NATIONAL SAMPLE SURVEY ORGANISATION
THIRTYFOURTH ROUND : JULY 1979 - JUNE 1980

TABLES WITH NOTES ON STORAGE AND WAREHOUSING -
NON-DIRECTORY ESTABLISHMENTS AND OWN ACCOUNT
ENTERPRISES

SECTION ONE

INTRODUCTION & SUMMARY

1.1 A survey on small scale enterprises in trade, hotel restaurants, transport, storage & warehousing and service sector was carried out by the National Sample Survey Organisation in the thirtyfourth round of its survey from 1st July 1979 to 30th June 1980. This was a follow-up survey of the first Economic Census which was conducted by the Central Statistical Organisation during the last quarter of 1977. In the Economic Census some broad information about non-agricultural enterprises of the country was collected. As a follow-up of the Economic Census detailed sample surveys of small scale enterprises in (i) manufacture ^{and} (ii) trade, hotels & restaurants, transport, storage & warehousing and service sector were conducted by the NSO respectively in the 33rd and 34th round of the NSS.

1.2 The survey in the 34th round of the NSS covered the entire geographical area of the Indian Union except Sikkim, Andaman & Nicobar Islands, Lakshadweep, Dadra & Nagar Haveli and the rural area of Nagaland. Two tehsils of district Surguja and four tehsils of district Bastar of Madhya Pradesh, three tehsils of district Chandrapur and one tehsil of district Amravati of Maharashtra and Ladakh district of Jammu & Kashmir were also not covered.

1.3 The Governments of all the States and Union Territories participating in the National Sample Survey programme participated in the survey by canvassing samples at least of equal size as the central sample in the respective States and Union Territories.

1.4. In the Economic Census enterprises were classified into two groups namely, (i) own account enterprises (OAE) i.e., enterprises without any hired worker and (ii) establishments i.e. enterprises with at least one hired worker. Establishments

having hired workers were further classified into two categories namely, (a) non-directory establishments (NDE) i.e. establishments with total number of workers including household worker, if any, 5 or less and annual output/turnover/receipt less than Rs.1,00,000 and (b) directory establishments (DE) i.e., establishments with 6 or more workers and/or annual output/turnover/receipt Rs.1,00,000 or more. The survey conducted by the NSSO in the thirtyfourth round was restricted to non-directory establishments and own account enterprises in trade, hotel & restaurant, transport, storage & warehousing and service sector. The enquiry for the directory establishments was covered by a separate survey conducted by the C.S.C. during October 1979 to September 1980. Government and public sector enterprises were kept out of the purview of the survey.

1.5 The basic design for the survey was a two-stage stratified one with enumeration block (EB) formed during the Economic Census as the first stage units (f.s.u) and enterprises as the ultimate units of enumeration. In each sample f.s.u. enterprises which had operated for atleast 30 days (or 15 days for seasonal enterprises) during the last 365 days and existed on the date of survey formed the frame for selection of enterprises. A sample of own account enterprises and non-directory establishments in trade, hotel and restaurants, transport, storage & warehousing and service sector was selected for the detailed enquiry in each sample EB.

1.6 Storage and warehousing enterprise means rendering storage and warehousing facilities on hire to the farm producer, dealer or trader, processor and the manufacturer as an independent economic activity. It includes storage and warehousing services in respect of grains, other food articles, cotton, jute and other agricultural commodities as well as all non-agricultural commodities. It also covers refrigerated storage facilities on hire for storing fruits, dairy products, fish, meat and other perishable products. All activities under NIC ^{a/} group 740 (warehousing), 741 (cold storage) and 749 (storage and warehousing not elsewhere classified) constitute storage and warehousing enterprise.

^{a/} National Industrial Classification (NIC) - 1970, issued by CSO.

1.7 This release is based on data collected in Schedule 2.34B canvassed in the central sample for non-directory establishments and own account enterprises engaged in storage and warehousing activity. At all-India level the survey was conducted in 6661 rural and 10662 urban enumeration blocks. This, however, yielded only 51 enterprises, 9 in the rural sector and 42 in the urban sector, engaged in storage and warehousing activity at all-India level. It is likely the composite sample design with enumeration blocks being selected with probability proportional to total number of establishments in trade, hotel & restaurants, transport and storage and warehousing was not ideal for a survey on storage and warehousing enterprises. The table below gives summary results as found on the basis of survey at all-India level.

