NSS 45TH ROUND (JULY 1989—JUNE 1990)

SECTION—ONE

**A Note on Survey of Unorganised Manufacture  
(All-India) : NSS 45th Round (July 1989—June 1990)**

**Survey of Unorganised Manufacturing : Non-Directory  
Establishments and Own Account Enterprises (Statewise)  
NSS 45th Round (July 1989—June 1990)**

The survey of unorganised manufacturing establishments and own account enterprises (OAEs) was undertaken in 1977 by the Central Statistical Organisation in collaboration with the State Statistical Organisations. The frame based on the economic census, small establishments (employing at least one hired worker) and enterprises not employing any hired worker (classified referred to as 'own account enterprises' (OAEs)) were surveyed in the thirty-third round of NSS during 1975-76.

12. A second all-India Economic Census was conducted in 1984. This census had a wider coverage than the earlier one, since it covered the own account enterprises also. In this census, the establishments were further split into two categories of (a) Directory Establishments (DEs) and (b) Non-Directory Establishments (NDEs); the former employed a total of six or more workers, while the latter employed a total of one or less number of workers. Thus, the second Economic Census dealt with three categories of enterprises viz. DEs, NDEs and OAEs. As a follow-up to this census, NDEs and OAEs engaged in manufacturing and service activities were surveyed by NSSO in the forty-fifth round during 1989-90.

13. A similar survey was undertaken again in the forty-fifth round of NSS during July 1989 to June 1990 using the frame provided by the second Economic Census.

14. The coverage of the forty-fifth round of NSS is provided in all unorganised manufacturing and service establishments and own account enterprises (OAEs) included in the survey. The establishments included all the

establishments in the forty-fifth round with the exception of the Union Territories of Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep. Delhi participated on a trade matching basis; Goa, Gujarat, Haryana, Jammu & Kashmir, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal participated on an equal matching basis in the urban and rural sectors respectively, and the rest of the Union Territories participated on an equal matching basis. The number of first stage units surveyed in rural and urban areas was 14,984 (7,664 villages and 7,320 urban blocks) and 17,080 (8,416 villages and 8,664 urban blocks) respectively. The establishments in the rural sector were surveyed on a double matching basis. The establishments in the urban sector were surveyed on a double matching basis. The establishments in the rural sector were surveyed on a double matching basis. The establishments in the urban sector were surveyed on a double matching basis.

14. It is pertinent to point out here that the forty-fifth round of the NSS has, as stated in the preceding paragraph, covered only the DEs and NDEs in the manufacturing sector (including repair services). The Directory Manufacturing Establishments (DMEs) which employ 10 or more workers and are power and the NDEs which employ 20 or more workers without using power are covered by law to register themselves under sections 10(a) and 10(b) respectively of the Factories Act, 1948. They are hence known as factories and are covered under the provisions of the Annual Survey of Industries (ASI). The rest

# A NOTE ON SURVEY OF UNORGANISED MANUFACTURE (ALL-INDIA) : NSS 45TH ROUND (JULY 1989—JUNE 1990)

## SECTION—ONE

1.1 The non-agricultural sector is an important and growing segment of the Indian economy. But statistics on the unorganised part of this sector are not available regularly in usable form. To provide some basic information of the non-agricultural sector for planning, administration and compilation of national and regional accounts, the Government of India decided in 1976 to launch a country-wide economic census. Accordingly, a countrywide census of non-agricultural enterprises employing at least one hired worker on a fairly regular basis (hereafter to be referred to as 'establishments') was undertaken in 1977 by the Central Statistical Organisation in collaboration with the State Statistical Bureaus. Using the frame based on this economic census, small establishments (employing at least one hired worker) and enterprises not employing any hired worker [hereafter referred to as 'own account enterprises (OAES)'] engaged in manufacturing and repairing activities were surveyed in the thirty-third round of NSS during 1978-79.

12. A second all-India Economic Census was conducted in 1980. This census had a wider coverage than the earlier one, since it covered the own account enterprises also. In this census, the establishments were further split into two categories of (i) Directory Establishments (DEs) and (ii) Non-Directory Establishments (NDEs); the former employed a total of six or more workers, while the latter employed a total of five or less number of workers. Thus, the second Economic Census dealt with three categories of enterprises viz., DEs, NDEs and OAES. As a follow-up to this census, NDEs and OAES engaged in manufacturing and repairing activities were surveyed by NSSO in the fortieth round during 1984-85. A similar survey was undertaken again in the fortyfifth round of NSS during July 1989 to June 1990 using the frame provided by the second Economic Census.

1.3 The coverage of the fortyfifth round of NSS is restricted to all non-directory manufacturing and repairing to all non-directory manufacturing and re-manufacturing and repairing enterprises (OAMREs). These establishments enterprises included all the

units covered by the two digit codes (called divisions) 20 to 39 and 97 under the revised National Industrial Classification (1987 (referred henceforth as NIC, 1987); the relevant extract is provided in APPENDIX-III. In its geographical coverage the fortyfifth round survey covered the whole of the Indian Union except two districts of Jammu & Kashmir (viz., Ladakh and Kargil) and some interior villages of Nagaland situated beyond five kilometers from the bus route. All the States/Union Territories participated in the fortyfifth round with the exception of the Union Territories of Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep. Delhi participated on a triple matching basis; Goa, Gujarat, Haryana, Jammu & Kashmir, Manipur on a double matching basis; Maharashtra and Nagaland on one-and-a-half-times and equal matching basis in the urban and rural sectors respectively; and the rest of the States/Union Territories participated on an equal matching basis. The number of first stage units surveyed in the central sample was 14,984 (7,664 villages and 7,320 urban blocks) and 17,080 first stage units (8,352 villages and 8,728 urban blocks) were surveyed in the state-sample. The estimates presented in this report are at the all-India level and are based on the central samples only. These estimates have been arrived at by taking into account the data collected from a total of 1.23 lakh enterprises, of which 72.08 percent were own account enterprises and the rest were non-directory establishment; 53.85 percent of the total enterprises were from the rural sector and the rest from the urban sector.

1.4 It is pertinent to point out here that the forty-fifth round of the NSS has, as stated in the preceding paragraph, covered only the OAES and NDEs in the manufacturing sector (including repair services). The Directory Manufacturing Establishments (DMEs) which employ 10 or more workers and use power and the DMEs which employ 20 or more workers without using power, are required by law to register themselves under sections 2m(i) and 2m(ii) respectively of the Factories Act, 1948. They are hence known as factories and fall under the so-called organised sector and they come under the coverage of the Annual Survey of Industries (ASI). The rest

of the DMEs which fall in the unorganised sector, were surveyed separately by the NSSO under the technical direction of the Central Statistical Organisation during October 1989 to September 1990. In this manner, information was obtained for the whole of the unorganised sector of manufacturing and repairing for the period 1989-90.

1.5 Besides the listing schedule which is meant mainly for preparing the frame for the second stage units (enterprises) and drawing the requisite samples therefrom, schedule 2.2.2 was canvassed in the forty-fifth round to survey the sampled enterprises. It *inter alia*, collected information on the basic characteristics of sampled enterprise (both OAME and NDME) such as fixed assets, working capital, outstanding loans, employments and emoluments, input, output etc. This all-India report on the forty-fifth round enterprise survey is based on the data collected through the schedule 2.2.2 and presents some selected results for rural and urban sectors at the all-India level by broad industry divisions and/or groups (2 and/or 3-digit levels respectively of NIC 1987). The industry

group code 999 and industry division code 99, appearing in different tables of this report, are invalid and not recorded for NIC codes.

1.6 Important concepts and definitions adopted in the survey are explained in Section II. Section III presents the sample design and estimation procedure. Major findings based on the survey data are discussed in a summary form in Section IV. The detailed tables at the all-India level are given in Part II. Since there was no stratification by industry groups, the sample enterprises are distributed commensurately among the groups of industries (3-digit level of NIC, 1987) and the sample size for 3-digit industry groups may not be adequate in a number of cases to draw meaningful conclusions. Hence, it is not considered useful to present the estimates at higher levels of disaggregation by industry group in all cases. Sample as well as estimated number of enterprises, employment and per enterprise estimated values of input, output and value added are presented by industry groups (at-3-digit level) in the table numbers 1 & 2; and other detailed results are presented by industry division (at 2-digit level) in the remaining tables.

## SECTION—TWO

### CONCEPTS AND DEFINITIONS

Important concepts and definitions followed in this survey are explained below.

2.1 *Enterprise* : An undertaking engaged in the production and/or distribution of some goods and/or services meant mainly for the purpose of sale, whether fully or partly, is termed as an enterprise. An enterprise may be owned and operated by a single household or by several households jointly on a partnership basis, or by an institutional body. The activities of an enterprise may be carried out by household members and/or by hiring outside labour on a fairly regular basis.

2.2 *Household enterprise* : A household enterprise is that enterprise which is run by one or more members of a household irrespective of whether the enterprise is located in the same premises as the household or not. An enterprise run by two or more households on partnership basis is also taken as a household enterprise. In other words, all proprietary and partnership enterprises are household enterprises.

2.3 *Non-household enterprise* : Non-household enterprises are those which are institutional, i.e., owned and run by the public sector (Central or State

Government, local self-governments, local bodies, government undertakings, etc.), co-operative societies, corporate sector, other types of societies, institutions, associations, trusts, etc.

2.4 *Own-account enterprise* : An enterprise which is run without any hired worker employed on a fairly regular basis is termed an own-account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed an own-account manufacturing enterprise (OAME).

2.5 *Establishment* : An enterprise which is employing at least one hired worker on a fairly regular basis is termed as establishment.

2.6 *Non-directory establishment* : An establishment employing less than six workers (household and hired taken together) is termed a non-directory establishment. If such an establishment is engaged in manufacturing and/or repairing activities, it is termed a non-directory manufacturing establishment (NDME).

2.7 *Fairly regular basis* : The term "fairly regular basis" means that the enterprise/establishment has engaged hired worker(s) during the major part of its

period of operation(s) in the last one year. However, it is not necessary that the same worker(s) should be employed throughout the period.

2.8 *Industrial area and conforming area* : Industrial area is an area reserved for industries. Conforming area is a residential area where industries are also permitted.

2.9 *Nature of operation of enterprise* : It indicates the regularity with which enterprise was run. If the activity of the enterprise runs more or less regularly throughout the year it will be a perennial enterprise. When the enterprise usually operates during a particular season or fixed months of a year, it is termed as a seasonal enterprise. When the activities of an enterprise are neither perennial nor seasonal in nature but are undertaken occasionally during the reference year, the enterprise is termed a casual enterprise.

2.10 *Fixed assets* : Fixed assets will mean assets of the enterprise in the form of land, building, plant & machinery, transport equipment, tools and other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition, i.e., through outright purchase/hire purchase/loan/mortgage and/or construction, irrespective of their use(s) at the time of survey. The present market value of the fixed assets has been considered in the 45th round survey.

2.11 *Working Capital* : Working capital refers to the physical and financial resources used by the enterprise for its day-to-day activities. It is therefore a constantly changing entity since resources available

at a particular point of time will undergo change from day-to-day as the enterprise functions—a part of the resources getting used up in the manufacturing process or other connected activities and replenishments being made from time to time. Physical part of the working capital includes raw materials, stores, fuel, lubricants, semi-finished products and finished products and by-products. Financial part comprises cash in hand and at bank and net balance of amounts receivable and payable.

