THE NATIONAL SAMPLE SURVEY

TWENTYFOURTH ROUND : JULY 1969 - JUNE 1970

NUMBER 271

CONSUMER EXPENDITURE

SECTION ONE

INTRODUCTION

1.1 This report presents results on household consumer expenditure based on the Integrated household schedule of NSS 24th round.

1.2 The field work of Twentyfourth round started in July 1969 and continued upto June 1970 covering a period of one complete year. Data relating to household purchase and consumption for non-productive domestic purposes were collected in blocks 5-8 of the Integrated household schedule. In block 9, summary of consumer expenditure was recorded from blocks 5-8. The reference period of collection of data for these blocks was 30 days preceding the date of survey. This report is based on data of the summary block.

1.3 The survey extended over the whole of the rural and urban areas of the Indian Union excepting North-East Frontier Agency, Ladak district of Jammu and Kashmir state, Mizo Hills district in Assam, Pal and Sumar tehsils of district Surguja and Bijapur, Dantewara and Konta tehsils of district Bastar of Madhya Pradesh, rural areas in Nagaland, Mao, Ukhrul and Tamenlong sub-divisions of Manipur, the Union Territories of Andaman and Nicobar Islands and Laccadive, Minicoy and Amindivi Islands.

1.4 The field work was undertaken by the Directorate of National Sample Survey in all the states and Union Territories excepting West Bengal and Bombay City where Indian Statistical Institute collected the data.

1.5 In the NSS 24th round all the state Governments except that of West Bengal participated in the work of procedures on similar sample in their respective states. Both the reorganised states of Punjab and Haryana were among the participating states. Among the Union Territories only Manipur and Tripura participated on full matching basis.

1.6 Besides 'Introduction', there are four other sections in the report. In section two and three, some important concepts used in the enquiry on consumer expenditure and explanatory notes on the tables are presented. Section four deals with some findings of the survey. Sample design and estimation procedure have been noted in section five.

contd.

1.7 Appendix I of this report contains detailed tables for each of the states and union territories for rural and urban. Tables for All India and union territories pooled, and for four big cities - Bombay, Calcutta, Delhi and Madras - separately and combined have also been presented.

1.8 The following tables have been presented in the report :

Table (1)	Distribution of sample households by monthly per capita expenditure classes
Table (2)	Percentage (0.00) distribution of estimated number of households by monthly per capita expenditure classes
Table (3)	: Percentage (0.00) distribution of estimated number of persons by monthly per capita expenditure classes
Table (4)	: Average number (0.00) of persons per household by monthly per capita expenditure classes
Table (5)	: Consumer expenditure in rupees (0.00) per person for a period of 30 days by broad groups of items of consumption and by monthly per capita expenditure classes
Table (6)	: Percentage (0.00) of consumer expenditure to total consumer expenditure by broad groups of items of consumption and by monthly per capita expenditure classes

1.9 The following system has been adopted in numbering the tables. The left hand most digits refer to the table number listed above. The digits following the first point from left stand for individual state and union territory which were first arranged in alphabetic order of their names and were assigned serial numbers in that order. The alphabet 'R' at the end stands for rural. Similarly 'U' will mean Urban and C_1 , C_2 , C_3 and C_4 the four big cities - Bombay, Calcutta, Delhi and Madras. ,

Section Two

CONCEPTS AND DEFINITIONS

2.1 Some of the important concepts and definitions followed in NSS 24th round consumer expenditure survey are noted below :

2.2 Household : A household is a group of persons normally living together and taking food from a common kitchen. A boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government such as those in prisons, police quarters, cantonments, hospitals, relief camps are however, excluded from the scope of the enquiry.

2.3 Household member : Any person who takes principal meal with the household for atleast 16 days during a period of 30 days preceding the date of enquiry is considered to be a member of the household. Such a person may be the head of the household or a relation or protege of the head or an employee or a guest of the household.

2.4 Household Size : The number of members (as defined above) in a household gives the household size.

2.5 Household Consumer expenditure : Consumer expenditure of a household comprises all expenditure incurred by the household during a reference period of 30 days preceding the date of survey exclusively towards its non-productive domestic consumption. Thus all expenses towards the enterprise activities of the household are excluded. Transfer payments in kind like loans advanced, charities, gifts and other payments in kind if any is not considered as consumer expenditure. But any consumption out of transfer receipts in kind like borrowings, gifts, charities, perquisites received by the household, free collections and other receipts in kind if any is considered for determining total consumption of the household.

