ACKNOWLEDGEMENT

The report has been finalised by U. N. Banerji, J. P. Roy, B. Bhattacharyya, P. B. Das, S. C. Basu Roy and A. K. Das Gupta were associated in the work relating to the preparation of the Report.

Supervision of computing was entrusted to H. B. Chowdhury, S. K. Palit and A. K. Chowdhury; of punching to R. Roy, and S. N. Das and of machine tabulation to K. C. Poddar, B. L. Banerji and S. Kar respectively.

TABLES WITH NOTES ON THE ANNUAL SURVEY OF INDUSTRIES, 1959 SAMPLE SECTOR : DETAILED RESULTS

This report entitled 'Tables with Notes on Annual survey of Industries 1959 : Sample Sector : Detailed Results' was prepared by the Indian Statistical Institute, Calcutta and is being published in the form in which it was submitted to the Government of India. The views contained in the Report are not necessarily those of the Government of India.

EXPLANATORY NOTES

1. In NSS Report No. 91 sample sector estimates have been furnished for 12 major items of information collected in Annual Survey of Industries—1959 (ASI-59). This report provides for the same sector estimates of detailed items of capital structure, input and output also collected in ASI—59.

2. A facsimile of the schedule of investigation canvassed in ASI-59 is appended.

3. The total frame comprised all factories registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948 as on 31-12-1958, including those reported closed during the year. Sections 2m(i) and 2m(ii) of the Act referred to factories using power and employing 10 or more workers and not using power and employing 20 or more workers on any day respectively. The sample sector comprised all the factories in the frame employing on an average less than 50 workers, if using power and less than 100 workers, if not using power and excluded those that were decided to be left out of the scope of the survey viz., defence factories, those engaged in storage and distribution of oil and technical training institutes.

4. 'Industry' for the purpose of the Tables appended hereto refers to Labour Bureau classification of industries at the three digit level as were available in the frame collected by the NSS Directorate from the office of the Chief Inspector of Factories. A list of industries as per Labour Bureau classification is given in Appendix I.

5. An idea of the conceptual coverage of some of the terms used in the survey is given below :

- (a) *Fixed capital*.—Depreciated book values of fixed assets as on the opening and closing dates of the accounting year of the factory and ending within 31-12-59 were collected. Fixed assets covered all goods with a normal economic life of one year or more and used by the factory for its own purposes but excluded those solely used for post-manufacture distribution.
- (b) *Other fixed assets*.—These included furniture and fittings and railway sidings, bridges and transport equipment etc. and comprised such other fixed capital equipments as were not covered under the heads land, building, plant, machinery and tools.
- (c) *Depreciation*.—This represented loss or diminution of value of fixed assets consequent upon wear and tear, obsolescence, effluxion of time or permanent fall in market value. Except where depreciation was provided for by a factory, a theoretical annual depreciation was calculated as cost of installation of the fixed asset minus estimated scrap value divided by the estimated number of years of its working life.
- (d) *Addition replacement, improvement etc.*.—The figure for capital expenditure was obtained by adding the value of all purchases of materials on capital account during the year with the amount paid to other concerns for service charges on this account.
- (e) *Rent paid*.—It comprised the amount paid for the use during the year of any item of fixed assets taken on lease or rent such as land, building, machinery etc. and included royalties i.e. amounts paid to the patentees for the right to use their patents in connection with the manufacturing process.
- (f) *Working capital*.—As for fixed capital, data were collected as on opening and closing dates of the accounting year for values of raw materials, finished and semifinished products, cash in hand and at bank and net balance of sundry debtors over sundry creditors arising in the normal course of manufacturing operations of the factory.
- (g) *Number of working days*.—Working days comprised days on which any manufacturing process was carried on and included days spent exclusively on repair and maintenance of fixed assets.
- (h) *Workers*.—The term 'workers' was used in the same sense as in the Factories Act and excluded persons holding positions of supervision and management or employed in a confidential position. It included those directly employed by the factory, as also those employed through contractors.
- (i) *Employees*.—Workers and other than workers including supervisory and managerial staff but excluding all persons engaged in post-manufacture distributive activity, if any, of the factory comprised all the employees of the factory.

The average no. of all employees was calculated by adding all persons attending and on leave with pay including persons on strike but excluding those on unlimited leave or pension, over each shift of a working day and dividing the result by the number of working days.

*The draft report (No. D. 127) was submitted to the Government of India in June, 1964.