2.12 *Loan* : All borrowings in cash, i.e., monetary or cash loans, incurred but subsequently repaid or contracted to be repaid in cash or kind, are considered as loan for this survey.

2.13 *Input* : The value of raw materials, electricity, fuel, lubricants and other auxiliary materials consumed and services purchased, maintenance and other expenses incurred by the enterprise for production purposes are considered as total value of input.

2.14 *Output* : The value of products and by-products manufactured by the enterprise together with the value of industrial services rendered to other concerns and other receipts incidental to entrepreneurial activity are considered as total value of output. The output is evaluated at ex-factory price.

2.15 *Value added* : This represents that part of production which is the actual contribution of the enterprise to the economy. Value added is calculated by deducting total value of input from the total value of output.

## SECTION—THREE

### SAMPLE DESIGN AND ESTIMATION PROCEDURE

#### 3. SAMPLE DESIGN

3.1 *Broad Design* : The sample design for this survey was an integrated design for both the 45th round of NSS and the DME survey of C.S.O. The design was two-stage stratified with villages/urban blocks as first-stage units (FSUs) and enterprises as second-stage units (SSUs). The sample fsus were common to the 45th round survey and the DME survey. The listing schedule (0-0) canvassed in 45th

round survey was also utilised for drawing sample ssus for DME survey.

3.2 *Stratification* : In rural areas, each district was generally considered as a stratum. However, for Gujarat, where the NSS regions cut across some district boundaries, parts of each such district belonging to different NSS regions formed separate strata. If any district (or part thereof lying in an NSS

region) had a small number of manufacturing enterprises, it was clubbed with the neighbouring district(s) within the same NSS region to form a stratum. In urban sector, strata were formed within each NSS

region by grouping cities/towns according to population sizes. In all, seven types of strata were formed according to population size class X type of frame used as given below :

town/city population (P)	type of frame used	
	updated EC frame	UFS frame
(1)	(2)	(3)
$P < 50,000$	—	stratum no. 1
$50,000 \leq P < 1,00,000$	—	stratum no. 2
$1,00,000 \leq P < 5,00,000$	stratum no. 3	stratum no. 4
$5,00,000 \leq P < 10,00,000$	stratum no. 5	stratum no. 6
$10,00,000 \leq P$	stratum no. 7	—

Total number of rural and urban strata formed are 358 and 246 respectively.

In order to net adequate no. of DMEs and NDMEs in the rural sample, the villages in a stratum were grouped into three sub-strata based on 1980 EC results (wherever available) as follows :

- sub-stratum 1 consisted of villages having at least one DME;
- sub-stratum 2 consisted of those of the remaining villages in the stratum which had at least one NDME;
- sub-stratum 3 consisted of all the residual villages which had no OAME/NDME or no information about the number of DME/NDME was available due to incompleteness of the EC frame used.

In Arunachal Pradesh, Assam, Lakshadweep and Nagaland and also in a few districts of other states (where population census frames were used for selection of fsus), no substratification was made and all the villages in a stratum were identified as sub-stratum 3.

In the urban sector, in each of the strata where EC frame was updated, three sub-strata were formed as follows :

- sub-stratum 1 consisted of UFS blocks in EC-4 frame with at least one DME, where EC-4 frame was that updated frame for which information on no. of OAMES, NDMEs and DMEs were available in each UFS block.
- sub-stratum 2 consisted of UFS blocks in EC-5 frame with at least one DME, where EC-5 frame was that updated EC frame for which information on no. of OAEs, NDEs

and DEs for all non-agricultural enterprises taken together were available in each UFS block with indications as to whether there existed at least one DME and at least one NDME/OAME in the UFS block.

- sub-stratum 3 consisted of all the remaining UFS blocks of the stratum.

In the rest of the urban sector, i.e., other than the 64 cities with updated EC frame, two sub-strata were formed within each stratum as follows:

- sub-stratum 1 consisted of UFS blocks having area designated as "industrial area" in the UFS frame, and
- sub-stratum 2 consisted of all the remaining UFS blocks in the stratum.

**3.3 Frame.** The EC-80 frame listed all census (generally refer to 1981 population census except Assam where 1971-population census was used due to the fact that 1981 population census was not conducted in Assam) villages and towns giving (for each of them) the nos. of OAMES, NDMEs and DMEs, classified by the main industry divisions of NIC 1970. The EC frame thus used, had an advantage over the population census frame (which gave population for each village/town), as it enabled the use of appropriate selection probabilities to render the sample more efficient for the purpose of enterprise surveys. However, considering the fact that large number of enterprises might have closed/opened since the time of the EC 1980, it was decided to use the frame after updation in the urban sector. But the updating could be done only in respect of 64 major cities. Thus updated EC frames were used for these 64 cities and for the rest of urban sector, the urban frame survey (UFS) blocks were used. For the rural sector, 1980 EC frame was used, wherever available, in preference to population census frame.

**3.4 Allocation of sample fsus between rural and urban sectors:** The total sample size at the state level was allotted between the rural and urban sectors generally in proportion to the gross value added by the unorganised manufacturing enterprises in the respective sector, using the estimates of value added thrown up by the CSO's DME survey, 1978-79 (in respect of DMEs) and the NSS 33rd round survey (in respect of NDMEs and OAMEs) for the purpose. In the states of Gujarat, Maharashtra and Rajasthan, the allocation on the above basis made the sample size tilt unduly towards the urban sector and hence the same was adjusted for ensuring a minimum sample size for the rural sector which was not less than half the size allotted to the urban sector. For Mizoram, Nagaland, Sikkim, Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep, allocation between rural and urban sectors was made in proportion to estimated number of enterprises of different types with differential weightages as 16 DME+4 NDME+OAME on the basis of 1980 EC results since the estimates for value added were not available for these states.

**3.5 Allocation of sample villages/blocks among strata and sub-strata:** In the rural sector, the sample for the state/u.t. was allocated to the constituent strata in proportion to the number of manufacturing establishments (DME+NDME) in the respective strata. The sample villages falling to the share of a stratum were allocated to the three sub-strata in the following manner: A thin sample of 2 or 4 fsus, depending on whether the allocation to the stratum was 20 or less, or more than 20, was allocated to sub-stratum 3 while the remaining fsus were allocated between sub-strata 1 and 2 in the ratio 2:1 and rounded off to the nearest multiple of 2. Adjustments were made in cases where sufficient no. of villages were not available in the frame for sub-strata 1 and 2.

The urban sample for state/u.t. was allocated to the constituent strata in proportion to the number of manufacturing establishments (DME+NDME) in the respective strata.

(i) In the strata relating to 64 cities with updated EC frame, the allocation of the stratum sample to the three sub-strata was in proportion to the total number of UFS blocks in the sub-strata with some additional weightages for sub-strata 1 and 2.

(ii) In the rest of the urban strata, the stratum sample was allocated to the two sub-strata in the following manner: UFS blocks belonging to sub-stratum 1 were completely enumerated subject to a

maximum of 50% of the stratum sample size and the rest of the sample was allocated to sub-stratum 2. Allocation for each stratum X sub-stratum was rounded to nearest even number in all cases.

**3.6 Selection of village/blocks:** Villages were selected in the form of two independent sub-samples from each stratum X sub-stratum using the method of circular systematic sampling with probabilities proportional to size (pps). The size was the number of DMEs/NDMEs in the villages as per frame used in case of sub-stratum 1/sub-stratum 2. Selection of villages from sub-stratum 3 was made in the same manner as for the other two sub-strata but with equal probability.

In the strata relating to 64 cities with updated EC frame, sample blocks were selected separately for each stratum X sub-stratum in the form of two independent sub-samples using circular systematic sampling with probabilities of selection as given below:

- (a) sub-stratum 1 : probability proportional to no. of DMEs.
- (b) sub-stratum 2 : probability proportional to no. of non-agricultural enterprises.
- (c) sub-stratum 3 : equal probability.

In the rest of the urban strata, sample blocks were selected from each stratum X sub-stratum in the form of two independent sub-samples adopting the method of circular systematic sampling with equal probabilities.

**3.7 Hamlet group/sub-block selection and sampling of second stage units (ssus):** If (at the time of survey) the approximate population of a village/block was 1200 or more (600 for rural areas of Himachal Pradesh, Sikkim, Nagaland and Punc, Rajori, Udhampur and Doda districts of Jammu & Kashmir) and/or number of non-agricultural enterprises was 201 or more in the village/block, then the village/block was divided into suitable number of hamlet groups/sub-blocks. The minimum number of h.gs/s.bs. formed was 4. That h.g/s.b. which had the largest proportion of manufacturing enterprises of the village/block was invariably selected and designated as h.g/s.b. '0'. From the remaining h.gs/s.bs., one was selected randomly and designated as h.g/s.b. '1'. The second stage units were then selected circular systematically from these two h.gs/s.bs. If

there was no h.g./s.b. formation, then the whole village/block was considered for selection of second

stage units. The enterprises (ssus) were selected from h.g.s./s.bs. as per the chart given below :

enterprise type	no. (ei) of enterprises to be selected from		
	village/block without h.g./s.b. formation (e <sub>0</sub> )	village/block with h.g./s.b. formation	
		h.g./s.b. '0' (e <sub>0</sub> )	h.g./s.b. '1' (e <sub>1</sub> )
(1)	(2)	(3)	(4)
OAME	4	2	2
NDME	10	8	2

For each of cols. 2, 3 & 4, shortfall in the no. of NDMEs/OAMEs was made by up by increasing the no. of OAMEs/NDMEs in the same column.

### ESTIMATION PROCEDURE:

#### 3.8 Notation:

s = subscript for s-th stratum;

t = subscript for t-th sub-stratum;

i = subscript for i-th sample village/sample block (fsu);

j = subscript for j-th enterprise type (j-1 for OAME and j-2 for NDME);

k = subscript for k-th enterprise;

d = number of hamlet groups/sub-blocks formed in a sample village/block;

e = adjustment factor in case revenue village is surveyed instead of census village due to some practical difficulty (c-number of census villages in a revenue village wherever revenue village is bigger than a census village; otherwise, c will be taken as equal to 1);

Z = total size of a sub-stratum within a stratum;

Z = village/block size used for selection;

n = number of sample villages/blocks surveyed including uninhabited and zero cases;

E<sub>0</sub> = total number of enterprises listed (OAMEs/NDMEs) in hg/sb selected and designated as hg/sb no. '0';

e<sub>0</sub> = total number of enterprises (OAMEs/NDMEs) surveyed in hg/sb designated as hg/sb no. '0';

E<sub>1</sub> and e<sub>1</sub> — these relate to hg/sb designated as hg/sb no. '1' in case of hamlet-group/sub-block formation and have the same connotation as their respective counterparts with subscript '0';

y<sub>0</sub> = value of any character under estimation in a sample village/block/enterprise taken from hg/sb no. '0';

y<sub>1</sub> = value of any character under estimation in a sample village/block enterprises taken from hg/sb no. '1';

Y = estimate of population total of the character y.

