प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के अखिल भारत रोजगार एवं बेरोजगारी के सर्वेक्षण राष्ट्रीय तथा राज्य स्तर के श्रम बाजार आंकड़ों के प्रमुख स्रोत हैं। इन सर्वेक्षणों से तैयार किए गए राष्ट्रीय तथा राज्य/संघ राज्यक्षेत्र स्तर के श्रम-बल संकेतक योजना तथा नीति-निर्माण संबंधी कार्यों के लिए महत्वपूर्ण इनपुट हैं तथा अनेक अन्य उपयोगकर्ताओं/शोधकर्ताओं के द्वारा भी प्रयोग में लाए जाते हैं। बड़े प्रतिदर्श परिवारों के साथ रोजगार तथा बेरोजगारी के बारे में एनएसएस के सर्वेक्षण 27वें दौर (अक्टूबर 1972 से सितम्बर 1973) के आगे से पंचवर्षीय आधार पर आयोजित किए जा रहे हैं। एनएसएसओ द्वारा अभी तक ऐसे कुल नौ सर्वेक्षण किये जा चुके हैं।

2. एनएसएसओ द्वारा सर्वेक्षित प्रतिदर्शों को पारम्परिक रूप से 'केन्द्रीय प्रतिदर्श' कहा जाता है। अधिकांश राज्यों ने भी 'राज्य प्रतिदर्श' के तहत बराबर के अथवा अपेक्षाकृत बड़े प्रतिदर्श आकारों के लिए यह सर्वेक्षण किया है। केन्द्रीय प्रतिदर्शों से एकत्र किए गए आंकड़ों से रोजगार एवं बेरोजगारी के बारे में प्राप्त परिणामों को एनएसएसओ अनेक रिपोर्टों के रूप में प्रकाशित करता है। 'भारत में रोजगार तथा बेरोजगारी के प्रमुख संकेतक, 2011-12' दस्तावेज जून, 2013 में जारी किये गए तथा जून, 2013 में ही यानी क्षेत्र कार्य समाप्त होने के एक वर्ष के अंदर इकाई स्तर के आंकड़े भी जारी कर दिए गए। प्रमुख संकेतकों के उक्त दस्तावेज के अतिरिक्त, एनएसएस के 68वें दौर के आधार पर रोजगार तथा बेरोजगारी के अलग-अलग पहलुओं पर सात विस्तृत रिपोर्टें जारी करने की योजना बनाई गई है। इस श्रृंखला की पहली छह रिपोर्टें 'भारत में रोजगार एवं बेरोजगारी की स्थिति', 'भारत में अनौपचारिक क्षेत्र एवं रोजगार की स्थितियाँ', 'घरेलू कार्यों के साथ-साथ विनिर्दिष्ट क्रियाकलापों में महिलाओं की भागीदारी', 'भारत में सामाजिक वर्गों के बीच रोजगार एवं बेरोजगारी की स्थिति' और 'भारत के महानगरों एवं नगरों में रोजगार और बेरोजगारी की स्थिति' तथा 'भारत में शिक्षा एवं व्यावसायिक प्रशिक्षण की स्थिति' पहले ही प्रकाशित की जा चुकी हैं। वर्तमान रिपोर्ट 'भारत में प्रमुख धार्मिक समूहों में रोजगार तथा बेरोजगारी की स्थिति', इस श्रृंखला में सातवीं एवं अन्तिम रिपोर्ट है।

3. यह रिपोर्ट प्रमुख धार्मिक समूहों अर्थात् हिन्दू, इस्लाम, इसाई, सिख तथा अखिल भारत और राज्य/संघ राज्य स्तर पर "अन्य" के रूप में संदर्भित शेष (जैन, बौद्ध, यहूदी और अन्य) धर्म के व्यक्तियों में रोजगार और बेरोजगारी तथा अन्य विशेषताओं के कुछ मुख्य संकेतकों पर सूचना प्रदान करती है। इस रिपोर्ट में तीन अध्याय और चार परिशिष्ट हैं। अनुमानों से संबंधित मुख्य निष्कर्ष इस रिपोर्ट के तीसरे अध्याय में प्रस्तुत किए गए हैं।

4. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण-साधन विकसित करने तथा रिपोर्ट तैयार करने का कार्य किया। क्षेत्र संकार्य प्रभाग (एफओडी) ने केन्द्रीय प्रतिदर्श संबंधित क्षेत्र कार्य किया। आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) ने किया। समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया।

5. में सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 68वें दौर के कार्य दल एवं राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ। मैं इस रिपोर्ट को तैयार करने में शामिल एन.एस.एस.ओ. के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ।

6. मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, अभिन्यास अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है। पाठक की टिप्पणियों हेतु रिपोर्ट के अन्त में फीडबैक फार्म संलग्न है।

PREFACE

The all India Employment and Unemployment Surveys conducted by National Sample Survey Office (NSSO) are the primary source of labour market data at the National and State level. The labour force indicators at National and State/UT level, generated from these surveys, provide critical inputs required for planning and policy formulation and also used extensively by other users/researchers. NSS surveys on Employment and Unemployment, with large sample of households, are conducted quinquennially from 27th round (October 1972 – September 1973) onwards. Nine such surveys have been conducted by NSSO so far.

