SECTION ONE  
INTRODUCTION

1.0 Under its quinquennial work programme, the National Sample Survey Organisation (NSSO) has been conducting enquiries on Household Consumer Expenditure once every five year. The third quinquennial survey on household consumer expenditure was carried out in the NSS 38th round (1983). To maintain the continuity of survey data on consumer expenditure for constructing a time series, it has been decided to carry out the enquiry in every NSS round in a thin sample in addition to the quinquennial large scale surveys. The NSS 42nd round survey was the first ~~in~~ survey of the survey series outside the quinquennial surveys. While the basic information collected in the schedule was the same, the volume of the schedule had been effectively reduced by way of deletion of some auxiliary blocks of information. The schedule was canvassed in two households in each sample village and urban block with a reference period of 30 days only.

1.1. In this report, the survey results are being presented for the thirteen states and one Union Territory only, for both the rural and urban sectors. This is the first report being prepared with the results obtained from the survey data on NSS 42nd round enquiry on consumer expenditure. This report contains results on household size, quantity and value of consumption of cereals, consumer expenditure on broad groups of items, average monthly per capita total consumption expenditure and distribution of households by house category.

1.3 Survey period and reporting period : The field work of the 42nd round started in July 1986 and continued upto June 1987, covering a period of one complete year. The reference period for collection of data on consumer expenditure was 30 days preceding the date of survey. The estimates presented in the report, therefore, broadly relate to the period July 1986 to June 1987.

1.4 Survey coverage : The geographical coverage of the survey was the entire Indian Union excluding Ladakh and Kargil districts of Jammu & Kashmir, rural areas of Nagaland and urban areas of Dadra & Nagar Haveli.

1.5 Sample size : The survey covered about twelve thousand four hundred sixtyone households spread over 4503 villages and 2121 urban blocks for the survey results presented for the fourteen states in this report.

1.6 Participation of states : In the NSS 42nd round, all the states and Union Territories (included in the geographical coverage) except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep, participated in the survey on at least equal matching basis. The results presented in this report are, however, based on the central sample data only.

1.7 Contents of the report : Results of the consumer expenditure survey of the NSS 42nd round relating fourteen states and union territories have been presented in the Appendix of this report. Other sections of the report contain the concepts and definitions, explanatory notes on the tables presented, sampling design and estimation procedure and a summary of findings.

Section Two  
CONCEPTS AND DEFINITIONS

2.0 The concepts and definitions followed in the consumer expenditure enquiries continue to remain broadly the same as in earlier NSS rounds. Some of these concepts and definitions are described below.

2.1 Household : A group of persons normally living together and taking food from a common kitchen constitute a household. A boarding house, a hostel or a hotel is treated as a cluster of households, where each individual boarder (with his dependents and guests) forms a household. Households fed directly by some institutional bodies such as those in prisons, police quarters, cantonments, hospitals, asylums, relief camps are, however, excluded from the scope of the survey. Floating population having no normal place of residence and foreign nationals' households are also excluded.

2.2 Household members : Any person who usually lives and takes the principal meal with the household is considered a member of the household.

2.3 Household size : The total number of members (as defined above) in a household is considered to be the size of the household.

2.4 Household Consumer Expenditure : Consumer expenditure comprises of all expenditures incurred by the household on domestic accounts including the consumption of home grown products or transfer receipts, gifts and charities, loans etc. While consumption out of transfer receipts is included, the transfer payments of all kinds (loans, gifts, charities etc.) are excluded. Thus, the total consumption of food related to the actual consumption made by the normally resident members (including members on temporary stay aways) and guests. This also include consumption of food items in the ceremonies performed in the household during the reference period.

2.5 Reference period : The reference period for collection of data on all items of consumer expenditure was last 30 days (ending on the day preceding the date of enquiry).

### Section Three

#### EXPLANATORY NOTES ON TABLES

3.0 The following four tables are presented in the report :

- (i) Table series 1 give percentage distribution of estimated number of households and persons and average number of persons per household for each monthly per capita expenditure class for all rural and urban households.
- (ii) Table series 2 give quantity and value of consumption of cereals, gram and cereal substitutes per person for a period of 30 days for each monthly per capita expenditure class.
- (iii) Table series 3 provide value (Rs.0.00) of consumption per person by broad groups of items for each monthly per capita expenditure class.
- (iv) Table series 4 give percentage distribution of households over monthly per capita expenditure class by house category.

