PART I

ARTICLES/NOTES

1. A note on employment-unemployment situation of scheduled tribe and scheduled caste population during early eighties :
NSS 38th round (January-December 1983)
2. A note on pattern of consumer expenditure of households self-employed in agriculture, and of agricultural and rural labour households :
NSS 38th round (January-December 1983)

Highlights of Next Issue : 38th Round NSS results on

- (i) Monthly percapita consumption of cereals for various sections of population.
- (ii) Per capita and per consumer unit per diem intake of calorie protein and fat and perceptions of the people on adequacy food.

A NOTE ON EMPLOYMENT—UNEMPLOYMENT SITUATION OF SCHEDULED TRIBE AND SCHEDULED CASTE POPULATION DURING EARLY EIGHTIES

Section 1

INTRODUCTION

1.1 The National Sample Survey Organisation carried out the third country wide quinquennial survey on employment and unemployment in its 38th round survey operations (January-December 1983). In the survey, for each household, information regarding the social group (Scheduled tribe, Scheduled caste, Neo-Buddhists & Others) to which the household belongs was also collected. Some selected tables giving key indicators of employment and unemployment cross classified with the information on 'social group' were also generated as a part of the overall tabulation programme for the 38th round employment-unemployment survey. This report¹ is based on the key tables thus generated from the central sample data for the different social groups.

1.2 Summary results for all-India and the different states/union territories are presented in section 2. Corresponding detailed tables for all-India are presented in part II. Details of the sampling design, survey coverage, estimation procedure and salient features of the conceptual frame and data collection procedure adopted in the survey are given in the Report containing the all-India results (Report No. 341), released in Sarvekshana vol.XI No.4-April 1988 (Issue No.-35). A brief summary of the scope and coverage of the survey, the concepts and definitions etc., however, is given below.

1.3 *Geographical Coverage* : The survey covered the whole of Indian Union excepting (i) Ladakh and Kargil districts of Jammu & Kashmir and (ii) rural areas of Nagaland. The report, however, excludes the results for Arunachal Pradesh and Lakshadweep.

1.4 *Sampling design and Sample size* : A stratified two-stage sampling design was adopted in the survey with census villages and urban blocks (Urban Frame Survey Blocks formed by NSSO) as the first stage units respectively for the rural and urban areas and households as the second stage units. Altogether, the survey covered about 1.2 lakh households spread over more

than 8600 sample villages and 4500 sample blocks. In each of the selected first stage units, 10 households were selected as second stage units.

1.5 *Survey period and sub-round formation* : The field work for the survey started in January, 1983 and was completed in December, 1983. The entire survey period of one year was divided into four sub-round periods of three months' duration coinciding approximately with the four agricultural seasons. The sub-round periods were January to March 1983, April to June 1983, July to September 1983 and October to December 1983. The sample villages and blocks were distributed over the four sub-rounds in a manner so as to provide valid estimates for each of the sub-round periods separately.

1.6 *Estimation procedure* : The estimation procedure adopted in the NSS 38th round is based on a weighted sum of the sample values. Denoting by Y , the unbiased estimate of Y (the state/region total of any variate), it is given by :

$$\hat{Y} = \sum_s \frac{P_s}{n_s} \sum_i \frac{D_{si}}{P_{si} \times C_{si}} \times \frac{H_{sj}}{h_{sj}} \sum_j y_{sij} \dots (1)$$

for the rural sectors, and

$$\hat{Y} = \sum_s \frac{N_s}{n_s} \sum_i D_{si} \times \frac{H_{sj}}{h_{sj}} \sum_j y_{sij} \dots (2)$$

for the urban sector, where

s , i and j are suffixes and stand for stratum, villages/urban block and household respectively;

P_s , N_s and n_s give the stratum values of population, number of villages/blocks in the frame and number of sample villages/blocks respectively;

D_{si} , C_s & P_{si} stand respectively for, number of hamlet-groups/ sub-blocks formed, number of census villages contained in a larger revenue

(1) This is one of the NSSO Report Series No. 341 based on the 38th round survey on employment and unemployment (central samples). All-India results have already been released in the mimeographed report No. 341. The state results are being released progressively one report for each state numbered 341/1, 341/2, ... etc.

village actually surveyed and the selection population of the sample village. H_{si}

H_{si} and h_{sj} stand for the total number of households listed and the number of sample households; y_{sij} is the observed value of the variate of a sample household.

Social group-wise estimates of Y are obtained by restricting the summation (Σ) to units belonging to the concerned social group within representing the number of such units. Estimates of ratios such as percentages, averages, etc., are obtained by first calculating the unbiased estimates of the numerators and denominators concerned and then by division.

1.7 *Salient features of the conceptual frame and data collection procedure*: The main objective of the survey was to measure, in quantitative terms, the nature and extent of employment and unemployment at disaggregated levels. To achieve this objective, the attempt in the survey was to classify the population as belonging to different activity categories, independently, by using three different approaches, namely (i) the usual status approach, (ii) the current weekly status approach and (iii) the current daily status approach. Persons distributed according to the various activity categories were further classified by several meaningful correlates, such as, age, sex, general and technical education, industry, occupation, etc. The different activity categories adopted for the purpose, were, as under.

Description of the activity category	Category code
1	2
Working with an employer under obligation but work not specifically compensated by any wage/salary	01—04
Worked (self-employed) in household enterprise	11
Worked as helper in household enterprise	21
Worked as regular salaried/wage employee	31
Worked as casual wage labour in public works	41
Worked as casual wage labour in other types of work	51
Did not work though there was work in household enterprise	61
Did not work but had regular salaried/wage employment	71
Sought work	81
Did not seek but was available for work	82
Attended educational institutions	91
Attended domestic duties only	92
Attended domestic duties and was also engaged in free collection of goods (vegetable, roots, fire-wood, cattle feed, etc.) sewing, tailoring, weaving, etc. for household use	93
Too young to work/to attend school/to seek employment	94
Old and disabled	95
Rentiers, pensioners, remittance recipients, etc.	96
Beggars, prostitutes, etc.	97
Others	98
Did not work due to temporary sickness (for casual workers only)	99

* The activity category codes 61, 71, 82 and 99 were used only for current status approach.

Persons assigned any one of the activities listed under the category codes 01 to 71 were treated as 'working' (or employed). Persons assigned activity category codes 81 or 82 were treated as 'seeking and/or available for work' (or unemployed). The remaining persons, i.e., the persons assigned any of the activity category codes 91 to 99 were treated as 'not available for work' (or not in labour force). The data on activity particulars of the persons, were, however, tabulated only for population of age 5 and above.

1.8 *Classification according to usual status approach*: In the 38th round survey, the status of activity on which a person spent relatively longer time of the preceding 365 days prior to the date of survey

was considered to be the principal usual activity status of the person. Accordingly, a person's principal usual status was considered 'working' (or 'employed'), if he/she was engaged relatively for a longer time during the reference period of 365 days in any one or more work activities coded 01—51, 'seeking or available for work' (or 'unemployed'), if he/she was not working but was either seeking or was available for work (activity code 81) for a relatively longer time of the specified reference period and 'not in labour force,' if he/she was engaged for a relatively longer period in any one or more of the non-gainful activities (codes 91—98). Within the two broad activity categories, 'working' and 'not in labour force', the detailed activity category was determined

on the basis of 'time spent' criterion. A person categorised as a 'worker' on the basis of his/her principal status is referred to as 'principal status worker'. Those of the 'non-workers', who pursued in a subsidiary capacity some gainful activity, as well, along with their principal usual activity (non-gainful) were considered to be usually working in a subsidiary capacity and are referred to as 'subsidiary status workers'. These two groups, viz., 'principal status workers' and 'subsidiary status workers', together constitute 'all workers' according to the usual status classification.

1.9 Classification according to current weekly status approach: For classification of person according to current weekly status, he or she had to be assigned a unique activity status with reference to a period of seven days preceding the date of survey. For a person pursuing more than one activity during the week, his/her unique status was decided by adopting a priority-cum-major time rule. Under the priority rule, the status of 'working' got priority over the status of 'not working but seeking/available for work' which in turn got priority over the status of 'not working and not-seeking/available for work'. For a person classified under the first or the last category, his/her detailed activity status was determined by major-time-spent criterion, i.e., the detailed activity on which major time was spent was considered his/her current weekly status. Further, if a person had worked for one hour on any one day of the week, he was considered 'working'. A person who had not worked during the week but was available for work even for one hour on any one day of the week was considered 'seeking and/or available for work'. Others constituted the category 'not available for work' (or 'not in labour force'). Each person was thus assigned a unique activity status for the week. Aggregate of persons under the different activity status provided the distribution of person by activity on an average in a week of the survey period of one year.

1.10 Classification according to current daily status approach: In adopting the current daily status approach attempt was made to account for two major activities pursued by a person on each day of the seven days reference week allocating 'half day' to each activity. The unit of classification according to this approach, was thus, half day. In assigning the activity status on a day, a person was considered 'working' (or employed) for the entire day if he/she had worked 4 hours or more on the day, and assigned the one or two (as the case may be) work activity (01-71) to which he/she devoted the working time. But if the work was done for one hour or more but

less than 4 hours, he/she was considered 'working' or (employed) for half day and 'seeking/available for work' (or unemployed) or 'not available for work' (or not in labour force) for the other half of the day depending on whether he/she was seeking/available for work or not on the day. On the other hand, if a person was not engaged in any gainful work even for one hour on the day but was seeking or available for work for four hours or more, he/she was considered 'unemployed' for the entire day. But if the reported availability for work was for less than four hours only, he/she was considered 'unemployed' for half day and 'not in labour force' for the other half of the day. A person who was neither having any work to do nor was available for work even for half of the day, was considered 'not available for work (or not in labour force)' for the entire day and assigned the one or two of the non-gainful activity status which he/she had during the day. The aggregate of person-days so classified under the different activity categories for all the seven days of the week divided by seven gave the distribution of persons (strict speaking, person-days) by activity category on an average on a day of the survey period of one year.

1.11 Probing questions. In the 38th round survey there were two sets of probing questions, the first set to be put to all persons of the age 5 years and above excepting those categorised usually as old, disabled, etc., and the other set for those categorised as usually engaged in household duties. The first set, was aimed to get data to understand the complex dimensions of the work pattern and the extent of under utilisation of available labour time. The second set was aimed to bring out the extent of participation of women engaged in household duties in some specified activities which derive benefits to their households, availability for work in the household premises, etc. A number of suitable questions were, therefore, included in the 38th round, the answers to which, it was expected, will bring out the desired information.

1.12 DEFINITIONS

(a) *Gainful activity* : Gainful activity (or work) is the activity pursued by persons for pay, profit or family gain or in other words, the activity which adds value to the 'national product'. Normally, it is an activity which results in production of 'goods and services' for exchange. However, the activities in 'agriculture' (i.e. all activities relating to industry div. O) in which the part or the whole of the agricultural production is used for own consumption and does go for sale, are also considered 'gainful'. Execution of household chores or social commitments, etc., however, are not considered 'gainful' activities. The activities,

such as, prostitution, begging, etc., which may result in earnings, are by convention, not considered 'gainful'.