2. The sample surveyed by the NSSO is traditionally referred to as the 'Central Sample'. Most of the States have also conducted this survey for an equal or larger sample size under the 'State Sample'. The results of the Employment and Unemployment surveys, generated from the Central Sample data, are brought out by NSSO in the form of a number of reports. The document 'Key Indicators of Employment and Unemployment in India, 2011-12' was brought out in June 2013 and unit level data were also released in June, 2013, i.e., within one year of completion of the field work. Apart from the above document on key indicators, seven detailed reports are planned to be released on varied aspects of Employment and Unemployment based on NSS 68th round data. The first six reports in this series, viz., 'Employment and Unemployment Situation in India', 'Informal Sector and Conditions of Employment in India', 'Participation of Women in Specified Activities along with Domestic Duties', 'Employment and Unemployment situation among social groups in India', 'Employment and Unemployment situation in cities and towns in India' and 'Status of Education and Vocational Training in India' have already been published. The present report, 'Employment and Unemployment Situation among Major Religious Groups in India' is the seventh and last in this series.

3. This report provides information on some key indicators of employment and unemployment and other features among persons of major religious groups viz., Hinduism, Islam, Christianity, Sikhism and the rest (Jainism, Buddhism, Zoroastrianism and others) referred to as 'Others' at all-India and State/UT level. This report contains three chapters and four appendices. The main findings, relating to the estimates given in this report, are presented in Chapter Three.

4. The Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) in respect of central sample. The data processing and tabulation work was done by the Data Processing Division (DPD). The Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

5. I am extremely grateful to the Chairman and Members of the Working Group for NSS 68th round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

6. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated. A feedback form is attached at the end of the report for comments of the reader.

New Delhi

Director General & Chief Executive Officer
National Sample Survey Office

मुख्य विशेषतायें

यह रिपोर्ट जुलाई 2011- जून 2012 के दौरान रा.प्र.स के 68वें दौर में रोजगार एवं बेरोजगारी के सर्वेक्षण पर आधारित है। सर्वेक्षित परिवार एवं प्रथम चरण इकाइयाँ (प्र.च.ई) एवं परिगणित व्यक्तियों की संख्या निम्नलिखित है:---

- यह सर्वेक्षण 12,737 प्र.च.ई.यों (7,469 ग्रामों एवं 5,268 नगरीय खण्डों) जिसमें 1,01,724 परिवार थे (59,700 ग्रामीण क्षेत्रों में एवं 42,024 नगरीय क्षेत्रों में) और 4,56,999 व्यक्तियों (2,80,763 ग्रामीण क्षेत्र में एवं 1,76,236 नगरीय क्षेत्रों में) की गणना हुई।

[पैरा 3.1.1.2]

- अखिल-भारतीय स्तर पर ग्रामीण क्षेत्रों में सर्वेक्षित¹ परिवारों की संख्या ग्रामीण क्षेत्रों में हिंदुओं के लिए 45,565, मुस्लिम के लिए 7,141, ईशाइयों के लिए 4,177, सिखों के लिए 1,346 एवं अन्य के लिए 1,471 एवं नगरीय क्षेत्रों में सर्वेक्षित परिवारों की संख्या हिन्दुओं के लिए 31,470, मुस्लिमों के लिए 6,135, ईशाइयों के लिए 2,754, सिखों के लिए 747 एवं अन्य के लिए 917 था।

[पैरा 3.1.1.2]

- अखिल-भारतीय स्तर पर ग्रामीण क्षेत्रों में सर्वेक्षित व्यक्तियों की संख्या हिंदुओं के लिए 2,10,103, मुसलमानों के लिए 37,497, ईशाइयों के लिए 19,846, सिखों के लिए 6,646 एवं अन्य के लिए 6,671 थी। नगरीय क्षेत्रों में सर्वेक्षित व्यक्तियों की संख्या, हिन्दुओं के लिए 1,26,419, मुसलमानों के लिए 31,114, ईशाइयों के लिए 11,575, सिखों के लिए 3,329 एवं अन्य के लिए 3,798 था।

[पैरा 3.1.1.2]

रा.प्र.स. के 68वें दौर के दौरान (जुलाई 2011 - जून 2012) तक अखिल-भारतीय-स्तर पर आधारित, मुख्य धार्मिक वर्गों से सम्बन्धित आकड़ों की कुछ मुख्य बातें नीचे दी गयी हैं :-

