38TH ROUND : JANUARY - DECEMBER 1983

Section one

INTRODUCTION

1.0 National Sample Survey Organisation conducted a country wide enquiry on Household Consumer Expenditure in its 38th round survey operation during January - December, 1983. The survey schedule contained also some items of information on the structural aspects, housing facilities and the rental values of the household dwellings. Whereas the data on the structural aspects and housing facilities were collected both in the rural and urban sectors, information on rental was sought only in the urban sector. Data on the actual rent in the case of hired dwellings and imputed rent for dwellings occupied otherwise were collected in the schedule. Imputation of the rental of a dwelling was on the basis of the prevailing rate of rent for similar dwellings in the particular locality. In the case of rural sector, hiring-in of residential accommodation was not very common and the concept of prevailing rate of rent was, therefore, not appropriate. Hence data on the actual or imputed rent of the dwellings were not collected from rural households.

1.1 Geographical Coverage : The survey covered the whole of rural and urban India excepting Ladakh and Kargil districts of Jammu & Kashmir and rural areas of Nagaland.

1.2 Sampling design and sample size : A stratified two stage sampling design was adopted for the survey, Villages in the rural sector and blocks in the urban sector were the first stage units and households formed the second stage units in both the sectors. In the Central Sample, altogether 8598 villages and 4572 blocks were sampled at all India level of which 8035 villages and 4379 blocks were actually surveyed. Number of households planned to be surveyed for the enquiry was 10 for each sample village/block and number surveyed in these many first stage units exceeded 1.2 lakhs.

1.3 Participation of states : All the states and union territories except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated in this survey round by canvassing a matching sample, called State Sample, of at least equal size following identical concepts and definitions.

1.4 Contents of the report : This report is based on the data obtained through the Central Sample on the structural aspects, latrine facility and rentals of the dwellings collected in the survey schedule on Household Consumer Expenditure.<sup>1/</sup> Statistical tables in the Report are presented separately for rural and urban sectors. The results are available for each state, union territory and all India <sup>2/</sup>.

---

1/ A separate report on some other housing facilities has been released (No. 336 - Source of Drinking Water and Energy used for Cooking and Lighting). Three more reports on 'Pattern of Consumer Expenditure' based on this schedule have also been released : Survey Results (preliminary) for general population (Sarvekshana, Vol. IX, No. 4, April 1986), Survey Results for scheduled Caste and Scheduled Tribe Household (No. 332) and Survey Results for Agricultural Labour Households and Rural Labour Households (No. 333).

2/ Results for Meghalaya, Tripura, Arunachal Pradesh, Lakshadweep and rural areas of Sikkim are not presented in this Report in view of the non availability of data for all or a large proportion of the first stage units sampled for the survey there.

Important concepts and definitions used in this survey are given in Section Two. Some summary finds of the results are presented in Section Three. Section Four gives a note on the sampling design and estimation procedure adopted for the survey. The detailed statistical tables are given in the Appendix.

Section Two

CONCEPTS AND DEFINITIONS

2.0 Some of the important concepts and definitions adopted for the survey are given below.

2.1 Household : A household is a group of persons normally living together and taking food from a common kitchen. It includes temporary stay aways and excludes temporary visitors and guests.

2.2 Dwelling house : Dwelling house (unit) is the existing housing accommodation available to the household for its residential purpose. It may be the entire building, hutment, thatched house or jhopri or a portion thereof used by the household either exclusively or jointly with other households.

2.3 Covered area : This is the sum of the floor area of all rooms, kitchen etc. and covered and/or uncovered verandah.

2.4 House category : The nine house categories are the combinations of the three types of dwelling and the three types of structure.

2.5 Type of dwelling : Dwellings have been classified into three categories namely chawl/bustee, independent house and flat.

2.5.1 Chawl/bustee is a collection of huts or tenements of katcha or semi-pucca type inhabited by a large number of households.

2.5.2 Independent house is a free standing structure or structures with a separate entrance. In other words, if the dwelling unit and the entire structure of the house are physically co-terminous, it is considered an independent house.

2.5.3 Flat is a part of the building with one or more rooms and normal housing facilities like water supply, latrine, toilet etc. which are used exclusively by the family residing therein or jointly with other families.

2.6 Type of structure : The dwellings have been classified into three categories namely pucca, semi-pucca and katcha dwellings on the basis of the materials used for construction.