(b) *Workers (or employed)* : Persons engaged in any gainful activity are considered 'workers' (or employed). They are the persons pursuing any one or more of the eight situations listed as the activity categories under the first broad activity category, i.e., 'working or employed' in para 1.7.

(c) *Seeking or available for work (or unemployed)* : Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, are considered unemployed.

(d) *Labour force* : Persons categorised as working (or employed) and categorised as seeking or available for work (or unemployed) together constitute the labour force.

(e) *Not in labour force* : Persons categorised as either 'working' nor 'seeking or available for work' are considered to be engaged in non-gainful activities and categorised 'not in labour force'. The persons falling in this category are students, those engaged in domestic chores, rentiers, pensioners, those living on alms, recipients of remittance, etc., infirm and disabled persons, prostitutes and smugglers, etc.

(f) *Worker (self-employed) in household enterprise—usual and current status category 11* : Persons who are engaged in their own farm or non-farm enterprises are defined as self-employed—the term used to designate their activity status. There are different kinds of self-employed. Some may operate their enterprise without hiring any labour. Some others may normally work on their own but occasionally hire a few labourers. There is also a third category who by and large, regularly run their enterprises by hiring labour. The first two groups of self-employed are called own-account workers and the third, employers.

(g) *Worked as helper in household enterprise—usual and current status category 21* : The helpers are a category of working persons who keep themselves engaged in household enterprises, working full or part-time and do not receive any cash payment in return for the work performed or any share of the family earnings from the enterprise. They are household members, a large number of them being related to the household head. They are dependent members of the household working for the family enterprise and getting food and shelter like other members of

the household. One may also come across persons in a household who do not receive any cash remuneration for their work in the household enterprise but have a share in the family earnings out of such enterprise. Such persons are not 'helpers' but self-employed. On the other hand, if any member of the household works in the household enterprise for which he is paid wage/salary, he should be treated as employee.

(h) *Worked as regular salaried/wage employees—usual and current status code 31* : Persons working in others' farm or non-farm enterprises (both household and non-household) and getting, in return, salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are treated as regular salaried/wage employees. The category, salaried/wage employees, will include not only salary and wage earners getting time wage but also earners getting piece wage or salary and paid apprentices both full-time and part-time.

(i) *Worked as casual wage labour—usual and current status codes 41 & 51* : Persons engaged in others' farm or non-farm enterprises (both household and non-household) and getting in return wages according to the terms of the daily or periodic work contract are treated as *casual wage labour*. In the rural areas and also in the government project sites, a type of casual labourers can be seen who normally engage themselves in public works activities which include works taken up by the government or local bodies for construction of roads, bunds, digging of generation schemes, etc. The casual labourers doing only such public works activities are casual labour in public works. The rest are casual wage labour in other types of work.

(j) *Had work in household enterprises but did not work—current status code 61, and had regular salaried/wage employment but did not work—current status code 71* : Persons engaged in household farm or non-farm enterprises or working in others' farm or non-farm enterprises as salaried/wage employees but absenting from work temporarily due to sickness or for enjoying leave or holiday or for other reasons belong to these two categories 61 & 71 respectively depending on whether they are self-employed in household farm/non-farm enterprises or employed in others' farm/non-farm enterprises as wage/salaried employees.

(k) *Attended domestic duties and was also engaged in free collection of goods, sewing, tailoring, weaving, etc., for household use—usual and current status code 93* : In the rural areas in general and particularly in the tribal areas, domestic work usually

includes among others, a lot of work for free collection of vegetables, roots, firewood, etc., and also spinning and weaving of cloth for household use. Persons found to be spending regularly some of his/her time in performing the above-mentioned activities along with household chores, belong to this category.

Section 2

SUMMARY RESULTS

2.0 Summary results pertaining to some population characteristics and the pattern of employment obtaining for the four social groups of the population, 'scheduled tribe', 'scheduled caste', 'Neo-Buddhists' and different state/union territories.¹ The corresponding detailed results for only all-India are given in Part-II. Attempts have been made to compare the all-India results on key indicators of employment and unemployment with the corresponding results based on the NSS 32nd round (1977-78) survey.

2.1 *Some household and population characteristics* : For having a meaningful analysis of the employment-unemployment pattern, some background information relating to the four different social groups of popula-

tion—'scheduled tribe', 'scheduled caste', 'Neo-Buddhists' and 'others' are presented below. The proportions of the population belonging to the two groups 'scheduled tribe' and 'scheduled caste' to total population as obtained from the survey results and also the 1981 census, are given already in an earlier report.²

2.2 *Distribution of households by size class of land possessed* : Area of 'land possessed' by an household is obviously an indicator of the economic status of the household, particularly in the rural areas. A distribution of households belonging to any particular social group by different land possessed class, therefore, will give some idea of the economy of social group which can be compared with similar distributions for the other social groups. In table 1 is given the comparative picture of the distribution of households by size class of land possessed for rural India, for, the different social groups of the population, 'scheduled tribe', 'scheduled caste', 'neo-Buddhists' and 'others'. It may be noted that the distribution of households by per capita monthly expenditure, will similarly give some idea of the standard of living of the population. The relevant distributions for the different social groups are also presented in the report² mentioned earlier.

TABLE 1 : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS BY SIZE CLASS OF LAND POSSESSED FOR RURAL AREAS.

size class of land possessed (acres 0.00)	all-India			
	scheduled tribe	scheduled caste	neo-Buddhists	others
(1)	(2)	(3)	(4)	(5)
0.00 without owned homestead	3.90	2.48	4.78	2.50
0.00 with owned homestead	4.27	5.28	12.95	2.86
sub-total	8.17	7.76	17.73	5.36
0.01—0.49	24.83	52.73	35.39	32.46
0.50—0.99	4.82	8.25	3.44	6.84
1.00—2.49	19.21	14.46	9.67	18.44
2.50—4.99	19.69	5.32	13.79	16.23
5.00 & above	23.28	6.48	19.98	20.67
total	100.00	100.00	100.00	100.00

while about 23 per cent of the tribal households possess land of are 5 acres or more, only about 21 per cent of other households and as low as 6 per cent of the scheduled caste households possess land of area 5 acres or more. On the other hand, while about 8 per cent each of the scheduled tribe and scheduled

caste households possess only less than 0.005 cents of land, the corresponding proportion among other category is only 5 per cent. Percentage distributions of households by size class of land possessed for the rural areas of different states and union territories are given in table 1.1.

(1) "Pattern of employment—unemployment of scheduled caste and scheduled tribe population during late Seventies."—NSS 32nd round; NSS Report No. 298B (mimeographed)

(2) "Pattern of consumer expenditure for scheduled caste and scheduled tribe households" (NSS 38th round) Sarvekshana Vol. XII No. 3, (January—March 1989)—Issue No. 38.

*Results are not presented as the number of sample households was less than 20.

1. All-India includes all states and union territories.
2. For all states/U.T.s. excepting Maharashtra, results for neo-Buddhists are not presented.

2.3 Percentage of population of age 5 years and above to total population: The indicators of employment and unemployment presented subsequently are for the population of age 5 years and above. The detailed tables presented in Part II also give the

distributions for the population of age 5 years and above. For making correlated study of employment and unemployment indicators, the proportion of population of age 5 years and above is presented in table 2.

TABLE 2 : PERCENTAGE OF PERSONS OF AGE 5 YEARS AND ABOVE TO TOTAL PERSONS BY SEX AND RURAL-URBAN RESIDENCE STATUS

Both the NSS 32nd round and 38th round surveys have estimated children in the age group 0—4 years as about 14—15 per cent each in the case of scheduled tribe and scheduled caste population of rural and urban India. But in the case of 'others', the

percentage of children (0—4, years) is estimated as 13—14 per cent in rural India and about 12 per cent in urban India. These proportions, however vary from state to state, as seen from table 2.1 given below.

2.4 *Distribution of persons by marital status*: 'never married', 'currently married' and 'others'—
Table 3 gives the percentage distribution of the population by three broad categories of marital status—separately for rural and urban India.

TABLE 3 : PERCENTAGE DISTRIBUTION OF PERSONS BY MARITAL STATUS

household group	All-India			
	marital status			total
	never married	currently married	others	
(1)	(2)	(3)	(4)	(5)
rural				
scheduled tribe	49.46	44.30	6.24	100.00
scheduled caste	48.72	44.97	6.31	100.00
others	50.61	43.04	6.35	100.00
urban				
scheduled tribe	50.65	44.61	4.74	100.00
scheduled caste	52.71	41.70	5.59	100.00
others	53.37	41.19	5.44	100.00

The proportion of married persons is found to be highest among scheduled tribes and scheduled castes compared to others both in the rural and urban areas. It may be noted that the detailed table in

Part-II gives the distribution by age and also sex. To get an idea on the regional variations in the marital status distribution of the population, the relevant results are presented in table 3.1.

TABLE 3.1 : PERCENTAGE DISTRIBUTION OF PERSONS BY MARITAL STATUS

*Results not presented as the number of sample house holds is less than 20.

2.5 *Current attendance in educational institutions* : Enrolment (in educational institutions) ratio among children is obviously one of the important social indicators for assessing the state of progress of any particular group of the population under study. In the 38th round survey, for each person, it was ascertained whether he/she was currently attending any educational institution. Cross classify-

ing this information with age and social group, the 38th round survey has thrown up results relating to enrolment ratio for children of school going age (5—14 years). Table 4 below gives the number of children currently attending educational institution per 1000 children by sex and rural-urban residence status separately for each social group of the population for all-India.

TABLE 4 : NUMBER OF CHILDREN (5—14 YEARS) CURRENTLY ATTENDING EDUCATIONAL INSTITUTIONS PER 1000 CHILDREN

social group	All-India			
	rural		urban	
	male	female	male	female
(1)	(2)	(3)	(4)	(5)
scheduled tribe	395	204	670	527
scheduled caste	489	255	667	523
others	592	392	765	691

In rural areas, enrolment ratio is found to be lowest among scheduled tribe children followed by scheduled caste children, whereas in the urban areas it is of the same order for both the scheduled tribe and scheduled caste children. The ratio is found to be much higher among others in both the rural and

urban areas. It is also observed that the differential between the male and female ratio is higher among the scheduled tribe and scheduled caste children compared to others. For studying the regional variations, the relevant results for states and union territories are presented in table 4.1.

TABLE 4.1 : NUMBER OF PERSONS (AGE 5—14 YEARS) CURRENTLY ATTENDING EDUCATIONAL INSTITUTIONS PER 1000 PERSONS (AGE 5—14 YEARS).

