PATTERN OF CONSUMER EXPENDITURE OF HOUSEHOLDS SELF-EMPLOYED ~~***~~
IN AGRICULTURE AND OF AGRICULTURAL AND RURAL LABOUR HOUSEHOLDS ***

1. INTRODUCTION

1.0 A countrywide enquiry on the household consumption expenditure was held in the 38th round (Jan. - Dec. 1983) of the National Sample Survey (NSS) as a part of the third quinquennial survey. In the survey schedule, the sample households, in the rural areas were classified, as ~~mentioned~~ ^{mentioned below,} on the basis of the share of income derived from the various activities pursued by the members of the households :

- (i) agricultural labour households
- (ii) other labour households
- (iii) households self-employed in agricultural occupations.

The residual category (iv) consists of households self-employed in non-agriculture, non-manual employees and households deriving income from non-gainful sources only.

1.1 In this report, the pattern of consumption of (a) agricultural labour households (i) , (b) rural labour households (i) + (ii) (c) households self-employed in agricultural occupation (iii) and other households (iv) and their household composition have been presented*.

A report on general households i.e. all households taken together irrespective of their household classification has already been brought out by NSS as Draft Report No. 319 : Report on the Third Quinquennial Survey on consumer Expenditure.**

* A similar report on scheduled caste and scheduled tribe households has also been prepared as draft report no. 332. Pattern of consumer expenditure of scheduled caste and scheduled tribe households.

** Since the present report is based on full scrutiny and data correction after updating the data file (by computer Processing), the results presented in this report are slightly at variance with the provisional result released in Sarvekshana Vol. IX, No. 4 April '86.

kcr. *** The results presented in the report relate to the data for the rural sector only.

1.2 Survey period and reporting period : The field work of the thirtyeighth round started in January 1983 and continued upto December 1983, covering a period of one complete year. The reference period for collection of data on consumer expenditure was 30 days preceding the date of survey. The estimates presented in the report, ^{therefore,} broadly relate to the period December 1982 to December 1983.

1.3 Coverage : The geographical coverage of the survey was the entire Indian Union excluding Ladakh and Kargil districts of Jammu & Kashmir and rural areas of Nagaland.

1.4 Sample Size : The survey covered about 80 thousand households spread over 8035 villages.

1.5 Participation of states : In this round all the states and Union territories (included in the geographical coverage) except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated in the survey on at least equal matching basis. The results presented in this report are based on central sample data.

2. CONCEPTS AND DEFINITIONS

2.0 The concepts and definitions followed in the consumer expenditure enquiry continue to remain broadly the same as in earlier rounds. Some of these concepts and definitions are explained below.

2.1 Household : A household is a group of persons normally living together and taking food from a common kitchen. A boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government, such as those in prisons, police quarters, cantonments, hospitals, asylums, relief camps are, however excluded from the scope of the survey.

2.2 Household member : Any person who is a normal resident of the sample household is considered to be a member of the household. Household members are grouped into three categories viz., adult male, adult female and child. One who has already attained the age of 15 (in completed years) is considered as an adult.

2.3 Household size : The total number of members (as defined above) in a household is considered to be the size of the household.

2.4 Household consumer expenditure : Consumer expenditure comprises all expenditure incurred by the household, exclusively on domestic account, including consumption out of home-grown produce or transfer receipts like gift, loan etc. The expenditure on household enterprise is excluded from consumer expenditure, while consumption out of transfer receipts is included, transfer payments of all kinds (loans, gifts, charities, monetary as well as in kind, like grain loan etc.) are excluded. Expenditure on purchase and construction of residential houses are considered to be expenses on capital account and hence are excluded from the consumer expenditure; but the expenditure towards maintenance of residential building is included in the consumer expenditure of the household. Monetary value of food articles consumed during the reference period is taken to represent consumer expenditure on food articles. For semi-durable and durable goods, the actual expenditure incurred towards purchase of these articles acquired during the reference period is considered as the consumer expenditure of the articles. For items of clothing and footwear, there is a slight departure from the earlier round. Monetary value of articles acquired and brought into first use during the reference period is taken as the consumer expenditure of the articles concerned.

