NATIONAL SAMPLE SURVEY ORGANISATION

THIRTYFOURTH ROUND : JULY 1979 - JUNE 1980

TABLES WITH NOTES ON NON-DIRECTORY ESTABLISHMENTS AND
OWN ACCOUNT ENTERPRISES IN MECHANISED PASSENGER AND
GOODS TRANSPORT ACTIVITY

SECTION ONE
INTRODUCTION

1.1 A survey on small scale enterprises in trade, hotels & restaurants, transport, storage & warehousing and service sector was carried out by the National Sample Survey Organisation in the thirty-fourth round of its survey from 1st July 1979 to 30th June 1980. This was a follow-up survey of the first Economic Census which was conducted by the Central Statistical Organisation during the last quarter of 1977. In the Economic Census some broad information about non-agricultural enterprises of the country was collected. As a follow-up of the Economic Census detailed sample surveys of small scale enterprises in (i) manufacture & (ii) trade, hotel & restaurant, transport, storage & warehousing and service sector were conducted by the NSSO respectively in the 33rd and 34th round of NSS.

1.2 The survey in the 34th round of the NSS covered the entire geographical area of the Indian Union except Sikkim, Andaman & Nicobar Islands, Lakshadweep, Dadra & Nagar Haveli and the rural area of Nagaland. Two tehsils of district Surguja and four tehsils of district Bastar of Madhya Pradesh, three tehsils of district Chandrapur and one tehsil of district Amravati of Maharashtra and Ladakh district of Jammu & Kashmir were also not covered.

1.3 The Governments of all the States and Union Territories participating in the National Sample Survey Programme participated in the survey by canvassing samples at least of equal size as the central sample in the respective States and Union Territories.

1.4 In the Economic Census enterprises were classified into two groups namely : (i) own account enterprises (OAE) i.e., enterprises without any hired worker and (ii) establishments i.e.

enterprises with at least one hired worker. Establishments having hired workers were further classified into two categories namely, (a) non-directory establishments (NDE) i.e. establishments with total number of workers including household worker, if any, 5 or less and annual output/turnover/receipt less than Rs. 1,00,000 and (b) directory establishments (DE) i.e., establishments with 6 or more workers and/or annual output/turnover/receipt Rs. 1,00,000 or more. The survey conducted by the NSSO in the thirtyfourth round was restricted to non-directory establishments and own account enterprises in trade, hotel & restaurant, transport, storage & warehousing and service sector. The enquiry for the directory establishments was covered by a separate survey conducted by the C.S.O during October, 1979 to September, 1980. Government and public sector enterprises were kept out of the purview of the survey.

1.5 The basic design for the survey was a two-stage stratified one with enumeration blocks (EB) formed during the Economic Census as the first stage units (f.s.u) and enterprises as the ultimate units/ of enumeration. In each sample f.s.u enterprises which had operated for at least 30 days (or 15 days for seasonal enterprises) during the last 365 days and existed on the date of survey formed the frame for selection of enterprises. A sample of own account enterprises and non-directory establishments in trade, hotel and restaurants, transport, storage & warehousing and service sector was selected for the detailed enquiry in each sample EB.

1.6 Transport enterprises means rendering transport service to others as a business proposition. It includes the act of carrying passengers and/or goods from one place to another. Supporting services incidental to transport such as packing, freighting, travel, agency also fall under transport enterprises. All activities covered by NIC ^{a/} major group 70-73 of NIC division 7 constitute transport activities. In this round for the transport sector under survey

^{a/} National Industrial Classification (NIC) - 1970, issued by C.S.O.

coverage three different schedules were canvassed, namely, Schedule 2.31B for mechanised passenger and goods transport, Schedule 2.32B for non-mechanised passenger and goods transport and Schedule 2.33B for services incidental to transport. NIC group 700 - railway transport and NIC major group 72 - air transport were kept out of the coverage of the survey.

1.7 The report is based on the data collected in Schedule 2.31B canvassed in the central sample for non-directory establishments and own account enterprises operating in the field of mechanised passenger and goods transport covered by (i) NIC group 701 - passenger transport by tramways and bus services, (ii) group 702 - passenger transport by other motor vehicles, (iii) NIC group 703 - freight transport by motor vehicles and (iv) the mechanised water transport part of NIC groups 710 and 711 - ocean and coastal water transport and - inland water transport. It gives number of non-directory establishments & own-account enterprises, estimated employment, earnings, input expenses and operating surplus by States, Union Territories and all-India separately by rural & urban sectors. Section two gives concepts and definitions used in the survey and Section Three presents summary findings of the survey. Appendix - I gives the statistical tables. A note on sample design and estimation procedure is given in Appendix - II. The facsimile of the schedule of investigation is given in Appendix - III.