2.6 *Work-force (employed)* : The work (employment) pattern of the population, particularly in rural India with its economy primarily depending on agriculture and agricultural based industries, may vary from one season to another in a year or, even from one day to another in a week. To get a complete picture of the employment pattern under such a situation, NSSO has estimated four different 'work participation rates' (percentage of persons employed to total persons) based on the data collected through the three approaches (as mentioned earlier) adopted in the 38th round survey. The four rates are :

(i) percentage of persons usually working in the principal status (us—ps).

(ii) percentage of persons usually working in the principal or in the subsidiary status (us—all).

(iii) percentage of persons working on an average in a week (cws) and

(iv) percentage of persons (strictly person-days) working on an average in a day (cds).

The above four rates are worked out for the population of age 5 years and above. The relevant rates for all-India are presented in Table 5. The corresponding results as obtained from NSS 32nd round (1977-78) are also given in the table.

TABLE 5 : PERCENTAGE OF 'EMPLOYED' (AGE 5 YEARS & ABOVE) ACCORDING TO USUAL STATUS, CURRENT WEEKLY STATUS AND CURRENT DAILY STATUS.

others	38	56.96	58.20	56.19	53.97	12.55	15.85	12.39	11.26
	32	56.05	—	55.42	53.61	12.73	—	13.03	11.46

*us-all rates were not generated for 32nd round survey.

Considering the usual work pattern, it is observed that the work participation rate is highest among scheduled tribe followed by scheduled caste in the case of both male and females of rural India and females of urban India. But in the case of urban males, percentage of usually employed in the principal status is almost of the same order for all the three social groups. However, percentage of usual status-all workers among urban males is found to be highest for the scheduled tribe population followed by others and it is least among the scheduled caste population. The current status rates reveal that a larger proportion of the usually employed among the scheduled caste and scheduled tribe population do not have work throughout the year compared to the rest of the population.

Looking at the results of the two rounds 38th (1983) and 32 (1977-78), it appears that there has been a slight fall in the proportion of employed among the scheduled tribe and scheduled caste population during 1983 compared to 1977-78. The latter period being a scarce year caused due to the widespread drought prevailing across the country, some among the scheduled caste and scheduled tribe population (which is considered to be an economically weaker section of the population) might have come out to work for their sustenance, which under normal circumstances, probably might not have otherwise worked, thereby resulting in a higher employment rate for the period. Regional pattern of the employment obtaining for the three social groups is presented in table 5.1.

*Results not presented as the number of sample households is than 20.

2.7 *Unemployed*: As in the case of 'employed', for 'unemployed' also, four proportions of 'unemployed' were worked out from the NSS 38th round data. They are:—

- (i) Percentage of usually 'unemployed' in the principal status (us—ps).
- (ii) Percentage of 'unemployed' excluding those employed in the usual subsidiary status (us—excluding ss workers).

(iii) Percentage of 'unemployed' on an average during a week (cws).

(iv) Percentage of 'unemployed' (strictly unemployed person-days) on an average during a day (cds).

All the four indicators of unemployment were worked out for the population of age 5 years and above separately for scheduled tribe, scheduled caste and others. The all-India indicators with the corresponding results based on NSS 32nd round survey are presented in Table 6.

TABLE 6: PERCENTAGE OF 'UNEMPLOYED' (AGE 5 YEARS AND ABOVE) ACCORDING TO USUAL STATUS, CURRENT WEEKLY STATUS AND CURRENT DAILY STATUS.

*Not generated for 32nd round survey

At all India level, during 1983, chronic unemployment of rural males was found to be highest among the non-scheduled category of population (1.5 per cent) followed by scheduled caste population (1.1 per cent). It was much lower (0.5 per cent) among the scheduled tribe population. On the other hand, for urban males percentage of chronically unemployed was found to be highest (3.7 per cent) among the scheduled caste population followed by the non-scheduled category (3.5 per cent) and the lowest (3.0 per cent) among scheduled tribe population. Considering the female population, both in rural and urban areas, chronic unemployment was of the same order (about 1 per cent in urban areas and about 0.5 per cent in rural areas) for both the scheduled caste population and the non-scheduled category of the population. Relatively, the chronic unemployment was found to be less among the scheduled tribe women. Percentages

of unemployed according to current weekly and current daily status show that the intensity of intermittent unemployment due to seasonal fluctuations was more among the two scheduled social groups of the population compared to the rest of the population. One important feature observed is that the female unemployment was relatively higher for all the three social groups of the population during 1977-78 compared to the period 1983 in urban India. The scarcity conditions prevailing in 1977-78 might have induced many women (who under normal conditions might have preferred not to work) to come out for work (it was already seen that the work-participation rates for 1977-78 were higher than the 1983 rates) and some among them who could not get work might have declared as available for work, naturally resulting in higher proportion of 'unemployed'. Table 6.1 gives the percentages of 'unemployed' for the different states and union territories.

TABLE 6.1 : PERCENTAGE OF UNEMPLOYED (AGE 5 YEARS AND ABOVE) ACCORDING TO USUAL (PRINCIPAL) STATUS, USUAL STATUS EXCLUDING SUBSIDIARY STATUS WORKERS, CURRENT WEEKLY STATUS AND CURRENT DAILY STATUS.

* Results not presented as the number of sample households is less than 20.

2.8 *Underemployed* : All the persons categorised as 'usually working' on the basis of the 'major time criterion' with reference to a period of one year, particularly the self employed and the casual labour, may not be having work throughout the year. Thus, for a section of them, some of their days may become idle due to want of work and in that sense, they may be labelled as under-employed. Of these idle days, part may be declared as unemployed and part as days not

available for work. A distribution of the days of the usually working by their current daily status will thus, give an idea of the magnitude of the person-days of the usually employed without work on an average in a day. Table 7 gives the percentage distribution of the person-days of the usually employed (age 5 years & above) in the principal status by their broad current daily status—employed, unemployed and not in labour force—for both rural and urban India.

TABLE 7: PERCENTAGE DISTRIBUTION OF THE PERSON-DAYS OF THE 'USUALLY EMPLOYED' AGE 5 YEARS & ABOVE IN THE PRINCIPAL STATUS BY CURRENT DAILY ACTIVITY STATUS.

household group	All-India					
	male			female		
	employed	unemployed	not in labour force	employed	unemployed	not in labour force
(1)	(2)	(3)	(4)	(5)	(6)	(7)
	rural					
scheduled tribe	90.96	4.30	4.74	75.94	5.00	19.06
scheduled caste	84.22	9.78	6.00	67.66	10.92	21.42
others	91.16	4.66	4.18	73.75	5.15	21.10
	urban					
scheduled tribe	91.71	4.90	3.39	75.76	5.07	19.17
scheduled caste	90.36	6.54	3.10	81.61	6.03	12.36
others	94.07	3.43	2.50	84.00	3.76	12.24

Of the person-days of usually employed rural males, about 91 per cent of the days are found to be employed according to current daily status both in the case of scheduled tribe and the non-scheduled category of the population. In the case of scheduled caste population, the percentage is relatively low—only about 84 per cent. Thus, it is seen that in the case of rural males the extent of withdrawal from work-force is more among the scheduled caste population compared to the other two categories of the population. Some pattern is observed in the case of rural females and also urban males. But in the case of urban females, extent of withdrawal is more among scheduled tribe population compared to scheduled caste and the other category of population. Comparing males and females, the

malady of under-employment is found to be more severe among the females and is the worst among the scheduled caste females of rural India. Proportion of reported unemployed days of the usually employed is also highest among scheduled caste population—males and females—of both rural and urban areas. It is as high as 10 to 11 per cent in the case of scheduled caste population of rural areas against the corresponding proportion of 4 to 5 per cent in the case of scheduled tribe and the non-scheduled category of the rural population. In urban India, the proportion of unemployed days is about 6 to 7 per cent among the usually employed scheduled caste population as against 4 to 5 per cent for the other two categories. The results for the States and union territories are presented in table 7.1.

*Results not presented as the number of sample households is less than 20.

2.9 *Women's participation in activities deriving benefits to their households*: It is known that a large section of women are, in general, engaged in household duties. But many among them, particularly in rural areas, carry-out also, certain activities which derive benefits to their households along with and as a part of their usual house chores. In order to understand the pattern of women's participation in such activities which derive benefits to their households, along with domestic chores, the NSS survey questionnaire on employment and unemployment, since the 32nd round,

has included a special module containing some probing questions on this aspects. Based on the information collected on the topic, results on the participation of women engaged in household duties, in certain specified activities were worked-out separately for all the three household groups. Relevant results giving proportion of women engaged in domestic duties and also some specified activities to total women engaged in household duties are given in table 8 for rural and urban India.

TABLE 8 : NUMBER OF FEMALES OF AGE 5 YEARS AND ABOVE USUALLY ENGAGED IN DOMESTIC DUTIES (92 & 93) AND CARRYING OUT SPECIFIED ADDITIONAL ACTIVITIES PER 1000 FEMALES DOMESTIC DUTIES ENGAGED IN DOMESTIC DUTIES.

A NOTE ON PATTERN OF CONSUMER EXPENDITURE OF HOUSEHOLDS SELF-EMPLOYED IN AGRICULTURE, AND OF AGRICULTURAL AND RURAL LABOUR HOUSEHOLDS***

1. Introduction

1.0 A countrywide enquiry on the household consumption expenditure was held in the 38th round (Jan.—Dec. 1983) of the National Sample Survey (NSS) as a part of the third quinquennial survey. In the survey schedule, the sample households in the rural areas were classified, as mentioned below, on the basis of the share of income derived from the various activities pursued by the members of the households :

- (i) agricultural labour households
- (ii) other labour households
- (iii) households self-employed in agricultural occupations.

The residual category (iv) consists of households self-employed in non-agriculture, non-manual employees and households deriving income from non-gainful sources only.

1.1 In this report, the pattern of consumption of (a) agricultural labour households (i), (b) rural labour households (i) + (ii), (c) households self-employed in agricultural occupation (iii) and other households (iv) and their household composition have been presented*. A report on general households i.e. all households taken together irrespective of their household classification has already been brought out by NSS**

1.2 *Survey period and reference period* : The field work of the thirtyeighth round started in January 1983 and continued up to December 1983, covering a period of one complete year. The reference period for collection of data on consumer expenditure was 30 days preceding the date of survey. The estimates presented in the report, therefore, broadly relate to the period from December 1982 to December 1983.

1.3 *Coverage* : The geographical coverage of the survey was the entire Indian Union excluding Ladakh and Kargil districts of Jammu & Kashmir and rural areas of Nagaland.

1.4 *Sample Size* : The survey covered about 80 thousand households spread over 8035 villages.

1.5 *Participation of States* : In this round all the states and union territories (included in the geographical coverage) except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated in the survey on at least equal matching basis. The results presented in this report are based on central sample data only.

2. Concepts and Definitions

2.0 The concepts and definitions followed in the consumer expenditure enquiry continue to remain broadly the same as in earlier rounds. Some of these concepts and definitions are explained below.