Table (1): Selected characteristics of non-directory & own-account enterprises in storage and warehousing - all-India - NSS 34th round : July 1979 - June 1980.

item	rural	urban	total
(1)	(2)	(3)	(4)
Estimated number of enterprises	116	531	647
2.1 number of proprietary and partnership enterprises	65	506	571
2.2 number of institutional enterprises	51	25	76
3.1 number of own-account enterprises	11	342	353
3.2 number of non-directory establishments	105	189	294
4. estimated/total employment	270	1102	1372
5. input expenses per enterprises (Rs.)	162	2175	1813
6. total receipts per enterprise (Rs.)	1895	12893	10918
7. net receipts per enterprise (Rs.)	798	6766	5694
8. value of fixed assets per enterprise (Rs.)	17034	13326	13992

Detailed statistical tables at all-India level/separately by sector are given in Appendix-I. Considering the small number of sample enterprises surveyed the estimates given in Appendix-I should be used with great caution ^{a/}. Appendix-II gives concepts and definition used in the survey. A note on sample design and estimation procedure is given in Appendix-III.

a/ Incidentally it may be noted that as per Economic Census 1977 total number of NDE in storage & warehousing enterprises, including enterprises owned by public sector organisations, were 2274 and 2850 in the rural and urban sector at all-India level. The corresponding estimates as per the present survey, which did not cover public sector enterprises, are 105 and 189 NDE for the rural and urban sector respectively.

APPENDIX II

CONCEPTS AND DEFINITIONS

2.1 Some of the important concepts and definitions followed in the survey are given below.

2.2 Enterprise : An enterprise was an undertaking engaged in production and/or distribution of some goods and/or services not for the sole purpose of domestic consumption and carried out by members of a household/institutional body by hiring outside labour or not. An enterprise might be owned and operated by a single household, or by several households jointly on a partnership basis, or by an institutional body.

2.3 Own Account Enterprise : An enterprise which was operated without any hired worker was called an own-account enterprise. Household members, if paid, were treated as hired workers and such enterprises were not treated as own account enterprises.

2.4 Establishment : An enterprise with atleast one hired worker on a fairly regular basis was called an establishment. A directory establishment was one which had six or more workers (including both household and hired) and/or whose annual output/turnover/receipt was Rs. one lakh or more. On the other hand an establishment having less than six workers and annual output/turnover/receipt less than Rs. one lakh was termed a non-directory establishment.

2.5 Storage and warehousing enterprise: it meant rendering storage and warehousing facilities on hire to the farm producer, dealer or trader, processor and the manufacturer as an independent economic activity. It also covered refrigerated storage facilities on hire for storing fruits, dairy products, fish, meat and other perishable products. All activities under NIC group 740 (warehousing), 741 (cold storage) and 749 (storage and warehousing not elsewhere classified) constituted storage and warehousing enterprise.

2.6 Fixed assets : Fixed assets included land, building, cooling equipments, machinery, lighting equipments, furniture and fixtures, transport equipments and all other equipments, new or used, that had a normal economic life of more than one year from the date of purchase regardless of their use - whether for production, transportation, living or recreational facilities to labour engaged. The value of assets whether fully paid or not, owned by the enterprise was determined on the basis of the money value the assets could fetch in the present condition.

2.7 Working Capital : Working capital meant the total capital locked up in materials and stores for use in the warehouse and amount receivable and amount payable. Amount receivable was the sum of money due to the enterprise, amounts advanced in connection with the normal work of the enterprise, rates and taxes paid in advance, security deposits of less than one year, short term advances to staff and call deposits. Amount payable was the sum of money which the enterprise had to pay for materials purchased, short term loans and advances taken by the enterprise, outstanding wages, rent, tax, sales tax on purchase, etc

2.8 Proprietary : When an individual was the sole owner of the enterprise, type of ownership was proprietary.

2.9 Partnership : Where there were two or more owners of the enterprise on a partnership basis, with or without formal registration, type of ownership of the enterprise was categorised as partnership.

2.10 : Institutional ownership : When the enterprise was owned by a private limited company or a public limited company or a co-operative society, etc., the ownership was called institutional.

2.11 ^{Employment -} Hired Staff : This included primary workers as well as supervisory and clerical staff. Apprentices paid or unpaid were also included.

2.12 : ^{Employment -} Not hired staff : This included working proprietors, unpaid family workers and co-operative members.