SECTION THREE

EXPLANATORY NOTES ON TABLES

3.1 In NSS data on consumer expenditure are usually collected for a large number of items. But in presenting the results similar items have been merged to form 21 homogeneous groups. The groups are : (1) Cereals; (2) gram; (3) Cereal substitutes; (4) pulse and products; (5) milk and products; (6) edible oil; (7) meat, fish and egg; (8) vegetables; (9) fruits and nuts; (10) sugar; (11) spices; (12) beverages and refreshments; (13) pan, tobacco and intoxicants; (14) fuel and light; (15) clothing; (16) footwear; (17) miscellaneous goods and services; (18) rents; (19) taxes; (20) durable goods. Results are also presented for (i) food-total, (ii) non-food total and (iii) total consumer expenditure.

3.2 The groups of items of consumption as presented in the table are defined here in terms of their constituents:

1. Cereals : rice, wheat, jowar, bajra, maize, barley, small millets, ragi and their products;
2. Gram : bengal-gram and its products;
3. Cereal substitutes : Cereal substitutes like topioca, pea etc.;
4. Pulse and products : arhar, tur, gram, moong, masoor, urd, khesari, pea and other pulses and their products;
5. Milk and products : liquid milk (cow, buffalo, goat and others), milk (condensed, powder etc.), ghee (cow and buffalo), butter, dahi, ghol, lassi and other milk products;
6. Edible oil : vanaspati, mustard oil, cocconut oil, gingelly oil, groundnut oil, linseed oil, refined oil, other edible oil and oil seeds;
7. meat, fish and eggs : meat (goat meat, mutton, beef, pork, buffalo meat and other meat), egg, poultry, fish (fresh and dried), bird and others;
8. Vegetables : potato, onion, tomato, brinjal, cabbage, cauli-flower, root vegetables (arum, radish etc.), leafy vegetables and other vegetables;
9. Fruits and nuts : banana, orange, lemon, mango, cocconut, guava, pineapple, grapes, other fresh fruits, cocconut copra, groundnut, cashewnut, dates, raisin and other dry fruits and nuts;

10. Sugar : sugar (factory), khandasari sugar, gur (cane and others), candy, other sugar;
11. Salt : sea salt, rock salt and other salt;
12. Spices : turmeric, black pepper, pepper, dry chillies, green chillies, garlic, tamarind, ginger, curry powder, other spices;
13. Beverages and refreshments : tea (no. of cups), tea leaf, coffee (no. of cups), coffee powder, other drinking beverages, biscuits, confectioneries etc., salted refreshments, prepared sweets, cooked meals, pickles, sauce, jams and jellies, other processed food items;
14. Pan, tobacco and intoxicants : pan leaf, pan finished, supari (betel nut, other ingredients for pan), biri, cigarettes, leaf tobacco, hookah tobacco, cheroot, snuff, zardah, kimam, surti, other tobacco products, opium, ganja, toddy, country liquor, foreign liquor, other drugs and intoxicants;
15. Fuel and light : ocke, coal, firewood, electricity, gas, dung cake, charcoal, kerosene, candle, matches, methylated spirit, other fuel and light;
16. Clothing : cotton (mill made, powerloom, hand-loom, khadi), wool, art silk, rayon or any other synthetic textile, pure silk, and others including items of bedding and upholstery;
17. Footwear : boot, shoe, slipper, sandal, chappal, wooden sandal etc.;
18. Miscellaneous goods and services : amusements (cinema, theatre etc.), education, medicine, toilet articles, sundry articles, consumer services, conveyances etc.;
19. Rents : rents on residential house, residential land and other consumer goods (no computation of rent for residential houses owned by the sample household was made);
20. Taxes : licence fees for keeping gun, radio, cycle, motor car etc., and other consumer taxes like the municipal taxes, road taxes etc., but does not include income tax;
21. Durable goods : furniture, musical instruments, ornaments, utensils and other equipments and their repairing expenses including the maintenance of residential houses.

contd.