2.1 *Household* : A household is a group of persons normally living together and taking food from a common kitchen. A boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government, such as those in prisons, police quarters, cantonments, hospitals, asylums, relief camps are, however excluded from the scope of the survey.

2.2 *Household member* : Any person who is a normal resident of the sample household is considered to be a member of the household. Household members are grouped into three categories viz., adult male, adult female and child. One who has already attained the age of 15 (in completed years) is considered as an adult.

*A similar report viz. Pattern of consumer expenditure for scheduled caste and scheduled tribe households NSS 38th round has been released in Sarvekshana XII No. 3—Jan. 1989.

**Since the present report is based on full scrutiny and data correction after updating the data file (by computer Processing), the results presented in this report are slightly at variance with the provisional results released in Sarvekshana Vol. IX, No. 4 April '86.

***The results presented in the report relate to the data for rural sectors only.

2.3 *Household size* : The total number of members (as defined above) in a household is considered to be the size of the household.

2.4 *Household consumer expenditure* : Consumer expenditure comprises of all expenditure incurred by the household, exclusively on domestic account, including consumption out of home-grown produce or transfer receipts like gift, loan etc. The expenditure on household enterprise is excluded from consumer expenditure, while consumption out of transfer receipts is included, transfer payments of all kinds (loans, gifts, charities, monetary as well as in kind, like grain loan etc.) are excluded. Expenditure on purchase and construction of residential houses are considered to be expenses on capital account and hence or excluded from the consumer expenditure; but the expenditure towards maintenance of residential building is included in the consumer expenditure of the household. Monetary value of food articles consumed during the reference period is taken to represent consumer expenditure on food articles. For semi-durable and durable goods, the actual expenditure incurred towards purchase of these articles acquired during the reference period is considered as the consumer expenditure on the articles. For items of clothing and footwear, there is a slight departure from the earlier round. Monetary value of articles acquired and brought into first use during the reference period is taken as the consumer expenditure on the articles concerned.

2.5 *Rural labour household* : A household was classified as rural labour household if its income during the last 365 days was more from wage paid manual labour (agricultural and/or non-agricultural) than either from paid non-manual employment or from self-employment. Rural labour households include agricultural labour households.

2.6 *Agricultural labour household* : Household which earned 50 per cent or more of their total income during the last 365 days from wage paid manual labour in agriculture are treated as agricultural labour households. Agricultural labour is a part of rural labour.

2.7 *Households self-employed in agriculture* : Households which earned 50 per cent or more of

their total income from self-employment in agricultural occupation during the last 365 days are treated as self-employed in agriculture.

2.8 *Reference period* : The reference period for collection of data on all items of consumer expenditure is last 30 days (ending on the day preceding the date of enquiry). In addition, for items of clothing and footwear, durable goods and some items of miscellaneous goods and services, data have been collected for a reference period of last 365 days also. The results presented in this report are based on data of 30 days reference period only.

3. Explanatory notes on tables

3.0 The report contains two distinct types of tables for each state and union territory of India as also for all-India. The tables relate to rural sector only. The contents of the tables are described below.

3.1 *Table 1 series* give the distribution of (i) no. of sample households, (i) percentage of estimated no. of households, persons, and (iii) average household size (adult male, adult female and child) by monthly per-capita expenditure classes.

3.2 *Table 2 series* give value of consumption of broad groups of items per person for a period of 30 days by month per-capita expenditure classes. Estimates are given for 19 broad groups of items. The groups are (1) cereals; (2) gram; (3) cereal substitutes; (4) pulse and products; (5) milk and products (6) edible oil; (7) meat, egg and fish; (8) vegetables; (9) fruits and nuts; (10) sugar; (11) salt; (12) spices (13) beverages and refreshments; (14) pan, tobacco & intoxicants; (15) fuel and light; (16) clothing; (17) footwear; (18) miscellaneous goods and services (including rents and taxes); and (19) durable goods. Apart from this, estimates on (20) rents and (21) taxes have been shown separately also. The results are also presented for (i) food-total; (ii) non-food total and (iii) total consumer expenditure.

3.3 *Monthly per capita expenditure classes* : Estimates have been given by monthly per-capita expenditure in rupees, arranged in ascending order of magnitude. The expenditure levels are grouped into the following 14 classes :—

srl. no.	monthly per-capita expenditure classes (in rupees)	srl. no.	monthly per-capita expenditure classes (in rupees)
(1)	(2)	(1)	(2)
1.	0—30	8.	100—125

5.	60—70	12.	250—300
6.	70—85	13.	300 & above
7.	85—100	14.	all expenditure classes

Note : The groups 0—30, 30—40 etc. stand for Rs. 0 to less than Rs. 30/-, Rs. 30/- to less than Rs. 40/- and so on.

3.4 *Table numbering* : For convenience of reference the table numbers have been coded—the digit to the left of the decimal point refers to the nature of information and the digits to the right refer to the state/union territory, followed by R for rural tables and U for urban tables.

The code numbers assigned to the states/union territories are as follows :—

0. All India
1. Andhra Pradesh
2. Assam
3. Bihar
4. Gujarat
5. Haryana
6. Himachal Pradesh
7. Jammu & Kashmir
8. Karnataka
9. Kerala
10. Madhya Pradesh
11. Maharashtra
12. Manipur
- **13. Meghalaya
14. Nagaland
15. Orissa
16. Punjab
17. Rajasthan
- **18. Sikkim
19. Tamil Nadu
- **20. Tripura
21. Uttar Pradesh
22. West Bengal
23. Andaman & Nicobar Islands
- **24. Arunachal Pradesh
25. Chandigarh
26. Dadra & Nagar Haveli
27. Delhi
28. Goa, Daman & Diu
- *29. Lakshadweep
30. Mizoram
31. Pondicherry.

4. Sampling Design and Estimation Procedure

4.0 *Broad design* : The sampling design adopted in the survey was a stratified two-stage one with census villages in the rural areas and NSSO urban frame survey blocks in the urban areas as first stage units and

households as second stage units. The sample villages were selected with probability proportional to size and with replacement in the form of two independent interpenetrating samples (IPNS). Sample blocks were selected with equal probability also in the form of two IPNS. The sample households in the second stage (ten from each first stage unit) were selected circularly systematically after arranging all the households of the first stage units in a specified manner.

4.1 *Survey period and sub-round formation* : The survey was started in the month of January 1983 and was completed in December 1983. The entire survey period of one year was divided into four sub-rounds each of three months duration coinciding approximately with the four agricultural seasons. The four sub-round periods were :

sub-round 1 : January—March 1983.

sub-round 2 : April—June 1983.

sub-round 3 : July—September 1983.

sub-round 4 : October—December 1983.

The sample units were equally distributed over the four sub-rounds in a manner so as to provide equally valid estimates for each of the related sub-round period. The average based on the pooled data, taking all the four sub-rounds together, would be free from the effects of seasonality.

4.2 *Estimation procedure* : The estimation procedure adopted in 38th round is based on a weighted sum of the sample values. Denoting by \hat{Y} the unbiased estimate of Y , (the state total of any variate) it is given by :

$$\hat{Y} = \sum_s \frac{P_s}{n_s} \sum_i \frac{D_{si}}{e_{si} p_{si}} \frac{H_{si}}{h_{si}} \sum_j^{h_{si}} y_{sij} \quad \dots (1)$$

for the rural sector, and

$$\hat{Y} = \sum_s \frac{N_s}{n_s} \sum_i D_{si} \frac{H_{si}}{h_{si}} \sum_j y_{sij} \quad \dots (2)$$

for the urban sector, where,

s, i and j are suffixes for stratum, village/urban block and household respectively;

* Lakshadweep is not presented in the report as the estimates were not available.

** Tables for the states of Meghalaya, Tripura, Arunachal Pradesh, and Sikkim are not presented because, for large proportion of sample villages, survey data were not available for these states.

P_s , N_s and n_s give the stratum values of population, number of villages/blocks in frame and number of sample villages/blocks respectively.

D_{si} , E_{si} , P_{si} stand respectively for, number of hamlet-groups/sub-blocks formed, number of census villages contained in a larger revenue village actually surveyed and the population of the sample village;

H_{si} and h_{si} stand for the total number of households listed and number of sample households;

and finally y_{sij} is the observed value of the variate for a sample household.

Estimates of ratio of two characteristics is given by the ratio of the estimates of their aggregates.

5.0 SUMMARY OF FINDINGS

In this section, some important findings of the survey are discussed to present a comparative picture of the different types of rural households. Of the total households surveyed 34,935 households are self-employed in agriculture and 27,047 labour households of which 21817 are agricultural labour households. The remaining households have other means of livelihood.

5.1 *Average size of households* : The distribution of average household size is shown in table 1 for all the States and all-India level, the maximum households size is reported by households self-employed in agriculture (5.89). The average household size of other three types of households namely agricultural labour households, rural labour households and other households are almost the same i.e. 4.69, 4.70 and 4.76 respectively. For households self-employed in agriculture a number of states report household size as high as 6 and above. These are Chandigarh (7.84), Haryana (6.71), Punjab (6.58), West Bengal (6.50), Kerala (6.32), Gujarat (6.25), Bihar and Delhi (6.13 & 6.12), Assam, Jammu & Kashmir (6.01 & 6.02). The lowest sizes are reported by Mizoram (4.51) and Tamil Nadu (4.92).

5.2 The household sizes of agricultural labour households and rural labour households do not differ much at the state level except for Delhi (3.63,4.96).

5.3 The difference in household size amongst the other types of households as compared with agricultural or rural labour households is also not very much

marked at the state level. Some differences are found for the following states only : Assam, Gujarat, Manipur, Dadra & Nagar Haveli, Delhi, Goa, Daman & Diu and Mizoram.

5.4 The average size of a household self-employed in agriculture is larger than the average sizes for agricultural labour, rural labour households and also for other households both at the state and all-India levels.

5.5 *Average Monthly Per Capita Consumer Expenditure* : In table 2 has been shown the value of total consumer expenditure per person by types of households for all the States and all India.

5.6 The average per capita monthly expenditure is reported to be much higher for households self employed in agriculture as compared with that for the rural labour or agricultural labour households in almost all the states. The expenditure level of rural labour and agricultural labour household are however quite close. At all-India level, the average per capita monthly consumer expenditure is Rs. 85.28, Rs. 85.09, Rs. 122.85, Rs. 125.91 and Rs. 112.31 respectively for agricultural labour households, rural labour households, households self-employed in agriculture, other households and all rural households respectively.

5.7 The average per capita expenditure of the households self-employed in agriculture is Rs. 123 at the all-India level. Some of the states where per capita consumer expenditure is found to be high in this type of household are Chandigarh (Rs. 246), Goa, Daman & Diu (Rs. 218), Andaman & Nicobar Islands (Rs. 212), Himachal Pradesh (Rs. 192), Kerala (Rs. 171) and Punjab (Rs. 165).