(क) परिवार एवं जनसंख्या

(i) परिवार एवं जनसंख्या का वितरण :-

- करीब 68.8 प्रतिशत परिवार ग्रामीण भारत में थे जो कि कुल जनसंख्या का करीब 71.2 था।
- [पैरा 3.1.1.3]
- देश में करीब 83 प्रतिशत परिवार हिन्दु थे, 12 प्रतिशत मुस्लिम, 2.3 प्रतिशत ईसाई एवं 1.6 प्रतिशत सिख थे।
- [कथन 3.2]
- भारत में हिंदू, मुस्लिम, ईसाई एवं सिख वर्गों के व्यक्तियों का अनुपात क्रमशः 81.4 प्रतिशत, 13.8 प्रतिशत, 2.1 प्रतिशत एवं 1.7 प्रतिशत था।
- [कथन 3.3]

¹ नगरीय क्षेत्रों में, 1 प्रतिदर्श परिवार के लिए, पारिवारिक धार्मिक वर्ग दर्ज नहीं किया गया था।

(ii) औसतन् पारिवारिक आकार एवं लिंग अनुपात

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में, औसतन् पारिवारिक आकार मुसलमानों में अधिकतम था (5.0 दोनों नगरीय एवं ग्रामीण क्षेत्रों में) एवं ईसाइयों में न्यूनतम था (4.1 ग्रामीण क्षेत्र एवं 3.5 नगरीय क्षेत्र में)।

[कथन 3.4]

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में लिंग अनुपात (1000 पुरुषों के मुकाबले महिलाएँ) ईसाइयों में सबसे अधिक (1013 महिलाएं प्रत्येक 1000 पुरुषों पर ग्रामीण क्षेत्रों में एवं 1057 महिलाएं प्रत्येक 1000 पुरुषों पर नगरीय क्षेत्रों में) जबकि ग्रामीण क्षेत्रों में यह हिन्दुओं में सबसे कम था (953 महिलाओं के मुकाबले 1000 पुरुष) एवं नगरीय क्षेत्रों में मुसलमानों में (911 महिलाएं 1000 पुरुषों पर)।

[कथन 3.5]

(iii) पारिवारिक प्रारूप

➤ स्वरोजगार

- ग्रामीण भारत में उन परिवारों का अनुपात, जिनके आय का मुख्य स्रोत स्वरोजगार था, हिन्दुओं में (49.9 प्रतिशत), ईसाइयों में (49.8 प्रतिशत), एवं मुसलमानों में (49.2 प्रतिशत) करीब एक ही स्तर का था।

[पैरा 3.1.3.2]

- नगरीय भारत में उन परिवारों का अनुपात, जिनके आय का मुख्य स्रोत स्वरोजगार था मुसलमानों में सबसे अधिक था (50 प्रतिशत)।

[पैरा 3.1.3.3]

➤ नियमित मजदूरी/वेतन

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में ईसाई परिवारों का नियमित मजदूरी/वेतन, आय के मुख्य स्रोत का अधिकतम अनुपात था (ग्रामीण भारत में 16 प्रतिशत एवं नगरीय भारत में 45.8 प्रतिशत)।

[पैरा 3.1.3.2 एवं पैरा 3.1.3.3]

➤ आकस्मिक श्रम :-

- ग्रामीण भारत में, निर्दिष्ट धार्मिक वर्गों के बीच उन परिवारों का अनुपात जहां आकस्मिक श्रम आय का मुख्य स्रोत था हिन्दुओं में सबसे अधिक था (34.8 प्रतिशत) एवं ईसाइयों में सबसे कम था (24.5 प्रतिशत)।

[कथन 3.6 R]

- नगरीय भारत में, उन परिवारों का अनुपात जहां आकस्मिक श्रम आय का मुख्य स्रोत था मुसलमानों में सबसे अधिक (15 प्रतिशत) एवं सिखों में सबसे कम (4.1 प्रतिशत) था।

[कथन 3.6 U]

(iv) ग्रामीण क्षेत्रों में धारित भूमि एवं कृषि भूमि

- निर्दिष्ट धार्मिक वर्गों में, उन परिवारों का अनुपात जिनके पास 4.01 हेक्टेयर या उससे अधिक की धारित भूमि थी सिख परिवारों में सबसे अधिक थी (8.5 प्रतिशत)।

[पैरा 3.1.4.1]

- उन परिवारों का अनुपात जो 4.01 हेक्टेयर या उससे अधिक भूमि की खेती कर रहे थे सिख परिवारों के लिए सर्वाधिक था (8.7 प्रतिशत) ।

[पैरा 3.1.4.2]

