REPORT ON THE THIRD QUINQUENNIAL SURVEY
ON EMPLOYMENT AND UNEMPLOYMENT : SURVEY
RESULTS - PUNJAB

Section One

I N T R O D U C T I O N

1.1 The third country wide quinquennial survey on Employment and Unemployment was carried out by the National Sample Survey Organisation (NSSO) in its 38th round survey operations (January - December 1983). Key indicators of employment and unemployment obtained through a priority tabulation of data collected in the first two sub-round period of the survey along with the comparable results as obtained from the NSS 27th and 32nd rounds have been released for all India and the different States/Union Territories in the NSSO Journal.^{1/} Detailed results for all-India and important summary results for all-India and States/Union Territories have been presented in the NSSO mimeographed Report (No.341).^{2/} The present document gives the detailed results for the state of Punjab based on the Central samples.

1.2 The details of sampling design, survey coverage, estimation procedure and salient features of the conceptual frame and data collection procedure adopted in the survey are given in the Report containing the all-India results (Report No.341). A brief summary of the scope and coverage of the survey, the concepts, definitions, etc., is given below. Section 2 gives some key results with the corresponding results for all-India.

Geographical Coverage : The survey covered the whole of Indian Union excepting (i) Ladakh and Kargil districts of Jammu and Kashmir and (ii) rural areas of Nagaland.

"Key results of last three quinquennial NSS enquiries on employment and unemployment", Sarvekshna, Vol.IX, No.4, April, 1986.

Report on the third quinquennial survey on employment and unemployment - all-India; mimeographed, June, 1987.

1.4. Sampling design and sample size: A stratified two-stage sampling design was adopted in the survey with census villages and urban blocks (Urban Frame survey blocks formed by NSSO) as the first stage units respectively for the rural and urban areas and households as the second stage units. Altogether the survey covered about 1.2 lakh households spread over more than 8600 sample villages and 4500 sample blocks. In each of the selected first stage units, 10 households were selected as second stage units. The sample size for Punjab was 272 villages and 192 blocks. The number of sample households surveyed was 2592 in rural areas and 1841 in urban areas.

1.5 Survey period and sub-round formation: The field work for survey started in January, 1983 and was completed in December 1983. The entire survey period of one year was divided into four sub-round periods of three months' duration coinciding approximately with the four agricultural seasons. The sub-round periods were January to March 1983, April to June 1983, July to September 1983 and October to December 1983. The sample villages and blocks were distributed over the four sub-rounds in a manner so as to provide valid estimates for each of the sub-round period separately.

1.6 Estimation procedure: The estimation procedure adopted in the NSS 38th round is based on a weighted sum of the sample values. Denoting by \hat{Y} the unbiased estimate of Y (the state/region total of any variate), it is given by:

$$\hat{Y} = \sum_s \frac{P_s}{N_s} \sum_i \frac{D_{si}}{P_{si} \times C_{si}} \times \frac{H_{si}}{h_{si}} \sum_j y_{sij} \quad \text{--- (1)}$$

for the rural sector, except Arunachal Pradesh and

$$\hat{Y} = \sum_s \frac{N_s}{n_s} \sum_i D_{si} \times \frac{H_{si}}{h_{si}} \sum_j y_{sij} \quad \text{--- (2)}$$

the urban as well as for rural sector of Arunachal Pradesh
are

s, i and j are suffixes and stand for stratum, village/
urban block and household respectively;

P_s , N_s and n_s give the stratum values of selection population,
number of villages/blocks in the frame and number of sample
villages/blocks respectively;

D_{si} , C_{si} & P_{si} stand respectively for number of hamlet-groups/
sub-blocks formed, number of census villages contained in a
larger revenue village actually surveyed and the selection
population of the sample village;

H_{si} and h_{si} stand for the total number of households listed
and the number of sample households; and y_{sij} is the observed
value of the variate of a sample household.

sub-sample-wise (also sub-round-wise) estimates of Y are obtained
restricting the summation (\sum_i) to units belonging to the
concerned sub-sample with n_s representing the number of such units.
Estimates of ratios such as percentages, averages, etc., are
obtained by first calculating the unbiased estimates of the
num^erators and denominators concerned and then by division.

