और भवन—दोनों मदों में से प्रत्येक के लिए इसका भाग अपेक्षाकृत न्यूनतम स्तर 29% था। तत्पश्चात, 'अन्य परिसम्पत्तियां' समूह के लिए इसका भाग 42% था। यह आंकड़ा राष्ट्रीय औसत 25%, से काफी अधिक है और इस संबंध में किसी अन्य राज्य की अपेक्षा अधिक है। गुजरात का स्थान ठीक इससे नीचे है, अन्य परिसम्पत्तियों के भाग के संदर्भ में यह केवल 32% है। पूर्व उल्लिखित कारणों की वजह से, ग्रामीण क्षेत्रों की चर्चा करते समय 'अन्य परिसम्पत्तियों' के अंतर्गत अलग-अलग मदों का एन एल बी भाग सारणी 14 में प्रस्तुत किया गया है।

4.3.3. मद 'परिवार की टिकाऊ वस्तुएं' और 'वित्तीय परिसम्पत्तियां' समूह 'अन्य परिसम्पत्तियों' में अति महत्वपूर्ण है। अन्य परिसम्पत्तियों के दो घटकों का एन एल बी भाग 'क्रमशः 46% और 33% था। इनमें से अधिकांश राज्यों के लिए परिवार की टिकाऊ वस्तुओं का एन एल बी भाग 37% से 50% के बीच घटता बढ़ता रहा। तथापि यह मूल्य केरल और जम्मू एवं कश्मीर के लिए (51%) पाई गई और आंध्र प्रदेश के लिए 53% पायी गई। तथापि इस मद के लिए, निश्चित भाग के संदर्भ में आंध्र प्रदेश का भाग 16% था जो लोग में सबसे ऊपर था। इसके बाद 15.5% निश्चित भाग सहित उड़ीसा का स्थान था।

पारिवारिक परिसम्पत्ति जोतों का आकार वितरण

5.1.1. समस्त भारत स्तर पर परिवारों को भिन्न-भिन्न श्रेणियों के सापेक्ष महत्व का अध्ययन विभिन्न परिसम्पत्ति समूहों के उनके वितरण की सहायता से किया जाता है। सारणी 14, 1991 में अखिल भारत स्तर पर ग्रामीण और शहरी क्षेत्रों के लिए अलग से व्यावसायिक श्रेणियों के अनुसार पारिवारिक परिसंपत्ति जोत में परिवारों का प्रतिशत वितरण दर्शाती है।

5.2 ग्रामीण परिवार

5.2.1 ग्रामीण क्षेत्रों में यह देखा जाता है कि 75% परिवारों के पास, 1991 के मूल्यों पर मूल्यांकित 5000 रुपया अथवा इससे भी कम मूल्य की परिसम्पत्तियां हैं। अन्य 7.4% परिवार 5000-10000 रुपए के परिसम्पत्ति समूह से संबंधित हैं। इस प्रकार 1991 में 1/6 ग्रामीण

सारणी-14

30.6.91 की स्थिति अनुसार प्रत्येक व्यावसायिक श्रेणी के लिए पारिवारिक परिसम्पत्ति जोत के अनुसार ग्रामीण परिवारों का प्रतिशत वितरण

व्यावसायिक श्रेणी	परिवार की परिसम्पत्ति जोत (.000 रुपए)										
	5 से कम	5-10	10-20	20-30	30-50	50-70	70-100	100-150	150-250	250 और ज्यादा	सभी श्रेणी
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
कृषक	1.1	2.9	7.5	8.5	15.7	12.2	13.4	12.7	12.3	13.6	100.0
गैर कृषक											
कृषि श्रमिक	23.9	22.9	26.0	10.9	9.8	3.2	1.8	0.8	0.5	0.1	100.0
कामगार	19.3	12.5	17.4	13.6	16.0	7.6	6.7	4.1	2.4	0.4	100.0
अन्य	16.4	11.1	17.2	10.7	12.8	9.4	7.8	6.1	4.8	3.7	100.0
कुल जोड़	19.9	16.2	21.0	11.1	11.9	6.6	5.1	3.7	2.7	1.8	100.0
सभी	7.5	7.4	12.1	9.4	14.4	10.3	10.6	9.7	9.1	9.6	100.0

