Annual Survey of Industries - 1969

Sample Sector - Detailed Results

1. Introductory Notes

1.1 In NSS draft report no.247 results for 18 key items of industrial activity in India Collected in the sample sector of the Annual Survey of Industries 1969 have been published. This volume provides sample sector estimates of some more detailed items of capital structure, employment and emoluments, input and output collected in 1969.

1.2 The total frame comprised all factories registered under sections 2m(i) and 2m(ii) of the Indian Factories Act. 1948, as on 31st December 1967, including those not furnishing information on number of workers engaged or reported closed in the list of factories. This frame was further supplemented by newly added factories in 1968 and 1969. Sections 2m(i) and 2m(ii) of the act refer respectively to factories using power and employing 10 or more workers or factories not using power and employing 20 or more workers on any day of the preceding twelve months. The sample sector generally comprised all factories in the total frame employing on an average less than 50 workers, if using power and less than 100 workers, if not using power. In fact census sector for ASI-69 generally consisted of all such factories of the frame as were covered in the same sector in ASI-1968 *Supplemented by new additions during 1969.*

It excluded defence installations, units engaged in storage and distribution of oil, technical training institutes not producing anything for sale or exchange, as well as all units registered as hotels and cafe (industry no.842). Through the undertaking approach, all factories belonging to the electric light and power industry (industry no.511) were covered in the census sector on a complete enumeration basis and they were thus left out of the scope of the sample sector altogether.

1.3 In the appended tables, the term 'industry' refers to the Labour Bureau classification of industries at the three-digit level. This is in accordance with the information available in the frame as collected by Field Division of the National Sample Survey from the officers of the Chief Inspectors of Factories in different states. Appendix II provides a statement showing Labour Bureau classification (at three-digit level) and its corresponding ASI industry classification (also at three-digit level).

Annual Survey of Industries - 1969

1.4 In this round of ASI, data were collected as per the accounting year of the factories surveyed and the specific accounting year for this purpose was that ending during April 1 1969 and March 31, 1970.

2. Concepts and Definitions

2.1 An idea of the conceptual coverage of some of the terms used in the survey is presented below.

a) Fixed Capital : Depreciated book values of fixed assets as on the closing date of the accounting year of the factory were collected. Fixed assets covered all goods with a normal economic life of one year or more and used by the factory for its own purpose saving those solely used for post manufacture distribution. These contained land, building, improvement to land, plant, machinery and tools, transport equipment and other fixed assets.

b) Working Capital : Like fixed capital, information on working Capital formation (physical approach) : It comprised all additions to capital as ~~distinct~~^{distinct} from repair work. It is composed of value of all fixed assets, whether fully paid or not, received during the accounting year, value of all purchases of materials on capital account and amount paid for service charges on this account during the accounting year.

_____ amount paid during the year for the use of any item of fixed asset taken on lease or rent or royalty basis.

c) Number of working days : Working days comprised days on which any manufacturing process was carried on and included days spent exclusively on repair and maintenance of fixed assets. Estimates presented in this report is of the total number at the specified level and not the average per factory.

d) Workers : This term was used in the same sense as in the Factories Act, 1948, and excluded persons holding the positions of supervision and management or employed in a confidential position. The average number of all workers/employees were calculated by adding all concerned persons attending and on leave with pay, including concerned persons on strike, over each shift of a working day and dividing the result by the number of working days. Total number of workers have been shown in this report separately for directly employed and employed through contractors.

Contd.