1.7 Salient features of the conceptual frame and data collection
procedure : The main objective of the survey was to measure, in
quantitative terms, the nature and extent of employment and
unemployment at disaggregated levels. To achieve this objective,
the attempt in the survey was to classify the population as
belonging to different activity categories, independently, by
using three different approaches, namely (i) the usual status
approach, (ii) the current weekly status approach and (iii) the
current daily status approach. Persons distributed according to
the various activity categories were further classified by several
meaningful correlates, such as, age, sex, general and technical
education, industry, occupation etc. The different activity

contd..... 4/-

categories adopted for the purpose, were, as under.

<u>Description of the activity category*</u>	<u>Ca</u> <u>__c</u>
Working with an employer under obligation but work not specifically compensated by any wage/salary	01
Worked (self employed) in household enterprise	11
Worked as helper in household enterprise	21
Worked as regular salaried/wage employee	3
Worked as casual wage labour in public works	41
Worked as casual wage labour in other types of work	51
Did not work though there was work in household enterprise	61
Did not work but had regular salaried/wage employment	71
Sought work	81
Did not seek but was available for work	82
Attended educational institutions	91
Attended domestic duties only	92
Attend ^{ed} / <u>ed</u> domestic duties and was also engaged in free collection of goods (vegetable, roots, fire-wood, cattle feed, etc.) sewing, tailoring, weaving, etc. for household use	93
Too young to work/to attend school/to seek employment	94
Old and disabled	95
Rentiers, pensioners, remittance recipients, etc.	96
Beggars, prostitutes, etc.	97
Others	98
Did not work due ^{to} /temporary sickness (for casual workers only)	99

* The activity category codes 61, 71, 82 and 99 were used only for current status approaches.

contd...

Persons assigned any one of the activities listed under the category codes 01 and 71 were treated as 'working' (or employed). Persons assigned activity category codes 81 or 82 were treated as 'seeking and/or available for work' (or unemployed). The remaining persons, i.e., the persons assigned any of the activity category codes 91 to 99 were treated as 'not available for work' (or not in labour force). The data on activity particulars of the persons, were, however, tabulated only for population of age 5 and above.

1.8 Classification according to usual status approach : In the 38th round survey, the status of activity on which a person spent relatively longer time of the preceding 365 days prior to the date of survey was considered to be the principal usual activity status of the person. Accordingly, a person's principal usual status was considered 'working' (or 'employed'), if he/she was engaged relatively for a longer time during the reference period of 365 days in any one or more work activities coded 01-51, 'seeking or available for work' (or 'unemployed'), if he/she was not working but was either seeking or was available for work (activity code 81) for a relatively longer time of the specified reference period and 'not in labour force', if she/she was engaged for a relatively longer period in any one or more of the non-gainful activities (codes 91-98). Within the two broad activity categories, 'working' and 'not in labour force', the detailed activity category was determined on the basis of time spent criterion. A person categorised as a 'worker' on the basis of his/her principal status is referred to as 'principal status worker'. Those of the 'non-workers' who pursued in a subsidiary capacity some gainful activity as well along with their principal usual activity (non-gainful) were considered to be usually working in a subsidiary capacity and are referred to as 'subsidiary status worker'. These two groups, viz., 'principal status workers' and 'subsidiary status workers' together constitute 'all workers' according to the usual status classification.

contd.....6/-

1.9 Classification according to current weekly status approach

For classification of person according to current weekly status or she had to be assigned a unique activity status with reference to a period of seven days preceding the date of survey. For a person pursuing more than one activity during the week, his/her unique status was decided by adopting a priority-cum-major time rule. Under the priority rule, the status of 'working' got priority over the status of 'not working but seeking/available for work' which in turn got priority over the status of 'not working and not seeking/available for work'. For a person classified under the first or the last category, his/her detailed activity status was determined by major-time-spent criterion, i.e. the detailed activity on which major time was spent was considered his/her current weekly status. Further, if a person had worked one hour on any one day of the week, he was considered 'working'. A person who had not worked during the week but was available for work even for one hour on any one day of the week was considered 'seeking and/or available for work'. Others constituted the category 'not available for work' (or not in labour force). Each person was thus assigned a unique activity status for the week. Aggregate of persons under the different activity status provided the distribution of persons by activity on an average in a week during the survey period of one year.

