THE NATIONAL SAMPLE SURVEY

NUMBER 178

ANNUAL SURVEY OF INDUSTRIES—1965

Sample Sector : Detailed Results

The report entitled, "Tables with Notes on the ASI-1965, Sample Sector : Detailed Results" was prepared by the Indian Statistical Institute, Calcutta. The views contained in the report are not necessarily those of Government of India.

INTRODUCTORY NOTES

1. Introduction

In NSS report No. 151 results have been furnished for 13 key items of industrial activity in India collected in the sample sector of the Annual Survey of Industries—1965. In this volume have been provided, besides a few other tables, sample sector estimates of some more detailed items of capital structure, employment and employment, input and output also collected in ASI-65.

2. As per agreed tabulation programme, these details furnish counterpart estimates for the sample sector corresponding to the census sector aggregates for ASI-65 brought out by the Industrial Statistics Wing of the Central Statistical Organisation in their ten-volume report. The results of some of the detailed items in the sample sector have large subsample divergence. An integrated picture of the industrial activity will be obtained by pooling up the results of the census sector with the corresponding sample sector results.

3. The total frame comprised all factories registered under sections 2m(i) and 2m(ii) of the Indian Factories Act, 1948, as on 31 December 1964, including those not furnishing information on number of workers engaged or reported closed in the list of factories. Sections 2m(i) and 2m(ii) of the Act refer respectively to factories using power and employing 10 or more workers or factories not using power but employing 20 or more workers, on any day in the preceding twelve months. The sample sector comprised all factories in the total frame employing on an average less than 20 workers, if using power and less than 100 workers, if not using power. It excluded defence installations, units engaged in storage and distribution of oil, technical training institutes not producing anything for sale or exchange, as well as all units registered as hotels and canteens (industry no. 847). Through the undertaking approach, all factories belonging to the electric light and power industry (industry no. 311) were covered in the census sector on a complete enumeration basis, along with non-licensee factories, and they were thus left out of the scope of the sample sector altogether.

4. In the appended tables, the term 'industry' refers to the Labour Bureau classification of industries at the three digit level. This is in accordance with the information available in the frame as collected by the Directorate of National Sample Survey from the offices of the Chief Inspectors of Factories in the different States. Appendix I provides a statement showing Labour Bureau classification (at three-digit level) and its corresponding ASI industry classification (used in ASI-65 census sector aggregates) also at the three-digit level.

2. Concepts and Definitions

5. An idea of the conceptual coverage of some of the terms used in the survey is given below. Except for capital structure data which were collected as per the accounting year of the factory, all other information was in per calendar year 1965. For sugar factories and cotton ginning and pressing factories, however the respective survey years were July 1964 to June 1965 and September 1964 to August 1965. Factories in Jammu and Kashmir were permitted to submit returns on financial year basis i.e. April 1965 to March 1966.

(a) *Fixed capital*.—Depreciated book values of fixed assets as on the closing date of the accounting year of the factory ending generally within 31 December 1965 were collected. Fixed assets covered all goods with a normal economic life of one year or more and used by the factory for its own purposes but excluded those solely used for post-manufacture distribution. These comprised land, buildings, improvements to land, plant, machinery and tools, transport equipment and other fixed assets.

(b) *Working capital*.—Like fixed capital, information on working capital was collected for the closing date of the accounting year of the factory ending within 31 December 1965. It comprised the values

The draft report (No. D-205) was first submitted by the Indian Statistical Institute, Calcutta, to the Government of India in April, 1969. It was revised subsequently and resubmitted in Nov. 1969.

of stocks of materials, products (finished, semi-finished and in-process), cash in hand and at bank as well as the net balance of amounts receivable and amounts payable. It excluded fixed deposits and long-term investments made by the factory as well as long-term loans received by it.

(c) *Rent paid.*—It was the amount paid during the year for the use of any item of fixed asset taken on lease or rent or royalty basis.

