A NOTE ON ASSETS AND  
LIABILITIES OF RURAL AND  
URBAN HOUSEHOLDS

*National Sample Survey :  
Thirty-seventh round (January—December 1982)*

# Section 1

## 1. INTRODUCTION

1.1.0 The Debt and Investment survey carried out in NSS-37th round (January to December, 1982) was the fourth in the series of decennial country-wide investigation on household indebtedness and investment. The objective of the survey was to build up dependable estimates of the assets and liabilities of the households and also to assess the extent of borrowing and capital formation etc. in the household sector both at state and all-India level.

1.1.1 The first "All-India Rural Credit Survey" launched by the Reserve Bank of India (R.B.I.) in 1951-52 was mainly policy-oriented and had twin objectives of studying both the demand and supply side of the credit. While from the point of view of demand for credit, information on assets, economic activities, credit operations and the incidence of debt on the rural households were collected, data on extent and mode of operations of the different credit agencies were enumerated with a view to examine the supply side of the credit. The second decennial enquiry on the subject titled as 'All-India Rural Debt and Investment Survey' conducted by RBI in 1961-62 was more broad based. The survey aimed at deriving bench-mark estimates on debt, investment and other indicators of the rural economy, not only for All-India, but also for the major States. The third decennial survey was entrusted by the RBI to the National Sample Survey Organisation which undertook an integrated survey on land holdings and debt & investment in its twentysixth round during July 1971 to September 1972. The survey on debt & investment was extended for the first time to the urban areas also. For both the enquiries, data were collected from the same set of sample households. Since land holdings and livestock formed the subject matter of enquiry for the NSS-37th round (January-December 1982) as per the 10-year programme charted by the Governing Council, NSSO, the fourth decennial survey on debt & investment of the RBI was conveniently combined with the NSS programme of work and data on both the subjects of enquiry were collected, as in the NSS-26th round survey, from the same set of households.

1.2.0 ITEMS OF ENQUIRY : In the second All-India survey on Rural Debt and Investment carried out by RBI in 1961-62, besides collection of

information on inventory of assets (including stock of commodities) and liabilities, loan transactions and capital expenditure on farm and non-farm business, certain other items of information on receipt and disposal of farm and non-farm business, receipt from miscellaneous professions and services, expenditure on important items of non-farm business profession and services expenditure on durable assets and on some selected items (such as, on ceremonials, relief etc.), sale & loss of physical assets and purchase and sale of financial assets were included in the survey. The item coverage of the NSS survey in 1971-72 remained more or less the same as that of the 1961-62 enquiry except that some additional items of information on expenditure of major agricultural inputs, e.g., manures, fertilisers, seeds etc. were included in the schedule of enquiry and items relating to the stock of commodities which were covered in the 1961-62 enquiry were excluded from the survey. However, in the enquiry of the NSS-37th round (1982), items coverage was considerably pruned to ensure collection of better quality data. Accordingly items of information on receipts and disposal of farm produce, receipt from non-farm business as also the expenditure on farm and non-farm business were excluded from the scope of the survey.

1.3.0 METHODOLOGY ADOPTED FOR COLLECTION OF DATA : In the second survey, the reference period for collection of data was the agricultural year July 1961 to June 1962 while the survey was conducted in the calendar year 1962. Each sample household was visited twice, once during the first half of the calendar year 1962 and second time in the later half (that is, July to December 1962). In the first visit, the asset and liability of the household as on 31st December 1961 was derived by ascertaining the position of assets/liabilities as on the date of survey (which ranged between January to June 1962) and their transactions during the period intervening between the date of reference (i.e. 31st December 1961) and the date of survey.

1.3.1 In the first visit information on loan outstanding at the beginning of the reference period (that is, on 30th June 1961) together with the amount of borrowings and repayments made during July to December 1961 were also collected. Thus the two sets of information on the stock and flow positions of liability of the household not only provided scope

for obtaining two independent figures in respect of the liability position of the household as on 31st December 1961 for the purpose of reconciliation at the data collection stage but also for assessing the extent and mode of borrowings and repayments of loans during the first half of the reference year 1961-62. Data on other items were collected for the first six months of the reference period in the first visit. Similar procedure was adopted in the second visit to obtain data on various items for the later half of the reference period.

1.3.2 The procedure for collection of data was different in the third survey undertaken by the NSSO during 1971-72. During the first visit to households from July to December 1971, data on assets/liabilities of households were collected directly for the fixed reference date of 30th June 1971. Information on transaction of assets, liabilities, receipts etc. for the six-month period ranging from July to December 1971 were collected in the second visit to households during January to June 1972. Similar data for the second half of the reference period (January to June 1972) and also information on the stock of assets/liabilities at the end of the reference period, that is, on 30th June 1972 were collected in the third visit which staggered over a period of about three months from July to September 1972.

1.3.3 In the latest survey of NSS 37th round, the survey period was the calendar year 1982 and the reference period for collection of data was July 1982 to June 1982. In the first half of the calendar year 1982, the asset and liability position of the household as on the date of survey as well as the transactions of the assets/liabilities which had taken place during 1st July 1981 to the date of survey were ascertained at the time of the first visit to the sample households. Based on the stock and flow data, the assets and liabilities of the households as on 30-6-81 were derived. In a similar way, assets/liabilities of the households as on 30-6-82 were ascertained through the data collected in the second visit from the same set of households staggered over the period of July to December 1982. The information on the capital expenditure, expenditure on durable household and financial assets etc. for the first half of the reference year was collected in the first visit, while in the second visit, similar data were enumerated for the later half of the reference year. Hence, for such items data for both the visits pooled together would give the estimate for the entire reference year. It is worthwhile to mention here that although the methodology adopted in 1961-62 survey for deriving an inventory of assets/liabilities of households on a fixed date was similar to that of the present survey, the procedure

for ascertaining the value of assets owned by the households was different. In 1961-62 survey, the number of assets owned on the fixed (reference) date derived from the stock and flow data was evaluated at the price prevailing on the fixed date. However, in the current survey, the value of the assets owned as on the date of survey was adjusted with respect to the value of transaction of assets made during the period intervening between the fixed reference date and the date of survey in order to get the value of assets owned on the reference date.

1.3.4 Since book value was not generally available in the household sector, the value of asset which were acquired by the household at different points of time were ascertained following the procedure laid down below :

(i) Value of a physical asset acquired prior to 30th June 1981 in the case of first visit and prior to 30th June 1982 in the case of second visit was evaluated in its existing condition at the price prevailing in the locality on the date of survey if the asset was owned on the date of survey or on the date of disposal if the asset was disposed during the reference period in a manner other than sale.

(ii) If the said asset was sold during the reference period, the sale price was considered as the value of the asset.

(iii) When a physical asset was purchased or constructed during the reference period, the purchase price or the total expenditure incurred on construction was taken as the value of the asset.

(iv) If an asset was acquired in a manner other than purchase or construction during the reference period, the value of the asset in its existing condition as prevailing in the locality at the time of acquisition was noted.

(v) If an asset which was acquired during the reference period was also disposed of during the said period, the same value as recorded under acquisition was reported under disposal.

1.4.0 GEOGRAPHICAL COVERAGE : The present survey of 37th round covered the whole of the Indian Union excepting the following parts :

- (i) Ladakh and Kargil district of Jammu & Kashmir,
- (ii) Rural areas of Nagaland and Andaman & Nicobar Islands.

1.5.0 SAMPLE SIZE AND THE FIELD WORK : The survey was carried out in 8408 sample villages and 5300 urban sample blocks. Of the total sample, 4114 villages and 544 urban blocks formed the

Central sample and were surveyed by the staff belonging to the Field Operation Division (FOD) of the NSSO. Under the NSS matching scheme, the remaining villages and blocks constituting the State sample were surveyed by the field staff of the respective State Statistical Agencies. All the States and Union Territories excepting Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated in the NSS on at least an equal matching basis. Eight households from each of the sample villages and six households from each of the urban sample blocks were selected for the survey during this round<sup>1</sup>. The required information was collected from the same set of sample households in two visits to each household.

1.6.0 CONCEPTS AND DEFINITIONS : The important concepts and definitions used for the survey are given below :

(i) *Household* : A group of persons normally living together and taking food from a common kitchen constituted a household. The members of a household might or might not be related to one another.

(ii) *Operational holding* : An operational holding was a techno-economic unit used wholly or partly for agricultural production and was operated (directed/managed) by one person alone or with the assistance of others, without regard to title, size or location. In the context of agricultural operations, the technical unit was understood as a unit with more or less independent technical resources covering items like land, agricultural implements and machinery, draught animals etc.

(iii) *Cultivator households* : All rural households operating some land (i.e. land 0.005 acre or more) were treated as cultivator households.

(iv) *Non-cultivator households* : The rural households operating no land or land less than 0.005 acre were considered as non-cultivator households. They were classified into (a) agricultural labour, (b) artisans and (c) others according to the principal household occupation groups. Out of the occupations pursued by the members as their principal or subsidiary (on the basis of earnings) occupations, the one which fetched the maximum earnings to the household in the reference year was considered as the principal household occupation.

(v) *Agricultural labour* : A person was considered as an agricultural labourer if he/she followed one or

more of the following agricultural occupations in the capacity of manual labour on hire : (a) farming, (b) dairy farming, (c) production of any horticultural commodity, (d) raising of livestock, bees or poultry, (e) any work performed on a farm as incidental to or in conjunction with farm operations.

(vi) *Artisans* : Own account skilled workers and handicraftsmen engaged in any of the following occupations were considered as artisans : (a) weavers, knitters, carpet makers etc., (b) dress makers, upholsterers etc., (c) shoe-makers and other leather workers, (d) blacksmiths, goldsmiths, coppersmiths and other metal workers, (e) carpenters, painters etc., (f) stone carvers, mason, plasters, glazers cement finishers etc., (g) printers (paper and textiles), engravers, blockmakers etc., (h) potters, brick makers, glass and ceramic workers, (i) basketing and mat-weavers and related workers and (j) makers of musical instruments, toys, spot goods, etc.

Own account workers were those who operated their enterprise without hiring anyone on salary or wages except occasionally.

(vii) *Self-employed household* : Persons who were engaged in their own farm or non-farm enterprises were treated as self-employed. There are different kinds of self-employed. Some may operate their enterprises without hiring any labour. Others may normally work on their own but occasionally hire a few labourers. There is also a third category who by and large regularly run their enterprise by hiring labour. A household in urban areas were considered as self-employed, if more than 50% of its income during 365 days preceding the date of survey was derived from self-employment pursued by its members.

(viii) *Assets* : Assets were defined to include all items owned by the household which had money value such as land, building, livestock, agricultural implements, non-farm business equipments, all transport equipments, durable household assets, dues receivable on loans advanced, shares in co-operative society, bank etc., National Plan saving certificates and the like, deposits in companies, banks, post offices etc. However, crops standing in the fields, currency notes and coins in hand and stock of commodities held by the household were not considered as assets for the purpose of this survey.

(ix) *Liabilities* : All claims against the household held by others were included under liabilities e.g. cash loans, commodity loans, unpaid bills of grocers, doctors, lawyers etc.

<sup>1</sup>For details, reference may be made to the note on "Sample Design and Estimation Procedure" given in section 3.

(x) *Farm Business* : Farm business comprised of household economic activities like cultivation including cultivation of plantation and orchard crops and processing of produce on the farm such as paddy hulling and gur making. Gur making was covered under farm business for the purpose of the survey only when such activity was carried out in the farm by indigenous method. Farm business also included activities ancillary to be keeping and other allied activities coming under industry division '0' of the National Industrial Classification 1970.

(xi) *Non-farm Business* : Non-farm business was defined to include all household economic activities other than those covered in the farm business, such as manufacturing & repairing services, mining and quarrying, trade, transport and profession and services. However, all manufacturing establishments registered under section 2m(i) or 2m(ii) and section 85 of Factory Act, 1948 were excluded from the scope of the survey. Biri and Cigar manufacturing establishments registered under Bidi and Cigar Workers Act, 1966 were also kept outside the coverage of the survey.

1.7.0 **TABULATION OF DATA** : The Working Group (WG) on finalisation of schedules, instructions and the tabulation programme of NSS-37th round set up by the Governing Council (GC), NSSO recommended an elaborate programme for tabulation keeping in view the requirements of the Reserve Bank of India and other users. The recommendations of the WG was approved subsequently by the GC, NSSO and it was decided that the entire tabulation work for both the Central and the State sample would be carried out in the in-house computer located at the Department of Statistical Analysis and Computer Services of the Reserve Bank of India, Bombay. For facilitating the processing work of the State sample, the RBI created processing cells in State capitals where branches of Reserve Bank of India were located. Each processing cell was entrusted with the work of a few neighbouring states. In a processing cell the schedules of enquiry of different states coming under its jurisdiction were collected from the States Statistical Bureau (SSB) after a preliminary scrutiny of the schedules was undertaken by the respective SSBs. The consistency in the data was checked in the processing cells as per the programme furnished by the Survey Design and Research Division of the NSSO and subsequently the data were transcribed in punch cards and then transferred to the tapes either by hiring the services of the local agencies available at places where the processing centres were located or by sending the schedules of enquiry to the main processing centre of the RBI at Bombay. For the Central sample,

the scrutiny of data and transcription to punch cards were undertaken by the different processing centres of the Data Processing Division (DPD) of the NSSO and the data tapes prepared from the local computer centres were sent to RBI, Bombay, for further processing except for the data processing centre located at Nagpur from where the punched cards were sent to the RBI, Bombay, as proper facilities for getting the data stored in magnetic tapes were not available.

1.7.1 For both the Central and the State sample, the data were cleaned by resorting to two to three cycles of updating of the data file in the Computer as per the Computer Scrutiny Programme and Auto-Correction Rules prepared by the SDRD, NSSO and approved by the Working Group. In the initial stage, rapport between the representatives of the RBI, and of the SDRD, NSSO was established through occasional meetings either at Calcutta or at Bombay for discussing the conceptual framework of the survey, impact of different types of inconsistency in the data on the estimates and the ways and means to tackle them and also on other processing difficulties. Subsequently when the data were in the process of cleaning operations, several meetings between the representative of the RBI, SDRD and DPD of the NSSO were held to overcome the processing problems.

1.8.0 **CONTENT OF THE REPORT** : Quite an elaborate programme for tabulating the data collected through schedule 18.2 (Debt & Investment) was approved by the Governing Council of N.S.S.O. The entire programme of tabulation was split up into two phases. While the priority I tabulation provided the estimates on the asset and liability position as on 30th June 1981 and 1982, extent and mode of borrowings and capital expenditures during the agricultural year 1981-82, estimates on stock of selected items of assets as on 30-6-82 and expenditure incurred on specified items of assets during agricultural year 1981-82 were included in priority II.

1.8.1 Since all the tables included in the priority I tabulation alone, can not be accommodated in one issue, the survey results are proposed to be brought out in no. of issues of this journal. In this issue, some key estimates relating to broad groups of assets and liabilities owned by the households as on 30th June, 1981 classified by sub-samples separately for Central, State and Central and State Pooled samples are presented. The issue provides estimates for all-India and individual states separately for rural, urban and rural and urban combined.

1.8.2 While the main features of the results presented in this report are discussed in section two, the data arranged in the following statistical tables are given in Part II.

1.1 : Distribution of sample villages/blocks by states and sub-samples.

1.2 : Distribution of sample households by household asset holding and sub-sample.

2 : Distribution of estimated number of households by household asset holding, sub-sample and household type.

3 : Average value of total assets per reporting household by states and sub-sample.

4.1 : Percentage of households reporting liability to all households by states and sub-sample.

4.2 : Average value of liability per reporting household by states and sub-sample.

5 : Percentage distribution of households over household type for each sub-sample.

6 : Percentage distribution of households over household asset holding classified by household type.

7 : Percentage of households reporting and average value per reporting household of broad groups of assets and liabilities as on 30-6-81 classified by household asset holding.

Tables 1.1 and 1.2 are provided to give an idea of the sample size based on which the estimates presented in the report are built up. While Table 1.1 shows the number of first stage sampling units surveyed (villages and blocks respectively in rural and urban areas) in each state classified by sub-sample, Table 1.2 gives the distribution of ultimate sampling units i.e. households classified by household asset holding and sub-sample separately for rural and

urban areas of each state. The survey results presented in all the tables except table nos. 6 and 7 are classified by sub-samples separately for Central, State and Central and State Pooled sample. Table Nos. 6 and 7 provide estimates based on Central and State samples pooled only. The purpose of providing sub-sample wise estimates is to show the variations in the estimates derived independently from different sub-samples. Besides presenting estimates for all households, an attempt has been made to provide information in Tables 2 to 4 and 7 separately for cultivator and non-cultivator households in rural areas and for self-employed and others in urban areas. Obviously, the rural and urban combined estimates are prepared for all households only. For Table Nos. 5 and 6 the non-cultivator households in the rural areas have been further classified into (i) agricultural labour, (ii) artisans and (iii) others and the self-employed households in the urban areas have been categorised by the occupation divisions such as (i) professionals etc., (ii) administrative etc., (iii) clerical & related workers, (iv) sales workers, (v) service workers, (vi) farmers, fishermen etc., (vii) production and different related workers and (viii) others. These two tables will show the composition of different groups of households in rural and urban areas and the distribution of these groups among different asset holding classes. Further, household asset holding appears as a classificatory character in Table Nos. 2, 6 and 7. The classification of households by household assets and by household type (cultivators etc. in rural areas and self-employed etc. in urban areas) is meant to bring out the variations in magnitude and the compositions of assets among the different classes of households.

It is pertinent to mention here that in the States and all-India tables given in Part-II, the cell figures of a table, when added up, may not in all cases agree with the figure shown against the total column/line due to rounding off errors.

## Section 2

### IMPORTANT FINDINGS OF THE SURVEY

2.0.0 The present issue provides estimates of the different items of assets and also of the total assets and liabilities of the households as on 30th June 1981 at the state and all-India level in the rural, urban and rural & urban sectors combined. The estimates of assets classified by household asset holding for each major household type<sup>1</sup> presented in this issue are based on Central and State samples pooled data. However, to get an idea of sub-samples variations, some key estimates, such as, the distribution of number of households classified by household asset holding, average value of total asset per reporting household, percentage of indebted households to all households and average amount of liabilities per reporting household for each major household type have been presented separately for each sub-sample of the Central and State sample in table nos. 2, 3, 4.1 and 4.2 respectively of part-II. Table 5 provides also the percentage distribution of households over household type

by sub-sample. In this section an attempt is made to bring out the salient features relating to assets and liabilities of the households at the state and all-India level in a summarised form.

2.1.0 ESTIMATE OF HOUSEHOLDS : Based on the data of the Central and State samples pooled, the number of households is estimated as 93.6 millions in the rural sector and 29.4 millions in the urban sector of India. Although the survey was conducted about a year after the Population Census of 1981 had been taken, it was worthwhile to make a comparison of the survey estimate for this basic characteristic with the Census figure for examining the reliability of the survey results. This comparison is brought out for sixteen major states and all-India separately for rural and urban sectors in Table (I). Assam has been excluded as Population Census of 1981 was not undertaken there.

TABLE (I) : STATEMENT SHOWING THE ESTIMATED NUMBER OF HOUSEHOLDS (IN 000) BASED ON SCHEME 18.2 OF NS S 37TH ROUND AND POPULATION CENSUS 1981.

states	rural			urban			total		
	estimated no. (000) of households			estimated no. (000) of households			estimated no. (000) of households		
	census 1981	schedule 18.2	differ-ence	census 1981	schedule 18.2	differ-ence	census 1981	schedule 18.2	differ-ence
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Andhra Pradesh	8427	8478	+ 0.61	2458	2383	-3.05	10885	10861	-0.02
2. Bihar	10148	11170	+ 10.07	1433	1578	+ 10.12	11581	12749	+ 10.08

Note:—Percentage difference =  $\frac{\text{Schedule 18.2—Census}}{\text{Census}} \times 100$

<sup>1</sup>Major household type : Rural Sector—(i) cultivators and (ii) non-cultivators  
Urban Sector—(i) self-employed and (ii) others

2.1.1 Table (I) reveals that in both the sectors, the survey estimates and the census figures at the all-India level are quite close—the difference being 3.03 per cent in the case of rural sector and only 1.57 per cent in the urban sector. The survey estimates are on the higher side in rural areas as well as in the urban areas, compared to the census figure. The percentage difference is generally low at the state level also, but in some cases, they are quite high. Compared to census figure, the survey estimate is considerably less in Madhya Pradesh (11.71%) in the rural sector and in Karnataka (10.56%) and Kerala (9.09%) in the urban sector. It may be mentioned here that in Madhya Pradesh survey could not be conducted in a few strata due to the paucity of field staff. Although the survey result is expected to be on the higher side than the census figures due to the population growth during the intervening gap of one year between the census and the survey, the extent to which the survey estimates exceed the census figure in West Bengal (10.11%), Bihar (10.07%) and Punjab (9.56%) in the rural sector and in West Bengal (19.14%), Uttar Pradesh (14.27%) and Bihar (10.12%) in the urban sector can not be explained by the growth factor alone.