परिवारों के पास, 10,000 रुपया अथवा कम की अपनी संपत्ति देखी गई है। इस परिदृश्य से दूसरी ओर 28% ग्रामीण परिवारों के पास एक लाख और इससे अधिक रुपए मूल्य की अपनी परिसम्पत्तियां थी। शेष 57% परिवार 10 हजार रुपए से एक लाख रुपए के बीच मध्यम पांच परिसम्पत्ति समूहों में वितरित पाई गई।

5.2.2. विभिन्न श्रेणियों में, ग्रामीण क्षेत्रों में कृषक, संख्या के लिहाज से प्रभावशाली श्रेणी गैर-कृषकों से अधिक समृद्ध पाई गई। प्रति कृषक परिवार कुल परिसम्पत्तियों का मूल्य 1.4 लाख रुपए पाया गया जो गैर कृषक परिवारों (देखें सारणी-5) की कुल परिसम्पत्तियों (0.4 लाख रुपए) के औसत मूल्य का दुगुना है। हालांकि कृषक परिवारों में, कुछ आंशिक कृषक थे जो 5000 रुपए और 5000 रुपए से 10000 रुपए तक की दो न्यूनतम परिसम्पत्ति जोत समूहों से सम्बन्धित है। ये कुल कृषक परिवारों का 1.1% और 2.9% हैं। इस संदर्भ में देखा जा सकता है कि कुछ परिवारों को कुछ भूमि जोतने के आधार पर कृषक परिवार में वर्गीकृत कर दिया गया है यद्यपि उनकी आयका प्रमुख स्रोत कृषि से भिन्न अन्य स्रोत से आता है।

5.2.3. गैर कृषक परिवार जो ग्रामीण परिवारों का 34% हैं (देखिये सारणी 2) ग्रामीण क्षेत्रों में सभी परिवारों के स्वामित्व में कुल परिसम्पत्तियों का केवल 12% ही देखा गया है। इसके अतिरिक्त परिसम्पत्ति जोत का पैटर्न गैर-कृषक परिवारों की दयनीय स्थिति दर्शाता है। 36% गैर-कृषकों के पास केवल 10,000 रुपया अथवा कम मूल्य की परिसम्पत्तियां हैं। गैर-कृषक परिवारों की विभिन्न श्रेणियों में कृषि श्रमिक परिवारों की हालत बदतरिन दिखाई देती है। 24% ऐसे परिवार 5000 या कम की न्यूनतम परिसम्पत्ति समूह में आते हैं, 23% परिवार 5,000 रुपए से 10,000 रुपए के बीच आते हैं। तथापि कारीगरों की हालत जो कुल ग्रामीण परिवारों का केवल 3.8% है, कृषि श्रमिकों से कुछ बेहतर दिखाई पड़ते हैं। कारीगर परिवारों का लगभग 32% जो कृषि श्रमिकों का 47% से काफी कम है, 10,000 रुपए तक की परिसम्पत्ति समूह से सम्बन्धित है। अन्य गैर-कृषक परिवारों अर्थात्, कृषि श्रमिकों और कारीगरों को छोड़कर अन्य परिवारों की स्थिति पूर्व के

दो प्रकार के परिवारों की अपेक्षा कुछ बेहतर दिखाई पड़ती है। इन 'अन्य' ग्रामीण परिवारों का लगभग 16% और 11% क्रमशः 5,000 रुपए और 5000-10000 रुपए के परिसम्पत्ति समूह में आते हैं। यह भी नोट किया जा सकता है कि 15% ग्रामीण परिवार जो कृषक और गैर-कृषक हैं, की परिसम्पत्तियां 10,000 रुपए से कम है।

5.3 शहरी परिवार

5.3.1 यह सारणी 16 से देखा जा सकता है कि शहरी क्षेत्रों में परिसम्पत्ति जोत के वितरण आकार के दो टर्मिनल समूहों में परिवारों का प्रतिशत ग्रामीण क्षेत्रों के परिवारों की अपेक्षा काफी अधिक पाया गया है। तथापि, अधिकांश मध्यम समूहों में, प्रतिशतता ग्रामीण क्षेत्रों में अधिक है। 1991 में 5000 रुपए मूल्य की परिसम्पत्तियों से कम के स्वामित्व वाले शहरी परिवारों का प्रतिशत 18 पाया गया है कि इसी परिसम्पत्ति समूह में आने वाले ग्रामीण परिवारों की प्रतिशतता लगभग अढ़ाई गुना है। एक लाख रुपए और इससे अधिक राशि की परिसम्पत्ति जोतों की आकार कोष्ठक के 'अन्य' छोर पर, शहरी परिवारों का संकेन्द्रण ग्रामीण परिवारों की अपेक्षा काफी अधिक है। इस उच्च समूह में परिवारों का प्रतिशत ग्रामीण क्षेत्रों में 28% की तुलना में शहरी क्षेत्र में 33% देखा गया है।

