Annual Survey of Industries - 1970

2. Scope and Coverage

2.1 Data were collected as per the accounting years of the factories surveyed. The specific accounting year for the purpose of ASI-70 was that ending during April 1, 1970 and March 31, 1971.

2.2 The survey was conducted mainly during the year 1972.

2.3 The ASI-1970 survey was extended to the whole of the Indian Union.

2.4 The survey relates to all such factories as are registered under sections 2n(i) and 2n(ii) of the Factories Act, 1948. As these sections refer respectively to factories employing ten or more workers, if using power, and to those employing twenty or more workers, if not using power, on any day in the previous year, the universe comprised all such factories except the defence installations, technical training institutions, factories engaged in hotels and cafe service and storage & distribution of oil. The sample sector generally comprised all factories in the frame which employ on an average less than 50 workers if using power and less than 100 workers if not using power. The rest of the universe comprised the census sector and this sector included all electricity generating and distributing units classified under industry no. 511, irrespective of employment size. Frames were collected by the Directorate of NSS from the offices of the Chief Inspectors of Factories. Prior to ASI-1968, the sample universe in regard to a particular round covered all such factories registered as on the last day of the preceding year (e.g., as on 31.12.1966 for ASI-1967). However, in ASI-1970 the sample universe comprised registered factories as on 31.12.1967 supplemented by newly added factories during 1968, 1969 and 1970.

Annual Survey of Industries - 1970

2.5 Sample factories belonging to the excluded categories, gone out of existence, closed or deregistered as well as those covered in the same return with other census or sample factories were treated as blank cases. Contribution from such blank factories were taken to be nil for the purpose of estimation. The item "sample surveyed" of each table includes those blank factories, if any. Thus "sample surveyed" excludes only the non-responding factories.

2.6 According to sampling design, all the union territories except Delhi and all the industries having less than 100 factories in sample universe were completely enumerated.

2.7 A copy of the schedule of investigation canvassed in the survey is given in Appendix II.

3. Concepts and Definitions

3.1 Some of the concepts involved in the survey on which estimates are furnished herewith are outlined below :

(1) gross value of plant and machinery : It contained total original (undepreciated) value for plant and machinery as at the end of the accounting period. It included book-value of the own constructed plant and machinery, if installed, and approximate value for rented-in plants, etc. at the time of renting-in. Full value of plant, etc. purchased on hire-purchase basis was also included. Excluded were rented-out plant and machinery.

Annual Survey of Industries - 1970

(ii) fixed capital : It comprised the depreciated closing book value of all real fixed assets, including those at the head office allocable to factories.

(iii) working capital : It comprised the stocks as at the end of accounting year of materials, stores, fuels, semi-finished goods and finished products and by-products as well as cash in hand and at bank and net balance of amounts receivable over amounts payable. It excluded fixed deposits as well as long term loans and investments.

(iv) invested capital : It was the total of fixed capital and physical working capital comprising materials, fuels, semi-finished goods, finished products and by-products as on the closing date.

(v) outstanding loans : It comprised all loans, whether short term or long term, outstanding as per the books of the factory as on the closing day of the accounting year. It did not include interest if any due on such loans.

(vi) workers : The term 'worker' was used in the same sense as in the Factories Act, 1948 and excluded persons holding positions of supervisory and management or employed in confidential position. It included persons employed through contractors and apprentices.

(vii) all employees : It comprised all workers and persons other than workers and included persons in the head office employed in connection with manufacturing activity, but excluded persons engaged in retail sales or delivery^{of}/goods.

Annual Survey of Industries - 1970

(viii) emoluments : It comprised payments made by way of wages, salaries and allowances and included value of payments in kind, but excluded contributions to provident funds, pensions, gratuity and other charges.

(ix) input : It included costs of fuels and materials consumed for manufacture and repairs, expenses on industrial and non-industrial services purchased as well as indirect taxes paid by the factory like local rates, licences, etc. It also included the cost of goods sold in the same condition as purchased, but excluded directors' fee and managing agents' remuneration and materials supplied by customers for processing.

