The Survey on Employment and Unemployment
NSS : 27th Round : October 1972 - September 1973
(Preliminary and Provisional)

Section 1 Introduction, Concepts and Definition

Introduction

1.0 In the twentyseventh round of the National Sample Survey (NSS) a country-wide comprehensive survey on the nature and extent of employment and unemployment was conducted. Since 1962-63 by the NSS discontinued having in its annual programme, the survey on employment and unemployment in rural areas ^{1/}. The labour force survey in urban areas, however, continued till the twentythird round (1968-69). The conceptual frame-work of the preceding series of employment - unemployment surveys in rural and urban areas was based on the Standard ON LABOUR FORCE SURVEYS prescribed by the Central Statistical Organisation (C.S.O.).

1.1 Since 1960 the users of the data on NSS employment surveys started questioning their reliability. There was "considerable divergence of opinion regarding appropriate definitions of yardsticks for measuring unemployment and under employment". Doubts were raised in regard to the applicability of the C.S.O standard in the surveys to be conducted in developing countries like India. These doubts and queries became the cause of concern in view of the fact that the estimates of the employment and under-employment worked out on the basis of the Census, the NSS and the Employment Exchange data were widely differing from one another and the NSS estimates, compared to other estimates, were consistent lower. The necessity, therefore, was keenly felt for suitable re-orientation of the concepts and approach of the enquiry that would lead to the recognition and proper reflection in the survey of the "extremely heterogeneous" character of "the labour supply available to the Indian Economy" which the Standard Concepts (C.S.O.) could not adequately satisfy.

1/ The NSS employment and unemployment surveys in rural areas were discontinued after the 17th round, although in the 18th, 19th and also in some subsequent rounds some broad information on the subject were collected through the integrated household schedules 16 and 17.

1.2 The Planning Commission set up in August 1968 an Expert Committee on Unemployment Estimates with Prof. M.L. Dantwaila as its Chairman and asked the Committee to go into all the relevant issues involved in the measurement of Unemployment and Under-employment and to recommend, for adoption in surveys, an alternative conceptual frame-work and a changed procedure of enquiry. The expert Committee submitted its Report in March 1970.

1.3 The NSSO Governing Council in its meeting held on 16-17 April 1971 decided to conduct a household survey on employment and unemployment as the principal subject of enquiry in the twentyseventh round of NSS keeping in view the main recommendations of the Expert Committee. A technical Working Group set up by the NSSO Governing Council framed an appropriate schedule for the enquiry and also worked out the procedure of data collection which were finally approved by the Governing Council in its meeting held in November 1971. The draft Schedule was put to a pre-survey trial by the survey staff of Field Operations Division (FOD), NSSO before it was made ready for the actual survey.

1.4 All the states (except Nagaland and West Bengal) and some Union Territories participated in the NSS 27th round programme on at least equal matching basis to get more reliable estimates for their respective states. Some states, for this particular survey, took more than equal matching sample to improve their respective State estimates. The survey extended over the whole of rural and urban areas of Indian Union excepting Ladakh district of Jammu & Kashmir state; rural areas of Pal and Sanri tehsils of district Surguja and Puriapur, Dantewara, Konta and Narayanpur tehsils of district Chandra and Melghat tehsil of district Anaravati of Maharashtra; rural areas of Nagaland; disturbed villages of Dripura; rural areas of the Union Territories of Arunachal Pradesh; Andaman and Nicobar Islands; Mizoram, Laccadive, Minicoy and Amindivi Islands and Dadra and Nagar Haveli.

1.5 The sampling design of the survey was stratified two stage with villages and urban blocks being the first stage units respectively in rural and urban sectors. In both the sectors, the households were the second stage units ^{2/}. In the Central sample altogether 9088 villages and 4832 urban blocks were selected as the first stage units. The design was made self-weighting

^{2/} A Note on Sample design and Estimation procedure is given in Appendix I.

at the sub-stratum and region level for rural areas and sub-stratum and state level for urban areas ^{3/}. On an average 12 households per sample village/block were selected in each of which the schedule of enquiry was canvassed.

1.6 The survey work was started in October 1972 and continued upto September 1973 ^{4/}. The survey period was divided into 4 sub-rounds (which together covers one full year i.e. four agricultural seasons, obviously both peak and lean periods having been included) each being of three months duration. The sample units were so staggered over 4 sub-rounds that valid estimates could be built up for each of the sub-rounds separately. Presentation of sub-round-wise estimates for different characteristics of population has, therefore, been possible ^{7/}.

1.7 The NSSO Governing Council set up a Working Group to draw and finalise the tabulation plan of this survey. The approved (by the NSSO Governing Council) tabulation plan provided cross tabulation of different characteristics of population so that the tabulated data could be made amenable to "in-depth" study of the anatomy of employment and unemployment for the country as a whole at regional and state levels. The Working Group also decided to tabulate the survey material not only by states but also by 66 different geographical regions.

1.8 Quite a massive information from about 8 lakhs individual members belonging to about 1.7 lakhs of sample household of the country (in the Central Sample) have been collected. In view of the shortage of mechanical tabulation resources, the tabulation of these huge survey materials (by states and by regions) was taken up by the 22 newly set up Manual Tabulation Centres located at the different PCD Block Offices under the administrative control of PCD, NSSO. The pre-tabulation processing of the central sample data was started at these Manual Tabulation Centres from August 1973 ^{5/}. To expedite completion of tabulation work, the Manual Tabulation Centres were subsequently asked to complete tabulation upto an intermediate stage and the work relating to the final stage of tabulation was entrusted to the Data Processing Division of NSSO.

3/ How sub-stratum and Regions were formed has been explained in the Note given in Appendix I.

4/ It may be noted that in the NSS 25th round (1970-71), some information on employment and unemployment were collected only for a truncated population (weaker sections i.e. small cultivators and non-cultivating wage-earners) in the rural areas more or less in the same line as suggested by Dantwalla Committee.

5/ The responsibility of technical direction regarding tabulation of survey data, however, rested with the Survey Design and Research and Data Processing Divisions of NSSO.

As the volume of total tabulation work was quite substantial, higher priorities were assigned to the preparation of some tables while the other tables got lesser priorities. The publication of the full survey results will, therefore, be made in phases.

Considering the urgency and necessity of quick presentation of survey results and also in view of much interest evinced by different users of the results of this survey, some estimated summary results based on 13 tables built up with data of sub-rounds 1 and 2 (marked as priority I) have already been released through the draft Reports No.255/1 to 255/5 and their supplements separately for all the 25 States/Union Territories and also for All-India. Another final Report (No.255A) entitled 'Employment - Unemployment Profile for India' has also been released highlighting some important findings of the survey from the data presented in the draft Reports. The detailed results based on tables marked as priority I & II for sub-rounds 1 & 2 in respect of all the 25 States/Union Territories and of All-India are being printed.

The present Brochure contains estimated summary results of the data presented in detail in the 21 priority tables (of the approved tabulation plan) for seven States. Some of the results presented here are based on data collected in sub-rounds 3 and 4 and others are based on the combined data for the all sub-rounds.