3.3 Estimates have been given by monthly per capita expenditure classes in rupees, arranged in ascending order of magnitudes. The expenditure levels are grouped into 14 classes as follows :

srl. no.	monthly per capita expen- diture class (in rupees)	srl. no.	monthly per capita expen- diture class (in rupees)
(1)	(2)	(1)	(2)
1	0 - 8	8	24 - 28
2	8 - 11	9	28 - 34
3	11 - 13	10	34 - 43
4	13 - 15	11	43 - 55
5	15 - 18	12	55 - 75
6	18 - 21	13	75 & above
7	21 - 24	14	all classes

The groups 0-8, 8-11 stand for : 0-less than 8, 8-less than 11 and so on.

Section Four

S O M E F I N D I N G S

4.1 The average household size for rural and urban are 5.16 and 4.66 respectively in NSS 24th round. As expected the household size generally decreases with the rise in expenditure level barring a few expenditure classes at the bottom. Compared to the results of NSS 23rd round, the household size in NSS 24th round is slightly lower both in rural and urban areas.

4.2 In column (9) and (12) of the table (A) are given the proportions of estimated number of households for each per capita expenditure class. In rural areas 25.76 percent of households report in the expenditure class of Rs.43/- and above.

TABLE (A) : AVERAGE SIZE OF HOUSEHOLD AND PERCENTAGE DISTRIBUTION OF HOUSEHOLDS BY MONTHLY PER CAPITA EXPENDITURE CLASSES IN RURAL AND URBAN AREAS : NSS 23RD TO 25TH ROUNDS.

monthly per capita expenditure class (Rs.)	average size of household						percentage of households					
	All India rural			All India urban			All India rural			All India urban		
	NSS 23rd	NSS 24th	NSS 25th	NSS 23rd	NSS 24th	NSS 25th	NSS 23rd	NSS 24th	NSS 25th	NSS 23rd	NSS 24th	NSS 25th
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
0 - 8	5.51	5.36	5.97	3.47	4.48	4.45	0.80	0.47	0.28	0.10	0.18	0.07
8 - 11	5.78	5.69	5.87	7.15	7.36	5.19	1.87	1.50	1.11	0.55	0.34	0.23
11 - 13	5.67	5.78	6.27	6.54	6.19	6.60	2.34	2.06	1.77	0.62	0.48	0.36
13 - 15	5.73	5.94	6.00	6.54	6.35	6.65	3.75	2.93	2.70	1.32	0.99	0.71
15 - 18	5.89	5.79	5.99	6.41	6.48	6.11	7.98	6.35	6.02	3.20	2.42	1.99
18 - 21	5.71	5.65	5.91	6.74	6.13	6.37	9.40	8.27	7.93	4.31	3.67	3.10
21 - 24	5.42	5.58	5.61	6.16	6.32	6.10	9.35	9.39	8.99	5.46	4.87	4.06
24 - 28	5.60	5.40	5.72	6.19	6.03	5.94	12.05	11.94	11.41	8.26	7.68	6.60
28 - 34	5.37	5.28	5.55	5.64	5.78	5.72	14.22	15.18	16.30	11.34	10.96	11.06
34 - 43	5.03	5.06	5.33	5.26	5.36	5.38	15.55	16.15	16.80	15.37	15.15	13.97
43 - 55	4.98	4.75	5.18	4.73	4.81	4.94	10.28	11.67	12.10	13.06	13.89	15.18
55 - 75	4.39	4.44	4.88	4.00	4.01	4.16	7.00	8.11	8.69	13.98	14.50	15.74
75 & above	3.70	3.65	3.83	2.72	2.77	2.90	5.41	5.98	5.90	22.23	24.87	26.93
all classes	5.25	5.16	5.42	4.75	4.66	4.61	100.00	100.00	100.00	100.00	100.00	100.00

The corresponding proportion in the urban area is 53.26 percent. In the lower per capita expenditure group of Rs.21/- and below the proportions of households are 21.58 and 8.08 in rural and urban respectively.

4.3 A comparative study of proportion of households in the different expenditure classes for NSS 23rd to 25th rounds shows a similar pattern of distribution in rural and urban areas as can be seen from Table (B).

