	Page No.
1. Introductory Notes	i
2. Table (1) : Estimates of selected items at all India for all industries together.	1
3. Table (2) : Estimates of selected items for all industries together in each state.	4
4. Table (3) : Estimates of selected items for each industry at all India.	16
5. Table (4) : Estimates of selected items for each state by industry.	65
6. Appendix I : Estimates of five more selected items (i) for all Industries combined at all India, (ii) for all industries combined by State and (iii) for each industry at all India.	409
7. Appendix II: Statement showing Labour Bureau classification and ASI classification of Indian Industries at 3 digit level.	413
8. Appendix III: Copy of the schedule of Investigation	415

1.3 In the appended tables, the term 'industry' refers to the Labour Bureau classification of industries at the three-digit level. This is in accordance with the information available in the frame as collected by Field Division of the National Sample Survey from the officers of the Chief Inspectors of Factories in different states. Appendix II provides a statement showing Labour Bureau classification (at three-digit level) and its corresponding ASI industry classification (also at three-digit level).

1.4 In this round of ASI, data were collected as per the accounting year of the factories surveyed and the specific accounting year for this purpose was that ending during April 1 1968 and March 31, 1969.

2. Concepts and Definitions

2.1 An idea of the conceptual coverage of some of the terms used in the survey is presented below.

a) Fixed Capital : Depreciated book values of fixed assets as on the closing date of the accounting year of the factory were collected. Fixed assets covered all goods with a normal economic life of one year or more and used by the factory for its own purposes saving those solely used for post manufacture distribution. These contained land, building, improvement to land, plant, machinery and tools, transport equipment and other fixed assets.

b) Working Capital : Like fixed capital, information on working capital was collected for the closing date of the accounting year of the factory. It comprised the values of stock of materials, products (finished, semifinished and in-process), cash in hand and at bank as well as the net balance of amounts receivable and payable. It excluded fixed deposits and long term investments made by the factory as well as long term loans received by it.

Annual Survey of Industries -1968

c) Rent paid : It was the amount paid during the year for the use of any item of fixed asset taken on lease or rent or royalty basis.

d) Number of working days : Working days comprised days on which any manufacturing process was carried on and included days spent exclusively on repair and maintenance of fixed assets. Estimates presented in this report is of the total number at the specified level and not the average per factory.

e) Workers : This term was used in the same sense as in the Factories Act, 1948, and excluded persons holding the positions of supervision and management or employed in a confidential position. The average number of all workers/employees were calculated by adding all concerned persons attending and on leave with pay, including concerned persons on strike, over each shift of a working day and dividing the result by the ~~number~~^{number} of working days. Total number of workers have been shown in this report separately for directly employed and employed through contractors.

f) Salaries, Wages etc. : This term included all payments made during the year in cash as compensation for work done. It included all ~~benefits~~^{benefits} and overtime payments but excluded the value of payments in kind and employer's contribution to social security measures.

g) Value of benefits in kind : This was the cost value or the net cost of the concession, as the case might be, in respect of all supplies made and all services rendered whether individually or to groups, free of cost or for part payment, such as food and food articles, fuels, housing accommodation, electricity, water, sanitary services as well as subsidies involved in the operation of facilities with regard to transport, medical attention, education, recreation, entertainment and welfare projects, etc. This was exclusive of employer's contribution to provident fund, pension, gratuity or other social security measures.

Annual Survey of Industries -1968

h) Value of fuels or materials etc. consumed: On the basis of the cost of fuel, material etc. landed at the factory including inward transport cost, commission to purchasing agents, taxes or duties paid etc., this value was calculated for each item of fuel, material etc. consumed during the year in the factory, materials consumed for manufacture of capital items for factory's own use were included. Information on materials consumed for repair and maintenance of its fixed assets was collected separately. Intermediate products, i.e., materials produced and further consumed in the factory, were excluded.

i) Value of other input services: These expenses included charges on account of non-industrial services such as inward transport, purchase agency, postage, stationary and printing and personalised and business services such as audit, accounts, bank and other services which had originated outside the reporting factory and were not already included in the value of fuels, materials etc. as defined in sub-para (h) above. Also included were sundry indirect taxes paid by the factory like purchase tax, local rate and factory licence.

j) Input : It contained the value of fuels, materials etc. as defined in sub-para (h), the value of industrial service rendered to the factory in connection with repairs and maintenance of fixed capital of the factory or with other manufacturing processes as well as the value of other input services, as defined in sub-para (i) above. It included the value of goods to be sold in the same condition as purchased, but excluded director's fee and managing agent's remuneration and office allowances.

k) Output : This comprised the ex-factory value, calculated on the basis of sale value, minus all distributive costs, of all finished goods produced by the factory (products) ^{and by products} during the year including the value of industrial service rendered by the factory during the year as well as the net

balance of semi-finished goods as at the end of the year. Output included final products for own use as goods in the factory, capital item produced for factory's own use and goods bought and resold in the same condition as purchased. It excluded intermediate products.