- (j) *Man-hours*.—Total man-hours for each shift was obtained from the products of the number of workers attending and the number of hours measuring the length of the shift. These products over all the shifts in all the working days were then aggregated.
- (k) *Total salaries of all workers*.—These included payments in cash as compensation for work done during the year including leave wages, wages for paid holidays, all bonuses and other cash payments, regular or *ad hoc*, contractual or *ex-gratia*.
- (l) *Value of payments in kind*.—This was the cost value or the net cost of the concession, as the case might be, in respect of all supplies made and all services rendered individually, free of cost or for part payment, such as food and food articles fuels housing accommodation electricity, water, sanitary services and all sorts of facilities with regard to transport, education, medicine, entertainments, etc. This was exclusive of employers' contribution to provident fund, pension, gratuity or other social security measures.
- (m) *Emoluments*.—These comprised salaries and wages and value of payments in kind to all employees.
- (n) *Value of fuels, materials etc. consumed*.—This value was based on actual purchase price documents and excluded the value of service incidental to purchases rendered by the factory. This excluded intermediate products i.e. materials manufactured by the factory and also consumed by it. Materials used in repair and maintenance of fixed capital were included but not materials used in capital account.
- (o) *Value of total non-industrial services*.—The value of total non-industrial services included besides transport charges, value of purchase agency service, audit accounts; & bank services and the managing agency services, the cost of postage and stationery, other services etc. obtained from outside the reporting factory.
- (p) *Input*.—It included all materials consumed in manufacture of goods or repair of fixed capital as well as expenses on industrial or non-industrial services purchased.
- (q) *Value of products, by-products etc.*.—For these ex-factory value was taken into account and these were exclusive of excise or other duties paid or sales tax realised from customers. The ex-factory values were determined by the value of sales as charged to customers less discounts or rebates, charges for outward carriage and commission to selling agents.
- (r) *Output*.—This comprised the ex-factory value of all finished goods produced by the factory (products, by-products etc.) during the year excluding intermediate products both produced and further consumed within the factory, plus work done for other concerns i.e. the value of industrial services in the nature of repairs and other manufacturing processes rendered by the factory to all outside parties.
- (s) *Value added*.—This value was arrived at by deducting the value of input from the value of output. It was gross of depreciation.

6. The more important Tables are furnished in Part I of the List of Tables under series I. These relate to estimates of the selected items at levels of all India all industries together, state all industries together and all-India each industry. Estimates for quantity of fuel items have not been furnished in these Tables since, besides reporting them different systems, in many an instance, quantities corresponding to values have not been given in the schedule. Also, in a number of instances, values for the sub-items of fixed capital, rent paid, depreciation, fuels etc. have not been furnished separately against them as required, but have been given in a lumped manner for more than one such sub-items. The separate estimates furnished in this report for such sub-items are therefore less reliable and are under-estimates, although the total estimates for the group of sub-items whether provided in this report or in the summary results (NSS Report No. 9) are inclusive of the concerned lumped entries.

7. As shown in Part 2 of the List of Tables, the 2 series Tables provide information on distribution of sample factories as well as estimates of no. of Factories separately by year of establishment, by share of non-nationals and by type of management. The 3 series Tables, on the other hand, furnish classified information separately by type of ownership and by size of employment.

8. In the tables on frequency distribution i.e., in Table nos. 2.1.1, 2.2.1. and 2.3.1 the no. of factories shown against 'not reported' comprise all sample factories from which no information about the required characteristic could be collected for any reason whatsoever. Whereas, in tables on estimates viz., in Table nos. 2.1.2, 2.2.2, 2.3.2, 3.1 and 3.2 all non-respondent factories were proportionately distributed among the different categories mentioned therein. In these tables, the estimated no. of factories shown as not reported relate to blank factories.

9. The no. of sample-factories in tables 1, 2 and 3 series refers to surveyed factories only and includes all factories treated as blank. Actually, this stands for samples selected minus non-response factories.

10. In Table 2.1.1, all strata combined figure for 'not reported' includes 65 factories and 1 factory respectively reporting year of establishment as 1959 and 1960. In like manner, in Table 2.1.2, the combined estimate for 'not reported' includes 293 and 19 estimated no. of factories respectively for 1959 and 1960.

11. In Tables 2.2.1 and 2.2.2, zero per cent share of non-nationals includes all blank entries, 'nil' cases, dashes and crosses against the item in the schedule.

SAMPLING DESIGN

12. In the design of survey a total sample size of 5000 was at first allocated to the different industries in proportion to their total employment in India. An attempt was made to ensure a relative standard error of about 5 per cent for key estimates at industry level by suitably modifying the allocations. Where the proportional allocation was considerably larger than the sample size required for this purpose, twice the latter was taken as the modified allocation so that the excess could be utilised in increasing the efficiency of the estimates for major industries at the state level. Each modified industry-wise allocation was then re-allocated to the states in proportion to statewise employment in that industry. These state \times industries allocations were further modified with a view to obtaining key estimates with a relative standard error of about 10 percent for the major industries in each state, and a relative standard error of about 5 percent at the most for the two biggest industries in the state. The allocations were rounded off to multiples of 2 to ensure two independent interpenetrating sub-samples in each state \times industry stratum. Within each stratum i.e. (state \times industry cell) two independent simple systematic samples of half the no. of factories allotted to the stratum were drawn, using the arrangement by sub-divisions of industries and by districts, available in the frame. In the samples drawn it so happened that in some strata in each state all the factories were completely enumerated.

ESTIMATION PROCEDURE

13. There are two categories viz. sampled strata (1) and complete enumeration strata (2). Within each of these, the factories have been grouped into two sub-samples. Sub-sample estimate has been drawn up as follows.

Let the subscripts i, j and k stand for the category, state and industry ($i=1,2$).