3.1 Number of sample villages/blocks allotted and surveyed for the fourteen states presented in this report are shown :

TABLE Sc NUMBER OF SAMPLE VILLAGES/BLOCKS ALLOTTED AND SURVEYED BY STATE/U.T.

state/union territory	number of samples allotted		number of samples surveied	
	villages	blocks	villages	blocks
(1)	(2)	(3)	(4)	(5)
1 Assam	368	120	368	119
2 Bihar	816	216	798	211
3 Manipur	120	72	120	72
4 Meghalaya	128	48	124	45
5 Mizoram	112	48	112	48
6 Nagaland	-	32	-	32
7 Orissa	368	120	360	120
8 Rajasthan	368	176	368	176
9 Sikkim	40	24	39	23
10 Tamil Nadu	480	432	480	432
11 Tripura	208	48	157	36
12 Uttar Pradesh	1064	456	1062	452
13 West Bengal	520	352	499	339
14 Pondicherry	16	16	16	16

3.2 Monthly per capita expenditure class . The households were classified according to the following monthly per capita expenditure classes. The expenditure classes (in rupees), have been arranged in ascending order of their magnitudes. The reported expenditure are grouped into the following 14 classes :-

srl. no.	monthly per capita expenditure (MPCE) class (in rupees)	srl. no.	monthly per capita expenditure (MPCE) class (in rupees)
(1)	(2)	(1)	(2)
1.	0 - 30	8.	100 - 125
2.	30 - 40	9.	125 - 150
3.	40 - 50	10.	150 - 200
4.	50 - 60	11.	200 - 250
5.	60 - 70	12.	250 - 300
6.	70 - 85	13.	300 & above
7.	85 - 100	14.	all expenditure class

Note : The expenditure groups 0-30, 30-40 etc. stand for Rs. 0 to less than Rs.30/-, rupees 30/- to less than Rs.40/-, etc. and so on.

3.3 Table numbering : For convenience of reference, the table numbers have been coded - the digit to the left of the decimal point refer to the nature of information and the digit to the right refer to the state/union territory, followed by R for rural tables and U for urban tables.

The code numbers assigned to the states/union territories are as follows :

0 All India	16 Nagaland*
1 Andhra Pradesh	17 Orissa*
2 Arunachal Pradesh	18 Punjab
3 Assam*	19 Rajasthan*
4 Bihar*	20 Sikkim*
5 Gujarat	21 Tamil Nadu*
6 Haryana	22 Tripura *
7 Himachal Pradesh	23 Uttar Pradesh*
8 Jammu & Kashmir	24 West Bengal*
9 Karnataka	25 Andaman & Nicobar Island
10 Kerala	26 Chandigarh
11 Madhya Pradesh	27 Dadra & Nagar Haveli
12 Maharashtra	28 Delhi
13 Manipur*	29 Goa, Daman & Diu
14 Meghalaya*	30 Lakshadweep
15 Mizoram*	31 Pondicherry*

---

\* Results relating to the states/union territories with star (\*) mark have been presented in the report.

## Section Four

### SAMPLING DESIGN AND ESTIMATION PROCEDURE

Wood

4.0 Sampling Design : The sampling design adopted in the survey was a stratified two stage, one with census villages in rural areas and NSSO urban frame survey blocks in the urban areas as the first stage units and households as the second stage units. The sample villages were selected with probability proportional to the size and with replacement in the form of two independent interpenetrating samples (INPS). Sample blocks were selected with equal probability also in the form of two INFS. The sample households in the second stage (two from each first stage unit) were selected circular systematically after arranging the households of the first stage units in a specified manner.