1.10 Classification according to current daily status approach

In adopting the current daily status approach attempt was made to account for two major activities pursued by a person on each day of the seven days' reference week allocating 'half day' to each activity. The unit of classification according to this approach was thus, half day. In assigning the activity status on a day, a person was considered 'working' (or employed) for the entire day if he/she had worked 4 hours or more on the day, and assigned the one or two (as the case may be) work activities (01-71) to which he/she devoted the working time. But if the work was done for one hour or more but less than 4 hours, he/she was considered

contd.....

'working' (or employed) for half day and 'seeking/available for work' (or unemployed) or 'not available for work' (or not in labour force) for the other half of one day depending on whether e/she was seeking/available for work or not on the day. On the other hand, if a person was not engaged in any gainful work even for one hour on the day but was seeking or available for work for four hours or more, he/she was considered 'unemployed' for the entire day. But if the reported availability for work was for less than four hours only, he/she was considered 'unemployed' for half day and 'not in labour force' for the other half of the day. A person who was neither having any work to do nor was available for work even for half of the day, was considered 'not available for work (or not in labour force)' for the entire day and assigned the one or two of the non-gainful activity statuses which he/she had during the day. The aggregate of person-days so classified under the different activity categories for all the seven days of the week divided by seven gave the distribution of persons (strictly speaking, person-days) by activity category on an average on a day of the survey period of one year.

7.11 Probing questions : In the 38th round survey there were two sets of probing questions, the first set to be put to all persons of age 5 years and above excepting those categorised usually as old, disabled, etc. and the other set for those categorised as usually engaged in household duties. The first set was aimed to get data to understand the complex dimensions of the work pattern and the extent of under utilisation of available labour time. The second set was aimed to bring out the extent of participation of women engaged in household duties in some specified activities which derive benefits to their households, availability for work in the household premises, etc. A number of suitable questions were, therefore, included in the 38th round, the answers to which, it was expected, will bring out the desired information.

contd.....8/-

1.12 DEFINITIONS

(a) Gainful activity : Gainful activity (or work) is the activity pursued by persons for pay, profit or family gain or in other words the activity which adds value to the 'national product'. Normally, it is an activity which results in production of 'goods and service for exchange. However, the activities in 'agriculture' (i.e. all activities relating to industry div. 0) in which the part or the whole of the agricultural production is used for own consumption and does not go for sale, are also considered 'gainful'. Execution of household chores or social commitments, etc., however, are not considered 'gainful' activities. The activities, such as, prostitution, etc., which may result in earnings, are, by convention, not considered 'gainful'.

(b) Workers (or employed) : Persons engaged in any gainful activity are considered 'workers' (or employed). They are the persons pursuing any one or more of the eight situations listed as the activity categories under the first broad activity category, i.e., 'working or employed' in para 1.7.

(c) Seeking or available for work (or unemployed). :

Persons who, owing to lack of work, had not worked but either sought work through employment agencies, intermediaries, friends or relatives or making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, are considered unemployed.

(d) Labour force : Persons categorised as working (or employed) and categorised as seeking or available for work (or unemployed) together constitute the labour force.

(e) Not in labour force : Persons categorised neither 'working' nor 'seeking or available for work' are considered to be engaged in non-gainful activities and categorised 'not in labour force'. The persons falling in this category are students, those engaged

in domestic chores, rentiers, pensioners, those living on alms, recipients of remittance, etc., infirm and disabled persons, prostitutes and smugglers, etc.