Conceptual frame-work of Data Collection

1.9 The CSO Standard on Labour Force Surveys, which was considered as the guide line for the earlier NSS employment and unemployment surveys, prescribed classification of population into categories such as Employed, Unemployed and not in labour force on the basis of the recorded data on activity (or inactivity) of the household members during the varying (or moving) reference weeks.

1.10 The Expert Committee particularly recommended to abandon this procedure of classification, as the Committee argued that "the percentage of unemployed reported in a given NSS round is an average of the varying weekly situations recorded for different periods during the year over which the investigation is spread. There is no reason to believe that those classified as unemployed during the specific reference week preceding the date of survey of a household or households would necessarily be without work throughout the year. The fact that the sample is spread over the entire year does not

remove this limitation; it means an aggregation of the weekly situations in regard to the unemployment status of individuals rather than the continuing unemployment of the same set of individuals".^{6/} As an alternative approach, they recommended that on the basis of the recorded data on varying weekly situations of different individuals some meaningful measure of the level or rate of unemployment/under-employment during different periods of time or seasons in a year might be built up and that too in further disaggregated form. In view of the limitation of the current status approach for quantitative measurement of the employment - unemployment situation as pointed out by the Expert Committee, three different methods were adopted in this survey to study three different facets of the phenomenon. Since condition of unemployment - under-employment is in-built in the Country's economic structure and it is of an endemic character, the attempt to obtain the rate or level of unemployment and under-employment measured in terms of man-weeks was made in this survey through the classification of population on the basis of current status obtaining in the week preceding the date of survey. Secondly, the condition of our economy is such that even within a short span of one week, the level of employment (or unemployment) fluctuates. In this survey the measurement of the extent of such fluctuation with day as the unit of measurement had also been attempted by the method of collection of information on activity status separately for all the seven days of the reference week of persons who were classified as belonging to labour force through the current status approach. A large volume of built-in under-employment notwithstanding, a hard core of chronically unemployed, who over a long period do not get any gainful work to do and continue to seek work or record themselves as available for work, also co-exist in the economy. An attempt to estimate the number of such chronically unemployed persons was also made in the survey through the classification of population by usual status approach. By usual status classification one can obtain an estimate of : (a) number of persons usually employed (or working), (b) number of persons usually unemployed (or usually seeking or available for work) and (c) number of persons usually out of labour force (or usually not available for work). Besides adopting the three approaches mentioned above, some probing enquiry regarding other relevant aspects of employment or of the condition of unemployment was also made in this survey. The answers to the probing questions recorded in the survey would further help to make a realistic assessment of the employment - unemployment situation. How the three approaches and the probing questions were used in the survey is described in the succeeding paragraphs.

^{6/} Report of the Committee of Experts on Unemployment Estimates, Planning Commission, Government of India 1970, Page 16.

1.11 Classification of population on the basis of current status

Every individual member of the household was classified either as : (a) working (b) seeking work, (c) not seeking but available for work or (d) not available for work on the basis of one's activity position during the week preceding the date of survey. For assigning the appropriate current status code to a particular ~~season~~ ^{person}, the status of 'working' got priority over the status of 'seeking work', the status of 'seeking work' over the status of 'available for work' and the status of 'available for work' over the status of 'not available for work', ~~over the status of not available for work~~. Obviously, in applying this priority scale a person working very little (say 1 hour) for even one of the reference week was considered working. But for assigning the current status of seeking or being available for work during the reference week to a person the necessary pre-condition was that the persons must not be working any of the seven days of the week. The status of being out of labour force was the residual category in the sense that those who did not get the status 'working' or 'seeking or available for work' would automatically be assigned that status. Moreover, for assigning the appropriate (detailed) 'work status or (non-gainful activity status' code to a particular person, (broadly categorised as above into either 'working' or 'not available for work'), who was having concurrently two different status during the reference week the status which occupied relatively more labour time than the other was considered as his or her current status. In this survey, the data on the classification of individual members of the households during the varying reference weeks by current status has been interpreted as (a) working person-weeks, (b) seeking person-weeks, (c) not seeking but available person-weeks, (d) not available person-weeks. In the earlier NSS employment surveys, the working person-weeks were interpreted as number of working (or gainfully employed) persons; the seeking and not seeking but available person-weeks were interpreted as number of persons seeking and available (or unemployed) and not available person-weeks were interpreted as number of persons not available for work (or persons out of labour force). As by the current status approach one individual has been classified on the basis of only one week's activity status and the data of different man weeks have been aggregated, the resultant estimate will obviously be expressed in terms of 'person-week' and not in terms of 'persons'. The Expert Committee rightly felt that the method of working out 'equivalent full time unemployment' from partial period of

unemployment was arbitrary'. Of course, on the basis of some valid assumption, one may either equate or deflate the data on person-weeks under different status as described into number of persons employed, unemployed or number out of labour force. But the straightway equating of the data on person-weeks under each activity category into the number of persons under each of such categories and projecting that as valid for the entire population will be rather an unrealistic portrayal of the exact situation.

1.12 Weekly day-to-day labour time disposition: Data on labour time disposition of persons reported as working or seeking and also persons not seeking but available for gainful work during the reference week have been collected in this survey. In the earlier NSS employment-unemployment surveys, similar data on day-to-day labour time disposition of only those individual members who were classified as working (or employed) during the reference week were collected. The purpose of collection of such data was to get a quantitative measure of the extent of under-employment (and not unemployment, as some of these individuals already reported themselves as employed during the reference week). In this survey the data on day-to-day labour time disposition were collected for both individuals reported as working and also for those seeking or available for work. Thus the base population for data on day-to-day labour time disposition were those reported as belonging to labour force (persons working, seeking and not seeking but available taken together) during the reference week. Secondly, in the present survey (as also in the earlier NSS employment survey) data on current status of every individual of the base population collected for each day of the week or in other words, instead of one week was the unit of classification and measurement. Alternatively it may be explained that since for every individual, data on activity status separately for seven days in a week have been collected, for such individual seven person days' data on activity status have thereby accumulated and the aggregation of these data can only be expressed in terms of person-days. All these information on the day-to-day labour time disposition of persons reported as belonging to labour force will give: 1) the rate or level of the net employment content of the population in labour force during the week, 2) the unemployment content of the same population during the week and also 3) the rate of withdrawal from the economic activity of labour force population during the reference week.

1.13 As for the estimation of the rates described above, the unit measurement is day, the respective rates have been measured in terms of person-days and not in terms of persons (as was done in tabulation and presentation of data of earlier NSS employment - unemployment surveys). The data on day-to-day labour time disposition of persons who belonged to labour force during the varying reference weeks will have four different components : (a) person-days working during the week, (b) person-days seeking, (c) person-days available during the week and (d) person-days available for gainful work (out of labour force) during the reference week.