(ख) शैक्षणिक संस्थाओं में साक्षरता एवं वर्तमान उपस्थिति :-

- 15 वर्ष एवं उससे अधिक आयु के अशिक्षित व्यक्तियों में ईसाइयों का अनुपात सबसे कम था (ग्रामीण पुरुषों के लिए 14.6 प्रतिशत, ग्रामीण महिलाओं के लिए 23.7 प्रतिशत, नगरीय पुरुषों के लिए 5.7 प्रतिशत एवं नगरीय महिलाओं के लिए 9 प्रतिशत) ।

[पैरा 3.2.1.2]

- 15 वर्ष एवं उससे अधिक आयु के माध्यमिक एवं उससे उच्च शैक्षणिक स्तर वाले व्यक्तियों में ईसाइयों का अनुपात सबसे अधिक था ग्रामीण क्षेत्रों के पुरुषों एवं महिलाओं दोनों के लिए (36.3 प्रतिशत ग्रामीण पुरुषों एवं 31.1 प्रतिशत ग्रामीण महिलाओं के लिए) और नगरीय क्षेत्रों में महिलाओं के लिए (62.7 प्रतिशत) जबकि नगरीय क्षेत्रों के पुरुषों के लिए यह सिखों में सबसे अधिक था (67.6 प्रतिशत) ।

[पैरा 3.2.1.2]

- 0-29 वर्षीय उम्र के प्रमुख धार्मिक वर्गों के व्यक्तियों में शैक्षणिक संस्थानों में वर्तमान उपस्थिति दर ईसाइयों में सबसे अधिक था (58.5 प्रतिशत ग्रामीण पुरुषों के लिए, 51.7 प्रतिशत ग्रामीण महिलाओं के लिए, 61.5 प्रतिशत नगरीय पुरुषों के लिए एवं 56.8 प्रतिशत नगरीय महिलाओं के लिए) ।

[पैरा 3.2.2.1]

- 0-29 वर्षीय उम्र के प्रमुख धार्मिक वर्गों के व्यक्तियों में शैक्षणिक संस्थानों में वर्तमान उपस्थिति दर मुसलमानों में सबसे कम था (48.7 प्रतिशत ग्रामीण पुरुषों के लिए, 42.1 प्रतिशत ग्रामीण महिलाओं के लिए, 47 प्रतिशत नगरीय पुरुषों के लिए एवं 46.3 प्रतिशत नगरीय महिलाओं के लिए) ।

[पैरा 3.2.2.1]

(ग) सामान्य स्तर (पीएस + एसएस) के अनुसार श्रमबल :-

- निर्दिष्ट धार्मिक वर्गों में, ग्रामीण एवं नगरीय दोनों क्षेत्रों में पुरुषों के बीच, श्रम बल भागीदारी दर (LFPR) सिखों के लिए सबसे अधिक था (57.6 प्रतिशत ग्रामीण क्षेत्रों में एवं 56.8 प्रतिशत नगरीय क्षेत्रों में) ।

[पैरा 3.3.2.2]

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में, महिलाओं के लिए श्रम बल भागीदारी दर (LFPR) ईसाइयों में सबसे अधिक था (30.4 प्रतिशत ग्रामीण क्षेत्रों में एवं 27.7 प्रतिशत नगरीय क्षेत्रों में) ।

[पैरा 3.3.2.2]

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में, पुरुषों एवं महिलाओं दोनों के लिए श्रम बल भागीदारी दर (LFPR) मुसलमानों के लिए सबसे कम था (ग्रामीण पुरुषों के लिए 51.1 प्रतिशत, ग्रामीण महिलाओं के लिए 15.9 प्रतिशत, नगरीय पुरुषों के लिए 55.3 प्रतिशत एवं नगरीय महिलाओं के लिए 10.9 प्रतिशत) ।

[पैरा 3.3.2.2]

(घ) सामान्य स्तर (पीएस + एसएस) के अनुसार कार्यबल :-

- निर्दिष्ट धार्मिक वर्गों में ग्रामीण क्षेत्रों में पुरुषों के लिए, कामगार जनसंख्या अनुपात (WPR) सिखों में सबसे अधिक था (56.9 प्रतिशत) एवं नगरीय क्षेत्रों में, हिन्दुओं के लिए यह सबसे अधिक (55 प्रतिशत) था ।

[पैरा 3.3.3.2]

- ग्रामीण एवं नगरीय दोनों क्षेत्रों में महिलाओं के लिए, कामगार जनसंख्या अनुपात (WPR) ईसाइयों में सबसे अधिक था (ग्रामीण क्षेत्रों में 28.4 प्रतिशत एवं नगरीय क्षेत्रों में 25.2 प्रतिशत) ।

[पैरा 3.3.3.2]

- नगरीय एवं ग्रामीण दोनों क्षेत्रों में पुरुषों एवं महिलाओं दोनों के लिए कामगार जनसंख्या अनुपात (WPR) मुसलमानों के लिए सबसे कम था (ग्रामीण पुरुषों के लिए 49.9 प्रतिशत, ग्रामीण महिलाओं के लिए 15.3 प्रतिशत, नगरीय पुरुषों के लिए 53.2 प्रतिशत एवं नगरीय महिलाओं के लिए 10.5 प्रतिशत)