(f) Worker (self-employed) in household enterprise-usual and current status category 11 : Persons who are engaged in their own farm or non-farm enterprise are defined as self-employed-the term used to designate their activity status. There are different kinds of self-employed. Some may operate their enterprise without hiring any labour. Some others may normally work on their own but occasionally hire a few labourers. There is also a third category who by and large, regularly run their enterprises by hiring labour. The first two groups of self-employed are called own-account workers and the third, employers.

(g) Worked as helper in household enterprise-usual and current status category 21 : The helpers are a category of working persons who keep themselves engaged in household enterprises, working full or part time and do not receive any cash payment in return for the work performed or any share of the family earnings from the enterprise. They are household members, a large number of them being related to the household head. They are dependant members of the household working for the family enterprise and getting food and shelter like other members of the household. One may also come across persons in a household who do not receive any cash remuneration for their work in the household enterprise but have a share in the family earnings out of such enterprise. Such persons are not 'helpers' but 'self-employed'. On the other hand, if any member of the household works in the household enterprise for which he is paid wage/salary, he should be treated as employee.

(h) Worked as regular salaried/wage employees-usual and current status code 31 : Persons working in others' farm or non-farm enterprises (both household and non-household) and getting, in return, salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are treated as regular salaried/wage employees. The category,

1
salaried/wage employees, will include not only salary and wage earner getting time wage but also earners getting piece wage or salary and paid apprentices, both full time and part time.

(i) Worked as casual wage labour-usual/^{and}current/^{status}status codes 41 & 51 : Persons engaged in others' farm or non-farm enterprises (both household and non-household) and getting in return wages according to the terms of the daily or periodic work contract are treated as casual wage labour. In the rural areas and also in the Government project sites, a type of causal labourers can be seen who normally engage themselves in public works activities which include works taken up by the Government or local bodies for construction of roads, bunds, digging of ponds, etc. as test relief measures/employment generation schemes, etc. The casual labourers doing only such public works activities are casual labour in public works. The rest are casual wage labour in other types of work.

(j) Had work in household enterprises but did not work-current status code 61, and had regular salaried/wage employment but did not work-current status code 71 : Persons engaged in household farm or non-farm enterprises or working in others' farm or non-farm enterprises as salaried/wage employees but absenting from work temporarily due to sickness or for enjoying leave or holiday or for other reasons belong to these two categories 61 & 71 respectively depending on whether they are self-employed in household farm/non-farm enterprises or employed in others' farm/non-farm enterprises as wage/salaried employees.

(k) Attended domestic duties and was also engaged in free collection of goods, sewing, tailoring, weaving, etc., for household use-usual and current status code 93 : In the rural areas in general and particularly in the tribal areas, domestic work usually include among others, a lot of work for free collection of vegetables, root firewood, etc., and also spinning and weaving of cloth for household use. Persons found to be spending regularly some of his/her time in performing the above mentioned activities along with household chores, belong to this category.

Section Two
SOME KEY RESULTS

Some important key indicators of employment-unemployment and relevant background information are presented in this section. For obtaining a comparative picture, the corresponding all-India indicators are also presented side by side. It may be noted that the marginal aggregates presented in the appendix tables should only be used or combining the estimated ratios. The aggregates may be worked out by applying the estimated ratios presented in the various tables on the estimates of (projected) population presented in the table P.

2 Households and population: The 38th round survey (1983) has estimated the households and population of rural Punjab as 2.2 and 2.7 million respectively. The estimates for urban Punjab are 1.0 million households and 4.3 million persons. Some important characteristics of the households and population are presented in tables 1 and 2 respectively.

