Sample Sector—Summary Results

The report entitled "Table with Notes on the Annual Survey of Industries—1968, Sample Sector Summary Results was prepared by the NSS Organisation on the basis of the sampling design and tabulation programme approved by the Standing Committee on Improvement of Industrial Statistics which was responsible for formulating the NSS programmes prior to the setting up of the Governing Council for NSSO and the views contained in the report are not necessarily those of the Government of India."

INTRODUCTORY NOTES

1. Introduction

1. Detailed and comprehensive industrial statistics are needed by the Government and industry for industrial planning and development. Prior to 1959, the Census of Manufacturing Industries (CMI) was being carried out under the auspices of the Ministry of Commerce and Industry. Again, before 1959, the Sample Survey of Manufacturing Industries (SSMI) was also in vogue. The responsibility for its data collection devolved upon the Directorate of National Sample Survey and the work of sampling design, technical direction and tabulation of data were being done by the NSS Dept. of the Indian Statistical Institute. With effect from 1959, the CMI and SSMI were discontinued and the Annual Survey of Industries (ASI) was started under the auspices of the Department of Statistics, Cabinet Secretariat, Government of India. The objectives of the ASI are briefly (i) estimation of contribution of manufacturing industries to national income, (ii) systematic study of the shape and structure of industry with a view to industrial planning and development, etc.

2. The Central Statistical Organisation (CSO), and the Technical Wing of the NSS Department of the Indian Statistical Institute (ISI) were jointly responsible for the planning of the survey. Technical direction of field collection of data was given by the Technical Wing of NSS (ISI) in consultation with the Industrial Statistics Wing of CSO.

3. The survey was conducted under the Collection of Statistics Act, 1953 (32 of 1953) and Collection of Statistics Rules, 1959, through the then Directorate of National Sample Survey, who were responsible for actual collection of the data. The then Chief Director of National Sample Survey was the Statistics Authority appointed under the said Act for purpose of collection of these statistics.

4. This volume contains estimates by sub-sample for (a) all industries together at all-India, (b) all industries together by state and (c) each industry at all-India. Moreover, it contains estimates for each industry by state. All these estimates are in respect of the sample sector for the Annual Survey of Industries for 1968 (ASI-68). Results for 17 key items are presented in this volume. Preliminary results for India as a whole, for each state taking all industries together and for each industry at all-India level were furnished to the CSO in early October, 1972.

a. Scope and Coverage

5. Data were collected as per the accounting years of the factories surveyed the specific accounting year for the purpose was that ending during April 1, 1968 and March 31, 1969.

6. The survey commenced in July, 1969 and continued upto November, 1970.

7. The ASI-1968 survey was extended to the whole of the Indian Union.

8. The survey relates to all such factories as are registered under sections 2m (i) and 2m (ii) of the Factories Act, 1948. These sections refer respectively to factories employing ten or more workers using power, and to those employing twenty or more workers, if not using power, on any

*This report was first submitted as Draft report no. 232 in March, 1973.

day in the previous year. The universe comprised all those establishments except defence installations, technical training institutions, factories engaged in hotels and cafe service and storage & distribution. The sample for general comprised all factories which employed more than 10 persons and less than 500 persons if no power. The rest of the universe comprised those units classified under industry no. 511. Frames were collected by the Director of NSS from the Chief Inspector of Factories. The sample size was 1000. The preceding year (e.g. on 31-12-1966 or ASI-1967). However in ASI-1968 the sample universe comprised registered factories as on 31-12-1967 supplement by newly added factories.

9. Sample factories belonging to the excluded categories, gone out of existence closed or derecognised all those which were returned to the Government. The sample factories were taken before the publication of the sample surveyed" excludes only the non-responding factories.

10. A copy of the schedule of investigation and the survey is given in Appendix II.

3. Concepts and Definitions

11. Some of the concepts involved in the survey on which estimates are furnished herewith are as follows:

(i) *gross value of plant and machinery*—It connotes the original unprecipitated value of plant and machinery at the end of the accounting period. It included book value of the owned, leased, hired, and borrowed fixed assets. It included value of rented-in plants etc., at the time of the survey. Excluded were rented-out plant and machinery.

(ii) *fixed capital*.—It denoted the value of all fixed assets, including leasehold office buildings, etc.

(iii) *working capital*.—It connotes stocks as at the end of the accounting year of materials, stores, fuel, spare parts, etc. and bank balances. It included fixed deposits as well as long term loans and investments.

(iv) *invested Capital*.—It was the total of fixed capital and physical working capital comprising materials, semi-finished goods, finished goods, etc.

(v) *workers*.—The term 'worker' was used in the same sense as in the Factories Act, 1948 and excluded persons holding positions of management in a fiduciary position. It included persons employed through contract and apprentices.