TABLE (B) : PERCENTAGE DISTRIBUTION OF HOUSEHOLDS BY MONTHLY PER CAPITA EXPENDITURE LEVEL IN RURAL & URBAN AREAS : NSS 23RD TO 25TH ROUNDS

NSS round (survey period)	monthly per capita expenditure (Rs)							
	rural				urban			
	0-21	21-43	43 & above	all	0-21	21-43	43 & above	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
23rd (July'68 - June'69)	26.14	51.17	22.69	100.00	10.10	40.63	49.27	100.
24th (July'69 - June'70)	21.58	52.66	25.76	100.00	8.08	38.66	53.26	100.
25th (July'70 - June'71)	19.81	53.50	26.69	100.00	6.46	35.69	57.85	100.

There is a declining trend in the proportion of households in the lower expenditure class of Rs.21 and below whereas an opposite trend is observed in the higher expenditure classes of Rs.43 and above. The proportion remains steady in the middle expenditure group (Rs.21-43).

4.4 In table (C) the consumer expenditure per person per month on food and non-food items and the percentage of expenditure on food to total expenditure in rural and urban areas are shown for NSS 23rd to NSS 25th rounds. It is observed that there is an increase in consumer expenditure in both food and non-food items over the rounds. Also food as percentage to total expenditure has recorded progressive fall, though very small, both rural and urban areas.

TABLE (C) : CONSUMER EXPENDITURE (C.OO) PER PERSON PER MONTH ON FOOD AND NON-FOOD ITEMS AND PERCENTAGE OF EXPENDITURE ON FOOD TO TOTAL EXPENDITURE IN RURAL & URBAN AREAS: NSS 23RD TO 25TH ROUNDS

NSS round (survey period)	per capita expenditure (Rs.0.00) on			percentage of expend- ture on food to total exp- diture
	food	non-food	total	
	(2)	(3)	(4)	
(1)	(2)	(3)	(4)	(5)
<u>ALL INDIA RURAL</u>				
23rd (July'68 - June'69)	24.70	8.59	33.29	74.20
24th (June'69 - July'70)	25.59	9.11	34.70	73.74
25th (June'70 - July'71)	25.98	9.33	35.31	73.58
<u>ALL INDIA URBAN</u>				
23rd (July'68 - June'69)	30.58	15.46	46.04	66.42
24th (July'69 - June'70)	33.08	17.31	50.39	65.66
25th (July'70 - June'71)	34.04	18.81	52.85	64.41

contd.

TABLE (D) : AVERAGE SIZE OF HOUSEHOLD, PER CAPITA TOTAL MONTHLY CONSUMER EXPENDITURE AND PER CAPITA MONTHLY EXPENDITURE ON FOOD & NON-FOOD ITEMS : RURAL & URBAN AREAS OF EACH STATE.

state	average size of household	per capita monthly consumer expenditure (Rs.0.00) on		
		food	non-food	total
(1)	(2)	(3)	(4)	(5)
<u>r u r a l</u>				
Andhra Pradesh	4.58	24.80	9.74	34.54
Assam	5.73	28.86	8.83	37.69
Bihar	5.41	26.28	7.37	33.65
Gujarat	5.62	27.09	7.74	34.83
Haryana	5.70	36.80	17.25	54.05
Jammu & Kashmir	5.73	28.07	10.67	38.74
Kerala	5.73	22.06	9.01	31.07
Madhya Pradesh	5.19	24.36	9.32	33.68
Maharashtra	5.25	23.84	9.30	33.22
Mysore	5.57	22.91	8.17	31.08
Orissa	4.83	22.47	6.23	28.70
Punjab	5.75	36.87	16.98	53.85
Rajasthan	5.42	28.63	12.63	41.26
Tamil Nadu	4.37	23.53	8.55	32.08
Uttar Pradesh	5.00	24.80	9.20	34.00
West Bengal	5.20	26.22	6.64	32.86

