REPORT ON THE FOURTH QUINQUENNIAL SURVEY ON CONSUMER EXPENDITURE  
PATTERN OF CONSUMPTION OF CEREALS, PULSES, TOBACCO AND SOME OTHER  
SELECTED ITEMS

## SECTION ONE

## INTRODUCTION

1.0 Data on household consumer expenditure were being collected in every round of the National Sample Survey (NSS), beginning from its first round of survey which started in October, 1950 through the 28th round (1973-74). After the 26th round of the survey, the Governing Council of NSSO decided that the survey on Consumer Expenditure and Employment & Unemployment, be undertaken together once in five years beginning from the NSS 27th round. Thus, the first quinquennial survey on consumer expenditure was conducted in the 27th round (Sept '72 - Oct '73). To meet some specific ad-hoc requirements, a survey on consumer expenditure was also conducted in the 28th round outside this quinquennial programme. The second and third quinquennial surveys on consumer expenditure were, conducted during NSS 32nd round (July '77 - June '78) and 38th round (Jan '83 - Dec '83) respectively. It was decided to conduct the survey every year from the NSS 42nd round <sup>1/</sup> (July '86 - June '87) onwards, although on a relatively smaller scale compared to the quinquennial surveys, with a view to building up a time series of consumer expenditure data. The NSS 44th round (July '88 - June '89) was the second survey of the annual series.<sup>2/</sup> The present report is based on the data collected in the 43rd round, that is, the fourth quinquennial survey on consumer expenditure, carried out during the period July '87 - June '88.<sup>3/</sup> A noteworthy feature of this round is that in order to net, in the sample, sufficient number of households belonging to the upper income classes some significant changes have been made in the sample design of the 43rd round survey.

---

<sup>1/</sup> Results published in Sarvekshana, Vol. XII, No. 4, Issue No. 39, April-June '89.

<sup>2/</sup> The results of 44th round based on the first two sub-rounds were published in special Report No. 2 'Key results of consumer expenditure survey' first semi-round (July '88 - Dec '88) of NSS 44th round; the Report No. 370/2 gives data of the whole round.

<sup>3/</sup> The results of the NSS 27th, 32nd and 38th rounds of survey on consumer expenditure have been published in Sarvekshana Vol. II, No. 3, Vol. IX, No. 3 and No. 4 respectively.

1.1 As in the case of NSS 38th round, in 43rd round also the results are proposed to be released through a number of separate reports. The first report on the 43rd round survey in NSS Report No. 372 which gives basic results on pattern of consumer expenditure. The Report No. 373 is the second of the series and give the results relating to housing condition including primary sources of energy used for lighting and cooking. The present report is the third of the series and present the results on patterns of consumption of cereals, pulses, tobacco and some other selected items.

1.2 It is to be mentioned here that due to paucity of resources and the need for timely release of data, this report like Report Nos. 372 and 373, is based on the data of sub-sample 1 only.

1.3 Report No. 372 gives, in great detail, the scope, coverage, sample design and estimation procedure in Section Two and the important concepts and definitions adopted for the consumer expenditure survey of 43rd round in Section Three. Therefore, they are not repeated in this report. However, Statement 0 giving the sample sizes given in Section Two there will be reproduced below. Some of the major findings of the survey are discussed in Sections Two to Seven, which give towards the end, also a few explanatory notes on the detailed tables presented in this report as Appendix. Finally the detailed tables are given in Appendix.

contd.... 3/-

C E R E A L S

2.1 The detailed results on quantity and value of consumption of cereals, pulses, milk, edible oil etc., per person per month derived from the survey results have been given in the Appendix separately for rural and urban sectors by states and all-India. In this round, by addition of a new block in the schedule an attempt was made to ascertain whether some particular items are purchased or consumed by the members of sample household during the reference period. These are some varieties of fruits, tobacco, and alcoholic beverages and purchase of certain commodities from ration fair price shops. Results on these additional items have also been presented in the Appendix. To avoid increasing the size of the report unduly, some tables have been presented only at all-India level.

2.2 It may be mentioned here that though the results of some broad groups of items of consumption were made available to the users of NSS data on request, this is for the first time in NSS that a report on consumer expenditure is released with some individual items of consumption in addition to the usual pattern available in NSS Report No. 372 <sup>4/</sup>.