1.14 As intensity of work on a particular day might be different for different individuals, a further probing enquiry was made in this survey in regard to the work content of each activity status that one was having on each day of the reference week and accordingly data on intensity of work, in qualitative terms, were collected. In the earlier NSS Surveys, similar data on intensity expressed in terms of hours in a day were collected. But in view of criticism that intensity in terms of hours carry very little meaning when they are used as a yardstick for measuring the work content in rural agriculture, the usefulness of their use in urban areas notwithstanding, a qualitative measure, such as, full and half - 'full' for a full day work and 'half' for a half day work - was used for the measurement of intensity of work in a day. The criterion to decide what was 'full' and what was 'half' was rested on the judgement of the informant. Of course, restriction was imposed that persons working for less than 1 hour of work in a day should not be treated as working with 'half' intensity on that day. It was also implied, in the adoption of the above procedure, that one person might have 'half' intensity in different kinds of status on a single day but cannot have three different kinds of status with 'half' intensity on the same day.

1.15 Classification of population on the basis of enduring status (usual status) : Besides collection of data for the purpose of measuring the rate or level of employment, unemployment and underemployment in the country, the data on enduring status of the population i.e. the status which prevailed over a long period in the past and which is also likely to continue in future, have been collected in this survey for each individual member of the households. Thus, every individual member of the household was classified uniquely under one usual status and appropriate usual status code was assigned to him. But for those persons whose last enduring

status ceased in the recent past and they assumed a new status which was likely to continue in future, the status which they assumed lately were considered as their usual status. For a developing country having a narrow mainstay in traditional agriculture with preponderance of household as economic unit, a bench-mark data on the employment-unemployment pattern can only be built-up on the basis of classification of individual by their enduring status. The terminology used in this survey for this enduring status is Usual Status. This was not a new terminology that was used in this survey. Indian Census had been using this concept till the 1951 Census. Subsequently of course, in the Census a sort of mixed current-current-usual status concept has been in use. NSS also, along with current status concept (or labour force concept), adopted the usual status concept for the classification of population in the first countrywide survey on employment and unemployment in the NSS, Ninth Round (1955). The data that will be thrown up from the current survey on the basis of classification of individuals by usual status will give the estimate of number of persons employed, unemployed and not in the labour force with reference to a long period in the past, say, one year. The estimates of unemployed obtained on the basis of Usual Status Classification will perhaps indicate the number of persons who are chronically unemployed for a long period.

1.16 Probing questions : With a view to having a realistic analysis and study of the data on the classification of population by Usual Status, kind of ancillary information on different aspects of the usual work-pattern of persons categorised under one usual status or the other, are collected through an additional probing enquiry. Sets of probing questions were formulated, each set being relevant for a particular set of individuals classified under a particular usual status category. The data on usual status, read and analysed concurrently with the tabulated answers of such probing questions will bring into clearer relief the exact employment - unemployment situation of the country. As an illustration some of the probing questions asked to individuals who were assigned a particular usual status code are given below :

<u>Usual status category</u>	<u>Description of probing questions</u>
a) 11 and 12 (working in own farm/in household non-farm enterprise or profession)	<ol style="list-style-type: none"> 1. Whether worked regularly throughout the year ? 2. Whether also working in own non-farm/enterprise, professional/own farm ? 3. Whether also seeking or available for work as wage or salary earners ? 4. Whether seeking work within or outside village/town ?

<u>Usual status category</u>	<u>Description of prob'</u>
13 and 14 working as regular salaried employee or wage labourer in farm/regular salaried employee or wage labourer in non-farm enterprise or profession either in public or domestic sector)	<ol style="list-style-type: none"> 1. Whether full-time or part-time wage paid/salaried employee ? 2. Whether in temporary or permar employment ? 3. Whether also seeking work and seeking, whether seeking within or outside village/town ?
15 working as casual wage labourer	<ol style="list-style-type: none"> 1. Whether seeking or available for wage/salaried employment ? 2. Whether seeking employment in agriculture or in non-agricult activity ? 3. If seeking, how long seeking what efforts have been made in search of work ? 4. Whether willing to accept employment outside village/town or within village/town ?
21 (not working but seeking or available for employment)	<ol style="list-style-type: none"> 1. Whether seeking work for the future ? How long seeking ? efforts have been made in search of work ? 2. Whether farm or non-farm employment sought ? Whether sought employment within/outside village/town ?

1.17 The answers to the probing questions were sought in such a manner that those were either in categorical affirmative or negative. It would obviously be seen that classification of the population by Usual Status would present only the broad contours of their work pattern. By this classification when analysed with the respective answers to the probing questions, of persons belonging to different Usual Status categories will unfold the real content of their work-pattern profile.

1.18 Thus, instead of making a lop-sided inference only on the basis of partial information on activity pattern averaged out from varying weekly situations obtaining for different individual members of household the inferences drawn after collation of four different kinds of information (a) classification of population by current weekly status,

(b) weekly labour time disposition of population in labour force,
(c) distribution of population by usual status and (d) the answers to the relevant probing questions put to persons having a particular usual status will be more meaningful and will perhaps reflect the reality of the employment - unemployment situation in the country.

1.19 Definition of some important terms adopted in the survey :

The definition of terms used in the survey are as follows :

- (a) Household : The Household was defined as a group of individuals normally living together under the same roof and taking meals in the same kitchen.
- (b) Industry : The sector of economic activity in which a person works is the Industry of the person.
- (c) Occupation : The nature of type of work performed by a person is termed as the Occupation of the person.
- (d) Normal member : The Normal members constituted of those who usually resided in the same household and took food in the same kitchen. They included temporary stay-aways and excluded temporary visitors.
- (e) Working : In this survey a person was treated as currently working (during the reference period of one week) or usually working (over a long period) if he or she pursued some gainful activity during the period of reference. The labour time utilised for pursuing the activity may be even one hour per day on an average. During a short period, the person attached to some gainful work may not be attending to that work for a few days or even for the entire period of reference due to sickness or for other reasons, such as, enjoyment of holiday, leave etc., but nonetheless he or she would be considered as working. The current activity category codes 41-53 have been assigned for all currently working persons (i.e. considered working during the reference period of one week). The usual activity category codes 11-17 have been assigned for all usually working persons (i.e. considered working usually over a long period).

- (f) Currently Working : A person found to be engaged in his own farm/enterprise/profession etc. or was in employment in others farm/enterprise/profession etc. or was in casual employment in agricultural/non-agricultural activities or was working as helper in household farm/non-farm enterprise during the reference week was termed Currently Working (or currently in gainful employment). Included in the above category were those persons who temporarily abstained from work on any day of the reference week or during the whole period of the week due to sickness or other reasons without having been disengaged or left from the work or employment.
- (g) Usually Working : A person found to be usually (i.e. over a long period) engaged in his own farm/enterprise/profession etc. or was usually in employment in other's farm/enterprise/profession etc. or was usually on casual employment in agricultural/non-agricultural activities or had been working in household farm/non-farm enterprise as helper was termed Usually Working (or Usually in gainful employment).
- (h) Currently seeking employment : A person who was having no work and made some tangible effort in search of employment on any day of the reference week or during the whole reference week was termed as Currently seeking employment or currently unemployed.
- (i) Currently not seeking but available for employment : A person who was having no work and though did not actively sought work or employment but was available for employment at the prevailing rate of remuneration was termed not-seeking but available for employment (or Currently Unemployed).
- (j) Usually seeking employment : A person who was having no work or employment for a long period and had been making some efforts in search of employment for fairly long time was termed usually seeking employment (or usually unemployed).
- (k) Usually not seeking but available for employment : A person who was having no work or employment for a long period and though had not been actively seeking work or employment but had been available for employment at the prevailing rate of remuneration was termed usually not seeking but available for employment (or usually unemployed).
- (l) Currently not available for work : A person who was having no work or employment and at the same time was not either seeking or available for work or employment for various reasons in any day of the reference week for the whole period of the week was termed as currently not available for work (or currently out of labour force).

a) Usually not available for work : A person who was having no work or employment and at the same time had neither been seeking nor available for work for various reasons during a long period in the past was termed as usually not available for work (or usually out of labour force).