SECTION TWO

CONCEPTS AND DEFINITIONS

- 2.0 Some of the important concepts and definitions followed in the survey are given below.
- 2.1 Enterprise : An enterprise was an undertaking engaged in production and/or distribution of some goods and/or services not for the sole purpose of domestic consumption and carried out by members of a household/institutional body by hiring outside labour or not. An enterprise might be owned and operated by a single household, or by several households jointly on a partnership basis, or by an institutional body.
- 2.2 Own Account Enterprises : An enterprise which was operated without any hired worker was called an own-account enterprise. Household members, if paid, were treated as hired workers and such enterprises were not treated as own account enterprises.
- 2.3 Establishment : An enterprise with at least one hired worker on a fairly regular basis was called an establishments. A directory establishment was one which had six or more workers (including both household and hired) and/or whose annual output/turnover/receipts was Rs. one lakh or more. On the other hand an establishments having less than six workers and annual output/turnover/receipt less than Rs. one lakh was termed a non-directory establishment.
- 2.4 Mechanised passenger and goods transport : This included enterprises engaged in (i) passenger transport by bus services (NIC code 701), (ii) passenger transport by other motor vehicles (NIC code 702), (iii) freight transport by motor vehicles (NIC code 703), (iv) mechanised ocean and coastal water transport (under NIC group 710) and (v) mechanised inland water transport (under NIC group 711).
- 2.5 Fixed assets : Fixed assets included assets of the enterprise such as land, building, transport equipments and other equipments, furniture and fixtures etc. new or used with a normal economic life of more than one year from the date of purchase.
- 2.6 Proprietary : When an individual was the sole owner of the enterprise type of ownership was proprietary. When such an enterprise was located in the same premises where the proprietor resided it was called proprietary-household.
- 2.7 Partnership : Where there were two or more owners of the enterprise on a partnership bases, with or without formal registration, type of ownership of the enterprise was categorised as partnership.

2.8 Institutional Ownership : When the enterprise was owned by a private limited company or a public limited company or a co-operative society, etc., the ownership was called institutional.

2.9 Employment - Hired staff : This included primary workers as well as supervisory and clerical staff. Apprentices paid or unpaid were also included.

2.10 Employment - Not hired staff : This included working proprietors, unpaid family workers and co-operative members.

2.11 Total emoluments : This comprised of salaries, wages and allowances etc. to hired staff and benefits including benefits in kind and bonus paid to hired as well as not hired staff.

2.12 Rent on fixed assets : It was the rent payable for assets hired by the enterprise.

2.13 Interest on loan : Interest payable on outstanding loan, if any, for the reference year was taken as interest on loan.

2.14 Input expenses : Value of inputs like petrol diesel, lubricants etc. consumed, service purchased, repair and maintenance and other expenses incurred and local rates, taxes, licence fee paid etc. by the enterprise were taken as input expenses.

2.15 Total receipts : Total earnings of the enterprise from the operation of vehicles for transporting passengers and goods were taken as total receipts.

2.16 Value added : Total receipts minus input expenses was value added.

2.17 Net receipt/profit : Total receipts minus (i) input expenses, (ii) total emoluments (iii) rent on fixed assets including transport equipment not owned and (v) interest on loan was net receipt/profit of the enterprises.

period

2.18 Reference : The reference period for average number of persons working, emoluments, petrol, diesel etc. consumed, services purchased and repair, maintenance and other expenses, rent for assets not owned and earnings was last month ending on the day preceding the date of enquiry or last operating month for seasonal enterprises as well as for enterprises which did not operate during the last month. For local rates, taxes and licence fee and interest on loan the reference period was last year. Annual estimates for emoluments, earnings and expenses on petrol, diesel etc. consumed and services purchased etc. were derived by multiplying the monthly figures by the number of operating months. For fixed assets and outstanding loan the reference period was as on the date of enquiry.

SECTION THREE
SUMMARY RESULTS

3.0 Some of the important results of the survey are presented below.

3.1 The estimated number of enterprises and total employment separately for rural and urban areas of the country by type of enterprise are shown in table 1. The total number of enterprises consisting of own account enterprises (OAE) and non-directory establishments (NDE) operating in the field of mechanised passenger and goods transport activity in the country was about 1.12 lakhs. These enterprises provided employment to an estimates total of 1.75 lakh persons.