2.3 In this section, some important findings are presented to give a comparative picture of the composition of the consumption basket of cereals consumed in the rural and urban sectors. Besides, monthly per capita quantity and value of consumption per person of different items of cereals for states and all India for rural and urban sectors have been presented. And a comparative statement of the movement of average price of major items of cereals from 1983 to 1987-88 as derived from the NSS consumer expenditure data is also given.

---

4/ The Draft Report No. 372 : Report on the quinquennial survey on consumer expenditure    Pattern of consumer expenditure.

STATEMENT 1 : QUANTITY (2.00KG.) OF CONSUMPTION OF RICE, WHEAT  
AND TOTAL CEREALS PER PERSON FOR A PERIOD OF 30  
DAYS BY NSS ROUNDS : ALL INDIA : RURAL AND URBAN

<sup>1/</sup> Results of annual surveys

<sup>2/</sup> Results of quinquennial survey

Bhaskar

Quantity of consumption of cereals over years The per capita per month quantity of consumption of major items of cereals is shown in statement-1 for the seven rounds of NSS surveys on consumer expenditure - 27th (1972-73), 28th (1973-74), 30th (1977-78), 32nd (1983), 42nd (1986-87), 43rd (1987-88) and 44th (1988-89). It is observed that since 27th round, the per capita quantity of total cereals consumed remained stable in both rural and urban India except for a slight apparent fall of about 3 per cent in 1983 in the rural areas.

2.5 Comparison of the quantity of consumption of selected cereals The average quantities of rice, wheat and total cereals consumed per capita per month as obtained from the survey results of NSS 30th, 42nd and 43rd round are presented by states and all-India in statements 2 & 3 for rural and urban areas respectively. It is observed that the quantity of consumption of total cereals remained stable in rural and urban India over the three NSS rounds. At state level, the quantity of total cereals consumed have marginally fallen (in some states). Among wheat eating states per capita per month quantity of consumption of total cereals has increased by 0.44 kg. in rural Haryana; in urban Maharashtra they have increased by 0.23 kg. In the rice eating states there is a slight increase in the quantity of cereals consumption in the rural areas of West Bengal and Orissa. There is little evidence of a change in the composition of cereals consumed in any state except rural areas of Gujarat, Haryana, Himachal Pradesh and Jammu & Kashmir and urban areas of Himachal Pradesh between 30th & 43rd rounds. In the rural areas of Gujarat, Haryana, Himachal Pradesh and Jammu & Kashmir, on average, consumption of wheat is found to be about 0.5 kg. to 2 kg. more in 1987, than in 1983, whereas in the urban areas of Himachal Pradesh the increase in consumption of wheat is found to be more than a kg. However, there is no significant change over this period in the average quantity of total cereals consumed.

2.6 Quantity of cereals consumed : Cereals constitute the major part of food consumption. The composition of constituent items of cereals vary from state to state. In statements 4 and 5, the average quantity and the respective value of different items of cereals consumed per capita per month (MOC) are shown for rural and urban areas for the states and all-India. Relatively more quantity of cereals is consumed in the rural areas compared to that in the urban areas. In the rural areas, the highest quantity of cereals consumption is found in Assam (18.99 kg.) followed by Jammu & Kashmir (17.27 kg.), Madhya Pradesh (16.72 kg.) and Rajasthan (16.62 kg.). The lowest consumption is reported from Sikkim & Nagar Haveli (8.78 kg.) and then Chandigarh (10.97 kg.), Goa, Daman & Diu (10.16 kg.) and Kerala (10.36 kg.). In the urban sector, the highest quantity of cereals consumption is observed in Manipur (15.74 kg.) followed by Mizoram (14.78 kg.) and Arunachal Pradesh (14.50 kg.); Sikkim (9.42 kg.), Gujarat (9.44 kg.), Delhi (9.59 kg.), Kerala (9.60 kg.), and Punjab (9.74 kg.) have shown relatively low consumption of cereals. While rice is the major cereal item for Manipur, Tripura, Assam, West Bengal, Tamil Nadu, Orissa, Kerala, Bihar and Andhra Pradesh, wheat claims that position in Haryana, Punjab, Delhi, Rajasthan and Uttar Pradesh both in rural and urban areas. Generally, in the rice consuming states, only a small amount of wheat is taken except in Bihar in rural and urban areas and urban areas of West Bengal where wheat consumption forms more than 25 per cent of total cereals. On the other hand, rice is rarely consumed in Punjab, Rajasthan and Haryana particularly in the rural areas. While Karnataka and Maharashtra in both rural and urban areas consume jowar as one of the main constituent items of cereals. Gujarat in both rural and urban areas and Rajasthan in rural areas take bajra as one of the main constituent items of cereals. On the other hand, the share of maize in total cereals is observed in the rural areas of Arunachal Pradesh and Jammu & Kashmir and urban areas of Mizoram.