Economically active population : Normally the economically active population or the labour force consists of persons working and also those seeking and available for work. In this survey, since data have been collected using both the current status and the usual status concepts, the economically active in the population should be considered as :

(i) person weeks working plus person weeks seeking and/or available when classification of population has been done by the current activity categories with week as the reference period;

(ii) persons usually working plus persons usually seeking and/or available when classification of population has been done by the usual activity categories with a long reference period (say one year).

Monthly per capita consumer expenditure : The figure of monthly per capita consumer expenditure used in this survey was actually transferred from the Schedule on Household Consumer Expenditure which was canvassed in the same sample households. This was worked out as the ratio of total consumer expenditure to the household size which included only normal members of the household.

Earnings : The data on earnings collected in this survey relate to all the cash and kind earnings received or to be received by wage and salary earners among the members of the household during the reference week. Earnings in kind received together with perquisites (bonus included) if any were considered as earnings in kind and formed part of the total earnings.

Section 2 : Explanatory Notes on Tables

2.0 General : In the present brochure only the summary information based on the detailed results obtained for the 22 priority tables (Priorities I & II) are presented for the States Andhra Pradesh, Kerala, Maharashtra, Orissa, Punjab, Uttar Pradesh and West Bengal. Results for the other States, Union Territories and All-India are under preparation and will be released subsequently.

2.1 Presentations of tables : The numbering of the tables present in this Report is different from that in the approved tabulation plan : in the Reports released earlier (255/1 to 255/5 and their supplements). Correspondence of the table numbers in this Report with the respective numbers of the approved tabulation plan and the Reports released earlier is given below :-

Table no. of this brochure	corresponding table number of the	
	Brochure Nos. 255/1 to 255/5 and their supplements	Approved tabulation plan

2.2 The approved tabulation plan prescribed preparation of multi-dimensional estimates. But for quick presentation of some summary results of the survey the marginal totals (exposing some features and suppressing others), have only been presented in this Report.

2.3 Separate sub-roundwise estimates for sub-rounds 3 & 4 have been presented in tables 3, 4, 5, 6.1, 6.2, 7.1, 8, 9, 10, 11, 12, 13 & 14 and estimates based on ^{all} sub-rounds, data have been shown in the remaining 14 tables. All the tables, excepting table numbers 8, 9, 18.1, 18.2, 19.1 & 19.2 are presented separately for both rural and urban areas. Table numbers 8, 9, 19.1 & 19.2 are for rural areas only as the employment characteristics presented in these tables have not been collected in urban areas. For similar reason, table numbers 18.1 & 18.2 are for urban areas only.

2.4 In all the tables excepting table number 1 (on household characteristics), the population of ages 5 + (years) have only been covered. As no data relating to different employment - unemployment characteristics have been recorded for the population of ages 0-4 (years), they have been excluded for compiling the aforesaid tables. As per survey results of NSS : 27th round Sch. 10, the percentage of population in the age group 0-4 years to total population for the States covered in this Report is given below separately for rural and urban areas.

state	percentage of population in the age-group 0-4 years to total population :		state	percentage of population in the age-group 0-4 years to total population :	
	rural	urban		rural	urban
(1)	(2)	(3)	(1)	(2)	(3)
Andhra	15.55	13.39	Punjab	13.76	11.76
Bihar	17.5	11	Uttar Pradesh	15.81	13.23
Kerala	13.50	13.17	West Bengal	14.13	9.71
Maharashtra	15.82	12.91			
Orissa	16.29	14.33			

2.5 Table number 1 : Percentage distribution of households by per-capita monthly household expenditure group is shown on the left hand portion of this table (col.2) and the ratio of economically active persons to total persons in different expenditure group is shown on the right hand portion (col.3).

2.6 Table number (2.1) : This table presents the percentage distribution of the population in each sex by age group for different skills. As the variation in skill is not expected over sub-rounds, combined estimates for sub-rounds 3 & 4 have only been presented in the table.

2.7 Table number (2.2) : The percentage distribution of population by skill is presented in this table separately for each sex. As in table (2.1) this table also gives combined estimates for sub-rounds 3 & 4.

2.8 Table number (3) : In the survey, information was collected from different individual members of the households, pertaining to their activities (also inactivities) during the varying (moving) reference weeks. All such person-weeks have been distributed by different activity categories (after suitably grouping the detailed activity categories used in the survey under a few broad categories) and shown in this table.

The general-cum-technical education group codes under col.1 have been explained in item A of Appendix II. The general-cum-technical education group codes have been arranged in ascending order. The code combinations not appearing in the table should be taken as code combination not reported in the survey.

---2.9 Table number (4) : In this table 'person-weeks working', as classified in table number 3 above, for each sex and total separately, have been shown as distributed over different current principal industry division taking 'total person-weeks working' of each sex as base.

2.10 Table number (5) : The detailed day-to-day labour time disposition of persons already categorised as either working or not working but seeking or available for work during the varying (moving) reference weeks, were collected in the survey i.e., each one of these persons was further categorised for each day of reference weeks as (a) working or (b) not working but seeking work or (c) neither working nor seeking but available for work or (d) not available for work. In this table the total available labour-force-days in each general-cum-technical education group and all groups together (which is shown as 100) i.e., the seven days of the week multiplied by the total of the number of persons categorised as working and those categorised as not working but seeking or available for work, have been (taking day as the unit of measurement) shown as distributed by the (a) number of person-days working, (b) number of person-days seeking,

(c) number of person-days not seeking but available and (d) number of person-days not available for work during the reference week.^{1/}

2.11 Table numbers (6.1, 6.2, 7, 7.1, 8, 9, 10 & 11) : These tables are just extensions of the table number 5. The basic information which is furnished in these tables is whether a particular activity status assigned to a person (belonging to labour-force during the reference week) on a day lingered for the 'full' day or for the 'half' of the day and to what proportion the 'full' and 'half' labour-force days of the week are distributed over different broad activity categories [(a) working, (b) not working but seeking, (c) neither working nor seeking but available and (d) neither working nor available for work] for different classificatory characteristics such as general education (table nos.6.1 & 6.2); household monthly per-capita expenditure (table nos.7 & 7.1); village irrigation type (table no.8); village crop pattern (table no.9); household land possessed class (table no.10) and household principal industry division (table no.11). In table nos.6.1, 7.1, 8, 9, 10 & 11 the total labour-force person days ('full' & 'half' taken together) in each classificatory item and for each sex has been distributed whereas, in table no.6.2 the total labour-force person-days and in table no.7 each of the 'full' and 'half' labour-force person days have been distributed, the latter for each sex and each classificatory item.