2.5 Rural labour household : A household was classified as rural labour household if its income during the last 365 days was more from wage paid manual labour (agricultural and/or non-agricultural) than either from paid non-manual employment or from self-employment. Rural labour households include agricultural labour households.

2.6 Agricultural labour household : Households which earned 50 percent or more of their total income during the last 365 days from wage paid manual labour in agriculture are treated as agricultural labour households. Agricultural labour is a part of rural labour.

2.7 Households self-employed in agricultural : Households which earned 50 percent or more of their total income from self-employment in agricultural occupation during the last 365 days are treated as self-employed in agriculture.

2.8 Reference period : The reference period for collection of data on all items of consumer expenditure is last 30 days (ending on the day preceding the date of enquiry). In addition, for items of clothing and footwear, durable goods and some items of miscellaneous goods and services, data have been collected for a reference period of last 365 days also. The results presented in this report are based on data of 30 days reference period only.

3. EXPLANATORY NOTES ON TABLES

3.0 The report contains two distinct types of tables for each state and union territory of India as also for all-India. The tables relate to rural sector only. The contents of the tables are described below.

3.1 Table 1 series give the distribution of (i) no. of sample households, (ii) percentage of estimated no. of households, persons, and (iii) average household size (adult male, adult female and children) by monthly per-capita expenditure classes.

3.2 Table 2 series give value of consumption of broad groups of items per person for a period of 30 days by monthly per-capita expenditure classes. Estimates are given for 19 broad groups of items. The groups are (1) cereals; (2) gram; (3) cereal substitutes; (4) pulse and products; (5) milk and products; (6) edible oil; (7) meat, egg and fish; (8) vegetables; (9) fruits and nuts; (10) sugar; (11) salt; (12) spices; (13) beverages and refreshments;

(14) pan, tobacco & intoxicants; (15) fuel and light; (16) clothing; (17) foot-wear; (18) miscellaneous goods and services (including rents and taxes); and (19) durable goods. Apart from this, estimates on (20) rents and (21) taxes have been shown separately also. The results are presented also for (i) food-total; (ii) non-food total and (iii) total consumer expenditure.

3.3 Monthly per capita expenditure classes : Estimates have been given by monthly per-capita expenditure classes in rupees, arranged in ascending order of magnitude. The expenditure levels are grouped into the following 14 classes :-

srl. no.	monthly per-capita expenditure classes (in rupees)			srl. no.	monthly per-capita expenditure classes (in rupees)		
(1)	(2)	(3)	(4)	(1)	(2)	(3)	(4)
1.	0	-	30	8.	100	-	125
2.	30	-	40	9.	125	-	150
3.	40	-	50	10.	150	-	200
4.	50	-	60	11.	200	-	250
5.	60	-	70	12.	250	-	300
6.	70	-	85	13.	300	&	above
7.	85	-	100	14.	all expenditure classes		

Note : The groups 0-30, 30-40 etc. stand for Rs. 0 to less than Rs. 30/-, Rs.30/- to less than Rs.40/- and so on.

3.4 Table numbering: For convenience of reference the table numbers have been coded - the digit to the left of the decimal point refers to the nature of information and the digits to the right refer to the state/union territory, followed by R for rural tables and U for urban tables.

The code numbers assigned to the states/union territories are as follows :-

- | | |
|---------------------|-------------------------------|
| 0. All India | 16. Punjab |
| 1. Andhra Pradesh | 17. Rajasthan |
| 2. Assam | **18. Sikkim |
| 3. Bihar | 19. Tamil Nadu |
| 4. Gujarat | **20. Tripura |
| 5. Haryana | 21. Uttar Pradesh |
| 6. Himachal Pradesh | 22. West Bengal |
| 7. Jammu & Kashmir | 23. Andaman & Nicobar Islands |
| 8. Karnataka | ** 24. Arunachal Pradesh |
| 9. Kerala | 25. Chandigarh |
| 10. Madhya Pradesh | 26. Dadra & Nagar Haveli |
| 11. Maharashtra | 27. Delhi |
| 12. Manipur | 28. Goa, Daman & Diu |
| **13. Meghalaya | *29. Lakshadweep |
| 14. Nagaland | 30. Mizoram |
| 15. Orissa | 31. Pondicherry |