Table 1 : Important characteristics of households

item	Punjab		all-India		
	rural	urban	rural	urban	
(1)	(2)	(3)	(4)	(5)	
household size	2.7	4.3	5.4	4.7

2.3. Usual status workforce (usually employed) : The usual status work-force determined on the basis of a 'major time' criterion with reference to a period of 365 days is considered as persons with more or less 'stable employment' or as 'usually employed in the principal status'. They are the persons engaged in gainful activities for a 'relatively longer period' during the reference period of one year. Persons engaged in gainful activities for only a relatively minor period during the year are persons 'usually employed in the subsidiary status'. The former category of employed is referred to as 'principal status workers' and the latter category of employed as 'subsidiary status workers'. The two categories together constitute the total usual status work-force. Percentage of 'workers' or 'employed' to total persons is referred to as 'work-force participation' rate (WFR). Table 3 gives the estimates of usual status work-force of age 5 years and above for Punjab along with the corresponding estimates for all-India.

*The difference, if any between 100.00 and total belong to 'not recorded' category.

Figures in parentheses give the percentage of total workers (workers in the principal and subsidiary statuses).

*Worked out by applying the estimated survey proportions on the projected population.

percentage of usually employed (5+) in Punjab is found to be above the all India level in the case of both the rural and urban areas. In the case of females the percentage of usually employed is found to be much below the all India level particularly for principal status workers.

Estimates of Work-force according to current status : The employment pattern obtaining for India, particularly of the rural areas, is characterised by the seasonal fluctuations in the agricultural activities. Persons usually engaged in 'agriculture' or 'agriculture based industries' are likely to change their seasonal pursuits during the lean seasons in agriculture. Some may temporarily take up work in non-agricultural activities, some remain unemployed, and some particularly women, may even withdraw from labour force. This pattern may change for an individual from one week to another week and even from one day to another day in a week. The estimates obtained by adopting the current weekly status and current daily status approaches are selected to reflect the overall effect caused by intermittent changes in the activity pattern of the population. The current weekly status (CWS) estimates of 'work-force' will give the number or proportion of persons with some work, on an average in a week and the current daily status (CDS) estimates will give the number or proportion of employed person-days on an average in a day during the survey year. An index of the average weekly nature of underemployment can be worked out as :

$$\left(\frac{CWS - CDS}{CWS} \right) \times 100$$

Table 4 gives the estimates of the 'employment level' as obtained through the current weekly and current daily status approaches for 1983 and the index of underemployment.

Table 4 : Percentage of persons (5+)/person-days of persons(5+) employed according to current weekly/current daily statu

item	Punjab				all-India			
	rural		urban		rural		urban	
	male	female	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
weekly status(cws)	62.32	10.23	61.16	10.33	59.29	26.27	55.93	13.52
daily status(cds)	59.01	7.16	59.06	9.47	55.86	22.90	53.68	12.15
difference	3.31	3.07	2.10	0.86	3.43	3.37	2.25	1.37
index of under-employment	5	30	3	8	6	13	4	10

The average weekly and daily employment levels for Punjab are found to be on the higher side compared to all-India level for males. For ~~a~~ rural females, the weekly and daily employment levels are much below ~~the~~ the all-India level.

Unemployment : For measuring unemployment, three different estimates are generated from the survey data. They are :

number of persons of age 5 years and above usually unemployed,
average number of persons of age 5 years and above unemployed
in a week and

average number of persons of age 5 years and above (strictly
person-days), unemployed on a day.

The first one indicates the magnitude of chronically unemployed which is split into two categories - those working in the subsidiary status and those not working in the subsidiary status. The second estimate gives the average weekly picture during the survey year and includes both chronic unemployment and the intermittent unemployment caused due to seasonal fluctuations in employment of those categorised as usually employed. The third estimate indicates the average volume of unemployment in terms of person-days on a day during the survey year. It captures the 'unemployment' of the chronically unemployed, intermittent 'unemployment' of the usually employed and unemployment of those classified as having some work in a week (i.e., the unemployed days of those categorised as usually employed in a week according to the priority criterion). Table 5 shows the percentage of unemployed (5+) as obtained through the three estimates - usual status, current weekly status and current daily status for Punjab and all-India.

