NATIONAL SAMPLE SURVEY

TWENTYSIXTH ROUND : JULY 1971 - JUNE 1972

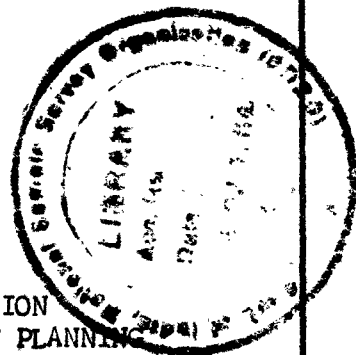

NUMBER 258/4

CALORIE AND PROTEIN CONTENT OF FOOD ITEMS
CONSUMED PER DIEM PER CONSUMER UNIT IN

RURAL AREAS OF

MEGHALAYA, GOA & MANIPUR AND

URBAN AREAS OF

MEGHALAYA, NAGALAND & MANIPUR ^{1/}

Introduction

1. In its twentysixth round of countrywide survey, National Sample Survey Organisation (NSSO) of India collected detailed information on expenditure incurred by a sample household on domestic consumption. Value and quantity of 101 listed items of food consumed during a period of 30 days preceding the day of enquiry had been collected from the sample households.
2. Appropriate conversion factors ^{2/} were applied to the quantity of food items consumed for deriving the energy (calorie) and protein (in gm.) content of those. The total number of household members were then converted into consumer units, using the age-sex composition of the household members. All these conversions were done to arrive at the ^{per}/diem intake of calorie and protein per consumer unit.
3. The general sample design is stratified with two-stage selection within each stratum. The first-stage units are villages in rural areas and blocks in urban areas; the second-stage units are households. The frame is the list of villages as per the 1961 population census for the rural areas, and towns and cities of the 1961 population census sub-divided into blocks were used as the frame for urban areas.

^{1/} This special tabulation work for the rural and urban areas of various states of India has been taken up by the NSSO to meet the requirement of the Food and Agriculture Organisation of the United Nations (FAO). In the earlier three brochures (Nos. 258/1, 258/2 & 258/3) results for the rural area of Assam, Bihar, Orissa, West Bengal, Gujarat, Madhya Pradesh, Rajasthan and Maharashtra have been presented. The first two brochures also contained the results for the urban areas of the first four states.

^{2/} The conversion factors were mostly taken from - "The Nutritive Value of Indian Foods and the Planning of Satisfactory Diets" by C. Gopalan et. al., Special Report Series No. 42, Indian Council of Medical Research (1966).

Explanatory note on the Table

4. The estimated number of households in the rural/urban areas of a state has been grouped by two different characteristics - (i) calorie intake per diem per consumer unit and (ii) per capita monthly consumer expenditure. For each of these groups of households the table shows the - (a) number of households in the sample, (b) average size (number of persons) of household, (c) number of consumer units per household, (d) percentage of calorie intake from five broad food groups, (e) average intake of calorie and protein (gm.) per consumer unit per diem.

5. The grouping of classificatory characters are as shown below :

A. Calorie intake per diem per consumer unit group

- (1) upto - 1500, (2) 1501-1700, (3) 1701 - 1900, (4) 1901 - 2100
(5) 2101 - 2300, (6) 2301 - 2500, (7) 2501 - 2700, (8) 2701 - 3000,
(9) 3001 - 3500, (10) 3501 - 4000, (11) 4001 & above and
(12) all groups;

B. Per capita monthly consumer expenditure (in rupees) class

- (1) 00 - 15, (2) 15 - 21, (3) 21 - 24, (4) 24 - 28, (5) 28 - 34,
(6) 34 - 43, (7) 43 - 55, (8) 55 - 75, (9) 75 - 100, (10) 100
and above and (0) all classes ;

∟00 - 15 means 00-14.99, 15:- 20.99 and so on ∟

C. Food groups

- I - cereals, potato, sugar, jaggery and cereal substitutes;
II - pulses, nuts and seeds;
III - milk and milk products; meat, egg and fish;
IV - edible oils;
V - fruits, vegetables, spieces and prepared food.

6. Two numbers separated by a stop in between and an alphabet after the numbers have been used for numbering tables. The first left hand number represents the number assigned to the particular state after arranging the states in alphabetic order of their respective names. The second number is the expenditure class number as under para 5B; and the alphabet at the end - 'R' stands for rural and 'U' for urban. Thus Table (23.3/R) contains the results for the rural households of Manipur belonging to the monthly per capita expenditure class of Rs. 21-24; and Table (13.0/U) shows the results for all households of urban areas of Nagaland.

7. The number of sample households in each per capita expenditure class and calorie intake group has been shown in the Table. The estimates need be used with caution wherever the sample size is too small. In such cases adjacent groups may be combined to increase the reliability of the estimates.

National Sample Survey : 25th Round, July 1971 - June 1972 (Special Tabulation for FAO)

Table (11.0/R) : PERCENTAGE (0.00) OF CALORIE INTAKE PER CONSUMER UNIT UNDER DIFFERENT FOOD GROUPS AND AVERAGE PROTEIN INTAKE (GM) PER CONSUMER UNIT BY GROUPS OF CALORIE INTAKE PER DIET PER CONSUMER UNIT AND BY PER CAPITA MONTHLY EXPENDITURE CLASSES