5.8 At the lower end are states of Bihar (Rs. 101), Pondicherry (Rs. 105), Uttar Pradesh (Rs. 109), Orissa (Rs. 113), West Bengal (Rs. 118) and Madhya Pradesh (Rs. 121).

5.9 In column (6) of table 2 is given the per capita consumer expenditure of the households i.e. other households. The states having high consumption expenditure in this type of household are Chandigarh (Rs. 211), Punjab (Rs. 200), Delhi (Rs. 198), Kerala (Rs. 181), Goa, Daman & Diu (Rs. 177) and Haryana (Rs. 166) while those having the lowest expenditure are Dadra & Nagar Haveli (Rs. 88), Orissa (Rs. 105), Bihar (Rs. 108), Uttar Pradesh & Madhya Pradesh (Rs. 109), Assam (Rs. 114) and Mizoram (Rs. 118).

5.10 In table 3 is shown the percentage expenditure on food total to total consumer expenditure for different types of households by states.

It is found that for all the states, the percentage expenditure on food is almost identical in respect of agricultural and rural labour households. In case of most of the union territories, however, the difference in percentage consumption of food for the two types of households vary considerably. These union territories with corresponding percentages are Andaman and Nicobar Islands (68.85, 64.87), Chandigarh

(62.74, 53.23), Dadra and Nagar Haveli (68.47, 65.86), Delhi (59.79, 52.93) and Goa, Daman & Diu (74.17, 67.78). It seems that in these places, rural labour households include a good percentage of 'other labour households' than in other states and union territories.

5.11 For agricultural labour households, the only state reporting less than 60 percent towards food consumption is Delhi (59.79) while for rural labour households they are Chandigarh (53.23) and Delhi (52.93).

5.12 At the all India level, the percentage expenditure on food consumption is 64.84 for households self-employed in agriculture, 68.17 for rural labour households and 64.20 for 'other households*' against 65.56 for all households combined.

5.13 The lowest percentage expenditure on food is reported by the following states in respect of households self-employed in agriculture i.e. Delhi (55.15),

Kerala (57.40), Punjab (57.58), Andhra Pradesh (58.32) and Maharashtra (59.92) whereas for other households, the states with corresponding percentages are Goa, Daman & Diu (54.95), Delhi (56.46), Punjab (58.33), Andaman & Nicobar Islands (58.81), Rajasthan (59.27), Himachal Pradesh (59.31) and Andhra Pradesh (59.44). All the above states report less than 60 percent expenditure on food consumption.

TABLE 3 : PERCENTAGE EXPENDITURE ON FOOD TO TOTAL CONSUMER EXPENDITURE BY TYPE OF HOUSEHOLD

Sl. No.	state/union territory	households Self employed in agriculture	agricultural labour households	rural labour households	other households	all households combined

List of codes used in the detailed tables

I. Activity (usual and current) :

A. Status :

Description of the activity category	Category code
1	2
Working with an employer under obligation but work not specifically compensated by any wage/salary	01—04
Worked (self employed) in household enterprises	11
Worked as helper in household enterprise	21
Worked as regular salaried/wage employee	31
Worked as casual wage labour in public works	41
Worked as casual wage labour in other types of work	51
Did not work though there was work in household enterprise	61
Did not work but had regular salaried/wage employment	71
Sought work	81
Did not seek but was available for work	82
Attended educational institutions	91
Attended domestic duties only	92
Attended domestic duties and was also engaged in free collection of goods (vegetable, roots, fire-wood, cattle feed, etc.) sewing, tailoring, weaving, etc. for household use	93
Too young to work/to attend school/to seek employment	94
Old and disabled	95
Rentiers, pensioners, remittance recipients, etc	96
Beggars, prostitutes, etc.	97
Others	98
Did not due to work temporary sickness (for casual workers only)	99
B. Industry	
Agriculture	0
Non-agriculture	1—9

The activity category codes 61, 71, 82 and 99 were used only for current status approaches.

LIST OF DETAILED TABLES

table no.	description of table	page no.
(1)	(2)	(3)
0-1	Distribution of sample households by household group	S-5
0-2	Distribution of sample persons by household group	S-6
1	Percentage distribution of households by size class of land possessed for each household group	S-7
2	Percentage distribution of persons by marital status for each agegroup and sex	S-7 to S-16
3	Number of persons currently enrolled in educational institutions (age 5 and above) per 1000 persons by age-group and household monthly per-capita expenditure class for each sex	S-16 to S-33
4	Percentage distribution of persons of age 5 and above by current weekly activity and sex for each age-group	S-34 to S-51
5	Percentage distribution of person-days per day of persons of age 5 and above by sex and current daily activity for each age-group	S-52 to S-60
6	Percentage distribution of persons of age 5 and above by usual activity and sex for each age-group	S-61 to S-78
7	Percentage distribution of persons of age 5 and above by usual activity taking also into consideration the subsidiary gainful status of persons categorised not working, and sex for each age-group	S-79 to S-96
8	Percentage distribution of person-days per day of persons of age 5 and above by current daily activity or each usual activities	S-97 to S-114
8/1	Percentage distribution of person-days per day of persons of age 5 and above by current daily activity for each usual activities taking also into consideration the subsidiary gainful status of persons categorised not working'	S-115 to S-132
9	Number of females of age 5 and above usually engaged in domestic duties (92&93) and carrying out specified additional activities per 1000 females engaged in domestic duties (92 & 93) by age group and marital status	S-133 to S-144

- 1. आठवें दशकांत में अनुसूचित जनजाति और अनुसूचित जाति की जनसंख्या को रोजगार-बेरोजगारी की स्थिति निष्कर्षों का सारांश हि०-5
- 2. कृषि में स्वनियोजित परिवारों और कृषि एवं ग्रामीण धार्मिक परिवारों के उपभोक्ता व्यय का प्रतिमान निष्कर्षों का सारांश । हि०-20

1980 के आरम्भ में अनुसूचित जनजाति एवं अनुसूचित जाति के लोगों की रोजगार-बेरोजगारी की स्थिति

संक्षिप्त परिणाम

1.0 समस्त भारत एवं भिन्न-भिन्न राज्यों/संघ शासित क्षेत्रों के लिए कुछ जनसंख्या विशेषताओं एवं जनसंख्या के चार सामाजिक समूहों—अनुसूचित जनजाति अनुसूचित जाति, विओ बौद्धों तथा 'अन्यों' के लिए प्राप्त किए गए रोजगार एवं बेरोजगारी के पैटर्न से संबंधित संक्षिप्त परिणाम यहाँ प्रस्तुत किए गए हैं। (1) परिशिष्ट की सारनीयां केवल समस्त भारत के तदनुसूची व्यौरेवार परिणाम प्रस्तुत करती है। रा. प्र. सर्वे 32 दौर (1977-78) सर्वेक्षण पर आधारित तदनुसार परिणामों वाले रोजगार एवं बेरोजगारी के महत्वपूर्ण संकेतकों की (इंडिकेटर्स) पर अखिल भारतीय परिणामों की तुलना करने का प्रयास किया गया है।

1.1 कुछ पारिवारिक एवं आबादी संबंधी विशेषताएं :

रोजगार-बेरोजगारी के पैटर्न का अर्थपूर्ण विश्लेषण करने के लिए आबादी के चार विभिन्न सामाजिक समूहों—“अनुसूचित जनजाति” “अनुसूचित जाति” “विओ बौद्धों” एवं “अन्य” से संबंधित कुछ पृष्ठ भूमिगत सूचनाएँ नीचे प्रस्तुत की गई हैं। समस्त आबादी में से सर्वेक्षण के परिणामों तथा वर्ष 1981 की जनगणना से यथा प्राप्त अनुसूचित जाति एवं अनुसूचित जाति के दोनों समूहों से संबंधित जनसंख्या अनुपात पिछली रिपोर्ट में पहले से ही दिए गए हैं।

1.2 अधिकृत भूमि के आकार वर्ग के अनुसार परिवारों का वितरण :

किसी भी परिवार द्वारा अधिकृत भूमि का क्षेत्र विशेष रूप से ग्रामीण क्षेत्रों में स्पष्टतः उस परिवार के आर्थिक स्तर का सूचक है। इसलिए अधिकृत भूमि वाले भिन्न-भिन्न वर्गों के अनुसार किसी विशेष सामाजिक समूह से संबंधित परिवारों का वितरण सामाजिक समूह की अर्थव्यवस्था के संबंध में कुछ विचार प्रस्तुत करेगा जिसका अन्य सामाजिक समूहों के लिए किए गए उसी वितरण के साथ तुलना की जा सकती है।

सारणी 1 में जनसंख्या के विभिन्न सामाजिक समूहों तथा “अनुसूचित जनजाति” “अनुसूचित जाति” विओ बौद्ध तथा अन्य के लिए ग्रामीण भारत के संबंध में अधिकृत भूमि के आधार वर्ग के अनुसार परिवारों के वितरण की

तुलनात्मक छवि प्रस्तुत की गई है इस बात पर ध्यान दिया जाए कि प्रति व्यक्ति मासिक व्यय के अनुसार परिवारों का यह वितरण उसी प्रकार से आबादी जनसंख्या के रहन-सहन के स्तर के संबंध में कुछ विचार प्रस्तुत करेगा विभिन्न सामाजिक समूहों के लिए इन संगत वितरणों का पिछली रिपोर्ट में भी उल्लेख किया गया है।

सारणी : 1—ग्रामीण क्षेत्रों के लिए अधिकृत भूमि के आकार वर्ग के अनुसार परिवारों का प्रतिशतता वितरण

समस्त भारत				
अधिकृत भूमि का आकार वर्ग (क्षेत्र)	अनुसूचित जनजाति	अनुसूचित जाति	विओ बौद्ध	अन्य
0.00	(1)	(2)	(3)	(4)
0.00 बिना स्वामित्व वाली वास भूमि	3.90	2.48	4.78	2.50
0.00 स्वामित्व वाली वास भूमि	4.27	5.28	12.95	2.86
उप-जोड़	8.17	7.76	17.73	5.36
0.01—0.49	24.83	52.73	35.39	32.46
0.50—0.99	4.82	8.25	3.44	6.84
1.00—2.49	19.20	15.46	9.67	18.44
2.50—4.99	19.69	9.32	13.79	16.23
5.00—और उससे अधिक	23.28	6.48	19.98	20.67
जोड़	100.00	100.00	100.00	100.00

जबकि जनजाति परिवारों में 123 प्रतिशत परिवारों ने 5 एकड़ अथवा उससे अधिक भूमि अधिकार में ली तथा केवल लगभग 21 प्रतिशत अन्य परिवारों एवं कम से कम लगभग 6 प्रतिशत अनुसूचित जाति के परिवारों ने 5 एकड़ अथवा उससे अधिक भूमि अधिकृत की। दूसरी ओर जबकि अनुसूचित जनजाति एवं अनुसूचित जाति में से तीन-तीन प्रतिशत परिवारों ने भूमि के 0.005 अंश से भी कम लगभग अधिकृत किया जो कि अन्य श्रेणियों में केवल 5 प्रतिशत है। विभिन्न राज्यों एवं संघ शासित क्षेत्रों के ग्रामीण क्षेत्रों के अनुसार अधिकृत भूमि के आकार वर्ग के अनुसार किया गया प्रतिशतता वितरण सारणी 1.1 में दिया गया है।