4.1 Survey period and sub-round formation : The survey was started in the month of July 1986 and was completed in June 1987. The entire survey period of one year was divided into four sub-rounds each of three months duration coinciding with the four agricultural seasons. The four sub-round periods were :

sub-round 1	:	July, 1986	-	September 1986
sub-round 2	:	October 1986	-	December 1986
sub-round 3	:	January 1986	-	March 1987
sub-round 4	:	April 1987	-	June 1987

The sample units were equally distributed over the four sub-rounds in such a manner so as to provide equally valid estimates for each of the related sub-round period. The averages based on the pooled data, taking all the four sub-rounds together, would be free from the effect of seasonality.

4.2 Estimation procedure. The estimation procedure adopted in 3<sup>rd</sup> round is based on weighted sum of the sample values. Denoting by  $\bar{Y}_s$ , the unbiased estimate of  $Y_s$  (the state total of any variate) it is given by -

$$\bar{Y}_s = \sum_s \frac{P_s}{n_s} \sum_{i=1}^{n_s} \frac{D_{si}}{\frac{c_{si}}{p_{si}}} \frac{H_{si}}{h_{si}} \sum_{j=1}^{h_{si}} y_{sij} \dots\dots\dots (1)$$

for the rural sector, and

$$\bar{Y}_s = \sum_s \frac{N_s}{n_s} \sum_{i=1}^{n_s} D_{si} \frac{H_{si}}{h_{si}} \sum_{j=1}^{h_{si}} y_{sij} \dots\dots\dots (2)$$

for the urban sector where

s, i and j are the suffixes for stratum village/urban block and household respectively.

$P_s$ ,  $N_s$  and  $n_s$  give the stratum values of population; number of villages/blocks in frame and the number of sample villages/blocks respectively.

$D_{si}$ ,  $c_{si}$ ,  $p_{si}$  stand respectively for, number of hamlet groups/sub-block formed, number of census villages contained in a large revenue village actually surveyed and population of the sample village;

$H_{si}$  and  $h_{si}$  stand for the total number of households listed and number of sample households and finally  $y_{sij}$  is the observed value of the variate for a sample household. Estimates of ratio of two characteristics is given by the ratio of the estimates of their aggregates.

---

Section Five

SUMMARY OF FINDINGS

5.0 In this section some important findings of the survey have been presented. The results have been presented in respect of the states/union territory of Assam, Bihar, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Rajasthan, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh, West Bengal and Pondicherry. The observations made in this section, however, relate to the results for the states of Assam, Bihar, Orissa, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

5.1 Average size of a household : The statement S-1 presented the average number of persons per household as observed in the 42nd & 38th rounds of NSS for the rural and urban sectors. From the statement it is observed that the average size of a household in rural sector is above 5.00 in almost all the states except the states of Orissa (4.96) and Tamil Nadu (4.25). The average household size is the lowest in Tamil Nadu in both the rounds. comparatively lower household size is observed in the urban areas. A household in urban West Bengal has one person less, on an average, than an average household in the rural areas of the state.

STATEMENT S-1 : AVERAGE NUMBER OF PERSONS PER HOUSEHOLD

state (1)	all India rural		all India urban	
	42nd round (2)	38th round (3)	42nd round (4)	38th round (5)
Assam	5.68	5.40	4.71	4.71
Bihar	5.59	5.29	5.19	5.02
Orissa	4.96	5.00	4.59	4.63
Rajasthan	5.78	5.53	5.00	5.27
Tamil Nadu	4.25	4.35	4.44	4.60
Uttar Pradesh	5.37	5.33	4.99	5.16
West Bengal	5.41	5.33	4.38	4.51