(x) net balance of semi-finished goods : It was the excess of value of goods in process as at the end of the accounting year over that as at the beginning of the accounting year, positive or negative.

(xi) output : Ex-factory value of all finished goods produced and the values only of industrial services rendered by the factory during the reference year were included. Also included were the net balance of semi-finished goods as at the end of the accounting year and the sale value of goods sold in the same condition as purchased.

(xii) depreciation : It was taken as provided for the reference year by the factory or ^{was} estimated on the basis of the cost of installation and working life of fixed assets in terms of number of years.

(xiii) value added : This value was arrived at by deducting the value of input from the value of output. It was net of depreciation for the reference year.

Annual Survey of Industries - 1970

4. Explanatory Notes on the Tables

4.1 This volume contains estimates for (a) all industries together all-India; (b) all industries together by state; (c) each industry at all-India and (d) each industry by state. All these estimates are in respect of the sample sector for the Annual Survey of Industries for 1970 (ASI-70). Results for 18 key items are presented in this volume.

4.2 The zero (0) series tables show the distribution of factories in the sample sector universe as well as in the selected sample by industry at all-India level, at the state level for all industries combined, and for each state by industry. Table 4 has been furnished in two parts i.e., for sampled industries and the complete enumeration industries separately. In tables 2, 3 and 4 aggregates for the items have been furnished for complete enumeration states or industries. In respect of the sampled states or industries only the combined estimates obtained from two sub-sample estimates have been shown.

4.3 Estimates left blank or shown as '-' (nil) indicate that the concerned factories had no contribution to report on the characteristic. Estimates marked '0' (zero) mean that the contribution was less than half in terms of the unit prescribed.

4.4 In view of section 7 of the Collection of Statistics Act, 1953 and as desired by the Central Statistical Organisation, wherever total number of factories is less than three in the sample universe of an industry at all-India level or an industry within a state, the estimates for them have not been furnished in tables 3 and 4 of the report. These estimates were forwarded to the Industrial Statistics Wing of the Central Statistical Organisation. However, these estimates have been taken into consideration for

Annual Survey of Industries - 1970

4.5 Non-response : Out of 66581 factories in all-India as per the frame of ASI-1970, 51665 belonged to sample universe. Number of samples selected for ASI-1970 was 21935. During the time of tabulation the extent of non-response was found to be about 10 percent, the number of non-responding factories being 2279. It may be mentioned here that no filled-in return in respect of ASI-70 was received from Andaman & Nicobar islands.

5. Sampling Design

5.1 In earlier rounds, the entire registered factory sector was divided into two sectors (i) census sector comprising factories having on an average 50 or more workers using power and 100 or workers not using power and (ii) sample sector, comprising the rest of the factories, from which 6000 factories were drawn as samples. Later on, the Standing Committee for the Improvement of Industrial Statistics keeping the census sector as it was in earlier rounds, decided to cover the entire sample universe in the course of three rounds of SI-1968, ASI-1969 and ASI-1970. It was felt that this integrated scheme would be useful to furnish results at the 6-digit level of industry code as per SI classification of industries at the end of ASI-1970, as is done in census sector. As with the census sector, it was also decided to cover newly added factories during 1968 to 1970 in the sample sector.

5.2 For the purpose of ASI-1968 lists of factories registered under Factories Act, 1948 as on 31.12.67 were collected from each state. From factories registered under section 2m(i) and having 50 or more workers at least any one of the previous three rounds and factories registered under section 2m(ii) and having 100 or more workers in at least any one of the

Annual Survey of Industries - 1970

previous three rounds were selected for the census sector as usual. All factories were continued to remain in census sector during the course of and ASI-1970. From the rest of the factories, except in some states or in (vide para 5.3) one-third factories were selected for survey in ASI-1968 different strata where a stratum refers to a state/^xindustry cell. Another one-third factories were selected from the same stratum for survey in ASI-1969. The remaining one-third factories were covered in ASI-1970.