2.7 Value of cereals consumed : In rice consuming states, the value of total cereals consumed is relatively high. In general the value per kg. of cereals in rice-consuming states namely West Bengal, Assam, Bihar and Orissa, is higher than many wheat consuming states like (Haryana, Rajasthan and Delhi. It is found that the implicit price (value/quantity) of the total cereals consumed at all-India level is lower in the rural sector (Rs.2.36) than the price in the urban sector (Rs.3.30).

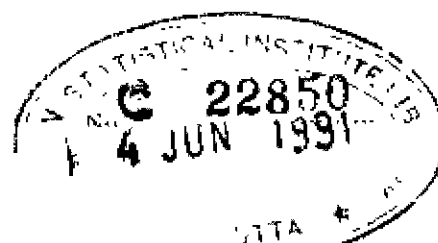

TABLE 4 QUANTITY AND VALUE OF CONSUMPTION OF CEREALS PER PERSON FOR PERIOD OF 30 DAYS BY STATES/TERRITORY AREAS

2.3 Percentage of expenditure on cereals to total consumer expenditure in statement 6 are given (i) expenditure on cereals as percentage to total consumer expenditure and (ii) percentage distribution of cereals consumed over items of cereals in rural and urban areas of the country over the three NSS rounds. It is observed that expenditure on cereals as percentage to total consumer expenditure is about 33%, 27% and 26% respectively in the 38th, 42nd and 43rd rounds in the rural areas. In the urban areas the corresponding percentages are 19, 18 and 17. It is also observed that expenditure on food as percentage to total consumer expenditure is decreasing gradually over the rounds in both rural and urban sectors. In the rural sector the proportions of expenditure on food are 66%, 66% and 64% respectively for the 38th, 42nd and 43rd rounds. In the urban sector the corresponding proportions are 59%, 57% and 56%. This may be due to the lower rate of increase in the price of cereals compared to the other items of consumption.

2.9 A major part of expenditure on total cereals is however on rice and wheat : 45%, 50% and 49% on rice and 30%, 33% and 34% on wheat for the 38th, 42nd and 43rd round respectively in the rural areas. The corresponding percentages for the urban areas are 44%, 49% and 48% on rice and 43%, 44% and 45% on wheat.

2.10 Changes in the average price from 1983 to 1987-88 for the major items of cereals : A statement of the movement of average price of major items of cereals from 1983 to 1987-88 as derived from the NSS consumer expenditure data (implicit price) has been presented in statement-7. The NSS consumer expenditure survey has not collected any information on the prices of items of cereals directly. The implicit prices of different cereals have been derived by dividing the value of consumption of an item by the corresponding quantity. The consumption may be out of (i) home-grown stock (ii) purchase, (iii) receipt in exchange of goods and services and/or (iv) quantity received as gift, charities, loans, tree collection etc.

STATEMENT 6 : PERCENTAGE OF EXPENDITURE ON CEREALS TO TOTAL CONSUMER EXPENDITURE AND PERCENTAGE DISTRIBUTION OF QUANTITY OF CEREALS CONSUMED PER PERSON FOR A PERIOD OF 30 DAYS BY TERMS OF CEREALS BY NSS ROUNDS : ALL INDIA (RURAL & URBAN)

### SECTION THREE

#### PULSES AND PRODUCTS

3.1 In this section some important findings are presented on the consumption of pulses and pulse products. The per capita consumer expenditure on this item is Rs.6.27 in the rural sector and Rs.8.44 in the urban sector. In terms of quantity the consumption is 0.84 kg. and 0.96 kg. respectively in these two sectors. The share of this item in total food expenditure is only 6.22% and 6.01% in the rural and urban sector respectively. However, the importance of pulses and their products as an item of daily consumption is well understood, especially for the poorer sections of the population for whom they constitute the primary source of protein.

3.2 From statement 8 it is observed that in respect of quantity of consumption arhar, moong, masur and urd constitute a major share in the consumption basket of total pulses and products. They constitute about 30%, 13%, 15% and 12% respectively in the rural areas and 35%, 16%, 13% and 12% in urban areas.