#### 3.9 Formula for estimation :

Estimation of population total of a characteristic y was obtained by the formula

$$Y = \sum_s \sum_t \frac{Z_{st}}{n_{st}} \sum_{i=1}^{n_{st}} \frac{1}{c_{sti} z_{sti}} \sum_{j=1}^2 \left[ \frac{E_{ostij}}{e_{ostij}} \sum_{k=1}^{c_{ostij}} y_{ostijk} + (D_{sti}-1) \frac{E_{1stij}}{e_{1stij}} \sum_{k=1}^{c_{1stij}} y_{1stijk} \right]$$

## SUMMARY OF FINDINGS FROM THE SURVEY

4. As mentioned in Section-I, 7,664 villages and 7,320 urban blocks were surveyed in the central sample of the NSS 45th round. Data were collected from a total of 1,23,305 sample enterprises, of which 66,397 (53.85%) were from rural areas and 56,908 (46.15%) from urban areas. Out of 88,877 own account enterprises surveyed, 52,776 (59.38%) were from the rural areas, while out of a total of 34,428 non-directory establishments 13,621 (39.56%) were surveyed from the rural areas. The major findings of the survey based on the data collected from the sample enterprises are discussed below.

4.1 **Estimated number of enterprises :** The number of unorganised manufacturing and repairing enterprises, OAMEs and NDMEs taken together, in the country has been estimated from NSS 45th round (1989-90) survey as 157,30,967 (or 157.31 lakhs). Of them, 120,19,425 (i.e. 76%) were in rural areas and the rest in urban areas. Of these total enterprises 90% were own account manufacturing and repairing enterprises (OAMEs) and the rest were non-directory manufacturing and repairing establishments (NDMEs). The percentage of rural OAMEs, among the total 141,03,807 OAMEs, was 80 as against 45 in the case of NDMEs among the total 16,27,160 NDMEs. Among the rural enterprises, the percentage of OAMEs was 94 as against 76 in the urban sector. The percentage of OAMEs among the rural enterprises varied from 43.12 in manufacture of electrical machinery and equipment (other than transport equipment) to 98.97 in manufacture of beverages, tobacco and tobacco products. In only three industry divisions viz. basic metal and alloys (33), electrical machinery and equipments (36) and transport equipments and parts (37), the percentage of OAMEs was below 65. Electrical machinery and equipments (36) is the only industry division where OAMEs formed less than half of the total. However, in urban areas, OAMEs were in a minority in four industry divisions 33, 35-36 & 37, i.e. those industries relating to basic metal and alloys, manufacture of machinery and equipment (other than transport equipment) and manufacture of transport equipment & parts respectively. Among the rest of the industry divisions in urban areas the percentages of OAMEs varied from 51 in paper and paper products to 97 in beverages, tobacco and tobacco products. Statement 1 shows the percentages of OAMEs and NDMEs among the rural and urban enterprises for different industry divisions.

4.2 **Employment :** The employment is likely to be underestimated as the employment data were collected from the sample enterprises adopting current status approach with the reference "month" (prior to the survey), whereas the enterprises were counted if they had functioned some time or the other (even casually) for a period of not less than 30 days (15 days in case of seasonal enterprises) during a reference period of one "year". Thus the units which satisfied the criterion of having functioned for 30 (or 15) days in the reference year were enumerated but their employment was taken as '0' if they were not found to be working during the reference month. Though such cases would have been few and their effect is not likely to show in the aggregate figures at 2-digit industry level, but at 3 digit level, particularly where small number of enterprises were surveyed, their effect cannot be ignored. For example, the estimated number of NDMEs in rural areas for industry group 225 is 909, but the estimates of persons employed for this industry group comes to be only 746. Again, for industry group 250 in urban areas, the estimated numbers of OAMEs and employment are 50 and 33 respectively (Table no. 1 of APPENDIX-I may be seen).

Another disadvantage of using two reference periods, i.e. "month" and "year" for detailed data collection and enumeration of enterprises respectively is that hired component of employment (in case of NDMEs only) may be underestimated since the enterprises were classified as OAMEs or NDMEs at the enumeration stage according to the number of hired workers (at least one hired worker for NDMEs) in the reference year and detailed employment data were collected for the reference month only.

An enterprise may be classified as NDME but during the reference month it may not have any hired worker. Although such cases might have been few, yet in a particular case (industry group 225 in rural areas), the estimated number of NDMEs is 909 but the total number of hired workers was only 253 (Ref. : Table no.1).

Subject to the above limitations, the estimate of total employment in OAMEs and NDMEs taken together is found to be 296.28 lakhs, of which 217.04 lakhs (about 73%) are in rural areas. Of the total employment, 32.60 lakhs (11%) worked on part-time basis and 30.16 lakhs (10%) are hired workers. The OAMEs accounted for 83%

## STATEMENT 1: PERCENTAGES OF ENTERPRISES FOR DIFFERENT INDUSTRY DIVISIONS.

Industry Division (code)	Description of Industry	Rural Percentage of		Urban Percentage of	
		OAME	NDME	OAME	NDME
(1)	(2)	(3)	(4)	(5)	(6)

39.	Repair of capital goods	92.12	7.88	52.05	47.95
97.	Repair services	92.00	8.00	75.34	24.66
99.	Others (including not recorded cases)	95.67	4.33	71.88	28.12
All Industry Divisions		93.86	6.14	76.04	23.96

of the total employment and 36% (108.06 lakhs) of the total workers are found to be female workers. The number of female workers per thousand of male workers is 682 in rural areas and

323 in urban areas. The share of OAMEs and NDMEs in the total employment by nature of employment (hired and others) in rural and urban areas can be appreciated from the Statement 2

### STATEMENT 2 : ESTIMATED NUMBER OF PERSONS EMPLOYED

type of enterprise	estimated no. of persons employed (lakhs)					
	Male		Female		All persons	
	hired	others	hired	others	hired	others
1	2	3	4	5	6	7
<b>RURAL</b>						
OAME	0.72	109.41	0.22	84.95	0.94	194.36
NDME	10.04	8.90	1.59	1.21	11.63	10.11
COMBINED	10.76	118.31	1.81	86.16	12.57	204.47
<b>URBAN</b>						
OAME	0.49	30.87	0.06	18.44	0.55	49.31
NDME	16.36	11.43	0.68	0.91	17.04	12.34
COMBINED	16.85	42.30	0.74	19.35	17.59	61.65
<b>COMBINED (RURAL + URBAN)</b>						
OAME	1.21	140.28	0.28	103.39	1.49	243.67
NDME	26.40	20.33	2.27	2.12	26.67	22.45
COMBINED	27.61	160.61	2.55	105.51	30.16	266.12

**4.3 Input, output and value added :** For all industry divisions taken together, the per enterprise estimates of input, output and value added are higher in case of NDMEs than that of OAMEs in both rural and urban areas. This is because the NDMEs are larger units as compared to OAMEs. Further, the per enterprise estimates of input, output and value added are higher in

urban areas than that in rural areas for both OAMEs and NDMEs. The urban-rural ratio of per enterprise of value added is 1.92 for OAMEs and 2.26 for NDMEs. The per enterprise estimates of input, output and value added for OAMEs, NDMEs and combined (i.e., OAME+NDME) in rural and urban areas are given in Statement-3

### STATEMENT 3 : PER ENTERPRISE ESTIMATE OF INPUT, OUTPUT AND VALUE ADDED BY ENTERPRISE TYPE.

enterprise type	per enterprise estimates of					
	input		output		value added	
	rural	urban	rural	urban	rural	urban
OAME	4635	7401	9588	16915	4953	9514

COMBINED	5725	19354	11452	36083	5727	16729

In statement 4, aggregates of input, output, value added, working capital and fixed assets are given for rural and urban areas. These aggregates will provide an idea of the aggregate dimensions

of this segment of the unorganised manufacturing sector. In another statement (statement 5), a few aggregates and ratios are also presented.

**STATEMENT (4) : AGGREGATE ESTIMATES (RS. IN CRORES) OF VALUE ADDED AND VALUE OF INPUT, OUTPUT, FIXED ASSETS AND WORKING CAPITAL BY ENTERPRISE TYPE**

enterprise type	input		output		value added		fixed assets		working capital	
	rural	urban	rural	urban	rural	urban	rural	urban	rural	urban

**STATEMENT 5 : SOME IMPORTANTS AGGREGATES AND RATIOS OF THE UNORGANISED MANUFACTURING SECTOR (OAME & NDME)**

Srl. no.	items	aggregates/ratios			
		OAME		NDME	
		rural	urban	rural	urban
1	2	3	4	5	6
1.	Fixed assets (Rs. crores)	6201.55	5309.80	2222.70	7819.25
2.	Input (Rs. crores)	5229.07	2088.65	1653.03	5094.65
3.	Output (Rs. crores)	10816.89	4773.60	2945.39	8618.75
4.	Value added (Rs. crores)	5587.82	2684.95	1292.36	3524.10
5.	Capital* (Rs. crores)	6611.08	5579.88	2442.55	8994.90
6.	Outstanding Loan (Rs. crores)	315.89	161.42	260.94	557.23
7.	Value added per worker** (Rs)	2861.00	5385.84	5942.40	11997.42
8.	Ratio of value added to fixed assets	0.90	0.51	0.58	0.45
9.	Ratio of value added to capital	0.80.85	0.48	0.53	0.39
10.	Capital* per worker	3385.00	11193.00	11231.00	30622.00

\*here capital means total of working capital and fixed assets.

\*\*here worker means total of hired workers and others.

4.4 *Structural ratio* : Statement 6 shows the structural ratios, viz., value added as proportion of output and output as proportion of input for different industry divisions at all-India level. It is seen from the statement that the ratio of value added to output for all industry divisions taken together varies from 0.41 to 0.56 depending on the type of enterprise and rural/urban location. In rural areas, the above ratio varied from 0.30 (industry division 20) to 0.80 (industry division 39) for OAMEs and 0.25 (industry division 21) to 0.73 (industry divisions 39 & 97) for NDMEs. Whereas in the urban areas, the value added—output ratio varied from 0.33 to 0.79 (for industry divisions 29 and 97 respectively) for OAMEs and 0.17 to 0.77 (for industry divisions 25 and 39 respectively) for NDMEs. It is also observed that value added—output ratio is higher to OAMEs than in NDMEs for rural as well as urban areas. This could be so mainly due to the fact that output per unit of input is relatively higher in OAMEs than in NDMEs.

Coming to output-input ratio, it is seen from Statement 6 that the ratio is significantly high in OAMEs as well as NDMEs in both rural and urban areas for the manufacture of paper and paper products industry (28), repair of capital goods industry (39) and repair services industry (97). In fact for industry divisions and belonging to repair of capital goods and repair services the ratio is more than 4 for OAMEs (for both rural and urban) and around 4 for NDMEs (for both rural and urban). In the industry divisions belonging to manufacture of beverages, tobacco and related products (22) the output-input ratios for OAMEs are 4.56 and 4.54 in rural and urban areas respectively, whereas the ratios are 1.83 and 1.97 for rural and urban NDMEs respectively. Though there is no specific pattern in the output-input ratios of different industry divisions, all the ratios are significantly higher than 1 and in general, the ratios of OAMEs are in the higher side as compared to the ratios of NDMEs in both areas. However, it is better to exercise caution in interpreting these figures, because of the inherent variation in the data and other unavoidable limitations in the collection of data in the absence of proper books of accounts in a very large number of cases.