3. Particulars of Tables

3.1 In Tables (1), (2), (3) & (4) estimates (sub-samples combined) have been provided for detailed aspects of industrial activity respectively for all industries combined at all India, for all industries combined in each state, for each industry at all India and for each industry at the State level. Till ASI - 1967, estimates for only major industries in respect of sampled strata and all the completely enumerated industries in a state were furnished in the reports on detailed results. This was done since in case of Table (4) sample size was too small to throw up usable estimates of the detailed items for minor industries of sampled strata in a state. Unlike the earlier presentation of results, in ASI-68 estimates for all the industries, major or minor, have been furnished in Table (4), because the integrated scheme of completely enumerating the industries in course of three rounds of ASI-68, ASI-69 and ASI-70 has resulted in an increased sample size for all the industries in a state (sample size being about twice that in earlier rounds).

3.2 Estimates shown as - (dash) indicate that the concerned surveyed factories had no contribution to report on the characteristics. In all tables, it has been marked with 0 (zero), whenever emerging estimate/aggregate is less than half the prescribed unit of the item in the table. Due to rounding off, the component estimates in some cases do not add up to the totals furnished.

3.3 The last item in all tables - samples surveyed - refers to the samples selected as reduced by non-response factories. It comprises all surveyed factories, including those treated as blank.

3.4 In view of section 7 of collection of Statistics Act, 1953, whenever in an industry in a state, the number of factories is less than three units in the universe of the sample sector as per list of factories 1967 supplemented with new additions in 1968, data for such industry have not been furnished in Table (4) in the report. Contribution of these cells have however been taken into consideration for building up estimates presented in this report in Tables (3), (2) and (1). Similarly at all India level if the total no. of factories is less than three in any industry, data for such industry have not been presented in Table (3). However, contribution of those industries have been accounted for in building-up estimates for Table (1).

3.5 Whenever estimates furnished in this report differ from that of the summary results presented earlier, they are due to one or more of the following factors: (a) changed number of samples surveyed, (b) the rounding off of a number of items into which a key item has been subdivided for the purpose of this report, (c) receipt of clarifications relating to detailed items from the NSS Field after the completion of the report on summary results (d) summary results were prepared from summary block whereas estimates furnished in this report are based on actual detailed results, etc.

3.6 There were 44014 factories in the sample universe of which 16014 were taken as samples. Non response factories for the detailed report numbered 997 or about 6% as against 1433 for the ASI-68 Report on sample sector summary results.

Annual Survey of Industries -1968

3.7 The estimates of seven items viz. (i) total fixed capital (ii) total working capital (iii) all workers (iv) salaries to all workers (v) value of fuels (vi) total input and (vii) total output as furnished in the enclosed Tables (1) to (3) have been taken from the Report on ASI-68 Sample Sector : Summary Results. These estimated totals usually contain one or two minor items over and above, those shown in the report. Again for ready reference, estimates of five more selected items viz. (i) total man-hours (ii) employees (iii) total emoluments (iv) total depreciation and (v) value added at all India, state levels and at All India each industry levels have been shown in Tables 2 (A) and 3 (A) of Appendix I. These estimates have also been reproduced from the above mentioned Report on Summary Results.

3.8 In Table-3, the estimates for the industries at All India have been presented generally in the ^{ascending} order of industry codes. In Table-4, too, the estimates for the sampled strata and the aggregates for c.c. strata appear generally in the ascending order of the industry codes.

4. Sampling Design

4.1 In earlier rounds, the entire registered factory sector was divided into two sectors (i) census sector comprising factories having on an average 50 or more workers using power and 100 or more workers, on an average, not using power and (ii) sample sector, comprising the rest of the factories, from which about 6000 factories were drawn as samples. Later on, the Standing Committee for the Improvement of Industrial Statistics decided, keeping the census sector as it was in earlier rounds, to cover the entire sample universe in the course of three rounds of ASI-1968, ASI-1969 and ASI-1970. It was felt that this integrated scheme would be useful to furnish results at the 6 digit level of industry code as per ASI classification of industries at the end of ASI-1970, as is done in census sector.