2.13 Total emoluments : This comprised of salaries, wages and allowances etc., bonus paid, value of benefits provided to individuals, imputed value of group benefits in kind and employers' contribution to social security and other payments.

2 14 Rent on fixed assets It was the rent payable for the reference year for assets hired by the enterprise.

2 15 Interest on loan Interest payable on outstanding loan, if any, for the reference year was taken as loan

2.16 Input expenses This consisted of value of racking materials and other stores consumed, electricity charges paid, repair and maintenance expenditure incurred, transport and insurance charges paid and expenses incurred on stationery, postage and telephone charges and also amount paid for local rates, taxes and licence fees etc

2 17 Total receipts Earnings from storage hire charges and other receipts on account of goods stored were taken as total receipts.

2.18 Value added The difference between the total receipts and input expenses was taken as value added

2 19 Net receipts Value added minus total emoluments, rent for assets not owned and interest on loan paid was taken as net receipts

APPENDIX - IV

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Basic design : The sample design in both rural and urban areas was a stratified two stage one with enumeration blocks (EBs) of economic census being first stage units and enterprises in sample EBs being second stage units.
2. Stratification : There were 73 regions all over India (excluding areas not covered by NSS). These regions were formed within a state/union territory except in Gujarat by grouping contiguous districts of similar agricultural profile. In Gujarat, regions were formed by grouping contiguous tehsils taking into consideration the concentration of tribal population and dry areas of the state. Each district was treated as a stratum except in Gujarat where parts of a district belonging to different regions were treated as different strata.
3. Sampling frame : The enumeration blocks (EB) formed during 1977 Economic Census showing the number of DE and NDE for the different industries for each EE were used as sampling frame for the selection of EBs, the first stage units of sampling. However, due to non-availability of EC frame, UFS frame was used as the sampling frame for the urban areas of Nagaland and 1971 census list of villages was used as sampling frame for rural areas of Chandigarh.
4. Sub-stratum : All the EBs in each district/stratum were divided into 2 sub-strata. Sub-stratum 1 consisted of all EBs having at least one DE/or NDE in any of the 4 industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport and (iv) storage and warehousing. Residual EBs constituted sub-stratum 2. However, in rural areas of Gujarat 3 sub-strata were formed by sub-dividing sub-stratum 2 in two parts, viz. EBs not having any DE or NDE in any of the 4 industries specified above but containing at least one DE and/or NDE in any of the remaining industries covered by the Economic Census constituted sub-stratum 2 and the residual EBs constituted sub-stratum 3.

5. Allocation : The total sample size of enumeration blocks for the state/union territory was fixed on the basis of the number of investigators available for the survey in the state. The total number of sample EBs in a state or union territory was allocated to the rural and urban sectors of the districts in proportion to total number of directory and non-directory establishments in the four industries (viz. trade, hotel and restaurant, transport and storage and warehousing) in the respective districts and sectors. District-wise sample size was distributed between sub-stratum 1 and 2 approximately in the ratio 5 : 1, separately for the rural and urban sectors.

6. Selection of EBs : Sample EBs were selected from sub-stratum 1 with probability proportional to total number of DE + NDE under the industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport, and (iv) storage and warehousing with replacement. From sub-stratum 2 sample EBs were selected at random.

7. Sub-division of EBs . Normally each sample EB was completely surveyed. But where the EB population exceeded 1,000 or number of DE + NDE exceeded 200, the EB was sub-divided into two or more sub-blocks of nearly equal population or DE + NDE content and the survey was confined to one of the sub-blocks selected at random.

8. Sampling of enterprises : There were 11 schedules of enquiry for the different enterprises under survey coverage as :

<u>schedule type</u>	<u>enterprise type</u>
1. 2.31B	mechanised passengar & goods transport - NDE & OAE
2. 2.32B	non-mechanised passenger & goods transport - NDE & OAE
3. 2.33B	services incidental to transport - NDE & OAE
4. 2.34B	storage & warehousing - NDE & OAE
5. 2.41B	trade - NDE & OAE

<u>schedule_type</u>	<u>enterprise_type</u>
6. 2.42B	hotel & restaurant - NDE & OAE
7. 2.51B	OAE in service sector
8. 2.52B	other recognised educational non-directory establishment
9. 2.53B	non-govt. medical and health non-directory establishment
10. 2.54B	community & non-commercial cultural non-directory establishment
11. 2.55B	non-directory establishment in service sector other than education, medical, health, community & non-commercial cultural services

In each sample EB all the OAEs eligible for sch. 2.51B were surveyed. Also in each EB a maximum of 12 NDEs were surveyed. Further in each EB 3 OAEs other than OAEs eligible for sch. 2.51B were surveyed. In EBs having no eligible NDE, 5 OAEs were surveyed.