2.1.2 As the estimates of assets and liabilities of the households are presented by different categories of households, it is worth analysing the proportion of households falling under such categories in rural and urban sectors before going into the different aspects of assets and liability position of the households. As stated earlier, the households in the rural sector were broadly classified as cultivators and non-cultivators. The cultivators were defined as those who operated some land (0.005 acre or more) during the agricultural year 1981-82. Those who did not operate any land were considered as non-cultivators and were further classified as (i) agricultural labours, (ii) artisans, and (iii) other households depending upon the major source of income of the household during 365 days preceding the date of survey. The above definitions were adopted for this survey

to maintain the comparability of the present survey results with those of NSS 26th round canvassed during the agricultural year 1971-72. The results of NSS 37th round indicate that there are about 93.6 million households in rural India, of which more than 76.3 per cent are cultivator households and about 11.3 per cent are agricultural labour households. Only about 1.6 per cent are artisan households. With a view to observing the changes in the percentage of cultivators and different types of non-cultivators during the last decade, the percentage distribution of rural households over household types derived from NSS 37th and NSS 26th rounds have been presented for 17 major states and all-India in Table (II).

2.1.3 The results presented in Table (II) reveal that in rural India there is an increase in the proportion of cultivator households by about 4 per cent during the last decade. Among the non-cultivators, the percentages of both the agricultural labour households and the artisan households have decreased whereas the percentage of other households has remained more or less constant during the period under reference.

2.1.4. The percentage distribution of rural households over household type at the state level based on 37th round estimate shows marked variations from the all-India pattern. While the percentage of cultivator households to all households are found to be as high as 93 in Kerala and 87 in Himachal Pradesh and Assam, the percentage is as low as 57 and 63 in Haryana and Punjab respectively, the all-India percentage being 76. Compared to NSS 26th round, the proportion of cultivators has decreased in NSS 37th round in Bihar, Haryana, Himachal Pradesh, Jammu & Kashmir, Madhya Pradesh, Maharashtra and Rajasthan. The decrease is considerable in Jammu & Kashmir (about 10 per cent) and Himachal Pradesh (about 5 per cent). On the other hand, quite a substantial increase is noticed in Punjab (20 per cent), Gujarat (15 per cent), Tamil Nadu (14 per cent) and West Bengal (13 per cent).

TABLE (II) : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS OVER HOUSEHOLD TYPE DERIVED FROM NSS 37TH AND NSS 26TH ROUNDS.

states	source	household type					RURAL	
		cultivators	agricultural labourers	artisans	other households	non-cultivators (cols. 4+5+6)	all households

	NSS 26th	77.8	8.1	2.9	11.2	22.2	100.00
17. West Bengal	NSS 37th	78.4	8.9	0.8	11.9	21.6	100.00
	NSS 26th	65.8	17.4	1.9	14.9	34.2	100.00
18. All India	NSS 37th	76.3	11.3	1.6	10.8	23.7	100.00
	NSS 26th	72.4	14.6	2.4	10.6	27.6	100.00

2.1.5. In the case of agricultural labour households, high concentration is noticed in Andhra Pradesh (18 per cent), Punjab (17 per cent), Maharashtra (16 per cent) and Tamil Nadu (16 per cent). In contrast, Kerala, Jammu & Kashmir and Himachal Pradesh show a low figure of 2 per cent only, Rajasthan coming next to these states with a slightly higher percentage of agricultural labour households (3 per cent). During the decade, the percentage of agricultural labour households has decreased in almost all the states except Himachal Pradesh, Jammu & Kashmir (where the proportion of cultivator households has also decreased), Assam and Bihar. The decrease is notable in Tamil Nadu (about 11 per cent), West Bengal (about 8 per cent), Punjab (about 8 per cent) and Gujarat (about 7 per cent).

2.1.6. Artisans, as defined for the survey, are a small group. According to 1971 survey, only about 2.4 per cent households in rural India were artisans. The results of the present survey indicate a further fall in the percentage which is found to be only 1.6. The highest percentage of artisan household is found in Andhra Pradesh (2.9), closely followed by Haryana (2.7). On the other hand, Orissa (0.1), Kerala

(0.2) and Assam (0.3) exhibit negligible percentage of these households. The decrease in the percentage of artisan households over the last 10 years is observed uniformly in all the states except in Jammu & Kashmir which shows a rise of 1.4 per cent.

2.1.7 It is well-known that cultivator households form a big chunk of the rural households in India. However, this high preponderance of the cultivator households as revealed from the survey appears to be mainly due to the definition of the cultivator households adopted in the survey as discussed earlier. It is quite likely that a good number of agricultural labour households and artisans who hold and operate a small piece of land are treated as cultivator households although their major source of income is other than cultivation. Also due to the Government policy of re-distribution of land to landless households, some households without land in 1971 might have acquired some land for operation during the intervening period and as a result, the percentage of cultivator households had increased during the decade with the consequential decrease

in the proportion of agricultural labour and artisan households in majority of states.

2.1.8. In the urban sector, the households have been categorised as self-employed and others. Again, under 'self-employed', the households are classified by seven major occupational groups viz.

- (i) professional, technical and related workers,
- (ii) administrative, executive and managerial workers
- (iii) clerical & related workers,
- (iv) sales workers,
- (v) service workers,
- (vi) farmers, fishermen, hunters, loggers and related workers &
- (vii) production and related workers, transport equipment operators and labourers.

The percentage distribution of households over these types of households for 17 major states and all-India is presented in Table (III).

Table (III) shows that in the urban sector, nearly one-third of the households is self-employed at the all-India level. Among the self-employed households those who are engaged as "Production and related workers, transport equipment operators and labourers" and those engaged as "sales workers" are the two important categories each constituting a little over 10 per cent of the urban households. The remaining 11 per cent are distributed in other self-employment categories. Of them, "farmers etc." is an important group which constitutes about 4 per cent of the urban households pursuing the occupation.

2.1.9. There is a considerable variation in the state estimates. While West Bengal, Orissa, Tamil Nadu and Maharashtra record the percentage of self-employed households to all households between 20 to 30, the said percentage in Punjab, Jammu & Kashmir, Uttar Pradesh and Haryana is found to be between 40 to 45. The farmers are comparatively more important in Jammu & Kashmir, Karnataka and Kerala, the proportions of farmers being 11, 8 and 7 per cent respectively.

TABLE (III): PERCENTATGE DISTRIBUTION OF HOUSEHOLDS OVER HOUSEHOLD TYPE.

URBAN

states	household type								others	all households

18. All-India . . .	1.69	2.41	0.85	10.57	1.92	4.04	10.84	32.55	67.45	100.00

2.2.0. PROPORTION OF HOUSEHOLDS OWNING ASSETS AND AVERAGE VALUE OF TOTAL ASSETS OWNED BY REPORTING HOUSEHOLDS: For the purpose of the survey both the physical and financial assets owned by the households as on 30th June 1981 were enumerated. Under physical assets, land, buildings, livestock, agricultural implements & machinery, transport equipments and durable household assets were taken into account while shares and deposits etc. and cash and kind dues receivable were considered under financial assets. Obviously, it is expected that a household must own one or the other asset covered in the survey. The survey reveals that 99.88 per cent of the rural households and 99.22 per cent of urban households at the all-India level report ownership of one or more assets. The average value of total assets per reporting household is estimated as Rs. 36133 in rural India and Rs. 40890 in urban India. The variation in the average value of assets per reporting households over the 17 major states is shown in Table (IV) separately for the Central sample, State sample and Central & State samples pooled.

2.2.1. Among the states, average value of total assets per reporting household in the rural sector is highest in Punjab (Rs. 96,631), closely followed by Haryana (Rs. 90,950). Next in the rank comes Kerala (Rs. 77,148), followed by Himachal Pradesh (Rs. 62,623) and Jammu & Kashmir (Rs. 59,007). The states of northern region are, generally, found to have reported high values of total assets per reporting household. In contrast, the states of eastern region reveal low values of total assets per reporting household. The lowest average is observed in Orissa (Rs. 17,639), followed by Tamil Nadu (Rs. 19,524), Assam (Rs. 20,512) and West Bengal (Rs. 20,746).

2.2.2. In the urban sector, Kerala exhibits a very high figure of Rs. 1,12,475 as average value of assets per reporting household. Next in order comes, Jammu & Kashmir (Rs. 84,420), Haryana (Rs. 60,063), Punjab (Rs. 55,235) and Himachal Pradesh (Rs. 54,051). This average is, again found to be quite low in Orissa (Rs. 22,100), Madhya Pradesh (Rs. 27,397) and West Bengal (Rs. 28,304).

TABLE (IV): THE AVERAGE VALUE (RS.) OF TOTAL ASSETS PER REPORTING HOUSEHOLD DERIVED FROM CENTRAL SAMPLE, STATE SAMPLE AND CENTRAL & STATE SAMPLES POOLED SEPARATELY FOR RURAL AND URBAN SECTORS.

HOUSEHOLD TYPE: ALL HOUSEHOLDS

states	average value (Rs.) of total assets per reporting household							
	rural				urban			
	central sample	state sample	central and state samples pooled	percentage difference	central sample	state sample	central and state samples pooled	percentage difference

9. Kerala	73309	81349	77148	-10.42	95086	128659	112475	-29.85
10. Madhya Pradesh	29555	30413	29785	-2.88	24520	30760	27397	-22.78
11. Maharashtra	34624	35812	35192	-3.38	48913	37406	42933	+26.80
12. Orissa	19092	16203	17639	+16.38	23342	20662	22100	+12.13
13. Punjab	90196	103347	96631	-13.61	57816	52335	55235	+9.92
14. Rajasthan	36624	45157	40888	-20.87	38717	41442	40159	-6.79
15. Tamil Nadu	19180	19868	19524	-3.52	33851	33832	33842	+0.06
16. Uttar Pradesh	44880	44453	44660	+0.96	37645	38158	37908	-1.35
17. West Bengal	19637	21873	20746	-10.78	28800	28263	28304	+1.90
18. All-India	35226	37091	36133	-5.16	40877	41185	40890	-0.75

NOTE: —percentage difference =  $\frac{\text{Central sample} - \text{State sample}}{\text{Central \& State samples pooled}} \times 100$

2.2.3. In Table (IV), along with the estimates of the Central and State samples, the difference between the estimates of the Central and State sample expressed as percentage of the Central & State sample pooled for each state has also been shown. In the rural sector, this percentage difference lies within about 10 per cent in all the states except for Bihar, Orissa, Punjab and Rajasthan where higher figure of 21%, 16%, 14% and 21% is reported for the respective states. However, in the urban areas, many more states exhibit large percentage variation between the Central and State sample estimates, the highest percentage difference being about 48 in Bihar followed by Himachal Pradesh (43%), Kerala (30%), Gujarat (28%), Maharashtra (27%), Madhya Pradesh (23%), Haryana (14%) and Orissa (12%).

### 2.3.0. DISTRIBUTION OF TOTAL ASSETS ACCORDING TO INDIVIDUAL COMPONENTS:

With a view to studying the importance of different items of assets to the various classes of households and also to see as to whether there is any shift in the importance of an item of asset during the last decade, the percentage share of different items in the total assets derived from the survey data of NSS 37th as well as NSS 26th round for the rural sector and only of NSS 37th round for the urban sector have been presented for all-India in Table (V). In this connection, it may be mentioned that as the urban sampling design of the NSS 26th round was not oriented towards Debt and Investment survey, the reliability of the urban estimates was in some doubt. Hence, the NSS 26th round result for the urban sector was not released.

TABLE (V) : PERCENTAGE SHARE OF DIFFERENT ITEMS OF ASSETS IN THE TOTAL ASSETS CLASSIFIED BY MAJOR HOUSEHOLD TYPE BASED ON NSS 37TH AND NSS 26TH ROUNDS SURVEY IN THE RURAL SECTOR AND ONLY ON NSS 37TH ROUND IN THE URBAN SECTOR.

ALL-INDIA

items of assets	rural				urban				
	cultivators		non-cultivators		all households		self-employed: total	other households	all households
	37th round	26th round	37th round	26th round	37th round	26th round	37th round	37th round	37th round
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. land	64.1	69.0	30.8	32.3	62.1	66.7	34.6	30.6	32.4
2. buildings etc.	19.5	16.5	39.1	39.7	20.7	17.9	37.3	34.3	35.6
3. livestock etc.	5.0	6.5	5.2	6.4	5.0	6.5	1.1	0.6	0.8
4. machinery equipments etc.	3.7	2.7	3.3	3.1	3.7	2.7	8.0	2.7	5.0
5. durable household assets	6.6	4.2	15.8	11.5	7.1	4.6	13.1	16.8	15.1
6. financial assets	1.0	0.8	5.5	5.2	1.2	1.1	5.3	14.9	10.6
7. dues receivable	0.1	0.6	0.3	1.8	0.1	0.5	0.7	0.2	0.4
8. total assets	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

2.3.1. The importance of agriculture both in terms of national income and employment is well-established and needs no elucidation. It is, therefore, no wonder that land would be the most important component of assets owned by the rural households. Although the present survey results as shown in Table (V) indicate that in the rural sector, the percentage of the value of land to the value of total assets is by far the highest, the share of value of land as well as livestock appears to have decreased in 1981 compared to the corresponding figures of 1971. The percentage of value of land has declined from 66.7 to 62.1 and of livestock from 6.5 to 5.0. On the other hand, an increasing trend has been noticed in the case of building etc. (from 17.9 to 20.7), durable household assets (from 4.6 to 7.1)

and machinery, equipments etc. (from 2.7 to 3.7). The financial assets contribute about 1 per cent of the total assets and no appreciable change is noticed over the decade.

2.3.2. As far as the cultivator and non-cultivator households in the rural areas are concerned, the pattern of change over the decade appears to be of similar nature for both the categories. However, the survey result of NSS 37th round reveal that in the case of non-cultivator households, the percentage distribution of the value of different items of assets over total value of assets exhibit a completely different picture from that of the cultivator households. For the non-cultivators, while 'building etc.' takes the top position with about 39 per cent

under its command, the share of land is only 31 per cent against 64 per cent reported by cultivator households. The durable household assets are also of considerable importance to the non-cultivator households, the share of which being 15.8 per cent. The percentage share of financial assets which is found negligible in the case of cultivators, has been reported as 5.5 for the non-cultivators, who, it may be mentioned, include among others, professionals, money lenders etc.

2.3.3. The percentage distribution of the value of different items of assets in the urban sector is more or less similar to that of the non-cultivator households in the rural sector. As expected, the financial assets are of comparatively greater importance (10.6 per cent) in the urban sector. On the other hand, the share of livestock is only 0.8 per cent as against 5.2 per cent for the non-cultivator households in the rural sector.

2.3.4. Within the urban sector, not much variation in the share of different items of assets to total assets is noticed between the self-employed and 'other' households, except for two items. For the items categorised under 'machinery, equipments etc.', as expected, the share for self-employed households is much more than that of the 'other' households. As far as the share of financial assets are concerned, it is of interest to note that the households other than self-employed enjoy a much better position with the percentage share of 14.9 than the self-employed households which has reported only 5.3 per cent against financial assets.

2.3.5. Having discussed about the contribution of different items of assets within each category of household it is of interest now to look into the distribution of each item of asset between the two major categories of households at the all-India level as given in Table (VI)

TABLE (VI) : PERCENTAGE SHARE OF EACH MAJOR HOUSEHOLD TYPE IN THE VALUE OF INDIVIDUAL ITEM OF ASSETS HELD BY ALL HOUSEHOLDS SEPARATELY IN THE RURAL AND URBAN SECTOR

		ALL-INDIA

	NSS 26th	84.1	15.9	100.0	—	—	—
6. financial assets : total . . . . .	NSS 37th	73.9	26.1	100.0	22.0	78.0	100.0
	NSS 26th	69.7	30.3	100.0	—	—	—
7. dues receivable : total . . . . .	NSS 37th	85.9	14.1	100.0	74.4	25.6	100.0
	NSS 26th	75.1	24.9	100.0	—	—	—
8. total assets . . . . .	NSS 37th	94.1	5.9	100.0	44.4	55.6	100.0
	NSS 26th	93.5	6.4	100.0	—	—	—

The estimates reveal that in the rural sector, the share of non-cultivator households is as low as 3 per cent for machinery etc., 6 per cent for livestock, 11 per cent for building and 13 per cent for durable household assets as far as the physical assets are concerned. However, the position of non-cultivator households in respect of financial assets is somewhat better as 26 per cent of the total value of the assets is owned by these households. The lower contribution of the non-cultivator households in the share of different assets can be ascribed to the fact that the number of non-cultivator households is much less than the number of cultivator households and also the percentage of households reporting an item of asset is invariably lower for non-cultivator households than the cultivator households. Also it is observed that the average value of an item of asset per reporting household is lower for the non-cultivator households compared to the other category of households.

2.3.6 In the urban sector, the percentage share of non-self-employed households is more for all the items of assets except for livestock, machinery, equipments etc. and dues receivable.

2.4.0 DISTRIBUTION HOUSEHOLDS BY ASSET HOLDING: The relative importance of different types of households can be studied with the help of their distribution in various asset groups. Table (VII) gives the percentage distribution of households over household asset holding by household types separately for rural and urban sectors at all-India level.

2.4.1. In the rural sector of India about 6 per cent of the households own assets valued as low as Rs. 1000 or even less, at the price prevailing in

1981. Another 18 per cent fall in the asset groups of Rs. 1000—5000. Thus, a little less than one-fourth of rural households owns worth Rs. 5000 or less. On the other extreme lie 8 per cent of the rural households owning assets worth Rupees one lakh and above. The remaining 68 per cent are distributed in the middle 4 asset groups ranging between Rupees five thousands to one lakh.

2.4.2 Among the different types of households, cultivators, numerically the most dominant type in the rural sector, are by far the well-off class, so far as the asset holding is concerned. The value of total assets per cultivator household is Rs. 44,525 which is about 5 times the average value of asset (Rs. 8974 only) held by the non-cultivator households. However, among the cultivator households there exist some marginal cultivators belonging to the lowest two asset holding of upto Rs. 1000 and Rs. 1000 to 5000. They constitute about 1.6 per cent and 11.3 per cent of the total cultivator households. It may be noted in this context that some of these households might have been classified as cultivator households by virtue of their operating a small piece of land, although their main source of income was other than cultivation.

2.4.3 The non-cultivators, which consist of 24 per cent of the rural households (refer Table II), account for only 6 per cent of the total assets owned by all households in the rural sector (refer Table VI). The pattern of asset holding further reflects that the condition of the non-cultivator households is very disappointing. As high as 60 per cent of the non-cultivators own assets worth Rs. 5000 or less. Among the different categories on non-cultivator households the condition of the agricultural labour households is the worst in the sense that as high as 21 per cent of them fall in the asset group of Rs. 1000 or less and another 50 per cent in the asset group of Rs. 1000—5000. The status of households other than agricultural

TABLE (VII): PERCENTAGE DISTRIBUTION OF HOUSEHOLDS OVER HOUSEHOLD ASSET HOLDING CLASSIFIED BY HOUSEHOLD TYPE SEPARATELY FOR RURAL AND URBAN SECTORS

labour and artisan can be considered marginally better than the agricultural labour households with about 19 per cent and 32 per cent being categorised in the asset groups—upto Rs. 1000 and Rs. 1000—5000 respectively. These two categories (agricultural labour households and other households) together account for 22 per cent of the rural households. However the condition of the artisans which constitute only 1·6 per cent of all rural households is little better than the other categories of non-cultivator households since only 40 per cent of them belong to the asset group of upto Rs. 5000.

2·4·4 In the urban sector, the percentage of households in the two extreme ends of the size group of asset holding are more compared to rural sector whereas in the middle groups the percentage is more in the rural sector. The percentage of urban households owning a meagre amount of less than Rs. 1000 worth of asset is 14·5 which is about two and a half times more than the rural households falling in the same asset group. At the other end of the size bracket of asset holding of Rupees one lakh and above, the concentration of urban households is considerably more than that of the rural households, the percentage of households belonging to the asset group being 9·60 in the urban sector against 7·95 in the rural sector.

2·4·5 Within the urban sector, the percentage of households falling in the asset group of upto Rs. 5000 is less among the self-employed than among the households other than self-employed. Between the two categories of households, the self-employed exhibits a better performance in the sense that the average value of assets per self-employed household is much higher (Rs. 55322) than the non-self-employed households (Rs. 33456). In fact, the self-employed households consisting of

33 per cent of all urban households own 44 per cent of the total assets. Among the self-employed the condition of those who are engaged as "production workers etc." is worst from the point of view of asset holding. The pattern of asset holding of these households resembles more or less with that of the non-self-employed households. While between 7 to 36 per cent of households are reported in the asset group of Rs. 5000 or less for different self-employed groups, the maximum percentage is reported by the category of households under 'production workers' (36 per cent) followed by the group of 'service etc.' workers' (34 per cent). Interestingly, the 'farmers' in the urban sector appears to be the most well-off class from the point of view of the accumulated value of assets. The percentage of households is lowest for the farmers in the bottom three asset groups and again highest in all the other asset groups except the middle group of Rs. 10000—20000 where the household group of "clerical workers" reports the maximum figure (22 per cent).