Annual Survey of Industries - 1969

g) Salaries, Wages etc. : This term included all payments made during the year in cash as compensation for work done. It included all bonuses and overtime payments but excluded the value of payments in kind and employer's contribution to social security measures.

h) Value of benefits in kind : This was the cost value or the net cost of the concession, as the case might be, in respect of all supplies made and all services rendered whether individually or to groups, free of cost or for part payment, such as food and food articles, fuels, housing accommodation, electricity, water, sanitary services as well as subsidies involved in the operation of facilities with regard to transport, medical attention, education, recreation, entertainment and welfare projects, etc. This was exclusive of employer's contribution to provident fund, pension, gratuity or other social security measures.

i) Value of fuels or materials etc. consumed : On the basis of the cost of fuel, material etc. landed at the factory including inward transport cost, commission to purchasing agents, taxes or duties paid etc., this value was calculated for each item of fuel, material etc. consumed during the year in the factory materials consumed for manufacture of capital items for factory sown use were included. Information on materials consumed for repair and maintenance of its fixed assets was collected separately. Intermediate products, i.e., materials produced and further consumed in the factory, were excluded.

j) Value of other input services : These expenses included charges on account of non-industrial services such as inward transport, purchase agency, postage, stationery and printing and personalised and business services such as audit, accounts, bank and other services which had originated outside the reporting factory and were not already included in the value of fuels, materials etc. as defined in sub-para (i) above. Also included were sundry indirect taxes paid by the factory like purchase tax, local rate and factory licence.

k) Input : It contained the value of fuels, materials etc. as defined in sub-para (h), the value of industrial service rendered to the factory in connection with repairs and maintenance of fixed capital of the factory or with other manufacturing processes as well as the value of other input services, as defined in sub-para (j) above. It included the value of goods to be sold in the same condition as purchased, but excluded director's fee and managing agent's remuneration and office allowances.

Annual Survey of Industries - 1969

b) Output : This comprised the ex-factory value, calculated on the basis of sale value, minus all distributive costs of all finished goods produced by the factory (products) and by products during the year including the value of industrial service rendered by the factory during the year as well as the net balance of semi-finished goods as at the end of the year. Output included final products for own use as goods in the factory, capital item produced for factory's own use and goods bought and resold in the same condition as purchased. It excluded intermediate products.

3. Particulars of Tables

3.1 In Tables (1), (2), (3) & (4) estimates (sub-samples combined) have been provided for detailed aspects of industrial activity respectively for all industries combined at all India, for all industries combined in each state, for each industry at all India and for each industry at the State level. Till ASI-1967, estimated for only major industries in respect of sampled strata and all the completely enumerated industries in a state were furnished in the reports on detailed results. This was done since in case of Table (4) sample size was too small to throw up usable estimates of the detailed items for minor industries of sampled strata in a state. Unlike the earlier presentation of results, since ASI-68 estimates for all the industries, major or minor, are being furnished in Table (4), because the integrated scheme of completely enumerating the industries in course of three rounds of ASI-68, ASI-69 and ASI-70 has resulted in an increased sample size ^{in general} for all the industries in a state (sample size being about twice that in earlier rounds). ↑

3.2 Estimates shown as '-' (dash) indicate that the concerned surveyed factories had no contribution to report on the characteristics. In all tables, it has been marked with 0 (zero), whenever emerging estimate/aggregate is less than half the prescribed unit of the item in the table. Due to rounding off, the component estimates in some cases do not add up to the totals furnished.

3.3 The last item in all tables - samples surveyed - refers to the samples selected as reduced by non-response factories. It comprises all surveyed factories, including those treated as blank.

Industries are given as per Labour Bureau Classification of Industries in accordance with classification used in the frame for selection of samples.

Annual Survey of Industries - 1969

3.4 In view of section 7 of collection of Statistics Act, 1953, whenever in an industry in a state, the number of factories is less than three units in the universe of the sample sector as per list of factories 1967 supplemented with new additions in 1968, and 1969, data for such industry have not been furnished in Table (4) in the report. Contribution of these cells have however been taken into consideration for building up estimates presented in this report in Tables (3), (2) and (1). Similarly at all India level if the total no. of factories is less than three in any industry, data for such industry have not been presented in Table (3). However, contribution of those industries have been accounted for in building up estimates for Table (1).

3.5 Whenever estimates furnished in this report differ from that of the summary results presented earlier, they are due to one or more of the following factors : (a) changed number of samples surveyed, (b) the rounding off of a number of items into which a key item has been subdivided for the purpose of this report, (c) receipt of clarifications relating to detailed items from the NSS Field after the completion of the report on summary results (d) summary results were prepared from summary block whereas estimates furnished in this report are based on actual detailed results, etc.