(d) *Number of working days.*—Working days comprised days on which any manufacturing process was carried on and included days spent exclusively on repair and maintenance of fixed assets. Estimate presented in this report is of the total number at the specified level and not the average per factory.

(e) *Workers.*—This term was used in the same sense as in the Factories Act, 1948, and excluded persons holding positions of supervisions and management or employed in a confidential position. It included those directly employed by the factory as also those employed through contractors.

(f) *Employees.*—This term comprised all persons in the factory engaged in work connected directly or indirectly with the manufacturing process, and included all administrative, technical and clerical staff and labour engaged in the production of capital items for factory's own use, but excluded persons engaged in effecting delivery of goods, retail sales and other post-manufacture distributive activity of the factory, if any. It included the proprietors and partners as well as unpaid members of their families (in the case of individual proprietorship or partnership factories) who did some work in or for the factory.

(g) The average number of all workers/employees was calculated by adding all concerned persons attending and on leave with pay, including concerned persons on strike, over each shift of a working day and dividing the result by the number of working days.

(h) *Man-hours.*—Total man-hours for each shift were obtained from the products of the number of workers attending and the number of hours measuring the length of the shift. These products were then aggregated over all the shifts in all the working days.

(i) *Salaries, wages etc.*—This term included all payments made during the year in cash as compensation for work done. It included all bonuses and overtime payments but excluded the value of payments in kind and employers' contribution to social security measures.

(j) *Value of benefits in kind.*—This was the cost value or the net cost of the concession, as the case might be, in respect of all supplies made and all services rendered whether individually or to groups, free of cost or for part payment, such as food and food articles, fuels, housing accommodation, electricity, water, sanitary services as well as subsidies involved in the operation of facilities with regard to transport, medical attention, education, recreation, entertainment and welfare projects, etc. This was exclusive of employer's contribution to provident fund, pension, gratuity or other social security measures.

(k) *Value of fuels, or materials etc. consumed.*—On the basis of the cost of fuel, material etc. landed at the factory including inward transport cost, commission to purchasing agent, taxes or duties paid etc., this value was calculated for each item of fuel, material etc. consumed during the year in the factory. Materials consumed for manufacture of capital items for factory's own use were included. Information on materials consumed for repairs and maintenance of its fixed assets was collected separately. Intermediate products, however, *i.e.*, materials produced and further consumed in the factory, were excluded.

(l) *Value of other input services.*—These expenses included charges on account of non-industrial services such as inward transport, purchase agency, postage, stationery and printing and personalized and business services such as audit, accounts, bank and other services which had originated outside the reporting factory and were not already included in the value of fuels, materials etc. as defined in sub-para (k) above. Also included were sundry indirect taxes paid by the factory like purchase tax, local rate and factory licence.

(m) *Input.*—It comprised the value of fuels, materials etc. as defined in sub-para (k), the value of industrial service rendered to the factory in connection with repairs and maintenance of fixed capital of the factory or with other manufacturing processes as well as the value of other input services, as defined in sub-para (l) above. It included the value of goods to be sold in the same condition as purchased, but excluded director's fee and managing agent's remuneration and office allowance.

(n) *Output.*—This comprised the ex-factory value, calculated on the basis of sale value minus all distributive costs, of all finished goods produced by the factory (products, bye-products etc.) during the year including the value of industrial service rendered by the factory during the year as well as the net balance of semi-finished goods as at the end of the year. Output included final products for own use as goods in the factory, capital items produced for factory's own use and goods bought and resold in the same condition as purchased. It excluded intermediate products.