2.12 Table number (12) : The average weekly earnings (not average wage rate) of wage and salary earners from all occupations pursued by them during the varying reference weeks have been presented in this table separately for persons having different general-cum-technical educational qualifications.

2.13 Table number (13) : The distribution of the normal members of the household who were absent on the date of survey by the reason for absence and their general education is presented in this table separately for persons of each sex and all persons.

2.14 Table number (14) : This table gives a similar distribution as given in table (13) for the temporary visitors in the households during the survey.

1/ : In this connection it may be noted that in all the Tables (5, 6.1, 6.2, 7, 7.1, 8, 9, 10 & 11) for each sex, the 'labour-force person-days totals' (cols.15, 16 & 17) are obviously the totals of all the person-days of different activity categories (cols. 5, 8, 11 & 14) taken together.

2.15 Table number (15) : In this table is shown the distribution of population by broad usual activity status category i.e., the activity category which prevailed in the past and which is likely to continue also in future, (after suitably grouping the detailed usual status category used in the survey under some broad categories e.g. usually working; usually not working but seeking or available; usually not working and not available)

2.16 Table number (16) : The left hand portion of this table (cols.2-7) relates to persons having usual activity status code 11 (working in household farm) and the right hand portion (cols.8-13) relates to persons having usual activity status code 12 (working in household non-farm enterprise/profession). The table presents the proportion of persons having a particular usual activity status code (11 or 12) working throughout the year and the proportion (of the same base population) also work in household non-farm/farm enterprise, in addition to his/her usual activity

2.17 Table numbers (17.1 & 17.2) : The extent of available idle time of persons having the usual activity category codes 11 and 12 has been shown in tables 17.1 and 17.2 respectively. In the left hand portion of the tables (col.3) is shown the proportion of those having idle time in their household farm/non-farm enterprise or profession and concurrently working or seeking work or available for work for wages in other's farm/non-farm enterprise and in the right hand portion (cols.4 to 10) is shown the proportion of them worked or sought work or was available for work for various number of days-group in a year.

2.18 Table numbers (18.1 & 18.2) : These tables are prepared for urban areas only. In these tables are shown (in cols.2, 3 & 4) the proportions of persons having usual activity category codes 13 (table 18.1) or 14 (table 18.2) i.e. working as wage and salary earners in farm or non-farm enterprise or profession working full time as paid employee - the residual proportions (not shown in the tables) being those working part time as paid employee. Also shown in these tables are the proportions of those 'not trying to change present employment', 'seeking or available for wage/salaried employment' and 'not seeking or available for wage/salaried employment'. The estimates presented in these tables will show the extent of under utilisation of available labour time of the wage and salary earners.

2.19 Table numbers (19.1 & 19.2) : The estimates shown in cols.2, 3 and 4 of tables 19.1 and 19.2 are respectively the proportions of wage and salary earners in rural areas having usual activity category codes 13 (working as wage and salary earners in farm) and 14 (working as wage and salary earners in non-farm enterprise or profession) 'not trying to change present employment' - the residual proportions being those 'trying to change the present employment' (not shown in the tables). Also shown are the proportions seeking or available for wage/salaried employment (cols.5, 6 & 7) and the proportions not seeking or available for wage/salaried employment (cols.8, 9 & 10) of those trying to change the present employment. The latter category of persons may be those who are trying to shift to self-employment.

2.20 Table number (20) : In this table are shown the proportions of casual labourers (having usual activity category code 15) not seeking or available for wage paid/salaried employment (cols.2,3 & 4) and the proportions seeking or available for wage paid/salaried employment (cols.5-10) with further breakdown into sectors (agricultural activity and non-agricultural activity) to which such employment was sought. For the urban areas these proportions are shown separately for each of the general education classes also.

2.21 Table number (21) : This table brings out the proportions of persons, having usual activity category code 21 (usually seeking or available for work), seeking work not for the first time (cols.2, 3 & 4) - the residual proportions (not shown in the table) being those who are seeking or available for work for the first time. Also shown is the distribution of total unemployed persons seeking or available for work by various period groups (cols.5-16) since when the work was sought.

2.22 Table number (22) : The percentage of unemployed persons (seeking or available for work i.e. those with usual activity category code 21) who sought employment in the farm and non farm sectors are respectively given in cols (3) and (4) of this table. Amongst them the proportion of persons seeking employment outside village/town and within village/town are given for farm sector in cols (5) & (6) and non farm sector in cols (8) & (9).

Section 3 : Tables (Rural)

List of Tables

<u>table no.</u>	<u>description of the table</u>
2. monthly	Percentage distribution of households by monthly per capita expenditure groups and the ratio of economically active persons to total persons for different household per capita expenditure groups.
2.1	Percentage distribution of persons by age group for each sex and skill code.
2.2	Percentage distribution of persons by skill for each sex.
3.	Percentage distribution of person-weeks by person-weeks working, person-weeks seeking work, person-weeks not seeking but available for work, person-weeks not available for work for each sex and general-cum-technical education group.
4.	Percentage distribution of working person-weeks (current activity 41-53) by current principal industry division for each sex.
5.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work for each sex and general-cum-technical education group.
6.1	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and general education group.
6.2	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work, intensity, sex and general education group.
7.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work for each intensity, sex and household monthly per capita expenditure group.

<u>table no.</u>	<u>description of the table</u>
7.1	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days neither seeking nor available for work and intensity for each sex and household monthly per capita expenditure group.
8.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and village irrigation type.
9.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and village crop pattern.
10.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and household land possessed class group.
11.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and household principal industry division.
12.	Average weekly earnings ^{of} wage and salary earners by sex and general-cum-technical education group.
13.	Percentage distribution of number of stay aways by general education and reason for each sex.
14.	Percentage distribution of number of visitors by general education and reason for each sex.
15.	Percentage distribution of total persons ^{persons} by working , persons not working but seeking or available for work and persons not available for work for each sex and general-cum-technical education group.
16.	Percentage of persons (working in household farm/non-farm household enterprise or profession) working throughout the year, also worked in household non-farm enterprise or profession/household farm to total persons working in household farm/non-farm enterprise or profession for each sex.