3.6 There were 47788 factories in the sample universe of which 17963 were taken as samples. Non response factories for the detailed report numbered 797 or about 4% as against 997 for the ASI-69 Report on sample sector summary results.

3.7 The estimates of seven items viz. (i) total fixed capital (ii) total working capital (iii) all workers (iv) salaries to all workers (v) value of fuels (vi) total inputs and (vii) total output as furnished in the enclosed Tables (1) to (3) have been taken from the Report on ASI-69 sample sector : Summary Results. These estimated totals usually contain one or two minor items over and above, those shown in the report. Again for ready reference, estimates of five more selected items viz. (i) total man hours (ii) all employees (iii) total emoluments (iv) total depreciation and (v) value added at all India; state levels and all India each industry levels have been shown in Tables 2(A) and 3(A) of Appendix I. These estimates have also been reproduced from the above mentioned Report on Summary Results.

Contd.

Annual Survey of Industries - 1969

4. Sampling Design

4.1 In earlier rounds, the entire registered factory sector was divided into two sectors (i) census sector comprising factories having on an average 50 or more workers using power and 100 or workers not, using power and (ii) sample sector, comprising the rest of the factories, from which 6000 factories were drawn as samples. Later on, the Standing Committee for the Improvement of Industrial Statistics keeping the census sector as it was in earlier rounds, decided to cover the entire sample universe in the course of three rounds of ASI-1968, ASI-1969 and ASI-1970. It was felt that this integrated scheme would be useful to furnish results at the ~~6-digit~~^{ultimate digit} level of industry code as per ASI classification of industries at the end of ASI-1970, as is done in census sector. As with the census sector, it was also decided to cover newly added factories during 1968 to 1970 in the sample sector.

4.2 For the purpose of ASI-1968 lists of factories registered under the Factories Act 1948 as on 31.12.67 were collected from each state. From the factories registered under section 2m(i) and having 50 or more workers in at least any one of the previous three rounds and factories registered under section 2m(ii) and having 100 or more workers in at least any one of the previous three rounds were selected for the census sector as usual. All these factories were continued to remain in census sector during the course of ASI-1969 and ASI-1970. From the rest of the factories, except in some states or industries (vide para 4.3) one-third factories were selected for survey in ASI-1968 from different strata where a stratum refers to a state x industry cell. Another one-third factories were selected from the same stratum for survey in ASI-1969. The remaining one-third factories will be covered in ASI-1970.

Annual Survey of Industries - 1969

4.3 For the first time in ASI-1968, it was decided to completely enumerate the factories of such industries as having less than 100 units in the sample universe of all-India. In absence of complete lists of factories for ASI-1968 for all the states during the time of sample selection, we had to depend on the lists for ASI-1967 for determining such industries. Total number of such industries became 33. Industry codes for them are 202, 203, 204, 208, 211, 212, 213, 214, 233, 241, 242, 244, 292, 312, 321, 322, 329, 333, 334, 381, 382, 383, 385, 386, 392, 393, 394, 395, 396, 512, 521, 522 and 831. Certain union-territories^{and States} viz., Andamans, Chandigarh, Goa, Himachal Pradesh, Jammu & Kashmir, Pondicherry, Manipur and Tripura were completely enumerated in the sample sector as in previous years. All the industries and states listed above were completely enumerated in ASI-1969.

4.4 As regards the newly registered factories in 1968, those engaging 50 or more workers with power and 100 or more workers without power were covered in the census sector of ASI-1968. Such factories remained in the census sector of ASI-1969 irrespective of their employment size. From the remaining factories i.e. those which belonged to the sample sector, those states and industries as mentioned in para 4.3 above were completely enumerated. From the remaining factories of the sample sector, one-third factories were selected from each sampled stratum for the survey in ASI-1968. Another one-third factories were selected from all such sampled strata for ASI-1969. The rest was planned to be covered in ASI-1970. Again, from the list of factories newly registered in 1969, those engaging 50 or more workers with power and 100 or more workers without power were covered in the census sector. Barring such industries and states as are to be completely enumerated, half of the factories were selected for survey in ASI-1969 from each sampled stratum. The remaining half of the factories was planned to be surveyed in ASI-1970.