(vi) *all employees*.—It comprised all workers and persons other than workers and included persons in the home office employed in manufacturing, but excluded persons engaged in retail sales or delivery of goods.

(vii) *emoluments*.—It comprised payments made by way of wages, salaries and allowances and included value of payments in kind, but excluded contribution to provident fund, gratuity and other charges.

(viii) *input*.—It included costs of fuels and materials consumed in manufacture and repairs, expenses on distribution and industrial services purchased as direct taxes paid by the factory like local rates, licences, etc. It also included the cost of goods sold in the same condition as based but excluded costs of advertising, agents' remuneration and material supplies for processing.

(ix) *net balance of semi-finished goods.*—It was the excess of value of goods in process as at the end of the accounting year over that as at the beginning of the accounting year, positive or negative.

(x) *output.*—Ex-factory value of all finished goods produced and the value only of industrial services rendered by the factory during the reference year were included. Also included were the net balance of semi-finished goods as at the end of the accounting year and the sale value of goods sold in the same condition as purchased.

(xi) *depreciation.*—It was taken as provided for the reference year by the factory or estimated on the basis of the cost of installation and working life of fixed assets in terms of number of years.

12. Total number of factories in all-India for ASI-1968 came to 56971, of which 44014 belonged to sample universe. Number of samples selected for ASI-1968 was 16024. During the time of tabulation extent of non-response was found to be 1443 or about 9 per cent.

5. Particulars of Tables

13. The zero (0) series tables show the distribution of factories in the sample universe as well as in the sample by industry at all-India, at state all industries combined, and at state each industry level. Table 3 has been furnished in two parts i.e. for sampled industries and the complete enumeration industries separately. Table 4 also has been given in two parts, for sampled strata and complete enumeration strata. Only combined estimates have been furnished, in all the Tables 1 to 4.

14. Estimates left blank or shown as '—' (nil) indicate that the concerned factories had no contribution to report on the characteristic. Estimates marked '0' (zero) mean that the contribution was less than 1 (one) in terms of the unit prescribed.

15. In view of section 7 of the Collection of Statistics Act, 1953 and as desired by the Central Statistical Organisation, wherever total number of factories is less than three in the sample universe of a state, or an industry or of a state by industry, the estimates for them have not been furnished in Tables 2, 3 and 4 of the report. These estimates were forwarded to the Industrial Statistics Wing of the Central Statistical Organisation. However, these estimates have been taken into consideration for building up higher level tables.

6. Sampling Design

16. In earlier rounds, the entire registered factory sector was divided into two sectors (i) census sector comprising factories having on an average 50 or more workers using power and 100 or workers not using power and (ii) sample sector, comprising the rest of the factories, from which 6000 factories were drawn as samples. Later on, the Standing Committee for the Improvement of Industrial Statistics decided, keeping the census sector as it was in earlier rounds, to cover the entire sample universe in the course of three rounds of ASI-1968, ASI-1969 and ASI-1970. It was felt that this integrated scheme would be useful to furnish results at the ultimate level of industrial classification as per ASI classification of industries at the end of ASI-1970, as was done in census sector.

17. For the first time in ASI-1968, it was decided to completely enumerate the factories of such industries as having less than 100 units in the sample universe of all-India. In absence of complete lists of factories for ASI-1968 for all the states during the time of sample selection, we had to depend on the lists for ASI-1967 for determining such industries. Total number of such industries became 33. Industry codes for them are 202, 203, 204, 208, 211, 212, 213, 214, 233, 241, 242, 244, 292, 312, 321, 322, 329, 333, 334, 381, 382, 383, 385, 386, 392, 393, 394, 395, 396, 512, 522 and 831. Certain states, viz., Andamans, Chandigarh, Goa, H. P., Jammu & Kashmir, Pondicherry, Manipur and Tripura were completely enumerated in the sample sector as in previous years.

18. In fact, census Sector for ASI-1968 comprised all such factories of the frame as on 31-12-1967 as having 50 or more workers if using power and 100 or more workers if not using power in at least any of the previous three rounds. Thus, some ASI-65, ASI-66 or ASI-67 factories were repeated in ASI-68 census sector, even though their employment strength as per ASI-68 frame was

24. For comparative study, six key items of industrial activity, culled from Table 2 of the report, are presented in Table B below in respect of the all the states having at least Rs. 100 crores of output in the sample sector of ASI-68. Together they account for about three-fourths each of sample sector totals of no. of employees, emoluments, input, output and value added. Arranged in the descending order of their value added, Maharashtra tops the list in respect of all the characteristics except input. In 1967 these same seven states had output of more than Rs. 100 crores.