[पैरा 3.3.3.2]

(ड.) सामान्य स्तर (पीएस + एसएस) के अनुसार बेरोजगारी दर :-

- निर्दिष्ट धार्मिक वर्गों में ग्रामीण एवं नगरीय दोनों क्षेत्रों में बेरोजगारी दर ईसाइयों में सबसे अधिक था (4.5 प्रतिशत ग्रामीण क्षेत्रों में एवं 5.9 प्रतिशत नगरीय क्षेत्रों में) एवं ग्रामीण क्षेत्रों में सिखों के लिए सबसे कम था (1.3 प्रतिशत) और नगरीय क्षेत्रों में हिन्दुओं के लिए सबसे कम (3.3 प्रतिशत) था ।

[पैरा 3.3.7.2]

HIGHLIGHTS

This report is based on the employment and unemployment survey conducted in 68th round of NSS during July 2011 to June 2012. Number of First Stage Units (FSU) and households surveyed and persons enumerated are as follows:

- The survey was spread over 12,737 FSUs (7,469 villages and 5,268 urban blocks) covering 1,01,724 households (59,700 in rural areas and 42,024 in urban areas) and enumerating 4,56,999 persons (2,80,763 in rural areas and 1,76,236 in urban areas).

[para 3.1.1.2]

- The number of households surveyed¹ at the all-India level in rural areas for the Hindus were 45,565, for the Muslims were 7,141, for the Christians were 4,177, for the Sikhs were 1,346 and for Others were 1,471. In urban areas the number of households surveyed for the Hindus were 31,470, for the Muslims were 6,135, for the Christians were 2,754, for the Sikhs were 747 and for Others were 917.

[para 3.1.1.2]

- The number of persons surveyed at the all-India level in rural areas for the Hindus were 2,10,103, for the Muslims were 37,497, for the Christians were 19,846, for the Sikhs were 6,646 and for Others were 6,671. In urban areas number of persons surveyed for the Hindus were 1,26,419, for the Muslims were 31,114, for the Christians were 11,575, for the Sikhs were 3329 and for Others were 3798.

[para 3.1.1.2]

Some of the key findings, pertaining to major religious groups, at the all-India level based on the data collected during NSS 68th (July 2011- June 2012) round are stated below:

A. Household and Population

(i) *Distribution of household and population*

- About 68.8 per cent of the households belonged to rural India and accounted for nearly 71.2 per cent of total population.

[para 3.1.1.3]

- Nearly 83 per cent of the households in the country belonged to Hindus, about 12 per cent belonged to Muslims, about 2.3 per cent belonged to Christians and 1.6 per cent belonged to Sikhs.

[Statement 3.2]

- The proportion of persons in India belonging to Hindu, Muslim, Christian, Sikh categories were about 81.4 per cent, 13.8 per cent, 2.1 per cent and 1.7 per cent respectively.

[Statement 3.3]

¹ In urban areas, for 1 sample household, household religious group was not reported.

(ii) Average household size and sex ratio

- In both rural and urban areas, the average household size was the highest among Muslims (5.0 each in rural and urban areas) and lowest among Christians (4.1 in rural areas and 3.5 in urban areas).

[Statement 3.4]

- In both rural and urban areas, the sex ratio (number of females per 1000 males) was the highest among Christians (1013 females per 1000 males in rural areas and 1057 females per 1000 males in urban areas) while it was the lowest among Hindus in rural areas (953 females per 1000 males) and among Muslims in urban areas (911 females per 1000 males).

[Statement 3.5]

(iii) Household type

➤ **Self-employment**

- In rural India, proportion of households, having major source of income from *self-employment*, was almost at the same level among Hindus (49.9 per cent), Christians (49.8 per cent) and Muslims (49.2 per cent).

[para. 3.1.3.2]

- In urban India, proportion of households with *self-employment* as the major source of income was the highest among Muslims (50 per cent).

[para. 3.1.3.3]

➤ **Regular wage/salary**

- In both rural and urban India, Christians had the highest proportion of households having major source of income from *regular wage/ salary earning* (16 per cent in rural India and 45.8 per cent in urban India).

[para. 3.1.3.2 & para 3.1.3.3]

➤ **Casual labour**

- In rural India, among the specific religious groups, proportion of households with *casual labour* as the major source of income was the highest among Hindus (34.8 per cent) and lowest among Christians (24.5 per cent).

[Statement 3.6R]

- In urban India, proportion of households with *casual labour* as the major source of income was the highest among Muslims (15 per cent) and lowest for Sikhs (4.1 per cent).