All India	5.16	25.59	9.11	34.70
<u>u r b a n</u>				
Andhra Pradesh	4.58	30.46	17.22	47.68
Assam	4.90	39.20	21.32	60.52
Bihar	4.79	33.06	14.09	47.15
Gujarat	5.31	31.11	13.13	44.24
Haryana	5.03	32.98	15.97	48.95
Jammu & Kashmir	5.91	27.42	13.20	40.62
Kerala	5.56	27.84	16.27	44.11
Madhya Pradesh	4.70	29.74	16.03	45.77
Maharashtra	4.67	40.68	21.52	62.20
Mysore	5.11	29.95	15.65	45.60
Nagaland	3.08	55.49	27.34	82.83
Orissa	3.86	37.34	17.32	54.66
Punjab	4.64	37.00	21.87	58.87
Rajasthan	4.89	31.17	15.55	46.72
Tamil Nadu	4.63	29.21	14.49	43.70
Uttar Pradesh	4.62	27.94	14.61	42.55
West Bengal	3.86	39.06	20.26	59.32
Union Territories Pooled	4.28	45.35	33.62	78.97
All India	4.66	33.08	17.31	50.39

4.5 Table (D) gives the state-wise estimates of average household size and total consumer expenditure per person per month. It is seen from the estimates that the highest average household size is recorded by Punjab (5.75) and the lowest by Tamil Nadu (4.37) in the rural area. In the urban sector Jammu & Kashmir reports the highest average household size (5.91) and Nagaland the lowest (3.08). With regard to per capita total consumer expenditure Haryana (54.05) tops the list in rural area. The corresponding figure in urban is found to be 82.83 in Nagaland. The lowest in the scale in rural and urban are Kerala (31.07) and Jammu & Kashmir (40.62) respectively.

Section five

SAMPLE DESIGN AND ESTIMATION PROCEDURE

5.1 Sample Design : The general sample design in the NSS twentyfourth round was stratified with two-stage selection within each stratum; the first stage units were villages/blocks in the rural/urban areas and the second stage units the households for the socio-economic survey. The sample design had been made self-weighting for sub-strata 1 and 2 of the Integrated Household Schedule at state level both in rural and urban areas.

5.2 Sample Size (Central Sample) : The total sample size for socio-economic enquiries in the rural area was 8400 sample villages and in the urban area the size was 4632 sample blocks.

5.3 Work Programme : The survey period (one year) of this round was divided into six sub-rounds of two months each for both the rural and the urban areas. In each sub-sample of a rural stratum, the 6 sample villages were numbered from 1 to 6. Similarly, the urban blocks within each sub-sample of an urban stratum were serially numbered from 1. Each sample village and block was visited and surveyed only once for socio-economic enquiries in the whole round according to a specified programme.

Rural Sample Design

5.4 Sampling Frame : The frame used for selection was the list of villages as per 1961 population census.

5.5 Stratification : The country had been divided into 64 regions by grouping, within each State or Union Territory, contiguous districts having similar population density and crop pattern. Strata were formed within each region by grouping contiguous tehsils having similar population densities and altitudes and having good transport and communication facilities amongst them, as far as possible. Formation of strata was such that the sum of the size measures of the villages for each stratum in a State/Union Territory was the same.

5.6 Allocation : The allocation of the total sample size to the states was based on a joint considerations of their rural population, area under cereal crops and investigators available. This allocation was modified to (i) ensure a minimum sample size of 360 villages in each state with the exception of Punjab and Haryana where there were only 192 and 144 sample villages respectively and about 200 sample villages in the Union Territories of Manipur and

contd.

Tripura and (ii) to make them multiples of 24 to facilitate having 24 villages per stratum.

5.7 Selection of villages : Four independent sub-samples of 12 villages each were selected circular systematically with probability proportional to size. In each sub-sample the villages with odd orders of selection formed the central sample.

5.8 Selection of households : The households of a sample village were divided into two^{Sub}-strata on the basis of land possessed by them. Sub-stratum 1 was formed of households whose land possessed exceeded a certain limit (which varied from one state to another) and sub-stratum 2 was formed of the remaining households. Further, the households of sub-stratum 2 were arranged in two classes viz., self-employed in non-agriculture and others. Then a sample of households was selected linear systematically with specified interval and random start each sub-stratum.

Urban Sample Design

5.9 Sampling frame : The list of Urban Frame Survey (UFS) blocks and the list of 1961 census enumeration blocks had been used as the sampling frame.