3.3 The statement also shows the average price of some selected items of pulses and their products in the year 1987-88 as derived from consumer expenditure data. It is seen from the statement that prices of all pulses except khesari are higher in urban areas than in rural areas.

3.4 Statement 9 and 10 give the MPC of different items of pulses and their products in rural and urban sectors of all the states as well as for all-India in rural and urban sectors. It is observed that, the MPC of total pulses and their products in general is higher in urban areas of all the states as well as in all-India in urban areas compared to that of rural areas. It is interesting to note that in the rural as also in urban areas the states of Himachal Pradesh, Madhya Pradesh, Punjab, Chandigarh, Gujarat, Delhi, Uttar Pradesh and Maharashtra, where the per capita consumption of wheat is more, are seen to have in general reported more than 1 kg. of pulses and products as their monthly per capita consumption. On the other hand rice-eating states consume less than 1 kg. of this item.

GCH

STATEMENT 8 : PERCENTAGE DISTRIBUTION OF QUANTITY CONSUMED AND AVERAGE IMPLICIT PRICE (PER KG.) OF DIFFERENT CATEGORIES OF PULSES FOR ALL INDIA RURAL AND URBAN

item	percentage of quantity consumed		price (Rs.0.00) per kg.	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
arhar	29.41	36.18	9.56	11.15

## SECTION FOUR

### SOME SELECTED ITEMS OF FOOD

4.1 In most parts of the country both in rural and urban areas cereals, starchy roots (such as potatoes or cassava, plantains and sugar) are the cheapest calorie sources, and therefore make up a large proportion of the diets of households in the lower income groups. Foods of animal origin are almost always expensive sources of protein and energy. Milk is usually a cheaper protein source than meat from the same animal. As sources of protein or of calories, eggs are the least economical, which explains why they are more often sold by rural households of the lower income groups than eaten. The price of an egg may buy about a half kilogram of either ragi or maize (inferior quality cereals) - a wise exchange under certain circumstances.

4.2 In this section some information on the quantity and value of some selected items of food (other than cereals and pulses) and beverages are given. The statement 11 shows the quantity and value of consumption of some selected items of food and their percentage to total food expenditure in the year 1987-88 for the rural and urban areas of the country as a whole. It is observed that the total monthly per capita expenditure for the selected food items included in this statement is Rs. 36.13 which is 36% of the total food expenditure and 24% of the total consumer expenditure in the rural India. In urban India the corresponding percentages are 44% and 24%.

4.3 Comparing the value of total food expenditure, the relative importance of the selected items of consumption in the composition of the food basket can be studied separately

contd.

TABLE II : QUANTITY AND VALUE OF CONSUMPTION OF SOME SELECTED ITEMS  
PER PERSON FOR A PERIOD OF 30 DAYS

ALL INDIA RURAL AND URBAN

I T E M	Sector				percentage to total food expenditure	
	rural		urban		rural	urban
	quan- tity (kg.)	value (Rs.)	quan- tity (kg.)	value (Rs.)

Wheat tobacco (kg)	0.02	0.42	0.01	0.20	0.42	0.14
Total	-	30.13	-	31.22	35.34	43.81
Total food expenditure	-	100.32	-	139.75	X	X
Total consumer expenditure	-	152.10	-	213.93	X	X

for the rural and urban sector of the country as a whole. In rural India about 12% of total food expenditure is spent on edible oils and in urban India it is about 14%. Of the food items next in order of importance by expenditure is edible oil, namely vegetable oils, like mustard oil, coconut oil, til oil, groundnut oil, rapeseed oil etc., as well as vegetable oil products like vanaspati, etc. Ghee is excluded from this category and is included under the item milk products. The per capita expenditure on edible oils is higher in urban India, namely Rs. 2.22 compared to Rs. 1.23 in rural India. In oil, the share of this item in the total food expenditure is 7.67% and 5.65% respectively in the rural and urban India. The items coming next in order of their importance in the rural India are sugar (3.07%) and tea and coffee together (3.07%). The corresponding items in order of their importance in the urban areas are tea and coffee together (5.15%) and sugar (3.76%).