[Statement 3.6U]

(iv) Land possessed and land cultivated in rural areas

- Among the specific religious groups, the proportion of households possessing land of size 4.01 hectares or more was the highest for Sikh households (8.5 per cent).

[para 3.1.4.1]

- The proportion of households cultivating land of size 4.01 hectares or more was the highest for Sikh households (8.7 per cent).

[para 3.1.4.2]

B. Literacy and Current Attendance in Educational Institutions

- Among persons of age 15 years and above, proportion of *not-literates* was the lowest for Christians (14.6 per cent for rural males, 23.7 per cent for rural females, 5.7 per cent for urban males and 9 per cent for urban females).

[para. 3.2.1.2]

- Proportion of persons of age 15 years and above with educational level *secondary and above* was the highest for Christians in rural areas for both males and females (36.3 per cent for rural males and 31.1 per cent for rural females) and for females in urban areas (62.7 per cent) whereas for males in urban areas it was the highest among Sikhs (67.6 per cent).

[para. 3.2.1.2]

- Among persons of age 0-29 years, for major religious groups, current attendance rate in educational institutions was the highest for Christians (58.5 per cent for rural males, 51.7 per cent for rural females, 61.5 per cent for urban males and 56.8 per cent for urban females)

[para. 3.2.2.1]

- Among persons of age 0-29 years, for major religious groups, current attendance rate in educational institutions was the lowest among Muslims (48.7 per cent for rural males, 42.1 per cent for rural females, 47 per cent for urban males and 46.3 per cent for urban females).

[para. 3.2.2.1]

C. Labour Force according to usual status (ps+ss)

- Among the specific religious groups, among males in both rural and urban areas, Labour Force Participation Rate (LFPR) was the highest for Sikhs (57.6 per cent in rural areas and 56.8 per cent in urban areas respectively).

[para. 3.3.2.2]

- For females in both rural and urban areas, LFPR was the highest for Christians (30.4 per cent in rural areas and 27.7 per cent in urban areas respectively).

[para. 3.3.2.2]

- In both rural and urban areas for both males and females LFPR was the lowest for Muslims (51.1 per cent for rural males, 15.9 per cent for rural females, 55.3 per cent for urban males and 10.9 per cent for urban females).

[para. 3.3.2.2]

D. Work Force according to usual status (ps+ss)

- Among the specific religious groups, for males in rural areas, Worker Population Ratio (WPR) was the highest for Sikhs (56.9 per cent) and in urban areas, it was the highest for Hindus (55 per cent).

[para. 3.3.3.2]

- For females in both rural and urban areas, WPR was the highest for Christians (28.4 per cent in rural areas and 25.2 per cent in urban areas).

[para. 3.3.3.2]

- In both rural and urban areas for both males and females WPR was the lowest for Muslims (49.9 per cent for rural males, 15.3 per cent for rural females, 53.2 per cent for urban males and 10.5 per cent for urban females).

[para. 3.3.3.2]

E. Unemployment Rate according to usual status (ps+ss)

- Among the specific religious groups, unemployment rate in both rural and urban areas was the highest for Christians (4.5 per cent in rural areas and 5.9 per cent in urban areas) and lowest for Sikhs in rural areas (1.3 per cent) and Hindus in urban areas (3.3 per cent).

[para. 3.3.7.2]

Table (R4)	Per 1000 distribution of households by size class of land cultivated for each major religious group	A-8
Table (R5)	Per 1000 distribution of persons by age-group for each major religious group	A-9-A-14
Table (R6)	Per 1000 distribution of persons by general educational level for each major religious group	A-15-A-32
Table (R7)	Current attendance rates in educational institutions per 1000 persons (of age 0 - 29 years) by age-group and major religious group	A-33-A-38
Table (R8)	Per 1000 distribution of persons by usual activity category taking also into consideration the subsidiary economic status of persons categorised as 'not working' in the principal status for each age-group and major religious group	A-39-A-92
Table (R9)	Per 1000 distribution of persons of age 15 years and above by usual activity category taking also into consideration the subsidiary economic status of persons categorised as 'not working' in the principal status for each general educational level and major religious group	A-93-A-146

Chapter One

Introduction

CHAPTER ONE

INTRODUCTION

1.1 Report in perspective

1.1.1 The National Statistical Commission (NSC) in its 32nd Meeting held on 23-24 April 2010 considered the use of the 2009-10 quinquennial survey of NSSO as the base year for both the price indices as well as revision of the national income estimates and felt that 2009-10 might not be a normal year and hence use of data collected that year for the purpose might pose problems. Hence, it was desirable to repeat the survey once again in respect of consumer expenditure as well as employment and unemployment issues. In its 33rd Meeting held on 19-21 May 2010, the NSC decided that the 68th Round of NSS would be devoted to repeating the quinquennial survey on consumer expenditure and employment and unemployment with a provision in the employment schedule to measure employment under Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works.