∠ person-days not seeking but available for works

<u>table no.</u>	<u>description of the table</u>
17.1	Percentage of persons (working as regular salaried employee/wage labour/in farm) work, seek work or available for work in others farm and non-farm enterprise during their idle time to total persons working as regular salaried employee/wage labour/in farm for each sex and their percentage distribution by number of days group for which they worked, sought work or were available for work.
17.2	Percentage of persons (working as regular salaried employee/wage labour/in non-farm enterprise) work, seek work or available for work in others farm and non-farm enterprise during their idle time to total persons working as regular salaried employee/wage labour/in non-farm enterprise for each sex and their percentage distribution by number of days group for which they worked, sought work or were available for work.
19.1	Percentage of persons (working as regular salaried employee/wage labour/in farm) not trying to change present employment, seeking or available for wage/salaried employment, not seeking or available for wage/salaried employment to total persons working as regular salaried employee/wage labour/in farm for each sex.
19.2	Percentage of persons (working as regular salaried employee/wage labour/in non-farm enterprise) not trying to change present employment, seeking or available for wage/salaried employment, not seeking or available for wage/salaried employment to total persons working as regular salaried employee/wage labour/in non-farm activities for each sex.
20.	Percentage distribution of persons working as casual wage labourers by persons not seeking or available for wage paid/salaried employment, seeking or available for wage paid/salaried employment in agricultural activity, seeking or available for wage paid/salaried employment in non-agricultural activity for each sex.
21.	Percentage of persons (not working but seeking or available for employment) seeking work not for the first time to total persons not working but seeking or available for employment for each sex and general education and percentage distribution of persons not working but seeking/available for employment by period since when seeking or available for employment for each sex and general education.
22.	Percentage of persons (not working but seeking or available for employment) seeking employment in farm and non-farm enterprises and their percentage distribution by seeking employment outside village and within village, for each sex and general education.

Table (1) : Percentage distribution of households by household monthly per-capita expenditure groups and the ratio of economically active persons to total persons for different household monthly per-capita expenditure groups.

State: Andhra Pradesh

sub-rounds 1 to 4 combined

Section 4 : Tables (Urban)

List of Tables

description of the table

Percentage distribution of households by monthly per capita expenditure groups and the ratio of economically active persons to total persons for different household monthly per capita expenditure groups.

Percentage distribution of persons by age group for each sex and skill code.

Percentage distribution of persons by skill for each sex.

Percentage distribution of person-weeks by person-weeks working, person-weeks seeking work, person-weeks not seeking but available for work, person-weeks not available for work for each sex and general-cum-technical education group.

Percentage distribution of working person-weeks (current activity 41-53) by current principal industry division for each sex.

Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work for each sex and general-cum-technical education group.

Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and general education group.

Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work, intensity, sex and general education group.

Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work for each intensity, sex and household monthly per capita expenditure group.

Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and household monthly per capita expenditure group.

(Contd.-)

<u>table no.</u>	<u>description of the table</u>
10.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and household land possessed group.
11.	Percentage distribution of the days of labour-force person-weeks by person-days working, person-days seeking work, person-days not seeking but available for work, person-days neither seeking nor available for work and intensity for each sex and household principal industry division.
12.	Average weekly earnings of wage and salary earners by sex and general-cum-technical education group.
13.	Percentage distribution of number of stay-aways by general education and reason for each sex.
14.	Percentage distribution of number of visitors by general education and reason for each sex.
15.	Percentage distribution of total persons by persons working, persons not working but seeking or available for work and persons not available for work for each sex and general-cum-technical education group.
16.	Percentage of persons (working in household farm/non-farm household enterprise or profession) working throughout the year, also working in household non-farm enterprise or profession/household farm to total persons working in household farm/non-farm enterprise or profession for each sex.
17.1	Percentage of persons (working as regular salaried employee/wage labourer in farm) work, seek work or available for work in others farm and non-farm enterprise during their idle time to total persons working as regular salaried employee/wage labourer in farm for each sex and general education and their percentage distribution by number of days group for which they worked, sought work or were available for work.
17.2	Percentage of persons (working as regular salaried employee/wage labourer in non-farm enterprise) work, seek work or available for work in others farm and non-farm enterprise during their idle time to total persons working as regular salaried employee/wage labourer in non-farm enterprise for each sex and general education and their percentage distribution by number of days group for which they worked, sought work or were available for work.

(Contd.-)

description of the table

percentage of persons (working as regular salaried employee/wage labourer in farm) (a) having full time paid employment, (b) not trying to change present employment, (c) seeking or available for wage/salaried employment, (d) not seeking or available for wage/salaried employment to total persons working as regular salaried employee/wage labourer in farm for each sex and general education.

percentage of persons (working as regular salaried employee/wage labourer in non-farm enterprise) (a) having full time paid employment, (b) not trying to change present employment, (c) seeking or available for wage/salaried employment, (d) not seeking or available for wage/salaried employment to total persons working as regular salaried employee/wage labourer in non-farm enterprise for each sex and general education.

Percentage distribution of persons working as casual wage labourers by persons not seeking or available for wage paid/salaried employment, seeking or available for wage paid/salaried employment in agricultural activity, seeking or available for wage paid/salaried employment in non-agricultural activity for each sex and general education.

Percentage of persons (not working but seeking or available for employment) seeking work not for the first time to total persons not working but seeking or available for employment for each sex and general education and percentage distribution of persons not working but seeking or available for employment by period since when seeking or available for employment for each sex and general education.

Percentage of persons (not working but seeking or available for employment) seeking employment in farm and non-farm enterprises and their percentage distribution by seeking employment outside town and within town for each sex and general education.

APPENDIX I

National Sample Survey

Twentyseventh Round : October 1972-September 1973

A Note on Sample Design and Estimation Procedure

1. Sample Design and Sample Size

1.1 Sample Design : The general sample design was stratified with two-stage selection within each stratum. The first-stage units were villages in rural areas and blocks in urban areas; the second-stage units were households in both rural and urban areas. The sample design ~~was~~ self-weighting for all the household enquiries at the region and sub-stratum level in rural areas and at the state and sub-stratum level in urban areas. The sample villages and blocks were ~~randomly~~ selected as usual in the form of two independent and interpenetrating sub-samples.

1.2 Sample Size (Central Sample) : The all-India sample size for household enquiries ~~was~~ ^{was} 9088 villages and 4832 blocks. ~~The rural price enquiry will be conducted in another sample of 419 villages which are the same villages as taken up for this enquiry in earlier rounds.~~ The average sample size in a sample village/block ~~was~~ 12 households for schedule 10.

2. Work Programme

Sub-round : The survey period of 12 months ~~was~~ divided into 4 sub-rounds of 3 months each. One-fourth of sample villages and blocks ~~were~~ ~~xx~~ surveyed in each sub-round. Each sample village and block ~~was~~ ~~xx~~ visited once only - according to the sub-round arrangement described below :

sub-round	period	sample village nos.	sample block nos.
1	October - December 1972	1, 5 & 9	1, 5, 9
2	January - March 1973	2, 6 & 10	2, 6, 10
3	April - June 1973	3, 7 & 11	3, 7, 11
4	July - September 1973	4, 8 & 12	4, 8, 12

3. Rural Sample Design

3.1 Sampling Frame : The frame is the list of villages as per 1971 population census.

3.2 Stratification : The country has been divided into 66 agricultural regions by grouping, within each state or union territory, districts having similar population density and crop pattern. Then within each region, strata have been formed by grouping tehsils which are (i) contiguous, (ii) having similar crop pattern, population density and altitude, and (iii) having good transport and communication facilities amongst them. The total rural population is about the same for each stratum within a region. The number of strata formed within a state/union territory is given by the number of sample villages allocated to it divided by 24 except in Uttar Pradesh where each district is a stratum. The total number of rural strata is 392.