5.3 For the first time in ASI-1968, it was decided to completely enumerate the factories of such industries as ^{were} having less than 100 units in the sample universe of all-India. In absence of complete lists of factories for ASI-1968 for all the states during the time of sample selection, we had to depend on lists for ASI-1967 for determining such industries. Total number of such industries became 33. Industry codes for them were 202, 203, 204, 208, 211, 213, 214, 233, 241, 242, 244, 292, 312, 321, 322, 329, 333, 334, 381, 382, 385, 386, 392, 393, 394, 395, 396, 512, 521, 522, and 831. Certain union-territories, viz., Andamans, Chandigarh, Goa, Himachal Pradesh, Jammu & Kashmir, Pondicherry, Manipur and Tripura were completely enumerated in the sample sector as in previous years. All the industries and states listed above were completely enumerated in ASI-1969 and ASI-1970.

5.4 As regards the newly registered factories in 1968, those engaging 50 or more workers with power and 100 or more workers without power were covered in the census sector of ASI-1968. Such factories remained in the census sector of ASI-1969 and ASI-1970 irrespective of their employment size. From the remaining factories i.e., those which belonged to the sample sector in those states and industries as mentioned in para 5.3 above were completely

Annual Survey of Industries -

enumerated. From the remaining factories of the sample sector, one-third factories were selected from each sampled stratum for the survey in ASI-1969. Another one-third factories were selected from all such sampled strata for ASI-1969. The rest was covered in ASI-1970. Again, from the list of factories newly registered in 1969, those engaging 50 or more workers with power and 100 or more workers without power were covered in the census sector. Barring such industries and states as were to be completely enumerated, half of the factories were selected for survey in ASI-1969 from each sampled stratum. The remaining half of the factories was surveyed in ASI-1970. Besides above, from the list of newly added factories in 1970, all power using factories having less than 50 workers and not power using factories having less than 100 workers were completely enumerated in ASI-1970.

5.5 For the sampled strata, a stratified unistage design was adopted, a stratum being an industry within a state and the sample unit being a factory. Samples were drawn in the form of two independent interpenetrating sub-samples. The sampling design was a self-weighting one.

5.6 Within each industry in a state the factories were arranged by size classes of number of workers before drawing samples for ASI-1968. Sampling serial / ^{numbers} were given starting from 1 to all such factories in a stratum. Then selection of factories was done linear systematically with the interval of 6 in the case of both original and supplementary lists of factories for ASI-1968. Two random nos. R_1 and R_2 between 1 to 6 were selected without replacement. Thus factories having sampling serial nos. $R_1, R_1+6, R_1+12 \dots\dots$ and $R_2, R_2+6, R_2+12 \dots\dots$ constituted sub-sample 1 and sub-sample 2 respectively in ASI-1968.

Annual Survey of Industries - 1970

5.7 In ASI-1969, two random numbers R_1' and R_2' between 1 and 6 were selected without replacement, subject to the condition that R_1' and R_2' of ASI-1969 were different from R_1 and R_2 of ASI-1968 of a particular sampled stratum. Two linear systematic samples $R_1', R_1'+6, R_1'+12 \dots\dots\dots$ and $R_2', R_2'+6, R_2'+12$ constituted sub-sample 1 and sub-sample 2 respectively in ASI-1969. Rest of the factories were covered in ASI-1970. Same method was followed in case of last year's supplementary frame, i.e., factories newly registered in 1968. But half of the factories from the supplementary frame for ASI-1969, i.e., factories newly registered in 1969, were selected as samples. The selection procedure was same as that of ASI-1968, except ^{that} R_1 and R_2 lay between 1 to 4 and the interval for linear systematic samples was 4. The remaining half was selected, as usual, for ASI-1970. From the supplementary frame for ASI-1970, all the factories were completely enumerated in ASI-1970.

6. Estimation procedure

6.1 Different types of lists of factories as were used for the integral survey conducted during ASI-1968 to ASI-1970 were designated by different scheme numbers. ^{The} ^{gives} following / the references of the lists used.