3. Particulars of Tables

6. In Tables (1), (2), (3) and (4) estimates by sub-samples have been provided for detailed aspects of industrial activity respectively at all India (all-industries combined), State (all industries combined), each industry (all States combined) and State (each industry) level. According to agreed tabulation programme, total number of items for which estimates have been furnished in Tables (2) and (4) is about half of the number as taken in for Tables (1) and (3). Besides the completely enumerated strata for which combined aggregates have been furnished, Table (4) furnishes for the sampled strata sub-samplewise estimates for only such industries as were 'major' industries within the respective States at any time during ASI-60 and ASI-65. For other sampled strata in Table (4) the respective sample size was too small to throw up usable estimates of the detailed items and these estimates have been furnished in manuscript to the I.S. Wing of CSO. This report contains two more tables bearing numbers (1.1) and (3.1). These tables furnish sub-samplewise estimates for outstanding loans in the small scale sector (*i.e.*, factories having gross closing balance of fixed assets at Rs. 5 lakhs or less) of sample part by source of finance and type of organisation (a) for all industries together at all India (Table 1.1), (b) for each industry at all India having sample size more than 200. Estimates for remaining industries in regard to Table (3.1) have been furnished in manuscript to the I.S. Wing of the Central Statistical Organisation.

7. In all tables, it has been marked with 0 (zero), wherever the emerging estimate/aggregate is less than half the prescribed unit of the item in the table. Due to rounding, the component estimates in some cases do not add upto the totals furnished.

8. The last item in all Tables—sample surveyed—refers to the samples selected as reduced by non-response factories. It comprises all surveyed factories, including those treated as blank.

9. In view of Section 7 of the Collection of Statistics Act, 1953, wherever in Table (4) for completely enumerated strata, the concerned cell had less than three units in the total universe, including the census sector as per list of factories for 1964, the aggregate results prepared have not been supplied in this report. Contributions of these cells have however been taken into consideration for building up estimates presented in this report in Tables (3), (2) and (1). The results dropped from publication in this report of Table (4) have been sent to Industrial Statistics Wing of the Central Statistical Organisation for whatever use they may be put to without infringement of the secrecy clause.

10. Wherever the estimates presented in this report differ from the summary results presented earlier they are due to one or more of the following factors : (a) changed number of samples surveyed, (b) the rounding-off of a number of items into which a key item has been sub-divided for the purpose of this report, (c) receipt of clarifications relating to detailed items from the NSS Fields since after the completion of the priority—one report, (d) summary results were prepared from summary cards whereas estimates furnished in this report are based on actual detailed returns, etc.

11. In Tables (3) and (4), wherever an item had nothing to record against all the columns in a page, the item itself along with its number has been dropped from the concerned page of the report. Item numbers as in Tables (3) and (4) correspond to those of Tables (1) and (2) respectively.

4. Sampling Design and Estimation Procedure

12. The sampling design in the sample sector was a stratified unistage one, the strata being the State \times industry cells and the sampling unit being a factory. The sampling frame in any stratum consisted of all Section 2m factories in that State \times industry cell except for factories belonging to the census sector and these left out of the scope of the survey, *viz.*, technical training institutes and factories engaged in defence productions, storage and distribution of oil, hotel and restaurant business, to the extent reported.

13. In deciding upon the sample sizes for different strata, the objectives were to provide usable estimates of broad items for (i) each industry at all-India level, (ii) each State for all industries together, (iii) two major industries in each State,—the industries being considered as major which together accounted for as near as 50% of total industrial employment in that State in 1964.

14. Accordingly, the actual allocation procedure was carried out in the following stages : A sample size of 6000 factories was first allocated to the different industries in proportion to their total all-India employment. In the case of some industries the allocations were considered more than adequate and were therefore reduced to provide larger allocation to some major industries within States. Further, when the number of factories in an industry in a State was very small (say, 3, 4 or 5 etc.) all the factories were additionally included in the sample, resulting in a total sample size of 6048 factories including the units of Pondicherry and Manipur. Within States all completely enumerated strata including those which contained one unit were grouped together to meet the requirements of the inter-penetrating network of sub-samples (IPNS).

15. The sample in any stratum was drawn in the form of two interpenetrating sub-samples each of size half the allocation to that stratum. The two sub-samples were selected in circular systematic manner and without replacement in such a way that there were no common units between them.