SECTION FIVE

MISCELLANEOUS GOODS AND SERVICES

5.1 The present section deals with certain aspects of conditions and levels of living of rural and urban families viz., health, recreation, education, housing, working conditions and welfare. Food absorbs the largest proportion of total household consumer expenditure, housing absorbs a more or less constant proportion of individual expenditure at different levels, while recreation, education, medical care and luxuries absorb increasing proportions of expenditure at higher and higher levels of total expenditure or income.

5.2 The data on expenditure on miscellaneous goods and services have been presented in statement 12. In this statement the information is presented on the total miscellaneous goods and services and the break-up thereof into certain sub-groups such as amusement, education, medical care, house rent, conveyance etc., in the rural and urban areas of the country as a whole. It is observed that the share of total consumer goods and services in total household consumer expenditure is 14% in rural areas and 23% in urban areas; and share of expenditure of this item in total non-food expenditure is 40% and 53% respectively in all-India rural and urban sectors.

5.3 The expenditure on amusements includes expenses on cinema, theatre, mela and fairs, toys, musical instruments, radio, gramophones etc. The all-India rural average expenditure per person per month is Rs. 0.69 and the share is 0.44% of the total consumer expenditure; the corresponding expenditure and share in the all-India urban are Rs. 2.44 and 0.98%.

5.4 The expenditure on education and on education service is also presented in this statement. The expenditure on education includes expenses on books, stationery, writing papers etc., and the expenses on education service include fees for school and colleges, tutor's fees, if any, and other fees for education of the members of the household. The all-India rural average expenditure per capita per month is Rs. 2.39 or 1.51% of the total expenditure; the corresponding expenditure is Rs. 8.78 or 3.51% of the total expenditure in urban India.

STATEMENT 12 : EXPENDITURE (RS 0.00) ON SOME SELECTED ITEMS OF MISCELLANEOUS GOODS AND SERVICES PER PERSON FOR A PERIOD OF 30 DAYS : ALL INDIA RURAL AND URBAN

i t e m	per capita month-ly expenditure in Rs. 0.00		percentage to total consumer expenditure	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
amusement	0.69	2.44	0.44	0.98
books (etc.)	1.26	3.58	0.80	1.43

pet animals etc.	0.49	0.35	0.31	0.14
house rent garage rent	0.34	10.10	0.22	4.04
residential land rent	0.02	0.26	0.01	0.10
consumer rent (other goods)	0.01	0.15	0.01	0.06
consumer taxes and cesses	0.02	-	0.01	-
total miscellaneous goods and services	22.76	58.68	14.40	23.48
total non-food expenditure	57.28	110.18	x	x
total consumer expenditure	158.10	249.93	x	x

5.3 The medical expenditure and expenditure on medical services have also been given. This will include cost of medicines and the service charges viz., doctor, nurse, midwife and hospital charges. The all-India per capita monthly expenditure are Rs.6.66 and Rs.8.14 respectively in the rural and urban India or 4.21% and 3.26% of the total expenditure in the rural and urban India.

5.6 The expenditure on toilet articles, sundry articles, conveyance and house rent etc., is also presented. It is observed that shares of expenditure on toilet articles, sundry articles, conveyance and house rent etc., to total expenditure in the rural India are 1.92%, 1.67%, 2.01% and 0.22% ; the corresponding shares in the urban India are 2.57%, 1.85%, 3.62% and 4.04%. Except expenses on medicines and pet animals, the proportion of expenditure on all other items is higher in urban India compared to that of rural India. The share of expenditure on consumer goods and services to total expenditure on non-food item is much higher in urban India (53%) compared to that of rural India (40%).

SECTION SIX

HOUSEHOLDS REPORTING PURCHASE OF FOODGRAINS FROM RATION/FAIR PRICE SHOP AND CONSUMPTION OF ALCOHOLIC BEVERAGES AND FRUITS

6.1 This section deals with the number of households reporting purchase of foodgrains from ration/fair price shop and consumption of alcoholic beverages and different items of fruits per 1000 households in the rural and urban areas of different states as well as at all India level.

6.2 The basic objective of India's present food policy is to supply food grains at reasonably low prices to the vulnerable sections of the community through fair price and ration shops. Fruits are good energy sources and also the major source of some of the essential vitamins such as vitamin C. One might like to make in this connection a distinction between fresh fruits and dry fruits. The consumption of dry fruits is, however, very small. Among the fresh fruits, bananas seems to be the most popular, being the most widely available fruit, oranges are the other popular varieties. Coconuts are locally popular in Kerala, Tamil Nadu and Karnataka and to a smaller extent in Andhra Pradesh and Maharashtra. Likewise Kharbooza is locally popular to a small extent in Uttar Pradesh, Rajasthan and Punjab.