5.3.2 10000 रुपए तक के परिसम्पत्ति समूहों में शहरी परिवारों की प्रतिशतता अन्य शहरी परिवारों की अपेक्षा स्व-नियोजित परिवारों में कम पाई गई परिवारों की दो श्रेणियों के मध्य स्वनियोजितों का निष्पादन इस ख्याल से बेहतर रहा कि प्रति स्वनियोजित परिवार कुल परिसम्पत्तियों का औसत मूल्य गैर-स्वनियोजित परिवारों की अपेक्षा काफी अधिक (लगभग 1.9 लाख) है।

वास्तव में, सभी शहरी परिवारों का 34% भाग रखने वाले स्वनियोजित परिवारों का कुल शहरी परिसम्पत्तियों का लगभग 45% है।

5.3.3. स्वनियोजित परिवारों में, उन परिवारों की हालत जो 'सेवा कामगार' और 'उत्पादन कामगार आदि' के रूप में कार्यरत है। परिसम्पत्ति जोत के संबंध में शेष स्वनियोजित परिवारों की अपेक्षा बदतर है। इन परिवारों

की परिसंपत्ति जोत का पैटर्न अन्य शहरी परिवारों की परिसंपत्ति जोत के समान पायी जाती है। जबकि भिन्न-भिन्न स्वनियोजित समूहों के 5% से 27% परिवार 10000 रुपए अथवा कम के परिसंपत्ति समूह में सूचित किए गए हैं, फिर भी 'सेवा कामगार' (27%) के अंतर्गत परिवारों की श्रेणी के अनुसार अधिकतम प्रतिशतता सूचित की गई है, इसके बाद 'उत्पादन कामगार' (22%) समूह का स्थान है। मजेदार बात यह है कि शहरी क्षेत्रों में 'किसान' उनके स्वामित्व की संगृहीत परिसंपत्तियों के मूल्य के संदर्भ में अति समृद्धिशील वर्गों में से एक हैं किसानों के लिए, परिवारों का प्रतिशत नीचे के तीन परिसंपत्ति समूहों में न्यूनतम पाया जाता है और 2.5 लाख रुपए और अधिक के शिरवर समूह को छोड़कर

शिरवर के तीन परिसंपत्ति समूहों में उच्चतम है जहां यह 'व्यावसायिक तकनीकी आदि' समूह के अत्यधिक निकट पाई जाती है। यद्यपि प्रति परिवार परिसंपत्तियों का समग्र उच्चतर मूल्य के मानदण्ड का अनुप्रयोग 'व्यावसायिक आदि' और 'प्रशासनिक आदि' इन दो समूहों को 'किसानों' से अधिक है। ये दोनों समूह किसानों की अपेक्षा 30000 रुपए तक के लगभग चार परिसंपत्ति समूहों में अधिक प्रमुख पाए गए हैं तथापि, इन दो व्यावसायिक श्रेणियों के लिए अधिकतम परिसंपत्ति समूह और मध्यम समूह (50 से 70 हजार रुपए तक) में 'किसानों' की अपेक्षा अधिक संख्या समग्र संतुलन को उनके पक्ष में झुकाती हुई प्रतीत होती है।

पारिवारिक ऋण ग्रस्तता

6.1.1. जैसा कि पहले कहा गया है, इस रिपोर्ट में 30.6.91 को बकाया नकद ऋण के संदर्भ में पारिवारिक ऋण-ग्रस्तता के बारे में मूलभूत अनुमान दिए गए हैं।

यह नोट किया जा सकता है कि अधिकांश रा.प्र.सं. अनुमानों की तरह ये भी साक्षात्कार विधि के माध्यम से एकत्रित सूचना पर आधारित होते हैं और इसलिए वास्तव में यह 'सूचित की गई ऋण-ग्रस्तता' से संबंधित है। ऋण-ग्रस्तता की घटनाओं को दर्शाने वाले ऋण ग्रस्त परिवारों का प्रतिशत, प्रति परिवार ऋण की औसत राशि और भारत के ग्रामीण और शहरी क्षेत्रों के लिए ऋण परिसम्पत्ति 'अनुपात सारणी 15 में प्रस्तुत किए गए हैं। 48वें दौर के परिणाम दर्शाते हैं कि 30.6.91 को सहस्त भारत स्तर पर, सभी परिवारों के लिए ऋण ग्रस्तता की घटनाएं ग्रामीण क्षेत्रों में 23% और शहरी क्षेत्रों में 19% है। प्रति परिवार ऋण की औसत राशि शहरी क्षेत्र की अपेक्षा ग्रामीण क्षेत्र में काफी कम पाई गई जो क्रमशः 1,906 रुपए और 3,618 रुपए है।