Out of the total 1.12 lakh enterprises, 75 percent (about 85 thousand) were OAEs while only 25 percent (about 28 thousand) were NDEs. Almost 87 percent (about 74 thousand) of the OAEs and 55 percent (about 15 thousand) of NDEs were seen to be urban based. Altogether only 21 percent of the total number of enterprises were located in the rural areas.

It is also seen from the table that the percentage share of total employment in the rural and urban areas of the country were more or less proportional to the percentage share of enterprises of the sectors concerned. This was in the case of OAEs as well as also of NDEs.

Table 1 : Estimated number of enterprises and total employment by type of enterprise : All India, NSS 34th round, July 1979 - June 1980

type of enterprise	number of enterprises			number of persons engaged		
	rural	urban	total	rural	urban	total
(1)	(2)	(3)	(4)	(5)	(6)	(7)
<u>1.1 aggregate figures</u>						
OAE	10792	73875	84667	11417	85549	96966
NDE	12286	15261	27547	33834	44373	78207
Combined	23078	89136	112214	45251	129922	175173
<u>1.2 percentage of total</u>						
OAE	12.75	87.25	100.00	11.77	88.23	100.00
NDE	44.60	55.40	100.00	43.26	56.74	100.00
Combined	20.57	79.43	100.00	25.83	74.17	100.00

3.2 Estimated number of enterprises by type of ownership with their percentage to total separately for rural and urban areas of the country are presented in table 2 below. In the table proprietary and partnership type of enterprises are classified under "non-institutional" while all other type of enterprises clubbed together are shown as "institutional". It is seen from the table that about 99 percent of the rural and 95 percent of urban enterprises which included about 8 and 4 percent respectively of partnership enterprises were non-institutional at All-India level.

Table 2 : Estimated number of enterprises by type of ownership
- all India, NSS 34th round, July 1979 - June 1980

type of ownership	estimated no. of enterprise			percentage of enterprise		
	rural	urban	total	rural	urban	total
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1. non-institutional						
i) proprietary	21102	80972	102004	91.44	90.76	90.90
ii) partnership	1761	3593	5354	7.63	4.03	4.77
2. institutional	315	4641	4856	0.93	5.21	4.33
3. total	23078	89136	112214	100.00	100.00	100.00

3.3 Estimated value of annual net receipts (profit or operating surplus) in monetary terms both aggregate and average per enterprise separately for rural and urban areas by type of enterprise are given in table 3. The total amount of annual net receipts which accrued to this category of industrial enterprises in the country during year 1979-80 was Rs. 63.86 crores with an average value of Rs. 5691 per enterprise.

Almost 82 percent (Rs. 52.49 crores) of this amount was contributed by the urban sector alone leaving only 18 percent (Rs. 11.38 crores) for the rural sector to take care of. In the rural sector, the contribution of OAEs

and NDEs to the total net receipts was Rs. 6.98 crores and Rs. 4.40 crores respectively. However, the major share of contribution (Rs. 40.22 crores) in the total net receipts of Rs. 63.86 crores was claimed by OAEs in the urban sector. The share of NDEs in the urban sector was only Rs. 12.27 crores. Thus, almost 74 percent (Rs. 47.20 crores) of the total net receipts accrued to the OAEs alone.

Looking at the average value of net receipts per enterprise, it is seen that highest value of net receipts per enterprise (Rs. 8038) was in the case of NDEs of urban sector. This was almost one and half times the national average of Rs. 5691 per enterprise. The per enterprise value of net receipts for NDEs in the rural sector was only Rs. 3579. The average value of net receipts per enterprise for OAEs were Rs. 6466 and Rs. 5444 in the rural and urban sector respectively.

Table 3: Estimated value of annual net receipts (profit or operating surplus) both aggregate and per enterprise values by type of enterprise - all-India, NSS 34th round July 1979 - June 1980