2·5·0 ESTIMATE OF INDEBTED HOUSEHOLDS : As stated earlier, the issue also contains the basic estimates on the indebtedness of the households. The percentage of the indebted households to all households and average amount of debt per indebted household for major states and all-India classified by major types of households are presented in Table (VIII). The results of the 37th round survey show that at the all-India level, the percentage of indebted households to all households is about 20 in the rural sector and 17 in the urban sector. The average value of debt per indebted household is much less in the rural sector than in the urban, the value being Rs. 3311 and Rs. 5930 respectively.

2.5.1 Among the states in rural India, the highest percentage of indebted households is noticed in Tamil Nadu (28.69) and Kerala (28.46) followed by Andhra Pradesh (26.47) and Rajasthan (24.74). Assam (4.81) and Jammu & Kashmir (8.91) report very low percentages of indebted

households. Kerala (29.72), Tamil Nadu (25.86) and Andhra Pradesh (22.71) top the list in the urban sector also. Even in this sector, Assam (4.34) is at the bottom and is followed by Himachal Pradesh (6.64), Jammu & Kashmir (7.19) and Haryana (7.83).

TABLE (VIII) : PERCENTAGE OF INDEBTED HOUSEHOLDS TO ALL HOUSEHOLDS AND AVERAGE AMOUNT OF DEBT PER INDEBTED HOUSEHOLD CLASSIFIED BY MAJOR HOUSEHOLD TYPE SEPARATELY FOR RURAL AND URBAN SECTORS.

12. Orissa	22.19	1803	11.39	914	20.45	1723	11.43	13319	12.52	4340	12.24	6464
13. Punjab	23.42	9580	12.82	2660	19.53	7911	17.16	7470	10.02	5839	13.20	6783
14. Rajasthan	25.79	4932	18.91	3388	24.74	4753	15.06	11482	15.22	6107	15.16	8125
15. Tamil Nadu	35.26	3911	14.16	1421	28.69	3528	28.01	7959	25.05	3819	25.86	5052
16. Uttar Pradesh	18.65	2752	15.32	1679	17.93	2554	12.73	4054	12.41	4071	12.55	4063
17. West Bengal	21.63	1677	5.72	1473	18.21	1663	11.38	7030	18.43	3063	16.72	3720
18. All-India	22.34	3595	12.35	1660	19.97	3211	16.89	8708	17.59	4643	17.36	5930

2.5.2 So far as the average amount of debt per indebted household is concerned, the two agriculturally prosperous States—Haryana and Punjab reveal respectively the two successive highest averages of Rs. 9122 and Rs. 7911 in the rural sector. In contrast the lowest group in respect of these averages is observed in the states of eastern region namely Assam (Rs. 1070), Bihar (Rs. 1575), West Bengal (Rs. 1663) and Orissa (Rs. 1723). In the urban sector Haryana again shows the highest average of Rs. 10174, followed by Kerala (Rs. 9728) and Gujarat (Rs. 9441) whereas West Bengal, Uttar Pradesh and Bihar are at the bottom with the averages of Rs. 3720, Rs. 4063 and Rs. 4807 respectively.

2.5.3 Within the rural sector the spread of indebtedness is more among the cultivator households than that of the non-cultivator households in all the states except Himachal Pradesh where the percentage of indebted households to all households is more or less equal for both the types of households. Also compared to the cultivator households the average amount of debt per indebted household is much less among the non-cultivator households in all the states. However, in view of having much less amount of average asset holding by the non-cultivator households in comparison to the cultivator households as observed earlier the burden of debt (i.e. debt in proportion to asset) is heavier to the non-cultivator households than

that of the cultivator households as can be seen from Table (XI) later.

2.5.4 In the urban sector although the percentage of indebted households among the self-employed and that of the 'other households' are more or less of the same order, the average amount of debt per indebted household of the self-employed is almost double of the average amount derived for 'non self-employed' households at the national level. However, wide variation has been noticed among the states both in case of percentage of indebted households and average amount of debt. While the spread of indebtedness is more among the 'other households' in Kerala, Maharashtra, Orissa, Rajasthan and West Bengal, the said percentage is more among the self-employed households in the remaining 12 states. In the case of average amount of debt, Bihar and Haryana are the two exception which report higher averages for the 'other households', while in the remaining 15 states the averages are higher for the self-employed households.

TABLE (IX) : STATEMENT SHOWING THE PERCENTAGE OF INDEBTED HOUSEHOLDS TO ALL HOUSEHOLDS DERIVED FROM NSS 37TH AND NSS 26TH ROUNDS FOR THE RURAL SECTOR.

states	percentage of indebted households	
	37th round	26th round

TABLE (IX) : Contd.

(1)	(2)	(3)
10. Madhya Pradesh	20.60	42.48
11. Maharashtra	22.47	46.09
12. Orissa	20.45	37.11
13. Punjab	19.53	54.28
14. Rajasthan	24.74	56.65
15. Tamil Nadu	23.69	48.77
16. Uttar Pradesh	17.93	37.87
17. West Bengal	18.21	37.35
18. All-India	19.97	42.87

2.5.5 The comparison of the present survey results with those of NSS 26th round given in Table (IX) shows that the percentage of indebted households in NSS 37th round has decreased quite sharply in the rural sector, from 42.87 to 19.97. Although such decreasing trend in the proportion of rural households reporting cash debts was noticed even earlier, between 1962 and 1971 (from 62.8 per cent to 41.3 per cent),<sup>1</sup> the present round estimate appears to be inexplicably low at all-India level, less than half of the estimates derived from 1971 (NSS 26th round) survey. Doubts may, therefore, arise as to whether the indebted households were properly reported in the schedule of enquiry. But, it is seen from Table (IX) that the percentage of indebted households to all households at the state level in the rural sector is uniformly lower than that of the NSS 26th round. Such comparisons, however, can not be made for the urban sector as the survey results of NSS 26th round are not published.

2.5.6 The estimates presented in Table (IX) is based on the Central and State samples pooled data. To have certain idea on the margin of uncertainty of the NSS 37th round estimates the independent estimates based on Central sample and State sample data are presented in Table (X). However, the coefficient of variation in respect of some key characteristics are given in Section 4.

(1)	(2)	(3)	(4)	(5)	(6)	(7)
5. Haryana	26.09	4.48	10.57	19.89	1.15	7.83
6. Himachal Pradesh	12.90	11.43	12.32	6.64	6.65	6.64
7. Jammu & Kashmir	8.21	9.75	8.91	7.44	6.52	7.19
8. Karnataka	30.74	16.50	24.00	25.07	10.31	18.27
9. Kerala	27.37	29.67	28.46	30.32	29.14	29.72
10. Madhya Pradesh	20.21	21.24	20.60	18.32	12.41	15.35
11. Maharashtra	22.48	22.45	22.47	17.65	24.68	21.30
12. Orissa	26.90	14.06	20.45	16.35	7.58	12.24
13. Punjab	25.52	13.27	19.53	19.60	5.94	13.20
14. Rajasthan	32.65	16.76	24.74	18.38	12.16	15.16
15. Tamil Nadu	37.92	19.46	28.69	34.67	16.20	25.86
16. Uttar Pradesh	17.30	18.55	17.93	13.29	11.84	12.55
17. West Bengal	21.35	15.00	18.21	19.47	14.73	16.72
18. All-India	23.54	16.53	19.97	20.11	14.62	17.36

The percentages of indebted households to all households derived from Central sample and State sample do not appear to be very close to each other at all India level both in the rural and urban sectors. It is observed from Table (X) that the said percentages pertaining to the Central sample and State sample at the all-India level are 23.54 and 16.53 respectively in the rural sector and 20.11 and 14.62 respectively in the urban sector. At the state level, while the two estimates are quite close to each other in Assam, Gujarat, Himachal Pradesh, Jammu & Kashmir, Madhya Pradesh, Maharashtra and Uttar Pradesh in the rural sector and in Assam, Himachal Pradesh, Jammu & Kashmir, Kerala and Uttar Pradesh in the urban sector, they vary widely in most of the remaining states. Although compared to the State Sample estimates,

the Central Sample estimates are generally more, they are much less than the corresponding estimates derived from NSS-26th round given in Table (IX).

2.5.7 Like the value of total assets, the average amount of debt per household has increased in the rural sector during the decade. The average amount of debt per all household has been reported as Rs. 661 in 1981 (NSS-37th round) against Rs. 503 in 1971 (NSS-26th round). However, the increase in the total aggregate debt is less than proportionate to the increase in the aggregate value of total assets in the rural sector and therefore the debt asset ratio\* (Table XI) has diminished considerably in all the states both for cultivators as well as for non-cultivators except in case of Maharashtra for non-cultivators. The outstanding debt in the rural sector at all-India level stands at 1.83

TABLE (XI) : DEBT-ASSET RATIO OF HOUSEHOLDS CLASSIFIED BY MAJOR HOUSEHOLD TYPE BASED ON NSS 37TH AND 26TH ROUNDS FOR THE RURAL SECTOR AND ON NSS 37TH ROUND FOR THE URBAN SECTOR.

17. West Bengal	1.45	2.33	1.79	3.71	1.46	2.74	2.31	2.75	2.21
18. All-India	1.80	4.16	2.28	8.42	1.83	4.43	2.66	2.44	2.54

\*Debt-asset ratio = the amount of debt expressed as percentage to the amount of assets owned.

per cent of the aggregate value of total assets for all households (i.e. debt-asset ratio for all households) in 1981 as against 4.43 per cent in 1971. The debt-asset ratio in respect of cultivators is more or less same as that of all households. In conformity of the general economic pattern of the rural households, the debt-asset ratio is found to be more for the non-cultivators than that of the cultivators. However, the ratio has decreased from 8.42 per cent to 2.28 per cent during the last 10 years for non-cultivator households. The monograph entitled "Indebtedness of rural households and availability of institutional finance" published by Reserve Bank of India notes that the debt-asset ratio in respect

of cultivators declined from about 7 per cent to 4 per cent for the rural sector of the country as a whole between the years 1962 and 1971. Thus, one may conclude that a diminishing trend in the burden of debt (debt-asset ratio) has been continuing over the last two decades.

2.5.8 In comparison to the rural households, the burden of debt is more for the urban households, the debt-asset ratio at the all-India level being 2.5 per cent as against 1.8 per cent in the rural sector. The said ratio is more in the urban sector in all the states except Karnataka and Tamil Nadu where rural households exhibit heavier burden of debt.

## Section 3

### SAMPLE DESIGN AND ESTIMATION PROCEDURE

#### 3.1 SAMPLE DESIGN

3.1.1 *Broad design* : The broad sample design was stratified with two stage sampling in each stratum. The first stage units in the rural sector were 1981 census villages in most districts, but in a few cases where either 1981 Census was not conducted or the frame of census villages could not be procured in time, 1971 Census villages were used. In the urban areas, the first stage units were generally blocks formed in the NSS urban frame survey in all towns except those places which were declared as urban areas for the first time in 1981 Census. In such cases, the Census (1981) blocks were the first stage units. The second stage units were households in both rural and urban sectors.

3.1.2 *Regions and strata* : Each State/Union Territory was divided into a few agro-economic regions by grouping contiguous districts similar in respect of population density and crop pattern. In Gujarat, some districts were split for this purpose, considering the location of dry areas and the distribution of tribal population in the state. The total number of regions thus formed all over India (excluding areas not covered by NSS) was 77. "Basic strata" for sampling in rural areas were formed within each region. Each district with less than 1.5 million 1971 census rural population constituted a basic stratum by itself except in Gujarat and Arunachal Pradesh where some districts with less than the above population were divided into two or more basic strata. Districts having more than 1.5 million rural population were divided into a number of basic strata (depending upon the population) by grouping contiguous tehsils similar with respect to crop pattern and density of rural population. Generally, each urban stratum was a district or a group of districts within the same region excepting the districts of Ahmedabad, Bangalore and Kanpur. In each of these cases, the district was divided into two strata, the city itself making up one stratum and the rest of the urban areas the other. With this arrangement, each city with 1971 census population above 1 million constituted a separate stratum, the remaining cities being whole districts. Those cities were Bombay, Calcutta, Delhi, Hyderabad and Madras. The

4-734 Statistics /85

total number of rural and urban strata were 497 and 363 respectively.

3.1.3 *Allocation* : The state level allocations were determined on the basis of their investigator strength available and the expected work load per investigator. These were further allocated to strata in proportion to the total number of 1981 census house-listing blocks in rural sector and the total number of blocks in the frame in urban sector (In the case of Assam, rural allocation was proportional to 1971 census rural population). These were adjusted to the field strength of each FOD sub-region. Final stratum level allocations were rounded off to multiples of two.

3.1.4 *Sampling of villages* : The sample villages were selected with probability proportional to number of house-listing blocks and with replacement. In the case of villages selected from 1971 census frame sample villages were selected with probability proportional to size and with replacement where size was related to 1971 census population. Selection was done in the form of two independent sub-samples.

3.1.5 *Revenue village selection* : When the sampled census village was not identifiable, one of the following procedures was adopted according to the situation :

- (a) all revenue villages contain wholly or partly in the census village were surveyed as one unit, or
- (b) the revenue village which contained the selected census village and possibly other census villages was wholly surveyed.

3.1.6 *Sampling of blocks* : The urban frame survey (UFS) blocks of UFS-1977 scheme wherever available and UFS blocks of 1972-77 period for the remaining towns and 1981 census frame in case of new towns constituted the sampling frame for selection of blocks. In each urban stratum sample blocks were selected by simple random sampling without replacement in the form of two independent sub-samples.

3.1.7 *Hamlet-group and sub-block selection* : In case the present population of a sample village or

block was 1200 or more, it was divided into two or more equal (in terms of population) sub-divisions (called hamlet groups in the case of villages and sub-blocks in the case of urban blocks), the number of sub-divisions depending on the population of the village or block at the time of the investigator's visit. One of them was selected at random for survey.

3.1.8 *Sampling of households (rural)* : The households of each sample village were divided into four sub-strata, by their area of land possessed. Households possessing less than 0.05 acres formed sub-stratum-1. The remaining households were ranked first by their area of land possessed and then divided into three sub-strata by determining two boundary points A and B for each village such that the total area of land possessed was nearly the same for each sub-stratum (households with land possessed :

- (i) from 0.05 to A;
- (ii) A to B; and
- (iii) above B constituted respectively sub-stratum 2, 3 and 4). Two households were selected from each sub-stratum circular systematically with a random start. The households of sub-stratum 1 were arranged by their means of livelihood (agricultural labour, artisan and others) before sample selection.

3.1.9 *Sampling of households (urban)* : The households of a sample block was divided into three sub-strata by their monthly per capita expenditure. The boundary points for them were fixed at state level. Two households were selected circular systematically in each sub-stratum. In both rural and urban sectors, the same sample households were surveyed in both the visits.

### 3.2 ESTIMATION PROCEDURE

#### 3.2.1 Notations :

- s : subscript for sth stratum.
- t : subscript for tth sub-stratum (within a village/block)
- i : subscript for ith sample village/block.
- j : subscript jth sample household.
- L : total number of rural/urban strata in the state
- z : village size (used for sampling)
- Z : total size of a rural stratum
- N : total number of blocks in a urban stratum
- D : number of hamlet-groups/sub-blocks formed

m : number of surveyed villages/blocks including depopulated and zero cases

H : total number of households in a sub-stratum

h : number of surveyed households in a sub-stratum

f : adjustment factor for survey of a revenue village

y : value of characteristic

Y : total of y at the state level

$\hat{y}$  : estimate of y from the sample

The expressions for  $\hat{y}$  are given below.

#### 3.2.2 Rural sector :

$$\hat{Y} = \sum_{s=1}^L \frac{Z_s}{m_s} \sum_{i=1}^{m_s} \frac{D_{si}}{f_{si} Z_{si}} \sum_{t=1}^4 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{h_{sit}} y_{sitj}$$

where  $H_{sit}$  was the total number of households in the tth sub-stratum of the village and  $h_{sit}$  was the corresponding number of surveyed households available for tabulation.

#### 3.2.3 Urban sector :

$$\hat{Y} = \sum_{s=1}^L \frac{N_s}{m_s} \sum_{i=1}^{m_s} D_{si} \sum_{t=1}^3 \frac{H_{sit}}{h_{sit}} \sum_{j=1}^{h_{sit}} y_{sitj}$$

3.2.4 *Estimates of ratios* : Let Y and X be the totals of the characteristics y and x at the state/all-India level. Then the estimates of the ratio  $R=Y/X$  will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

where  $\hat{Y}$  and  $\hat{X}$  are unbiased estimates of Y and X respectively.

3.2.5 *Sub-sample-wise estimates* : Sub-sample-wise estimates were computed on the basis of villages and blocks surveyed in the concerned sub-sample. Thus,  $m_s$  in the above formula would mean the number of surveyed villages/blocks in the concerned sub-sample of the sth stratum. The combined estimate of the stratum total based on the whole sample was computed as the weighted mean of the sub-sample-wise estimated, weights being number of sample villages/blocks surveyed in the concerned sub-samples. The combined estimates of the state (or all-India) total of the characteristic was obtained as the sum of the estimates of relevant stratum totals. However, the combined estimates of a ratio was calculated as the ratio of the combined estimate of numerator and denominator at the state/all-India level.

# Section 4

## SAMPLING ERRORS OF THE ESTIMATES OF SOME SELECTED ITEMS

4.1.1 Sampling errors of the estimates of some 14 selected items in the Debt and Investment Survey have been presented in Tables (A) and (B). Table (A) shows the errors of all-India rural estimates\* whereas Table (B) shows the errors of corresponding urban estimates.\* The items selected for error calculation are mentioned below:

- Item 1 : proportion of households reporting cash dues payable
- Item 2 : value of cash dues payable per household
- Item 3 : average value of total assets per household
- Item 4 : average value of land owned per household
- Item 5 : average value of residential building per household
- Item 6 : average value of livestock and poultry per household
- Item 7 : average value of agricultural implements per household
- Item 8 : average value of non-farm equipments per household
- Item 9 : average value of transport equipments per household
- Item 10 : average value of durable assets per household
- Item 11 : average value of all shares per household
- Item 12 : average value of other financial assets per household
- Item 13 : proportion of households reporting land owned
- Item 14 : proportion of households reporting residential building

4.1.2 The sampling errors have been expressed in terms of co-efficients of variations (C.V.) which have been calculated on the basis of stratum level sub-sample-wise estimates in the following manner:

Let  $\hat{Y}_{sp}$  be the unbiased estimate of sth stratum total of the variable Y as obtained from the pth

\*based on central and state samples pooled.

sub-sample ( $s=1, 2, \dots, L$ ;  $p=1, 2, \dots, K$  say) Suppose the pth sub-sample of sth stratum contains  $m_{sp}$  sample first-stage units. Then the combined estimate of all India total has been calculated as

$$\hat{Y} = \sum_{s=1}^L \sum_{p=1}^K W_{sp} \hat{Y}_{sp} \dots \dots (1)$$

where

$$W_{sp} = \frac{m_{sp}}{k \sum_{p=1}^K m_{sp}}$$

Similarly, if  $\hat{X}$  be the estimated total of another characteristic X, then the ratio  $R=Y/X$  has been estimated by

$$\hat{R} = \frac{\hat{Y}}{\hat{X}} \dots \dots \dots (2)$$

The estimates of variance of  $\hat{Y}$  and  $\hat{R}$  have been calculated by the expressions given below.

$$\hat{V}(\hat{Y}) = \sum_{s=1}^L \frac{1}{K^2(K-1)} \sum_{p>q}^K (\hat{Y}_{sp} - \hat{Y}_{sq})^2 \dots (3)$$

$$\hat{V}(\hat{R}) = \sum_{s=1}^L \frac{1}{K^2(K-1)} \sum_{p>q}^K [(\hat{Y}_{sp} - \hat{Y}_{sq}) - \hat{R}(\hat{X}_{sp} - \hat{X}_{sq})]^2 \dots (4)$$

In the next step the co-efficients of variations (cv) are estimated as

$$CV(\hat{Y}) = \frac{\sqrt{\hat{V}(\hat{Y})}}{\hat{Y}} \times 100\%$$

$$CV(\hat{R}) = \frac{\sqrt{\hat{V}(\hat{R})}}{\hat{R}} \times 100\%$$

For each of the items mentioned earlier, co-efficients of variations have been calculated for estimates relating to several categories of households, namely, (a) all households, (b) households in each of ten asset holding classes, and (c) households type like cultivator/non-cultivator in rural areas and self-employed/non-self-employed in urban areas.

4.1.3 From a study of the co-efficients of variation (C.V's) in Table (A) (rural areas) it is seen that the CV's are generally large for the lowest asset holding class (upto Rs. 1000 only) and also for the two highest classes viz. 'Rs. 10 lakhs to Rs. 20 lakhs' and 'Rs. 20 lakhs and above'. Large sampling errors of estimates for the two highest asset holding classes may be due to inherent variations of the values of assets owned by households in these two classes as well as to small sample sizes (only 150 and 31 households respectively in the whole of rural India). But the reasons for large errors in the lowest class (compared to intermediate classes) representing the poorest households are not so clear. One reason may be relatively small proportion of households reporting various items in this asset group.

