NATIONAL SAMPLE SURVEY ORGANISATION
THIRTY FOURTH ROUND : JULY 1979 - JUNE 1980.

TABLES WITH NOTES ON OWN ACCOUNT TRADING ENTERPRISES
AND NON-DIRECTORY TRADING ESTABLISHMENTS COVERING
SOME DETAILED ASPECTS.

S E C T I O N O N E

I N T R O D U C T I O N

1.1 A survey on small scale enterprises in trade, hotels, restaurants, transport, storage & warehousing and service sector was carried out by the National Sample Survey Organisation in the thirty fourth round of its survey from 1st July 1979 to 30th June 1980 as a follow-up of the first Economic Census which was conducted by the Central Statistical Organisation during the last quarter of 1977 in which some broad information about non-agricultural enterprises of the country were collected.

1.2 The survey in the 34th round of the NSS covered the entire geographical area of the Indian Union except Sikkim, Andaman & Nicobar Islands, Lakshadweep, Dadra & Nagar Haveli and the rural area of Nagaland, Rural areas of tehsils Pal and Samri of district Surguja and tehsils Bijapur, Dantewara, Kota and Narayanpur of district Bastar of Madhya Pradesh, tehsils Rajura, Sironcha and Godh-Chiroli of district Chandrapur and tehsil Melghat of district Amravati of Maharashtra and Ladakh and Kargil districts of Jammu & Kashmir were also not covered.

1.3 The Governments of all the States and Union Territories except Chandigarh participated in the survey by canvassing samples at least of equal size as the central sample in the respective States and Union Territories.

1.4 In the Economic Census, enterprises were classified into two groups namely, (i) own account enterprises (OAE) i.e., enterprises having no hired worker and (ii) establishments i.e., enterprises having at least one hired worker. Establishments having hired workers were further classified into two categories namely, (a) non-directory establishments (NDE) i.e., establishments with total number of workers including household worker(s), if any, 5 or less and annual output/turnover/receipt less than Rs.1,00,000 and (b) directory establishments (DE) i.e., establishments with 6 or more workers including household worker(s), if any, and/or annual output/turnover/receipt Rs.1,00,000 or more. The survey conducted by the NSSO in the thirty fourth round was restricted to non-directory establishments and own account enterprises in trade, hotel & restaurant, transport, storage & warehousing and service sector. The enquiry for the directory establishments was covered by a separate survey conducted by the C.S.O during October 1979 to September 1980. Government and public sector enterprises and those operated for less than 30 days (15 days for seasonal enterprises), which need not be a continuous period, during the last 365 days were kept out of the purview of the survey.

1.5 The basic design for the survey was a two-stage stratified one with enumeration block (EB) formed during the Economic Census as the first stage units (f.s.us) and enterprises as the ultimate units of enumeration. In each sample f.s.u., a sample of own account enterprises and non-directory establishments in trade, hotel and restaurants, transport, storage & warehousing and service sector was selected for the detailed enquiry.

1.6 The activities in trade are covered by NIC major groups 60 to 64 (wholesale trade); 65 to 68 (retail trade) and NIC groups 821 (purchase and sale agents and brokers) and 822 (auctioneers). In addition a few specified activities of free collection for sale of forest and other miscellaneous goods

under agricultural
industry (NIC^a Division 0) were also covered in the survey as trading activity. Site approach was followed to identify the trading enterprises. However the trading enterprises having no fixed location like hawkers etc. were identified through household approach.

1.7 This report is based on data collected in the trade sector through schedule 2.41B in the central sample. It gives some detailed aspects of trading enterprises by industry group, viz. estimated number of enterprises by nature and years of operation, average number of working days during last month, estimated value of items of working capital alongwith peak period requirements of working capital and loan particulars by states/union territories and all-India separately by rural and urban sectors for each enterprise type i.e., OAE-own account enterprises and NDE-non-directory establishments. Section two gives concepts and definitions used in the survey and Section Three gives summary results of the survey. Appendix-I gives statistical tables and Appendix-II gives description of industry groups. Sample design and estimation procedure and facsimile of the enquiry schedule are same as described in Appendices II & IV respectively of report number 346/1. As such those are not repeated here.

^a/ National Industrial Classification (NIC)-1970, issued by CSO.

S E C T I O N T W O

CONCEPTS AND DEFINITIONS

2.0 Some of the important concepts and definitions followed in the survey are given below :

2.1 Enterprise : An enterprise is an undertaking engaged in production and/or distribution of some goods and/or services not for the sole purpose of domestic consumption and carried out by members of the households/institutional body and/or hiring outside labour. An enterprise might be owned and operated by a single household or by several households jointly (on a partnership basis) or by an institutional body.

2.2 Own Account Enterprise : An enterprise which is operated without any hired worker on a fairly regular basis was called an own account enterprise.

2.3 Establishment : An enterprise with at least one hired worker on a regular basis was called an establishment. An establishment with six or more workers (including both household and hired) and/or with annual output/turnover/receipt Rs.1,00,000 or more was termed a directory establishment. On the otherhand, an establishment with less than six workers (including both household and hired) and annual output/turnover/receipt less than Rs.1,00,000 was termed a non-directory establishment.