2.6.1 Pucca structure is one the walls and roof of which are made of pucca materials.

2.6.2 Katcha structure is one which has walls and roof made of non-pucca materials.

2.6.3 Semi-pucca structure is one which has either the walls or the roof, but not both, made of pucca materials. Walls/roof made partially of pucca materials is regarded as katcha walls/roof.

Materials such as oven-burnt bricks, stone-blocks, cement concrete, jack board (cement plastered reed), tiles and timber are pucca materials. Corrugated iron or asbestos sheets used in the construction of roof is also treated as pucca materials.

2.7 monthly rent (actual and imputed) : Monthly rent is the amount of money payable per month to the owner or to some other party as per the contract between the occupier of the accommodation and the person who lets it out. For houses occupied otherwise than on rent, imputation of rent is done on the basis of the prevailing rate of rent for similar houses in the locality.

2.8 monthly consumer expenditure : Household monthly consumer expenditure is the expenditure of a household incurred on domestic consumption during the reference period of 30 days preceding the date of survey.

Section Three

SUMMARY OF FINDINGS

3.0 Some general findings on <sup>a</sup> few aspects of housing condition ~~as~~ obtained through the 38th round (January - December 1983) survey schedule on Household Consumer Expenditure are given below in the following paragraphs.

3.1.1 Type of structure of rural dwellings : It is seen from table (S.1) that at all-India level, in the rural sector, an estimated 50.62 percent households were reported to have katcha structures for their habitat. The households with semi-pucca structures for their dwellings formed 32.41 percent of the rural households and those with pucca structures for their abode formed 16.58 percent.

3.1.2 Katcha dwellings dominated the rural scene in <sup>The majority</sup> ~~more~~ of the states and union territories. More than 60 percent of the rural households had their abode in Katcha structures in Assam (82.06 p.c), Orissa (81.34 p.c), Manipur (80.90 p.c), Mizoram (73.55 p.c), Andaman & Nicobar Islands (70.96 p.c), West Bengal (69.61 p.c), Pondicherry (66.77 p.c) and Bihar (65.63 p.c). Katcha dwellings sheltered less than 30 percent of the rural households in Maharashtra (29.99 p.c), Haryana (29.71 p.c), Karnataka (29.69 p.c) Punjab (27.03 p.c), Goa, Daman & Diu (17.58 p.c), Delhi (8.91 p.c) and Chandigarh (8.19 p.c).

3.1.3 Households with semi-pucca structures as their habitat formed the majority of rural households in Delhi (66.87 p.c), Madhya Pradesh (59.04 p.c), Karnataka (55.43 p.c), Maharashtra (53.95 p.c) and Himachal Pradesh (50.20 p.c). Semi-pucca dwellings were more numerous than katcha or pucca dwellings also in Gujarat (40.38 p.c). The share of semi-pucca dwellings to total rural dwellings was less than 20 percent in West Bengal (19.99 p.c),

Table(S.1) : Percentage distribution of households over structure types of their dwellings by state/union territory

Delhi	8.91	66.87	22.05	2.17	6.32	13.52	79.78	0.38
Goa, Daman & Diu	17.58	39.45	42.97	0.00	13.20	22.00	64.80	0.00
Mizoram	73.55	25.49	0.24	0.72	18.71	74.23	7.06	0.00
Pondicherry	66.77	11.70	21.53	0.00	34.55	18.83	46.62	0.00
All India	50.62	32.41	16.58	0.39	16.43	25.72	57.22	0.63

Rajasthan (17.63 p.c), Manipur (15.31 p.c), Andaman & Nicobar Islands (14.62 p.c), Orissa (13.61 p.c), Assam (12.91 p.c) and Pondicherry (11.70 p.c).

3.1.4 Pucca structures outnumbered semi-pucca and also katcha structures in the rural areas of Haryana, Kerala, Punjab, Chandigarh and Goa-Daman & Diu. This type accounted for 48.30 percent of the rural dwelling in Chandigarh, 42.97 percent in Goa, Daman & Diu, 42.71 percent in Punjab, 38.24 percent in Kerala and 36.32 percent in Haryana. Sizeable proportion of pucca dwellings was reported also in the states of Gujarat (25.86 p.c), Rajasthan (23.99 p.c) and Tamil Nadu (21.73 p.c) and in the union territories of Delhi (22.05 p.c) and Pondicherry (21.53 p.c). Pucca dwellings were nearly non-existent in Mizoram (0.24 p.c) and Manipur (0.19 p.c) and these formed less than 10 percent in ~~only~~ Madhya Pradesh (5.92 p.c), Assam (4.92 p.c) and Orissa (4.38 p.c).