6.1.2 किसी समय, किसी परिवार का बकाया ऋण उसकी परिसम्पत्तियों पर निर्भर है—चाहे ये किसी व्यक्ति अथवा अभिकरण को गिरवी रखी गई हो अथवा धरोहर पर रखी गई हों। किसी परिवार समूह के लिए यह प्रश्न स्वभाविक रूप से उठता है कि किसी दी गई तारीख को उनका बकाया ऋण उनकी परिसम्पत्तियां से सम्बन्धित है। "ऋण परिसम्पत्ति" अनुपात का अध्ययन

सम्भवतया इस प्रश्न का उत्तर देता है। ऋण-परिसम्पत्ति अनुपात को परिवार के किसी समूह के लिए किसी दी गई तारीख को बकाया ऋण की औसत राशि जिसे किसी दी गई तारीख को उनके स्वामित्ववाली परिसम्पत्ति की औसत राशि की प्रतिशतता के रूप में अभिव्यक्त किया जाता है, के रूप में परिभाषित किया जाता है। इस प्रकार, यह अनुपात किसी दी गई तारीख को किसी परिवारों के किसी समूह विशेष पर ऋण भार को दर्शाता है। 30.6.91 की स्थिति के अनुसार समस्त भारत स्तर पर यह ऋण-परिसम्पत्ति अनुपात शहरी क्षेत्रों के लिए 2.5% और ग्रामीण क्षेत्रों के लिए 1.875 पाया गया। इस प्रकार 30.6.91 को यह दिखाई देता है कि शहरी भारत पर ग्रामीण क्षेत्र की अपेक्षा अधिक ऋण-भार है।

सारणी-15

30.06.91 की स्थिति के अनुसार ऋण-ग्रस्तता की घटनाएं, ऋण की औसत राशि और ग्रामीण और शहरी परिवारों का ऋण-परिसम्पत्ति अनुपात

मद	ग्रामीण	शहरी
ऋण ग्रस्तता की घटनाएं	23.4%	19.3%
ऋण की औसत राशि	1.906	3.618
औसत परिसम्पत्तियाँ (रुपए)	1.07,007	1.44,330
ऋण-परिसम्पत्ति अनुपात	1.78%	2.51%

6.2. ग्रामीण परिवारों की ऋण ग्रस्तता

6.2.1 प्रमुख राज्यों के लिए विभिन्न व्यावसायिक श्रेणियों के ग्रामीण परिवारों के लिए ऋण-ग्रस्तता की घटनाएं और ऋण को औसत राशि सारणी-16 में प्रस्तुत है। सारणी 30.6.91 को ग्रामीण परिवारों के लिए व्यावसायिक श्रेणियों और राज्यों में ऋण-ग्रस्तता की घटनाएं और ऋण की औसत राशि दोनों में व्यापक भिन्नता दर्शाता है।

6.2.2 राज्यवार ऋण-ग्रस्तता की घटनाएं :

ग्रामीण भारत में, 1991 में राज्यों में अधिकतम ऋण-ग्रस्तता की घटनाएं आंध्रप्रदेश (35 प्रतिशत) और तमिलनाडु (30 प्रतिशत), असम (610) और जम्मू और

कश्मीर (14 प्रतिशत) की बहुत ही कम ऋण-ग्रस्तता की घटनाएं थी।

6.2.3 राज्यवार प्रति परिवार ऋण की औसत राशि

जहाँ तक प्रति परिवार ऋण की औसत राशि का सम्बन्ध है, कृषि में दो समृद्धिशाली राज्य हरियाण और पंजाब, ग्रामीण क्षेत्रों में सर्वोच्च मूल्य 4,397 रु और 4,129 रु दर्शाते हैं। दूसरी ओर इन औसतों के लिए निम्नतर मूल्य पूर्वी क्षेत्र के अनेक राज्यों में देखा जाता है। उदाहरण के लिए, असम, बिहार और उड़ीसा के लिए औसत मूल्य क्रमशः 252 रु, 632 रु और 1,054 रु है।