Estimation Procedure

Notations: Y_{ijk} = value of a characteristic considered for the i th factory in the j th sub-sample, j th State and k th industry;
 n_{ijk} = number of factories surveyed including zero cases (i.e., blank or treated as blank) in i th sub-sample, j th State and k th industry;
 N_{jk} = total number of factories in the j th State and k th industry in the sample universe;
 $m_{ijk} = \frac{N_{jk}}{n_{ijk}}$
 T'_{ijk} = aggregate value of the characteristic for all sample factories including substituted cases for non-response, in the i th sub-sample in the completely enumerated strata.

For completely enumerated strata in the i th sub-sample

$$T'_i = \sum_k T'_{ik} \text{ or } \sum_j T'_{ij}$$

where $T'_{ik} = 2 \times \sum_j T'_{ijk}$

$$T'_{ij} = 2 \times \sum_k T'_{ijk}$$

and also at State \times industry level combined estimates, as furnished in Table (1-4), is:

$$T'_{jk} = \sum_i T'_{ijk}$$

For sampled strata in the i th sub-sample

$$T''_i = \sum_j T''_{ij} \text{ or } \sum_k T''_{ik}$$

where $T''_{ij} = \sum_k m_{ijk} \sum_{l=1}^{n_{ijk}} Y_{ijkl}$

and $T''_{ik} = \sum_j m_{ijk} \sum_{l=1}^{n_{ijk}} Y_{ijkl}$

and State \times industry estimate $T''_{jk} = \sum_i m_{ijk} \sum_{l=1}^{n_{ijk}} Y_{ijkl}$

and State \times industry combined estimate $T''_{jk} = \frac{\sum_i T''_{ijk}}{2}$

As given in tables:

All India all industries estimate for i th sub-sample:

$$T_i = T'_i + T''_i$$

and combined estimate $T = \frac{\sum_i T_i}{2}$

State all industries estimate for i th sub-sample

$$T_{ij} = T'_{ij} + T''_{ij}$$

and combined estimate $T_{ij} = \sum_k T_{ijk}/2$

all India each industry estimate for i th sub-sample $T_{ik} = T'_{ik} + T''_{ik}$

and combined estimate $T_{ik} = \frac{\sum_j T_{ijk}}{2}$

5. Summary of Findings

16. The following observations relating to the sample sector of ASI-65 may be made from Table

(1) —

(a) Total physical capital formation in 1965 in the sample sector was about Rs. 30 crores of which new fixed assets acquired by purchase constituted more than 86%. Thus, physical capital formation was about 17% of total net closing value of all fixed assets. Capital formation by financial approach was, however, less than physical capital formation by Rs. 3 crores.

(b) Rent paid was about Rs. 7 crores in the context of owned fixed capital at about Rs. 184 crores.

(c) Men workers were about 5 times as numerous as women workers; while contract workers were only about 8% of all direct men and women workers. The ratio between supervisory and managerial staff and all workers, direct and contract, came to 1 : 10.

(d) While wages etc. for direct male workers were about Rs. 1100/- per worker per annum, direct female workers received about one-third of this remuneration per capita. Supervisory and managerial staff drew by way of salaries etc. about Rs. 1700 per head per annum.

(e) Electricity consumed through purchase was the most important fuel item, constituting about 43% of the value of all fuels consumed, as given in NSS Report No. 161.

(f) The value of materials consumed for manufacture was about Rs. 784 crores, in the context of the materials consumed as given in NSS Report No. 161 at Rs. 831 crores.

(g) It was found that sale value of goods sold in the same condition as purchased was about 5% of sample sector total of output, as given in NSS Report No. 161.

17. Excluding Pondicherry, which had only manufacturing units, and Manipur all the four samples of which were found to be Section 85 factories, there were 35579 factories in the sample universe of which 5957 were taken as sample. Non-response factories for the detailed report numbered 150 or about 2.5% against 298 for the summary results, NSS Report No. 161.