- Scheme 1 : list of census sector factories as on 31.12.67
- Scheme 2 : list of sample sector factories as on 31.12.67
- Scheme 3 : list of census sector factories newly added during
- Scheme 4 : list of census sector factories newly added during
- Scheme 5 : list of sample sector factories newly added during
- Scheme 6 : list of all electricity undertakings.
- Scheme 7 : list of sample sector factories newly added during
- Scheme 8 : list of census sector factories newly added during
- Scheme 9 : list of sample sector factories newly added during

Thus, ASI-1970 sample sector was concerned with the lists bearing scheme numbers 2, 5, 7 and 9 only.

Annual Survey of Industries - 1970

The estimates obtained from schemes 2, 5, 7 and 9 taken together have been shown in tables 1 to 4. Industry, in all-India each industry/^{tables} or state by each industry tables refers to the 3-digit industry code as per Labour Bureau Classification. As already known, a state by industry code is a stratum. There are two categories of strata, of which (i) category-1 i.e. C_1 : sampled stratum and (ii) category-2 i.e. C_2 : complete enumeration stratum (c.e. stratum).

6.2 In view of the sampling design, as associated above a particular industry at all-India may consist of strata, of which (a) all of them are sampled strata in all the states (if there be no factory in c.e. strata) or (b) all of them are c.e. strata in all the states or (c) some of them are sampled strata in certain states and the remaining are c.e. strata in other states. All the three above cases may also occur in case of a state all industries together.

6.3 In view of the occurrence of high nonresponse cases, instead of using fixed multipliers, variable multipliers were used for the purpose of estimation. Again, for the purpose of operational convenience and quick tabulation and also considering the volume of scheme 7 factories to be negligible in comparison with scheme 2 plus scheme 5, multipliers were calculated on the basis of schemes 2, 5 and 7 taken together. Scheme 7 factories being completely enumerated and their volume being high, they were treated separately.

6.4 Notations :-

N_{257jk} = total number of factories in the sample sector of the (jk) th stratum (jth state and kth industry) for schemes 2, 5 and 7 taken together.

n_{257ijk} = number of sample factories surveyed including blank cases in the ith sub-sample of the (jk)th stratum for schemes 2, 5 and 7 taken together in case of C_1 .

Annual Survey of Industries - 1970

n'_{257jk} = number of sample factories surveyed including blank cases in both sub-sample taken together of the (jk)th stratum for schemes 2, 5 and 7 put together in case of C_2 .

Y_{ijklr} = value of a characteristic if for the r th factory of i th sub-sample and (jk)th stratum in schemes 2, 5 or 7.

6.5 Then for a sampled stratum (i.e. case C_1), the i th sub-sample estimate of the stratum total was obtained as $T_{257ijk} = \frac{N_{257ijk}}{n'_{257ijk}} \sum_r Y_{ijklr}$

Scheme 9 being completely enumerated, an estimate T_{9jk} based on b sub-samples was calculated as $T_{9jk} = \frac{N_{9jk}}{n_{91jk} + n_{92jk}} \sum_l \sum_r Y_{ijklr}$

For all schemes together, the i th sub-sample estimate of the total of (jk) stratum becomes

$$T_{ijk} = T_{257ijk} + T_{9jk}$$

The combined estimate for (jk)th stratum was the simple mean of the two sub-sample estimates i.e.,

$$T_{jk} = \frac{1}{2}(T_{1jk} + T_{2jk})$$

6.6 When the (jk)th stratum was a complete enumeration stratum (i.e. case C_2), then only the combined estimate T_{257jk} was obtained as

$$T_{257jk} = \frac{N_{257jk}}{n'_{257jk}} \sum_l \sum_r Y_{ijklr}$$

and similarly T_{9jk}

$$\text{and } T_{jk} = T_{257jk} + T_{9jk}$$

6.7 The combined estimate of the j th state total was $T_j = \sum_k T_{jk}$ and the combined estimate for the K th industry was $T_K = \sum_j T_{jk}$

The all-India all-industries estimate was $T = \sum_k T_k = \sum_j T_j$

Annual Survey of Industries - 1970

7. Summary of findings

7.1 Sample sector estimates for fixed capital, input, output, value added (gross of depreciation) and ratio of output to fixed capital are given below for 1961 to 1970 for facility of quick comparison. It is found from the figures given below in Table (A) that in the sample sector value added at 380 crores, as obtained from ASI-1970, has increased by about 8% over that for ASI-1969. Values of input and output for ASI-1970 are found to have risen by about 16% and 18% respectively from those of ASI-1969. In 1970 value added has been about 15% of total output, compared to 17% in the preceding year.