4.5 For the sampled strata, a stratified unistage design was adopted, a stratum being an industry within a state and the sample unit being a factory. Samples were drawn in the form of two independent interpenetrating sub-samples. The sampling design was a self-weighting one.

Contd.

Annual Survey of Industries - 1969

4.6 Within each industry in a state the factories were arranged by size classes of number of workers before drawing samples for ASI-1968. Sampling serial nos. were given starting from 1 to all such factories in a stratum. Then selection of factories was done linear systematically with the interval of 6 in the case of both original and supplementary lists of factories for ASI-1968. Two random nos. R_1 and R_2 between 1 to 6 were selected without replacement. Thus factories having sampling serial nos. $R_1, R_1+6, R_1+12 \dots\dots\dots$ and $R_2, R_2+6, R_2+12 \dots\dots\dots$ constituted sub-sample 1 and sub-sample 2 respectively in ASI-1968.

4.7 In ASI-1969, two random numbers R_1' and R_2' between 1 and 6 were selected without replacement subject to the condition that R_1' and R_2' of ASI-1969 were different from R_1 and R_2 of ASI-1968 of a particular sampled stratum. Two linear systematic samples $R_1', R_1'+6, R_1'+12 \dots\dots\dots$ and $R_2', R_2'+6, R_2'+12$ constituted sub-sample 1 and sub-sample 2 respectively in ASI-1969. Same method was followed in case of last year's supplementary frame, i.e., factories newly registered in 1968. But half of the factories from the supplementary frame for ASI-1969, i.e., factories newly registered in 1969, were selected as samples. The selection procedure was same as that of ASI-1968, except R_1 and R_2 lay between 1 to 4 and the interval for linear systematic samples was 4. In ASI-1969, the ~~entire~~ industries and ~~entire~~ states remained the same as those of ASI-1968.

completely enumerated *completely enumerated*

5. Estimation Procedure

5.1 Different types of lists of factories as were used for the integrated survey conducted during ASI-1968 to ASI-1970 were designated by different scheme numbers. Following is the references of the lists used.

- Scheme 1 : list of census sector factories as on 31.12.67
- Scheme 2 : list of sample sector factories as on 31.12.67
- Scheme 3 : list of census sector factories newly added during 1968
- Scheme 4 : list of census sector factories newly added during 1969
- Scheme 5 : list of sample sector factories newly added during 1968
- Scheme 6 : list of all electricity undertakings
- Scheme 7 : list of sample sector factories newly added during 1969
- Scheme 8 : list of census sector factories newly added during 1970
- Scheme 9 : list of sample sector factories newly added during 1970

Annual Survey of Industries - 1969

Thus, ASI-¹⁹⁶⁹~~1970~~ sample sector was concerned with the lists bearing scheme numbers 2, 5 and 7 only. The estimates obtained from schemes 2, 5 and 7 taken together have been shown in tables 1 to 4. Industry, in all-India each industry or state by each industry tables refers to the 3-digit industry code as per Labour Bureau Classification. As already known, a state by industry code is a stratum. There are two categories of strata, of which (i) category-1; sampled stratum and (ii) category-2; complete enumeration stratum (c.e. stratum).

5.2 In view of the sampling design as enunciated above a particular industry at all-India may consist of strata, of which (a) all of them are sampled strata in all the states (if there be no factory in c.e. strata) or (b) all of them are c.e. strata in all the states or (c) some of them are sampled strata in certain states and the remaining are c.e. strata in other states. All the three above cases may also occur in case of a state all industries together.

5.3 In view of the occurrence of high non-response cases, instead of using fixed multipliers, variable multipliers were used for the purpose of estimation. Again, for the purpose of operational convenience and quick tabulation and also considering the volume of scheme 7 factories to be negligible in comparison with scheme 2 plus scheme 5, multipliers were calculated on the basis of schemes 2, 5 and 7 taken together.