6.3 The data presented in statements 13 and 14 have been obtained from the answers of household members who were asked some questions relating to purchase of some commodities from ration/fair price shop and consumption of alcoholic beverages and fruits. Their responses have been recorded in terms of two alternatives, namely (a) 'yes' and 'no'.

6.4 It can be seen that out of thousand households, at all-India level, 623 are found to have purchased commodities from ration/fair price shop in the rural sector. Their proportion is more than 90 percent of rural households in Lakshadweep, Delhi, Tripura and Himachal Pradesh. 80 to 90 per cent in Jammu & Kashmir, Kerala, West Bengal, Andaman & Nicobar Islands, Arunachal Pradesh, Goa, Daman & Diu, Mizoram and Pondicherry.

number of households (per 1000 hhs.) reporting

Goa, Daman & Diu	861	404	563	141	35	68	11	925	997
Lakshadweep	936	18	565	-	154	120	22	627	844
Mizoram	844	119	432	99	17	-	5	606	692
Pondicherry	832	281	490	104	4	36	95	14	586
All India	623	147	322	91	47	57	31	276	519

6.5 In the urban India, it is observed that proportion of households reporting purchase of commodities from ration/fair price shop is 64 per cent. Their proportion is more than 80 per cent of urban households in Mizoram, Pondicherry, Goa, Daman & Diu, Kerala and Lakshadweep, 70 to 80 per cent in Gujarat, Haryana, Jammu & Kashmir, Maharashtra and Delhi.

6.6 It is seen from the statements 13 and 14 that about 15 per cent of households in rural India report consumption of alcoholic beverages. The proportion of households reporting consumption of alcoholic beverages is highest (79%) in Dadra and Nagar Haveli and lowest (2%) in Lakshadweep in rural areas.

6.7 In the urban areas, at all India level, only 106 households out of 1000 households are found to have reported consumption of alcoholic beverages. At the state level, Goa, Daman and Diu occupies the first position (38%) and Assam (3%) the last position on reporting consumption of alcoholic beverages.

6.8 From the statements 13 and 14, it also appears that in rural India about 52% of the households are found to have reported consumption of any fruits during 1987-88; in the urban India it is 76%. It is also found that at the all-India level, number of households reporting consumption of owner fruits namely bananas, mangoes, citrus fruits, apples, grapes and other fruits per 1000 households, are relatively higher in urban India compared to that of rural India. Larger differences are observed between the rural and urban sectors of different states when number of reporting households on consumption of different fruits are considered.

## SECTION SEVEN

## CONSUMPTION OF TOBACCO

7.1 This section deals with use of tobacco in smoking or in any other form. Members of the sample households in both rural and urban sectors were asked questions relating to the different forms of tobacco consumption. Their responses have been recorded in terms of three alternatives namely (a) 'use regularly', (b) 'use casually' and (c) 'not consuming'. In this context persons reported to have consumed regularly any one of the tobacco items have been considered as a regular tobacco consumers. Out of the remaining persons those who reported to have consumed any one item casually will be considered as casual tobacco consumers. Remaining persons were considered as not consuming tobacco. Consumption of tobacco includes bidi, cigarettes, cigar, leaf tobacco, hooka tobacco, burnt tobacco, snuff, zarda etc.

7.2 The statements 15 and 16 represent number of persons reporting smoking and/or consumption of tobacco in any form regularly or casually by sex in rural and urban sectors of all the states and also at all-India level. It is observed that in rural India about 34% of the male population are found to use tobacco in some form regularly, while 24% are regular smokers. It is also observed that only 10% of the female population in rural India consume tobacco regularly in any form. Of the females in rural India only 2% smoke regularly. Females, in general, show a comparatively greater inclination to consume other forms of tobacco. It is interesting to note that amongst female proportion of casual smokers are very negligible in rural India.

7.3 In statement 15, wide variations in consumption of tobacco are also observed between males and females in the different states of the rural area. Male population of the states reporting highest consumption of tobacco regularly in any form are Mizoram (50%), Tripura (46%), Orissa (41%) and Meghalaya (40%); lowest consumption reported by Punjab is 11%. On the other hand, the states where females consume more are Mizoram (35%), Orissa (32%), Lakshadweep (29%). Males and females both are found to have consumed a large proportion of tobacco in Mizoram and Orissa in the rural sector. In Punjab, only 0.2% of the rural females consume tobacco.