1. रा. प्र. सर्वे 32 वें दौर के परिणाम रिपोर्ट सं. 298 ख-1970 के अन्त में अनुसूचित जाति एवं अनुसूचित जनजाति के लोगों की रोजगार एवं बेरोजगारी पैटर्न।
 2. रा. प्र. सर्वे सं. 332—“अनुसूचित जाति एवं अनुसूचित जनजाति के परिवारों के लिए उपभोक्ता व्यय का पैटर्न” (रा. प्र. सर्वे 30 वां दौर।)

1.1 राज्यों एवं समस्त भारत के लिए प्रत्येक परिवार समूह हेतु अलग-अलग अधिकृत भूमि के आकार वर्ग के अनुसार परिवारों का प्रतिशत वितरण।

ग्रामीण

राज्य समस्त भारत	परिवार समूह	अधिकृत भूमि का आकार वर्ग (एकड़ 0.00)							प्रतिवर्ग उससे अधिक परिवारों की संख्या
		बिना स्वामित्व वाली वासभूमि	0.00 स्वामित्व वाली वासभूमि	0.01-0.49	0.50-0.99	1.00-2.49	2.50-4.4.99	5.00 और उससे अधिक

चूंकि प्रतिदश परिवारों की संख्या 20 से कम थी, इसलिए परिणाम प्रस्तुत नहीं किये गये हैं।

1. समस्त भारत में समस्त राज्य एवं संघ शासित क्षेत्र शामिल हैं।
2. महाराष्ट्र को छोड़कर समस्त राज्य/संघ शासित क्षेत्रों के लिए नियो बौद्धों के परिणाम प्रस्तुत नहीं किए गए हैं।

1.3 कुल आबादी में से 5 वर्ष एवं उससे अधिक आयु की आबादी की प्रतिशतता :

रोजगार एवं बेरोजगारी के अनुवर्ती संकेतक 5 वर्ष अथवा उस से अधिक आयु के लोगों के लिए हैं। परिशिष्ट में प्रस्तुत की गई इन ब्यौरेवार सारणियों में 5 वर्ष एवं उससे अधिक आयु के लोगों के लिए वितरण भी प्रस्तुत करती है। रोजगार एवं बेरोजगारी के संकेतकों का सहसम्बद्ध अध्ययन करने के लिए 5 वर्ष एवं उससे अधिक आयु के लोगों का अनुपात सारणी 2 में प्रस्तुत किया गया है।

रा० प्र० सर्वे० के 32 वें एवं 38 वें दोनों दौरों में भारत के ग्रामीण और शहरी क्षेत्रों में अनुसूचित जाति एवं अनुसूचित जनजाति के लोगों में से प्रत्येक में 0-4 वर्ष की आयु समूह के लगभग 14-15 प्रतिशत बच्चों का अनुमान लगाया गया है। परन्तु "अन्य" के मामले में, बच्चों (0-4 वर्ष) की यह प्रतिशतता ग्रामीण भारत में 13-14 प्रतिशत तथा शहरी भारत में लगभग 12 प्रतिशत अनुमानित की गई। परन्तु ये अनुपात एक राज्य से दूसरे राज्य में भिन्न थे जो नीचे सारणी 2.1 में दर्शाए गए हैं।

सारणी 2 : लिंग एवं ग्रामीण-शहरी आवासीय स्तर के अनुसार कु शयक्तियों में से 5 वर्ष एवं उससे अधिक आयु के व्यक्तियों की प्रतिशतता।

*चूँकि प्रतिदर्र्ष परिवारों की संख्या 20 से कम है इसलिये परिणाम नहीं दिये गये हैं।

2.4 वैवाहिक स्तर के अनुसार व्यक्तियों का वितरण :

ग्रामीण एवं शहरी भारत के लिए अलग-अलग वैवाहिक स्तर के लोगों की तीन बृहत् श्रेणियों—'जिन्होंने कभी विवाह नहीं किया', जिनका हाल ही में विवाह हुआ है तथा "अन्य" के अनुसार उनका प्रतिशत विवरण सारणी 3 में दिया गया है।

ग्रामीण एवं शहरी दोनों ही क्षेत्रों में विवाहित व्यक्तियों का यह अनुपात अन्यों की तुलना में अनुसूचित जनजाति एवं अनुसूचित जाति में सबसे अधिक पाया गया। इस बात का ध्यान रखा जाए कि परिशिष्ट में प्रस्तुत ब्यौवार सारणी आयु एवं लिंग के अनुसार भी वितरण प्रस्तुत करती है। लोगों के वैवाहिक स्तर के वितरण में क्षेत्रीय विभिन्नताओं संबंधी विचार प्राप्त करने के लिए संगत परिणाम सारणी 3.1 में प्रस्तुत किए गए हैं।

सारणी 3 : वैवाहिक स्तर के अनुसार व्यक्तियों प्रपतशतता वितरण।

1.5 शैक्षणिक संस्थाओं की वर्तमान उपस्थिति : अध्ययन में लगे हुए लोगों के किसी विशेष, समूह की प्रगति की स्थिति निर्धारित करने के लिये बच्चों में नामांकन अनुपात (शैक्षणिक संस्थाओं में) स्पष्टतः महत्वपूर्ण सामाजिक संकेतकों में से एक है। 38 वें दौर के सर्वेक्षण में प्रत्येक व्यक्ति के बारे में यह निश्चित किया गया कि फिलहाल क्या किसी शैक्षणिक संस्था में जाता है/जाती है। आयु एवं सामाजिक समूह सहित

इस सूचना का प्रति वर्गीकरण करते हुए 38वें दौर के सर्वेक्षण ने स्कूल आने वाली आयु के बच्चों (5-14 वर्ष) के लिये नामांकन अनुपात से संबंधित परिणामों का उल्लेख किया है। समस्त भारत के लिये लोगों के प्रत्येक सामाजिक समूह हेतु लिंग एवं ग्रामीण शहरी आवास स्तर के अनुसार अलग-अलग प्रति 1000 बच्चों में से वर्तमान में शैक्षणिक संस्था में जाने वाले बच्चों की संख्या नीचे सारणी 4 में दी गई है।

सारणी 4 : प्रति 1000 बच्चों में से वर्तमान में शैक्षणिक संस्थाओं में जाने वाले बच्चों (5-14 वर्ष) की संख्या

सामाजिक समूह	समस्त भारत			
	ग्रामीण		शहरी	
	पुरुष	महिलायें	पुरुष	महिलायें
(1)	(2)	(3)	(4)	(5)
अनुसूचित जनजाति	395	204	670	527
अनुसूचित जाति	489	255	667	523
अन्य	592	392	765	691

ग्रामीण क्षेत्र में, अनुसूचित जाति के बच्चों की अपेक्षा अनुसूचित जनजाति के बच्चों में नामांकन अनुपात कम पाया गया जबकि शहरी क्षेत्रों में अनुसूचित जनजाति एवं अनुसूचित जाति दोनों के ही बच्चों में यह अनुपात उसी क्रम में पाया गया है। यह अनुपात ग्रामीण एवं शहरी दोनों क्षेत्रों में अन्यों

की तुलना में काफी अधिक पाया गया। इस क्षेत्रीय विभिन्नताओं वा अध्ययन करने के लिये राज्यों एवं संघ शासित क्षेत्रों के सम्बन्ध परिणाम सारणी 4.1 में प्रस्तुत किये गये हैं।

सारणी 4.1 : प्रति 1000 व्यक्तियों (आयु 5-14 वर्ष) में से फिलहाल शैक्षणिक संस्थाओं में जाने वाले व्यक्तियों (आयु 5-14) वर्ष की संख्या

*चूकि प्रतिदर्श परिवारों की संख्या 20 से कम है इसलिये परिणाम प्रस्तुत नहीं किये गये हैं।

1.6 कार्य शक्ति (नियोजित): आबादी का यह कार्य (रोजगार पैटन) विशेषरूप से ग्रामीण भारत में अर्थ व्यवस्था सहित क्रमशः कृषि एवं कृषि पर आधारित उद्योगों पर निर्भर है, जो कि एक वर्ष में एक मौसम से दूसरे मौसम में तथा एक सप्ताह में एक दिन से दूसरे दिन बदलता रहता है। इस प्रकार की स्थिति से रोजगार पैटन की संपूर्ण छवि प्राप्त करने के लिये रा० प्र० सर्वे०, सं० ने 38वें दौर में हुए सर्वेक्षण में अपनाई गई तीन पद्धतियाँ (जिनका पहले उल्लेख किया जा चुका है। के माध्यम से संग्रहीत आंकड़ों पर आधारित चार भिन्न-भिन्न कार्य भागीदारी दरों) कुल व्यक्तियों में से नियोजित व्यक्तियों की प्रतिशतता का अनुमान लगाया है। ये चारों दरें निम्नलिखित हैं:

(i) सामान्यतः स्तर से कार्य कर रहे हैं से व्यक्तियों की प्रतिशतता।

(ii) सामान्यतः अथवा गौण स्तर में कार्य कर रहे व्यक्तियों की प्रतिशतता।

(iii) उन व्यक्तियों की प्रतिशतता जो औसतन एक सप्ताह में एक बार कार्य करते हैं, तथा

(iv) उन व्यक्तियों की प्रतिशतता जो औसतन एक दिन कार्य करते हैं।

उपर्युक्त ये चारों दरें 5 वर्ष और उससे अधिक आयु के लोगों के लिए तैयार की गई हैं। समस्त भारत के लिए संगत दरें सारणी 5 में प्रस्तुत की गई हैं। तदनुसारी परिणाम जो कि रा० प्र० सर्वे० के 32 वें दौर (1977-78) से प्राप्त हुए थे, वे भी सारणी में प्रस्तुत किये गये हैं।

सारणी 5 : सामान्य स्तर, वर्तमान, साप्ताहिक स्तर एवं वर्तमान दैनिक स्तर के अनुसार नियोजित व्यक्तियों (5 वर्ष एवं उससे अधिक आयु) की प्रतिशतता