4.1.4 Regarding cultivator and non-cultivator households the sampling errors of estimates are uniformly smaller for cultivator households, which is possibly due to much larger sample size (49,950

households) from the former class as against 11,207 households from the latter class.

It may be mentioned here that the average value of total assets possessed per household is Rs. 44,524 and Rs. 8,973 for cultivator and non-cultivator households respectively.

4.1.5 As regards sampling errors of urban estimates the pattern is broadly similar to that of the rural estimates. That is, the errors (in terms of C.V's) are generally large for the lowest asset holding class as also for the two highest classes. However, the errors for the two categories of households 'self-employed' and 'non-self-employed' are broadly of the same order for most of the items.

4.1.6. The coefficient of variation has come out as 0.00 in a few cases. This is due to rounding of very small figures upto two places of decimal.

URBAN

PART II

SELECTED RESULTS ON ASSETS  
AND LIABILITIES OF RURAL AND  
URBAN HOUSEHOLDS

*National Sample Survey :  
Thirty-seventh round (January—December 1982)*

## LIST OF TABLES (RURAL)

- Table 1.1 : Distribution of sample villages by states and sub-sample.
- Table 1.2 : Distribution of sample households by household asset holding and sub-sample.
- Table 2 : Distribution of estimated number of households (in 000) by household asset holding, sub-sample and major household type.
- Table 3 : Average value (Rs.) of total assets per reporting household by sub-sample and major household type.
- Table 4.1 : Percentage of households reporting liability to all households by sub-sample and major household type.
- Table 4.2 : Average value (Rs.) of total liability per reporting household by sub-sample and major household type.
- Table 5 : Percentage distribution of households over household type from each sub-sample.
- Table 6 : Percentage distribution of households over household asset holding classified by household type.
- Table 7 : Percentage of households reporting and average value (Rs.) per reporting household of individual items of assets and liabilities as on 30-6-81 by household asset holding and major household type.

TABLE 1-1 : DISTRIBUTION OF SAMPLE VILLAGES BY STATES AND SUB-SAMPLES

states (1)	number of sampe villages						central & state sample pooled (8)
	central sample			state sample			
	ss-1 (2)	ss-2 (3)	total (4)	ss-1 (5)	ss-2 (6)	total (7)

(1) P : Percentage of households (0.00) reporting to all households in an asset group under a household type

(2) A : Average value (Rs.) of the item per reporting household

LIST OF TABLES  
(RURAL AND URBAN COMBINED)

- Table 2 : Distribution of estimated number of households (in 000) by household asset holding and sub-sample.
- Table 3 : Average value (Rs.) of total assets per reporting household by sub sample.
- Table 4-1 : Percentage of households reporting liability to all households by sub-sample.
- Table 4-2 : Average value (Rs.) of total liability per reporting household by sub-sample.
- Table 7 : Percentage of households reporting and average value (Rs.) per reporting household of individual items of assets and liabilities as on 30-6-81 by household asset holding.

1. ग्रामीण तथा शहरी परिवारों की परिसम्पत्तियों तथा देयताओं पर एक टिप्पणी (राज्य तथा समस्त भारत) रा० प्र० सर्वे० 37वां दौर (जनवरी-दिसम्बर 1982) हि०-5

निबन्धों एवं टिप्पणियों में अभिव्यक्त किये गये विचार सहयोगियों के हैं तथा वे अनिवार्य रूप से राष्ट्रीय प्रतिदर्श सर्वेक्षण संगठन के विचारों को प्रतिबिम्बित नहीं करते हैं।

**ग्रामीण तथा शहरी परिवारों की परिसम्पत्तियों और देयताओं पर एक टिप्पणी : राष्ट्रीय प्रतिदर्श सर्वेक्षण सैंतीसवाँ दौर  
(जनवरी-दिसम्बर 1982)**

**प्रस्तावना**

1.1.0 ऋण तथा अर्थ का विनियोग विषयी सर्वेक्षण रा० प्र० सर्वे-37वें दौर (जनवरी से दिसम्बर, 1982) में दश वार्षिक देश व्यापी जांच श्रृंखला का चौथा सर्वेक्षण था। इस सर्वेक्षण का लक्ष्य परिवारों की परिसम्पत्तियों तथा देयताओं के विश्वसनीय अनुमान तैयार करना तथा राज्य और समस्त भारत दोनों स्तरों पर परिवारों में ऋण लेने तथा पूंजी निर्माण आदि का मूल्यांकन करना था।

1.1.1 वर्ष 1951-52 में भारतीय रिजर्व बैंक द्वारा शुरु किया गया प्रथम "अखिल भारतीय ग्रामीण साख सर्वेक्षण" मुख्यतः नीत्योंमुखी था इसके दो उद्देश्य थे साख की मांग तथा आपूर्ति पक्षों का अध्ययन करना। यद्यपि साख के मांग पक्ष की दृष्टि से, परिसम्पत्तियों, आर्थिक कार्य-कलापों, साख क्रिया व्यापार तथा ग्रामीण परिवारों पर ऋणप्रस्तता से सम्बन्धित सूचना एकत्र की गई थी, साख के आपूर्ति पक्ष की जांच करने की दृष्टि से विभिन्न साख अभिकरणों की क्रिया व्यापार सीमा तथा पद्धति से सम्बन्धित आंकड़ों की परिगणना की गई थी। वर्ष 1961-62 में भारतीय रिजर्व बैंक द्वारा संचालित "अखिल-भारतीय ग्रामीण ऋण तथा निवेश सर्वेक्षण" के रूप में अभिज्ञात विषय पर की गई दूसरी दशवार्षिक जांच अधिक विस्तृत थी। इस सर्वेक्षण का लक्ष्य न केवल समस्त भारत के लिए अपितु प्रमुख राज्यों के ऋण, निवेश तथा ग्रामीण अर्थव्यवस्था के अन्य संकेतकों पर तलचिन्ह अनुमान प्राप्त करना था। तीसरे दशवार्षिक सर्वेक्षण ने जो भारतीय रिजर्व बैंक द्वारा राष्ट्रीय प्रतिदर्श सर्वेक्षण संगठन को सौंपा गया था, जुलाई, 1971 से सितम्बर, 1972 के दौरान अपने 26वें दौर में जोत भूमि और ऋण तथा निवेश के सम्बन्ध में एकीकृत सर्वेक्षण किया। ऋण तथा निवेश के सम्बन्ध में किए गए इस सर्वेक्षण को पहली बार बढ़ाकर शहरी क्षेत्रों तक कर दिया गया। दोनों जांचों के लिए आंकड़े, प्रतिदर्श परिवारों के एक ही सेट से एकत्र किये गये। चूंकि रा० प्र० सर्वे सं० की शासी परिषद द्वारा तैयार किए गए 10-वर्षीय कार्यक्रम के अनुसार रा० प्र० सर्वे 37वें दौर (जनवरी-दिसम्बर 1982) द्वारा की जाने वाली जांच का विषय जोत भूमि तथा पशुधन था इसलिए भारतीय रिजर्व बैंक के ऋण तथा निवेश के सम्बन्ध में किए गए चौथे दशवार्षिक सर्वेक्षण को रा० प्र० सर्वे के कार्य सम्बन्धी कार्यक्रम के सुविधाजनक रूप से जोड़ा गया था तथा रा० प्र० सर्वे-26वें दौर सर्वेक्षण के अनुसार जांच के दोनों विषयों से सम्बन्धित आंकड़े, परिवारों के एक ही सेट से एकत्र किये गए थे।

1.2.0 जांच की मद्दे: वर्ष 1961-62 में रिजर्व बैंक द्वारा किए गए दूसरे अखिल-भारतीय ग्रामीण ऋण तथा निवेश सर्वेक्षण में, परिसम्पत्तियों (वस्तुओं के स्टाक सहित) तथा देयताओं की सूची, फार्म तथा फार्म भिन्न व्यापार पर ऋण लेनदेन तथा पूंजीगत व्यय, विभिन्न व्यवसायों तथा सेवाओं से प्राप्तियों, फार्म, भिन्न व्यापार की महत्वपूर्ण मदों पर व्यय, स्थायी परिसम्पत्तियों तथा कुछ चुनी हुई मदों (जैसे कि समारोहों, चिकित्सा राहत आदि) पर व्यवसाय तथा सेवा व्यय से सम्बन्धित सूचना एकत्र करने के अतिरिक्त, भौतिक परिसम्पत्तियों की बिजली तथा नुकसान और वित्तीय परिसम्पत्तियों की खरीद और बिजली को शामिल किया गया था। 1971-72 में रा० प्र० सर्वे में शामिल की गई मदें, प्रमुख कृषि निवेशों के व्यय पर सूचना जैसे कि खाद, उर्वरक, बीज आदि जैसी कुछ अतिरिक्त मदों को छोड़कर, 1961-62 जांच में शामिल की गई मदों के लगभग समान थी और 1961-62 में शामिल की गई वस्तुओं के स्टाक

से सम्बन्धित मदों को सर्वेक्षण में शामिल नहीं किया गया था। किन्तु, रा० प्र० सर्वेक्षण-37वें दौर (1982) की जांच में, शामिल की गई मदों की पर्याप्त कांट-छांट की गई थी ताकि अच्छी कोटि के आंकड़ों के संग्रहण को सुनिश्चित किया जा सके। तदनुसार, फार्म उत्पादन की प्राप्तियों तथा निपटान, फार्म भिन्न व्यापार से प्राप्त तथा फार्म भिन्न व्यापार पर होने वाले व्यय सम्बन्धी सूचना की मदों को सर्वेक्षण के कार्यक्षेत्र से निकाला गया।

1.3.0 आंकड़े एकत्र करने के लिए अपनायी गई प्रणाली:— दूसरे सर्वेक्षण में, आंकड़े एकत्र करने के लिए सन्दर्भाविधि कृषि वर्ष जुलाई 1961 से जून 1962 थी जबकि सर्वेक्षण, कैलेण्डर वर्ष 1962 में आयोजित किया गया था। प्रत्येक प्रतिदर्श परिवार का दो बार दौरा किया गया, एक नार कैलेण्डर वर्ष 1962 के पूर्वार्ध के दौरान तथा दूसरी बार उत्तरार्ध में (अर्थात् जुलाई से दिसम्बर 1962)। प्रथम दौर में 31, दिसम्बर 1961 की स्थिति के अनुसार परिवारों की परिसम्पत्ति तथा देयता, सर्वेक्षण की तारीख (जो जनवरी से जून 1962 के बीच थी) को परिसम्पत्तियों/देयताओं की स्थिति तथा सन्दर्भ तारीख (अर्थात् 31 दिसम्बर 1961) तथा सर्वेक्षण की तारीख के बीच की अवधि के दौरान उनके लेनदेन की स्थिति का पता लगा कर निकाली गई थी।

1.3.1 प्रथम दौर में जुलाई से सितम्बर 1961 के दौरान ऋण पर ली गई राशि तथा अदायगी की राशि सहित सन्दर्भ अवधि (अर्थात् 30 जून 1961 को) की शुरुआत पर बकाया ऋण के सम्बन्ध में सूचना भी एकत्र की गई। इस प्रकार परिवार का देयताओं के स्टाक तथा प्रवाह स्थितियों से सम्बन्धित सूचना के दो सेटों ने न केवल आंकड़ा संचयन स्तर पर समायोजन के उद्देश्य के लिए 31 दिसम्बर 1961 को परिवार की देयता स्थिति के सम्बन्ध में दो स्वतन्त्र आंकड़े प्रदान करने की गुंजाइश प्रदान की अपितु सन्दर्भ वर्ष 1961-62 के पूर्वार्ध के दौरान ऋण पर ली गई राशि की सीमा तथा पद्धति तथा ऋणों की अदायगी निर्धारण की गुंजाइश प्रदान की। प्रथम दौरे में सन्दर्भ अवधि के प्रथम छः महीनों के दौरान अन्य मदों पर आंकड़े एकत्र किए गए। दूसरे दौरे में सन्दर्भ अवधि के अन्तिम छः महीनों के लिए विभिन्न मदों पर आंकड़े प्राप्त करने के लिए इसी प्रकार की पद्धति अपनाई गई।

1.3.2 वर्ष 1971-72 के दौरान राष्ट्रीय प्र० सर्वे सं० द्वारा किए गए तीसरे सर्वेक्षण में आंकड़ों के संचयन की पद्धति भिन्न थी। जुलाई से दिसम्बर 1971 में परिवारों के सम्बन्ध में किए गए प्रथम दौरे के दौरान, 30 जून 1971 की निर्धारित सन्दर्भित तारीख के लिए परिवारों की परिसम्पत्तियों/देयताओं से सम्बन्धित आंकड़े सीधे ही एकत्र किए गए। जनवरी से जून 1972 के दौरान परिवारों के सम्बन्ध में किए गए दूसरे दौरे के दौरान जुलाई से दिसम्बर 1971 की छः मास की अवधि के लिए परिसम्पत्तियों के लेनदेन, देयताओं, प्राप्तियों आदि के सम्बन्ध में सूचना एकत्र की गई। सन्दर्भ अवधि के उत्तरार्ध (जनवरी से जून 1972) के लिए इसी प्रकार के आंकड़े तथा सन्दर्भ अवधि के अन्त में अर्थात् 30 जून 1972 की अवधि परिसम्पत्तियों/देयताओं के स्टाक से सम्बन्धित सूचना तीसरे दौरे के दौरान एकत्र की गई जो जुलाई से सितम्बर 1972 तक लगभग तीन महीनों की अवधि में अलग-अलग समय में किया गया।

1.3.3 रा० प्र० सर्वे सं० के 37वें दौर के अद्यतन सर्वेक्षण में, सर्वेक्षण अवधि कैलेण्डर वर्ष 1982 थी तथा आंकड़ों के संचयन के लिए सन्दर्भ अवधि जुलाई 1981 से जून 1982 थी। कैलेण्डर वर्ष '82 के

पूर्वार्ध में, सर्वेक्षण की तारीख को परिवारों की परिसम्पत्ति तथा देयता स्थिति और 1 जुलाई 1981 से सर्वेक्षण तारीख के दौरान परिसम्पत्तियों/ देयताओं के लेन देन का प्रतिदर्श परिवारों के प्रथम दौर के समय पता लगाया गया। स्टाक तथा प्रवाह आंकड़ों पर आधारित, 30 जून 1981 की स्थिति के अनुसार परिवारों की परिसम्पत्तियों तथा देयताओं सम्बन्धी आंकड़े प्राप्त किए गए। इसी तरह से 30 जून 1982 की स्थिति के अनुसार जुलाई से दिसम्बर 1982 की अवधि में भिन्न-2 समय में किए गए दूसरे दौर के दौरान परिवारों के इसी सेट से एकत्र किए गए आंकड़ों के माध्यम से परिवारों की परिसम्पत्तियों/देयताओं का पता लगाया गया। सन्दर्भ वर्ष के पूर्वार्ध के लिए पूंजीगत व्यय, पारिवारिक तथा वित्तीय स्थायी परिसम्पत्तियों आदि से सम्बन्धित सूचना प्रथम दौर के दौरान एकत्र की गई, जबकि सन्दर्भ वर्ष के उत्तरार्ध के लिए दूसरे दौर के दौरान इसी प्रकार के आंकड़ों की परिगणना की गई थी। इसलिए दोनों दौरों के दौरान इस प्रकार की मदों के लिए एक साथ एकत्र किए गए आंकड़ों से सम्पूर्ण सन्दर्भ वर्ष के अनुमान प्राप्त हो जाएंगे। यहां यह भी उल्लेखनीय है कि यद्यपि एक निर्धारित तारीख को परिसम्पत्तियों/ देयताओं की सूची प्राप्त करने के लिए, वर्ष 1961-62 के सर्वेक्षण में अपनवाई गई कार्य प्रणाली वर्तमान सर्वेक्षण जैसी ही थी, परन्तु परिवारों के स्वामित्व में परिसम्पत्तियों के मूल्य का पता लगाने की पद्धति भिन्न थी। वर्ष 1961-62 के सर्वेक्षण में, स्टाक तथा प्रवाह आंकड़ों से प्राप्त निर्धारित (सन्दर्भित) तारीख को निजी स्वामित्व की परिसम्पत्तियों की संख्या निर्धारित तारीख को विद्यमान मूल्य पर मूल्यांकित की गई। किन्तु वर्तमान सर्वेक्षण में, सन्दर्भ अवधि की तारीख को निजी स्वामित्व वाली परिसम्पत्तियों के मूल्य प्राप्त करने के उद्देश्य से निर्धारित सन्दर्भ तारीख और सर्वेक्षण की तारीख के बीच की अवधि के दौरान परिसम्पत्तियों के लिए गए लेन देन के मूल्य के सम्बन्ध में सर्वेक्षण की तारीख को निजी स्वामित्व वाली परिसम्पत्तियों के मूल्य से समायोजित किया गया।

1.3.4 चूंकि अंकित मूल्य, साधारण तौर पर पारिवारिक क्षेत्र में उपलब्ध नहीं था, परिसम्पत्तियां जो अलग-अलग समय पर परिवारों द्वारा प्राप्त की गई थीं, का मूल्य नांचे दा गई पद्धति का अनुसरण करते हुए प्राप्त किया गया :-

(1) प्रथम निरीक्षण के मामले में 30 जून 1981 से पहले तथा दूसरे निरीक्षण के मामले में 30 जून 1982 से पूर्व प्राप्त की गई भौतिक परिसम्पत्ति के मूल्य का मूल्यांकन, सर्वेक्षण की तारीख को इलाके में विद्यमान मूल्य पर उसकी विद्यमान स्थिति के आधार पर किया गया यदि परिसम्पत्ति सर्वेक्षण की तारीख को स्वामित्व में ली गई अथवा निपटान की तारीख को, यदि परिसम्पत्ति सन्दर्भ अवधि के दौरान बिक्री को छोड़कर किसी अन्य प्रकार से निपटाई गई हो।

(2) यदि उक्त परिसम्पत्ति सन्दर्भ अवधि के दौरान बेची गई थी, तो बिक्री मूल्य को परिसम्पत्ति के मूल्य के रूप में समझा गया।

(3) जब कोई भौतिक परिसम्पत्ति सन्दर्भ अवधि के दौरान खरीदी गई अथवा बनाई गई, तो क्रय मूल्य अथवा निर्माण पर खर्च किए गए कुल व्यय को परिसम्पत्ति के मूल्य के रूप में लिया गया।

(4) यदि कोई परिसम्पत्ति सन्दर्भ अवधि के दौरान खरीद अथवा निर्माण को छोड़कर किसी अन्य तरीके से प्राप्त की गई है तो अधिग्रहण के समय, उस स्थान में इसकी विद्यमान स्थिति के अनुसार परिसम्पत्ति के मूल्य को नोट किया गया।

(5) यदि कोई परिसम्पत्ति, जो सन्दर्भ अवधि के दौरान अधिग्रहीत की गई हो तथा उक्त अवधि के दौरान निपटाई गई हो तो उसका अधिग्रहण करते समय रिकार्ड किए गए उसी मूल्य को निपटान के मूल्य के रूप में लिया गया।

1.4.0 भौगोलिक व्याप्ति : 37वें दौर के वर्तमान सर्वेक्षण में निम्नलिखित भागों को छोड़कर सम्पूर्ण भारतीय संघ शामिल था :

- (1) जम्मू तथा कश्मीर के लद्दाख तथा कारगिल जिले।
- (2) नागालैण्ड तथा अंडमान और निकोबार द्वीप समूह के ग्रामीण क्षेत्र।

#### 1.5.0 प्रतिदर्श आकार तथा क्षेत्रीय कार्य :

यह सर्वेक्षण, 8408 प्रतिदर्श गांवों तथा 5300 शहरी प्रतिदर्श खंडों में किया गया। कुल प्रतिदर्श में से 4114 गांवों तथा 2544 शहरी खंडों ने केन्द्रीय प्रतिदर्श का गठन किया तथा इसका सर्वेक्षण रा० प्र० सर्वे० सं० के क्षेत्र संकाय प्रभाग से सम्बन्धित कर्मचारियों द्वारा किया गया। रा० प्र० सर्वे० की समन्वयी योजना के अन्तर्गत, राज्य प्रतिदर्श का गठन करने वाले शेष गांवों तथा खंडों का सर्वेक्षण अलग अलग राज्य सांख्यिकीय अभिकरणों के क्षेत्रीय कर्मचारियों द्वारा किया गया। अंडमान तथा निकोबार द्वीप समूह, चंडीगढ़, दादरा तथा नागर हवेली और लक्षद्वीप को छोड़कर सभी राज्यों तथा संघ शासित क्षेत्रों ने रा० प्र० सर्वे० योजना में कम से कम बराबरी के आधार पर भाग लिया। प्रत्येक प्रतिदर्श गांवों से आठ परिवार तथा प्रत्येक प्रतिदर्श खंड में से छः परिवारों को इस दौर के दौरान सर्वेक्षण के लिए चुना गया<sup>1</sup>। अपेक्षित सूचना, प्रत्येक परिवार के सम्बन्ध में किए गए दो निरीक्षणों में प्रतिदर्श परिवारों के इसी सेट से एकत्र की गई थी।