4.5 *Labour productivity* : Value added per worker (household as well as hired) provides a rough measure of the productivity of labour utilisation. Statement 7 shows these structural ratios

by industry division for OAMEs and NDMEs. The statement also gives the ratios of value added to emoluments (salary/wages) for NDMEs only where emoluments are paid to workers.

It is seen from the statement that the productivity of labour is significantly higher in NDMEs than in OAMEs for all the industry divisions in both areas except for repair services industry division (97) in rural areas where reported labour productivity appears to be marginally lower in NDMEs than in OAMEs. In the case of NDMEs, the value added per unit cost of labour (as measured by salary/wages paid) gives some idea about the returns per rupee spent on labour. The productivity of labour cost is found to be minimum in paper and paper products industry division (28) and maximum in leather and leather products industry division (29) in rural areas. The minimum and maximum productivity in urban areas is observed in jute and other fibre textile industry division (25) and food products industry division (20) respectively. The productivity of labour is generally higher in urban areas than in rural areas except a few industry divisions where rural productivity is found to be higher than the corresponding urban productivity. These industry divisions are : leather and leather products (29), electrical machinery and equipment (36), cotton textiles (23), jute and other fibre textiles (25), wood and wood products (27), rubber and plastic including coal products (31), metal products and parts (34), manufacture of wool, silk and man-made fibre textiles (24) and repair services (97).

4.6 *Enterprises by type of ownership* : As is evident from statement 8 in both rural and urban areas almost all the enterprises are under proprietary ownership for OAMEs (990 and 987 per thousand in rural and urban areas respectively) as well as NDMEs (965 and 928 per thousand in rural and urban areas respectively). As expected, partnership enterprises are relatively higher in urban areas than in rural areas in the case of both OAMEs and NDMEs. The enterprises run by co-operative societies and other public/private corporate bodies (shown as "others" in the statement) and found to be negligible.

STATEMENT 6 : STRUCTURAL RATIOS—VALUE ADDED AS PROPORTION OF OUTPUT AND OUTPUT AS PROPORTION OF INPUT FOR OWN ACCOUNT ENTERPRISES AND NON-DIRECTORY ESTABLISHMENTS BY INDUSTRY DIVISION

'—' stands for negligible entry.

4.7 *Distribution of household enterprises by social group* : Statement 9 shows the percentage distribution of household enterprises by social group. It may be noted that the proprietary enterprises and the partnership enterprises having partners from the same household only have been considered as household enterprises for the purpose of this statement. It is seen from this statement that 24.77% and 6.29% of the rural household enterprises (OAMEs and NDMEs taken together) are

owned by the people belonging to the social groups Scheduled Caste (SC) and Scheduled Tribes (ST) respectively, as against 10.21% and 1.49% in urban areas. So far as household enterprises are concerned, in rural areas 67.73% of OAMEs and 87.59% of NDMEs are owned by the people of 'other' categories i.e., other than S.C. & S.T., and in urban areas corresponding percentages are 86.22 and 95.00 for OAMEs and NDMEs respectively.

To have an idea about the share of ownership of manufacturing enterprises among different social groups in a particular industry division and over the industry divisions, two more statements are presented here. Statement 10 reveals the basic pattern of the distribution of household enterprises in a particular industry division for the three social groups (i.e., ST, SC and others), whereas Statement 11 shows the percentages of household enterprises over the industry divisions for the social groups.

4.8 *Per enterprise estimates of a few selected characteristics* : Statement 12 gives in a summarised form the number of sample enterprises, estimated number of enterprises, number of persons employed and per enterprise estimates of a few selected characteristics, viz., working capital, outstanding loan, input, output and value added by industry division for OAMEs and NDMEs separately. Information regarding emoluments (salary/wages) per hired worker is provided for NDMEs only.

STATEMENT 10: PERCENTAGE DISTRIBUTION OF HOUSEHOLD ENTERPRISES BY SOCIAL GROUP AND INDUSTRY DIVISION FOR OAMEs AND NDMEs TAKEN TOGETHER.

## LIST OF ALL-INDIA SURVEY RESULTS

Sl. No.	Description	Page
1.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
2.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
3.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
4.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
5.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
6.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
7.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
8.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
9.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
10.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
11.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
12.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
13.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
14.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
15.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501
16.	Percentage of total value of gross value added in manufacturing sector by industry classes	2-3-501

**Survey of Unorganised Manufacturing Sector (All-India)  
NSS 45th Round (July 1989—June 1990)**

## LIST OF ALL-INDIA TABLES

Table no.	Description	Page no.
1	2	3
1.	Estimated number of enterprises and sex-wise employment by industry division	S-5—S-21
2.	Per enterprise estimates of input, output and gross value added by industry division	S-22—S-51
3.	Per enterprise estimated value of different items of fixed assets owned by industry division.	S-52—S-55
4.	Per enterprise estimated value of different items of fixed assets not owned by industry division	S-56—S-59
5.	Estimated number of enterprises by size-class of fixed assets owned by industry division	S-60—S-63
6.	Estimated number of enterprises by size-class of fixed assets not owned by industry division	S-64—S-67
7.	Per enterprise estimated value of net additions to fixed assets including land by industry division	S-68—S-71
8.	Per enterprise estimated value of different items of working capital by industry division	S-72—S-75
9.	Per enterprise estimated value of net borrowings by source of loan and by industry division	S-76—S-79
10.	Per worker estimated value of emoluments and other benefits (Rs.) in NDMEs by industry division	S-80—S-81
11.	Per thousand distribution of enterprises by nature of operation and by type of enterprise and industry division	S-82—S-83
12.	Estimated number of household enterprises by industry division, social group and by enterprise type	S-84—S-85
13.	Estimated number of enterprises by industry division and type of ownership	S-86—S-89
14.	Estimated number of enterprises by industry division and authority/agency of registration	S-90—S-93
15.	Estimated number of enterprises by location of premises and industry division	S-94—S-97
16.	Estimated number of enterprises by source of energy used and by industry division	S-98—S-101

<b>XX. MISCELLANEOUS</b>									
1.1	National Sample Survey Organisation	—	—	I	1	July 1977	1	N	21 to 22
1.2	Number of state sample size and subjects of enquiry in different rounds of NSS	—	—	II	1	July 1978	5	N	19 to 21
1.3	Glossary of technical terms used in NSS	—	—	III	3	January 1980	11	N	1 to 74
1.4	Source of drinking water and energy used for cooking and lighting	38	Jan—Dec. 1983	XII	2	October 1988	37	N SR	14 to 27 S—153 to S—235
1.5	Dissemination of survey results	—	—	XI	1	July 1987	32	N	26 to 32
1.6	Consumption of fuel & light based on the first three quinquennial rounds of NSS	—	—	XIV	3	Jan—Mar 1991	46	N	41 to 44 S—123 to S—157
1.7	Socio Economic profile of the aged persons	42	July—86	XV	2	Oct—Dec. 1991	49	N SR	103 to 122 S—85 to S 379
1.8	Bibliography of Survey results	—	—	XVII	4	Apr.—June 1994	63		B1 to B18

## ARTICLES PUBLISHED IN SARVEKSHANA

Serial No.	Name of article and author(s)	Issue No.	Vol.	No.	Month and year	Page No.
(1)	(2)	(3)	(4)	(5)	(6)	(7)
<b>I. BACKWARD REGIONS AND WEAKER SECTIONS</b>						
1.1	Weaker section of rural population—some results of 25th round of National Sample Survey—S.K. Sinha	2	I	2	October 1977	53 to 64
1.2	A note on identification of economically backward regions in rural India—G.A. Kulkarni, B.S. Gill and S.K. Pillai	17	VI	1&2	July—October 1982	7 to 17
<b>II. CONSUMER EXPENDITURE</b>						
2.1	A note on inter-state variation in consumption level of rural households based on NSS 28th round consumer expenditure—S. Bhattacharya, A.B. Roy Choudhury and P.D. Joshi	2	I	2	October 1977	77 to 80
2.2	Consumption of cereals and energy content of food consumption—S. Sen Gupta and P.D. Joshi	5	I	8	July 1978	1 to 13
2.3	Changes in consumption expenditure : All India Rural (1960-61 to 1973-74)—Sharwan Kumar	10	III	2	October 1979	9 to 14
2.4	A note on estimates of minimum (normative) per capita consumption based on NSS consumer expenditure survey—K.C. Seal and A. R. Rao	17	VI	1&2	July—October 1982	1 to 6
2.5	Results of the methodological survey on integrated short schedule on consumer expenditure—Survey Design & Research Division, NSSO	34	XI	3	January 1988	18 to 35
2.6	Measurement of general cost of living for urban India : All-India and different states—B.S. Minhas, L.R. Jain, S.M. Kansal and M.R. Saluja	36	XII	1	July 1988	1 to 23
2.7	Gender effects in Indian consumption pattern—S. Subramanian & A. Deaton	47	XIV	4	April—June 1991	1 to 12
2.8	Effect of Reference Period on Engel Elasticities clothing and other Items, by Suchismita Ghose & Nikhilesh Bhattacharya	58	XVII	3	Jan—March 94	35 to 39
<b>III. DEBT AND INVESTMENT</b>						
3.1	Distribution of assets in rural India—G.A. Kulkarni, B.S. Gill and Shambhu Dayal	23	VIII	2	October 1984	1 to 9
<b>IV. EMPLOYMENT, UNEMPLOYMENT AND MIGRATION</b>						
4.1	NSS 27th round unemployment rates—the problem of interpretation and a few controversial issues—Sudhir Bhattacharya	I	I	1	July 1977	14 to 20

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
4.2	Some aspects of internal annual migration in India—S.R. Mukherjee and S.K. Banerjee	6	II	2	October 1978	23 to 24	
4.3	A note on concept of work and estimates of work force : an appraisal of the treatment of activity relating to non-marketed output—Paul Jacob	27	IX	4	April 1986	11 to 15	
<b>V. FAMILY PLANNING</b>							
5.1	Some aspects of practice of family planning revealed in NSS 28th round survey—Netai Chandra Das	7	II	3	January 1979	119 to 128	
5.2	Cohort fertility by age at marriage and marriage duration—N.C. Das	10	III	2	October 1979	15 to 19	
<b>VI. LAND HOLDINGS</b>							
6.1	Trend in some characteristics of land holdings—an analysis for a few states(I)—S.K. Sanyal	13	I	1	July 1977	1 to 13	
6.2	Trends in some characteristics of land holdings—an analysis for a few states (II)—S.K. Sanyal	2	I	2	October 1977	65 to 76	
6.3	Analysis of indicators of tenancy in India—Sharvan Kumar	13	IV	1&2	July—October 1980	1 to 16	
6.4	In equality in size distribution of land ownership by Dr. P.D. Joshi	26	XVIII	3	Jan—March 1995		
<b>VII. LIVESTOCK NUMBER AND PRODUCTS</b>							
7.1	A study of animals in milk and their yield rate in India—G.A. Kulkarni, B.S. Gill and Shambhu Dayal	26	IX	3	January 1986	1 to 9	
7.2	Catch of fish from inland water resources : problems of estimation in Indian condition—A.N. Ganguly and Paul Jacob	5	II	1	July 1978	14 to 16	
<b>VIII. NUTRITION</b>							
8.1	Nutrition situation in India during 1971-72—Ramakrishnan Rao	7	II	3	January 1979	111 to 118	
8.2	Estimates of the undernourished population from alternative sources—G.A. Kulkarni and Ashis Kumar	21	VI	4	April 1984	1 to 6	
<b>IX. POVERTY, LEVEL OF LIVING</b>							
9.1	A note on determination of poverty line based on NSS 27th round data—S. Sengupta and P.D. Joshi	9	III	1	July 1979	1 to 8	
9.2	On suitability of displaced log normal distribution in graduating the size of distribution of total consumer expenditure—P.D. Joshi	9	III	1	July 1979	4 to 8	
9.3	Disparities in level of living across states and social group in urban India during 1973-74—N. Bhattacharya, G. S. Chatterjee and Padmaja Paul	29	X	2	October 1986	1 to 14	
9.4	Computational tools for Poverty measurement and analysis by Gaurav Datt.	61	XVIII	2	Oct—Dec. 1994		