characteristic	type of enterprise	value net receipts		
		rural	urban	total

APPENDIX - II

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Basic design : The sample design in both rural and urban areas was a stratified two stage one with enumeration blocks (EBs) of economic census being first stage units and enterprises in sample EBs being second stage units.
2. Stratification : There were 73 regions all over India (excluding areas not covered by NSS). These regions were formed within a state/union territory except in Gujarat by grouping contiguous districts of similar agricultural profile. In Gujarat, regions were formed by grouping contiguous tehsils taking into consideration the concentration of tribal population and dry areas of the state. Each district was treated as a stratum except in Gujarat where parts of a district belonging to different regions were treated as different strata.
3. Sampling frame : The enumeration blocks (EB) formed during 1977 Economic Census showing the number of DE and NDE for the different industries for each EE were used as sampling frame for the selection of EBs, the first stage units of sampling. However, due to non-availability of EC frame, UFS frame was used as the sampling frame for the urban areas of Nagaland and 1971 census list of villages was used as sampling frame for rural areas of Chandigarh.
4. Sub-stratum : All the EBs in each district/stratum were divided into 2 sub-strata. Sub-stratum 1 consisted of all EBs having at least one DE/or NDE in any of the 4 industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport and (iv) storage and warehousing. Residual EBs constituted sub-stratum 2. However, in rural areas of Gujarat 3 sub-strata were formed by sub-dividing sub-stratum 2 in two parts, viz. EBs not having any DE or NDE in any of the 4 industries specified above but containing at least one DE and/or NDE in any of the remaining industries covered by the Economic Census constituted sub-stratum 2 and the residual EBs constituted sub-stratum 3.

5. Allocation : The total sample size of enumeration blocks for the state/union territory was fixed on the basis of the number of investigators available for the survey in the state. The total number of sample EBs in a state or union territory was allocated to the rural and urban sectors of the districts in proportion to total number of directory and non-directory establishments in the four industries (viz. trade, hotel and restaurant, transport and storage and warehousing) in the respective districts and sectors. District-wise sample size was distributed between sub-stratum 1 and 2 approximately in the ratio 5 : 1, separately for the rural and urban sectors.

6. Selection of EBs : Sample EBs were selected from sub-stratum 1 with probability proportional to total number of DE + NDE under the industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport, and (iv) storage and warehousing with replacement. From sub-stratum 2 sample EBs were selected at random.

7. Sub-division of EBs : Normally each sample EB was completely surveyed. But where the EB population exceeded 1,000 or number of DE + NDE exceeded 200, the EB was sub-divided into two or more sub-blocks of nearly equal population or DE + NDE content and the survey was confined to one of the sub-blocks selected at random.

8. Sampling of enterprises : There were 11 schedules of enquiry for the different enterprises under survey coverage as :

<u>schedule type</u>	<u>enterprise type</u>
1. 2.31B	mechanised passengar & goods transport - NDE & OAE
2. 2.32B	non-mechanised passenger & goods transport - NDE & OAE
3. 2.33B	services incidental to transport - NDE & OAE
4. 2.34B	storage & warehousing - NDE & OAE
5. 2.41B	trade - NDE & OAE

<u>schedule type</u>	<u>enterprise type</u>
6. 2.42B	hotel & restaurant - NDE & OAE
7. 2.51B	OAE in service sector
8. 2.52B	other recognised educational non-directory establishment
9. 2.53B	non-govt. medical and health non-directory establishment
10. 2.54B	community & non-commercial cultural non-directory establishment
11. 2.55B	non-directory establishment in service sector other than education, medical, health, community & non-commercial cultural services

In each sample EB all the OAEs eligible for sch. 2.51B were surveyed. Also in each EB a maximum of 12 NDEs were surveyed. Further in each EB 3 OAEs other than OAEs eligible for sch. 2.51B were surveyed. In EBs having no eligible NDE, 5, OAEs were surveyed.

NDE : When total number of NDE eligible for survey exceeded 12 in an EB, 12 sample NDEs were distributed over different schedule types as follows. First, one NDE was allotted to each schedule type. Next, one more was allotted to each schedule ~~of~~ type in the priority order of schedules 2.31B, 2.32B, 2.33B, 2.34B, 2.52B, 2.53B, 2.55B, 2.41B and 2.42B until the total number of sample NDEs became 12. This procedure was repeated as many times as warranted to arrive at 12 sample NDEs. Circular systematic sample of NDEs was selected independently from each schedule type.

OAE : A circular systematic sample of 3 or 5 OAEs, as required, was selected taking all the schedule types (excepting schedule 2.51B) together.