1.6.0 संकल्पनाएं तथा परिभाषाएं:—इस सर्वेक्षण के लिए प्रयोग की गई महत्वपूर्ण संकल्पनाएं तथा परिभाषाएं नीचे दी गई हैं :

(1) परिवार : ऐसे व्यक्तियों का समूह जो साधारणतया इकट्ठे रहते हुए एक ही रसोई से भोजन खाते हैं, परिवार का गठन करता है। परिवार के सदस्य एक दूसरे से सम्बन्धित हो सकते हैं अथवा नहीं हो सकते।

(2) संव्यवहृत जोतभूमि : एक संव्यवहृत जोतभूमि एक तकनीकी व आर्थिक इकाई थी जिसका प्रयोग पूर्णतः अथवा आंशिक रूप से कृषि उत्पादन के लिए किया गया था तथा जो मालिकाना हक, आकार अथवा स्थान निर्धारण पर ध्यान दिए बगैर अकेले एक व्यक्ति द्वारा अथवा अन्यो की सहायता से चलाई जाती थी। कृषि सम्बन्धी संव्यवहार के सन्दर्भ में, तकनीकी इकाई को अधिक अथवा कम स्वतन्त्र तकनीकी संसाधनों सहित एक इकाई समझा गया था जिसमें भूमि, कृषि यंत्र तथा मशीनरी, भारवाही पशु जैसी मदों को शामिल किया गया था।

(3) कृषि परिवार : कुछ भूमि (अर्थात् 0,005 एकड़ अथवा अधिक) को खेती के लिए प्रयुक्त करने वाले सभी ग्रामीण परिवारों को कृषक परिवार समझा गया था।

(4) गैर कृषक परिवार : किसी भी भूमि को खेती में प्रयुक्त नहीं करने वाले अथवा 0,005 एकड़ से कम भूमि पर खेती करने वाले ग्रामीण परिवारों को गैर-कृषक परिवार समझा गया। उन्हें प्रमुख पारिवारिक व्यवसाय समूहों के अनुसार (क) कृषि श्रमिक, (ख) दस्तकारों तथा (ग) अन्यो के रूप में वर्गीकृत किया गया। सदस्यों द्वारा उनके प्रमुख अथवा सहायक (आय के आधार पर) व्यवसायों के रूप में अपनाए गए व्यवसायों में से, उस व्यवसाय को जिसने सन्दर्भ वर्ष में परिवार को अधिकतम आय प्रदान की, परिवार का प्रमुख व्यवसाय माना गया।

(5) कृषि श्रमिक : एक ऐसे व्यक्ति को कृषि श्रमिक माना गया यदि उसने किराए पर शारिरिक श्रम को हैसियत से निम्नलिखित कृषि व्यवसायों में से एक अथवा उससे अधिक व्यवसायों का अनुसरण किया

1. विवरण के लिए खंड 3 में दिए गए "प्रतिदर्श अभिकल्प तथा प्राक्कलन पद्धति" पर दो गई टिप्पणी का हवाला दिया जाए।

हो यथा (क) कृषि, (ख) डेरी फार्मिंग (ग) किसी उद्यान से सम्बन्धित वस्तु का उत्पादन, (घ) पशुधन, मधुमक्खी अथवा कुक्कुट में वृद्धि, (ङ) फार्म पर नैमित्तिक रूप से कृषि संव्यवहार के संयोजन में अथवा किया गया कोई कार्य ।

(6) कारीगर : निम्नलिखित व्यवसायों में से किसी एक में कार्यरत कुशल कामगारों तथा हस्तशिल्पियों को शिल्पकार समझा गया : (क) तन्तुवाय बुनकर, कालीन बनाने वाले आदि (ख) पोशाक बनाने वाले, सोफासाज आदि (ग) मोची तथा अन्य चमड़ा कामगार (घ) लुहार, सुनार, ताम्रकार, तथा अन्य धातु कामगार (ङ) वटई, चित्रकार आदि (च) पत्थर मूर्तिकार, राजगीर, लिपाई करने वाला, कांचकार, सीमेंट परिसज्जक आदि (छ) मुद्रक (कागज तथा वस्त्र) नक्काश, ब्लाकमेकर आदि (ज) कुम्हार, ईंट बनाने वाले, कांच तथा मूर्तिका की वस्तुएं बनाने वाले कामगार, (झ) टोकरी बनाने वाले तथा चटाई बुनने वाले तथा सम्बद्ध कामगार और (ञ) संगीत यंत्रों, खिलौनों, तत्स्थान वस्तुओं के निर्माता आदि ।

स्वलेखा कामगार वे व्यक्ति थे जिन्होंने कभी कभार को छोड़कर किसी भी व्यक्ति को वेतन अथवा मजदूरी पर लगाए बिना अपने उद्यम चलाए ।

(7) स्वतः नियोजित परिवार : उन व्यक्तियों को, जो अपने ही फार्म पर अथवा फार्म भिन्न उद्यमों में लगे हुए थे, स्वतः नियोजित माना गया । स्वतः रोजगार के विभिन्न प्रकार हैं । कुछ अपने उद्यमों को श्रमिकों को भाड़े पर लिए बिना चला सकते हैं । दूसरे साधारणतया स्वयं कार्य कर सकते हैं परन्तु कभी-कभी वे कुछेक श्रमिकों को भाड़े पर ले सकते हैं । एक ऐसी तीसरी श्रेणी भी है जो कुल मिलाकर श्रमिकों को भाड़े पर रखकर अपने उद्यमों को नियमित रूप से चलाती है । शहरी क्षेत्रों में एक परिवार को स्वतः रोजगार पर लगा हुआ माना गया, यदि सर्वेक्षण की तारीख से पूर्व 365 दिनों के दौरान इसकी आय का 50 प्रतिशत से अधिक स्वतः रोजगार का अनुसरण करते हुए इसके सदस्यों द्वारा प्राप्त किया गया ।

(8) परिसम्पत्तियां : परिवार के स्वामित्व में शामिल मदों को परिसम्पत्ति की परिभाषा दी गई जिसका आर्थिक मूल्य था जैसे कि भूमि भवन, पशुधन, कृषि उपकरण, खेती भिन्न व्यापार उपकरण, सभी परिवहन उपकरण पारिवारिक, स्थायी परिसम्पत्तियां, दिए गए ऋणों पर प्राप्त देय राशि, सहकारी सोसायटियों बैंक आदि में शेयर, राष्ट्रीय योजना बचत प्रमाण पत्र तथा कम्पनियों, बैंकों, डाक घरों आदि में इसी प्रकार की जमा । किन्तु खेतों में खड़ी फसलें, नकद, करेन्सी नोटों तथा सिक्कों तथा परिवार द्वारा वस्तुओं के एकत्र किए गए स्टॉक को इस सर्वेक्षण के प्रयोजनार्थ परिसम्पत्ति नहीं माना गया ।

(9) देयताएं : परिवार के विरुद्ध दूसरों द्वारा दायर किए गए सभी दावों को देयताओं में शामिल किया गया अर्थात् नकद, ऋण, वस्तुओं के ऋण, पंसारियों, डाक्टरों वकीलों आदि को अदा न किए गए ऋण ।

(10) कृषि व्यापार : कृषि व्यापार में वागानों तथा फलोद्यानों की खेती तथा धान का छिलका उतारने तथा गुड़ बनाने सहित खेती जैसे पारिवारिक आर्थिक कार्यक्रम शामिल थे । गुड़ बनाने को केवल सर्वेक्षण के प्रयोजन के लिए कृषि व्यापार के अन्तर्गत शामिल किया गया जब इस कार्यक्रम को खेत पर स्वदेशी तरीकों से किया गया कृषि व्यापार में राष्ट्रीय औद्योगिक वर्गीकरण 1970 के उद्योग प्रभाग "ओ" के अन्तर्गत आने वाले सम्बद्ध कार्यक्रमों तथा मधुमक्खी पालन में सहायक कार्यक्रमों को शामिल किया गया ।

(11) कृषि भिन्न व्यापार : कृषि भिन्न व्यापार की परिभाषा, विनिर्माण तथा मरम्मत सेवाओं, खान तथा उत्खनन, व्यापार परिवहन तथा व्यवसाय और सेवाओं जैसे कृषि व्यापार में शामिल किए गए कार्य-

कलाओं को छोड़कर सभी पारिवारिक आर्थिक कार्यक्रमों के रूप में दी गई थी । किन्तु कारखाना अधिनियम, 1948 की धारा 2ड (1) अथवा 2ड (2) और खंड 85 के अन्तर्गत पंजीकृत सभी विनिर्माण प्रतिष्ठानों को इस सर्वेक्षण के क्षेत्राधिकार से बाहर रखा गया । बीड़ी तथा सिगार कामगार अधिनियम 1966 के अन्तर्गत पंजीकृत बीड़ी तथा सिगार विनिर्माण प्रतिष्ठानों को इस सर्वेक्षण के क्षेत्राधिकार से बाहर रखा गया ।

1.7.0 आंकड़ों का सारणीयन : रा० प्र० सर्वे० सं० की शासी परिषद द्वारा अनुसूचियों, अनुदेशों तथा रा० प्र० सर्वे० के 37वें दौर के सारणीयन कार्यक्रम को अन्तिम रूप देने के सम्बन्ध में बनाए गए कार्य-दल ने भारतीय रिजर्व बैंक तथा अन्य प्रयोगकर्ताओं की आवश्यकताओं को ध्यान में रखते हुए सारणीयन के लिए व्यापक कार्यक्रम की सिफारिश की । कार्यदल की सिफारिशों को बाद में शासी परिषद, रा० प्र० सर्वे० सं० द्वारा स्वीकृत कर दिया गया, तथा यह निर्णय किया गया कि केन्द्रीय तथा राज्य प्रतिदर्श दोनों का सम्पूर्ण सारणीयन कार्य सांख्यिकीय विश-लेषण विभाग में स्थित उनके निजी संगणक द्वारा तथा भारतीय रिजर्व बैंक, बम्बई की संगणक सेवाओं द्वारा किया जाएगा । राज्य प्रतिदर्श से संसाधन कार्य को सुलभ बनाने के लिए, भारतीय रिजर्व बैंक, ने राज्य की राजधानियों में संसाधन कक्ष बनाए जहां भारतीय रिजर्व बैंक की शाखाएं स्थित थी । प्रत्येक संसाधन कक्ष को कुछेक पड़ोसी राज्यों का कार्य सौंपा गया । संसाधन कक्ष में, अलग-अलग राज्य सांख्यिकीय ब्यूरो द्वारा अनुसूचियों की प्रारम्भिक जांच सम्बन्धी क्षेत्राधिकार के अन्तर्गत आने वाले विभिन्न राज्यों की पूछताछ अनुसूची, राज्य सांख्यिकीय ब्यूरो से एकत्र की गई । रा० प्र० सर्वे० सं० के सर्वेक्षण अभिकल्प तथा अनुसन्धान प्रभाग द्वारा प्रस्तुत किए गए कार्यक्रम के अनुसार संसाधन कक्षों में आंकड़ों की संगतता की जांच की गई तथा तत्पश्चात् आंकड़ों को पंच कार्डों में प्रतिलिखित किया गया तथा तब उन स्थानों पर उपलब्ध स्थानीय अभिकरणों की सेवाओं को भाड़े पर लेकर जहां संसाधन केन्द्र स्थित थे अथवा बम्बई में भारतीय रिजर्व बैंक के मुख्य संसाधन केन्द्र को पूछताछ अनुसूची भेजकर टेपों को स्थानान्तरित किया गया । केन्द्रीय प्रति-दर्श के लिए, आंकड़ों की जांच तथा पंच कार्डों के प्रतिलेखन का कार्य रा० प्र० सर्वे० सं० के समक विधायन प्रभाग के विभिन्न विधायन केन्द्रों द्वारा किया गया और स्थानीय संगणक केन्द्रों से तैयार किए गए आंकड़ा टेप, अगले संसाधन कार्य के लिए भारतीय रिजर्व बैंक, बम्बई को भेजे गए । केवल नागपुर में स्थित समक विधायन केन्द्र को छोड़कर जहां पंच किए गए कार्ड भारतीय रिजर्व बैंक बम्बई को भेजे गए थे क्योंकि चुम्बकीय टेपों में आंकड़ा एकत्र करने के लिए उपयुक्त सुविधाएं उपलब्ध नहीं थी ।

1.7.1 केन्द्रीय तथा राज्य प्रतिदर्श, दोनों के लिए सर्वेक्षण अभिकल्प तथा अनुसन्धान प्रभाग, रा० प्र० सर्वे० सं० द्वारा तैयार किए गए तथा कार्यालय द्वारा अनुमोदित संगणक जांच कार्यक्रम तथा स्वतः शुद्धि नियमों के अनुसार समक मिसिल को अद्यतन बनाने के लिए दो से तीन चक्रों को अपना कर आंकड़ों को ठीक किया गया । प्रारम्भिक स्तर में, भारतीय रिजर्व बैंक तथा सर्वेक्षण अभिकल्प तथा अनुसन्धान प्रभाग के प्रतिनिधियों के बीच कलकत्ता अथवा बम्बई में आकस्मिक बैठकों के जरिए सम्बन्ध स्थापित किया गया ताकि सर्वेक्षण के वैचारिक ढांचे, प्राक्कलनों से सम्बन्धित आंकड़ों पर विभिन्न प्रकार की असंगतता का प्रभाव तथा उनसे निपटने के लिए साधनों तथा अन्य संसाधन सम्बन्धी कठिनाइयों पर चर्चा की जा सके । इसके पश्चात् जब आंकड़े ठीक किए जाने की प्रक्रिया में थे, तब संसाधन समस्याओं पर नियंत्रण रखने के लिए भारतीय रिजर्व बैंक तथा रा० प्र० सर्वे० सं० के सर्वेक्षण अभिकल्प तथा अनुसन्धान प्रभाग और समक विधायन प्रभाग के प्रतिनिधियों के बीच कई बैठकें आयोजित की गईं ।

1. .0 रिपोर्ट की विषय वस्तु: अनुसूची (त्र तथा निवेश) जरिए एकत्रित आंकड़ों के सारणीयन के लिए एक विस्तृत कार्यक्रम रा० प्र० सर्वे० सं० की शासी परिषद द्वारा मंजूर किया गया। सारणीयन के सम्पूर्ण कार्यक्रम को दो चरणों में बांटा गया। जबकि प्राथमिकता सारणीयन ने 30 जून 1981 तथा 1982 को परिसम्पत्ति तथा देयता स्थिति पर अनुमान प्रस्तुत किए, कृषि वर्ष 1981-82 के दौरान ऋण तथा पूंजीगत व्यय भी सीमा तथा स्वरूप 30-6-82 को परिसम्पत्तियों की चुनी हुई दोनों मदों के स्टाक पर अनुमान और कृषि वर्ष 1981-82 के दौरान परिसम्पत्तियों की विशिष्ट मदों पर किए गए व्यय को प्राथमिकता II में शामिल किया।

1.8.1 चूंकि एकमात्र प्राथमिकता I सारणीयन में शामिल की गई सभी सारणियों को एक ही रिपोर्ट में स्थान नहीं दिया जा सकता, अतः सर्वेक्षण परिणामों को अगले अकों में प्रकाशित करने का प्रस्ताव है: इस रिपोर्ट में, केन्द्रीय राज्य तथा केन्द्रीय तथा राज्यों में एकत्रित प्रतिदर्शों के लिए अलग-अलग उप प्रतिदर्शों के अनुसार वर्गीकृत, 30 जून 1981 की स्थिति के अनुसार परिवारों के स्वायत्त में परिसम्पत्तियों तथा देयताओं के विस्तृत वर्गों से सम्बन्धित कुछ प्रमुख अनुमान दिए गए हैं। यह रिपोर्ट अखिल भारतीय और अलग-अलग राज्यों के स्तर पर ग्रामीण शहरी तथा ग्रामीण और शहरी दोनों के लिए संयुक्त रूप से अलग-अलग अनुमान प्रदान करती है।

1.8.2 यद्यपि इस में दिए गए परिणामों की मुख्य विशेषताओं पर, खंड 2 में चर्चा की गई है, निम्नलिखित सांख्यिकीय सारणियों में व्यवस्थित आंकड़े भाग 2 में दिए गए हैं।

- (1.1) राज्यों तथा उप-प्रतिदर्शों के अनुसार प्रतिदर्श गांवों/खंडों का वितरण।
- (1.2) परिवारों द्वारा धारित परिसम्पत्ति तथा उप-प्रतिदर्श के अनुसार प्रतिदर्श परिवारों का वितरण।
- (2) परिवारों द्वारा धारित परिसम्पत्ति उप-प्रतिदर्श तथा परिवार की किस्म के अनुसार परिवारों की अनुमानित संख्या का वितरण।
- (3) राज्यों तथा उप-प्रतिदर्श के अनुसार रिपोर्ट देने वाले प्रति परिवार कुल परिसम्पत्ति का औसतन मूल्य।
- (4.1) राज्यों तथा उप-प्रतिदर्श के अनुसार सभी परिवारों के सम्बन्ध में देयताओं की रिपोर्ट देने वाले परिवारों की प्रतिशतता।
- (4.2) राज्यों तथा उप-प्रतिदर्श के अनुसार रिपोर्ट देने वाले प्रति परिवार देयताओं का औसतन मूल्य।
- (5) प्रत्येक उप-प्रतिदर्श के लिए परिवारों के स्वरूप में फीले परिवारों का प्रतिशत वितरण।
- (6) परिवार के स्वरूप के अनुसार वर्गीकृत परिवार द्वारा धारित परिसम्पत्ति के सम्बन्ध में परिवारों का प्रतिशत वितरण।

(7) रिपोर्ट देने वाले परिवारों की प्रतिशतता तथा परिवार द्वारा धारित परिसम्पत्ति के अनुसार 30 जून, 1981 की स्थिति के अनुसार वर्गीकृत परिसम्पत्तियों तथा देयताओं के विस्तृत वर्ग की रिपोर्ट देने वाले प्रति परिवार औसतन मूल्य।

सारणी (1.1) तथा (1.2) में उस प्रतिदर्श आकार को प्रतिरूप प्रदान किया गया है जिसके आधार पर इस रिपोर्ट में दिए गए अनुमान तैयार किए गए हैं। जबकि सारणी (1.1) उप-प्रतिदर्शों द्वारा वर्गीकृत प्रत्येक राज्य में सर्वेक्षित प्रथम स्तरीय प्रतिदर्श इकाइयों (ग्रामीण तथा शहरी क्षेत्रों में अलग-अलग गांव तथा खंड) की संख्या दर्शाती है, सारणी (1.2) अन्तिम प्रतिदर्श इकाइयों अर्थात् प्रत्येक राज्य के ग्रामीण तथा शहरी क्षेत्रों के लिए अलग-अलग परिवार द्वारा धारित परिसम्पत्ति और उप-प्रतिदर्श के अनुसार वर्गीकृत परिवारों का वितरण दर्शाती है। सारणी संख्या 6 तथा 7 को छोड़कर सभी सारणियों में प्रस्तुत किये गये सर्वेक्षण परिणाम केन्द्र, राज्य तथा केन्द्रीय तथा राज्यों में एकत्रित प्रतिदर्शों के लिए अलग-अलग उप-प्रतिदर्शों के अनुसार वर्गीकृत किए गए हैं। सारणी 6 तथा 7 केन्द्रीय तथा राज्य प्रतिदर्शों पर आधारित अनुमान प्रदान करती है। उप-प्रतिदर्शों पर अनुमान प्रदान करने का लक्ष्य विभिन्न उप-प्रतिदर्शों से स्वतंत्र रूप से प्राप्त किए गए अनुमानों में भिन्नता दर्शाना है। सभी परिवारों के लिए अनुमान प्रदान करने के अतिरिक्त ग्रामीण क्षेत्रों में कृषक तथा गैर-कृषक परिवारों के लिए तथा शहरी क्षेत्रों में स्वतः रोजगार तथा अन्यो के लिए सारणी (2) से (4) और (7) में सूचना प्रदान करने का प्रयत्न किया गया है। स्पष्टतया, ग्रामीण तथा शहरी संयुक्त अनुमान सभी परिवारों के लिए तैयार किए गए हैं। सारणी 5 तथा 6 के लिए ग्रामीण क्षेत्रों में गैर कृषक परिवारों को (i) कृषि श्रमिक, (ii) कारीगरों तथा (iii) अन्यो के रूप में वर्गीकृत किया गया है तथा शहरी क्षेत्रों में स्वतः रोजगार वाले परिवारों को व्यवसाय प्रभागों के अनुसार वर्गीकृत किया गया है जैसे कि (i) व्यवसायों आदि (ii) प्रशासनिक आदि, (iii) लिपिकीय तथा सम्बद्ध कामगार, (iv) द्विती कर्ता (v) सेवा कामगार (vi) किसान, मछुआरे आदि, (vii) उत्पादन तथा विभिन्न सम्बद्ध कामगार, और (viii) अन्य। ये दो सारणियाँ ग्रामीण तथा शहरी क्षेत्रों में परिवारों के विभिन्न वर्गों तथा विभिन्न श्रेणियों द्वारा परिसम्पत्ति में इन वर्गों का वितरण दर्शाएंगी। इसके अतिरिक्त, सारणी (2) (6) तथा (7) में परिवार द्वारा परिसम्पत्ति एक वर्गीय विशेषता के रूप में प्रकट होती है। परिवारिक परिसम्पत्तियों तथा परिवार के स्वरूप (ग्रामीण क्षेत्रों में कृषक आदि तथा शहरी क्षेत्रों में स्वतः रोजगार आदि) के अनुसार परिवारों के वर्गीकरण का उद्देश्य, परिवारों की विभिन्न श्रेणियों के बीच महत्व तथा परिसम्पत्तियों की रचना में भिन्नता को स्पष्ट करना।