6.2.4. व्यावसायिक श्रेणियाँ: ग्रामीण क्षेत्र में ऋण-ग्रस्तता सभी राज्यों में गैर-कृषक परिवारों की

सारणी-16

30.6.91 की स्थिति के अनुसार प्रमुख राज्यों की विभिन्न व्यावसायिक श्रेणियों के लिए ऋण-ग्रस्तता की घटनाएं और प्रति परिवार ऋण औसत राशि

अपेक्षा कृषक परिवारों में ज्यादा व्यापक पायी जाती है। समस्त भारत स्तर पर, कृषक और गैर कृषक परिवारों में क्रमशः 26 प्रतिशत और 19 प्रतिशत ऋण-ग्रस्त है। कृषक परिवारों की तुलना में प्रति परिवार औसत ऋण गैर-कृषक परिवारों में काफी कम पाया गया, असम और हिमाचल प्रदेश इसके अपवाद थे जहाँ प्रति परिवार ऋण की औसत राशि गैर-कृषक परिवारों के लिए कृषक परिवारों की अपेक्षा आंशिक रूप से अधिक थी। समस्त भारत स्तर पर कृषक और गैर-कृषक परिवारों में

30.6.91 को प्रति परिवार ऋण की औसत राशि क्रमशः 2,294 रु और 1,151 रु थी।

6.3 शहरी परिवारों की ऋण-ग्रस्तता

सारणी-17, 30.6.91 की स्थिति के अनुसार प्रमुख राज्यों की विभिन्न व्यावसायिक श्रेणियों के शहरी परिवारों के लिए ऋण-ग्रस्तता की घटनाएं और प्रति परिवार ऋण की औसत राशि दर्शाती है।

सारणी - 17

30.6.91 को स्थिति के अनुसार प्रमुख राज्यों की विभिन्न व्यावसायिक श्रेणियों के लिए ऋण-ग्रस्तता को घटनाएं और प्रति परिवार ऋण की औसत राशि।

तमिलनाडु	22.3	26.4	25.0	5551	5459	5447
उत्तर प्रदेश	18.2	10.2	14.0	2483	1358	1915
पश्चिम बंगाल	14.3	18.5	17.1	1504	2020	1847
दिल्ली	22.0	15.9	17.7	20911	2225	7947
भारत	19.9	18.9	19.3	4434	3198	3618

6.3.2. राज्यवार ऋण-ग्रस्तता की घटनाएं

शहरी क्षेत्र में भी ऋण-ग्रस्तता की सीमा के लिए केरल (32 प्रतिशत) आंध्र प्रदेश (31 प्रतिशत) और तमिलनाडु (25 प्रतिशत) सूची में सबसे पहले उपर हैं। इस क्षेत्र में भी असम (6 प्रतिशत) सबसे नीचे है जो बिहार (8 प्रतिशत) के काफी निकट है।

6.3.3. राज्य-वार प्रति परिवार औसत ऋण

शहरी क्षेत्र में, राज्यों में, दिल्ली प्रति परिवार औसत ऋण (7,947 रु) उच्चतम दर्शाती है, इसके बाद तमिल नाडु (5447) केरल (5,178 रु) और पंजाब (5,133 रु) का स्थान है जब कि बिहार, जम्मू एवं कश्मीर और हरियाणा औसत मूल्यों क्रमशः 1,211 रु, 1,686 रु और 17,60 रु के साथ किनारे पर हैं।