*यूस०—समस्त दरें, 32 वें दौर में हुए सर्वेक्षण के लिए निकाली नहीं गई थी।

सामान्य कार्य पैटर्न पर विचार करने पर यह पाया गया कि ग्रामीण भारत में पुरुषों एवं महिलाओं दोनों के मामले में तथा शहरी भारत की महिलाओं के मामले में कार्य में भागीदारी की दर अनुसूचित जाति की अपेक्षा अनुसूचित जनजाति में अधिक थी। परन्तु शहरी पुरुषों के मामले में सामान्यतः मुख्य स्तर में नियोजित व्यक्तियों की प्रतिशतता तीनों सामाजिक समूहों के लिए लगभग बराबर है। तथापि सामान्य स्तर की प्रतिशतता शहरी पुरुषों में समस्त कामगार, अन्यो की अपेक्षा अनुसूचित जनजाति के लोगों में अधिक पाई गई तथा अनुसूचित जाति के लोगों में यह प्रतिशत बहुत कम है। वर्तमान स्तर की दरें यह दर्शाती हैं कि अनुसूचित जाति एवं अनुसूचित जनजाति के लोगों में यह शेष लोगों की तुलना में सामान्यतः नियोजित व्यक्तियों के एक बहुत बड़े भाग के पास पूरे वर्ष काम नहीं होता है। 38वें (1983) एवं 32 वें (1977-78) दौर के परिणामों को देखने पर ऐसा प्रतीत होता है कि अनुसूचित जनजाति एवं अनुसूचित जाति के लोगों में वर्ष 77-78 की तुलना में वर्ष 1983 के दौरान नियोजित व्यक्तियों के भाग में मामूली सी गिरावट आई है। देश के एक बहुत बड़े क्षेत्र में अनावृष्टि के कारण बाढ़ की अवधि, अभाव वर्ष के रूप में रही, अनुसूचित जाति एवं अनुसूचित जनजाति जिनको आर्थिक रूप से आबादी का कमजोर वर्ग माना गया है। में से कुछ लोगों को अपने भोजन के लिये काम पर

जाना पड़ता है, सामान्य परिस्थितियों में उनके पास काम नहीं होता जो कि इस अवधि के लिए उनकी अधिकतम रोजगार दर दर्शाती है।

1.7 बेरोजगार रोजगार प्राप्त के मामले की तरह ही "बेरोजगार" के लिए भी राष्ट्रीय प्रतिदर्श सर्वेक्षण के 38 वें दौर के आंकड़ों से "बेरोजगार" के चार अनुपात निकाले गये थे, वे इस प्रकार हैं :-

- (1) मुख्य स्तर पर सामान्यतः "बेरोजगार की प्रतिशतता।
- (2) "बेरोजगारों" की प्रतिशतता जिनमें सामान्य गौण स्तर के रोजगार प्राप्त व्यक्ति शामिल नहीं है (सा० स्तर-गौण स्तर श्रमिकों को छोड़कर)
- (3) सप्ताह के दौरान औसत बेरोजगारों की प्रतिशतता (व०स०स्त)
- (4) पूरे दिन में औसत (किसी भी दिन पूर्णतया बेरोजगार बेरोजगारों की प्रतिशतता।

बेरोजगारी के सभी चारों संकेतिक अनुसूचित जन जाति अनुसूचित जाति और अन्यो के लिए 5 वर्ष और उससे अधिक की जनसंख्या के लिए निकाले गए थे। राष्ट्रीय प्रतिदर्श सर्वेक्षण के 32 वें दौर के सर्वेक्षण पर आधारित समस्त भारत के संकेतिक तदनुसूची परिणामों सहित सारणी 6 में प्रस्तुत हैं।

सारणी: 6 सामान्य स्तर, वर्तमान साप्ताहिक स्तर और वर्तमान दैनिक स्तर के अनुसार बेरोगारों की प्रतिशतता (5 वर्ष की आयु के और उससे अधिक)

सर्वेक्षण के 32 वें दौर के लिये तैयार नहीं की गई।

समस्त भारत स्तर पर 1983 के दौरान अनुसूचित जाति जनसंख्या (1.1 प्रतिशत) की अपेक्षा गैर-अनुसूचित वर्ग (1.5 प्रतिशत) में ग्रामीण पुरुषों में दीर्घकालिक बेरोजगारी सबसे अधिक पायी गई। यह अनुसूचित जनजाति की जनसंख्या में काफी कम थी। दूसरी तरफ गैर अनुसूचित जाति वर्ग (3.5 प्रतिशत) गरीब अपेक्षा अनुसूचित जाति की जनसंख्या में शहरी पुरुषों में दीर्घकालिक बेरोजगारों की प्रतिशतता अधिकतम (3.7 प्रतिशत) पाई गई थी। ग्रहण अनुसूचित

जनजाति की जनसंख्या में न्यूनतम (3.0 प्रतिशत) पाई गई थीर अनुसूचित जाति और गैर अनुसूचित वर्ग दोनों की जनसंख्या में ग्रामीण और शहरी दोनों ही क्षेत्रों में महिलाओं में दीर्घकालिक बेरोजगारी एक समान (शहरी क्षेत्रों में) प्रतिशत के लगभग और ग्रामीण क्षेत्रों में .5 प्रतिशत के लगभग थी। दीर्घकालिक बेरोजगारी अनुसूचित जनजाति की महिलाओं में सापेक्षतः कम पाई गई थी। वर्तमान साप्ताहिक और वर्तमान दैनिक स्तर के अनुसार बेरोजगारों

की प्रतिशता यह दर्शाती है कि सामयिक उतार-चढ़ाव के कारण अर्वाक बेरोजगारों की तीव्रता शेष जन संख्या की तुलना में जनसंख्या के दो अनुसूचित सामाजिक समूहों में अधिक थी। एक महत्वपूर्ण विशेषता यह पाई गई है कि भारत के शहरों में, 1983 की अवधि की तुलना में 1977-78 के दौरान, महिलाओं की बेरोजगारी क्रमशः जन संख्या के तीनों सामाजिक समूहों में अधिक थी। 1977-78 में अभाव की स्थितियों में कई महिलाओं को (जो सामान्य स्थितियों में कार्य न करने की वरियता देती) बाहर कार्य करने के लिए प्रेरित किया यह पहले ही देखा जा चुका है कि 1977-78 में कार्य विभाजन की दर 1983 की दर से अधिक थी और उनमें से कुछ जिनको काम नहीं मिल सका जिसके परिणामता: बेरोजगारी की अधिकत प्रतिशतता रही। सारणी 6.1 को सम्भवतः कार्य के लिए उपलब्ध बोधित किया गया भिन्न राज्यों और संघ शासित प्रदेशों के लिए बेरोजगारों की प्रतिशतता प्रस्तुत करती है। 18 अल्प रोजगार : एक वर्ष की अवधि के "प्रमुख समय प्रतिमान सारणी-7 : वर्तमान दैनिक क्रियाकलापों के स्तरों के अनुसार मुख्य स्तरों पर "सामान्यतः रोजगार प्राप्त श्रमिकों के श्रम दिवसों का प्रतिशतता वितरण।

के आधार पर सामान्य तौर पर कार्य कर रहे "श्रेणीबद्ध सभी व्यक्तियों, विशेषकर स्वतः रोजगार वाले और दैनिक श्रमिकों के पास पूरे वर्ष कार्य नहीं होता इसलिए उनका एक भाग, कार्य के अभाव में कुछ दिखाली ही रहता है और इन अर्थों में अल्प रोजगार में मान जा सकता है। खाली दिनों में उनके कुछ भाग को बेरोजगार है कहा जा सकता और कुछ भाग की इन दिनों के लिए कार्य के लिए उपलब्ध मान जा सकता। उनके वर्तमान दैनिक स्तर। अनुसार सामान्यतः कार्यचालन के दिनों का वितरण औसतन एक दि में एयं रहित सामान्यतः नियमित श्रमिक के श्रम दिवसों के परिमाण की धारना प्रस्तुत करना है। सारणी 7 ग्रामीण और शहरी भारत के लिए मुख्य स्तरों पर उनके व्यापक वर्तमान दैनिक स्तरों के अनुसार सामान्य तौर से रोजगार प्राप्त (5 वर्ष के और उससे अधिक) श्रमिकों रोजगार पर लगे हुए बेरोजगार और कार्यबल से बाहर के श्रम दिवसों का प्रतिशतता वितरण प्रस्तुत करती है

समस्त भारत

परिवार समूह	पुरुष		महिलायें				
	रोजगार प्राप्त	बेरोजगार	श्रम बल में शामिल नहीं	रोजगार प्राप्त	बेरोजगार	श्रम बल में शामिल नहीं	
1	2	3	4	5	6	7	
							ग्रामीण
अनुसूचित जनजाति	90.96	4.30	4.74	85.94	5.00	19.06	
अनुसूचित जाति	84.22	9.78	6.00	67.66	10.02	21.42

							शहरी
अनुसूचित जनजाति	91.71	4.90	3.39	75.76	5.07	19.1	
अनुसूचित जाति	90.36	6.54	3.10	81.61	7.03	12.36	
अन्य	94.07	3.43	2.50	84.00	3.76	12.24	

जनसंख्या के अनुसूचित जनजाति और गैर अनुसूचित दोनों वर्गों सामान्यतः रोजगार प्राप्त ग्रामीण पुरुषों के श्रम दिवसों में लगभग 91 प्रतिशत दिवसों में नियोजित पाये गए। अनुसूचित जाति की जनसंख्या के मामले में प्रतिशता सापेक्षतः कम है केवल लगभग 84 प्रतिशत इस प्रकार यह देखा गया है कि ग्रामीण पुरुषों के मामले में कार्यबल से हटाने की मात्रा अनुसूचित जाति की जनसंख्या में अन्य दोनों वर्गों की अपेक्षा अधिक पायी गयी है। बिलकुल ऐसा

हांचा ग्रामीण महिलाओं और शहरी पुरुषों के मामले में भी देखा गया है। लेकिन शहरी महिलाओं के विषय में कार्यबल से हटाने की मात्रा तदनरूपी अनुपात की तुलना में अनुसूचित जाति का अनुपात अधिक से अधिक 10 से 11 प्रतिशत ग्रामीण भारत में अन्य दो वर्गों में 4 3 5 की तुलना में सामान्यतः रोजगार प्राप्त अनुसूचित जाति में बेरोजगार दिवसों का अनुपात लगभग 6 से 7 प्रतिशत है।

1.9 अपने परिवारों को लाभ प्रदान करने वाले कार्यकलाप में स्त्रियों की सहभागिता : यह सर्वविदित है कि समान्यतया स्त्रियों का अधिकतम भाग परिवार के घरेलू काम-काज में लगा हुआ है। परन्तु विशेषतया ग्रामीण क्षेत्रों में उनमें से अधिकांश अपने घरेलू काम-काज के साथ 2 उनके एक भाग के रूप में कतिपय ऐसे कार्य-कलाप करते हैं जिनसे उनके परिवार को लाभ मिलता है। कामकाज के साथ-साथ परिवार को लाभ प्रदान करने वाले इस प्रकार के क्रियाकलाप में स्त्रियों के सहभागिता के पटर्न की जानकारी प्राप्त करने के उद्देश्य से रा० प्र० सर्वे