(1)	(2)	(3)	(4)	(5)	(6)	(7)
<b>X. POWER AND ELECTRICITY</b>						
10.1	A study on inequality in the consumption of electricity for domestic use in rural sector— B.S. Gill, Ashis Kumar and B. K. Giri	27	IX	4	April 1986	1 to 10
<b>XI. PRICES</b>						
11.1	Regional price indices based on NSS 28th round consumer expenditure survey data— S. S. Bhattacharya, P. D. Joshi and A. B. Roy Choudhury	12	III	4	April 1980	107 to 120
11.2	Rural and urban consumer price indices by commodity groups (states and all India : 1970-71 to 1983)—L. R. Jain and B. S. Minhas	48	XV	1	July—Sept. 1991	1 to 21
11.3	Food Demand Patterns and Pricing Policy in Maharashtra by Angas Deation, Kirit Parikh and S. Subramaniam	61	XVIII	2	Oct.—Dec. 1994	—
<b>XII. SOCIAL CONSUMPTION</b>						
12.1	A note on social consumption based on state sample reports relating to NSS 35th round (1980-81)—V. K. Rajagopalan and D. K. Joshi	34	XI	3	January 1988	1 to 17
12.2	An article on "Who Gets How much from P.D.S." How much Effectively Does it Reach the poor—by Kirit S. Parikh.	58	XVII	3	Jan—Mar 1994	1 to 34
<b>XIII. SURVEYS/ SAMPLE DESIGN, ESTIMATION PROCEDURE</b>						
13.10	Development of sample design of the Indian National Sample Survey during its first Thirty-two rounds (1950—77)—A. K. Bhattacharya	3	I	3	January 1978	131 to 139
13.2	Estimates of standard errors of selected estimates built up from NSS 27th round survey on employment and unemployment—K. Sankaranarayanan	7	II	3	January 1979	107 to 110
13.3	Survey design for an enquiry on self-employment in non-agricultural enterprises : NSS 29th round (July 1974—June 1975) S. Banerjee and P. K. Basak	8	II	4	April 1979	135 to 139
13.4	Survey on enterprises in trade, hotel and restaurant, transport, storage and warehousing and service sectors, NSS 34th round—Saibal Banerjee	10	III	2	October 1979	20 to 23
13.5	Standard errors of estimates from the NSS 28th round consumer expenditure survey—G.D. Rao & V. R. R. Sarma	12	III	4	April 1980	87 to 93
13.6	NSS thirty-second round an enquiry on employment & unemployment; Preliminary results of a comparative study of two estimation procedures—K. Sankaranarayanan	31	X	4	April 1987	1 to 19
13.7	Technical note on the sample design for the survey "on use of irrigation in agriculture in the 31st round of National Sample Survey"—A. K. Bhattacharya	10	III	2	October 1979	70 to 78

(1)	(2)	(3)	(4)	(5)	(6)	(7)
13.8	Bias in the Gini Co-efficient due to choice of size classes—K. C. Seal and A. R. Rao	39	XII	4	Apr—Jun 1989	1 to 4
13.9	Decomposition of total inequality between classes and within classes components—D. V. Sastry and A. B. Chakravarty	39	XII	4	Apr—Jun 1989	5 to 8
13.10	On state-wise variance components of a stratified two stage design—K. Sankaranarayanan	41	XIII	2	Oct—Dec 1989	1 to 3
13.11	A note on pooling of Central and State Samples data of NSS—B. S. Minhas & M. G. Sardana	44	XIV	1	July—Sept 1990	1 to 4
13.12	The sample design of NSS 44th round (July 1988—June 1989) survey on building construction—K. Sankaranarayanan	50	XV	3	Jan—Mar 1992	7 to 14
13.13	A short note on Sample Size for Regional estimates in NSS by—K. Sankaranarayanan	61	XVIII	2	Oct—Dec 1994	35 to 39
<b>XIV. MISCELLANEOUS</b>						
14.1	A place for quantal information in socio-economic surveys—S. M. Vidwans	4	I	4	April 1978	159 to 166
14.2	Progress of literacy in India during 1983 to 1988—S. Sengupta	47	XIV	4	Apr—Jun 1991	13 to 24
14.3	Role of NSSO in collection of statistics on housing—K. Sankaranarayanan	50	XV	3	Jan—Mar 1992	1 to 6

## ANNEXURE—

## A CLASSIFIED LIST OF MIMEOGRAPHED NSS REPORTS STILL UNPUBLISHED OR PARTIALLY PUBLISHED IN SARVEKSHANA

Serial No.	Report No.	Round No.	Survey Period	Title	Date of release	In case published partially in Sarvekshana then Vol. & No. of the Issue
(1)	(2)	(3)	(4)	(5)	(6)	(7)
<b>I. Consumer Expenditure</b>						
1	356	38	Jan—Dec, 1983	The effect of adjustment of energy intake for meal consumed free & meal served to others.	May 1989	—

रा. प्र. सर्वे. 45वां दौर (जुलाई, 1989—जून 1990)

### उप खंड-1

#### 1. प्रस्तावना

1.1 गैर कृषि क्षेत्र भारतीय अर्थव्यवस्था का एक महत्वपूर्ण तथा विकसित होने वाला संघटक है। परन्तु इस क्षेत्र को असंगठित भाग संबंधी सांख्यिकी प्रयोज्य स्वरूप में नियमित रूप से उपलब्ध नहीं है। आयोगना, प्रशासन तथा राष्ट्रीय और क्षेत्रीय तथ्यों के संकलन के लिए गैर कृषि क्षेत्र की कुछ मूल सूचना प्रदान करने के लिए, भारत सरकार ने 1976 में एक देशव्यापी आर्थिक गणना करने का निर्णय किया था। तदनुसार, पर्याप्त नियमित आधार पर (इसके पश्चात् "प्रतिष्ठानों" के रूप में संदर्भित) कम से कम एक भाड़े के कामगार को रोजगार दे रहे, गैर कृषि उद्यमों की देशव्यापी गणना राज्य सांख्यिकीय व्यूरा के सहयोग से केन्द्रीय सांख्यिकीय संगठन द्वारा 1977 में की गई थी। इस आर्थिक गणना पर आधारित ढांचे का प्रयोग करते हुए, लघु प्रतिष्ठानों (कम से कम भाड़े के एक कामगार को नियुक्त कर रहे) तथा किसी भी भाड़े के कामगार को नियुक्त न कर रहे उद्यम (इसके पश्चात् "स्व-लेखा उद्यमों" के रूप में संदर्भित) विनिर्माणकारी तथा मरम्मत कार्यकलापों में लगे उद्यमों का 1978-79 के दौरान रा. प्र. सर्वे. के तौहसिबे दौर में सर्वेक्षण किया गया।

1.2 दूसरी समस्त भारत आर्थिक गणना 1980 में आयोजित की गई थी। इस गणना की व्यापक पहली गणना की अपेक्षा विस्तृत थी, क्योंकि इसमें स्व-लेखा उद्यम भी शामिल थे। इस गणना में, प्रतिष्ठानों को अन्य दो श्रेणियों में बांटा गया (1) निर्देशिका प्रतिष्ठान (2) गैर-निर्देशिका प्रतिष्ठान, प्रथम में कुल छः अथवा इससे अधिक कामगार नियुक्त थे, जबकि दूसरी में पांच अथवा इससे कम कामगार नियुक्त थे। इस प्रकार, दूसरी आर्थिक गणना उद्यमों की तीन श्रेणियों अर्थात् निर्देशिका प्रतिष्ठानों, गैर निर्देशिका प्रतिष्ठानों तथा स्व-लेखा उद्यमों से संदर्भित था। इस गणना के अनवृत्ति के रूप में, विनिर्माणकारी तथा मरम्मत कार्यकलापों में लगे गैर निर्देशिका प्रतिष्ठानों तथा स्व-लेखा उद्यमों का 1984-85 के दौरान 40वां दौर में रा. प्र. सर्वे. सं. द्वारा सर्वेक्षण किया गया। दूसरी आर्थिक गणना द्वारा प्रदान किया गए ढांचे का प्रयोग करते हुए, इसी प्रकार का एक सर्वेक्षण जुलाई 1989 से जून 1990 के दौरान रा. प्र. सर्वे. के 45वां दौर में पुनः किया गया।

1.3 रा. प्र. सर्वे. के 45 वें दौर की व्यापक सभी गैर निर्देशिका विनिर्माणकारी तथा मरम्मत प्रतिष्ठानों तक सीमित है। इन प्रतिष्ठानों/उद्यमों में संशोधित राष्ट्रीय आर्थिक वरीकरण (1987) (इससे आगे रा. आ. व., 1987 के रूप में संदर्भित, सम्बद्ध उद्धरण परिशिष्ट में प्रदान किया गया) के अंतर्गत द्वि-अंकीय कोडों (प्रभाग कहे गए) 20 से 39 तथा 97 द्वारा शामिल की गई सभी इकाइयां शामिल थी। 45वें दौर सर्वेक्षण की अपनी भौगोलिक व्यापकता में जम्मू तथा कश्मीर के दो जिलों (अर्थात् लद्दाख और कारगिल) और बस रूट से पांच किलोमीटर से अधिक स्थित नागालैंड के कुछ आंतरिक गांवों को छोड़कर सम्पूर्ण भारत संघ शामिल था। अंदमान और निकोबार द्वीप समूह, चंडीगढ़, दादर तथा नागर हवेली और लक्षद्वीप को छोड़कर 45वें दौर में सभी राज्यों/संघ शासित क्षेत्रों ने भाग लिया। दिल्ली ने तिहरे मीचिंग आधार पर, गोआ, गुजरात, हरियाणा, जम्मू तथा कश्मीर, गणपूर ने दोहरे मीचिंग आधार पर, महाराष्ट्र और नागालैंड ने डेढ़ गुणा तथा शहरी तथा ग्रामीण क्षेत्र में बराबरी के आधार पर भाग लिया। शेष राज्यों/शासित क्षेत्रों ने बराबरी के आधार पर भाग लिया। सर्वेक्षित प्रथम चरण इकाइयों की संख्या केन्द्रीय प्रतिदर्श में 14,984 (7664 गांव तथा 7320 शहरी खंड) थी और राज्य प्रतिदर्श में सर्वेक्षित प्रथम चरण की इकाइयां 17,080 (8352 गांव तथा 8728 शहरी खंड) थीं। इस रिपोर्ट में प्रस्तुत किए गए अनुमान समस्त भारत स्तर पर हैं तथा केवल केन्द्रीय प्रतिदर्शों पर आधारित हैं। ये अनुमान कुल 1.23 लाख उद्यमों से एकत्रित आंकड़ों की गणना करते हुए निकाले गए हैं, जिनमें से 72.08 प्रतिशत स्व-लेखा उद्यम थे और शेष गैर-निर्देशिका प्रतिष्ठान थे; कुल उद्यमों का 53.85 प्रतिशत ग्रामीण क्षेत्र में था और शेष शहरी क्षेत्र में।