NDE : When total number of NDE eligible for survey exceeded 12 in an EB, 12 sample NDEs were distributed over different schedule types as follows. First, one NDE was allotted to each schedule type. Next, one more was allotted to each schedule ~~of~~ type in the priority order of schedules 2.31B, 2.32B, 2.33B, 2.34B, 2.52B, 2.53B, 2.55B, 2.41B and 2.42B until the total number of sample NDEs became 12. This procedure was repeated as many times as warranted to arrive at 12 sample NDEs. Circular systematic sample of NDEs was selected independently from each schedule type.

OAE : A circular systematic sample of 3 or 5 OAEs, as required, was selected taking all the schedule types (excepting schedule 2.51B) together.

9. Sample size . At all-India level in the Central sample 6661 rural and 10662 urban EDs were surveyed.

Estimation procedure

10. Notations The following notations are used for obtaining various estimates.

- r : subscript for region
- s : subscript for district/stratum
- s₁ : subscript for sub-stratum 1 of a district/stratum
- s₂ : subscript for sub-stratum 2 of a district/stratum
- s₃ : subscript for sub-stratum 3 of a district/stratum
(for Gujarat - rural areas only)
- t₁ : subscript for non-directory establishment (NDE)
- t₂ : subscript for own-account enterprises (OAE)
- i₁ : subscript for sample enumeration block (EB) in sub-stratum 1
- i₂ : subscript for sample enumeration block (EB) in sub-stratum 2
- i₃ : subscript for sample enumeration block (EB) in sub-stratum 3 (for Gujarat - rural areas only)
- j : subscript for enterprise/establishment
- z : size of an EB
- Z : total size of a district/stratum
- D : number of sub-blocks actually formed in an EB
- n : number of EDs surveyed
- H : total number of NDEs in the EB/sub-block
- L : total number of OAEs other than schedule 2.51 B in the EB/sub-block
- h : number of NDEs surveyed in the EB/sub-block
- I : number of OAEs other than schedule 2.51 B surveyed in the EB/sub-block
- K : number of districts/strata in a region

$H_{s_1 i_1 t_1} / H_{s_2 i_2 t_1}$ = no. of NDEs in ~~hotel & restaurants~~ ^{storage and warehousing} listed in the i-th sample block of sub-stratum 1/sub-stratum 2

$h_{s_1 i_1 t_1} / h_{s_2 i_2 t_1}$ = no. of NDEs in ~~hotel & restaurants~~ ^{storage and warehousing} surveyed in the i -th sample block of sub-stratum 1/sub-stratum 2

$L_{s_1 i_1 t_2} / L_{s_2 i_2 t_2}$ = total number of OAEs (other than OAEs eligible for schedule 2.51B) listed in the i -th sample block of sub-stratum 1/sub-stratum 2

$I_{s_1 i_1 t_2} / I_{s_2 i_2 t_2}$ = total number of OAEs (other than OAEs eligible for schedule 2.51B) surveyed in the i -th sample block of sub-stratum 1/sub-stratum 2

11. The estimation procedure adopted for schedule ~~2.42B~~ ^{2.34A} is described below. In the following Y stands for the estimate of the state total of the characteristic y based on the whole sample. To obtain Y , the estimates of Y_{s_1} and Y_{s_2} of the characteristic y for sub-stratum 1 and sub-stratum 2 respectively are to be prepared.