4. SAMPLING DESIGN AND ESTIMATION PROCEDURE

4.0 Broad design : The sampling design adopted in the survey was a stratified two-stage one with census villages in the rural areas and NSSO urban frame survey blocks in the urban areas as first stage units and households as second stage units. The sample villages were selected with probability proportional to size and with replacement in the form of two independent interpenetrating samples (IPNS). Sample blocks were selected with equal probability also in the form of two IPNS. The sample households in the second stage (ten from each first stage unit) were selected circular systematically after arranging all the households of the first stage units in a specified manner.

* Lakshadweep is not represented in the report as the estimates were not available.

** Tables for the states of Meghalaya, Tripura, Arunachal Pradesh, and Sikkim are not presented because, for large proportion of sample villages, survey data were not available for these states.

4.1 Survey period and sub-round formation : The survey was started in the month of January 1983 and was completed in December 1983. The entire survey period of one year was divided into four sub-rounds each of three months duration coinciding approximately with the four agricultural seasons. The four sub-round periods were :

- sub-round 1 : January - March 1983
- sub-round 2 : April - June 1983
- sub-round 3 : July - September 1983
- sub-round 4 : October - December 1983

The sample units were equally distributed over the four sub-rounds in a manner so as to provide equally valid estimates for each of the related sub-round period. The average based on the pooled data, taking all the four sub-rounds together, would be free from the effects of seasonality.

4.2 Estimation procedure : The estimation procedure adopted in 38th round is based on a weighted sum of the sample values. Denoting by \hat{Y} the un-biased estimate of Y, (the state total of any variate) it is given by :

$$\hat{Y} = \sum_s \frac{P_s}{n_s} \sum_i \frac{D_{si} e_{si}}{P_{si}} \frac{H_{si}}{h_{si}} \sum_j y_{sij} \dots (1)$$

for the rural sector, and

$$\hat{Y} = \sum_s \frac{N_s}{n_s} \sum_i D_{si} \frac{H_{si}}{h_{si}} \sum_j y_{sij} \dots (2)$$

for the urban sector. where,

s, i and j are suffixes for stratum, village/urban block and household respectively;

P_s, N_s and n_s give the stratum values of population, number of villages/blocks in frame and number of sample villages/blocks respectively;

D_{si}, e_{si}, P_{si} stand respectively for, number of hamlet-groups/sub-blocks formed, number of census villages contained in a larger revenue village actually surveyed and the population of the sample village;

H_{si} and h_{si} stand for the total number of households listed and number of sample households;

and finally y_{sij} is the observed value of the variate for a sample household.

Estimates of ratio of two characteristics is given by the ratio of the estimates of their aggregates.

5. SUMMARY

-: 8 :-

5.0 SUMMARY OF FINDINGS : In this section, some important findings of the survey are discussed to present a comparative picture of the different types of rural households. Of the total households surveyed, 34,935 households are self-employed in agriculture and 27,047 rural labour households of which 21817 are agricultural labour households. The remaining households have other means of livelihood.

5.1 Average size of households : In distribution of average household size is shown in Table (1) at the all-India level, the maximum household size is reported by households self-employed in agriculture (5.89). The average household size of the other three types of households namely Agricultural labour households, rural labour households and other households are almost the same i.e. 4.69, 4.70 and 4.76 respectively. For households self-employed in agriculture a number of states report household size as high as 6 and above. These are Chandigarh (7.84), ^{Haryana (6.71)} Punjab (6.58), Haryana (6.71), West Bengal (6.50), Kerala (6.32), Gujarat (6.25), Bihar and Delhi (6.13 & 6.12), Assam, Jammu & Kashmir, (6.01 & 6.02). The lowest sizes are reported by Mizoram (4.51) and Tamil Nadu (4.92).

5.2 The household sizes of Agricultural labour households and rural labour households do not differ much at the state-level except for Delhi (3.63, 4.96).