9. Sample size : At all-India level in the Central sample 6661 rural and 10662 urban EBs were surveyed.

* Estimation Procedure

10. Notations : The following notations are used for obtaining various estimates.

- r : subscript for region
- s : subscript for district/stratum
- s₁ : subscript for sub-stratum 1 of a district/stratum
- s₂ : subscript for sub-stratum 2 of a district/stratum
- s₃ : subscript for sub-stratum 3 of a district/stratum
(for Gujarat - rural areas only)
- t₁ : subscript for non-directory establishment (NDE)
- t₂ : subscript for own-account enterprises (OAE)
- i₁ : subscript for sample enumeration block (EB) in
sub-stratum 1
- i₂ : subscript for sample enumeration block (EB) in
sub-stratum 2
- i₃ : subscript for sample enumeration block (EB) in
sub-stratum 3 (for Gujarat - rural areas only)
- j : subscript for enterprise/establishment
- z : size of an EB
- Z : total size of a district/stratum
- D : number of sub-blocks actually formed in an EB
- n : number of EBs surveyed
- H : total number of NDEs in the EB/sub-block
- L : total number of OAEs other than schedule 2.51 B in
the EB/sub-block
- h : number of NDEs surveyed in the EB/sub-block
- I : number of OAEs other than schedule 2.51 B surveyed
in the EB/sub-block
- K : number of districts/strata in a region

$H_{s_1 i_1 t_1} / H_{s_2 i_2 t_1}$ = no. of NDEs in hotel & restaurants
listed in the i-th sample block of
sub-stratum 1/sub-stratum 2

~~72~~

$h_{s_1 i_1 t_1} / h_{s_2 i_2 t_1}$ = no. of NDEs in hotel & restaurants surveyed in the i -th sample block of sub-stratum 1/sub-stratum 2

$L_{s_1 i_1 t_2} / L_{s_2 i_2 t_2}$ = total number of OAEs (other than OAEs eligible for schedule 2.51B) listed in the i -th sample block of sub-stratum 1/sub-stratum 2

$I_{s_1 i_1 t_2} / I_{s_2 i_2 t_2}$ = total number of OAEs (other than OAEs eligible for schedule 2.51B) surveyed in the i -th sample block of sub-stratum 1/sub-stratum 2

11. The estimation procedure adopted for schedule 2.42B is described below. In the following Y stands for the estimate of the state total of the characteristic y based on the whole sample. To obtain Y , the estimates of Y_{s_1} and Y_{s_2} of the characteristic y for sub-stratum 1 and sub-stratum 2 respectively are to be prepared.

$$Y_{s_1} = \frac{Z_{s_1}}{n_{s_1}} \sum_{i_1=1}^{n_{s_1}} \frac{D_{s_1 i_1}}{Z_{s_1 i_1}} (y_{s_1 i_1 t_1} + y_{s_1 i_1 t_2})$$

and
$$Y_{s_2} = \frac{Z_{s_2}}{n_{s_2}} \sum_{i_2=1}^{n_{s_2}} D_{s_2 i_2} (y_{s_2 i_2 t_1} + y_{s_2 i_2 t_2})$$

where
$$y_{s_1 i_1 t_1} = \frac{H_{s_1 i_1 t_1}}{h_{s_1 i_1 t_1}} \sum_{j=1}^{h_{s_1 i_1 t_1}} y_{s_1 i_1 t_1 j}$$

$$y_{s_1 i_1 t_2} = \frac{L_{s_1 i_1 t_2}}{I_{s_1 i_1 t_2}} \sum_{j=1}^{I_{s_1 i_1 t_2}} y_{s_1 i_1 t_2 j}$$

76

$$Y_{s_2 i_2 t_1} = \frac{H_{s_2 i_2 t_1}}{h_{s_2 i_2 t_1}} \sum_{j=1} y_{s_2 i_2 t_1 j}$$

and

$$Y_{s_2 i_2 t_2} = \frac{L_{s_2 i_2 t_2}}{l_{s_2 i_2 t_2}} \sum_{j=1} y_{s_2 i_2 t_2 j}$$

Then,

$$Y_s = Y_{s_1} + Y_{s_2}$$

and

$$Y = \sum_r \sum_{s=1}^k Y_s$$

It may be noted that values of H and h relate to the schedule 2.42B only but the values of L and l are for all the OAE (other than schedule 2.51B) schedules combined.

12. For Gujarat (rural areas only),

$$Y_s = Y_{s_1} + Y_{s_2} + Y_{s_3}$$

and

$$Y = \sum_r \sum_{s=1}^k Y_s$$

The value of Y_s is to be obtained using the relation for Y_{s_2} given in para 11.

13. Estimates of Ratios : Estimates of ratios of two characteristics are given by the ratio of the estimates of aggregates of the items appearing in the numerator and the denominator of the ratio. First the aggregates of the two characteristics are to be estimated at the level required and the ratios are to be computed at the final stage as $R = \frac{Y}{X}$, where R, X and Y are the estimates of the ratio and aggregates of two characters x and y respectively.

Errata to Appendix - 11 : Sample Design and estimation procedure

The under-noted corrections to be incorporated as indicated :