3.2.1 Type of structure of urban dwellings : Table(S.1) also reveals that the dwellings in urban India were predominantly of pucca structure and an estimated 57.22 percent households had their residence in such structures. The semi-pucca structures which accommodated 25.72 percent households came second numerically and katcha structures which housed only 16.43 percent came last.

3.2.2 More urban households had their dwellings in pucca structures than in katcha or semi-pucca structures in all the states and union territories except Assam, Manipur, Nagaland and Mizoram. More than 70 percent households had pucca dwellings in Chandigarh (90.16 p.c), Haryana (80.82 p.c), Punjab (80.44 p.c), Delhi (79.78 p.c) and Rajasthan (75.16 p.c). Households in pucca dwellings formed 50 to 70 percent of the urban households in Andhra Pradesh, Gujarat, Himachal Pradesh, Kerala, Maharashtra, Tamil Nadu, Uttar Pradesh, West Bengal, Andaman & Nicobar Islands and Goa, Daman & Diu. This type of structure accommodated less than 50 percent households in ~~only~~ Sikkim (49.70 p.c), Bihar (49.35 p.c), Madhya Pradesh (48.57 p.c), Karnataka (47.20 p.c), Pondicherry (46.62 p.c), Jammu & Kashmir (45.28 p.c), Orissa (39.21 p.c), Assam (30.22 p.c), Nagaland (25.60 p.c),

Mizoram (7.06 p.c) and Manipur (3.02 p.c).

3.2.3 Semi-pucca dwellings were more in number than pucca or katcha dwellings in the urban areas of Nagaland and Mizoram and this type provided housing accommodation to 45.78 percent and 74.23 percent urban households respectively in these territories. Large proportion of semi-pucca dwellings were reported in the urban areas also in Manipur (45.53 p.c), Karnataka (39.96 p.c), Madhya Pradesh (34.29 p.c), Maharashtra (33.11 p.c), Andaman & Nicobar Islands (30.38 p.c) and Himachal Pradesh (30.37 p.c). This type accommodated less than 20 percent of the urban households in Jammu & Kashmir (19.31 p.c), Pondicherry (18.83 p.c), Delhi (13.52 p.c), Haryana (13.50 p.c), Punjab (11.87 p.c), Rajasthan (11.14 p.c) and Chandigarh (4.97 p.c).

3.2.4 There were more katcha dwellings than semi-pucca or pucca dwellings in the urban areas of Assam and Manipur and this type was <sup>the</sup> abode for 44.74 percent households in Assam and 47.73 percent households in Manipur. Katcha dwellings formed sizeable proportion of urban dwellings also in Pondicherry (34.55 p.c), Orissa (31.10 p.c), Bihar (27.76 p.c), Nagaland (27.69 p.c) and Andhra Pradesh (26.97 p.c) and no small proportion in Tamil Nadu (19.85 p.c), Andaman & Nicobar Islands (19.20 p.c), Mizoram (18.71 p.c), Kerala (17.20 p.c) and Madhya Pradesh (16.05 p.c).

3.3.1 Type of rural dwellings : It is observed from table(S.2) that housing in rural India consisted predominantly of independent houses. An estimated 79.67 percent households lived in independent houses, 14.74 percent in chawl/bustee type accommodation and 5.02 percent in flat type dwellings in rural India.

3.3.2 Majority of rural dwellings was of independent type in all the states and union territories except Andaman & Nicobar Islands and Goa, Daman & Diu where such dwellings formed 38.56 percent and 37.85 percent respectively. This type of accommodation accounted for more than 90 percent of the rural dwellings in Delhi (97.83 p.c), Himachal Pradesh (91.29 percent), Punjab (90.85 p.c), Kerala (90.76 p.c), Bihar (90.53 p.c) and Manipur (90.11 p.c); 80 to 90 percent

Table (S.2) : Percentage distribution of households over types of dwelling by state/union territory

in Assam, Gujarat, Haryana, Jammu & Kashmir, Madhya Pradesh, Rajasthan, Uttar Pradesh and Mizoram; 70-80 percent in Andhra Pradesh, Tamil Nadu, West Bengal, Dadra & Nagar Haveli and Pondicherry and 50-70 percent in Karnataka, Maharashtra, Orissa and Chandigarh.