5.4 Estimation procedure at state by industry level was as follows :-

Let,

- Y_{ijkl} = value of a characteristic considered for lth factory in ith sub-sample, jth state and kth industry in either of scheme 2, 5 or 7.
- n_{ijk} = total no. of samples including zero cases in the ith sub-sample, jth state and kth industry taking schemes 2, 5 and 7 together.
- N_{jk} = total no. of factories in jth state and kth industry.
- M_{ijk} = multiplier for ith sub-sample, jth state and kth industry in case of a sampled stratum.
- = $\frac{N_{jk}}{n_{ijk}}$

Contd.

Annual Survey of Industries - 1969

M'_{jk} = multiplier (taking both sub-samples together) for jth state and kth industry in case of a c.e. stratum

$$= \frac{N_{jk}}{n_{1jk} + n_{2jk}}$$

(M'_{jk} is equal to 1 when there is no non-response)

In table 4, for a sampled stratum, sub-sample estimates were :

$$T_{ijk} = M'_{ijk} \sum_{l=1}^{n_{ijk}} Y_{ijkl}$$

and combined estimate was

$$T_{jk} = \frac{1}{2}(T_{1jk} + T_{2jk})$$

In table 4, for a c.e. stratum, combined estimate was :

$$T'_{jk} = M'_{jk} \sum Y_{1jkl} + M'_{jk} \sum Y_{2jkl}$$

In table 3, where an industry at all-India comprised sampled strata and c.e. strata both, sub-sample estimates were :

$$T_{ik} = \sum_j T_{ijk} + \sum_j T'_{jk} \text{ (for relevant states)}$$

and combined estimate was

$$T_k = \frac{1}{2} (T_{1k} + T_{2k})$$

Again in table 3, where an industry at all-India comprised c.e. strata only, combined estimate was calculated as :

$$T'_{jk} = \sum_j T'_{jk}$$

For table 3, where a state taking all industries together comprised sampled strata and c.e. strata both, sub-sample estimates were :

$$T_{ij} = \sum_k T_{ijk} + \sum_k T'_{jk} \text{ (relevant industries)}$$

and combined estimate was

$$T_j = \frac{1}{2} (T_{1j} + T_{2j})$$

Annual Survey of Industries - 1969

In table 2, where a state taking all industries together consisted of c.e. strata only, combined estimate was calculated as :

$$T'_j = \sum_k T'_{jk}$$

For table 1 i.e., at all-India all industries level, sub-sample estimates were :

$$T_i = \sum_k T_{ik} + \sum_k T'_k \text{ (relevant industries) or } \sum_{ij} T_{ij} + \sum_j T'_j \text{ (relevant states)}$$

and combined estimate was

$$T = \frac{1}{2} (T_1 + T_2)$$

6. Summary of findings

6.1 The following observations relating to the sample sector of ASI-1969 may be made from Table (1) :

(a) Total physical capital formation in 1969 in the sample sector was about Rs 59 crores of which new fixed assets acquired by purchase constituted about 77%. Thus physical capital formation was about 17% of total net closing value of all fixed assets.

(b) Rent paid ^{amounted to} ~~was about~~ Rs 10 crores ^{while the} ~~in the context of~~ owned fixed capital ^{was} ~~at~~ about Rs 354 crores.

(c) Men workers were about 5 times as numerous as women workers, while contract workers were only about 9% of all direct men and women workers.

(d) While wages etc. for direct ^{male} ~~male~~ workers were about Rs 1490 per workers per annum, direct female workers received about Rs 547 per worker per annum.

(e) Electricity consumed through purchase was the most important fuel item, constituting about ^{46%} ~~46%~~ of the value of all fuels consumed, estimated at Rs 45 crores.

(f) The value of materials consumed for manufacture was about Rs 1518 crores in the context of the value of total input at Rs 1720 crores.

(g) The sale value of goods sold in the same condition as purchased was found to be about 8% of the total output in same sector.