5.10 Stratification : In each state/union Territory, towns with population less than 50,000 formed stratum 1 and the remaining towns and cities formed stratum 2 except the four big cities-Bombay, Calcutta, Delhi and Madras. Each one of these big cities formed stratum 3 of its respective state.

5.11 Allocation : The total sample size had been allocated to the states in proportion to their 1961 census urban population with some necessary adjustment.

5.12 Selection of blocks : After arranging the blocks in a stratum for a state the blocks within each stratum had been selected circular systematically with probability proportional to size.

5.13 Selection of households : The households of a sample block were divided into two sub-strata on the basis of household monthly total consumer expenditure. In each sub-stratum, households were sampled linear systematically using specified interval and random start.

contd.

5.14 Estimation procedure :

- s : subscript for sth stratum
- t : subscript for tth sub-stratum within a village/block
- i : subscript for ith sample village/block
- j : subscript for jth sample household
- k : number of strata in the state
- n_s : number of sample villages/blocks in a sub-sample of sth rural/urban stratum for the whole round
- h : number of households selected for the enquiry
- y : value of the characteristic

Y, the estimate of the state total for the characteristic y in the Integrated household schedule from a sub-sample for the whole round, is expressed as :

for rural areas :

$$Y = \sum_{t=1}^2 M_t \sum_{s=1}^k \sum_{i=1}^6 \sum_{j=1}^{hsit} y_{sitj}$$

$$= M_1 y_1 + M_2 y_2$$

where M_t is the constant multiplier for the Integrated household schedule and tth sub-stratum; and y_t is the sample total for all sample households in the state belonging to sub-stratum t.

for urban areas :

$$Y = \sum_{t=1}^2 M_t \sum_{s=1}^k \sum_{i=1}^{ns} \sum_{j=1}^{hsit} y_{sitj}$$

where M_t and y_t have the same meaning as mentioned above.

Appendix - I
National Sample Survey, 24th Round : July 1969 - June 1970

TABLE (1/R) : DISTRIBUTION OF SAMPLE HOUSEHOLDS BY MONTHLY PER CAPITA EXPENDITURE CLASSES AND BY STATES IN RURAL AREAS

state/union territory	no. of sample villages	monthly per capita expenditure classes in rupees

THE NATIONAL SAMPLE SURVEY

TWENTYEIGHTH ROUND : OCTOBER 1973 - JUNE 1974

DRAFT NUMBER - 272/14

CHAPTER ONE : GENERAL

1.1 The enquiry on "Family Planning" was initiated through Schedule 14 in the sixteenth round of the National Sample Survey (NSS). Only the urban sector was covered in the sixteenth round. The enquiry covering both rural and urban sectors was conducted in the fifth sub-round of the twentysecond round. The enquiry was repeated in the twentythird and twentyeighth rounds.

1.2 In the twentyeighth round, the following regions were excluded from the purview of the survey : Ladak district of Jammu & Kashmir; rural areas of Pali and Samri tehsils of district Sarguja and Bijapur, Dantewara, Kanta and Narayanpur tehsils of district Bastar of Madhya Pradesh; Rajura, Sirocha and Gadchiroli tehsils of district Chanda and elghat tehsils of district Amravati of Maharashtra; rural areas of Nagaland; disturbed villages of Tripura; rural areas of Chandigarh; the union territories of Andaman and Nicobar islands; Laccadive, Minicoy and Amindive islands; Dadra and Nagar Haveli; Mizoram and districts Siang, Lohit and Tirap of Arunachal Pradesh.

1.3 All states except West Bengal and the union territories of Arunachal Pradesh, Delhi, Goa, Daman & Diu participated in the twentyeighth round Survey.

1.4 The sample design was stratified two-stage one. The first stage units were 1971 census villages and urban blocks. The second-stage units were households. The design was self-weighting at the state level separately by rural and urban sectors. A note on the sample design is given in Appendix I of the draft number 272/1.

1.5 The survey period of nine months had been divided into three sub-rounds of three months each.

1.6 The information on knowledge and practice of family planning was collected by interviewing the husbands. Besides information on knowledge of different methods of family planning, information was collected on whether ever practised any method, whether currently practising, whether practised any method before the last child was born, the method with which practice started, the method currently practising and the method practised before the last child was born.