3.3.3 Chawl/bustee type dwellings formed a majority of dwellings in only Andaman & Nicobar Islands (59.20 p.c). This type dwellings, however, formed a sizeable proportion of rural dwellings in Orissa (31.54 p.c), Maharashtra (30.11 p.c), Karnataka (26.91 p.c), Dadra & Nagar Haveli (22.57 p.c) and West Bengal (20.21 p.c) and no small proportion in Pondicherry (17.79 p.c), Tamil Nadu (16.68 p.c), Madhya Pradesh (16.28 p.c), Gujarat (14.97 p.c), Andhra Pradesh (14.36 p.c), Rajasthan (11.43 p.c), Mizoram (11.10 p.c) and Assam (10.50 p.c).

3.3.4 Flat type formed the majority of rural dwellings only in Goa, Daman & Diu (57.28 p.c). A large proportion (43.11 p.c) of rural dwellings was flat type also in Chandigarh. Two other territories in which flat type dwellings formed more than 10 percent of rural dwellings were Andhra Pradesh (11.38 p.c) and Pondicherry (10.02 p.c).

3.4.1 Type of urban dwellings : It is also observed from table(S.2) that housing in urban India was also dominated by independent dwellings. An estimated 55.77 percent urban households lived in independent houses, 21.86 percent in chawl/bustee type accommodation and 21.74 percent in flat type dwellings.

3.4.2 Majority of urban dwellings were of independent type in most of the states and union territories. This type of dwellings constituted more than 70 percent of the urban dwellings in Kerala (84.03 p.c), Manipur (83.20 p.c), Assam (77.48 p.c), Mizoram (76.40 p.c), Himachal Pradesh (75.71 p.c), Haryana(74.98p.c) and Rajasthan (70.69), 50-70 percent in Andhra Pradesh, Bihar, Gujarat, Jammu & Kashmir, Karnataka, Madhya Pradesh, Orissa, Punjab, Tamil Nadu, Uttar Pradesh, Andaman & Nicobar Islands, Chandigarh,

Delhi and Pondicherry and less than 50 percent in West Bengal (36.75 p.c), Sikkim (31.92 p.c), Maharashtra (30.87 p.c), Nagaland (30.66 p.c) and Goa, Daman & Diu (22.96 p.c).

3.4.3 Chawl/bustee type formed the majority of urban dwellings only in Maharashtra (50.83 p.c). This type dwellings were more in number than independent or flat type dwellings also in Nagaland and Sikkim. The proportion of this type dwellings to urban dwellings was large in Andaman & Nicobar Islands (31.46 p.c), Orissa (30.90 p.c), Karnataka (28.95 p.c), West Bengal (27.30 p.c), Gujarat (25.93 p.c) and Madhya Pradesh (25.83 p.c) and was not small in Andhra Pradesh (16.08 p.c), Uttar Pradesh (14.03 p.c), Tamil Nadu (13.49 p.c), Pondicherry (12.07), Assam (11.92 p.c), Manipur (11.76 p.c), Rajasthan (11.04 p.c), Bihar (10.78 p.c) and Delhi (10.16 p.c).

3.4.4 Flat type formed 68.49 percent of the urban dwellings in Goa, Daman & Diu. This type accounted for more than 30 percent of the urban dwellings also in Chandigarh (45.98 p.c), Pondicherry (36.81 p.c), West Bengal (35.50 p.c), Sikkim (31.70 p.c) and Nagaland (31.53 p.c). Moderately large proportion of flats were reported by most of the states and union territories with the exception of Manipur which reported only 1.32 percent of such dwellings. The next lowest figure of 8.56 percent was reported in Madhya Pradesh.

3.5.1 Latrine facility in rural India : It is seen from table (S.3R) that an estimated 91.41 percent households in rural India had no latrine facility, 2.29 percent used service latrine, 2.18 percent had septic tank latrine, 0.29 percent availed of flush system latrine and 3.83 percent utilised other types of latrine.

