

**STATEWISE AND CROPWISE ESTIMATES OF
VALUE OF OUTPUT FROM AGRICULTURE
(1960-61 to 1980-81)**

DECEMBER 1985

**CENTRAL STATISTICAL ORGANISATION
MINISTRY OF STATISTICS AND PROGRAMME IMPLEMENTATION
GOVERNMENT OF INDIA**

FOREWORD

The Central Statistical Organisation while publishing the estimates of National Income and Related Aggregates also provides disaggregated information on value of output of agricultural crops in its annual publication entitled "National Accounts Statistics". This publication contains only the All India estimates of value of output of different crops and crop-groups. There have however been persistent demands for Statewise information of value of output of various crops from the different users like planners, policy makers, research workers and institutions for formulating the plans, evolving policies, studying the input-output relations, etc.

In order to fulfill the above requirements, the CSO has decided to publish the Statewise and cropwise estimates of value of output from agriculture in the form of a brochure. The present publication contains the estimates from 1960-61 to 1980-81 both at current and constant prices. Since the CSO was earlier compiling its series at 1960-61 prices, the data for the period 1960-61 to 1970-71 are provided at 1960-61 prices while information for the year 1970-71 onwards is presented in separate table at 1970-71 prices. Thus it would be possible to link up the two series of constant prices through the common year 1970-71.

The brochure has been prepared by the Agriculture Unit of the National Accounts Division at the initiative of Shri Jagdish Kumar, Additional Director. While all the officers and staff of the unit had to put in extra effort in gathering together the mass of data in presentation of the tables in the desired form, special mention may be made of the interest taken by Shri M. Sundara Raman, Joint Director, Shri R.P.Katyal, Officer on Special Duty and Shri H.K.Sharma, Deputy Director and painstaking work done by Shri R.N.Khera, Assistant Director, Shri S.K.Gupta, Shri K.C.Saxena and Smt. Sukhcharan Kanwal, Senior Investigators, and Shri Jatinder Kumar, Junior Investigator.

December, 1985.

STATEWISE AND CROPWISE ESTIMATES OF VALUE OF OUTPUT FROM AGRICULTURE

1960-61 – 1980-81

INTRODUCTION

The role of agriculture in the Indian economy is major and needs no emphasis. There have been important developments in Indian agriculture, especially, in the context of providing infrastructure and adoption of new technology during the plan era. Large investments have been made in agriculture, which along with new technology, lead to increase in crop yields and emerging of cropping patterns. It has, therefore, become necessary to analyse as to how the value of agricultural crops both in real and nominal terms has varied from year to year in different States.

2. In the course of analysis and preparation of estimates of income originating from agriculture in the Central Statistical Organisation, a large body of data has been generated over the years which will be useful to research workers, government departments and other agencies. It has not been possible to include all these details in the National Accounts Statistics. A need has been felt for a publication which gives a long time series of data on gross value of output both at current and constant prices in one place. With this end in view that the CSO has embarked upon preparing a brochure on "Statewise and cropwise Estimates of Value of Output from Agriculture" presenting information on gross value of crops for the years 1960-61 to 1980-81 both at current and constant prices.

3. Evaluation of crop production is done by multiplying the quantities of production by the corresponding producers' prices. The sources of data are as under:-

(i) The estimates of outturn for principal crops are based on the results of the crop estimation surveys conducted annually by the State government agencies. These are compiled and published annually by the Directorate of Economics and Statistics, Ministry of Agriculture (DESAg) in their annual publication captioned "Estimates of Area and Production of Principal Crops in India". For evaluation purposes of these crops the producers' prices correspond to wholesale prices ruling in the primary markets during the peak marketing periods as furnished by the State agencies to CSO.

(ii) In respect of tea, coffee and rubber the statistics of production and prices are obtained from the annual publications of the respective Boards, failing which by correspondence with them.

(iii) For cashewnut, production and prices statistics become available from the Directorate of Cashew nut Development.

(iv) In respect of unspecified and miscellaneous crops and crop groups viz. (a) other cereals included under small millets, (b) other oilseeds, (c) other sugars, (d) other fibres, (e) dyes and tanning material, (f) other drugs and narcotics, (g) other condiments and spices (h) other fruits and vegetables, and (i) miscellaneous crops (fodder, grass, miscellaneous food and non-food crops), the outturn estimates are not directly available for all crops. To the extent possible, data on individual crops are utilised. The value of output in respect of these crops of crop groups is estimated by utilising the area estimates under these categories of crop groups as published by the DESAg in their annual publication captioned Land Utilisation Statistics (LUS) and by applying an appropriate value of yield per hectare to the total estimated area under each of these crop groups.

(v) As for by-products, straw and stalks, the yield rates per unit tonne production of the concerned crops are obtained from surveys conducted by the State governments, from time to time. These ratios also become available during Crop Estimation Surveys in case of some States. Wherever such data do not become available from these surveys/studies, the zone wise yield rates available in NSS reports are utilised. Prices become available from the state governments. For other important by-products which comprise rice bran, rice husk, cotton sticks, arhar sticks, sesamum sticks, jute sticks, bagasse and cane trash, the data become available through special studies conducted in the States. Prices of these are furnished by the States.

For further details the CSO publications entitled (a) National Accounts Statistics, Sources and Method, April, 1980 (Chapter 1, page 3 to 7) and (b) Monthly Abstracts of Statistics, October, 1985 (pages 5-9) may be referred to.

4. In the publication, information on 45 crops-groups has been presented. For each crop/crop group information is given in the form of four statements. The first statement contains information on Statewise value of output of crop/crop group at current prices for 1960-61 to 1969-70. This is followed by a statement providing information on statewise value of output of crop/crop group at constant prices (1960-61) for 1960-61 to 1970-71. The third and fourth statements give information on Statewise value of output of crop/crop group at current and constant (1970-71) prices for 1970-71 to 1980-81.