1.7 In this report tables based on Central Samples for the state of West Bengal are presented. In West Bengal 552 villages and 432 urban blocks were selected for survey. Some villages could not be surveyed due to various reasons and this was taken into account at the tabulation stage. 6629 husbands were interviewed in rural areas and 3394 husbands in urban areas.

CHAPTER TWO : CONCEPTS AND DEFINITIONS

2.1 Definition of a household : A de jure concept was adopted and a household was considered to consist of its normally resident members only. Persons who normally pass nights under the same roof and take food from the same kitchen, irrespective of the immediate length of stay in the household were considered as normally resident members of the household. Normally resident members thus excluded guests but included temporary absentees. The decision as to whether a particular person would be treated as a normally resident member was left to the informant, the judgement of the investigator being exercised to know that a person was (a) not claimed to be normally resident member in more than one household or (b) not totally omitted. A person to be considered a normally resident member should not have formed a separate household or joined, as a usual member of another household. Inmates (including the staff) of a mess, hostel, boarding and lodging house, hotel, orphanage, vagrant home etc. were treated as single member households. If, however, a family lived in any of the above establishments then it was treated as a separate household by itself. If a person lived in one place and took food at another place, he was considered to be a normal member at the place where he lived. A daughter who consequent to her marriage had left her father's household was not considered as a normally resident member of the household of her father to which she belonged prior to her marriage. On the other hand, she was treated as a normally resident member of the household in which she was currently residing and expected to reside. In case of a child marriage or return marriage, when the girl was not expected to live in the husbands' household immediately after formal marriage, she was treated as a normally resident member of the household in which she was currently residing and in which she was expected to reside for sometime to come.

2.2 Couple : A husband and a wife, both living and not divorced or separated constituted a couple. If a husband had more than one wife, there were as many couples as the number of wives.

2.3 The proportion of couples who currently practising family planning is derived by relating the estimated number of couples practising some method of family planning on the date of survey to the estimated number of couples not pregnant on the date of survey.

2.4 The proportion of couples ever practised family planning is derived by relating the estimated number of couples who ever practised some method of family planning to the estimated number of couples (including pregnant women).

2.5 The proportion of couples having knowledge but never practised family planning is derived by relating the estimated number of couples having knowledge but never practised to the estimated number of couples having knowledge of family planning.

CHAPTER THREE : SOME FINDINGS

3.1 The data collected in the twentyeighth round enquiry were tabulated to highlight the practice differential. The differential characteristics chosen are (i) age of wife, (ii) number of surviving children, (iii) age of last child (computed age on the date of survey if the last child was born alive but since dead) and (iv) stage at which practice of family planning started. Some features of practice differential are highlighted in this section.

3.2 Table (3.1) shows the proportion of couples currently practising family planning by age of wife and number of surviving children. The couples whose spouse was vasectomied or tubectomied were treated as practising couples. In rural areas practice among elderly couples (wife aged 40-49 years) having no surviving son but having one or more daughter is confined to couples having two or more daughters. In rural areas, practice among young couples (wife aged 20-29 years) having no surviving son but having two daughters is higher than among young couples having no surviving son but having one daughter or three or more daughters while practice among middle-aged couples (wife aged 30-39 years) having no surviving son but having two or more daughters is higher than among middle-aged couples having no surviving son but having one daughter. In urban areas practice among couples having no surviving son but having three or more daughters is higher than among couples having no surviving son but having one or two daughters. In urban areas, practice among young and middle aged couples having two or more sons is higher than among young and middle-aged couples having one son. In both rural and urban areas, practice among couples having one or more sons is higher than couples having no surviving son but having one or more daughters.