Let y_{ijk} = value of the characteristic considered for the 1th factory in the ith category, jth state and kth industry.

Let n_{jk} = number of factories surveyed including zero cases (i.e. blank or treated as blank) in category 1, jth state and kth industry, N_{jk} = total number of factories in jth state and kth industry as in the

Sample universe

Now, $M_{jk} = N_{jk} / n_{jk}$ for category—1 and $M_{2jk} = 1$ for category—2.

Sub-sample estimate of a characteristic at state \times industry level :

$$y_{ijk} = M_{jk} \sum y_{ijk}$$

The aggregates of the two sub-samples were pooled to obtain state \times industry estimate in category—2

14. Where a state or an industry comprised strata all belonging to category—2, the pooled aggregates have been provided under 'combined' columns.

SUMMARY OF FINDINGS

15. From Table (1.1) it is found that in the sample sector of ASI-59 :

- plant, machinery and tools, as a component of fixed capital, comprised alone about 3/5 of its value of about Rs. 184 crores ;
- stock difference over the year for raw-materials (which was about $\frac{1}{2}$ the value of total working capital) was less than 1/10 of its closing value ;
- capital expenditure in the year was slightly more than annual depreciation ;
- heavy dependence on rented-in fixed capital was evidenced by the annual rental of about Rs. 4 crores in the content of about Rs. 184 crores worth of owned fixed capital invested ;
- the contribution of women workers to total man-hours put in by direct workers was less than 15%.
- salaries and wages etc. paid to all workers was only about 3/10 of the value added ;
- amongst fuel items consumed, electricity alone was about as important as coal, coke, coal gas, firewood, charcoal and petroleum combined ;
- the service cost of managing agency was less than 4% of the value of total non-industrial service input which itself was less than 2.5% of the total input.

16. The relative position of five most important states from the point of view of the number of factories in them to the sample universe in respect of four broad economic indicators selected from Table (1.2) is given below.

State (1)	sample universe (2)	as percentage of total for all states combined				products (6)
		capital expenditure in the year (3)	no. of direct workers (4)	consumption of electricity purchased (5)		
1 Andhra	10·5	2·2	10·5	4·7	8·7	
2 Maharashtra	20·9	21·5	21·0	13·8	17·6	
3 Madras	12·5	17·3	12·5	16·8	12·8	
4 Gujarat	9·1	11·4	12·7	11·1	13·8	
5 West Bengal	8·6	9·3	7·8	14·1	8·8

APPENDIX I

List of industries as per Labour Bureau Classification at the three digit level as has been used in the Sample Sector of ASI-1959.

sl. no.	industry code	name of industry
(1)	(2)	(3)
1	010	ginning and pressing.
2	201	slaughtering and preservation of meat.
3	202	manufacture of dairy products.
4	203	canning and preserving of fruits and vegetables.
5	204	canning and preserving of fish etc.
6	205	grain mill products.
7	206	bakery products.
8	207	sugar factories.
9	208	sugar confectionery.
10	209	miscellaneous food products.
11	211	distilling, rectifying and blending of spirits.
12	212	wine.
13	213	breweries and incidental processes.
14	214	soft drinks and carbonated water.
15	220	tobacco manufacture.
16	231	cotton and other textiles.
17	232	knitting mills.
18	233	ropes and twines.
19	239	manufacture of other textiles.
20	241	boots and shoes except rubber foot-wears.
21	242	repair of boots and shoes except rubber foot-wears.
22	243	manufacture of wearing apparel except foot-wears.
23	244	made up textiles except wearing apparel.
24	250	manufacture of wood and cork except furniture.
25	260	furniture and fixtures.
26	271	paper and boards.
27	280	printing and book-binding.
28	291	tannery and leather finishing.
29	292	leather products except foot-wear.
30	300	rubber and rubber products.
31	311	basic chemicals.
32	312	vegetable and animal oils and fats.
33	319	miscellaneous chemicals.
34	321	petroleum refineries.
35	322	coke ovens.
36	329	miscellaneous products of petroleum and coal.
37	331	structural clay products.
38	332	glass and glass products except lenses.
39	333	pottery, china ware etc.
40	334	cement.
41	339	non-metallic mineral products.
42	341	ferrous metals.
43	342	non-ferrous metals.
44	350	metal products except machinery.

sl. no.	industry code	name of industry
(1)	(2)	(3)
45	360	machinery except electricals.
46	370	electrical machinery etc.
47	381	ship building.
48	382	rail road equipments.
49	383	manufacture of motor vehicles.
50	384	repair of motor and cycles.
51	385	manufacture of bicycles.
52	386	aircraft.
53	389	transport not elsewhere classified.
54	391	professional, scientific measuring and controlling instruments.
55	392	photographic and other optical goods.
56	393	watches and clocks.
57	394	repair of watches and clocks.
58	395	jewellery and related articles.
59	396	musical instruments.
60	399	industries not elsewhere classified.
61	511	electric light and power.
62	512	gas.
63	521	water supply stations.
64	522	sanitary service (pumping and sewage).
65	831	cinema.
66	842	restaurants and cafes etc.
67	844	laundries and job dyeing etc.