यहां यह उल्लेख करना भी उचित है कि भाग II में दी गई राज्य तथा समस्त भारत स्तर पर प्रस्तुत की गई सारणियाँ, सारणी के मूल आंकड़े जोड़ने पर, सभी मामलों में कुल कालम रेखा के सामने दर्शाए गए आंकड़ों से, आंकड़ों को निकटतम लाने के कारण सम्भवतः, मेल न खाएँ। इसके अतिरिक्त कुछ मामलों में आंकड़े बिना किसी पूर्णांक के केवल दशमलव स्थानों में दिए गए हैं। अतः उन मामलों में दशमलव से पहले शून्य पढ़ा जाए जहां दशमलव से पहले कोई अंक न हो जैसे .14 और .00 को क्रमशः 0.14 तथा 0.00 पढ़ा जाए।

## 2. सर्वेक्षण के महत्वपूर्ण निष्कर्ष

2.0.0 वर्तमान रिपोर्ट ग्रामीण, शहरी, तथा ग्रामीण और शहरी संयुक्त क्षेत्रों के लिए राज्य तथा समस्त भारत स्तर पर 30 जून, 1981 की स्थिति के अनुसार परिसम्पत्तियों की विभिन्न मर्दों तथा परिवारों की कुल परिसम्पत्तियों तथा देयताओं के अनुमान प्रदान करती है। प्रत्येक प्रमुख किस्म<sup>1</sup> के परिवार के लिए परिवार द्वारा धारित परिसम्पत्ति के अनुसार वर्गीकृत परिसम्पत्तियों के अनुमान केन्द्र तथा राज्य प्रतिदर्शों के इकट्ठे किए गए आंकड़ों पर आधारित हैं। किन्तु, उप-प्रतिदर्श में परिवर्तनों के सम्बन्ध में आशय प्राप्त करने के लिए, कुछ प्रमुख अनुमान जैसे कि परिवार द्वारा धारित परिसम्पत्ति के अनुसार वर्गीकृत परिवारों की संख्या का वितरण, रिपोर्ट देने वाले प्रति परिवार कुल परिसम्पत्ति का औसतन मूल्य, सभी परिवारों के अनुपात में ऋणग्रस्त परिवारों की प्रतिशतता तथा प्रत्येक प्रमुख किस्म के रिपोर्ट देने वाले परिवार की देयताओं की औसतन राशि केन्द्र तथा राज्य प्रतिदर्श के प्रत्येक उप-प्रतिदर्श के लिए, अलग-अलग परिशिष्ट-II में क्रमशः सारणी 2, 3, 4.1 तथा 4.2 में प्रस्तुत किए गए हैं। सारणी 5, उप प्रतिदर्श के अनुसार समस्त किस्म के परिवारों के सम्बन्ध में परिवारों का प्रतिशत वितरण दर्शाती है। इस खंड में, राज्य तथा समस्त भारत स्तर पर परिवारों की परिसम्पत्तियों तथा देयताओं से सम्बन्धित प्रमुख विशेषताओं को संक्षिप्त रूप में स्पष्ट करने का प्रयत्न किया गया है।

2.1.0 परिवारों का अनुमान : केन्द्र तथा राज्य के सम्बन्ध में एकत्र किए गए आंकड़ों पर आधारित भारत के ग्रामीण क्षेत्र में परिवारों की संख्या का अनुमान 930.04 लाख तथा शहरी क्षेत्र में 290.04 लाख लगाया गया है। यद्यपि यह सर्वेक्षण, 1981 की जनगणना के लगभग एक वर्ष पश्चात् आयोजित किया गया था, इसलिए सर्वेक्षण परिणामों की विश्वसनीयता की जांच करने के लिए गणना आंकड़ों के साथ इस बुनियादी विशेषता के लिए सर्वेक्षण अनुमान की तुलना करना उपयुक्त था। यह तुलना सारणी (i) में ग्रामीण तथा शहरी, क्षेत्रों के अलग-अलग छः प्रमुख राज्यों तथा समस्त भारत के लिए किया गया था। असम को 1981 की जनगणना से बाहर रखा गया क्योंकि वहाँ जनगणना नहीं की गई।

2.1.1 सारणी (1) स्पष्ट करती है कि दोनों क्षेत्रों में, समस्त भारत स्तर पर सर्वेक्षण आंकड़े तथा गणना आंकड़े बिल्कुल सन्निकट हैं—ग्रामीण क्षेत्र के मामले में यह अन्तर 3.03 प्रतिशत तथा शहरी शहर में केवल 1.57 प्रतिशत है। जनगणना आंकड़ों से तुलना करने पर यह स्पष्ट होता है कि सर्वेक्षण अनुमान ग्रामीण क्षेत्रों तथा शहरी क्षेत्रों में अधिक है। प्रतिशत अन्तर राज्य स्तर पर भी साधारणतया कम है, परन्तु कुछ मामलों में, ये बहुत अधिक है। गणना आंकड़ों की तुलना में, सर्वेक्षण अनुमान ग्रामीण क्षेत्र में, मध्य प्रदेश (11.71 प्रतिशत) तथा शहरी क्षेत्र में कर्नाटक (10.56 प्रतिशत) तथा केरल (9.09 प्रतिशत) में बहुत कम हैं। यहाँ यह भी उल्लेखनीय है कि मध्य प्रदेश में क्षेत्रीय कर्मचारियों की कमी के कारण कुछेक स्तरों पर सर्वेक्षण नहीं किया जा सका। यद्यपि, गणना तथा सर्वेक्षण के बीच एक वर्ष के अन्तराल के दौरान, जनसंख्या वृद्धि के कारण सर्वेक्षण परिणामों के गणना आंकड़ों की तुलना में, अधिक होने की आशा है, वह सीमा, जहाँ सर्वेक्षण अनुमान गणना से अधिक है अर्थात् ग्रामीण क्षेत्र में बिहार (10.07 प्रतिशत) और पंजाब

(9.56 प्रतिशत) तथा शहरी क्षेत्र में पश्चिम बंगाल (19.14 प्रतिशत), उत्तर प्रदेश (14.27 प्रतिशत) और बिहार (10.12 प्रतिशत), मात्र वृद्धि कारणों द्वारा स्पष्ट नहीं की जा सकती।

2.1.2 चूँकि विभिन्न श्रेणियों द्वारा परिवारों की परिसम्पत्तियों तथा देयताओं के अनुमान प्रस्तुत किए गए हैं, अतः परिवारों की परिसम्पत्तियों तथा देयताओं की स्थिति के विभिन्न पहलुओं की जांच करने से ग्रामीण तथा शहरी क्षेत्रों में ऐसी श्रेणियों के अन्तर्गत आने वाले परिवारों के अनुपात का विश्लेषण करना उपयुक्त है। जैसा कि पहले उल्लेख किया गया है, ग्रामीण क्षेत्र के परिवारों को कृषकों तथा गैर-कृषकों, के रूप में विस्तृत तौर पर वर्गीकृत किया गया था। कृषकों की परिभाषा उन व्यक्तियों के रूप में दी गई जिन्होंने कृषि वर्ष 1981-82 के दौरान कुछ भूमि (0.005) एकड़ अथवा अधिक पर काम किया। उन व्यक्तियों को जिन्होंने किसी भी भूमि पर कार्य नहीं किया उन्हें गैर-कृषकों के रूप में माना गया तथा सर्वेक्षण तारीख से पिछले 365 दिन के दौरान परिवार की आय के प्रमुख स्रोत पर निर्भर करते हुए (i) कृषि श्रमिकों (ii) कारीगरों तथा (iii) अन्यो के रूप में वर्गीकृत किया गया। उन उपयुक्त परिभाषाओं को कृषि वर्ष 1971-72 के दौरान जांच किए गए रा० प्र० सर्वे० 26 वें दौर के परिणामों के साथ वर्तमान सर्वेक्षण परिणामों की तुलनीयता बनाए रखने के लिए सर्वेक्षण हेतु अपनाई गई। रा० प्र० सर्वे० 37 वें दौर के परिणाम संकेत देते हैं कि ग्रामीण भारत में लगभग 930.06 लाख परिवार हैं, जिनमें से 76.3 प्रतिशत से अधिक कृषक परिवार हैं तथा लगभग 11.3 प्रतिशत कृषि श्रमिक परिवार हैं। केवल लगभग 1.6 प्रतिशत कारीगर परिवार हैं। पिछले दशक के दौरान कृषकों तथा विभिन्न प्रकार के गैर-कृषकों की प्रतिशतता में परिवर्तन देखने की दृष्टि से रा० प्र० सर्वे० 37 वें दौर और रा० प्र० सर्वे० 26 वें दौरों से प्राप्त समस्त परिवारों के सम्बन्ध में ग्रामीण परिवारों का प्रतिशतता वितरण, 17 प्रमुख राज्यों तथा समस्त भारत के लिए सारणी (ii) में प्रस्तुत किया गया है।

2.1.3 सारणी (ii) में प्रस्तुत किए गए परिणाम दर्शाते हैं कि ग्रामीण भारत में पिछले दशक के दौरान कृषक परिवारों के अनुपात में लगभग 4 प्रतिशत की वृद्धि हुई है। गैर-कृषकों में, कृषि श्रमिक परिवारों तथा कारीगर परिवारों दोनों की प्रतिशतता में कमी हुई है जबकि अन्य परिवारों की प्रतिशतता सन्दर्भाधिक के दौरान लगभग समान रही है।

2.1.4 37 वें दौरे में किए गए प्राक्कलन पर आधारित राज्य स्तर पर सभी प्रकार के परिवारों के सम्बन्ध में ग्रामीण परिवारों का प्रतिशत वितरण समस्त भारत पद्धति से बहुत अधिक भिन्नता दर्शाता है। यद्यपि, सभी परिवारों के सम्बन्ध में कृषक परिवारों की प्रतिशतता केरल में 93 तथा हिमाचल प्रदेश तथा असम में 87 तथा हरियाणा तथा पंजाब में क्रमशः 57 और 63 है, समस्त भारत के लिए प्रतिशतता 76 है। रा० प्र० सर्वे० 26 वें दौर की तुलना में 37 वें दौर में कृषकों के अनुपात में बिहार, हरियाणा, हिमाचल प्रदेश, जम्मू तथा कश्मीर, मध्य प्रदेश, महाराष्ट्र, और राजस्थान में कमी हो गई है। यह कमी, जम्मू तथा कश्मीर (लगभग 10 प्रतिशत) और हिमाचल प्रदेश (लगभग 5 प्रतिशत) में बहुत अधिक है। दूसरी ओर, पंजाब (20 प्रतिशत), गुजरात (15 प्रतिशत), तमिलनाडु, (14 प्रतिशत) तथा पश्चिम बंगाल (13 प्रतिशत) में पर्याप्त वृद्धि देखी गई है।

2.1.5 कृषि श्रमिक परिवारों के मामले में, आन्ध्र प्रदेश (18 प्रतिशत), पंजाब (17 प्रतिशत), महाराष्ट्र (16 प्रतिशत) तथा तमिलनाडु (16 प्रतिशत) एकत्र किए गए आंकड़े बहुत अधिक हैं। इसके विपरीत, केरल, जम्मू तथा कश्मीर और हिमाचल प्रदेश, केवल 2 प्रतिशत के निम्नतम आंकड़े दर्शाते हैं,

प्रमुख परिवार किस्म :	ग्रामीण क्षेत्र:	(i) कृषक तथा
		(ii) गैर-कृषक
	शहरी क्षेत्र:	(i) स्वतः रोजगार
		(ii) अन्य

### 2.3.0. अलग-अलग संघटकों के अनुसार कुल परिसम्पत्तियों का विवरण :

परिवारों की विभिन्न श्रेणियों में परिसम्पत्तियों की विभिन्न मदों के महत्व का अध्ययन करने तथा यह देखने के उद्देश्य से कि क्या पिछले दशक के दौरान परिसम्पत्ति की किसी मद के महत्व में कोई तबदीली हुई है, ग्रामीण क्षेत्र के लिए, रा० प्र० सर्वे० 37 वें तथा रा० प्र० सर्वे० 26 वें दौर से तथा शहरी क्षेत्र के लिए, केवल रा० प्र० सर्वे० 37 वें दौर के सर्वेक्षण आंकड़ों से प्राप्त कुल परिसम्पत्तियों में विभिन्न मदों के प्रतिशत भाग समस्त भारत के लिए सारणी (5) में प्रस्तुत किए गए हैं। इस सम्बन्ध में यह भी उल्लेखनीय है कि रा० प्र० सर्वे० 26 वां दौर का शहरी प्रतिदर्श अभिकल्प ऋण तथा निवेश की ओर अभिमुख नहीं था, अतः शहरी प्राकलनों की विश्वसनीयता सन्देहास्पद थी। अतः शहरी क्षेत्रों के लिए रा० प्र० सर्वे० 26 वें दौर के परिणाम जारी नहीं किए गए।

2.3.1 राष्ट्रीय आय तथा रोजगार दोनों के सन्दर्भ में कृषि का महत्व सुस्थापित है तथा इस पर जोर देने की आवश्यकता नहीं है। अतः इसमें कोई आश्चर्य नहीं है कि ग्रामीण परिवारों द्वारा धारित परिसम्पत्तियों में से भूमि सबसे महत्वपूर्ण संघटक है। यद्यपि वर्तमान सर्वेक्षण के परिणाम, जैसा कि सारणी (v) में दर्शाया गया है, दर्शाते हैं कि ग्रामीण क्षेत्र में, कुल परिसम्पत्तियों के कुल मूल्य में भूमि का मूल्य सबसे अधिक है, भूमि तथा पशुधन का मूल्य 1971 के संगत आंकड़ों की तुलना में 1981 में कम हो गया प्रतीत होता है। भूमि का प्रतिशत मूल्य 66.7 से घटकर 62.1 हो गया है तथा पशुधन का मूल्य 6.5 से घटकर 5.0 हो गया। दूसरी ओर भवन आदि के मामले में (17.9 से बढ़कर 20.7), परिवार की स्थायी परिसम्पत्तियों (4.6 से बढ़कर 7.1) तथा मशीनरी, उपस्करों, आदि (2.7 से बढ़कर 3.7) के मामले में बढ़ती हुई प्रवृत्ति देखी गई है। वित्तीय परिसम्पत्तियां कुल परिसम्पत्तियों में लगभग 1 प्रतिशत का योगदान देती हैं तथा पिछले दशक में कोई महत्वपूर्ण परिवर्तन नहीं देखा गया है।

2.3.2 जहां तक ग्रामीण क्षेत्रों में कृषक तथा गैर-कृषक परिवारों का सम्बन्ध है, दशक के दौरान परिवर्तन पद्धति दोनों श्रेणियों के लिए सदृश प्रतीत होती है। किन्तु रा० प्र० सर्वे० के 37 वें दौर के सर्वेक्षण परिणाम स्पष्ट करते हैं कि गैर-कृषक परिवारों के मामले में परिसम्पत्तियों के कुल मूल्य में भिन्न स्थिति दर्शाता है। गैर-कृषकों के लिए, यद्यपि अपने अधीन भवन आदि लगभग 39 प्रतिशत रहित सर्वोच्च स्थान पर है, भूमि का भाग कृषक परिवारों द्वारा सूचित 64 प्रतिशत के मुकाबले में केवल 31 प्रतिशत है। परिवार की स्थायी परिसम्पत्तियों का भी गैर-कृषक परिवारों के लिए बहुत अधिक महत्व है। जिसका भाग 15.8 प्रतिशत है। वित्तीय परिसम्पत्तियों का प्रतिशत भाग, जिसे कृषकों के मामले में नगण्य पाया गया, गैर-कृषकों के लिए 5.5 सूचित किया गया है, जिसमें उल्लेखनीय हैं, अन्य व्यवसाय, साहूकार आदि।

2.3.3 शहरी क्षेत्र में परिसम्पत्तियों की विभिन्न मदों के मूल्य का प्रतिशत विवरण शहरी क्षेत्र में गैर-कृषक परिवारों जैसा कि आशा की जाती है शहरी क्षेत्र में वित्तीय परिसम्पत्तियां अपेक्षाकृत अधिक महत्व (10.6 प्रतिशत) की है। दूसरी तरफ पशुधन का मूल्य ग्रामीण क्षेत्र में गैर-कृषक परिवारों के 5.2 प्रतिशत के मुकाबले में केवल 0.8 प्रतिशत है।

2.3.4 शहरी क्षेत्र में ही, दो मदों को छोड़कर, स्वतः रोजगार तथा "अन्य" परिवारों के बीच कुल परिसम्पत्तियों में से परिसम्पत्तियों की भिन्न-भिन्न मदों के भाग में बहुत अधिक भिन्नता नहीं देखी गई है। "मशीनरी" उपस्करों आदि के अन्तर्गत वर्गीकृत मदों के लिए, जैसी की आशा थी स्वतः रोजगार परिवार का भाग "अन्य" परिवारों की तुलना में अधिक नहीं था। जहां तक वित्तीय परिसम्पत्तियों के भाग का संबंध है वह नोट करना उपयुक्त होगा कि स्वतः रोजगार परिवार के अतिरिक्त अन्य परिवार उन स्वतः रोजगार परिवारों की अपेक्षा 14.9 की प्रतिशत

भाग सहित अधिक अच्छी स्थिति में हैं, जिसने वित्तीय परिसम्पत्तियों के मुकाबले में केवल 5.3 प्रतिशत परिसम्पत्तियों की सूचना दी है।

2.3.5 परिवार की प्रत्येक श्रेणी के अन्तर्गत परिसम्पत्तियों की विभिन्न मदों के योगदान के सम्बन्ध में चर्चा करने के पश्चात्, समस्त भारत स्तर पर जैसा कि सारणी (vi) में दिया गया है अब परिवारों की दो प्रमुख श्रेणियों के बीच की परिसम्पत्ति की प्रत्येक मद के वितरण की जांच करना उपयुक्त है।

प्राकलनों से स्पष्ट होता है कि जहां तक भौतिक परिसम्पत्तियों का सम्बन्ध है ग्रामीण क्षेत्र में, भूमि के लिए गैर-कृषि परिवारों का भाग 3 प्रतिशत तक कम है मशीनरी आदि के लिए 5 प्रतिशत पशुधन के लिए 6 प्रतिशत, भवन के लिए 11 प्रतिशत और परिवार की स्थायी परिसम्पत्तियों के लिए 13 प्रतिशत तक कम हो गया है। वित्तीय परिसम्पत्तियों के कुल मूल्य का 26 प्रतिशत इन परिवारों के स्वामित्व में है, इसलिए वित्तीय परिसम्पत्तियों के सबध में गैर-कृषक परिवारों की स्थिति कुछ बेहतर है। विभिन्न परिसम्पत्तियों के भाग में गैर-कृषक परिवारों का कम योगदान इस तथ्य के कारण भी हो सकता है कि गैर-कृषक परिवारों की संख्या कृषक परिवारों की संख्या से बहुत कम है तथा परिसम्पत्ति की मद की रिपोर्ट देने वाले परिवारों की प्रतिशतता कृषक परिवारों की तुलना में कम है। यह भी देखा गया कि रिपोर्ट देने वाले प्रति परिवार की परिसम्पत्ति की मद का औसत मूल्य गैर-कृषक परिवार के लिए अन्य श्रेणी के परिवारों की तुलना में कम है।

2.3.6 शहरी क्षेत्र में गैर-स्वतः रोजगार परिवारों का प्रतिशत भाग "पशुधन मशीनरी, उपस्कर आदि" तथा प्राप्त देय रकमों को छोड़कर परिसम्पत्तियों की सभी मदों के लिए अधिक है।

### 2.4.0 धारित परिसम्पत्ति के अनुसार परिवारों का वितरण :

परिवारों की विभिन्न श्रेणियों के सापेक्षिक महत्व का अध्ययन विभिन्न परिसम्पत्ति वर्गों में उनके वितरण की सहायता से किया जा सकता है। सारणी (vii) समस्त भारत स्तर पर ग्रामीण तथा शहरी क्षेत्रों के लिए अलग-अलग परिवारों की श्रेणियों के अनुसार परिवार द्वारा धारित परिसम्पत्ति में परिवारों के प्रतिशत वितरण दर्शाती है।