$$Y_{s_1} = \frac{Z_{s_1}}{n_{s_1}} \sum_{i_1=1}^{n_{s_1}} \frac{D_{s_1 i_1}}{Z_{s_1 i_1}} (Y_{s_1 i_1 t_1} + Y_{s_1 i_1 t_2})$$

and
$$Y_{s_2} = \frac{Z_{s_2}}{n_{s_2}} \sum_{i_2=1}^{n_{s_2}} D_{s_2 i_2} (Y_{s_2 i_2 t_1} + Y_{s_2 i_2 t_2})$$

where
$$Y_{s_1 i_1 t_1} = \frac{H_{s_1 i_1 t_1}}{h_{s_1 i_1 t_1}} \sum_{j \geq 1} \frac{h_{s_1 i_1 t_1}}{H_{s_1 i_1 t_1}} Y_{s_1 i_1 t_1 j}$$

$$Y_{s_1 i_1 t_2} = \frac{L_{s_1 i_1 t_2}}{l_{s_1 i_1 t_2}} \sum_{j=1}^{I_{s_1 i_1 t_2}} Y_{s_1 i_1 t_2 j}$$

$$Y_{s_2 i_2 t_1} = \frac{H_{s_2 i_2 t_1}}{h_{s_2 i_2 t_1}} \sum_{j=1}^{21} Y_{s_2 i_2 t_1 j}$$

$$\text{and } Y_{s_2 i_2 t_2} = \frac{L_{s_2 i_2 t_2}}{l_{s_2 i_2 t_2}} \sum_{j=1}^{21} Y_{s_2 i_2 t_2 j}$$

$$\text{Then, } Y_s = Y_{s_1} + Y_{s_2}$$

$$\text{and } Y = \sum_{s=1}^k Y_s$$

2.34.0 It may be noted that values of H and h relate to the schedule 2.42B only but the values of L and l are for all the OAE (other than schedule 2.51B) schedules combined.

12. For Gujarat (rural areas only),

$$Y_s = Y_{s_1} + Y_{s_2} + Y_{s_3}$$

$$\text{and } Y = \sum_{s=1}^k Y_s$$

The value of Y_{s_3} is to be obtained using the relation for Y_{s_2} given in para 11.

13. Estimates of Ratios : Estimates of ratios of two characteristics are given by the ratio of the estimates of aggregates of the items appearing in the numerator and the denominator of the ratio. First the aggregates of the two characteristics are to be estimated at the level required and the ratios are to be computed at the final stage as $R = \frac{Y}{X}$, where R, X and Y are the estimates of the ratio and aggregates of two characters x and y respectively.

1. Page 6, Para 3.3, line 4: Read 50737000 for 51447000
2. Page 6, Para 3.3, line 5 : Delete the following portion of this para
" registering an increase about 12 percent "
3. Page 6, Para 3.4 : Replace the contents in this para by the following :
3.4 The comparable results estimated on the basis of the survey data of the Second Rural Labour Enquiry (1974-75) are shown in Table (1). The procedure of estimating the number of households/persons in the two rounds (29th : 1974-75 and 32nd : 1977-78) were different. The observed differences between the two sets of estimates may not be, therefore, all real, but attributable, partly, to the change in estimation procedure. This matter is being further examined in depth by undertaking studies on the effect of estimation procedure on the estimates of households/persons. However, in view of the pressing demands for these results by the Ministry of Labour and others, the Report is being released. The users must, nevertheless, exercise due/in interpreting the results of the Report. constraint
4. Page 16 : Add the following after N.B. (ii).
" (iii) Sub-roundwise estimates were not available for Meghalaya, Tripura and Arunachal Pradesh".
5. Page nos. 66-190 : Delete the following words from the bottom of the Tables
" N/R cases "

Errata for Table series - 5

1. The following pages may be deleted from the Report
" page nos, 131-134, 156-159 and 171-174"
and the page nos 130 to 191 will form a continuous nos. from 130 to 179.

2. The figures shown against the no. of sample households at the bottom of each table may be changed as shown below :

WAGES AND EARNINGS
OF
RURAL LABOUR HOUSEHOLD*

INTRODUCTION

- 1.1 The rural labour forms an important segment of the rural society. The need for periodic data on some important socio-economic characteristics of the rural labour (including agricultural labour) households needs no emphasis. The attempt for collection of data only for agricultural labour households was made by the ministry of Labour by undertaking the first agricultural labour enquiry in the year 1950-51 with a view to building up reliable estimates relating to the socio-economic conditions of the agriculture labour. This was followed by a second agricultural labour enquiry conducted by the National Sample Survey (NSS) in the year 1956-57.
- 1.2 The Government undertook a third enquiry of this kind during the year 1963-65. The scope of this enquiry was, however, widened to cover the entire rural labour households of which the agricultural labour households, obviously, formed a part. This survey was considered the first rural labour enquiry. A second rural labour enquiry was held in 29th round of NSS in the year 1974-75.
- 1.3 The question of conducting a third rural labour enquiry came up before the working group on 32nd round Employment and Unemployment survey set up by the National Sample Survey Organisation (NSSO). On the basis of some recommendations made by the working group, the NSSO in its 32nd round survey, integrated the rural labour enquiry with the main enquiry on Employment and Unemployment.