Table 5 : Percentage of 'unemployed' (age 5 years and above)

Status	Punjab				all India			
	rural		urban		rural		urban	
	male	female	male	female	male	female	male	female
	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Usual status :								
Working in subsidiary status	2.06	0.62	2.53	0.89	1.33	0.41	3.53	1.02
Current weekly status	1.41	0.56	2.36	0.71	0.91	0.26	3.11	0.88
Current daily status	2.51	0.62	3.18	0.91	2.29	1.17	4.01	1.09
	4.42	0.73	4.49	0.98	4.54	2.26	5.46	1.50

2.6 Age-specific and education-specific percentages of usually unemployed . The percentage of usually unemployed (principal status in the various age-groups and the percentage of usually unemployed (principal status) of age 15 years and above in the different education categories are respectively presented in tables 6 and 7. The aggregate estimates of usually unemployed worked out by applying the survey proportions on the projected population are also given in the tables.

Table 6 . Percentage of usually unemployed in the principal status (5+) in the different age groups.

age-group (in years)	Punjab				all India			
	rural		urban		rural		urban

secondary	10.71	5.93	3.04	4.59	7.76	7.96	6.51	4.00
graduate & above	9.17	17.22	2.40	4.52	1.35	15.60	6.39	7.44
all	2.73	0.78	3.17	1.20	1.82	0.55	4.68	1.40
estimated number of unemployed(15+) (00)	1108	289	549	181	29496	8826	27420	7186

7 Under employment : Persons usually employed but under-utilising the available labour time due to lack of work or having enough work but with insufficient income or returns may report as available for additional work. Therefore, answers in the affirmative to a question put to 'usually employed' on their availability for additional work are expected to indicate indirectly the magnitude of 'underemployment'. In table 8 are presented the percentage of persons (5+) usually employed in the principal status reporting availability for additional work (and in that sense underemployed) for Punjab and all-India.

Table 8 : Percentage of usually employed in the principal status (5+) seeking or available for additional work.

Region	rural		urban	
	male	female	male	female
(1)	(2)	(3)	(4)	(5)
Punjab	19.56	14.55	11.12	9.01
All-India	20.25	18.11	13.05	14.55

The proportion of underemployed in Punjab is observed to be on the lower side of the all-India average in the case of males of both the rural as well as urban areas. While for rural females it is almost at the same level as that of all India, for urban males it is below the all India level.

2.8 Women's participation in activities deriving benefits to their households : Many among the women usually engaged in the household duties, particularly in rural areas, carryout also certain activities which produce benefits to their households. Table 9 gives the percentage of women (5+) engaged usually in household duties in the principal status and also participating in activities which produce benefits to their households.

Table 9 : Percentage of women(5+) engaged in household duties and also participate in specified activities to total women (5+) engaged in household duties

specified activities .	Punjab		all India	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
1.maintenance of kitchen garden,orchard,etc.	2.5	2.4	14.4	4.6

13.tutoring of children	3.9	15.0	3.4	10.0
14.bringing water from outside the hh. premises	23.0	10.7	63.0	34.8
15.bringing water from outside the village	0.4	-	3.3	-
16.percentage of women engaged in household duties to total women(5+)	65.7	56.5	42.0	50.5

9 Availability of women (5+) engaged in household duties in the principal status for 'work' in the household premises : Many women do not report 'unemployed' because, under the compelling traditional and social system, they may not be willing to come out of their household premises to work. Some among them may be willing to work if work of their choice is provided at their household premises. Table 10 gives the proportion of women (5+) usually engaged in household duties and willing to accept work in their household premises by type of work willing to undertake.

Table 10 : Percentage of women (5+) engaged in household duties and willing to work in their household premises to total women (5+) engaged in household duties.

APPENDIX

Marginal totals between tables may not exactly agree due to rounding off errors.

Marginal aggregates presented may be used only for combining ratios and percentages.

To obtain aggregates, estimated ratios are to be applied on the projected population as given in table (P).