5.2 Distribution of population by monthly per capita expenditure (MPCE) class and average MPCE ; The per thousand distribution of persons for seven major states is shown by MPCE class in Statements S2 and S3 for the rural and urban areas respectively. Even though the average MPCE in the rural areas of Assam, Tamil Nadu, Uttar Pradesh and West Bengal is almost of the same orders of Rs.140/- the distribution of population over MPCE classes exhibit quite diverse pattern. While the average MPCE of rural Bihar and Orissa is about 25 rupees less, it is 18 rupees higher than that for those four states. The per thousand proportion of population having MPCE below Rs.100/- are 238, 274, 292, 368, 393, 474 and 522 for Assam, West Bengal, Rajasthan, Tamil Nadu, Uttar Pradesh, Bihar and Orissa respectively. Rajasthan has the largest proportion of 230 per thousand in the open MPCE class of Rs.200/- and above, and Orissa with only 81 per thousand in the class has the lowest proportion. For the urban areas, Uttar Pradesh has the minimum MPCE of Rs.188/- with the highest no. of persons per thousand of 2342 having MPCE of less than Rs.100/-. The highest MPCE of Rs.243/- has been reported from West Bengal followed by Rajasthan with the average MPCE of Rs.229.46. Orissa, Tamil Nadu and Assam have the respective MPCE between Rs.217/- to 220/-. The reported MPCE for Bihar and Uttar Pradesh are below Rs.200/-. In the open MPCE class of Rs.300/- and above, West Bengal with the level of 248 per thousand tops the list and Uttar Pradesh with only 138 persons per thousand in that MPCE group falls at the other end.

STATEMENT - 32 : PER THOUSAND DISTRIBUTION OF PERSONS BY MONTHLY  
PER CAPITA EXPENDITURE CLASS IN RURAL AREAS

monthly per capita expenditure class (Rs.)	state							(8)

Monthly per capita consumer expenditure	219.76	191.82	216.94	229.46	218.46	188.41	242.62

5.3 Quantity of cereals consumed : Cereals constitute the major part of food consumed but the composition of the constituent items of cereals vary from state to state. While any of cereals listed in Statement - S4 provides almost the same amount of energy units per unit quantity, there is wide variation in their price (value per unit quantity). In statements S4 and S5 the average quantity and the respective value of different items of cereals consumed per capita per month (MPC) are shown for the rural and urban areas of seven states. Relatively higher quantity of cereals is consumed in both rural and urban areas of Rajasthan and Orissa. Tamil Nadu on the other hand, has the lowest quantity of MPC of cereals in both the sectors. While rice is the major cereal for Assam, Bihar, Orissa, Tamil Nadu and West Bengal, wheat claims the position in Rajasthan and Uttar Pradesh. Though in the rice consuming states only a small amount of wheat is also taken in the rural areas, more than 25 per cent of the total cereals consumed in urban West Bengal is supplemented by wheat. Similarly, in rural Uttar Pradesh, a good quantity of rice is also consumed by the people. On the other hand, rice is rarely consumed in Rajasthan in the rural area of the state, nearly 20 per cent of the total cereal consumption is supplemented by bajra. In Tamil Nadu and Rajasthan, both in rural and urban areas, the respective major cereal covers the major part and only a very small portion is supplemented by other cereals.

5.4 Value of cereals consumed In rice consuming states, the value of cereals consumed is relatively higher. Even though Tamil Nadu has the lowest MPC consumption of cereals (quantity), the corresponding value is higher than those for Uttar Pradesh and Rajasthan, for rural as well as urban areas. Similarly, among the eastern states of Assam, Bihar and Orissa, the total MPC consumption of cereals (quantity) is the lowest for Assam and the highest for Orissa, both in rural and urban areas but the corresponding value is the highest in urban Assam and they are very close for all the three states in the rural areas. The MPC value of cereals consumed comes out to be the lowest for Uttar Pradesh in both the rural and urban sectors. Rajasthan with the highest MPC consumption of cereals (quantity) has low MPC expenditure on cereals which is only higher than that of Uttar Pradesh, in the rural and urban sectors.

STATEMENT . 34 : QUANTITY AND VALUE OF CONSUMPTION OF CEREALS  
PER PERSON FOR A PERIOD OF 30 DAYS BY STATE  
IN RURAL AREAS

item	quantity (0.00Kg.)/Assam Value (Rs.0.00)	state						West Bengal
		Bihar	Orissa	Rajasthan	Tamil Nadu	Uttar Pradesh		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
rice	quantity	12.55	8.99	14.37	0.35	9.49	4.66	13.88
	value	44.39	31.54	42.95	1.42	33.58	13.13	49.11
wheat	quantity	0.69	5.30	0.76	11.18	0.27	9.87	1.49
	value	1.83	13.06	2.14	23.70	0.77	18.78	3.83
jowar	quantity	0.00	0.01	0.02	0.40	0.69	0.18	-
	value	0.01	0.03	0.02	0.77	1.50	0.27	-
bajra	quantity	-	-	0.02	3.14	0.66	0.23	-
	value	-	-	0.03	6.53	1.37	0.36	-
maize	quantity	-	0.83	0.02	1.16	-	0.37	0.04
	value	-	1.74	0.04	2.38	-	0.60	0.08
total cereals	quantity	13.24	15.25	16.02	16.69	12.27	15.48	15.41
	value	46.24	46.57	46.37	35.59	39.58	33.37	53.03