Annual Survey of Industries - 1969

6.2 Information relating to seven states considered most important as regards the number of factories in the sample universe, is furnished below in respect of four broad economic indicators selected from Table (2).

Table (A) : Table showing the relative importance in selected aspects of industrial activity of seven most important states arranged in the order of their number of factories.

Sl. no.	State (with code)	no. of factories in sample universe (actual)	total no. of working days (thousand)	value of plant & machinery (closing) (Rs. Lakhs)

Annual Survey of Industries - 1969

Appendix II

Statement showing at the three-digit level Labour Bureau classification of industries (adopted in sample sector estimates) and classification of Indian industries (adopted in census sector aggregates) in ASI-1969

srl. no.	industry code no. at 3 digit level		description as in ASI classification
	Labour Bureau classification	ASI classification	
(1)	(2)	(3)	(4)
1	239,010	239	manufacture of textiles not elsewhere classified
2	201	201	slaughtering, preparation and preserving of meat
3	202	202	manufacture of dairy products
4	203	203	canning and preserving of fruits and vegetables
5	204	204	canning and preserving of fish and other sea foods
6	205	205	manufacture of grain mill products
7	206	206	manufacture of bakery products
8	207	207	sugar factories and refineries
9	208	208	manufacture of cocoa, chocolate and sugar confectionery
10	209	209	manufacture of miscellaneous food preparation
11	211	211	distilling, rectifying and blending of spirits(alcohol)
12	212	212	wine industries
13	213	213	breweries and manufacture of malt
14	214	214	soft drinks and carbonated water industries
15	220	220	tobacco manufacture
16	231	231	spinning, weaving and finishing of textiles
17	232	232	knitting mills
18	233	233	cordage, rope, and twine industries
19	241	241	manufacture of footwear
20	242	242	repair of footwear
21	243	243	manufacture of wearing apparel (except footwear)
22	244	244	manufacture of made-up textile goods, except wearing apparel
23	250	251,252 259	saw mills, planning and other wood mills; wooden and cane containers and cane small ware; manufacture of cork and wood products not elsewhere classified
24	260	260	manufacture of furniture and fixtures
25	271	271	manufacture of pulp, paper and paper board
26	280	280	printing, publishing and allied industries
27	291	291	tanneries and leather finishing plants
28	291	293	manufacture of leather products except footwear and other wearing apparel
29	300	300	manufacture of rubber products
30	311	311	basic industrial chemicals, including fertilizers
31	312	312	vegetables and animal oils and fats (except edible oils)
32	319	313,319	manufacture of paints, varnishes and lacquers; manufacture of miscellaneous chemical products
33	321	321	petroleum refineries?
34	322,329	329	manufacture of miscellaneous products of petroleum and coal
35	331	331	manufacture of structural clay products
36	332	332	manufacture of glass and glass products

Annual Survey of Industries - 1969

srl. no.	industry code no. at 3 digit level		description as in ASI classification
	Labour Bureau classification	ASI classification	
(1)	(2)	(3)	(4)
37	333	333	manufacture of pottery, china and earthenware
38	334	334	manufacture of cement (hydraulic)
39	339	339	manufacture of non-metallic mineral not elsewhere classified
40	341	341	iron and steel basic industries
41	342	342	non-ferrous basic metal industries
42	350	350	manufacture of metal products except machinery and transport equipments
43	360	360	manufacture of machinery except electrical machinery
44	370	370	manufacture of electrical machinery, apparatus, appliances and supplies
45	381	381	ship building and repairing
46	382	382	manufacture of rail-road equipment
47	383	383	manufacture of motor vehicles
48	384	384	repair of motor vehicles
49	385	385	manufacture of motor cycles and bicycles
50	386	386	manufacture of aircraft
51	389	389	manufacture of transport equipment not elsewhere classified
52	391	391	manufacture of professional and scientific measuring and controlling instruments
53	392	392	manufacture of photographic and optical goods
54	393, 394	393	manufacture of watches and clocks
55	395	394	manufacture of jewellery and related articles
56	396, 399	292, 395, 399	manufacture of fur products, except wearing apparel; manufacture of musical instruments; manufacture of industries not elsewhere classified
57	+511	511	electric light and power (generation, transmission & distribution)
58	512	512	gas manufacture and distribution
59	*521		
60	*522		
61	*831		
62	*842		
63	*844		

+ In Asi-69 these industries were left out of the scope of the sample sector.