1.4 यहां यह संकेत देना तर्कसंगत लगता है कि रा. प्र. सर्वे. के 45 वें दौर में जैसा कि पूर्ववर्ती दौरों में उल्लेख किया गया है, विनिर्माणकारी क्षेत्र (मरम्मत सेवाओं को शामिल करते हुए) में केवल स्व-लेखा उद्यमों तथा गैर-निर्देशिका प्रतिष्ठानों को शामिल किया गया। निर्देशिका विनिर्माणकारी प्रतिष्ठानों के पावर का प्रयोग करते हुए 10 अथवा इससे अधिक कामगारों को नियुक्त करते हैं और पावर का प्रयोग न करते हुए 20 अथवा इससे अधिक कामगारों को नियुक्त कर रहे, गैर-निर्देशिका प्रतिष्ठानों को कारखाना अधिनियम, 1948 के क्रमशः 2

एम (1) तथा 2 एम (2) के अंतर्गत पंजीकृत कराना अपेक्षित है। उतः वे कारखानों के रूप में जाने जाते हैं तथा वे तथाकथित संगठित क्षेत्र में आते हैं तथा वे वार्षिक उद्योग सर्वेक्षण (ए. एस. आई.) की व्याप्ति के अंतर्गत आते हैं। शेष गैर निर्देशिका प्रतिष्ठानों, जो असंगठित क्षेत्र में आते हैं, का अक्टूबर, 1989 से सितम्बर 1990 के दौरान केन्द्रीय सांख्यिकीय संगठन के तकनीकी निवेदन में रा. प्र. सद. सं. द्वारा अलग से सर्वेक्षण किया गया। इस तरीके से, 1989-90 अर्द्ध के लिए विनिर्माणकारी तथा मरम्मत के सम्पूर्ण असंगठित क्षेत्र के लिए सूचना प्राप्त की गई।

1.5 सूचीबद्ध अनुसूची के अतिरिक्त, जो मुख्यतः दूसरे चरण की इकाइयों (उद्यमों) हेतु छांचा तैयार करने के लिए है तथा उसी से अपेक्षित प्रतिदर्श-रेखांकित करने हैं, 45वें दौर में अनुसूची 2.2.2 प्रतिदर्श उद्यमों का सर्वेक्षण करने के लिए तैयार की गई थी। इसने, अन्य बातों के साथ-साथ, प्रतिचयनित उद्यमों (स्व-लेखा विनिर्माणकारी उद्यमों तथा गैर निर्देशिका प्रतिष्ठानों दोनों) की वित्तियोगिताओं जैसा कि स्थायी पूंजी, कार्यशील पूंजी बकाया ऋण, राजगार तथा परिलब्धियों, निवेश, उत्पाद आदि पर सूचना एकत्र की गई। 45वें दौर उद्यम सर्वेक्षण पर, यह समस्त भारत रिपोर्ट, अनुसूची 2.2.2 के माध्यम से एकत्र किए गए आंकड़ों पर आधारित है तथा विस्तृत उद्योग प्रभागों और/अथवा समूहों रा. अ. व. 1987 के क्रमशः 2 और/अथवा 3 अंकीय स्तरों

पर) के अनुसार समस्त भारत स्तर पर ग्रामीण तथा शहरी क्षेत्रों के लिए कुछ चुने हुए परिणाम प्रस्तुत करती है। इस रिपोर्ट की विभिन्न सारणियों में प्रस्तुत उद्योग समूह कोड 999 तथा उद्योग प्रभाग कोड 99 अवधि है तथा रा. और. व. कोडों में रिकार्ड नहीं है।

1.6 सर्वेक्षण आंकड़ों पर आधारित मुख्य निष्कर्ष भाग-2 में सार के रूप में चर्चा की गई है। समस्त भारत स्तर पर विस्तृत सारणियां भाग-2 सर्वेक्षण परिणाम में दी गई हैं। चूंकि उद्योग समूहों के अनुसार संस्तरिकरण नहीं था, उतः प्रतिदर्श उद्यमों का उद्योग समूहों (रा. अ. व. के 3 अंकीय स्तर, 1987) में सामान्य रूप से वितरित किया गया है तथा 3 अंकीय उद्योग समूहों के लिए प्रतिदर्श आकार कई मामलों में अर्धपूर्ण निष्कर्ष तैयार करने के लिए पर्याप्त न हो पाए। उतः सभी मामलों में उद्योग समूहों के अनुसार असमाहरण के उच्च स्तरों पर अनुमानों का प्रस्तुत करने का लाभदायक नहीं पाया गया। प्रतिदर्श तथा उद्यमों की अनुमानित संख्या, राजगार, प्रति उद्यम निवेश, उत्पाद तथा वर्धित मूल्य के अनुमानित मूल्य उद्योग समूहों (3 अंकीय स्तर पर) के अनुसार सारणी संख्या 1 तथा 2 में प्रस्तुत किया गया है; और अन्य विस्तृत परिणाम उद्योग प्रभाग (2 अंकीय स्तर पर) के अनुसार शेष सारणियों में प्रस्तुत किए गए हैं। इन अनुमानों को निकालने में अनुसरण किये गये प्रतिष्ठान अभिकल्प तथा प्राक्कलन पदधति इस अंक में दी गई है। तदनुरूपी व्यौरों सहित उद्योग प्रभाग कोड परिशिष्ट में दिए गए हैं।

## उप खंड-1A

### सर्वेक्षण के निष्कर्षों का सार

जैसा कि खण्ड-1 में उल्लेख किया गया है, रा० प्र० सर्वे० 45वें दौर के केन्द्रीय परिदर्श में 7,664 गांवों और 7,320 शहरी क्षेत्रों का सर्वेक्षण किया गया था। आंकड़े कुल 1,23,395 निर्देशिका उद्यमों से एकत्र किये गये थे जिनमें से 66,397 (53.85%) ग्रामीण क्षेत्रों से और 52,776 (59.38%) शहरी क्षेत्रों से थे। सर्वेक्षण किये गये 88,877 स्व-लेखा उद्यमों में से 52,776 (59.38%) ग्रामीण क्षेत्रों से थे, जबकि 34,428 कुल गैर निर्देशिका प्रतिष्ठानों में से 13,621 (39.56%) का शहरी क्षेत्रों से सर्वेक्षण किया गया। प्रतिदर्श उद्यमों से एकत्रित आंकड़ों पर आधारित सर्वेक्षण के मुख्य निष्कर्षों पर नीचे चर्चा की गई है।

2.1 उद्यमों को अनुमानित संख्या : रा० प्र० सर्वे० 45वें दौर (1989-90) में सर्वेक्षण से असंगठित विनिर्माणकारी और मरम्मत उद्यमों, स्व-लेखा विनिर्माणकारी प्रतिष्ठानों और गैर निर्देशिका उद्यमों की देश में कुल संख्या का अनुमान 1,57,30,967 (अथवा 175.31 लाख) लगाया गया है। इनमें से 120,19,425 (अर्थात् 76%), ग्रामीण क्षेत्रों में

तथा शेष शहरी क्षेत्रों में थे। इन कुल उद्यमों में से 90% स्व-लेखा विनिर्माणकारी तथा मरम्मत उद्यम और शेष गैर-निर्देशिका विनिर्माणकारी तथा मरम्मत प्रतिष्ठान थे। कुल 141,03,807 स्व-लेखा विनिर्माणकारी प्रतिष्ठानों में से ग्रामीण स्व-लेखा विनिर्माणकारी उद्यमों का प्रतिशत कुल 76,27,160 गैर निर्देशिका विनिर्माणकारी प्रतिष्ठानों में से गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के 45 के मुकाबले में 80 था। ग्रामीण उद्यमों में से, स्व-लेखा विनिर्माणकारी प्रतिष्ठानों का प्रतिशत शहरी क्षेत्र में 76 के मुकाबले में 94 प्रतिशत था। विद्युत मशीनरी और उपकरण (परिवहन उपकरणों को छोड़कर) के निर्माण में ग्रामीण उद्यमों में स्व-लेखा विनिर्माणकारी उद्यमों का प्रतिशत 43.12 पेयपदार्थ, तम्बाकू तथा तम्बाकू उत्पादों में 98.97 तक भिन्न-भिन्न था। केवल तीन उद्योग प्रभागों अर्थात् मूल धातु और अवयस्क (33), विद्युत मशीनरी और उपकरण (36) और परिवहन उपकरण तथा पुर्जे (37) में स्व-लेखा विनिर्माणकारी उद्यमों का प्रतिशत 65 से कम था। विद्युत मशीनरी और उपकरण (36) केवल उद्योग प्रभाग है जहां स्व-लेखा विनिर्माणकारी

उद्यम कुल के आधे से कम है। तथापि, ग्रामीण क्षेत्र में, स्व-लेखा विनिर्माणकारी उद्यम चार उद्योग प्रभागों 33,35-36 तथा 36 में अल्प संख्या में अर्थात् मूल धातु तथा मिश्र-धातु, मशीनरी और उपकरण का निर्माण (परिवहन उपकरण को छोड़कर) और परिवहन उपकरणों तथा पुर्जों के निर्माण में अल्प संख्या में थे। शहरी क्षेत्रों में शेष उद्योग प्रभागों

में कागज और कागज उत्पादों में 51 से भिन्न और पेयपदार्थ, तम्बाकू और तम्बाकू उत्पादों में स्व-लेखा विनिर्माणकारी प्रतिष्ठानों का प्रतिशत 97 से भिन्न-भिन्न था। विवरण-1 विभिन्न उद्योग प्रभागों के लिये शहरी तथा शहरी उद्यमों में स्व-लेखा विनिर्माणकारी उद्यमों और गैर-निर्देशिका प्रतिष्ठानों की प्रतिशतता दर्शाता है।