6.3.4. व्यावसायिक श्रेणियाँ: शहरी क्षेत्र में स्व-नियोजित और अन्य शहरी परिवारों में ऋण-ग्रस्तता की घटनाएं और इनके मूल्य कमोवेश समान स्तर के हैं। तथापि, राष्ट्रीय स्तर पर स्व-नियोजित की प्रति परिवार औसत ऋण का मूल्य तदनरूपी गैर-स्वनियोजित परिवारों के मूल्य से 40 प्रतिशत अधिक है। हालांकि, ऋण-ग्रस्तता की घटनाओं और प्रति परिवार औसत ऋण के मामलों में राज्यों में काफी विभिन्नता देखी जाती है। जबकि महाराष्ट्र, तमिलनाडु और पश्चिम बंगाल में अन्य शहरी परिवारों में ऋण-ग्रस्तता का प्रसार अधिक है, फिर भी शेष प्रमुख राज्यों में ऋण ग्रस्तता की घटनाएं स्व नियोजित परिवारों में अधिक थी। जहाँ तक प्रति परिवार औसत ऋण का सम्बन्ध है, हरियाणा और पश्चिम बंगाल दो अपवाद हैं जिन्होंने अन्य परिवारों के लिए अधिक औसत सूचित की है जब कि शेष प्रमुख राज्यों में औसत स्व-नियोजित परिवारों के लिए अधिक हैं। दिल्ली और असम के लिए स्वनियोजित परिवारों के लिए औसत लगभग 10 गुना है और यह मूल्य जम्मू और कश्मीर के लिए अन्य शहरी परिवारों में तदनरूपी औसत अलग-अलग राज्यों में पांच गुण है। तथापि, अधिकांश अन्य राज्यों में, सापेक्ष रूप से बोलते हुए, स्व नियोजित के लिए प्रति परिवार औसत ऋण अन्य शहरी परिवारों के लिए प्रति परिवार औसत ऋण मूल्य की तुलना में इतना अधिक नहीं है।

स्रोत : जैसा सारणी-1 के लिए

3. पर्ववर्ती दौरों में परिवार की अन्य देयताएं परिवार द्वारा लिए गए नकद ऋण को 'ऋण' में शामिल किया गया था। इस सीमा तक, भिन्न-भिन्न दौरों में तुलना की प्रक्रिया को ठेस पहुंची है चूंकि ऋण ग्रस्तता की घटनाओं और राशि सम्बन्धी पूर्ववर्ती आंकड़े पूरी तरह से 1991 के आंकड़ों से तुलनीय नहीं हैं।

6.4. पारिवारिक ऋण-ग्रस्तता में परिवर्तन

6.4.1. ग्रामीण परिवार: मौजूदा सर्वेक्षण के परिणाम की अखिल भारत ऋण एवं निवेश सर्वेक्षण-71 और अखिल भारत ऋण एवं निवेश सर्वेक्षण-81 के परिणामों से तुलना सारणी 20.3 में दी गई है। सारणी दर्शाती है कि ऋण-ग्रस्तता की घटनायें 1991 में समस्त भारत स्तर पर 1981 के अनुमानों की तुलना में ग्रामीण क्षेत्रों में कुछ बढ़ी हैं जो 20 प्रतिशत से 30 प्रतिशत तक हैं। हालांकि 1991 के अनुमान 1971 के 43 प्रतिशत के अनुमानों से काफी कम हैं। तथापि, ऋण-ग्रस्तता की घटनाओं का राज्यवार पैटर्न 1981 से कमोबेश वही रहा है। आंध्र प्रदेश, केरल, तमिलनाडु और राजस्थान जैसे राज्य अत्यधिक ऋण-ग्रस्तता वाले बने रहे जब कि असम और हरियाणा, 1991 में भी, कम ऋण-ग्रस्तता वाले राज्यों में से थे। 80 के दशक में ऋण-ग्रस्तता का राज्यवार पैटर्न में कोई खास परिवर्तन ही हुआ जैसा 70 के दशक में देखने को आता था। उदाहरण के लिए केरल नीचे से दूसरे स्थान पर जब कि जम्मू और कश्मीर 1971 में ऊपर से छठे स्थान पर था। सापेक्ष स्थिति 1981 में काफी बदल गई जब कि केरल उपर से दूसरे स्थान पर और जम्मू और कश्मीर नीचे से दूसरे स्थान पर रहा।

6.4.2 शहरी परिवार: सारणी 19 अखिल भारत ऋण और निवेश सर्वेक्षण 91 और अखिल भारत ऋण और निवेश सर्वेक्षण 81 के दौरों में ऋण ग्रस्त शहरी परिवार के प्रतिशत के अनुमानों की तुलना करती है। यह तुलना मौजूदा दौर (1991) और पूर्ववर्ती सर्वेक्षण (1981) के बीच की तुलना तक सीमित है। चूंकि रा.प्र. स. 26 वां दौर (1971) के सर्वेक्षण परिणाम प्रकाशित नहीं हुए। ऋण ग्रस्त परिवारों की प्रतिशता 1991 में आंशिक रूप से वृद्धि हुई जो समस्त भारत स्तर पर 1981 में 17.4 प्रतिशत से बढ़कर 1991 में 19.3 प्रतिशत हो गई। तथापि, ऋण ग्रस्तता में अंतर्राज्यीय भिन्नता का पैटर्न 1981 की तरह वही बना रहा। केरल तमिलनाडु और आंध्र प्रदेश सर्वाधिक ऋण ग्रस्त राज्यों में बने रहे जबकि असम बिहार और जम्मू और कश्मीर कम ऋण गस्तता वाले राज्यों में रहे चाहे 1981 हो अथवा 1991।