It is observed that while total quantity of consumption of cereals in both rural and urban Rajasthan as obtained from NSS 42nd round survey remains almost the same as that of the NSS 38th round, the consumption of wheat has increased by 3.58 kg. in rural areas and 1.47 kg. in urban areas. On the other hand, the consumption of bajra has decreased by 2.30 kg. in rural areas and 1.05 kg. in urban areas indicating that the consumption of bajra has been replaced by the consumption of wheat.

STATEMENT 3-5 : QUANTITY AND VALUE OF CONSUMPTION OF CEREALS  
PER PERSON FOR A PERIOD OF 30 DAYS BY STATE  
IN URBAN AREAS

5.5 Comparison of the results of 42nd round with the results of 38th round The statement S6 shows the average quantity of cereals consumed per capita per month obtained from the survey results of 42nd round along with those of the 38th round of NSS. From the statement S6, it is observed that the average MPC quantity of cereal consumption in 42nd round of NSS, for both rural and urban sectors of the seven states under report, are of the same order. Some differences, however, exist in the composition of the different items of cereals constituting the cereal consumption basket.

5.6 Pattern of consumer expenditure : The statements 3-7 and 3-8 show the average monthly per capita consumer expenditure distributed over 18 broad groups of items. Food items constitute the major part of consumer expenditure in the both rural and the urban areas of the seven states. Relative higher expenditure on food items is reported in Assam, Rajasthan and West Bengal for both rural and urban areas. In the rural areas, the consumer expenditure on food vary from Rs.79.19 (Orissa) to Rs.103.67 (Rajasthan). In urban areas, the range of expenditure is Rs.111.75 (Uttar Pradesh) to Rs.139.77 (Rajasthan). Relatively higher consumer expenditure on non-food items are reported in rural areas of Rajasthan (Rs.53.57) and Uttar Pradesh (Rs.51.53) and in urban areas of West Bengal (Rs.103.06), Tamil Nadu (Rs.94.01) and Rajasthan (Rs.89.69). So far as food consumption is concerned, the tables clearly bring out the consumers' preference of food in different regions. For example, in the rice eating states of the eastern region viz. Assam, Orissa and West Bengal, expenditure on meat, egg and fish and on vegetables are more. Uttar Pradesh and Bihar, on the other hand, spend more on pulses and Rajasthan shows quite high amount of expenditure on milk and milk products and on sugar. Expenditure on beverage and refreshments which includes the value of cooked meals purchased is found to be the highest in Tamil Nadu and it is much above the corresponding expenditure in other states, both in rural and urban areas.

**5.7 Type of structure and type of dwelling units :** From the statement S-9, it is observed that the usual pattern of housing structure in rural areas is of katcha type, whereas in urban areas the structure type is predominantly of pucca nature. The structure type - semi-pucca occupies the second position in the rural areas as well as in the urban areas with the exception of ~~xxxxxx~~ Orissa, katcha house occupies the second position. Considering the distribution of households over the types of dwelling units, it is found that the households usually have a preference for independent house in both rural and urban areas. A large proportion of households in the rural areas are living in chawl/bustee, whereas in the urban areas quite a large proportion of households are living in flats. However, there are some exceptions. For a large number of households in Assam and West Bengal in urban areas are found to dwell in chawl/bustee.

**STATEMENT 3-9: PER THOUSAND DISTRIBUTION OF HOUSEHOLDS BY TYPE OF HOUSE STRUCTURE, TYPE OF DWELLING UNIT BY STATE IN RURAL AND URBAN AREAS**