18. (a) Information relating to six States considered most important as regards the number of factories in the sample universe is furnished below in respect of three broad economic indicators selected from Table (2).

TABLE SHOWING THE RELATIVE IMPORTANCE IN SELECTED ASPECTS OF INDUSTRIAL ACTIVITY OF SIX MOST IMPORTANT STATES ARRANGED IN THE ORDER OF THEIR NUMBER OF FACTORIES

srl. no.	State	no. of factories in sample universe	man-hours for all direct and contract workers (in lakhs)	materials consumed for manufacture (Rs. lakhs)	consumption of electricity purchased (Rs. lakhs)
(1)	(2)	(3)	(4)	(5)	(6)
1	Maharashtra	6149	2049	13278	160
2	Madras	4290	1331	8725	120
3	Andhra Pradesh	3438	1088	7231	80
4	Gujarat	3307	1137	11277	108
5	West Bengal	3283	1386	9407	117
6	Punjab	3237	1146	7343	89
7	Total	23704	8137	57261	674
8	All-India	35579	12204	78387	981

(b) It is found from the above table that Maharashtra, Madras, Andhra Pradesh, Gujarat, Punjab and West Bengal together accounted for about 67% of all factories in the sample universe, 67% of total man-hours for all workers, 73% of materials consumed for manufacture and 69% of consumption of electricity purchased. It is found that Maharashtra ranks first in respect of all the selected items. Ranking second as regards the total number of factories in the sample universe, Madras ranks second also as regards consumption of electricity purchased, but stands third in position as regards man-hours for all workers and materials consumed for manufacture. Though West Bengal is the fifth State in the ranking order, she occupies the second place as regards consumption of materials for manufacture and man-hours for all workers.

APPENDIX I

Statement showing at the three-digit level labour Bureau classification of industries (adopted in sample sector estimates) and classification of Indian industries (adopted in census sector aggregates) in ASI-1965.

srl. no.	industry code no. at 3 digit level		description as in ASI classification
	Labour Bureau classification	ASI classification	
(1)	(2)	(3)	(4)
1	239,010	239	manufacture of textiles not elsewhere classified.
2	201	201	slaughtering, preparation and preserving of meat.
3	202	202	manufacture of dairy products.
4	203	203	canning and preserving of fruits and vegetables.
5	204	204	canning and preserving of fish and other sea foods.
6	205	205	manufacture of grain mill products.
7	206	206	manufacture of bakery products.
8	207	207	sugar factories and refineries.
9	208	208	manufacture of cocoa, chocolate and sugar confectionery.
10	209	209	manufacture of miscellaneous food preparations.
11	211	211	distilling, rectifying and blending of spirits (alcohol).
12	212	212	wine industries.
13	213	213	breweries and manufacture of malt.
14	214	214	soft drinks and carbonated water industries.
15	220	220	tobacco manufacture.
16	231	231	spinning, weaving and finishing of textiles.
17	232	232	knitting mills.
18	233	233	cordage, rope and twine industries.
19	241	241	manufacture of footwear.
20	242	242	repair of footwear.
21	243	243	manufacture of wearing apparel (except footwear).
22	244	244	manufacture of made-up textile goods, except wearing apparel.
23	250	251, 252, 259	saw mills, planing and other wood mills; wooden and cane containers and cane smallware; manufacture of cork and wood products not elsewhere classified.
24	260	260	manufacture of furniture and fixtures.
25	271	271	manufacture of pulp, paper and paper board.
26	280	280	printing, publishing and allied industries.
27	291	291	tanneries and leather finishing plants.
28	292	293	manufacture of leather products except footwear and other wearing apparel.
29	300	300	manufacture of rubber products.