2.4 Trading enterprises : Trading was defined as an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of goods. The activities of intermediaries who did not actually purchase or sell goods but only arranged purchase and sale of goods and earned a remuneration by way of brokerage and commission were also covered in the trade schedule. Separate and distinct trading units of manufacturing concerns like sales shops of Delhi Cloth Mills, Bombay Dyeing, Bata Shoe etc. were also covered in the trade schedule.

Distributive agencies who undertook trading activity on commission basis were also included. Also the enterprises engaged in activities of (a) free collection for sale of honey (under NIC group 025 or 027), (b) free collection for sale of forest products like gathering of fodder, grass, etc., gathering of wild fruits and leaves and other forest products not elsewhere classified (under NIC groups 052, 053, 054 and 059), (c) free hunting, trapping and game propagation for commercial purposes (under NIC group 040), (d) free collection for sale of prawns, crabs and oysters (under NIC groups 060, 061, 063 and 069) and (e) free collection for sale of waste-paper, rags, ash, coal etc. (under NIC group X10) were covered in the survey as trading enterprises provided such enterprises engaged at least one hired worker for the purpose. In short, enterprises engaged in activities covered by NIC major groups 60 to 68 (wholesale and retail trade), NIC groups 821 (purchase and sale agents and brokers), 822 (auctioneering), 025, 040, 052-061, 063, 069 and X10 were treated as trading enterprises. Sale of agricultural produce and manufactured products directly by the producer; agency activities of intermediaries in stock exchange, insurance, real estate, state lotteries and other financial matters and hiring out business of durable goods were not treated as trading activity.

2.5 Mixed activity : For enterprises pursuing activities relating to any other sector in addition to trading, the trading part was treated as a separate enterprise if it could be distinguished in terms of employment, expenses, earnings etc. But if the activities could not be distinguished from one another, the whole enterprise was treated as trading enterprise only when the trading part was considered as major activity. Major activity was determined on the basis of approximate value of output/receipt/turnover of different activities pursued. In the absence of such information, net revenue derived or the number of persons engaged in different activities or the time spent on different activities, whichever information was available was used to decide the major activity. In case of mixed activity of manufacturing and trade such as handloom weavers, sweetmeat shops etc. by convention manufacturing was taken as the major activity when information on trading part could not be separated out. Pan shop was treated as a trading enterprise.

2.6 Nature of trade : Trading enterprises were classified into 5 types as given below :

(i) Wholesale trade : In the wholesale trading enterprise, goods are generally brought from the producer and sold to the retailer. A wholesaler sells his goods to other wholesalers or users in bulk for further processing in manufacturing enterprise or sells in bulk to commercial, institutional, professional or other consumers.

(ii) Retail trade : In the retail trade, goods are brought from the wholesalers or dealers and sold to consumers. The retail trader is intermediary between a wholesaler and consumers or users.

(iii) Wholesale and retail : Trading enterprises performing both wholesale and retail trading activity were classified under 'wholesale and retail'.

(iv) Commission agents : Brokers and commission agents in the trading activity who did not directly buy or sell goods but only arranged buying and selling on behalf of other concern and earned a remuneration by way of brokerage or commission were classified under 'commission agents'.

(v) Others : Enterprises performing any other trading activity were classified under 'others'.

2.7 Number of years of operation : This was the number of completed years over which the enterprise had been carrying out its activity at the same site. Number of years of operation was recorded as '00' (Zero) if the enterprise activity was carried out for less than one year and '99' if the activity was carried out for more than 99 years. For enterprises having no fixed location, it meant number of completed years from when the owner had stated the enterprise.

2.8 Nature of operation : Nature of operation of an enterprise was either perennial or seasonal or casual depending upon whether the enterprise activity was carried out more or less regularly throughout the year or during particular season(s) of the year or only occasionally (but for at least 30 days during last 365 days) respectively.

2.9 Average number of working days during last month : In addition to the number of days on which the enterprise was open for sales, the days on which other activities like purchases, accounting, stock-taking, and repair and maintenance had taken place were also included in calculating the number of working days during last month. While such calculation, the intensity of work on a particular day was ignored.

2.10.1 Working Capital : Total value of goods and materials and stores of the enterprise plus amount receivable by the enterprise on the date of survey minus amount payable by the enterprise on the date of survey was considered as working capital. The three components of working capital are described below :

(i) Stock of commodities and other materials : This was the total value of goods and materials and stores of the enterprise as on the date of survey which was calculated at cost price irrespective of whether paid in cash or purchased/acquired on credit of all goods for trading purposes and packing materials and other stores.

(ii) Amount receivable : This was the amount receivable by the enterprise on the date of survey on account of goods sold on credit.

(iii) Amount payable : This was the amount payable by the enterprise on the date of survey for goods purchased on credit.

2.10.2 Peak period requirements of working capital : In almost all enterprises, there are usually a lean period and a peak period of trading activity. Working capital requirements of the enterprise during the peak period of the year was treated as peak period requirements of working capital.

2.11 Amount of loan outstanding : Only cash loans taken from various agencies were considered. The balance of loan (excluding interest) which has still outstanding on the date of survey was considered as outstanding loan.