5.3 The difference in household size amongst the other types of households as compared with agricultural or rural labour households is also not very much marked at the state level. Some differences are found for the following states only : Assam, Gujarat, Manipur, Dadra & Nagar Haveli, Delhi, Goa, Daman & Diu and Mizoram.

5.4 The average size of a household self-employed in agriculture ~~for any state~~ is larger than the ~~state average is also larger than the~~ average sizes for agricultural labour, ~~and~~ rural labour households ~~xxxxxxstate~~ and also for other households both at the state and all-India levels.

Table (1) : Average number of persons per household by household types.

32.	all-India	4.69	4.70	5.89	4.76	5.20

5.5 Average Monthly Per Capita Consumer Expenditure : In Table (2) has been shown statewise the value of total consumer expenditure per person by types of households.

5.6 The average per capita monthly expenditure is reported to be much higher for households self employed in agriculture as compared with that for the rural labour or agricultural labour households in almost all the states. The expenditure level of rural labour and agricultural labour household are however quite close. At all-India level the average per capita monthly consumer expenditure is ^{Rs. 85.28} Rs. 85.09, Rs. 122.85, Rs. 125.91 and Rs. 112.31 respectively for agricultural labour households, rural labour households, households self-employed in agriculture, ~~xxx~~ other households and all rural households respectively.

5.7 The average per capita expenditure of the households self-employed in agriculture is Rs. 123 at the all-India level. Some of the states where per capita consumer expenditure is found to be high in this type of household are Chandigarh (Rs. 246), Goa, Daman & Diu (Rs. 218), Andaman & Nicobar Islands (Rs. 212), Himachal Pradesh (Rs. 192), Kerala (Rs. 171) and Punjab (Rs. 165).

5.8 At the lower and stand states of Bihar (Rs. 101), Pondicherry (Rs. 105), Uttar Pradesh (Rs. 109), Orissa (Rs. 113), West Bengal (Rs. 118) and Madhya Pradesh (Rs. 121).

5.9 In column (6) is given the per capita consumer expenditure of the rest of the households i.e. other households. The states having high consumption expenditure in this type of household are Chandigarh (Rs. 211), Punjab (Rs. 200), Delhi (Rs. 198), Kerala (Rs. 181), Goa, Daman & Diu (Rs. 177), and Haryana (Rs. 166) while those having the lowest expenditure are Dadra & Nagar Haveli (Rs. 88), Orissa (Rs. 105), Bihar (Rs. 108), Uttar Pradesh & Madhya Pradesh (Rs. 109), Assam (Rs. 114) and Mizoram (Rs. 118).

Table (2): Value (Rs.0.00) of total consumption per person for a period of 30 days by household type and by states, 38th round

32.	All India	85.28	89.09	122.85	125.91	112.31

5.10 In Table (3) is shown the percentage expenditure on food total to total consumer expenditure for different types of households by states.

It is found that for all the states, the percentage expenditure on food is almost identical in respect of agricultural and rural labour households. In case of most of the union territories, however, the difference in percentage consumption of food for the two types of households vary considerably. These union territories with corresponding percentages are Andaman and Nicobar Islands (68.85, 64.87); Chandigarh (62.74, 53.23), Dadra and Nagar Haveli (68.47, 65.86), Delhi (59.79, 52.93) and Goa, Daman & Diu (74.17, 67.78). It seems in these places, rural labour households include a good percentage of 'other labour households' than in other states or union territories.

5.11 For agricultural labour households the only state reporting less than 60 percent towards food consumption is Delhi (59.79) while for rural labour households they are Chandigarh (53.23) and Delhi (52.93).

5.12 All the all India level the percentage expenditure on food consumption is 64.84 for households self-employed in agriculture, 68.17 for rural labour household, 64.20 for 'other households*', against 65.56 for all households combined.