3.3 Allocation (Central Sample) : The all-India sample size of 9088 villages has been allocated to the states on a joint consideration of their rural population area under cereal crops and available investigator strength. This is modified to (i) ensure a minimum of 360 villages in a state excepting some smaller states and the union territories, (ii) take account of state-wise variation in work-load and number of investigators, and (iii) make the sample size a multiple of 24 in order to facilitate selection of 2 sub-samples of 12 villages in each stratum except in some areas (see para 3.4). Generally the participating states are surveying the same number of sample villages as in the central sample. However, the states of Uttar Pradesh, Gujarat, Rajasthan, Delhi and Goa-Daman-Diu are having enlarged samples.

3.4 Selection of Villages : Two independent sub-samples of 24 villages each are selected circularly systematically with equal probability in each stratum, after arranging the tehsils of the stratum in a serpentine order. In each sub-sample, the villages with odd order of selection form the 'Central Sample' and the rest form the 'State sample'.

Thus generally, each sub-sample of a rural stratum contains 12 sample villages. But a sub-sample has only 8 villages in Delhi, 3 villages in central sample of Goa-Daman-Diu. And in Uttar Pradesh, the sub-sample size varies from stratum to stratum and also between central and state samples. The central and state samples have been independently drawn in U.P. and Goa-Daman-Diu.

3.5 Investigation Zone : If a stratum is very large and/or if transportation among different parts of a stratum is extremely difficult, then it has been divided into two or more investigation zones which are manageable in area and transport. Two such zones are selected independently with probability proportional to the total number of villages in them. Sub-sample 1 is selected from one zone and sub-sample 2 from the other.

3.6 Unit of Survey : As mentioned earlier, the 1971 census villages are first-stage units of selection. They are also the units of survey in this round.

3.7 Hamlet-group Selection : To control the work-load at the listing stage in case of large villages, the method of hamlet-group (hg) selection is adopted. The investigator divides the village into two or more areal sub-divisions (called hamlet-group) of nearly equal population content and selects one of them at random for survey. When the number of hamlet groups is specified as 1 (one), then the whole village is surveyed.

3.8 Selection of Households : For schedule 1.0 and 10, all households in a sample village/hamlet-group are divided into three sub-strata on the basis of their means of livelihood as follows : (1) self-employed in non-agriculture, (2) rural labour, and (3) others. On an average, 12 sample households are selected in a sample village (2, 5 and 5 households, on the average, from sub-strata 1, 2 and 3 respectively); both the schedules 1.0 and 10 are canvassed in the same set of sample households. Sampling of households is done linear systematically and independently from each sub-stratum using the interval and random start specified for the purpose so as to make the design self-weighting at the region level for each sub-stratum.

4. Urban Sample Design

4.1 Sampling Frame : The list of NSS areal Urban Frame Survey (UFS) blocks supplemented by the list of 1971 census blocks (1961 census blocks in Tamil Nadu and West Bengal) have been used as the sampling frames, the latter for those towns only where UFS has not yet been done.

4.2 Stratification : In each state/union territory, towns with 1971 census population less than 50,000 form stratum 1, and the remaining towns and cities form stratum 2 except the four big cities viz., Bombay, Calcutta, Delhi and Madras. Each one of them forms stratum 3 of its respective state. The total number of urban strata in all-India is 50.

4.3 Allocation (Central Sample) : The all-India sample size of 4832 blocks has been allocated to the States in proportion to their 1961 census urban population. The allocations have been modified (i) to ensure a minimum of 144 sample blocks in a state excepting some smaller states and union territories, (ii) to take account of state-wise variation of work-load and number of investigators, and (iii) to make the allocations multiples of 8 in order to facilitate having 2 sub-samples and 4 sub-rounds. Sample size for a state is allocated to the strata in it in proportion to their total urban population; final stratum allocations also are made multiples of 8.

Generally, the participating States are having the same sample size as the central sample. However, the States of Gujarat, Maharashtra, Rajasthan, Uttar Pradesh, Delhi and Goa-Daman-Diu are surveying additional samples.

4.4 Arrangement of Blocks : Before sampling of blocks, the towns are by stratum and region within each stratum. The blocks in a town are arranged geographical contiguity.

4.5 Selection of Blocks : In each stratum blocks have been selected systematically with probability proportional to size (pps), the size of a block being taken as its population rounded off to the next multiple of 1000. Then the blocks have been selected in the form of two independent and interpenetrating sub-samples of equal size; within each sub-sample the 'central sample' and the 'state sample' are formed as for sample villages.

Some of the 'state samples' are having more than two sub-samples due to increased sample size. In Uttar Pradesh and Goa-Daman-Diu, sampling of blocks central and state samples has been done independently.

4.6 Sub-blocks Selection : This is similar to the procedure of hamlet-selection in villages. In a large sample block, the investigator forms the specified number of sub-blocks of nearly sample population, selects one of them at random and conducts the survey in the selected sub-block only.

4.7 Selection of Households : All households of a sample block/sub-block divided into two sub-strata : (1) self-employed and (2) not self-employed. Further, the households of sub-stratum 1 are arranged in two classes viz., (a) employed in manufacture; and (b) self-employed in other activities. Then from each sub-stratum households are sampled linearly systematically using the interval and random start specified in the sample list. The average sample size for a block will be 12 households-6 from each sub-stratum. Schedules 1.0 and 10 are carried in the same set of sample households. The design is self-weighting at the block and sub-stratum level.

5. Estimation Procedure

5.1 Notations

- r : subscript for r^{th} region in a state
s : subscript for s^{th} stratum in a state
t : subscript for t^{th} sub-stratum within a sample village/block
i : subscript for i^{th} sample village/block/selected part of village or block
j : subscript for j^{th} sample household
k : number of strata in the state

- z : block size (used for selection)
- interval used for sampling of blocks in the concerned state
- N_s : total number of villages in the s^{th} rural stratum of the state
- n_s : number of selected villages/blocks in a sub-sample of the s^{th} rural/urban stratum for the whole round
- m_s : number of surveyed villages/blocks in a sub-sample of the s^{th} rural/urban stratum for the whole round including uninhabited villages/blocks and zero cases.
- D : number of hamlet-groups/sub-blocks formed in a village/block ($D=1$ if no such division was made)
- h : number of households selected for the enquiry
- y : value of the characteristic

In the following, Y stands for the estimate of the State total for the characteristic y in the concerned schedule from a sub-sample for the whole round.

5.2 Rural Area

$$\text{Schedule 0.1 : } Y = \sum_{s=1}^K \frac{N_s}{s} \sum_{i=1}^{n_s} D_{si} y_{si} \quad (1)$$

For items relating to the whole village, D_{si} will be taken as unity.

Schedules 1.0 and 10 (Rural)

$$Y = \sum_{t=1}^3 \sum_{s=1}^K M_{st} \sum_{i=1}^{n_s} \sum_{j=1}^{h_{sit}} y_{sitj} \quad (2)$$

where M_{st} is the constant multiplier for the s^{th} stratum and t^{th} sub-stratum for schedule 1.0 and 10. It may be noted that M_{st} is same for all strata within a region.