4.2 For the first time in ASI-1968, it was decided to completely enumerate the factories of such industries as having less than 100 units in the sample universe of all-India. In absence of complete list of factories for ASI-1968 for all the states during the time of sample selection, it was decided to depend on the lists for ASI-1967 for determining such industries. Total number of such industries became 33. Industry codes for them are 202, 203, 204, 208, 211, 212, 213, 214, 233, 241, 242, ²⁴⁴292, 312, 321, 322, 329, 333, 334, 381, 382, 383, 385, 386, 392, 393, 394, 395, 396, 512, 521, 522 and 831. Certain states, viz., Andamans, Chandigarh, Goa, H.P., Jammu & Kashmir, Pondicherry, Manipur and Tripura were completely enumerated in the sample sector as in previous years.

4.3 In fact, census for ASI-1968 comprised all such factories of the frame as on 31.12.1967 as having 50 or more workers if using power and 100 or more workers if not using power in at least any one of the previous three rounds. Thus some ASI-1965, ASI-1966 or ASI-67 factories were repeated in ASI-68 census sector, even though their employment strength as per ASI-68 frame was below the prescribed level. From the list of the factories in the frame, barring such industries and states as were completely enumerated, one-third factories were selected for survey in ASI-68 from each sampled stratum, where a sampled stratum referred to a state by industry cell in which sampling was made. Consequently, it was decided to cover one-third other factories from all such sampled strata for ASI-1969 and the rest for ASI-1970.

4.4 As regards the newly registered factories in 1968, those engaging 50 or more workers with power and 100 or more workers without power were included for census sector. The remaining factories which belonged to the sample sector were treated in the same manner as those of the regular part.

Annual Survey of Industries 1968

4.5 For the sampled strata, a stratified unistage design was adopted, stratum being an industry within a state and the sample unit being a factory. Samples were drawn in the form of two interpenetrating sub-samples. The sampling design was made self-weighting at state level.

4.6 Within each industry of a state the factories were arranged according to ascending order of worker size classes. Sampling serial numbers 1 to n were given to all such factories in a state. Then selection of factories was done ~~linear~~ ^{linear} systematically with the interval of 6. Two random numbers R_1 and R_2 between 1 ^{and} $\sqrt{6}$ were selected without replacement. Thus, factories having sampling serial numbers $R_1, R_1 + 6, R_1 + 12, \dots$ and $R_2, R_2 + 6, R_2 + 12, \dots$ constituted sub-sample 1 and sub-sample 2 respectively.

5. Estimation Procedure

5.1 The procedure of estimation is same for scheme 2 and scheme 5 factories. Scheme 2 refers to the list of registered factories as on 31.12.1967 and scheme 5 refers to the newly added factories in 1968. The sum of the estimates obtained from scheme 2 and scheme 5 are to be furnished in all the Tables (1 to 4). Industry, in all-India each industry and state by industry tables refers to the three-digit industry code as per Labour Bureau Classification. As already known, a state by industry cell is a stratum. There are two categories of strata : (1) Category-1; Sampled stratum and (2) Category-2; Complete enumeration (c.e.) stratum.

In view of the sample design as enunciated above, a particular industry at all-India may consist of strata, of which (a) all of them are sampled strata in all the states or (b) all of them are c.e. strata in all the states, or (c) some of them are sampled strata in certain states and the remaining are c.e. strata in other states. All the three above cases may also occur in case of all industries together for a state.

Annual Survey of Industries-1968

Estimation procedure for both the schemes at state by industry level will be as follows :-

Let Y_{ijkl} = Value of the characteristics for the l th factory in the i th sub-sample, j th state and k th industry in scheme 2 or in scheme 5.

n_{ijk} = total no. of samples including zero cases in the i th sub-sample, j th state and k th industry in scheme 2 or in scheme 5.