Table (A) : Sample sector estimates : all India
all industries (in crores of rupees)

fixed capital	total input	total output	value added (gross of depreciation)	ratio of output to fixed capital (0.0)
(2)	(3)	(4)	(5)	(6)
not tabulated	644	1797	153	-
180	753	921	168	5.1
173	832	1012	180	5.8
174	924	1110	186	6.4
184	909	1104	196	6.0
(a) 234	1239	1479	240	6.3
265	1092	1531	239	5.8
370	1482	1761	279	4.8
354	1720	2073	353	5.9
427	2065	2445	380	5.7

Figures reduced by contribution from electricity factories which were eliminated from sample sector with effect from 1962.

Unlike previous years, data collected since ASI-1966 were as per accounting year of the factory.

Annual Survey of Industries - 1970

7.2 For comparative study, six key items of industrial activity, culled from Table (2) of the report, are presented in Table (B) below in respect of such states as/ ^{were} having at least Rs.125 crores of output in the sample sector of ASI-1970. Together they account for about three fourths of each of sample sector totals for no. of employees, emoluments, input, output and value added. Arranged in the descending order of their value added, Maharashtra tops the list/ ⁱⁿ respect all the characteristics given in Table (B). Regarding input, output and value added Gujarat occupies the second position but Tamil Nadu comes second in respect of fixed capital, employees and emoluments. Although in the scale of value added Uttar Pradesh comes last in Table (B), it stands fourth in case of fixed capital and emoluments and fifth in case of employees.

Table (B) : Sample sector estimates of a few items for seven states arranged in descending order of value added (net of depreciation)

srl.	state	fixed capital (closing) (Rs.lakhs)	all employees (actual number)	emoluments to employees (Rs.lakhs)	total input (Rs.lakhs)	total output (Rs.lakhs)	value added (Rs.lakhs)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Maharashtra	7582	172714	3526	35758	43873	7232
2.	Gujarat	4133	110994	1652	28946	34144	4781
3.	Tamil Nadu	4886	129671	1925	26689	31215	4019

Annual Survey of Industries - 1970

7.2 For comparative study, six key items of industrial activity, culled from Table (2) of the report, are presented in Table (B) below in respect of all such states as/ having at least Rs.125 crores of output in the sample sector of ASI-1970. Together they account for about three fourths of each of sample sector totals for no. of employees, emoluments, input, output and value added. Arranged in the descending order of their value added, Maharashtra tops the list/ respect of all the characteristics given in Table (B). Regarding input, output and value added Gujarat occupies the second position but Tamil Nadu comes second in respect of fixed capital, employees and emoluments. Although in the scale of value added Uttar Pradesh comes last in Table (B), it stands fourth in case of fixed capital and emoluments and fifth in case of employees.

Table (B) : Sample sector estimates of a few items for seven states arranged in descending order of value added (net of depreciation)

state	fixed capital (closing) (Rs.lakhs)	all employ-ees (ac-tual number)	emoluments to employ-ees (Rs.lakhs)	total input (Rs.lakhs)	total output (Rs.lakhs)	value added (Rs.lakhs)

Annual Survey of Industries - 1970

7. Summary of findings

7.1 Sample sector estimates for fixed capital, input, output, value added (gross of depreciation) and ratio of output to fixed capital are given below for 1961 to 1970 for facility of quick comparison. It is found from the figures given below in Table (A) that in the sample sector value added at Rs. 380 crores, as obtained from ASI-1970, has increased by about 8% over that from ASI-1969. Values of input and output for ASI-1970 are found to have risen by about 16% and 18% respectively from those of ASI-1969. In 1970 value added has been about 16% of total output, compared ^{to} 17% in the preceding year.