* The counterparts of these industries in ASI-classification remained outside census sector tabulations in ASI-69.

GOVERNMENT OF INDIA
CABINET SECRETARIAT
DEPARTMENT OF STATISTICS
ANNUAL SURVEY OF INDUSTRIES 1969
COLLECTION OF STATISTICS (CENTRAL) RULES, 1959
 (Return under Rules 3 and 4 for the accounting year 1969)

CONFIDENTIAL

1. PLEASE READ THE MEMORANDUM BEFORE FILLING THE FORM OF RETURN.
2. INFORMATION IN THE RETURN SHOULD RELATE TO THE ACCOUNTING YEAR OF THE FACTORY ENDING ON ANY DAY DURING 1ST APRIL 1969 AND 31ST MARCH 1970.
3. BLOCKS 1-1, 1-3 AND 2 NOT TO BE FILLED IN BY FACTORY OWNER.
4. FIGURES ARE TO BE REPORTED IN NEAREST WHOLE NUMBER/RUPEE, EXCEPT FOR ITEMS 5 AND 6 OF BLOCK 7.

block—1 identification particulars, classificatory characteristics and particulars of field operations					
1-1 identification particulars		1-2 classificatory characteristics		1-3 particulars of field operations	
item		item	code	asstt. supdt.	date(s)
1. scheme		1. location (code)		1. verification	
2. factory sr. no.		2. year of initial production		2. compilation	
3. permanent sr. no.		3. year of production at present site		3. submission	
4. industry		4. share of non-national (%)		4. response from factory.	
5. state		5. type of ownership and organisation (code)		5. factory's ability to compile (code)	
6. district		6. type of management (code)		6. suitability of records (code)	
7. s.s.i. permanent sr. no.		7. accounts closed on		7. accounts maintained in (language)	
8. coop. soc. perm. sr. no.		8. months of operation during the a/c year (code)		8. name	
9. stratum		9. type of power used (code)		9. signature	
10. sub-sample		10. *capital size		superintendent	date(s)
11. sample unit no.		11. *employment size		10. receipt from factory	
				11. passed for verification	
				12. final scrutiny	
				13. despatch	
				14. name	
				15. signature	

block—2 identification and summary information A.S.I. 1969					
1. scheme		11. type of ownership and organisation		21. wages to workers (Rs.)	
2. factory sr. no. ¹		12. type of power used		22. total emoluments (Rs.)	
3. permanent sr. no.		13. *capital size		23. fuels etc. consumed (Rs.)	
4. industry		14. fixed capital closing (Rs.)		24. materials consumed (Rs.)	
5. state		15. working capital closing (Rs.)		25. total input (Rs.)	
6. district		16. invested capital closing (Rs.)		26. products (Rs.)	
7. s.s.i. permanent sr. no.		17. outstanding loans (Rs.)		27. net value of semi-finished goods (Rs.)	
8. stratum		18. all workers (no.)		28. total output (Rs.)	
9. sub-sample		19. man-hours (no.)		29. depreciation (Rs.)	
10. sample unit no.		20. all employees (no.)		30. value added (Rs.)	

9. sub-sample	19. man-hours (no.)	29. depreciation (Rs.)
10. sample unit no.	20. all employees (no.)	30. value added (Rs.)

*to be filled by tabulation unit.

**TO BE DETACHED IN THE OFFICE OF THE STATISTICS AUTHORITY
declaration to be filled by the factory owner**

block—3

I hereby declare that information furnished in the return is correct and complete to the best of my knowledge and belief.

1. signature of the owner of the factory
2. full name and address of the owner who has signed
this return (in block letters).....
3. name of the factory.....
4. name of the joint stock company owning the factory.....
5. address of the factory.....
6. town7. district.....8. state.....