* This is the second of the series of reports on rural labour households. The first report of the series viz. Report No. 301/1. Indebtedness of Rural Labour Households has been finalised in February 1984. For details the later report may be referred to.

- 1.4 The NSS - 32nd round survey was carried out during July 1977 - June 1978, which was divided into 4 sub-rounds of 3 months each.
- 1.5 This report is based on the central sample* data collected from 8820 sample villages. The survey covered the whole area of the Indian Union excepting Sikkim; and some small areas of Jammu & Kashmir, Madhya Pradesh, Maharashtra and the rural areas of Chandigarh, Mizoram and Nagaland; Andaman and Nicobar Island; Lakshadweep, Dadra and Nagar Haveli.
- 1.6 A note giving the details of sample design, the estimation procedure etc. is given in Appendix - I, Appendix - II contains detailed tables for the states** and all-India. While concepts and Definitions followed in the survey are mentioned in section 2, a summary of the main findings of the report is given in Section 3.

* In the NSS usually two independent samples are drawn, one for the participating states called the 'State Sample' and the other for NSSO, called the 'Central Sample'

** except Table (c) of Karnataka.

SECTION TWO2. Concepts and definitions

The important concepts and definitions adopted for the Enquiry were as follows :-

Household : A group of persons normally living together and taking food from a common kitchen constituted a household.

Household size : The number of normally resident members of a household constituted its size. The normally resident members included temporary stay aways but excluded temporary visitors or guests.

The inmates (including the staff) of a mess, hostel, boarding and lodging house, hotel, orphanage, vagrant house etc. were treated as single-member households. However, if a group of persons satisfying the definition of a household resided in any of the above establishments/^{and} pooled their total income (e.g. a family living in a hotel on a regular basis), then it was treated as a separate household by itself.

Rural labour . Rural labour was defined as manual labour in agriculture and/or non-agricultural occupations in return for wages either in cash or kind (excluding exchange labour). Self-employment in manual work was not treated as wage-paid manual work. The term "manual work" meant a work essentially involving physical operations. However, work essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education was not termed as manual work. On the other hand, work not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) back-ground was treated as manual work. Thus the definition excluded the work of engineers, doctors, dentists, midwives etc. from the purview of manual work even though their work involved some amount of physical labour. The work of peons, chowkidars, watchman etc. even if their work did not involve much of physical labour, was, however, considered as manual work.

Rural labour household A household was identified as rural labour household on the basis of its largest source of income. For this purpose, the following sources of income were considered

1. Wage paid manual labour (agricultural and/or non-agricultural) ;
2. paid non-manual employment; and
- 3 Self-employment (own account work and/or employment as unpaid family worker)

A household was classified as a rural labour household if its largest source of income was the first of the above three categories, i.e., if wage paid manual employment contributed more towards its income during the 365 days preceding the date of survey than each of the other two sources taken individually

Agricultural labourer A person was treated as agricultural labourer or in other words wage paid manual labourer in agriculture if he/she followed one or more of the following agricultural occupations in the capacity of a labourer on hire or on exchange, irrespective of the mode of payment, namely, wholly in cash or kind or partly in cash and partly in kind :

- (a) farming including cultivation and tillage of the soil etc
- (b) dairy farming,
- (c) production, cultivation, growing and harvesting of any horticultural commodity,
- (d) raising of livestock, bees or poultry and
- (e) any practice performed on a farm as incidental to or in conjunction with farm operations (including any forestry or timbering operations and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm products).

It might be noted that manual work in 'fisheries' was excluded from the category of agricultural labour. Further, work relating to the transportation coming under the category(e) above referred only to the first stage of transportation from farm to the first place of disposal.

Agricultural labour households : The rural labour households which derived major portion (more than 50%) of their total income during the last 365 days preceding the date of enquiry from wage paid manual labour in agricultural occupations only were regarded as agricultural labour households.

Earnings : Earnings for the purpose of this survey included wages and salaries already received or was receivable in cash or kind or partly in cash and partly in kind for the work done during the reference week.