2.12 Source of loan : The following were the six sources of loan :

(i) Central and state term lending institutions : This covered all financial institutions providing long term loans like Industrial Finance Corporation, Development Banks, Industrial Credit and Investment Corporation and other Industrial and Financial Corporations set up by the central and the state governments.

(ii) Government : Various government departments like Revenue Deptt., Agriculture Deptt., Industries Deptt. etc. which advanced loans to the enterprises were included under 'government'.

(iii) Public Sector Banks : This included all nationalised banks as well as the subsidiary banks of the State Bank of India.

(iv) Co-operatives : All types of co-operative societies like primary co-operative credit society, marketing societies, district or Central Co-operative banks and land mortgage banks and any other commercial banks were included under this category.

(v) Other institutional agencies : This included any other institutional agencies like LIC, Chit Fund.

(vi) Others : Any other sources of loan like money lenders, friends, relatives and any other non-institutional sources were classified as 'others'.

2.13 Reference Period : The reference period for average number of working days was the last month and for working capital and amount of loan outstanding, it was the date of survey.

S E C T I O N T H R E ES U M M A R Y R E S U L T S

3.1 Sample size : Table (1) below presents the sample sizes separately for the rural and urban sectors by trade class and enterprise type - own account enterprise (OAE) and non-directory establishment (NDE) at the all-india level. These sample sizes are relevant for the estimates presented in Tables (2) to (5) of the section.

Table (1) : Number of sample enumeration blocks and enterprises surveyed by sector, trade class and enterprise type, all india (1979-80)

number of sample enumeration blocks : (a) rural - 6661
(b) urban - 10662

trade class (industry group)	no. of sample enterprises			
	rural		urban	
(1)	OAE (2)	NDE (3)	OAE (4)	NDE (5)
1. Whole sale trade (01-12)	207	187	858	821
2. retail trade (13-24)	15048	5100	23954	15893
3. purchase and sale agents, brokers and auctioneers (25)	131	140	707	1173
4. free collection for sale (26-27) ^{a/}	-	84	-	233
5. total	15386	5511	25519	18120

3.2 Totals in tables (2), (3) and (5) may differ marginally from the figures obtained by adding the corresponding individual figures because of rounding errors.

^{a/} OAEs engaged in 'free collection for sale' were out of survey coverage.

3.3 Table (2) below presents estimated number of trading enterprises by sector, years of operation group and trade class at all-India level. It may be seen from the table that out of about 60 lakh trading enterprises in the country, most of the enterprises i.e. about 25 lakh enterprises (43%) were in the years of operation group : 1-5 i.e. 43% of the enterprises had completed, on the date of survey, their trading activity for at least one year but at most 5 years. It is also seen from the table that about 8 lakh enterprises (viz.13%) had not even completed one year of trading activity on the date of survey.

3.4 Table (3) presents estimated number of enterprises at all-India level by sector, nature of operation and trade class. It is seen from the table that most of the trading enterprises were perennial in nature in each sector. Out of 60 lakh trading enterprises at all-India level, about 56 lakh (viz. about 95%) enterprises were perennial. In the rural sector, 94% of the enterprises were perennial and the corresponding figure for urban sector is about 96%.

Out of 60 lakh enterprises, about 2 lakh (3%) enterprises were seasonal enterprises and about ^{51 thousand} ~~1 lakh~~ (1%) enterprises were 'casual' at all-India level.

Table (3) : Estimated number of trading enterprises by sector, trade class and nature of operation, all-India (1979-80).

3.5 Table (4) gives per enterprise estimates of working capital and peak period requirements of working capital by sector, enterprise type and trade class at all-India level. Per enterprise estimates of working capital and peak period requirements of working capital at all-India level were estimated as Rs.2600/- and Rs.4900/- respectively. That is peak period requirements of working capital was about twice the estimate of working capital. Per enterprise estimates of both working capital and peak period requirements of working capital were more for enterprises located in urban areas than those located in rural areas. It may be seen from the table that, per enterprise estimates of working capital were more for NDEs than for OAEs for each trade class in both the sectors except for wholesale trading activity where per enterprise estimates were more for OAEs than NDEs. It is also seen that mostly, as expected, per enterprise estimates of working capital and requirements of working capital were highest for wholesale trading enterprises than any other trade class.

Table (4) : Per enterprise estimates of working capital and peak period requirements of working capital by sector, enterprise type and trade class, all-India (1979-80).

3.6 Table (5) below presents percentage of loan outstanding by source of loan and trade class at all-India level. It is seen that out of about Rs.224 crores loan outstanding on the date of survey, about Rs.189 crores (i.e. 84%) were outstanding with retail trading enterprises. Three main sources of outstanding loan were 'others', public sector banks and co-operatives, in each sector. Out of Rs.224 crores loan outstanding on the date of survey, percentage shares of outstanding loan by the above three sources were 47%, 27% and 16% respectively. That is about 90% of the outstanding loan was taken from either of these three sources.

Table (5) : Percentage of loan outstanding by trade class and source of loan, all-India (1979-80)