6.5 ग्रामीण परिवारों की ऋण परिसम्पत्ति अनुपात में परिवर्तन

6.5.1 सारणी 22 ग्रामीण परिवारों को विभिन्न व्यावसायिक श्रेणियों की ऋण ग्रस्तता को घटनाओं और ऋण परिसम्पत्ति अनुपात में परिवर्तन दर्शाती है। यह देखा गया है कि कुल परिसम्पत्तियों के औसत मूल्य की तरह प्रति परिवार ऋण की औसत राशि 1991 को समाप्त दो दशकों के दौरान ग्रामीण परिवारों में काफी बढ़ी है। प्रति परिवार औसत राशि ऋण 1971 में 500 रुपये और 1981 में 661 रुपये की तुलना में 1991 में 1906 रुपये हो गई। हालांकि 1971 से 1981 के दौरान कुल समाहारित ऋण में वृद्धि कुल परिसंपत्तियों के समाहारित मूल्य में वृद्धि के समानुपात से कम थी और इसलिए ऋण परिसंपत्ति अनुपात 1971 में 4.43% से काफी घटकर 1981 में केवल 1.83 प्रतिशत रह गया।

सारणी 19

6.5.2 1971 और 1981 में कृषकों के संबंध में ऋण परिसम्पत्ति अनुपात कमोवेश सभी परिवारों के ऋण परिसम्पत्ति के समान ही था। ऋण परिसम्पत्ति अनुपात कृषकों की तुलना में गैर कृषकों के लिए अधिक पाया गया। इसलिए ऋण का बोझ 70 के दशक में कृषकों की अपेक्षा गैर कृषक परिवारों के लिए इस दशक के दौरान यह समानुपात 8.42 प्रतिशत से घटकर 2.28 प्रतिशत रह गया। भारतीय रिजर्व बैंक (1997) द्वारा

प्रकाशित पुस्तिका "ग्रामीण परिवारों" की ऋण ग्रस्तता और संस्थागत वित्त की उपलब्धता "बतलाती है कि कृषकों के संबंध में" ऋण परिसम्पत्ति अनुपात 1962 और 1971 के मध्य समग्र देश के ग्रामीण क्षेत्र के लिए लगभग 7 प्रतिशत से घटकर 4 प्रतिशत हो गया। इस प्रकार यह भी निष्कर्ष निकाला जा सकता है कि ऋण बोझ के घटने का रुख 1981 में समाप्त दो दशकों में जारी रहा है।

सारणी 20

1971-1981 और 1991 में ग्रामीण परिवारों में ऋण ग्रस्तता की घटनाएं और ऋण परिसंपत्ति के अनुपात

स्रोत जोत सारणी 1 के लिए

6.5.3 अध्ययनाधीन द्वितीय दशक "अर्थात् 1991 में समाप्त दशक" की तस्वीर उपर्युक्त तस्वीर से काफी भिन्न थी। 1981-91 तक की अवधि के दौरान, समग्र ग्रामीण क्षेत्र के लिए "ऋण परिसम्पत्ति" अनुपात स्थिर रहा जो 1981 में 1.83 प्रतिशत की तुलना में 1991 में 1.78 प्रतिशत था। हालांकि व्यावसायिक श्रेणी के अनुसार अलग अलग अनुमान देखने पर पता चलता है कि राष्ट्रीय स्तर पर कृषक परिवारों के अनुपात में आंशिक कमी आई है जो 1981 में 1.80 प्रतिशत से घटकर 1991 में 1.61% रह गया। इस अनुपात में राष्ट्रीय स्तर पर गैर-कृषक परिवारों के लिए 1981 में 2.28 प्रतिशत से 1991 में 3.01 प्रतिशत की वृद्धि हुई। इस प्रकार गैर कृषकों का ऋण बोझ 70 के दशक में घटने के बाद 80 के दशक में वृद्धि हुई है। हालांकि कृषक परिवारों के लिए यह बोझ 1961 से लगातार घटता रहा है।

6.5.4 अंतर्राज्यीय भिन्नता में परिवर्तन कृषक परिवारों के लिए इस अनुपात हेतु राज्यवार विश्लेषण