Households with cultivated land : The household which reported having cultivated land during the last agricultural year prior to the date of survey was considered as household "with cultivated land" and those who did^{not} report to have such cultivated land was regard as household "without cultivated land". Cultivated land was taken to mean the net area sown during the last agricultural year (July 1976 - June 1977) and included orchards and current follow.

Land possessed : The total area of land possessed was defined as the total area of land owned plus the total area of land leased in minus the total area of land leased out. It included house and housesite.

SECTION THREE

Summary Findings

- 3.1 While detailed results of the survey are available in Appendix II, in this section some basic results exhibiting the pattern of household composition and the wage rate for the members of the rural labour household and also some of the important findings from them are presented. Along with the result of the present survey (32nd round, July 1977 - June 1978), the corresponding results of the previous survey (29th round, July 1974 - June 1975)^{1/} on the subject have also been shown - whenever such comparisons are available - to give an idea of the change during the intervening years^{2/}.
- 3.2 In Table(1) is presented the statewise estimates of the number of agricultural and non-agricultural labourers in all rural labour households.
- 3.3 The total all-India estimates of the number of agricultural labourers is found to be 51851200^{3/} and of non-agricultural labourers 7767300^{3/} making a total of 59618500 wage earners in rural labourer households in the country against 51447000 in the 29th round registering an increase of 17.5 percent (excluding Karnataka)~~over~~ a period of 3 years. Over the same period, the increase in the proportion of agricultural labourers ~~is~~ found to be about 12 percent.
- 3.4 This trend is maintained in the states also. In terms of percentage, the increase is sizeable in the states of Himachal Pradesh (208 percent), Assam (129 percent), Rajasthan(121 percent), Tripura(96 percent) and Haryana (88 percent) Surprisingly there is a fall in the number of agricultural labourers in Uttar Pradesh (4 percent) from 29th round to 32nd round.

1/ The 29th round figures have been taken from "Final Report on Wages & Earnings of Rural Labour" Households, Labour Bureau, Ministry of Labour, Govt. of India.

2/ While making comparative observations, the union territories have not been taken into account.

3/ Excluding Karnataka whose estimates are not available'.

Table(1) : Estimated number (00) of agricultural and non-agricultural labourers in rural labour households

state	agricultural labourers		non-agricultural labourers	
	29-R	32-R	29-R	32-R
(1)	(2)	(3)	(4)	(5)
1. Andhra Pradesh	64030	76429	5420	5832
2. Assam	5000	11455	3370	908
3. Bihar	63880	68662	5450	5359
4. Gujarat	19490	26306	6290	3021
5. Haryana	2120	4000	1380	2152
6. Himachal Pradesh	200	617	190	645
7. Jammu & Kashmir	220	281	280	589
8. Karnataka	31240	-	3830	-*
9. Kerala	18600	19085	9370	9360
10. Madhya Pradesh	33640	47932	3140	3385
11. Maharashtra	52430	70867	6180	9930
12. Manipur	30	42	20	33
13. Meghalaya	500	557	200	84
14. Orissa	25800	31805	4310	3308
15. Punjab	7010	8161	1620	2247
16. Rajasthan	3700	8178	1930	3756
17. Tamil Nadu	54930	55273	7500	8289
18. Tripura	980	1917	380	296
19. Uttar Pradesh	47490	45768	8000	8469
20. West Bengal	32080	39904	9120	9112
21. Arunachal Pradesh	-	15	-	9
22. Delhi	-	156	220	412
23. Goa, Daman & Diu	240	702	80	354
24. Pondicherry	450	400	100	123
25. all-India	464060	518512*	78380	77673*

* The estimates of Karnataka are not available. The all-India estimates are exclusive of the estimate of Karnataka.

3.5 The percentage distribution of Rural Labour household members by usual occupation and by age-groups and by sex is given in Table (2). In the age-group 15-49 about 66.5 percent of the males are agricultural labourers, 12.4 percent are non-agricultural labourers and 14.0 percent pursue other gainful occupations. Only a small percentage i.e. about 2.4 percent either seek or are available for work. Among the female household members about 40.0 percent are agricultural labourers, 4.0 percent non-agricultural labourers, 9.00 percent pursue other gainful occupations and about 4.3 percent either seek or are available for work. Thus in this age-group most of the females are either agricultural labourers or are out of labour force. The distribution in the age-group 50-59 follows the same trend with slight variation in respect of both males and females. In the age-group 60 & above also the percentage of males and females engaged as agricultural labour, no doubt less, is not very negligible.