Table (3.1) : Proportion of couples (per 100 couples) currently practising family planning by age of wife and number of surviving children : NSS 28th round

1/ indicates less than 5 couples enumerated

- indicates no couple enumerated

3.3 It is important to examine the extent of practice of the method of condom among practising couples. In table (3.2) proportion of couples practising method of condom by age of wife and number of surviving children is presented. The practice of the method of condom among rural middle-aged couples is confined mostly to couples having one or more sons and the same among rural elderly couples is confined to couples having one or more sons. The practice of the method of condom among urban elderly couples is also confined mostly to couples having one or more sons. The low prevalence of practice of the method of condom among rural practising young couples having one or more sons is due primarily to such couples opting for sterilisation [See Table (3.21.1)]. In rural areas low prevalence of practice of the method of condom among practising elderly middle-aged couples ~~and couples~~ may be attributed to incidence of sterilisation among such couples [See also tables (3.21.1)]. In urban areas, low prevalence of practice of method of condom among practising young-couples having no surviving son but having one or two daughters and practising-young-couples having one son is due to prevalence of practice of methods other than those of condom and sterilisation, while low prevalence of practice of method of condom among practising-young-couples having two or more sons is due partly to such couples opting for

sterilisation [See table (3.21.2)]. In urban areas, low prevalence of practice of method of condom among practising-middle-aged-couples having no surviving son but having one or two daughters and practising-middle-aged-couples having one or two sons is due to prevalence of practice of methods other than those of condom and sterilisation while low prevalence of practice of method of condom among practising-middle-aged-couples having three or more sons and practising-elderly-couples having one or more sons is due to incidence of sterilisation among such couples [See also table (3.21.2)].

Table (3.2) : Proportion of couples (per 100 couples) currently practising method of condom by age of wife and number of surviving children: NSS 28th round.

age of wife (years)	r u r a l						u r b a n					
	no surviving son but having			number of surviving son			no surviving son but having			number of surviving son		
	one daughter	two daughters	three or more daughters	one	two	three or more	one daughter	two daughters	three or more daughters	one	two	three or more
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
15-19	0.59		1/	0.50		1/	6.47	-	4.81	1/	1/	
20-24	2.94	1.12		3.18	2.87	2.00	6.65	2.81	39.40	11.91	7.38	14.60

1/ indicates less than 5 couples enumerated

'-' indicates no couple enumerated.

3.4 Table (3.3) gives proportion of couples currently practising family planning by age of wife and age of last child. The proportion of currently practising among urban young-couples (wife aged 20-29 years) remains at a high level with increasing age of last child. This indicates motivation for-family planning among urban young couples. The motivation for avoiding further increase in family size among urban couples with wife aged 30-44 years is also evident in the high proportion of practising couples with increasing age of last child. The proportion of currently practising among rural couples with wife aged 20-44 years is much lower than that among urban couples with wife aged 20-44 years. This shows that motivation among rural couples is much lower than among urban couples.

Table (3.3): Proportion of couples (per 100 couples) currently practising family planning by age of wife and age last child : NSS 28th round

a/ computed age on the date of Survey if the last child was born alive but since dead.

3.5 Table (3.4) presents percentage distribution of couples who started practice of family planning with sterilisation by age of wife and stage of sterilisation. The couples with wife aged 40-49 years, who started practice of family planning with sterilisation mostly underwent sterilisation after at least fifth child was born. Nearly one out of every three couples with wife aged 35-39 years, who started practice with sterilisation opted for sterilisation after having at least fifth child while nearly one out of every three couples with wife aged 25-29 years, who started practice with sterilisation opted for sterilisation after having third or fourth child. Nearly fifty percent of couples with wife aged 30-34 years, who started practice with sterilisation underwent sterilisation after at least fifth child was born.

Table (3.4) : Percentage distribution of couples who started practice of family planning with sterilisation by age of wife and stage of sterilisation : NSS 28th round.

CHAPTER FOUR : STATISTICAL TABLES

In numbering the tables a system of multiple coding has been followed. Of the number within the bracket the left most digit is for the information, the middle one for the state and the righthand most digit for the sector. The states have been numbered as follows : Andhra Pradesh-1, Assam-2, Bihar-3, Gujarat-4, Haryana-5, Himachal Pradesh-6, Jammu & Kashmir-7, Karnatak-8, Kerala-9, Madhya Pradesh-10, Maharashtra-11, Manipur-12, Meghalaya-13, Nagaland-14, Orissa-15, Punjab-16, Rajasthan-17, Tamil Nadu-18, Tripura-19, Uttar Pradesh-20, and West Bengal-21.