industry code no. at 3 digit level			description as in ASI classification
srl. no.	Labour Bureau classification	ASI classification	
(1)	(2)	(3)	(4)
30	311	311	basic industrial chemicals, including fertilizers.
31	312	312	vegetables and animal oils and fats (except edible oils).
32	319	313, 319	manufacture of paints, varnishes and liquors; manufacture of miscellaneous chemical products.
33	321	321	petroleum refineries.
34	322, 329	329	manufacture of miscellaneous products of petroleum and coal.
35	331	331	manufacture of structural clay products.
36	332	332	manufacture of glass and glass products.
37	333	333	manufacture of pottery, china and earthenware.
38	334	334	manufacture of cement (hydraulic).
39	339	339	manufacture of non-metallic mineral not elsewhere classified.
40	341	341	iron and steel basic industries.
41	342	342	non-ferrous basic metal industries.
42	350	350	manufacture of metal products except machinery and transport equipments.
43	360	360	manufacture of machinery except electrical machinery.
44	370	370	manufacture of electrical machinery, apparatus, appliances and supplies.
45	381	381	ship building and repairing.
46	382	382	manufacture of rail-road equipment.
47	383	383	manufacture of motor vehicles.
48	384	384	repair of motor vehicles.
49	385	385	manufacture of motor cycles and bicycles.
50	386	386	manufacture of aircraft.
51	389	389	manufacture of transport equipment not elsewhere classified.
52	391	391	manufacture of professional and scientific measuring and controlling instruments.
53	392	392	manufacture of photographic and optical goods.
54	393, 394	393	manufacture of watches and clocks.
55	395	394	manufacture of jewellery and related articles.
56	396, 399	292, 385, 399	manufacture of fur products, except wearing apparel; manufacture of musical instruments, manufacture of industries not elsewhere classified.
57	†511	511	electric light and power (generation, transmission & distribution).
58	*512	512	gas manufacture and distribution.
59	*521		
60	*522		
61	*831		
62	†*842		
63	*844		

†In ASI-65 these industries were left out of the scope of the sample sector.

*The counterparts of these industries in ASI-classification remained out-side census sector tabulations in ASI-65.

RECORDS OF THE OFFICE OF THE SECRETARY OF THE ARMY

GOVERNMENT OF INDIA
CABINET SECRETARIAT
DEPARTMENT OF STATISTICS

ANNUAL SURVEY OF INDUSTRIES—1965
COLLECTION OF STATISTICS (CENTRAL) RULES, 1959
(Return under Rules 3 and 4 for the year ending 31st December, 1965)

1. PLEASE READ THE MEMORANDUM BEFORE FILLING THE FORM OF RETURN.
2. INFORMATION IN THIS RETURN SHOULD RELATE TO CALENDAR YEAR EXCEPT WHERE OTHERWISE INDICATED.
3. BLOCKS 1-1, 1-2 AND 1-4 NOT TO BE FILLED BY FACTORY OWNER.

[1] Identification particulars and classificatory characteristics.

1.1. identification particulars and classificatory characteristics.		1.2. particulars of field operations.			
item	code	assistant superintendent	date(s)	superintendent	date(s)
1. Industry		1. verification		10. receipt from the factory	
2. state		2. compilation		11. passed for verification	
3. district		3. submission		12. final scrutiny	
4. permanent serial no.		4. factory's ability to compile (code)		13. despatch	
5. factory serial no.		5. suitability of records (code)		14. name	
6. scheme		6. accounts maintained in (language)		15. signature	
7. stratum		7. response from factory		remarks, if any :	
8. sub-sample		8. name			
9. sample unit no.		9. signature			
10. type of power used		remarks, if any :			
11. *year of establishment					
12. *share of non-national					
13. *capital size					
14. *employment size					
15. *type of ownership and organisation					
16. *type of management					

* To be filled by tabulation unit.

TO BE DETACHED IN THE OFFICE OF THE STATISTICS AUTHORITY

1.3 declaration

I hereby declare that information furnished in the return is correct and complete to the best of my knowledge and belief.

1. signature of the owner of the factory.....
2. full name and address of the owner.....
who has signed this return
(in block letters).....
3. name of the factory.....
4. address of the factory.....
5. district..... 6. state.....