In table 4: sub-sample estimate for a sampled stratum will be

$$T'_{ijk} = 6x \sum_{l=1}^{n_{ijk}} Y_{ijkl}$$

and combined estimate will be $T'_{jk} = \frac{1}{2} (T'_{1jk} + T'_{2jk})$

In table 4 : for a c.e. stratum only combined estimates is to be prepared, which is

$$T''_{jk} = \sum_i^{n_{ijk}} Y_{ijkl} + \sum_i^{n_{2jk}} Y_{2jkl}$$

Now taking both the schemes together, sub-sample estimates for Table-4, where an industry in a state is a sampled stratum

$T_{ijk} = T'_{ijk}$ (scheme 2) + T'_{ijk} (scheme 5) and combined estimate is $T_{jk} = \frac{1}{2}(T_{1jk} + T_{2jk})$

Annual Survey of Industries -1968

Where, an industry in a state is a c.e. stratum, sub-sample estimate and combined estimate will be same and that will be

$$T_{jk} = T'_{jk} \text{ (scheme 2) } + T'_{jk} \text{ (scheme 5)}$$

In Table 3, sub-sample estimates for a particular industry will be obtained by summing up all relevant stratum estimates belonging to that industry.

(a) where it comprises all sampled strata, sub-sample estimate will be

$$T_{1k} = \sum_j T_{ijk} \text{ and combined estimate will be}$$

$$T_k = \frac{1}{2}(T_{1k} + T_{2k})$$

(b) But, where it consists of c.e. strata alone sub-sample or combined estimate will be $T_k = \sum_j T_{jk}$.

(c) And when an industry consists of sampled strata and c.e. strata both sub-sample estimate will be

$$T_{1k} = \sum_j T_{ijk} \text{ (sampled strata) } + \sum_j T_{jk} \text{ (c.e. strata)}$$

and combined estimate will be

$$T_k = \frac{1}{2}(T_{1k} + T_{2k})$$

In Table 2; sub-sample estimates for a particular state will be obtained by summing up all relevant stratum estimates belonging to that-state.

(a) Where it comprises all sampled strata, sub-sample estimate will be

$$T_{ij} = \sum_k T_{ijk} \text{ and combined estimate will be}$$

$$T_j = \frac{1}{2}(T_{1j} + T_{2j}).$$

(b) But where it consists of c.e. strata only, sub-sample or combined estimate will be

$$T_j = \sum_k T_{jk}$$

(c) And when a state consists of sampled strata and c.e. strata both, sub-sample estimate will be

$$T_{ij} = \sum_k T_{ijk} \text{ (sampled strata)} + \sum_k T_{ijk}$$

(c.e. strata) and combined estimate will be

$$T_j = \frac{1}{2} (T_{1j} + T_{2j}).$$

In table 1, sub-sample estimate will be $T_i = \sum_k T_{ik}$ $\bar{\Delta}$ as obtained from estimation procedure for Table 3(a) and Table 3(c) $\bar{\Delta}$ + $\sum_k T_k$ $\bar{\Delta}$ as obtained from estimation procedure for Table 3(b) $\bar{\Delta}$ or = $\sum_j T_{ij}$ $\bar{\Delta}$ as obtained from estimation procedure for Table 2(a) and 2(c) $\bar{\Delta}$ + $\sum_j T_j$ $\bar{\Delta}$ as obtained from estimation procedure for Table 2(b) $\bar{\Delta}$, and combined estimate will be $T = \frac{1}{2}(T_1 + T_2)$

Annual Survey of Industries -1968

~~However, number of non-response cases being high,~~
Multipliers were adjusted at stratum level on the basis of no. of samples surveyed.

6. Summary of Findings

6.1 The following observations relating to the sample sector of ASI-1968 may be made from Table (1) :

(a) Total physical capital formation in 1968 in the sample sector was about Rs.187 crores of which new fixed assets acquired by purchase constituted about 63%. Thus physical capital formation was about 50% of total net closing value of all fixed assets. However, capital formation by financial approach was about Rs.166 crores.

(b) Rent paid was about Rs.32 crores in the context of owned fixed capital of about Rs.370 crores.

(c) Men workers were about 5 times as numerous as women workers; while contract workers were only about 6% of all direct men and women workers.

(d) While wages etc. for direct male workers were about Rs.1189 per worker per annum, direct female workers received about Rs.595 per worker.

(e) Electricity consumed through purchase was the most important fuel item, constituting about 30% of the value of all fuels consumed, estimated at Rs.60 crores.

* under scrutiny

Annual Survey of Industries -1968

(f) The value of materials consumed for manufacture was about Rs.1267 crores in the context of the value of total input at Rs.1402 crores.

(g) The sale value of goods sold in the same condition as purchased was found to be about 7% of the total output in same sector.