3.5.2 <sup>No</sup> Some sort of latrine facility in or around the housing premises appears <sup>preferred by</sup> to have been incompatible with the rural folk in most of the States and Union Territories. The territories which reported sizeable proportion of households using some latrine facility were only Manipur (73.40 p.c), Mizoram (62.72 p.c), Assam (58.59 p.c), Kerala (39.98 p.c) and Goa, Daman & Diu (24.79 p.c). In Manipur 61.69 percent rural households used

other type (some type other than service, septic tank and flush system) latrine, 11.62 percent used service latrine and 0.10 percent used septic tank latrine. In Mizoram, 57.94 percent households had other type latrine, 3.52 percent had septic tank latrine and 1.11 percent had service latrine. In Assam, 42.82 percent households had other type latrine, 10.63 percent had service latrine and 4.95 percent had septic tank latrine. In Kerala, 25.21 percent households used other type latrine, 13.14 percent used septic tank latrine and 1.37 percent used service latrine. In Goa- Daman & Diu 13.41 percent households used other type latrine, 7.84 percent used flush system latrine and 3.54 percent used septic tank latrine. It could be seen from table (S.4) that in the rural sector of these territories, the latrines were built mostly for household exclusive use. At all India level, 5.94 percent of the rural households had latrine for their exclusive use and 2.63 percent households shared the latrine facility.

3.6.1 Latrine facility in Urban India : It is seen from table (S.3U) that in the urban sector there was, perhaps, no such taboo about equipping the housing accommodation with latrine facility. An estimated 63.16 percent households in urban India used some latrine facility ; 18.18 percent had service latrine, 20.67 percent had septic tank latrine, 20.13 percent had flush system latrine and 4.30 percent had other types of latrine.

3.6.2 Majority of urban households had no latrine facility in Pondicherry (66.54 p.c.) Orissa (56.13 p.c.) , Goa-Daman & Diu (52.21 p.c.), and Andhra Pradesh (51.77 P.c.). Urban households with no latrine facility formed 40 to 50 percent in Bihar, Haryana, Karnataka, Madhya Pradesh, Rajasthan and Tamil Nadu .

All India	91.41	2.65	5.94	36.82	36.39	26.79

Such households accounted for 30 to 40 percent households in Gujarat, Himachal Pradesh, Punjab, Uttar Pradesh and Andaman & Nicobar Islands, Urban households falling in the category of households with no latrine facility formed quite a small proportion in Meghalaya (7.62 p.c.), Assam (6.99 p.c.), Nagaland (3.23 p.c.) and Manipur (1.90 p.c.). In this category fell 10 to 30 percent households in the remaining states and union territories.

3.6.3 Service latrine served more than 30 percent urban households in Jammu & Kashmir (65.36 p.c.), Nagaland (51.38 p.c.), Uttar Pradesh (39.31 p.c.), Meghalaya (37.15 p.c.), Assam (36.30 p.c.), Haryana (34.07 p.c.) and Manipur (31.83 p.c.). Septic tank was the latrine type for more than 30 percent urban households in Sikkim (60.22 p.c.), west Bengal (52.91 p.c.), Nagaland (40.03 p.c.), Kerala (38.87 p.c.), Andaman & Nicobar Islands (38.85 p.c.), Bihar (34.09 p.c.) and Assam (32.18 p.c.). Flush system latrine was used by more than 30 percent urban households in Chandigarh (71.00 p.c.), Delhi (49.61 p.c.), Maharashtra (35.57 p.c.) and Karnataka (34.48 p.c.). More than 30 percent households had other types of latrine in Mizoram (76.24 p.c.) and Manipur (57.14 p.c.).

3.6.4 It could be seen from table (S.4) that in urban India, households sharing the latrine with other households out numbered the households having latrine for their exclusive use, the former category forming 36.39 percent and the latter, 26.79 percent. Number of households with latrine for household exclusive use was more than one and a half times the number sharing latrine with other households in Assam, Kerala, Chandigarh and Mizoram. Opposite was the situation observed in Andhra Pradesh, Gujarat, Maharashtra, Manipur, Nagaland, Sikkim, Tamil Nadu and West Bengal.

3.7.1 Distribution of urban households residing in rented houses by rent classes : Percentage distribution of urban households residing in rented houses over five household monthly rent classes is given in table (S.5): During January - December 1983.