विवरण 1 : विभिन्न उद्योग प्रभागों के लिए उद्यमों की प्रतिशतता

उद्योग प्रभाग (कोड)	उद्योग का विवरण	ग्रामीण		शहरी	
		का प्रतिशत		का प्रतिशत	
		स्व० ले० वि० उ०	गैर० नि० वि० प्रति०	स्व० लेखा वि० उ०	गैर नि० वि० प्र०
1	2	3	4	5	6
20.	खाद्य उत्पादों का निर्माण	83.46	16.54	66.84	33.16
21.		95.77	4.23	82.28	17.72
22.	पेय पदार्थों, तम्बाकू और तम्बाकू उत्पादों का निर्माण	98.97	1.03	96.73	3.27
23.	सूती वस्त्रों का निर्माण	96.16	3.84	84.43	15.57
24.	ऊन, सिल्क और मनुष्य निर्मित रेशे वस्त्रों का निर्माण	90.47	9.53	64.71	35.29
25.	जूट तथा अन्य रेशे वस्त्रों का निर्माण (कपास तथा कोयल को छोड़कर)	97.12	2.88	95.55	4.45
26.	सूती उत्पाद का निर्माण (पहनने के वस्त्रों सहित)	89.98	10.02	82.85	17.15
27.	लकड़ी तथा लकड़ी उत्पादों फर्नीचर और जुड़नारों का निर्माण	97.27	2.73	78.62	21.38
28.	कागज और कागजों उत्पादों और मुद्रण प्रकाशन और सबम्ह उद्योगों का निर्माण	85.36	14.64	50.92	49.08
29.	चमड़ा और चमड़ा उत्पादों, फर तथा चमड़े के प्रति-स्थापनों का निर्माण	98.66	1.34	77.04	22.96
30.	मूल रसायनों और रसायन उत्पादों का निर्माण (पेट्रोलियम और कोयला उत्पादों को छोड़कर)	95.17	4.83	86.27	13.73
31.	रबड़, प्लास्टिक, पेट्रोलियम और कोयला उत्पादों का निर्माण; परमाणु ईंधनों का संसाधन	85.76	14.24	59.35	40.65
32.	गैर धात्विक खनिज उत्पादों का निर्माण	95.47	4.53	84.03	15.97
33.	मूल धातु तथा मिश्र धातु उद्योग	64.50	35.50	43.75	56.25
34.	धातु उत्पादों और पुर्जों का निर्माण (मशीनरी तथा उपकरणों को छोड़कर)	85.97	14.03	54.44	45.56
35.	विद्युत तथा अन्य मशीनरी और	93.37	6.63	35.24	64.76
36.	उपकरणों का निर्माण (परिवहन उपकरण को छोड़कर)	43.12	56.88	25.12	74.88
37.	परिवहन उपकरणों और पुर्जों का निर्माण	64.03	35.97	47.06	52.94
38.	अन्य निर्माणकारी उद्योग	94.46	5.54	78.79	21.21
39.	पूँजीगत वस्तुओं की मरम्मत	92.12	7.88	52.05	47.95
97.	मरम्मत सेवाएं	92.00	8.00	75.34	24.66
99.	अन्य (रिकार्ड न किए गए मामलों को शामिल करते हुए)	95.67	4.33	71.88	28.12
सभी उद्योग प्रभाग		93.86	6.14	76.04	23.96

2.2 रोजगार : रोजगार का कम आकलन किया गया है क्योंकि रोजगार आंकड़े, संदर्भ "माह" सहित वर्तमान स्थिति दृष्टिकोण अपनाते हुए प्रतिदर्श उद्यमों से एकत्र किए गये थे जहाँ कहीं उद्यमों की गणना की गई थी, यदि उन्होंने एक "वर्ष" की संदर्भ अवधि के दौरान किसी समय अथवा 30 दिनों (मौसमी उद्यमों के मामले में 15 दिवस) से कम की अवधि के लिये (अप्रासंगिक रूप से) काम किया था। इस प्रकार इकाइयाँ जिन्होंने संदर्भ वर्ष में 30 (अथवा 15) दिनों तक कार्य करने के मानदण्ड को पूरा किया, को गिना गया परन्तु उनके रोजगार को "0" के रूप में लिया गया यदि उन्हें संदर्भ माह के दौरान कार्य करते हुए नहीं पाया गया। यद्यपि ऐसे मामले बहुत कम होंगे और उनका 2 अंकीय उद्योग स्तर पर समाहार आंकड़ों पर प्रभाव डालने की संभावना नहीं है, परन्तु 3 अंकीय स्तर पर, विशेष रूप से जहाँ उद्यमों की कम संख्या का सर्वेक्षण किया गया था, वहाँ उनके प्रभाव की अपेक्षा नहीं की जा सकती। उदाहरण के लिये, उद्योग समूह 225 के लिये ग्रामीण क्षेत्रों में गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों की अनुमानित संख्या 909 है, परन्तु इस उद्योग समूह के लिये नियुक्त व्यक्तियों का अनुमान केवल 746 आता है। डुबारा, शहरी क्षेत्रों में उद्योग समूह 250 के लिये, स्व-लेखा विनिर्माणकारी उद्यमों और रोजगार की अनुमानित संख्या क्रमशः 50 और 33 हैं। (परिशिष्ट-1 की सारणी सं०-1 देखी जाये)।

कारण: विस्तृत आंकड़ा संग्रहण और उद्यमों की परिगणना के लिये दो संदर्भ अवधियों अर्थात् "माह" तथा "वर्ष" प्रयोग करने की दूसरी हानि यह है कि रोजगार के भाड़े के घटक (केवल गैर-निर्देशिका विनिर्माणकारी उद्यमों के मामले में) का कम आकलन किया गया है क्योंकि संदर्भ वर्ष में उद्यमों

को भाड़े के कामगारों (गैर-निर्देशिका विनिर्माणकारी उद्यम के लिये कम से कम एक भाड़े का कामगार) की संख्या के अनुसार परिगणना स्तर पर स्व-लेखा विनिर्माणकारी उद्यमों अथवा गैर-निर्देशिका विनिर्माणकारी उद्यमों के रूप में वर्गीकृत किया गया है और विस्तृत रोजगार आंकड़े केवल संदर्भ मास के लिये एकत्र किये गये थे। एक उद्यम को गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठान के रूप में वर्गीकृत किया जाए परन्तु संदर्भ मास के दौरान इसमें कोई भाड़े का कामगार न हो। यद्यपि ऐसे मामले संभवतः कम हों, परन्तु एक विशेष मामले में (ग्रामीण क्षेत्रों में उद्योग समूह 225) गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों की संख्या 909 है परन्तु भाड़े के कामगारों की कुल संख्या केवल 253 थी। (संदर्भ सारणी संख्या 1)

उपर्युक्त सीमाओं पर निर्भर करते हुए, स्व-लेखा विनिर्माणकारी प्रतिष्ठानों और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों में कुल रोजगार का अनुमान 296.28 लाख पाया गया है, जिनमें से 217.04 लाख (लगभग 73%) ग्रामीण क्षेत्रों में हैं। कुल रोजगार का 32.60 लाख (11%), ने अंश-कालीन आधार पर काम किया और 30.16 लाख (10%) भाड़े के कामगार हैं। स्व-लेखा विनिर्माणकारी प्रतिष्ठान कुल रोजगार का 83% था और कुल कामगारों का 36% (108.06 लाख) महिला कामगार थे। प्रति हजार पुरुष कामगारों के पीछे महिला कामगारों की संख्या ग्रामीण क्षेत्रों में 682 और शहरी क्षेत्रों में 323 थी। ग्रामीण और शहरी क्षेत्रों में रोजगार के प्रकार (भाड़े तथा अन्य) के अनुसार कुल रोजगार में स्व-लेखा विनिर्माणकारी प्रतिष्ठानों और गैर-निर्देशिका प्रतिष्ठानों के हिस्से का मूल्यांकन विवरण-2 से किया जा सकता है।

विवरण 2 : नियुक्त व्यक्तियों की अनुमानित संख्या

उद्यमों का प्रकार	नियुक्त किए गए व्यक्तियों की अनुमानित संख्या (लाख)					
	पुरुष		महिला		सभी व्यक्ति	
	भाड़े के	अन्य	भाड़े के	अन्य	भाड़े के	अन्य
(1)	(2)	(3)	(4)	(5)	(6)	(7)
ग्रामीण						
स्व-लेखा विनिर्माणकारी उद्यम	0.72	109.41	0.22	84.95	0.94	194.36
गैर-निर्देशिका विनिर्माणकारी उद्यम	10.04	8.90	1.59	1.21	11.63	10.11
संयुक्त	10.76	118.31	1.81	86.16	12.57	204.47
शहरी						
स्व-लेखा विनिर्माणकारी उद्यम	0.49	30.87	0.06	18.44	0.55	49.31
गैर-निर्देशिका विनिर्माणकारी उद्यम	16.36	11.43	0.68	0.91	17.04	12.34
संयुक्त	16.85	42.30	0.74	19.35	17.59	61.65
संयुक्त (ग्रामीण + शहरी)						
स्व-लेखा विनिर्माणकारी उद्यम	1.21	140.28	0.28	103.39	1.49	243.67
गैर-निर्देशिका विनिर्माणकारी उद्यम	26.40	20.33	2.27	2.12	28.67	22.45
संयुक्त	27.61	160.61	2.55	105.51	30.16	266.12

2.3 निवेश, उत्पादन तथा वर्धित मूल्य : एक साथ लिए गए सभी उद्योग प्रभागों के लिए, ग्रामीण तथा शहरी दोनों क्षेत्रों में गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के मामले प्रति उद्यम निवेश, उत्पादन तथा वर्धित मूल्य स्व-लेखा विनिर्माणकारी प्रतिष्ठानों के मुकाबले में अधिक हैं। यह इसलिए है क्योंकि स्व-लेखा विनिर्माणकारी प्रतिष्ठानों के मुकाबले में गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठान अधिक बड़ी इकाई हैं। इसके अतिरिक्त, स्व-लेखा विनिर्माणकारी प्रतिष्ठानों और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों दोनों के लिए ग्रामीण क्षेत्रों के मुकाबले

में शहरी क्षेत्रों में प्रति उद्यम निवेश, उत्पादन तथा वर्धित मूल्य के अनुमान अधिक हैं। प्रति उद्यम वर्धित मूल्य का शहरी-ग्रामीण अनुपात स्व-लेखा विनिर्माणकारी प्रतिष्ठानों के लिए 1.92 और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के लिए 2.26 है। ग्रामीण तथा शहरी क्षेत्रों में स्व-लेखा विनिर्माणकारी प्रतिष्ठानों, गैर निर्देशिका विनिर्माणकारी प्रतिष्ठानों और संयुक्त (अर्थात् स्व-लेखा विनिर्माणकारी प्रतिष्ठान + गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठान) के लिए प्रति उद्यम निवेश, उत्पादन और वर्धित मूल्य के अनुमान विवरण-3 में दिए गए हैं।

विवरण—3 उद्यमों के प्रकार के अनुसार प्रति उद्यम निवेश, उत्पादन और वर्धित मूल्य के अनुमान

उद्यम किस्म	प्रति उद्यम अनुमान					
	निवेश		उत्पादन		वर्धित मूल्य	
	ग्रामीण	शहरी	ग्रामीण	शहरी	ग्रामीण	शहरी
(1)	(2)	(3)	(4)	(5)	(6)	(7)
स्व-लेखा विनिर्माणकारी प्रतिष्ठान	4635	7401	9588	16915	4953	9514
गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठान	22407	57280	39925	96902	17518	39622
संयुक्त	5725	19354	11452	36083	5727	16729