6.2 Information relating to seven states considered most important as regards the number of factories in the sample universe, is furnished below in respect of four broad economic indicators selected from Table (2).

Table (A): Table showing the relative importance in selected aspects of industrial activity of seven most important states arranged in the order of their number of factories.

srl. no.	state	no.of factories in sample universe* (actual)	total no. of working days (thousand)	value of plant & machinery (closing) (Rs.lakhs)	material consumed for manufacture (Rs.lakhs)	consumption of electricity purchased (Rs.lakhs)

Annual Survey of Industries - 1968

Table 3(A) : Estimates of selected items at all India for each industry.

industry (with code)	total man-hours for all workers ('000)	total no. of employees (actual)	total emoluments to all employees (Rs. '000)	total depreciation (Rs. '000)	value added (Rs. '000)
(1)	(2)	(3)	(4)	(5)	(6)
1. ginning and processing (010)	41448	35470	19902	5280	34971
2. manufacture of dairy products (202)	3114	2090	4060	2581	1101
3. canning and preserving of fruits and vegetables (203)	2515	1668	2361	1045	3987
4. canning and preserving of fish etc. (204)	2034	1073	1361	694	2315
5. grain mill products (205)	102406	76312	62740	18336	177450
6. bakery products (206)	10895	5734	7966	1024	14780
7. sugar factories (207)	12716	19984	7791	2669	18248
8. sugar confectionery (208)	2211	1305	1534	357	3483
9. miscellaneous food products (209)	117231	83098	81046	29490	142012
10. distilling, rectifying and blending spirits (211)	2030	1105	2272	1517	6559
11. wine (212)	412	224	321	122	3044
12. brewries and incidental processes (213)	539	364	559	26	4946
13. soft drinks and carbonated water (214)	3656	2315	4902	2103	22543
14. tobacco manufacture (220)	49830	32912	25852	1338	66533
15. cotton and other textiles(231)	114132	62860	94136	19230	154855
16. knitting mills (232)	14306	8391	14371	2556	41427
17. ropes and twines (233)	3530	1864	2380	560	4893
18. manufacture of other textiles (239)	16432	8827	15356	2655	25410
19. boots and shoes except rubber footwears (241)	4263	2339	6200	359	8744
20. repair of boats and shoes ex- cept rubber footwear (242)	279	125	404	17	310
21. manufacture of wearing apparel except footwears (243)	7610	4163	8202	449	14736
22. made up textiles except wearing apparel (244)	907	485	864	627	2025
23. manufacture of wood and cork except furniture (250)	54935	31988	40928	7534	74064
24. furnitures and fixtures (260)	14758	8022	13327	1801	23182
25. paper and boards (271)	14096	7785	11818	3460	18958

Annual Survey of Industries - 1968

Table 3(A)(Contd.) : Estimates of selected items at all India for each industry.

industry (with code)	total man-hours for all workers ('000)	total no. of employees (actual)	total emoluments to all employees (Rs. '000)	total depreciation (Rs. '000)	value added (Rs. '000)
(1)	(2)	(3)	(4)	(5)	(6)
26. printing and book binding (280)	83840	45313	81644	13461	146346
27. tannery and leather fini- shing (291)	19045	9286	18079	1562	41765
28. leather products except footwear (292)	2706	1521	2607	364	5219
29. rubber and rubber products (300)	17822	9630	18235	4995	40152
30. basic chemicals (311)	15984	12514	22648	10742	56405
31. vegetable and animal oils and fats (312)	520	378	629	152	2337
32. misc. chemicals (319)	55405	32857	60825	14405	151523
33. petroleum refineries (321)	230	227	1538	455	17137
34. miscellaneous products of petroleum and coal (329)	653	377	1088	380	4561
35. structural clay products (331)	35232	21996	22254	4218	35955
36. glass and glass products except lenses (332)	9224	5382	7386	1501	10494
37. pottery, chinaware etc. (333)	5995	2539	3262	736	4029
38. cement (334)	338	504	481	2340	(-) 1765
39. non-metallic mineral products (339)	38560	22250	25383	5944	50382
40. ferrous metals (341)	56162	32058	55172	13417	84962
41. non-ferrous metals (342)	17311	9806	16982	4508	32715
42. metals products except machinery (350)	118191	66236	110035	24021	208084
43. machinery except electri- cals (360)	146054	78588	140726	34598	275802
44. electrical machinery etc. (370)	36964	20850	45661	10405	73567
45. ship building (381)	1324	864	2617	297	3902
46. rail road equipments (382)	1398	691	1710	108	1977
47. manufacture of motor vehicles (383)	375	180	236	45	278
48. repair of motor and cycles (384)	62704	31854	66551	6717	81736
49. manufacture of bicycles (385)	1991	1085	1826	523	2897
50. air craft (386)	713	396	1908	113	2356