दर्शाता है कि अधिकांश राज्यों में यह 80 के दशक में घटा है। यह गिरावट सामान्य रूप से कर्नाटक 1981 में 3.89 प्रतिशत 1991 में 2.38 प्रतिशत और तमिलनाडु में 1981 में 5.36 प्रतिशत 1991 में 3.66 प्रतिशत जैसे कुछ राज्यों को छोड़कर जहां यह गिरावट नोट करने लायक है, आंशिक है। जहां तक गैर कृषक परिवारों का संबंध है 10 राज्य वृद्धि दर्शाते हैं और शेष 7 अनुपात में गिरावट दर्शाते हैं। हालांकि यह वृद्धि और गिरावट कृषक परिवारों के लिए देखे गए अनुपात से तेज थे। 1981-91 के दौरान कुछ राज्यों जैसे आंध्र प्रदेश 1981 में 3.94 प्रतिशत 1991 में 9.69 प्रतिशत हरियाणा 1981 में 0.97 प्रतिशत 1991 में 4.91 प्रतिशत और पश्चिम बंगाल में 1981 में 1.79 प्रतिशत 1991 में 3.95 प्रतिशत में तीव्र तेजी आई। इसके विपरीत गुजरात 4.06 प्रतिशत 1981 में 1.12 प्रतिशत 1991 में और महाराष्ट्र 1981 में 9.77 प्रतिशत 1991 में 3.21 प्रतिशत जैसे राज्यों में 1981-91 के दौरान अपेक्षाकृत तीव्र गिरावट देखी गई।

6.6 शहरी परिवारों की ऋण-परिसम्पत्ति के अनुपात में परिवर्तन

6.6.1 शहरी परिवारों का ऋण परिसम्पत्ति अनुपात का विश्लेषण कुछ रूचिकर परिणाम दर्शाता है। सारणी 22, 1981 और 1991 के लिए शहरी परिवारों के भिन्न-भिन्न व्यावसायिक समूहों के "ऋण-परिसम्पत्ति" अनुपात दर्शाती है। 80 के दशक के दौरान समग्र शहरी क्षेत्र के लिए ऋण परिसम्पत्ति अनुपात लगभग अपरिवर्तनीय बने रहे जो राष्ट्रीय स्तर पर लगभग 2.5% थे। इस

अवधि के दौरान वे अनुपात ग्रामीण परिवारों की अपेक्षा शहरी परिवारों के लिए हमेशा अधिक पाए गए।

6.6.2 यह अनुपात "स्व-नियोजित" परिवारों और अन्य शहरी परिवारों के लिए लगभग समान रहा जिसकी प्रतिशतता 1981 में क्रमशः 2.66% और 2.44% तथा 1991 में क्रमशः 2.34% और 2.64% रही। इस प्रकार 1991 में समाप्त हुए बशक के दौरान स्व-नियोजित परिवारों पर अन्य शहरी परिवारों के समान ही ऋण-बोझ था।

सारणी 23

6.6.3 अन्तर्राज्यीय भिन्नता में परिवर्तन :

सारणी 23 में राज्यवार विश्लेषण दर्शाता है कि 1991 में समाप्त दशक के दौरान राज्यों में इस अनुपात में जबकि उतार-चढ़ाव आया है फिर भी मोटे तौर पर यह उतार चढ़ाव सामान्य रहा है। समग्र शहरी परिवारों पर 80 के दशक के दौरान विचार करते हुए इस अनुपात में किसी भी राज्य में कोई तीव्र उतार-चढ़ाव दिखाई नहीं पड़ा है। तथापि, कुछ ऐसे मामले हुए हैं जब परिवारों को अलग से उनकी व्यावसायिक श्रेणी पर विचार किया गया

तो 1981 के मूल्यों की तुलना में इस अनुपात में दिल्ली (1981 में 2.32%, 1991 में 6.01%) और असम (1981 में 0.96%, 1991 में 2.65%) की वृद्धि हुई है। इसके विपरीत, स्व-नियोजित परिवारों के लिए राजस्थान में इस अनुपात में तीव्र गिरावट देखी गई है जो 1981 में 3.14% से घटकर 1991 में 1.40% रह गई। इसी प्रकार जब अन्य शहरी परिवारों पर विचार किया जाता है तो आन्ध्र प्रदेश (1981 में 2.88%, 1991 में 5.45%) और कर्नाटक (1981 में 2.08%, 1991 में 3.96%) की तीव्र वृद्धि देखने में आई है।