Table (2) : Percentage distribution (0.00) of rural labour household members by usual occupation and by age.

	32	5.76	4.67	6.20	3.08	3.01	3.02	2.36	2.66	2.49

3.6--The average daily wage rate for all agricultural and non-agricultural operations and all operations combined (in all rural labour households 32nd round) is given in Table (3A) by different sub-rounds for adult male, female and children at the all India level. Though, as expected a child labourer's average daily earning is less than that of a female labourer which again is less than that of a male labourer for a particular operation, there is no visible trend in the wage rate between one sub-round to another for a particular type of labour in a particular type of operation.

3.7 Similar estimates by breakdown of agricultural operations are presented in Table (3B). It is seen from this table that for a male labourer, sowing, transplanting, harvesting and ploughing are more remunerative, for a female labourer transplanting, ploughing and harvesting fetch more wages than others while for a child labourer such operations are ploughing, sowing and transplanting.

3.8 Statewise daily wages for the same set of labourers in respect of all agricultural and non-agricultural operation for 29th and 32nd round are shown in Table(A) ^{at the end} in Appendix II. The Table reveals that at all India level the wage rate in 32nd round is higher than in 29th round specially for non-agricultural operation for all types of labourer.

3.9 In Table (4), the wage rates for all agricultural and non-agricultural operation at all-India level are available under the breakdown of scheduled caste, scheduled tribe and all rural labour households for both the 29th and 32nd round. The average daily wage earning for a labour (male/female/child) in scheduled caste household is more than the labourer in a scheduled tribe household or all rural labour household.

A P P E N D I X - IA BRIEF NOTE ON THE SAMPLE DESIGN AND THE ESTIMATION PROCEDURE

Sampling design and sample size : A stratified two-stage sampling design was adopted in the survey with census villages as the first stage units for the rural areas and households as the second stage units. But in the rural areas of the North Eastern States viz. Mikir Hills and North Cachar Hills of Assam, Arunachal Pradesh, Meghalaya, Mizoram, Manipur and Tripura, the first stage units were clusters of villages. Altogether 8,820 villages were selected as the first stage units. In each of the first stage units 12 households were selected as second stage units (for the rural areas of North Eastern Region, 24 households were to be selected from each cluster of villages). The sample villages were selected with probability proportional to population and with replacement. The households were selected circularly systematically with equal probability after arranging all the households of the first stage units according to their means of livelihood in the order self-employed in non-agricultural occupations, rural labour and others.

Stratification and allocation of sample : The whole of India was divided into a number of basic strata so that the basic strata did not cut across district boundaries. Each district with less than 1.5 million rural population according to census 1971 formed one basic stratum by itself except in Gujarat and Arunachal Pradesh where some districts with less than 1.5 million population had been divided into two or more basic strata. A district with more than 1.5 million rural population (according to census 1971) was divided into a number of basic strata, depending on its rural population by grouping contiguous tehsils (sub-divisions in Bihar, Orissa and West Bengal) homogeneous as far as possible with respect to rural population, density and crop pattern. Districts formed after 1971 census were also considered for formation of basic strata. The total number of rural strata thus formed was 516. Within each State and Union Territory the total sample villages were allocated to the different rural strata in proportion to their 1971 rural population. The final stratum allocations were made multiples of 4.

Survey period and sub-round formation : The survey was started in July 1977 and was completed in June 1978. The entire survey period of one year was divided into four sub-rounds each of three months' duration coinciding approximately with the four agricultural seasons. The four sub-round periods were :

- sub-round 1 : July to September 1977
- sub-round 2 : October to December 1977
- sub-round 3 : January to March 1978
- sub-round 4 : April to June 1978

The sample villages were distributed over the four sub-rounds in equal numbers so as to provide valid estimates for each of the sub-rounds respectively.

Estimation procedure : In order to reduce work-load at the tabulation level and to obtain reliable aggregate estimates at the regional level, the following estimation procedure was adopted.

$$Y = y \times \frac{P}{p} \text{ where,}$$

Y = estimated rural total for any region for any sub-round/all sub-rounds

y = unestimated rural total of the region for the sub-round/all sub-rounds

P = projected rural population of the region for January 1978, and

p = total sample persons in the sample villages of the region, surveyed in the sub-round/all sub-rounds.