के 32 वें दौर से रोजगार तथा बेरोजगारी संबंधी, प्रश्नावली में एक विशेष प्रवर्धक शामिल किया गया है जिसमें इस पहलू पर कुछ जांच प्रश्न नहित हैं कतिपय परिवारिक समूह के सभी तीनों वर्गों के लिए परिवार के घरेलू कार्यकलापों में लगी स्त्रियों की सहभागिता के परिणाम इस विषय पर एकत्र जानकारी पर आधारित थे, जिनकी अलग से गणना की गई। भारत के ग्रामीण और शहरी क्षेत्रों के लिए घरेलू काम-काज में लगी हुई स्त्रियों की कुल संख्या घरेलू कार्यकलापों में लगी स्त्रियों और घरेलू एवं कुछ विशिष्ट कार्यकलापों में लगी स्त्रियों का समानुपात सारणी 8 में दर्शाया गया है।

सारणी 8 : ग्रामतौर पर घरेलू कार्यकलाप में लगी 5 वर्ष और इससे अधिक आयु की सियों (92 और 93) और घरेलू काम-काज में लगी हुई प्रति 1000 स्त्रियों में से विशिष्ट अतिरिक्त कार्यकलाप करने वाली स्त्रियों की संख्या।

समस्त भारत

विशिष्ट अतिरिक्त कार्यकलाप	अनुसूचित जनजाति		अनुसूचित जाति		अन्य	
	ग्रामीण	शहरी	ग्रामीण	शहरी	ग्रामीण	शहरी
(1)	(2)	(3)	(4)	(5)	(6)	(7)

9 गुड़ तैयार करना	0	0	3	0	17	2
10 खाद्यान्नों की पिसाई	26	3	70	12	291	119
11 गाय के गोबर के उप तैयार करना	23	3	104	15	371	71
12 सिलाई, दर्जीगिरी आदि	7	2	24	14	142	18
13 बच्चों की ट्यूशन करना	1	15	3	5	28	0
14 घरेलू परिसरी के बाहर सेपानी डोना	49	--	128	58	451	28
15 गांव के बाहर से पानी लाना	4	0	7	0	21	0
16 1 से 15 तक कोई भी मद	61	19	165	79	685	545
17 घरेलू कार्यों में लगी स्त्रियों की संख्या प्रति 1000 स्त्रियों में से	265	434	399	472	446	512

ऐसा देखा गया है कि स्त्रियों का विशिष्ट कार्यकलाप जो उनके परिवारों को लाभ प्रदान करता है, में स्त्रियों की सहभागिता का औसत गैर अनुसूचित जाति में काफी अधिक है। उससे कम अनुसूचित जाति जनसंख्या का है। समानुपात नजाति की स्त्रियों में अपेक्षाकृत काफी कम है।

कृषि में स्वनियोजित परिवारों और कृषि एवं ग्रामीण श्रमिक परिवारों के उपभोक्ता व्यय का प्रतिमान

निष्कर्षों का सारांश

विभिन्न प्रकार के ग्रामीण परिवार की एक तुलनात्मक तस्वीर प्रस्तुत करने के लिए सर्वेक्षण के कुछ महत्वपूर्ण निष्कर्षों पर विचार-विमर्श किया गया है। सर्वेक्षित कुल परिवारों में से 34,935 परिवार कृषि में स्वनियोजित हैं तथा 27,047 ग्रामीण श्रमिक परिवारों में से 27817 कृषि श्रमिक परिवार हैं शेष परिवारों के पास आजीविका के अन्य साधन हैं।

1. परिवारों का औसत आकार : अखिल भारतीय स्तर पर सारणी (1) में दर्शाए गए औसत परिवार आकार के वितरण में सर्वाधिक परिवार आकार कृषि (5.89) में स्वनियोजित परिवारों द्वारा उचित किया गया है। अन्य तीन प्रकार के परिवारों अर्थात् कृषि श्रमिक परिवार, ग्रामीण श्रमिक परिवार और अन्य परिवारों का औसत परिवार आकार लगभग वही अर्थात् क्रमशः 4.69, 4.70 और 4.76 है; कृषि में स्वनियोजित परिवारों के संबंध में अनेक राज्यों ने 6 और इससे अधिक का परिवार आकार सूचित किया। ये राज्य चण्डीगढ़ (7.84), हरियाणा (6.71) पंजाब (6.58), पश्चिम बंगाल (6.50), केरल (6.32, गुजरात (6.25), बिहार एवं दिल्ली (6.13) और 6.12), असम, जम्मू व कश्मीर (6.01 और 6.02) हैं। निम्नतम आकार मिजोरम (4.51) और तमिलनाडु (4.92) द्वारा सूचित किए गए हैं।

2. कृषि श्रमिक परिवारों और ग्रामीण श्रमिक परिवारों के आकार दिल्ली (3.62, 4.96) के अतिरिक्त राज्य स्तर पर अधिक भिन्न नहीं हैं।

3. कृषि अथवा ग्रामीण श्रमिक परिवारों की तुलना में अन्य प्रकार के परिवारों के मध्य परिवार आकार में अन्तर भी राज्य स्तर पर बहुत स्पष्ट नहीं है। केवल निम्नलिखित राज्यों के संबंध में कुछ अन्तर पाए गए हैं। असम, गुजरात, मणिपुर दादरा और नागर हवेली, दिल्ली, गोवा, दमन और दीव तथा मिजोरम।

4. कृषि में स्वनियोजित परिवारों का औसत आकार राज्य और अखिल भारतीय स्तर दोनों पर कृषि श्रमिक, ग्रामीण श्रमिक परिवारों और अन्य परिवारों के लिए भी औसत आकार से अधिक है।

5. औसत मासिक प्रति व्यक्ति उपभोक्ता व्यय—सारणी (2) में परिवारों के प्रकार के अनुसार राज्यवार प्रति व्यक्ति कुल उपभोक्ता व्यय का मूल्य दर्शाया गया है।

6. लगभग सभी राज्यों में ग्रामीण श्रमिक या कृषि श्रमिक परिवारों की तुलना में कृषि में स्वनियोजित परिवारों की औसत प्रति व्यक्ति आय काफी अधिक की गई। तथापि ग्रामीण श्रमिक तथा कृषक श्रमिक परिवारों का व्यय स्तर पूर्णतः बराबर है। कृषि में कृषि श्रमिक परिवार, ग्रामीण श्रमिक परिवार, स्वनियोजित परिवार अन्य परिवारों तथा सभी ग्रामीण परिवारों के लिए अखिल भारतीय स्तर पर औसत प्रति व्यक्ति मासिक उपभोक्ता व्यय क्रमशः 85.28, 85.09 रु०, 122.85 रुपये, 125.91 रुपये 112.31 रुपये हैं।

7. अखिल भारतीय स्तर पर कृषि में स्वनियोजित परिवारों का औसत प्रति व्यक्ति व्यय 123 रुपये है। कुछ राज्य जिनमें इस प्रकार के परिवारों का प्रति व्यक्ति उपभोक्ता व्यय उच्च पाया गया, वे हैं चण्डीगढ़ (264 रुपये), गोवा, दमन और दीव (218 रुपये), अंडमान और निकोबार द्वीप समूह (212 रुपये), हिमाचल प्रदेश (192 रुपये), केरल (171 रुपये) तथा पंजाब (165 रुपये)

8. बिहार राज्य लोअर तथा स्टेड (101 रुपये) पांडिचेरी (105 रुपये), उत्तर प्रदेश (109 रुपये), उड़ीसा (113 रुपये), पश्चिम बंगाल (118 रुपये) तथा मध्य प्रदेश (121 रुपये)।

9. कालम (6) में शेष परिवारों अर्थात् अन्य परिवारों के प्रति व्यक्ति उपभोक्ता व्यय दिए गए हैं। इस प्रकार के परिवारों में उच्च उपभोक्ता व्यय के राज्य हैं चण्डीगढ़ (211 रुपये), पंजाब (200 रुपये), दिल्ली (198 रुपये), केरल (181 रुपये), गोवा, दमन तथा दीव (177 रुपये), तथा हरियाणा (166 रुपये) जबकि जिनका निम्नतम व्यय है वे हैं दादरा व नागर हवेली (88 रुपये), उड़ीसा (105 रुपये), बिहार (108 रुपये) उत्तर प्रदेश एवं मध्य प्रदेश (109 रुपये हैं), असम (114 रुपये) तथा मिजोरम (118 रुपये)।

10. सारणी (3) में राज्यों के विभिन्न प्रकार के परिवारों के भोजन पर कुल तथा कुल उपभोक्ता व्यय दर्शाया गया है।

यह देखा गया है कि सभी राज्यों के लिए, कृषक तथा ग्रामीण कृषक परिवारों के संबंध में खाद्य पर प्रतिशत व्यय लगभग एक समान है। तथापि अधिकांश संघ शासित क्षेत्रों के मामले में इन दो प्रकार के परिवारों के खाद्य के प्रतिशत उपभोग में काफी भिन्नता है। संगत प्रतिशत सहित

वे संघ शासित क्षेत्र हैं अंडमान तथा निकोबार द्वीपसमूह (68.85), 64.87), चण्डीगढ़ (62.74, 53.23), दादरा तथा नागर हवेली (68.47, 65.86), दिल्ली (59.79, 52.93 तथा गोवा, दमन और दीव (74.17, 67.78) यह देखा है कि ग्रामीण परिवारों में इन स्थानों में अन्य श्रमिक परिवारों का अन्य राज्यों का संघ शासित क्षेत्र की तुलना में काफी बड़ा प्रतिशत शामिल है।

11. कृषि श्रमिक परिवारों के लिए दिल्ली ही एकमात्र राज्य है जिसका खाद्य पर व्यय 60 प्रतिशत से कम है जबकि ग्रामीण श्रमिक परिवारों का चण्डीगढ़ में 53.23 तथा दिल्ली 52.93 प्रतिशत है।

12. कृषि में स्व नियोजित परिवारों का खाद्य उद्योग पर समस्त अखिल भारतीय स्तर का प्रतिशत व्यय

64.84, ग्रामीण श्रमिक परिवारों का 68.17, सभी परिवारों का संयुक्त रूप से 65.56 प्रतिशत के स्थान पर अन्य परिवारों का प्रतिशत 64.20 है।

13. कृषि में स्व-नियोजित परिवारों के संबंध में निम्नलिखित राज्यों का खाद्य पर न्यूनतम प्रतिशत व्यय अर्थात् दिल्ली में 55.15 प्रतिशत केरल में (7.40, पंजाब में 57.58, आन्ध्र प्रदेश में 58.32, तथा महाराष्ट्र में (59.92) है जबकि अन्य परिवारों के संगत प्रतिशत सहित राज्य है गोवा दमन तथा दीव (54.95) दिल्ली (56.46) पंजाब (58.33) तथा निकोबार द्वीपसमूह (58.81), अंडमान राजस्थान (59.27), हिमाचल प्रदेश (59.31) तथा आन्ध्र प्रदेश (59.44), इन सभी राज्यों का खाद्य उद्योग पर प्रतिशत व्यय 60 प्रतिशत से कम है।