18

Table (S.5) : Percentage distribution of households residing in rented houses over household monthly rent classes by state/union territory

Sd

an estimated 17.64 percent rented households in urban India were in the monthly rent class of less than Rs. 20, 33.89 percent in the rent class of Rs. 20-50, 25.25 percent in the rent class of Rs. 50-100, 17.50 percent in the rent class of Rs. 100-250 and 5.22 percent in the rent class of Rs. 250 & above. An estimated 51.53 percent rented households were thus found to be in the monthly rent class of less than Rs. 50 per month.

3.7.2 Percentage of rented households in the lowest rent class of less than Rs. 20 was more than 20 in West Bengal (27.99 percent), Orissa (27.25 percent), Gujarat (24.93 percent), Uttar Pradesh (24.36 percent) and Maharashtra (22.38 percent). Households in the rent class less than Rs. 50 formed more than 50 percent of the rented households in West Bengal (67.74 percent), Uttar Pradesh (60.38 percent), Orissa (58.36 percent), Maharashtra (58.11 percent), Gujarat (57.41 percent), Bihar (56.17 percent) and Madhya Pradesh (54.50 percent). More than 5 percent rented households were found to be in the rent class of Rs. 250 & above in Chandigarh (15.36 percent), Delhi (14.72 percent), Sikkim (9.28 percent), Kerala (7.85 percent), Andaman & Nicobar Islands (7.74 percent), Karnataka (7.71 percent), Goa, Daman & Diu (7.70 percent), Pondicherry (7.70 percent), Tamil Nadu (6.90 percent), Himachal Pradesh (6.61 percent), Assam (6.34 percent), Mizoram (5.33 percent) and Andhra Pradesh (5.14 percent). It may be mentioned that very large proportion of rented households did not report any positive rent in Manipur (45.34 percent) and Himachal Pradesh (14.59 percent).

3.8.1 Distribution of urban households residing in not rented houses by imputed rent classes : Percentage distribution of urban households residing in not rented houses over five household monthly imputed rent classes is given in table (S.6). During January - December 1983, an estimated 2.07 percent not rented households in urban India were in the monthly imputed rent class of less than Rs. 20, 17.52 percent in the rent class of Rs. 20-50, 18.53 percent in the rent class of Rs. 50-100, 24.13 percent in the rent class of Rs. 100-250 and 31.13 percent in the rent class of Rs. 250 & above. It may be noted that whereas 31.13 percent <sup>not rented</sup> /

Table (S.6) : Percentage distribution of households living in not rented houses over monthly imputed rent classes by state/union territory

households were found in the highest rent class, only 5.22 percent rented households were found in the corresponding rent class. Further, an estimated ~~26.24~~<sup>19.59</sup> percent of not rented households were found to be in the imputed rent class of below Rs. 50 as against 51.53 percent of rented households in that monthly rent class.

3.8.2 Percentage of households in the lowest imputed rent class of less than Rs. 20 was more than 20 in Pondicherry (20.05 p.c.). Households in the imputed rent class of less than Rs. 50 formed more than 50 percent of the not rented households also in Pondicherry (54.49 p.c.).\* More than 20 percent not rented households were found to be in the imputed rent class of Rs. 250 & above in Chandigarh (46.12 p.c.), Delhi (41.39 p.c.), Jammu & Kashmir (28.28 p.c.), Haryana (21.95 p.c.), Punjab (21.85 p.c.), Gujarat (21.06 p.c.) and Andaman & Nicobar Islands (20.35 p.c.). It may be mentioned in this connection that large proportion of households residing in not rented houses did not report any positive amount for imputed rent in Manipur (84.80 p.c.), Nagaland (62.08 p.c.), Sikkim (46.90 p.c.), Himachal Pradesh (34.50 p.c.), Bihar (21.48 p.c.), Orissa (16.37 p.c.), Jammu & Kashmir (15.93 p.c.), Assam (13.26 p.c.) and Gujarat (12.49 p.c.).

3.9.1 Extent of tenancy in the urban sector and per capita rental and floor area for urban dwellings : In table (S.7) are presented percentage of urban households in rented houses, average per capita monthly rent (actual rent for rented houses and imputed rent for other houses) and average per capita floor area. At all India level, 37.56 percent of the urban households were found to be tenant households during January - December, 1983. More than 50 percent of urban households were found to be residing in rented houses in Chandigarh (77.38 p.c.), Sikkim (69.43 p.c.) and Nagaland (51.09 p.c.), Percentage of rented households was less than 20 in Kerala (16.30 p.c.), Jammu & Kashmir (14.21 p.c.) and Manipur (4.10 p.c.).