7.4 It can be seen from the statement 16 that in urban India 24% of males consume tobacco regularly while 18% are regular smokers. On the other hand only 5% of urban females consume tobacco while only 0.7% are found regular smokers.

7.5 The pattern of tobacco consumption differ also between males and females of the different states in the urban sector. The states showing larger proportion of males consuming tobacco are Mizoram (48%), Tripura (46%), West Bengal (36%) and Meghalaya (35%). It is only 14% in Arunachal Pradesh which is less than 10% of the all-India regular tobacco consumers. Females share a larger proportion of tobacco in the states are Mizoram (38%), Orissa and Lakshadweep (20% each) and Meghalaya (13%). In urban India, the proportion of female casual tobacco consumers are found to be very negligible.

7.6 We shall now consider some results on various forms of tobacco consumption either exclusively or jointly. They are : (i) smoking (SM), (ii) chewing zarda etc. (CHW), (iii) snuff (SN) and (iv) burnt tobacco, powder, paste (BT) or in any combination of these four.

7.7 Statement 17 shows 20% and 17% of the total males are smokers in the rural and urban India. The proportion of female smokers are 2% and 0.7% in the rural and urban India. The <sup>item</sup> next in order of importance is chewing zarda etc., which claims by rural males (8%) and by urban males (5%). For females it is 5% in rural India and 3% in urban India. For snuff and burnt tobacco etc., the proportion of female consumers in both the rural and urban areas are higher compared to that of male consumers. As regards the various other combinations, the incidence seems to be negligible.

7.8 Important results on pattern of consumption of cereals, pulses, tobacco, fruits etc., obtained from the survey were discussed in the preceding sections Two to Seven. Detailed tables are given in the Appendix. Tables 1 and 2 series of the Appendix present quantity and value of consumption of cereals and pulses per person for a period of 30 days for each monthly per capita expenditure class.

7.9 Tables 3 and 4-Series contain quantity and value of consumption of some selected items per person for a period of 30 days for each monthly per capita expenditure class.

STATEMENT 17 : NUMBER OF PERSONS REPORTING CONSUMPTION OF TOBACCO IN VARIOUS FORMS EITHER EXCLUSIVELY OR IN COMBINATION PER 1000 PERSONS BY SEX : ALL-INDIA RURAL AND URBAN

JR.

7.10 Tables 5 and 6-series give number of persons reporting consumption of tobacco in various forms per 1000 persons by (i) sex and age group and by (ii) sex and household group

7.11 Table 7-series contain expenditure on miscellaneous goods and services per person for a period of 30 days for each monthly per capita expenditure class.

7.12 Table 8 - series give number of households reporting purchase of commodity from ration/fair price shop, consumption of alcoholic beverages and fruits during a period of 30 days per 1000 persons for each monthly per capita expenditure class.

7.13 Table 9 - series present number of persons reporting consumption of tobacco in various forms either exclusively or in combination per 1000 persons by sex and age-group.

7.14 Table 10 - series contain number of persons reporting smoking and/or consumption of tobacco in any form regularly or casually by sex and monthly per capita expenditure class.

7.15 The subject matter of table (i.e. the series to which it belongs, as described above) is the left-most digit of the table number. This is followed, after a period, by a running serial number, each number representing a separate state/u.t. or all-India. The sector to which the table relates is finally indicated by letters R (for rural) and U (for urban).

7.16 Note : (i) For appended table - series 1, 2, 3 and 4, a distinction between an absolute 'zero' and a significant 'zero' i.e. to record a dash mark '-' for an absolute 'zero' whenever the cell estimate is 'zero' or the numerator of a ratio is 'zero', is not made. Therefore, in both the quantity and value tables '0.00' have been kept in a large number of cells.

(ii) In the summary tables, results for Arunachal Pradesh, Meghalaya, Tripura and Lakshadweep for both rural and urban areas and those of the rural areas of Sikkim and Nagaland and urban areas of Dadra & Nagar Haveli for the 42th round have not been presented as the results are not available. However in the 43rd round, rural area of Nagaland was not covered and there was no urban area in Dadra & Nagar Haveli.