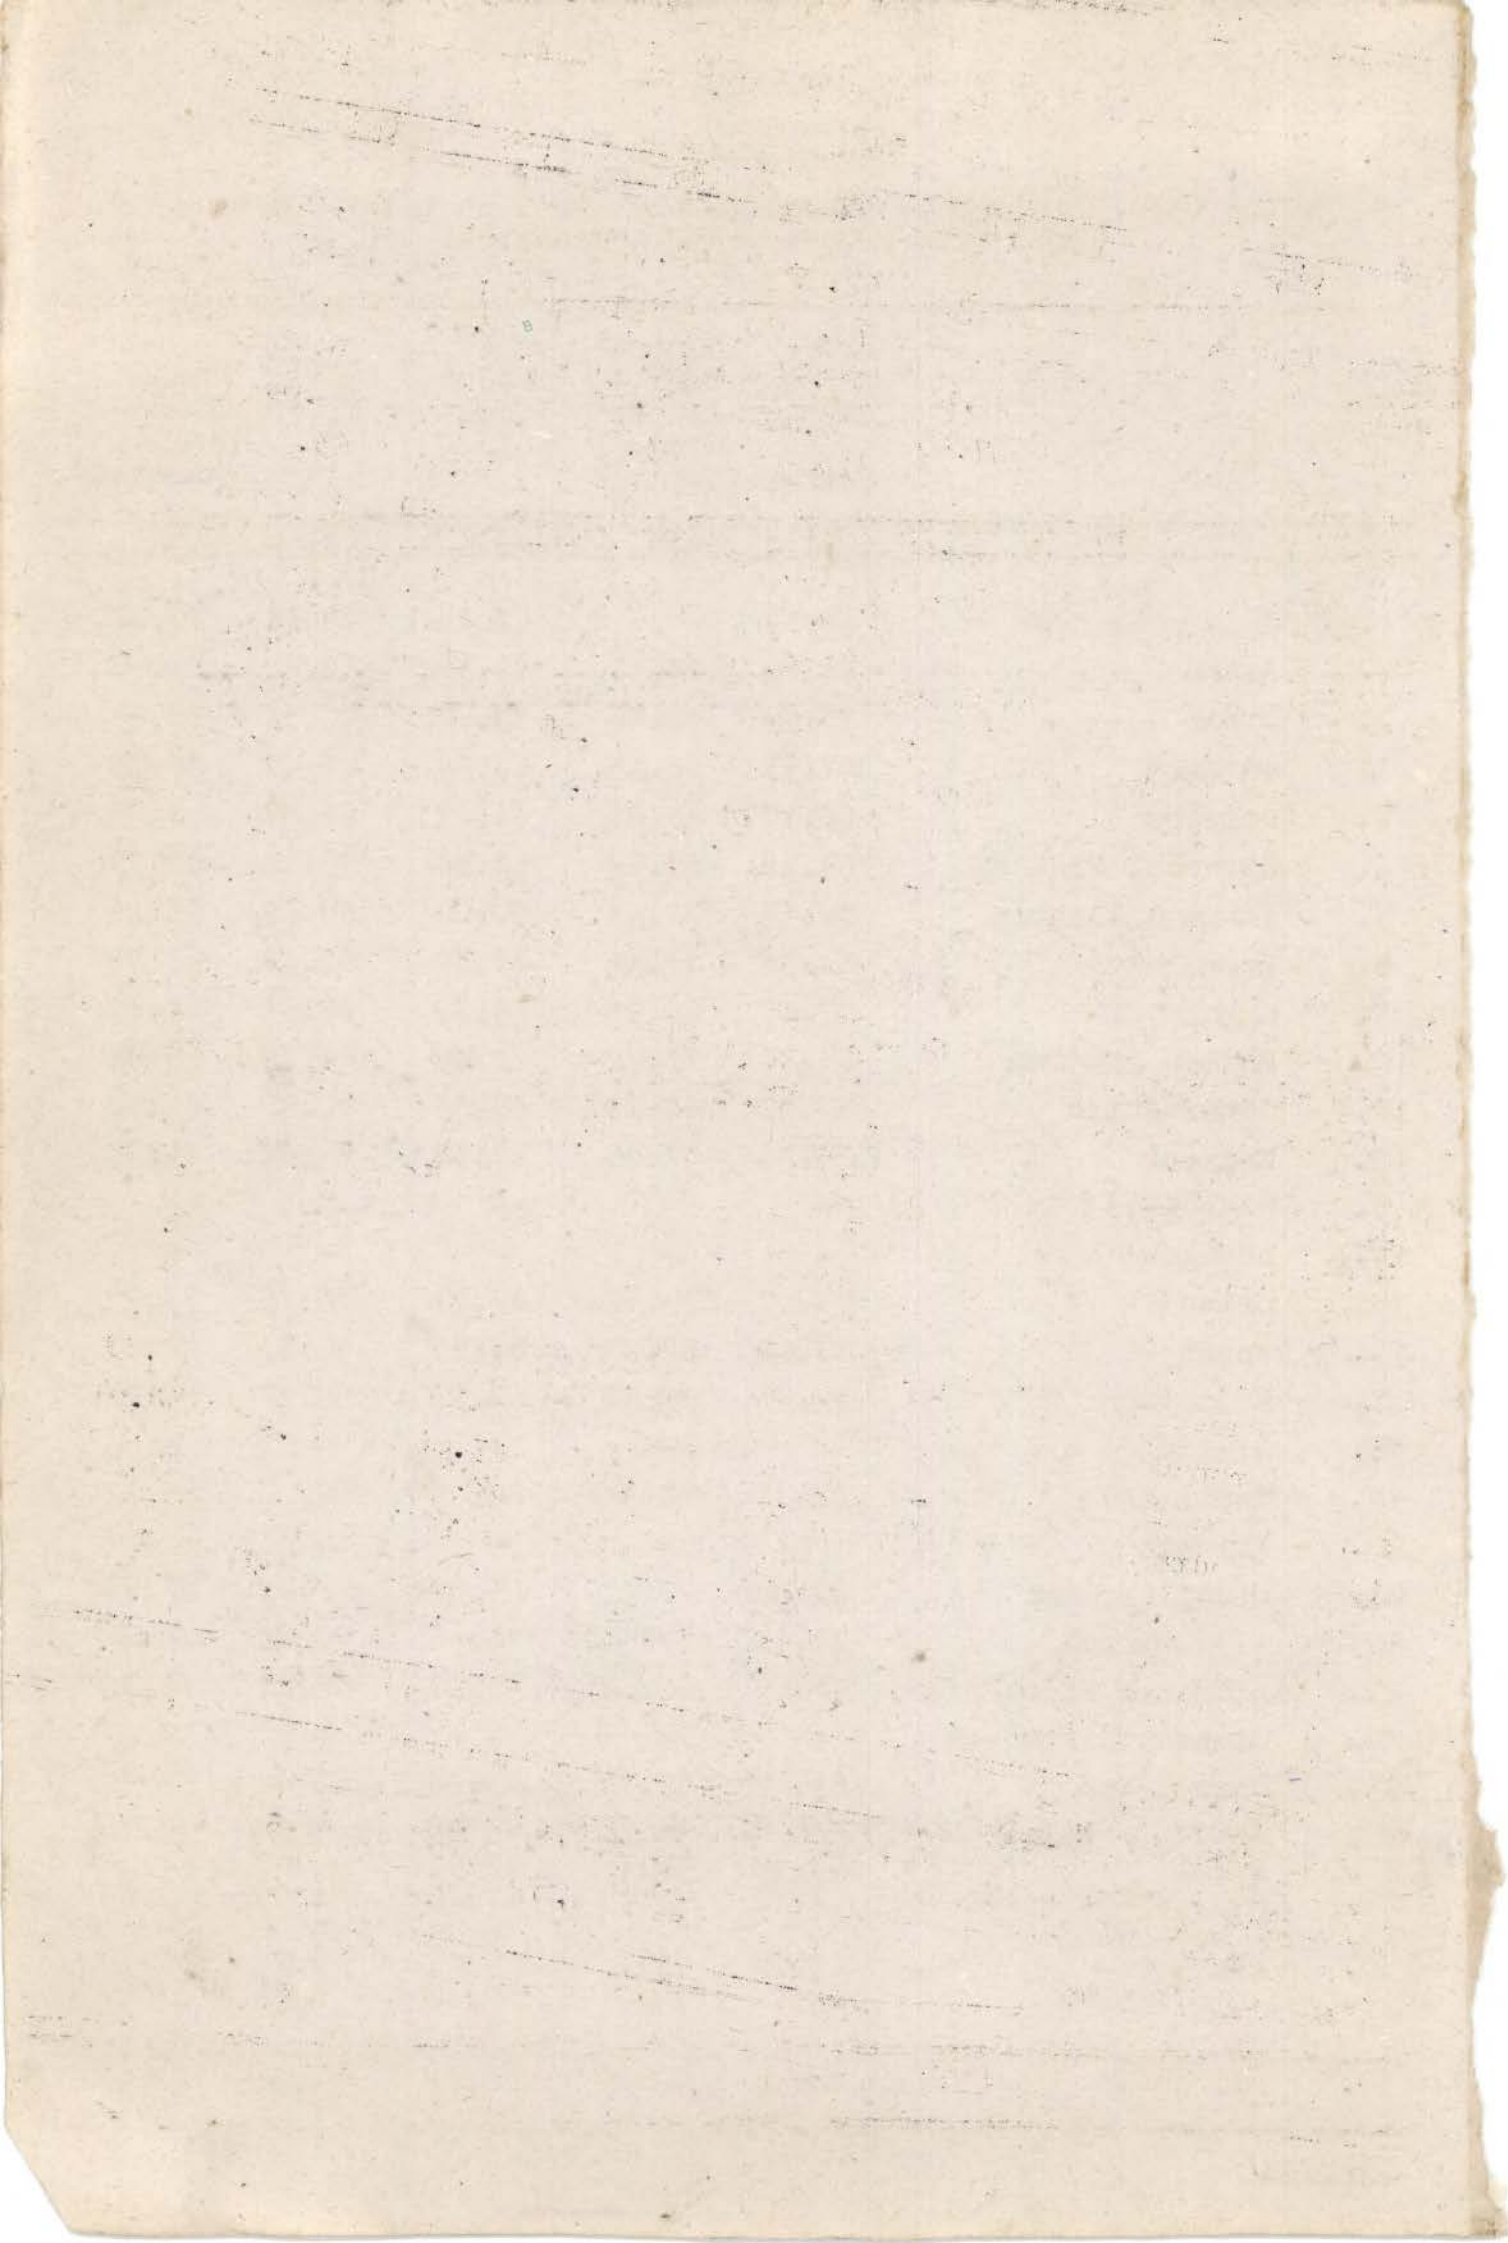

5.13 The lowest percentage expenditure on food is reported by the following states in respect of households self-employed in agriculture i.e. Delhi (55.15), Kerala (57.40), Punjab (57.58), Andhra Pradesh (58.32) and Maharashtra (59.92) whereas for 'other households, the states with corresponding percentages are Goa, Daman & Diu (54.95), Delhi (56.46), Punjab (58.33), Andaman & Nicobar Islands (58.81), Rajasthan (59.27), Himachal Pradesh (59.31) and Andhra Pradesh (59.44), All the above states report less than 60 percent expenditure on food consumption.

* The tables for other households are not given in the Appendix.

NSS 38th Round

Table (3) : Percentage expenditure on food to total consumer expenditure by type of households.

List of Statistical Tables

table series	d e s c r i p t i o n	page number
(1)	(2)	(3)
1.	Percentage distribution of estimated number of households and persons, and average number of adult males, adult females, children and total persons per household by monthly per capita expenditure classes :	
	(i) Households self-employed in Agriculture	4 1 - 4 26
	(ii) Agricultural labour households	4 27 - 4 52
	(iii) Rural labour households	4 53 - 4 78
2.	Value (Rs. 0.00) of consumption of broad groups of items per person for a period of 30 days by monthly per capita expenditure classes :	
	(i) Households self-employed in Agriculture	4 79 - 4 104
	(ii) Agricultural labour households	4 105 - 4 130
	(iii) Rural labour households	4 131 - 4 156

Note : In all the tables included in the Appendix '0.00' may be read as '-'.