Appendix II

Statement showing at the three-digit level Labour Bureau classification of industries (adopted in sample sector estimates) and classification of Indian industries (adopted in census sector aggregates) in ASI-1968

srl. no.	industry code no. at 3 digit level Labour ASI Bureau classification	description as in ASI classification
(1)	(2)	(3)
1.	239,010	239 manuf-
2.	201	201 slaughtering, preparation and preserving of meat
3.	202	202 manufacture of dairy products
4.	203	203 canning and preserving of fruits and vegetables
5.	204	204 canning and preserving of fish and other sea foods
6.	205	205 manufacture of grain mill products
7.	206	206 manufacture of bakery products
8.	207	207 sugar factories and refineries
9.	208	208 manufacture of cocoa, chocolate and sugar confectionery
10.	209	209 manufacture of miscellaneous food preparation
11.	211	211 distilling, rectifying and blending of spirits (alcohol)
12.	212	212 wine industries
13.	213	213 breweries and manufacture of malt
14.	214	214 soft drinks and carbonated water industries
15.	220	220 tobacco manufacture
16.	231	231 spinning, weaving and finishing of textiles
17.	232	232 knitting mills
18.	233	233 cordage, rope, and twone industries
19.	241	241 manufacture of footwear
20.	242	242 repair of footwear
21.	243	243 manufacture of wearing apparel (except footwear)
22.	244	244 manufacture of made-up textile goods, except wearing apparel
23.	250	251,252, saw mills, planning and other wood mills; wodden and 259 cane containers and cane small ware; manufacture of cork and wood products not elsewhere classified
24.	260	260 manufacture of furniture and fixtures
25.	271	271 manufacture of pulp, paper and paper board
26.	280	280 printing, publishing and allied industries
27.	291	291 tanneries and leather finishing plants
28.	292	293 manufacture of leather products except footwear and other wearing apparel
29.	300	300 manufacture of rubber products
30.	311	311 basic industrial chemicals, including fertilizers
	312	312 vegetables and animal oils and fats (except edible oils)
32.	319	313, 319 manufacture of paints, varnishes and lacquers; manufacture of miscellaneous chemical products

Annual Survey of Industries-1968

srl. no.	industry code no. at 3 digit level	Labour Bureau classification	ASI classification	description as in ASI classification
(1)	(2)	(3)	(4)	
33.	321	321		petroleum refineries
34.	322,329	329		manufacture of miscellaneous products of petroleum & coal
35.	331	331		manufacture of structural clay products
36.	332	332		manufacture of glass and glass products
37.	333	333		manufacture of pottery, china and earthenware
38.	334	334		manufacture of cement (hydraulic)
39.	339	339		manufacture of non-metallic mineral not elsewhere classified
40.	341	341		iron and steel basic industries
41.	342	342		non-ferrous basic metal industries
42.	350	350		manufacture of metal products except machinery and transport equipments
43.	360	360		manufacture of machinery except electrical machinery
44.	370	370		manufacture of electrical machinery, apparatus, appliances and supplies
45.	381	381		ship building and repairing
46.	382	382		manufacture of rail-road equipment
47.	383	383		manufacture of motor vehicles
48.	384	384		repair of motor vehicles
49.	385	385		manufacture of motor cycles and bicycles
50.	386	386		manufacture of aircraft
51.	389	389		manufacture of transport equipment not elsewhere classified
52.	391	391		manufacture of professional and scientific measuring and controlling instruments
53.	392	392		manufacture of photographic and optical goods
54.	393,394	393		manufacture of watches and clocks
55.	395	394		manufacture of jewellery and related articles
56.	396,399	292,395 399		manufacture of fur products, except wearing apparel; manufacture of musical instruments; manufacture of industries not elsewhere classified
57.	+511	511		electric light and power (generation, transmission and distribution)
58.	512	512		gas manufacture and distribution
59.	*521			
60.	*522			
61.	*831			
62.	+#842			
63.	*844			

+ In ASI-68 these industries were left out of the scope of the sample sector.

* The counterparts of these industries in ASI-classification remained outside census sector tabulations in ASI-68.