2.4.1 भारत के ग्रामीण क्षेत्र में परिवारों के स्वामित्वाधीन परिसम्पत्तियों में से लगभग 6 प्रतिशत का मूल्यांकन 1981 में विद्यमान मूल्यों पर 1000 रु० अथवा इससे भी कम आंका गया। अन्य 18 प्रतिशत 1000 रु० से 5000 रु० के परिसम्पत्ति वर्ग में आता है। इस प्रकार एक-चौथाई से थोड़े कम ग्रामीण परिवारों के पास 5000 रु० अथवा कम की परिसम्पत्तियां हैं। दूसरी ओर 8 प्रतिशत ग्रामीण परिवारों के पास एक लाख रु० अथवा इससे अधिक की परिसम्पत्तियां हैं। शेष 68 प्रतिशत को मध्य के 4 परिसम्पत्ति वर्गों में बांटा गया है जिनके पास 5000 रु० से एक लाख रु० के बीच की परिसम्पत्ति है।

2.4.2 जहां तक परिसम्पत्तियों का सम्बन्ध है, विभिन्न प्रकार के परिवारों में, संख्या की दृष्टि से ग्रामीण क्षेत्र में कृषक सबसे प्रभुत्व वाली श्रेणी में है, तथा ये सबसे अच्छी स्थिति में है। प्रति कृषक परिवार कुल परिसम्पत्तियों का मूल्य 44,525 रु० है जो गैर-कृषक परिवारों के स्वामित्वाधीन परिसम्पत्तियों (8974 रु० केवल) के औसत मूल्य का लगभग 5 गुणा है। किन्तु, कृषक परिवारों में, कुछ मामूली कृषक भी हैं जिनके पास 1000 रु० तथा 1000 रु० से 5000 रु० तक की दो न्यूनतम परिसम्पत्तियां हैं, वे कुल कृषक परिवारों का लगभग 1.6 प्रतिशत तथा 11.3 प्रतिशत हैं। इस सन्दर्भ में यह नोट किया जाए कि सम्भवतः इनमें से कुछ परिवारों को भूमि के छोटे से टुकड़े पर काम करने के कारण कृषक परिवारों के रूप में वर्गीकृत किया गया हो, जबकि उनकी आय का प्रमुख स्रोत खेती को छोड़ कर कुछ अन्य था।

2.4.3 गैर-कृषकों, जो ग्रामीण परिवारों का 24 प्रतिशत है (सन्दर्भ सारणी II) के पास ग्रामीण क्षेत्र (सन्दर्भ सारणी vi) में सभी परिवारों के स्वामित्वधीन कुल परिसम्पत्तियों का केवल 6 प्रतिशत ही है। परिसम्पत्ति आकार की दृष्टि यह भी दर्शाती है कि गैर-कृषक परिवारों की स्थिति निराशाजनक है। गैर-कृषकों में से लगभग 60 प्रतिशत के पास 5000 रु० अथवा कम मूल्य की परिसम्पत्तियाँ हैं। गैर-कृषक परिवारों की विभिन्न श्रेणियों में, कृषि श्रमिक परिवारों की स्थिति इस दृष्टि से सबसे खराब है चूंकि लगभग उनमें से 21 प्रतिशत 1000 रु० अथवा इससे कम के परिसम्पत्ति वर्ग में आते हैं और अन्य 50 प्रतिशत 1000 रु० से 5000 रु० के परिसम्पत्ति वर्ग में। कृषि श्रमिकों तथा कारीगरों को छोड़कर परिवारों की स्थिति को कृषि श्रमिक परिवारों की अपेक्षा थोड़ा सा बेहतर समझा जा सकता है जिनमें से लगभग 19 प्रतिशत तथा 32 प्रतिशत क्रमशः 1000 रु० तक तथा 1000 रु० से 5000 रु० के परिसम्पत्ति वर्ग में वर्गीकृत किया गया है। ये दो श्रेणियाँ (कृषि श्रमिक परिवार तथा अन्य परिवार) मिलकर ग्रामीण परिवारों का 22 प्रतिशत है। किन्तु कारीगरों की स्थिति जो सभी ग्रामीण परिवारों का केवल 1.6 प्रतिशत है, गैर-कृषक परिवारों की अन्य श्रेणियों से थोड़ा बेहतर है चूंकि उनमें से केवल 40 प्रतिशत 5000 रु० तक के परिसम्पत्ति वर्ग से संबंधित है।

2.4.4 शहरी क्षेत्र में, परिवार द्वारा धारित परिसम्पत्ति आकार के आकार वर्ग के दो उत्कट सिरों में परिवारों की प्रतिशतता की तुलना ग्रामीण क्षेत्र से अधिक की जाती है जबकि मध्यम वर्ग में प्रतिशतता ग्रामीण क्षेत्रों में अधिक है। 1000 रु० मूल्य से कम मूल्य की परिसम्पत्ति रखने वाले शहरी परिवारों की प्रतिशतता 14.5 है जो इसी सम्पत्ति वर्ग में आने वाले ग्रामीण परिवारों से लगभग द्वाि गुणा अधिक है। परिवार द्वारा धारित 1 लाख रु० अथवा इससे अधिक की परिसम्पत्ति के आकार कोष्ठक के अन्य सिरे पर, शहरी परिवारों का समाहण ग्रामीण परिवारों के मुकाबले बहुत अधिक है ग्रामीण क्षेत्र में 7.95 के मुकाबले शहरी क्षेत्र में इस परिसम्पत्ति वर्ग से संबंधित परिवारों की प्रतिशतता 9.60 है।

2.4.5 शहरी क्षेत्र के अन्दर ही, 5000 रु० तक के परिसम्पत्ति वर्ग में आने वाले परिवारों की प्रतिशतता, स्वतः रोजगार परिवारों से भिन्न परिवारों की अपेक्षा स्वतः रोजगार परिवारों में कम है। परिवारों के दो वर्गों के बीच, स्वतः रोजगार वर्ग इन अर्थों में बेहतर निष्पादन प्रदर्शित करता है कि प्रति स्वतः रोजगार परिवार, परिसम्पत्तियों का औसत मूल्य स्वतः रोजगार भिन्न परिवारों (33456 रु०) की अपेक्षा बहुत अधिक (55322 रु०) है। वास्तव में, स्वतः रोजगार परिवार, जो समस्त शहरी परिवारों का 33 प्रतिशत है, के पास कुल परिसम्पत्तियों का 44 प्रतिशत भाग है। परिसम्पत्ति के स्वामित्व की दृष्टि से स्वतः रोजगार परिवारों में से उन परिवारों की दशा सबसे खराब है जो "उत्पादन कामगारों आदि" के रूप में कार्यरत है। इन परिवारों द्वारा धारित परिसम्पत्ति का पैटर्न लगभग स्वतः रोजगार परिवारों जैसा ही है, यद्यपि परिवारों के 7 से 36 प्रतिशत परिवारों को विभिन्न स्वतः रोजगार वर्गों के 5000 रु० अथवा इससे कम की परिसम्पत्ति वर्ग में सूचित किया गया है, उत्पादन सम्बन्धी कामगारों के अन्तर्गत परिवारों के वर्ग द्वारा अधिकतम प्रतिशतता की रिपोर्ट 36 प्रतिशत दी गई है इसके पश्चात् सेवा आदि कामगारों "के वर्ग द्वारा (34 प्रतिशत) दी गई है। यह उल्लेखनीय है कि "शहरी क्षेत्र" किसानों की स्थिति परिसम्पत्तियों के संचित मूल्य की दृष्टि से सबसे अच्छी प्रतीत होती है। किसान परिवारों की प्रतिशतता नीचे के तीन परिसम्पत्ति वर्गों में किसान परिवारों की प्रतिशतता सबसे कम है और फिर 10,000-20,000 रु० के मध्यम वर्ग को छोड़कर अन्य सभी परिसम्पत्ति वर्गों में सबसे अधिक है जहाँ "लिपिकीय कामगारों" के परिवार समूह के (22 प्रतिशत) अंकड़े सबसे अधिक है।

### ऋणग्रस्त परिवारों का अनुमान :

जैसा कि पहले उल्लेख किया गया है, इस रिपोर्ट में परिवारों की ऋणग्रस्तता पर आधारित अनुमान भी शामिल हैं। समस्त परिवारों के सम्बन्ध में ऋणग्रस्त परिवारों की प्रतिशतता, प्रमुख राज्यों तथा समस्त भारत के परिवारों के प्रमुख प्रकारों के अनुसार प्रति ऋणग्रस्त परिवार औसत राशि सारणी (viii) में प्रस्तुत की गई है। 37वें दौर सर्वेक्षण के परिणाम दर्शाते हैं कि समस्त भारत स्तर पर सभी परिवारों के सम्बन्ध में ऋणग्रस्त परिवारों की प्रतिशतता ग्रामीण क्षेत्र में लगभग 20 और शहरी क्षेत्र में 17 है। प्रति ऋणग्रस्त परिवार, ऋण का औसत मूल्य शहरी क्षेत्र की अपेक्षा ग्रामीण क्षेत्र में बहुत कम है, उसका मूल्य ग्रामीण तथा शहरी क्षेत्र में क्रमशः 3311 रु० तथा 5930 रु० है।

2.5.1 ग्रामीण भारत के राज्यों में, ऋणग्रस्त परिवारों की अधिकतम प्रतिशतता तमिलनाडु (28.69) और केरल (28.46) तथा इसके बाद आन्ध्र प्रदेश (26.47) और राजस्थान (24.74) देखी गई है। असम (4.81) और जम्मू तथा कश्मीर (8.91) ऋणग्रस्त परिवारों की बहुत कम प्रतिशतता की रिपोर्ट देते हैं। केरल (29.72), तमिलनाडु (25.86) तथा आन्ध्र प्रदेश (22.71) शहरी क्षेत्र में भी शीर्षस्थ है। इस क्षेत्र में भी, असम (4.34) का स्थान सबसे नीचे है तथा इसके पश्चात् है हिमाचल प्रदेश (6.64) जम्मू तथा कश्मीर (7.19) और हरियाणा (7.83) है।

2.5.2 जहाँ तक प्रति ऋणग्रस्त परिवार ऋण की औसत राशि का संबंध है, दो कृषि सम्पन्न राज्य, हरियाणा और पंजाब ग्रामीण क्षेत्र में क्रमशः 9122 रु० तथा 7911 रु० की दो उत्तरोत्तर अधिकतम औसत दर्शाते हैं। इसके विपरीत पूर्वी क्षेत्रों के राज्यों में निम्नतम औसत देखी गई है अर्थात् असम (1070 रु०), बिहार (1575 रु०), पश्चिम बंगाल (1663 रु०) और उड़ीसा (1723 रु०) शहरी क्षेत्र में, हरियाणा 10174 रु० का उच्चतम औसत दर्शाता है, इसके पश्चात् केरल (9728 रु०) और गुजरात (9441 रु०) जबकि पश्चिम बंगाल, उत्तर प्रदेश और बिहार की औसत क्रमशः 3720 रु०, 4063 रु० तथा 4807 रु० होने के कारण, ये सबसे नीचे हैं।

2.5.3 ग्रामीण क्षेत्र के अन्दर ही, ऋणग्रस्तता का फैलाव, हिमाचल प्रदेश को छोड़कर, जहाँ समस्त परिवारों के संबंध में ऋणग्रस्त परिवारों की प्रतिशतता दोनों प्रकार के परिवारों के लिए लगभग समान है, सभी राज्यों में गैर-कृषक परिवारों की अपेक्षा कृषक परिवार में अधिक है। कृषक परिवारों की तुलना में भी प्रति ऋणग्रस्त परिवार ऋण की औसत राशि सभी राज्यों में गैर-कृषक परिवारों में बहुत कम है। किन्तु कृषक परिवारों की तुलना में गैर-कृषक परिवारों द्वारा धारित औसत परिसम्पत्ति की कम राशि की दृष्टि में रखते हुए, जैसा कि पहले देखा गया है, ऋण का बोझ, (अर्थात् परिसम्पत्ति के अनुपात में ऋण) कृषक परिवारों की अपेक्षा गैर-कृषक परिवारों पर अधिक है जैसा कि सारणी (xi) से देखा जा सकता है।

2.5.4 हालांकि शहरी क्षेत्र में स्व-नियोजित एवं "अन्य प्रकार के परिवारों" में ऋणग्रस्त परिवारों की प्रतिशतता लगभग उसी क्रम में अधिक या कम है, तथा राष्ट्रीय स्तर पर स्व-नियोजित प्रति ऋणग्रस्त परिवार के ऋण की औसत राशि गैर-स्व-नियोजित "परिवारों के लिए प्राप्त औसत राशि का लगभग दुगुना है। फिर भी राज्यों में ऋणग्रस्त परिवारों की प्रतिशतता एवं ऋण की औसत राशि दोनों के मामले में व्यापक अन्तर पाया गया है। केरल, महाराष्ट्र, उड़ीसा, राजस्थान एवं पश्चिम बंगाल के "अन्य परिवारों" में ऋणग्रस्तता का विस्तार अधिक है अतः उक्त प्रतिशतता शेष "12 राज्यों में स्व-नियोजित परिवारों में अधिक है। ऋण की औसत राशि के मामले में बिहार एवं हरियाणा दो ही ऐसे संभावित राज्य हैं जो कि "अन्य परिवारों" के लिए उच्चतर औसत दर्शाते हैं जबकि शेष 15 राज्यों में स्व-नियोजित परिवारों के लिए औसत अपेक्षाकृत अधिक है।

2.5.5 वर्तमान सर्वेक्षण परिणामों की, रा० प्र० सर्वे के 26वें दौर के साथ की गई तुलना, जो सारणी (ix) में दी गई है वह दर्शाती है कि रा० प्र० सर्वे के 37वें दौर में ग्रामीण क्षेत्र में ऋणग्रस्त परिवारों की प्रतिशतता काफी कम हुई है जो 42.87 से घटकर 19.97 रह गई। यद्यपि नकद ऋण दशनि वाले ग्रामीण परिवारों के अनुपात में ह्रास की प्रवृत्ति पहले से ही वर्ष 1962 एवं 1971 के बीच 62.8 प्रतिशत से घटकर 41.3 प्रतिशत पाई गई थी अखिल भारतीय स्तर पर वर्तमान दौर के अनुमान अविश्लेष्य रूप में कम प्रतीत होते हैं जो कि 1971 में हुए सर्वेक्षण (रा० प्र० सर्वे का 26वां दौर) से प्राप्त होने वाले अनुमानों के आधे से भी कम है। अतः यह संदेह होता है कि क्या ऋणग्रस्त परिवार जांच अनुसूची में समुचित रूप से सूचित थे। परन्तु सारणी (ix) से यह देखा गया कि ऋणग्रस्त परिवारों की प्रतिशतता ग्रामीण क्षेत्र में राज्य स्तर पर सभी परिवारों के लिए रा० प्र० सर्वे के 26वें दौर की अपेक्षा समान रूप से कम है। फिर भी चूंकि रा० प्र० सर्वे के 26वें दौर के सर्वेक्षण परिणाम प्रकाशित नहीं हुए हैं इसलिए शहरी क्षेत्र के लिये इस प्रकार की तुलना नहीं की जा सकती।

2.5.6 सारणी (ix) में प्रस्तुत किए गए अनुमान केन्द्रीय एवं राज्य प्रतिदर्शों द्वारा एकत्रित आंकड़ों पर आधारित है। रा० प्र० सर्वे के 37वें दौर के अनुमानों की अनिश्चितता की सीमा के बारे में निश्चित विचार जानने के लिये केन्द्रीय प्रतिदर्श एवं राज्य प्रतिदर्श संबंधी आंकड़ों पर आधारित अनुमान सारणी (x) में प्रस्तुत किये गये हैं। तथापि कुछ प्रमुख विशेषताओं के बारे में चराकों के गुणांक खण्ड 4 में दिये गये हैं।

केन्द्रीय प्रतिदर्श एवं राज्य प्रतिदर्श में से कुल परिवारों में से निकाली गई ऋणग्रस्त परिवारों की प्रतिशतता ग्रामीण एवं शहरी दोनों क्षेत्रों में अखिल भारतीय स्तर पर एक दूसरे से अधिक निकट प्रतीत नहीं होती है। सारणी (x) में यह पाया गया कि अखिल भारतीय स्तर पर केन्द्रीय प्रतिदर्श एवं राज्य प्रतिदर्श से संबंधित उक्त प्रतिशततायें ग्रामीण क्षेत्र में क्रमशः 23.54 एवं 16.53 तथा शहरी क्षेत्र में क्रमशः 20.11 एवं 14.62 हैं। राज्य स्तर पर जबकि दो अनुमान ग्रामीण क्षेत्र में, असम, गुजरात, हिमाचल प्रदेश, जम्मू व कश्मीर, मध्य प्रदेश, महाराष्ट्र, एवं उत्तर प्रदेश में तथा शहरी क्षेत्र में असम, हिमाचल प्रदेश, जम्मू व कश्मीर, केरल एवं उत्तर प्रदेश में एक दूसरे से काफी मेल खाते हैं ये शेष अधिकांश राज्य में काफी भिन्न है। फिर भी राज्य प्रतिदर्श अनुमानों

की तुलना में केन्द्रीय राज्य अनुमान, सामान्य रूप से अधिक है ये सारणी (x) में दिये गये रा० प्र० सर्वे के 26 वें दौर से प्राप्त अनुकूल अनुमानों की, अपेक्षा काफी कम हैं।

2.5.7 कुल परिसम्पत्ति के मूल्य की भांति दशक के दौरान ग्रामीण क्षेत्र में प्रति परिवार ऋण की औसत राशि में वृद्धि हुई है। सभी परिवारों में प्रति परिवार ऋण की औसत राशि वर्ष 1971 में (रा० प्र० सर्वे का 26वां दौर) 5.3 रुपए के स्थान पर वर्ष 1981 में (रा० प्र० सर्वे का 37वां दौर) 661 रु० हो गई। तथापि कुल प्रतिशत ऋण में होने वाली वृद्धि ग्रामीण क्षेत्र में कुल परिसम्पत्तियों के कुल मूल्य में होने वाली वृद्धि के अनुपात की तुलना में अपेक्षाकृत कम है और इसलिए ऋण परिसम्पत्ति का अनुपात सारणी (xi) गैर-खेतिहरों के लिये महाराष्ट्र के मामले को छोड़कर खेतिहरों के साथ-साथ गैर-खेतिहरों दोनों के लिये सभी राज्यों में विचारणीय ह्रास हुआ है। ग्रामीण क्षेत्र में अखिल भारतीय स्तर पर शेष अर्थात् समस्त परिवारों के लिये ऋण परिसम्पत्ति अनुपात सभी परिवारों के लिये वर्ष 1971 में 4.43 प्रतिशत के स्थान पर वर्ष 1981 में कुल परिसम्पत्तियों के कुल मूल्य का 1.83 प्रतिशत रहा है। खेतिहरों के विषय में ऋण परिसम्पत्ति अनुपात समस्त परिवारों के लिए कम अथवा अधिक है। ग्रामीण परिवारों के सामान्य आर्थिक प्रतिदर्श की सुनिश्चितता में ऋण परिसम्पत्ति अनुपात खेतिहरों की अपेक्षा गैर-खेतिहरों के लिए अधिक पाया गया।

भारतीय रिजर्व बैंक द्वारा प्रकाशित "ग्रामीण परिवारों की ऋणग्रस्तता एवं संस्थागत वित्त की उपलब्धता" नामक विनिबन्ध यह उल्लेख करता है कि देश के ग्रामीण क्षेत्र के लिये खेतिहरों के विषय में ऋण परिसम्पत्ति अनुपात वर्ष 1962 एवं 1971 के बीच कुल मिलाकर 7 प्रतिशत से 4 प्रतिशत तक घटा है। इस प्रकार यह निष्कर्ष निकाला जा सकता है कि ऋण (ऋण परिसम्पत्ति अनुपात) भार में ह्रास की प्रवृत्ति पिछले दो दशकों से जारी है।

2.5.8 ग्रामीण परिवारों की तुलना में शहरी परिवारों के लिये ऋण भार अधिक है तथा ग्रामीण क्षेत्र अखिल भारतीय स्तर पर ऋण परिसम्पत्ति अनुपात में 1.8 प्रतिशत के स्थान पर 2.5 प्रतिशत रहा। कर्नाटक एवं तमिलनाडु जहां ग्रामीण परिवारों पर ऋण का अधिकतर भार दर्शाया गया है को छोड़कर सभी राज्यों में शहरी क्षेत्र में कथित अनुपात अधिक है।

X फिर भी गैर-खेतिहर परिवारों के लिये पिछले दस वर्षों के दौरान यह अनुपात 2.28 प्रतिशत से घटकर 8.42 प्रतिशत रह गया। ऋण परिसम्पत्ति अनुपात=स्वामित्व में की गई परिसम्पत्ति की राशि की प्रतिशतता के रूप में सुनिश्चित ऋण की राशि।