विवरण 4 में, ग्रामीण तथा शहरी क्षेत्रों के लिए निवेश उत्पादन, वर्धित मूल्य, कार्यशील पूंजी तथा स्थाई परिसम्पतियों के समाहार दिए गए हैं। ये समाहार असंगठित विनिर्माणकारी क्षेत्र के इस खंड के समाहार परिमाण के सम्बन्ध में कुछ विचार प्रस्तुत करेंगे। एक अन्य विवरण (विवरण 5) में कुछ समाहार तथा अनुपात भी प्रस्तुत किए गए हैं।

2.4 संरचनात्मक अनुपात विवरण 6 संरचनात्मक अनुपात अर्थात् समस्त भारत स्तर पर विभिन्न उद्योग प्रभागों के लिये उत्पादन के अनुपात के रूप में वर्धित मूल्य तथा निवेश के अनुपात के रूप में उत्पादन दर्शाता है। विवरण से यह देखा गया है कि उद्यम के प्रकार तथा ग्रामीण/शहरी स्थान निर्धारण पर निर्भर करते हुए एक साथ लिये गये सभी उद्योग प्रभागों के लिये उत्पादन में वर्धित मूल्य का अनुपात 0.41 से 0.56 था। ग्रामीण क्षेत्रों में, उपरोक्त अनुपात स्व-लेखा विनिर्माणकारी उद्यमों के लिये 0.30 (उद्योग प्रभाग 20) से 0.80 (उद्योग प्रभाग 39) और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के लिये 0.25 (उद्योग प्रभाग 21) से 0.73 (उद्योग प्रभाग 39 तथा 97) था। जबकि शहरी क्षेत्रों में, वर्धित मूल्य उत्पादन अनुपात स्व-लेखा विनिर्माणकारी प्रतिष्ठानों के लिये 0.33 से 0.79 (क्रमशः उद्योग प्रभाग 29 और 97 के लिये) और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के लिये 0.17 से 0.77 (क्रमशः उद्योग समूह 25 और 39 के लिये) था। यह भी देखा गया है कि ग्रामीण तथा शहरी क्षेत्रों के लिये गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के मुकाबले में स्व-

लेखा विनिर्माणकारी उद्यमों में वर्धित मूल्य-उत्पादन अनुपात अधिक है। ऐसा मुख्यतः इस तथ्य के कारण है कि गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों की अपेक्षा स्व-लेखा विनिर्माणकारी उद्यमों में प्रति इकाई निवेश के मुकाबले में उत्पादन अधिक है।

उत्पादन निवेश अनुपात के सम्बन्ध में, विवरण 6 से देखा गया है कि कागज निर्माण और कागज उत्पाद उद्योग (28) पूंजीगत वस्तु उद्योग की मरम्मत (39) और मरम्मत सेवायें उद्योग (97) के लिये ग्रामीण तथा शहरी दोनों क्षेत्रों में स्व-लेखा विनिर्माणकारी उद्यमों और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों में अनुपात काफी अधिक है। वास्तव में पूंजीगत वस्तुओं की मरम्मत तथा मरम्मत सेवाओं में संबंधित उद्योग प्रभागों के लिये यह अनुपात स्व-लेखा विनिर्माणकारी उद्यमों (ग्रामीण तथा शहरी दोनों के लिये) के लिए 4 से अधिक और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों (ग्रामीण तथा शहरी दोनों के लिये) के लिये लगभग 4 है। पेय पदार्थ, तम्बाकू तथा सम्बद्ध उत्पादों (22) के निर्माण से संबंधित उद्योग प्रभागों में स्व-लेखा विनिर्माणकारी उद्यमों के लिये ग्रामीण तथा शहरी क्षेत्रों में उत्पादन निवेश अनुपात क्रमशः 4.56 और 4.54 है। जबकि ग्रामीण शहरी गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों का अनुपात क्रमशः 1.83 और 1.97 है। यद्यपि विभिन्न उद्योग प्रभागों के उत्पादन-निवेश अनुपातों में कोई विशिष्ट पद्धति नहीं है, सभी

अनुपात 1 से अधिक है और साधारण तौर पर दोनों क्षेत्रों में गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के अनुपातों की तुलना में स्व-लेखा विनिर्माणकारी उद्यमों का अनुपात अधिक है। तथापि, इन आंकड़ों की व्याख्या करते समय

सावधानी बरतना बेहतर है क्योंकि आंकड़ों में अन्तःनिहित भिन्नता है तथा बहुत अधिक मामलों में उचित लेखा पुस्तकों की अनुपस्थिति में आंकड़ा संग्रहण की अन्य अपरिहार्य सीमाएँ हैं।

विवरण 4 : उद्यम प्रकार के अनुसार वधित मूल्य और निवेश, उत्पादन स्थायी परिसम्पत्तियों तथा कार्यशील पूँजी के मूल्य के कुल अनुमान (रुपए करोड़ में)

उद्यम का प्रकार	निवेश		उत्पादन		वधित मूल्य		परिसम्पत्तियाँ		कार्यशील पूँजी

2.5 श्रम उत्पादकता : प्रति कामगार वर्धित मूल्य (परिवार तथा भाड़े के) श्रम उपयोगिता की उत्पादकता का एक कच्चा मापन प्रस्तुत करता है। विवरण 7 स्व-लेखा विनिर्माणकारी उद्यमों और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के लिये उद्योग प्रभाग के अनुसार ये संरचनात्मक अनुपात दर्शाता है। यह विवरण केवल गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के लिये परिलब्धियों (वेतन/मजदूरी) में वर्णित मूल्य का अनुपात भी प्रस्तुत करता है जहां कामगारों को परिलब्धियां भुगतान की जाती हैं।

विवरण यह देखा गया है कि ग्रामीण क्षेत्रों में मरम्मत सेवा उद्योग प्रभाग (97) को छोड़कर जहां रिपोर्ट की गई श्रम उत्पादकता स्व-लेखा विनिर्माणकारी उद्यमों की अपेक्षा गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों में मामूली से कम प्रतीत होती है, दोनों क्षेत्रों में सभी उद्योग प्रभागों के लिये स्व-लेखा विनिर्माणकारी प्रतिष्ठानों के मुकाबले में, गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों में श्रम उत्पादकता पर्याप्त रूप से अधिक है। गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के मामले में, श्रमिक लागत भुगतान किये गये वेतन/मजदूरी के सम्बन्ध में प्रति इकाई वर्धित मूल्य श्रमिकों पर खर्च किये गये प्रति रुपये के सम्बन्ध में कुछ विचार प्रस्तुत करता है। ग्रामीण क्षेत्रों में श्रम लागत उत्पादकता कागज तथा कागज उत्पाद उद्योग समूह (28) में सबसे कम और चमड़ा उत्पाद उद्योग प्रभाग (29) में सबसे अधिक पाया गया। शहरी क्षेत्रों में सबसे कम तथा सबसे अधिक उत्पादकता क्रमशः जूट तथा अन्य रेशा वस्त्र उद्योग प्रभाग (25) और खाद्य उत्पाद उद्योग प्रभाग (26) में देखा गया। श्रम उत्पादकता कुछेक उद्योग प्रभागों को छोड़कर जहां ग्रामीण उत्पादकता तदनुसारी शहरी उत्पादकता के मुकाबले में अधिक है, ग्रामीण क्षेत्र के मुकाबले में शहरी क्षेत्रों में साधारणतया अधिक है। ये उद्योग प्रभाग हैं, चमड़ा और चमड़ा उत्पाद (29), विद्युत मशीनरी और उपकरण (36), सूती वस्त्र (23), जट तथा अन्य रेशे वस्त्र (25), लकड़ी तथा लकड़ी उत्पाद (27), कोयला उत्पादों सहित रबड़, तथा प्लास्टिक (31), धातु उत्पाद तथा पूर्ण (34), ऊनी रेशमी तथा

मनूष्य निर्मित रेशों का निर्माण (24) तथा मरम्मत सेवायें (97)।

2.6 स्वामित्व प्रकार के अनुसार उद्यम : जैसा कि विवरण 8 से स्पष्ट है ग्रामीण तथा शहरी दोनों क्षेत्रों में सभी उद्यम स्व-लेखा विनिर्माणकारी उद्यमों (ग्रामीण तथा शहरी क्षेत्रों में क्रमशः प्रति हजार 990 और 987) तथा गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठान (ग्रामीण तथा शहरी क्षेत्रों में क्रमशः प्रति हजार 975 और 928) मालिकाना स्वामित्व के अधीन हैं। जैसी आशा है, दोनों स्व-लेखा विनिर्माणकारी उद्यमों और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों के मामले में साझेदारी उद्यम ग्रामीण क्षेत्रों के मुकाबले में शहरी क्षेत्रों में अपेक्षाकृत अधिक है। सहकारी सौपायटियों और अन्य सार्व-जनिक/निजी नियमित निकायों (अन्यों के रूप में दर्शाया गया) द्वारा चलाये गये उद्यम नगण्य पाये गये।

2.7 सामाजिक समूह के अनुसार पारिवारिक उद्यमों का वितरण :—विवरण 9 सामाजिक समूह के अनुसार पारिवारिक उद्यमों का प्रतिशत वितरण प्रस्तुत करता है। यह नोट किया जाये कि मालिकाना उद्यमों और केवल एक ही परिवार से साझेदार रखने वाले साझेदार उद्यमों पर इस विवरण के प्रयोजन के लिये परिवार उद्यम के रूप में विचार किया गया है। इस विवरण से यह देखा गया है कि ग्रामीण परिवार उद्यमों (स्व-लेखा विनिर्माणकारी उद्यमों और गैर-निर्देशिका प्रतिष्ठानों को इकट्ठे लेकर) द्वारा क्रमशः 24.77 प्रतिशत और 6.29 प्रतिशत अनुसूचित जातियों और अनुसूचित जनजातियों से सम्बंधित सामाजिक समूहों के लोगों के स्वामित्व में हैं और शहरी क्षेत्रों में 10.21 प्रतिशत और 14.49 प्रतिशत जहां तक पारिवारिक उद्यमों का सम्बन्ध है, ग्रामीण क्षेत्रों में स्व-लेखा विनिर्माणकारी उद्यमों का 67.73 प्रतिशत और गैर-निर्देशिका विनिर्माणकारी प्रतिष्ठानों का 87.59 प्रतिशत "अन्य" श्रेणी प्रथात् अनुसूचित जातियों तथा अनुसूचित जनजातियों को छोड़कर अन्य श्रमिकों के स्वामित्व में हैं और शहरी क्षेत्रों में स्व-लेखा विनिर्माण उद्यमों और गैर-निर्देशिका विनिर्माण प्रतिष्ठानों का तदनुरूपी प्रतिशत क्रमशः 86.22 और 95.00 है।

विवरण 7 : स्व-लेखा उद्यमों और गैर-निर्वहिका प्रतिष्ठानों के लिए प्रति कामगार सकल वधित मूल्य तथा केवल उद्योग प्रभाग के अनुसार गैर-निर्वहिका प्रतिष्ठानों के लिए परिलब्धियों में वधित मूल्य का अनुपात