5.3 Urban Area

$$\text{Schedule 0.2 : } Y = I \sum_{s=1}^K \frac{n_s}{m_s} \sum_{i=1}^{n_s} D_{si} y_{si} / z_{si} \quad (3)$$

where I is the specified interval.

Schedule 1.0 and 10 (Urban)

$$Y = \sum_{t=1}^2 M_t \sum_{s=1}^K \sum_{i=1}^{n_s} \sum_{j=1}^{h_{sit}} y_{sitj} \quad (4)$$

where M_t is the constant multiplier for t^{th} sub-stratum for schedule 1.0 and 10.

- vii -
Urban Area

6.4 The procedure of adjusting the urban multipliers would be the same as described above with the two changes mentioned below.

- (1) The adjustment will be done separately for each state, sub-sample, sub-stratum and schedule. Hence the work 'region' wherever it occurs in paras 6.2 and 6.3 would be replaced by the work 'state'
- (2) The factor C_t for a sample block will be equal to $D'I/D.I$ where D is the specified number of sub-blocks and I is the specified sampling interval for t^{th} sub-stratum for that sample block and D' and I' are the corresponding actually used figures.

6.5 Sub-round-wise Estimates : Estimates of aggregates based on sample villages/blocks surveyed during a sub-round may be obtained by using the adjusted multiplier as per formula (5) where m will be the number of villages/blocks surveyed during that sub-round, in the concerned sub-sample, region (for villages) or state (for blocks).

APPENDIX - II

DESCRIPTION OF CODES USED IN THE TABLES

A. General-cum-technical education group codes :- for tables 3, 5, 12 & 15) :

sl. no.	general education code	technical education code	description
1.	1	1	illiterate-cum-no technical education
2.	1	2-6	illiterate-cum-addl. diploma or certificate in engineering, technology, crafts, medicine and other subjects
3.	2 & 3	1	literate but below primary and primary-cum-no technical education
4.	2 & 3	2-6	literate but below primary and primary-cum-addl. dip. or cert. in engineering, technology, crafts, medicine & other subjects.
5.	4	1	middle-cum-no technical education
6.	4	2-6	middle-cum-addl. dip. or cert. in engineering, technology, crafts, medicine and other subjects.
7.	5	1	secondary-cum-no technical education
8.	5	2	secondary-cum-addl. dip. or cert. in engineering
9.	5	3	secondary-cum-addl. dip. or cert. in technology
10.	5	4	secondary-cum-addl. dip. or cert. in crafts
11.	5	5	secondary-cum-addl. dip. or cert. in medicine
12.	5	6	secondary-cum-addl. dip. or cert. in other subjects
13.	6	1	graduate & above in agriculture-cum-no technical education
14.	6	2	graduate & above in agriculture-cum-addl. dip. or cert. in engineering
15.	6	3	graduate & above in agriculture-cum-addl. dip. or cert. in technology
16.	6	4-6	graduate & above in agriculture-cum-addl. dip. or cert. in crafts, medicine and other subjects
17.	7	1	graduate & above in engineering & technology-cum-no additional technical education.
18.	7	2	graduate & above in engineering & technology-cum-addl. dip. or cert. in engineering
19.	7	3	graduate & above in engineering & technology-cum-addl. dip. or cert. in technology
20.	7	4-6	graduate & above in engineering & technology-cum-addl. dip. or cert. in crafts, medicine and other subjects
21.	8	1	graduate & above in medicine-cum-no technical education
22.	8	2-4 & 6	graduate & above in medicine-cum-addl. dip. or cert in engineering, technology, crafts & other subjects
23.	8	5	graduate & above in medicine-cum-addl. dip. or cert. in medicine
24.	9	1	graduate & above in other subjects-cum-no technical education
25.	9	2-6	graduate & above in other subjects-cum-addl. dip. & other subjects or cert. in engineering,

technology, crafts, medicine and other subjects.

- ∫ (a) General education codes : illiterate-1; literate but below primary-2; primary-3; middle-4; secondary-5; graduate and above in : (i) agriculture-6; (ii) engineering and technology-7, (iii) medicine-8; (iv) other subjects-9.
- (b) technical education codes :- no technical (no diploma or certificate in addition to what have been covered by general education categories listed above)-1; additional diploma or certificate . engineering-2, technology-3, crafts-4; medicine-5, other subjects-6.]

B. Usual Activity Category Codes (for tables 15-22) :-

sl. no.	usual activity category code	description
1.	11	working in own farm
2.	12	working in household non-farm enterprise/profession
3.	13	working as regular salaried employee/wage labourer in farm
4.	14	working as regular salaried employee/wage labourer in non-farm enterprise/business/profession/service/public/domestic enterprise
5.	15	working as casual wage labourer
6.	16	working in household farm as helper
7.	17	working in non-farm household enterprise as helper
8.	sub-total (1-7)	persons working
9.	21	not working but seeking or available for employment
10.	31	attending educational institution
11.	32	engaged in domestic work
12.	33	too young to work/to attend school/to seek employment
13.	34	old and disabled
14.	35	others (included are pensioners, remittance recipients, beggars, prostitutes etc.)
15.	sub-total (10-14)	persons not available for work

C. Current Activity Category Codes (for tables 3-6-4):-

sl. no.	current activity category code	description
1.	41	worked in own family farm
2.	42	worked in own family farm as exchange labour

	description
43	worked as helper in family farm
44	worked in non-farm household enterprise/business profession
45	worked as helper in non-farm household enterprise/business/profession
46	worked in agriculture as regular salaried employ wage labourer
47	worked in non-farm enterprise/business/profession or in public sector as regular salaried employee wage labourer
48	worked in agriculture as casual employee/wage labourer
49	worked in non-farm enterprise/business/profession service/public/domestic sector as casual employe wage labourer
51	did not work due to sickness though there was work to do
52	did not work for reasons other than sickness but had salaried/wage employment
53	did not work for reasons other than sickness though there was work in the household farm/non-farm enterprise
sub-total (1-12)	persons working
61	did not work but sought work
62	did not work non sought work but was available for work
71	attending educational institution
72	attended domestic duties
73	too young to work/to attend school/to seek employment
74	old and disabled
75	did not work due to temporary sickness (applicab only for Casual workers)
76	others (included are pensioners, remittance recipients, beggars, prostitutes etc.)
sub-total (16-21)	persons not available for work

D. Skill Codes (for tables 2.1 & 2.2)

code no.	description	code no.	description
01	typist, stenographer	17	electrician
02	fisherman	18	motor vehicle driver tractor driver
03	miner, quarryman	19	boatman
04	spinner including charkha operator	20	potter
05	weaver	21	nurse, midwife
06	tailor, cutter	22	basketmaker wicker, product maker
07	shoe-maker, cobbler	23	toy maker
08	carpenter	24	brick maker
09	mason, bricklayer	25	bidi maker
10	moulder	26	book binder
11	machineman	27	barber
12	fitter, die-maker	28	mud house builder & thatcher
13	welder	29	others (spec
14	blacksmith	99	no skill
15	goldsmith		
16	silversmith