Table (A) : Sample sector estimates : all India
all industries (in crores of rupees)

year	fixed capital	total input	total output	value added (gross of depreciation)	ratio of out to fixed capital (0.0

Appendix I

Statement showing at the three-digit level labour Bureau classification of industries (adopted in sample sector estimates) and classification of Indian industries (adopted in census sector aggregates) in ASI-1970

Srl. no.	industry code no. at 3 digit level		description as in ASI classification
	Labour Bureau classification	ASI classification	
(1)	(2)	(3)	(4)
1	239,010	239	manufacture of textiles not elsewhere classified
2	201	201	slaughtering, preparation and preserving of meat
3	202	202	manufacture of dairy products
4	203	203	canning and preserving of fruits and vegetables
5	204	204	canning and preserving of fish and other sea foods
6	205	205	manufacture of grain mill products
7	206	206	manufacture of bakery products
8	207	207	sugar factories and refineries
9	208	208	manufacture of cocoa, chocolate and sugar confectionery
10	209	209	manufacture of miscellaneous food preparation
11	211	211	distilling, rectifying and blending of spirits(alcohol)
12	212	212	wine industries
13	213	213	breweries and manufacture of malt
14	214	214	soft drinks and carbonated water industries
15	220	220	tobacco manufacture
16	231	231	spinning, weaving and finishing of textiles
17	232	232	knitting mills
18	233	233	cordage, rope, and twine industries
19	241	241	manufacture of footwear
20	242	242	repair of footwear
21	243	243	manufacture of wearing apparel (except footwear)
22	244	244	manufacture of made-up textile goods, except wearing apparel
23	250	251, 252, 259	saw mills, planing and other wood mills; wooden and cane containers and cane small ware; manufacture of cork and wood products not elsewhere classified
24	260	260	manufacture of furniture and fixtures
25	271	271	manufacture of pulp, paper and paper board
26	280	280	printing, publishing and allied industries
27	291	291	tanneries and leather finishing plants
28	291	293	manufacture of leather products except footwear and other wearing apparel
29	300	300	manufacture of rubber products
30	311	311	basic industrial chemicals, including fertilizers
31	312	312	vegetables and animal oils and fats (except edible oils)
32	319	313, 319	manufacture of paints, varnishes and lacquers, manufacture of miscellaneous chemical products
33	321	321	petroleum refineries
34	322, 329	329	manufacture of miscellaneous products of petroleum and coal
35	331	331	manufacture of structural clay products
36	332	332	manufacture of glass and glass products

Annual Survey of Industries - 1970

srl. no.	industry codes no. at 3 digit level		description as in ASI classification
	Labour Bureau classi- fication	ASI classi- fication	
(1)	(2)	(3)	(4)
	333	333	manufacture of pottery, china and earthenware
38	334	334	manufacture of cement (hydraulic)
39	339	339	manufacture of non-metallic mineral not elsewhere classified
40	341	341	iron and steel basic industries
41	342	342	non-ferrous basic metal
42	350	350	manufacture of metal products except machinery and transport equipments
43	360	360	manufacture of machinery except electrical machinery
44	370	370	manufacture of electrical machinery, apparatus, appliances and supplies
45	381	381	ship building and repairing
46	382	382	manufacture of rail-road equipment
47	383	383	manufacture of motor vehicles
48	384	384	repair of motor vehicles
49	385	385	manufacture of motor cycles and bicycles
50	386	386	manufacture of aircraft
51	389	389	manufacture of transport equipment not elsewhere classified
52	391	391	manufacture of professional and scientific measuring and controlling instruments
53	392	392	manufacture of photographic and optical goods
54	393,394	393	manufacture of watches and clocks
55	395	394	manufacture of jewellery and related articles
56	396,399	292,395 399	manufacture of fur products, except wearing apparel; manufacture of musical instruments, manufacture of industries not elsewhere classified
57	+511	511	electric light and power (generation, transmission & distribution)
58	512	512	gas manufacture and distribution
59	*521		
60	*522		
61	*831		
62	*842		
63	*844		

+ In ASI-70 these industries were left out of the scope of the sample sector.

* The counterparts of these industries in ASI-classification remained outside census sector tabulations in ASI-70.