\* However, this percentage was in the range of 40 to 50 in Tamil Nadu (48.01 p.c.), Andhra Pradesh (43.81 p.c.) and Orissa (42.04 p.c.).

Table (S.7) : Percentage of households residing in rented houses, average per capita monthly rent (actual for rented houses and imputed for not rented houses) and average per capita floor area by state/union territory

Urban

Mizoram	27.98	28.21	34.54	5.64
Pondicherry	25.74	16.84	28.91	13.35
All India	37.56	17.36	25.70	7.81

3.9.2

Average per capita monthly rent for rented households was estimated to be Rs. 17.36 at all India level. This value was relatively high in Delhi (Rs. 39.24), Chandigarh (Rs. 33.82), Nagaland (Rs. 29.40), Mizoram (Rs. 28.21), Himachal Pradesh (Rs. 27.71) and Andaman & Nicobar Islands (Rs. 26.03) and comparatively low in Gujarat (Rs. 14.74), Uttar Pradesh (Rs. 13.92), Maharashtra (Rs. 13.88), Madhya Pradesh (Rs. 13.66), Orissa (Rs. 13.40) and Bihar (Rs. 12.41).

3.9.3

Es Estimate of average per capita monthly imputed rent for not rented households was Rs. 25.70 at all India level as against Rs. 17.36 reported for rented households. The per capita rental for not rented households was more than one and a half times the per capita rental reported for the rented households in Gujarat, Jammu & Kashmir, Maharashtra, Punjab, West Bengal, Andaman & Nicobar Islands, Chandigarh, Delhi, Goa, Daman & Diu and Pondicherry. The per capita actual rent was found to be marginally more than the per capita imputed rent only in Andhra Pradesh, Manipur and Tamil Nadu. The average per capita imputed rent reported for not rented households was very high in Chandigarh (Rs. 157.53) and Delhi (Rs. 72.50), relatively high in Jammu & Kashmir (Rs. 41.49), Himachal Pradesh (Rs. 39.98), and Andaman & Nicobar Islands (Rs. 39.14) and relatively low in Madhya Pradesh (Rs. 17.97), Bihar (Rs. 17.03), Rajasthan (Rs. 16.19) and Orissa (Rs. 15.89). *Goa, Daman & Diu (Rs. 39.86)*

3.9.4

Average per capita floor area per urban household was 7.81 square metre at all India level. Per capita floor area was relatively high in Nagaland (20.81 sq.mt.), Manipur (13.56 sq.mt.), Pondicherry (13.35 sq.mt.), Chandigarh (11.93 sq.mt.), *Goa, Daman & Diu (11.47 sq.mt.), Andaman & Nicobar Islands (11.07 sq.mt.)*, Madhya Pradesh (10.97 sq.mt.), Jammu & Kashmir (10.91 sq.mt.), Himachal Pradesh (10.13 sq.mt.) and Kerala (10.03 sq.mt.) and comparatively low in Maharashtra (5.92 sq.mt.), Mizoram (5.64 sq.mt.) and Sikkim (4.10 sq.mt.).

SAMPLING DESIGN AND ESTIMATION PROCEDURE

4.0 The sampling design and estimation procedure adopted for the NSSO 38th round survey on Household Consumer Expenditure is discussed briefly in the following paragraphs.

4.1.1 Stratification : There were 77 agro-economic regions all over the geographical coverage of the NSS round. These regions were formed within states/ union territories by grouping contiguous districts of similar agricultural profile and population density. In Gujarat, however, some districts had been split for the purpose of region formation in consideration of the location of dry areas and the distribution of tribal population in the state. Strata were formed within regions. Each district with less than 1.8 million (1981 census) rural population constituted a single stratum. Districts with more than 1.8 million rural population were divided into two or more strata by grouping contiguous tehsils homogeneous, as far as practicable, with respect to crop pattern and density of rural population so that rural population of each stratum is less than 1.8 million. In the states of Andhra Pradesh, Assam, Orissa and Tamil Nadu, however, districts were taken as strata irrespective of the size of the rural population. The rural portion of each stratum formed a rural stratum.