### 3. प्रतिदर्श अभिकल्प एवं प्राक्कलन पद्धति :

#### 3.1 प्रतिदर्श अभिकल्प

3.1.1 वृहत् अभिकल्प: प्रत्येक संस्तर में दो चरणों वाले प्रतिचयन सहित वृहत् प्रतिदर्श अभिकल्प स्तरीकृत किया गया। अधिकांश जिलों में ग्रामीण क्षेत्र में एक चरण वाले यूनिट वर्ष 1981 की जनगणना के अन्तर्गत आने वाले गांव थे। परन्तु कुछ मामलों में जहां न तो वर्ष 1981 में जनगणना हुई थी अथवा नहीं गणना किये गये गांवों का ढांचा समय पर प्राप्त हो सकता था वहां वर्ष 1971 में गणना किये गये गांव प्रयोग में लाये गये थे। शहरी क्षेत्रों में इस प्रकार के मामलों में गणना (1981) खण्ड प्रथम चरण की इकाइयां थीं। दो चरणों वाली इकाइयां, ग्रामीण एवं शहरी दोनों क्षेत्रों में परिवार ही थे।

3.1.2 क्षेत्र एवं संस्तर: प्रत्येक राज्य/संघ शासित क्षेत्र को कुछ कृषि आधिक क्षेत्रों में विभक्त किया गया था जिसमें निकटस्थ जिलों को आबादी की सघनता एवं फसल प्रतिदर्श के आधार पर समूहीकृत किया गया। गुजरात, में सूखे क्षेत्रों की स्थिति पर विचार करने के लिये तथा राज्य में जनजातीय आबादी के वितरण के उद्देश्य से कुछ जिलों को विखंडित किया गया। इस प्रकार सम्पूर्ण भारत में (रा० प्र० सर्वे के अन्तर्गत समाश्रित क्षेत्रों को छोड़कर) कम निर्मित क्षेत्रों की कुल संख्या 77 थी। ग्रामीण क्षेत्रों में प्रतिचयन के लिये प्रत्येक क्षेत्र में आधारभूत संस्तरों का निर्माण किया गया। गुजरात एवं अरुणाचल प्रदेश में जहां 15 लाख से कम आबादी वाले कुछ जिलों को दो अथवा दो से अधिक आधारभूत संस्तरों में विभक्त किया गया था, को छोड़कर 1971 में हुई जनगणना के अनुसार प्रत्येक जिले में 15 लाख से भी कम ग्रामीण आबादी से स्वयं ही एक आधारभूत संस्तर का निर्माण होता है। 15 लाख से अधिक ग्रामीण आबादी वाले जिलों को निकटवर्ती तहसीलों का समूहीकरण करने के साथ-साथ फसल प्रतिदर्श एवं ग्रामीण आबादी की सघनता के विषय में आधारभूत संस्तरों (जनसंख्या पर आधारित) में विभक्त किया गया था। सामान्यतः अहमदाबाद बंगलौर एवं कानपुर जिलों को छोड़कर उसी क्षेत्र में प्रत्येक शहरी स्तर एक जिला अथवा जिलों का समूह था। इन सभी मामलों में से प्रत्येक मामले में जिले को दो संस्तरों में विभाजित किया गया जिसमें नगर स्वयमेव एक संस्तर बनाता है। इस व्यवस्था से 1971 की जनगणना के अनुसार दस लाख से अधिक जनसंख्या वाला प्रत्येक शहर एक अलग संस्तर बनाता है और शेष नगर सम्पूर्ण जिले होते हैं। वे नगर बम्बई, दिल्ली, हैदराबाद और मद्रास हैं। ग्रामीण और शहरी संस्तरों की कुल संख्या क्रमशः 497 एवं 363 थी।

3.1.3 आबंटन: राज्य स्तर के आबंटन, उनके अन्वेषकों की उपलब्ध संख्या और प्रति अन्वेषक के संभावित कार्यभार के आधार पर निर्धारित किये गये थे। इन्हें 1981 की जनगणना में ग्रामीण क्षेत्र के मकान-सूचीकरण खण्डों की कुल संख्या तथा शहरी क्षेत्र के ढांचे में खण्डों की कुल संख्या के अनुपात में पुनः आबंटित किया गया (असम के मामले में ग्रामीण आबंटन, 1971 की जनगणना में ग्रामीण जनसंख्या के अनुपात में था)। इन्हें क्षेत्र संकार्य प्रभाग के प्रत्येक उप-क्षेत्र की संख्या के अनुसार समायोजित किया गया। स्तर आबंटनों के अन्तिम संस्तर दो के गुणांक में पूर्णांकित किये गये थे।

3.1.4 गांवों का प्रतिचयन: प्रतिदर्श गांवों को मकान-सूचीकरण खण्डों की संख्या और प्रतिस्थापन की संभाव्यता अनुपात से चुना गया था। 1971 की जनगणना ढांचे से चुने गये गांवों के मामले में प्रतिदर्श गांव, आकार के संभाव्यता अनुपात और प्रतिस्थापन के अनुसार चुना

गया था जहां आकार 1971 की जनगणना की जनसंख्या से संबंधित था। यह चयन दो स्वतन्त्र उपप्रतिदर्शों के रूप में किया गया था।

3.1.5 राजस्व ग्राम चयन: जब प्रतिदर्शित जनगणना गांव का पता लगाना संभव नहीं था तब स्थिति के अनुसार निम्नलिखित में से एक पद्धति को अपनाया जाता था: (क) जनगणना गांव में पूर्ण रूप से अथवा आंशिक रूप से शामिल किये गये सभी राजस्व गांवों का एक यूनिट के रूप में सर्वेक्षण किया गया अथवा (ख) राजस्व गांव का पूर्ण रूप से सर्वेक्षण किया गया जिनमें चुनिन्दा गणना गांव और सभवतः अन्य जनगणना गांव शामिल थे।

3.1.6 खण्डों का प्रतिचयन: शहरी ढांचा सर्वेक्षण-1977 योजना के सर्वेक्षित शहरी ढांचे खण्ड जहां कहीं भी उपलब्ध है और शेष नगरों के लिये 1972-77 अवधि के शहरी ढांचा सर्वेक्षण खण्ड और नए नगरों के मामले में 1981 के गणना ढांचे खण्डों के चयन के लिये प्रतिचयन ढांचा बनाते थे। प्रत्येक शहरी संस्तर में प्रतिदर्श खंड दो स्वतंत्र उप प्रतिदर्शों के रूप में बिना प्रतिस्थापन के साधारण यादृच्छिक प्रतिचयन के द्वारा चुने गये थे।

3.1.7 खेड़ा-समूह एवं उप-खण्ड चयन: यदि किसी प्रतिदर्श गांव अथवा खण्ड की वर्तमान जनसंख्या 1200 अथवा अधिक हो तो उसे दो अथवा अधिक समान (जनसंख्या के अनुसार (उप-प्रभागों) जिन्हें गांवों के मामले में खेड़ा समूह और शहरी खण्डों के मामले में उप-खण्ड कहा गया) में विभाजित किया गया, उप-प्रभागों की संख्या अन्वेषक के दौरे के समय गांव अथवा खण्ड की जनसंख्या पर निर्भर थी।

3.1.8 परिवारों (ग्रामीण) का प्रतिचयन: प्रत्येक प्रतिदर्श गांव के परिवारों को उनके भूमि अधिकृत क्षेत्र के अनुसार चार उप-संस्तरों में बांटा गया था। 0.05 एकड़ से कम भूमि रखने वाले परिवारों को उप-संस्तर-1 में रखा गया। शेष परिवारों को उनके भूमि अधिकृत क्षेत्र के अनुसार प्रथम माना गया और इसके बाद प्रत्येक गांव के लिये दो सीमा बिन्दु क और ख निर्धारित करके तीन उप-संस्तरों में विभाजित किया गया ताकि भूमि अधिकृत क्षेत्र का योग प्रत्येक उप-संस्तर के लिये लगभग समान हो। (i) 0.05 से क, (ii) क से ख और (iii) ख से अधिक भूमि रखने वाले परिवार क्रमशः उप-संस्तर 2, 3 और 4 का निर्माण करते हैं। यादृच्छिक शुरुआत के लिये क्रमबद्ध वतुल रूप से प्रत्येक उप-संस्तर परिमण्डल से दो परिवारों को चुना गया। उप-संस्तर 1 के परिवारों को प्रतिदर्श चयन से पूर्व उनकी आजीविका के साधनों (कृषि श्रमिक, कास्तकार और अन्य) के अनुसार व्यवस्थित किया गया।

3.1.9 परिवारों (शहरी) का प्रतिचयन: प्रतिदर्श खंड के परिवारों में खण्ड को उनके मासिक प्रति व्यक्ति व्यय के अनुसार तीन उप-संस्तरों में विभाजित किया गया। उनके लिये सीमा बिन्दु राज्य स्तर पर निर्धारित किये गये। प्रत्येक उप-संस्तर में वतुल क्रमबद्ध रूप से दो परिवारों को चुना गया। ग्रामीण एवं शहरी दोनों क्षेत्रों में उन्हीं प्रतिदर्श परिवारों का दोनों दौरों में सर्वेक्षण किया गया।

#### 3.2 प्राक्कलन पद्धति

##### 3.2.1 संकेतन:

s : संस्तर के लिये उपलिपि

t : पर उप-संस्तर (एक गांव/खण्ड के अन्तर्गत) के लिये उपलिपि

- j : प्रतिदर्श खण्ड/गांव के लिये उपलिपि
- J : jth प्रतिदर्श परिवारों के लिये उपलिपि
- L : राज्य में ग्रामीण/शहरी संस्तरों की कुल संख्या ।
- Z : (प्रतिचयन के लिए भयोज किया गया) गांव आकार
- Z : ग्रामीण संस्तरों का कुल आकार
- N : एक शहरी संस्तर में खण्डों की कुल संख्या ।
- D : खण्डों की बनाए गए खेडा समूहों/उपखण्डों की संख्या ।
- m : जनशून्य एवं शून्य मामलों सहित सर्वेक्षित गांवों/खण्डों की सं०
- H : एक उप-संस्तर में परिवारों की कुल संख्या ।
- h : एक उप-संस्तर में सर्वेक्षित परिवारों की संख्या ।
- f : राजस्व गांव के सर्वेक्षण के लिए समायोजन तत्व ।
- Y : विशेषता का मूल्य ।
- Y : राज्य स्तर पर Y का उपयोग

$\hat{Y}$  : प्रतिदर्श से Y का अनुमान

$\hat{Y}$  : की अभिव्यक्तियां अगले भाग में दी गई हैं ।

3.2.2 ग्रामीण क्षेत्र

$$\hat{Y} = \sum_{S=1}^L \frac{Z_s}{ms} \sum_{L=1}^{ms} \frac{D_{si}}{f_{si}} \sum_{Z_{sit}=1}^4 \frac{H_{sit}}{h_{sit}}$$

जहां गांव के tth उप संस्तर में परिवारों की कुल संख्या H sit थी और सारणीयन के लिए उपलब्ध सर्वेक्षित परिवारों की संगत संख्या h sit थी ।

3.2.5 शहरी क्षेत्र

$$\hat{Y} = \sum_{S=1}^L \frac{N_s}{ms} \sum_{L=1}^{ms} D_{si} \sum_{L=1}^3 \frac{h_{sit}}{h_{sit}} \sum_{j=1}^h y_{sit},$$

3.2.4 अनुपातों का अनुमान राज्यों/अखिल भारतीय स्तर पर लक्षण Y और X के योगों को Y और X मानो । तब अनुपात  $R = Y/X$  के अनुमान निम्नलिखित रूप में प्राप्त होंगे ।

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

जहां  $\hat{Y}$  और  $\hat{X}$  क्रमशः Y और X के निष्पदा अनुमान हैं ।

3.2.5 उप प्रतिदर्शवार अनुमान : उप-प्रतिदर्शवार अनुमानों को संबंधित उप-प्रतिदर्श में सर्वेक्षित गांवों और खण्डों के आधार पर संगणकीकृत किया गया । इस प्रकार उपर्युक्त सूत्र में ms का अर्थ संबंधित संस्तर के उप प्रतिदर्श में सर्वेक्षित गांवों/खण्डों की संख्या होगा । सम्पूर्ण प्रतिदर्श पर आधारित पूरे संस्तर का संयुक्त आकलन उप-प्रतिदर्श वार अनुमानों के भारित साधन के रूप में परिकल्पित किया गया था जिसमें सम्बद्ध उप प्रतिदर्शों से अनेक भारित प्रतिदर्श गांव/खण्डों का सर्वेक्षण किया गया । समस्त विशेषताओं वाले राज्य (अथवा अखिल भारत) का संयुक्त आकलन कुल सम्बद्ध संस्तर के अनुमानों के रूप में प्राप्त हुआ था । तथापि अनुपात के संयुक्त अनुमानों की राज्य/अखिल भारतीय स्तर पर अंश और हर के संयुक्त अनुमान के अनुपात के रूप में गणना की गई ।

4. कुछ खास-खास मदों के अनुमान की प्रतिचयन त्रुटियां ।

4.1.1 ऋण एवं लागत सर्वेक्षण में कुछ 14 खास-खास मदों के अनुमानों की प्रतिचयन त्रुटियां इस परिशिष्ट की सारणी (1) व (2) में प्रस्तुत की गई हैं। सारणी (1) अखिल भारतीय ग्रामीण अनुमानों की त्रुटियां दर्शाती हैं जबकि सारणी (2) सदृश शहरी अनुमानों की त्रुटियां दर्शाती हैं। त्रुटि गणना के लिए चुनी गईं मदें नीचे दी गई हैं।

- मद 1 : देय बकाया नकद रकम दर्शाने वाले परिवारों का अनुपात
- मद 2 : प्रांत परिवार देय बकाया नकद रकम का मूल्य
- मद 3 : प्रति परिवार कुल परिसम्पत्ति का औसत मूल्य
- मद 4 : प्रति परिवार स्वामित्व में लाई गई भूमि का औसत मूल्य
- मद 5 : प्रति परिवार आवासीय भवन का औसत मूल्य
- मद 6 : प्रति परिवार पशुपालन एवं कुकुट्टादि औसत मूल्य
- मद 7 : प्रति परिवार कृषि कार्यान्वयन का औसत मूल्य
- मद 8 : प्रति परिवार कृषि प्रयोग में न लाए जाने वाले उपस्करों का मूल्य
- मद 9 : प्रति परिवार परिवहन उपस्करों का औसत मूल्य
- मद 10 : प्रति परिवार स्थायी परिसम्पत्ति का औसत मूल्य
- मद 11 : प्रति परिवार समस्त शेयरों को का औसत मूल्य
- मद 12 : प्रति परिवार अन्य वित्तीय परिसम्पत्तियों का औसत मूल्य
- मद 13 : स्वामित्व धीन भूमि दर्शाने वाले परिवारों का अनुपात
- मद 14 : आवासीय भवन दर्शाने वाले परिवारों का अनुपात

4.1.2 चराकों के गुणाकों की शब्दावली में प्रतिचयन त्रुटियों की व्याख्या की अभिव्यक्ति की गई है जिनकी निम्नलिखित रूप में संस्तर के स्तर पर उप प्रतिदर्श वार अनुमानों के आधार पर गणना की गई है।

चरांक Y का जीइ s th संस्तर के निष्पन्न अनुमान  $\hat{y}_{sb}$  है जो कि उप प्रतिदर्श p th ( $s=1, 2, \dots, L$ ;  $p=1, 2, \dots, k$  Say) से प्राप्त हुए हैं। माना  $\hat{y}_{sb}$  संस्तर के—उप प्रतिदर्श p th में प्रथम चरण की इकाइयों में msp प्रतिदर्श निहित है। तत्पश्चात् समस्त भारत के जीइ के संयुक्त अनुमानों की निम्नप्रकार से गणना की गई

$$\hat{y} = \sum_{s=1}^L \sum_{p=1}^k W_{sp} \hat{y}_{sp} \dots \dots \dots (1)$$

जहां

$$W_{sp} = \frac{msp}{\sum_{p=1}^k msp}$$

इसी प्रकार दूसरी विशेषता X का अनुमानित जोड़  $\hat{X}$  है तो  $R = \frac{\hat{y}}{\hat{X}}$  के अनुपात अनुमान  $\hat{R} = \frac{\hat{Y}}{X} \dots \dots \dots (2)$

\*केन्द्रीय एवं राज्य प्रतिदर्शों के आधार पर एकत्र किए गए आंकड़ों पर आधारित है।

$\hat{Y}$  एवं  $\hat{R}$  की विभिन्नताओं के अनुमान की नीचे दी गई अभिव्यक्तियों

द्वारा गणना की गई है।  $\hat{Y} (Y) = \sum_{S=1}^L \frac{1}{\sum_{R^z} (K-1)p > q} \sum_{k}^k$

$$\left( \frac{\hat{Y}-Y}{sp} \right)^2 \dots \dots \dots (3)$$

$$\hat{Y} (\hat{R}) \sum_{S=1}^L \frac{1}{k^2(K-1)p > q} \sum_{k}^k \left[ \frac{\hat{Y}-Y}{sp} - \hat{R} \right] \left[ \frac{\hat{X}-X}{sq} \right]^2 \dots \dots \dots (4)$$

अगले चराकों (cv) के गुणाकों के निम्न प्रकार से अनुमानित किया गया है।

$$cv(\hat{Y}) = \frac{\sqrt{\hat{V}(\hat{Y})}}{\hat{Y}} \times 100\%$$

$$cv(\hat{R}) = \frac{\sqrt{\hat{V}(\hat{R})}}{\hat{R}} \times 100\%$$

पूर्वोलिखित प्रत्येक मद के लिए परिवार की विभिन्न श्रेणियों जैसे, (क) समस्त परिवार (ख) दस परिसम्पत्तियों रखने वाले वर्ग में प्रत्येक में पाए जाने वाले परिवार एवं ग्रामीण क्षेत्रों में परिवारों की भांति तथा शहरी क्षेत्र में स्वनियोजित गैर-स्व-नियोजित परिवारों की भांति परिवारिक ढांचे से संबंधित अनुमानों के लिए चराकों के गुणाकों की गणना की गई है।

4.1.3 सारणी (1) (ग्रामीण क्षेत्र) में चराकों के गुणाकों के अध्ययन से यह देखा गया है कि चराकों के गुणांक लघुतम परिसम्पत्ति रखने वाले वर्ग (केवल 1000 रुपए तक) एवं दो उच्चतम वर्गों यथा "10 लाख रुपए से 20 लाख रुपए तक" तथा "20 लाख रुपए और उससे अधिक" से सामान्यतः अधिक है। दो उच्चतम परिसम्पत्ति रखने वाले वर्गों के लिए अनुमानों की प्रतिचयन संबंधी बड़ी त्रुटियां इन दो वर्गों के साथ-साथ लघु प्रतिदर्श आकार (समस्त ग्रामीण भारत में क्रमशः केवल 150 एवं 31 परिवार) के परिवारों द्वारा स्वामित्व में ली गई परिसम्पत्तियों के मूल्यों के अन्त-निहित चराकों के कारण हैं। परन्तु निर्धनतम परिवारों का प्रतिनिधित्व करने वाले निम्नतम वर्ग (मध्यमवर्गीय तुलना में) में बड़ी त्रुटियों के कारण स्पष्ट नहीं है। इस परिसम्पत्ति समूह में विभिन्न मदों को दर्शाने वाले परिवारों के अनुपात में एक कारण अपेक्षाकृत छोटा है।

4.1.4 खेतिहर एवं गैर-खेतिहर परिवारों के विषय में अनुमानों की प्रतिचयन त्रुटियां खेतिहर परिवारों के लिए समान रूप से कम हैं जो कि जो परवर्ती वर्ग से 11,207 परिवारों के स्थान पर भूतपूर्व वर्ग से अत्यधिक बड़े प्रतिदर्श आकार (49,950 परिवारों) के कारण संभव हुआ है।

यहां यह उल्लेखनीय है कि प्रति परिवार द्वारा धारित कुल परिसम्पत्ति का औसत मूल्य खेतिहरों एवं गैर खेतिहर परिवारों के लिए क्रमशः 44,524 रुपए एवं 8,973 रुपए हैं।

शहरी अनुमानों के प्रतिचयन संबंधी त्रुटियों के बारे में प्रतिदर्श, पूर्ण रूप से ग्रामीण अनुमानों के अनुकूल ही है। अर्थात् लघुतम परिसम्पत्ति रखने वाले वर्ग की भांति ही दो अधिकतम वर्गों के लिए भी त्रुटियां (चरांकों के गुणांकों की शब्दावली में) सामान्यतः बड़ी है। तथा, "स्वतः नियोजित एवं जो स्वतः नियोजित परिवारों से भिन्न परिवारों की दोनों उसी श्रेणियों के लिए त्रुटियां अधिकांश मदों के लिए पूर्ण रूप से क्रम में हैं।

4.1.5 चरांको के गुणांक कुछ एक वर्गों में 0.00 के रूप में स्पष्ट हुए हैं। यह दशमलव के दो स्थानों तक बहुत छोटे आंकड़ों के आस पास होने के कारण है।