4.1.2 For stratification in the urban sector, towns had been categorised into four population size classes on the basis of 1981 census population. The classes are (i) below 50,000, (ii) 50,000 to below 2,00,000, (iii) 2,00,000 to below 1,000,000 and (iv) 1,000,000 and above. Urban strata were formed within each sub-region of the Field Operations Division of NSSO which consisted of 1 to 3 contiguous districts. Within a sub-region towns belonging to each population size class formed a stratum. Each town belonging to the fourth population size class (population of 1 million and above), however, constituted a stratum by itself.

4.2 Allocation of sample size : The total number of sample villages/blocks in each state/union territory was allocated to its constituent strata in proportion to their respective 1981 rural/urban population.

4.3.1 Selection of first stage units : For sampling in the rural sector, 1981 census villages <sup>constituted</sup> was the frame. From within each stratum, the allocated number of villages were selected with probability proportional to their 1981 census population with replacement. [In some areas where 1981 census was not undertaken or the available 1981 census frame was found to be defective, the sample villages were selected using 1971 census lists.]

4.3.2 For sampling in the urban sector, the urban frame survey blocks had been used as the frame except for some new towns of 1981 census in which cases the census blocks had been used as the frame. In each urban stratum, the allocated number of sample blocks were selected by the method of simple random sampling without replacement.

4.4 Revenue village selection : When a sample village was found to be not clearly identifiable, one of the following procedures was adopted : (i) all revenue villages contained wholly or partly in the sampled census village were surveyed as one unit and (ii) the revenue village which contained the sampled census village was wholly surveyed.

4.5 Hamlet group/sub-block selection : In case the approximate population of a sample village/block at the time of field investigation is 1200 or more, it was divided into two or more parts of roughly equal population content called hamlet groups/sub-blocks and the survey was confined to only one of them selected at random.

4.6.1 Selection of second stage units : In the rural sector, a sample of 10 households were selected from each sample village/hamlet group circular systematically after arranging all the households in it in the order of their means of livelihood namely (i) self-employed in non-agriculture, (ii) rural labour and (iii) the rest. The households in the means of livelihood class (iii) were arranged within themselves by five classes of the area of land possessed by them before the selection.

4.6.2 In the urban sector, a sample of 10 households were selected from each sample block/sub-block circular systematically after arranging the self-employed households first followed by other households. Within each of these two groups, the households were arranged by five broad per capita expenditure classes before the selection.

4.7.1 Estimation procedure : The following notations were used in the formula for obtaining various estimates.

- s : subscript for stratum
- i : subscript for sample village/block
- j : subscript for sample household
- P : total frame population in the rural sector
- p : population of sample village used for selection
- N : total number of urban blocks in the frame
- n : number of sample villages/blocks available for tabulation
- D : number of hamlet groups/sub-blocks formed
- C : number of census villages in the surveyed revenue village
- H : total number of households listed
- h : number of sample households available for tabulation
- y, x : value of any household character
- Y, X : aggregate of y and x respectively
- R : any ratio of the form Y/X

4.7.2 In the case of Y, X and R, a cap ( $\wedge$ ) placed above the symbol denotes the estimate of the character obtained from the sample.

4.8.1 Estimates of aggregates : The formula for stratum level estimate of the aggregate of 'y' for the rural sector is

$$\hat{Y}_s = \frac{P_s}{n_s} \sum_{i=1}^{n_s} \frac{D_{si}}{C_{si} P_{si}} \frac{H_{si}}{h_{si}} \sum_{j=1}^{h_{si}} y_{sij} \text{ and}$$

the formula for stratum level estimate of the aggregate of 'y' for the urban sector is

$$\hat{Y}_s = \frac{N_s}{n_s} \sum_{i=1}^{n_s} \frac{D_{si} H_{si}}{h_{si}} \sum_{j=1}^{h_{si}} y_{sij}$$

4.8.2 The estimates of aggregates at region and state levels are obtained by summing over the estimates of constituent strata.

4.9 Estimates of ratios : The estimates of aggregates of another household character 'x' are obtained exactly similarly, using the same formulas as above, replacing 'y' by 'x'. The estimate of a ratio  $R = Y/X$  is given  $\hat{R} = \hat{Y} / \hat{X}$ .