1.1.2 Pursuant to the above decision of the NSC, the National Sample Survey Office (NSSO), as a part of its 68th round survey programme during the period July 2011 - June 2012, carried out an all-India household survey on the situation of employment and unemployment in India. In this survey, a nation-wide household enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment at the national and State/UT levels. Information on various facets of employment and unemployment in India was collected in NSS 68th round through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Here information on religious groups was collected as an associated characteristic for studying the employment and unemployment situation among major religious groups in the country. Based on the data so collected, estimates pertaining to some key indicators of employment and unemployment of people belonging to different religious groups in India, along with certain features associated with them have been presented in this report. In the survey, information in respect of seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism was collected. **For each household surveyed, the reported religion of the head of the household was considered as the religion of all the members of the household irrespective of the actual religion followed by individual members.**

1.2 Genesis of NSS Employment and Unemployment Survey

1.2.1 The quinquennial survey on employment and unemployment is one of the important surveys conducted repeatedly by the NSSO. The first such survey was carried out in the 27th round of NSSO during October 1972 - September 1973. The current employment and unemployment survey of NSS 68th round is like a quinquennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned. Including the present employment and unemployment survey of NSS 68th round (July 2011 - June 2012), nine such surveys on the employment and unemployment situation in India have so far been conducted by NSSO.

1.2.2 *Past Quinquennial Surveys*: To assess the volume and structure of employment and unemployment, starting with the 9th round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. To give a firm conceptual framework for conducting the employment and unemployment surveys, the Planning Commission, in the year 1968, set up an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee). The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted during 27th round (October 1972 - September 1973) of NSSO. The other quinquennial surveys on employment and unemployment situation in India carried out by NSSO were during 32nd round (July 1977 - June 1978), 38th round (January - December 1983), 43rd round (July 1987 - June 1988), 50th round (July 1993 - June 1994), 55th round (July 1999 - June 2000), 61st round (July 2004 - June 2005) and 66th round (July 2009 - June 2010), in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee.

1.2.3 *Other surveys on employment-unemployment*: Apart from the quinquennial surveys on employment and unemployment, NSSO has also collected information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). This procedure of collecting data on employment and unemployment in the annual rounds of NSSO continued till NSS 59th round (January - December 2003). In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). In these annual rounds, particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected by applying a similar approach as in the quinquennial rounds. In the quinquennial rounds, current daily activities in terms of status and industry are collected for the household members and current weekly activity is derived from the daily activities of the reference week whereas in the annual rounds, current weekly activity particulars were collected through direct query. In the 60th round (January - June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment were collected in the same manner as that of the quinquennial rounds. A separate schedule on employment and unemployment, similar to the one canvassed in the 60th round, was also canvassed in the 62nd round (July 2005 - June 2006) and 64th round (July 2007- June 2008) of NSSO.

1.3 Scope of 68th Round of NSSO Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. In the employment and unemployment surveys of quinquennial rounds of NSSO, persons are classified into various activity categories in three approaches based on different activities (economic/non-economic) pursued by them during certain specified reference periods. These three approaches are usual status approach, current weekly status approach and current daily

status approach. Three reference periods used in surveys of NSSO are (i) one year, (ii) one week and (iii) each day of the reference week. In the usual status approach, the activity status of a person is determined on the basis of the reference period of last 365 days preceding the date of survey. The activity status of a person in current weekly status approach is determined on the basis of the reference period of last 7 days preceding the date of survey and that in current daily status approach is determined on the basis of the reference period of each of the last 7 days preceding the date of the survey. Based on the classification of the individuals into various activity categories in these three approaches, labour force indicators like, labour force participation rate (LFPR), worker population ratio (WPR), unemployment rate (UR) are derived in usual principal status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS). As in the past, during 68th round also, NSSO collected data to measure employment and unemployment indicators in terms of usual principal status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS) through the employment and unemployment schedule (Schedule 10).

1.3.2 The major features of data collected in NSS 66th round and in NSS 68th round were the same. The activity participation of the people is not only dynamic but also multidimensional - it varies over regions, age, education, gender, industry and occupational categories. In order to reveal the multidimensional aspects of the employment and unemployment situation in India, the employment and unemployment schedule (Schedule 10) of NSS 68th round captured a range of information on the following aspects:

- i) *Particulars on household characteristics like household size, household type, religion and social group of the household, land owned, possessed and cultivated by the household, etc;* for the rural households, information was collected on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card. For the households with MGNREG job card, information was also collected on (a) number of MGNREG job cards issued to the household and (b) whether any member has any bank/ post office account. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment and unemployment characteristics with the level of living of the population;
- ii) *Demographic particulars of the household members like age, sex, educational level, status of current attendance, status of registration in placement agency, vocational training received, etc.;* for rural households with MGNREG job card, for persons of age 18 years and above, whether the person was registered in any MGNREG job card and if registered, whether he/she worked in MGNREG works during last 365 days;
- iii) *Particulars of usual principal activity, usual subsidiary economic activity, current weekly activity and current daily activity for all the members of the sample households;* for persons engaged in economic activities, information on detailed activity status, industry of work, occupation, wage and salary earnings of the employees for the work done during the reference week was also collected. For those who were unemployed on

all the 7 days of the reference week, information was collected regarding the duration of the present spell of unemployment;

iv) Particulars of the enterprise like location of work place, type of enterprises, number of workers in the enterprise etc. for the usual principal status workers and usual subsidiary status workers engaged in industries other than growing of crops, plant propagation and mixed farming;

v) Particulars on conditions of employment like type of job contract, eligibility for paid leave, availability of social security benefits and method of payment for the usual principal status employees and usual subsidiary status employees engaged in industries other than growing of crops, plant propagation and mixed farming;

vi) Particulars regarding extent of under-utilization of the labour time, nature of employment (permanent/temporary), existence of union/ association in their activity, etc. for persons who were employed either in usual principal status or in usual subsidiary status;

vii) Particulars regarding participation in specified activities like (a) maintenance of kitchen garden, (b) work in household poultry/diary, (c) free collection of primary goods, husking of paddy, grinding of food grains, making baskets, sewing, tailoring, weaving for household use, tutoring of own children or others' children free of charge, etc. for persons who were classified as engaged in domestic duties in the usual principal status.

1.4 Outline of NSS 68th round survey

1.4.1 *Geographical coverage:* The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometers of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year.

1.4.2 *Sub-round:* The fieldwork of the 68th round of NSSO was of one year duration starting on 1st July, 2011 and ending on 30th June, 2012. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1st sub-round period ranging from July to September 2011, the 2nd sub-round period from October to December 2011 and so on. In each of these four sub-rounds, an equal number of sample villages/blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 Census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from these FSUs. For the rural sector, the list of 2001 Census villages (Panchayat wards in case of Kerala)

constituted the sampling frame. For the urban sector, the list of latest available UFS blocks of phase 2007-12 constituted the sampling frame. Within each district of a State/UT, two basic strata were formed viz. (i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population Census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. Sub-stratification was done within stratum of both rural and urban areas. If 'r' was the sample size of FSUs allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population. If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS of phase 2007-12 and then arranging the Investigator Units (IV units) of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS of phase 2007-12.

1.5.2 At the all-India level, a total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per Census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/sub-strata in proportion to the population as per Census 2001. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4 and equal number of sample FSUs was allocated in each of the four sub-rounds.

1.5.3 For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum/sub-stratum, required number of sample FSUs was selected by Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households. All households listed in the selected

village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). The details of formation of SSS are given in Appendix B. A total of 8 households were selected from each sample village/block for canvassing the employment and unemployment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) allotted for the central sample¹ at the all-India level, 12,737 FSUs (7,469 villages and 5,268 urban blocks) could be surveyed for canvassing the employment and unemployment schedule (Schedule 10). The number of households surveyed was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and number of persons surveyed was 4,56,999 (2,80,763 in rural areas and 1,76,236 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this report. Field investigators of NSSO collected data for all members of the sample households by interviewing the informants of the selected households.

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in Census. The urban frame used in the survey is the latest updated UFS that takes into account the newly declared towns after the last Census 2001. Accordingly the rural sector is the one that is not urban.

1.6 Reports on Employment and Unemployment survey of 68th round of NSSO

1.6.1 The results of the employment and unemployment surveys of NSSO, generated from the central sample data, are released in the form of reports. It was planned to bring out the results of the employment and unemployment survey of NSS 68th round in seven reports. Based on the data of NSS 68th round, a document entitled 'Key Indicators of Employment and Unemployment in India, 2011-12' showing the estimates of key labour force indicators for each State/UT and all-India was brought out in June 2013. The present report is the last in the series of seven reports.

The details of the six other reports already brought out by NSSO based on the data of NSS 68th round survey on Employment and Unemployment (Schedule 10) are given below in a tabular form.

Srl. no.	Report no	Name of the report	Broad coverage of the report
1	554	Employment and Unemployment Situation in India	The estimates of labour force indicators along with various characteristics associated with them.

¹ The sample selected for NSS 68th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey. The sample surveyed by State Government is termed as "State sample".

Srl. no.	Report no	Name of the report	Broad coverage of the report
2	557	Informal Sector and Condition of Employment in India	The estimates of usual status workforce engaged in the informal sector (proprietary or partnership enterprises) and various conditions of their employment.
3	559	Participation of Women in Specified Activities along with Domestic Duties	Different features of participation of women who were usually engaged in domestic duties in specified activities along with domestic duties; willingness to accept work along with their domestic duties if work is made available to their household premises, type of assistance required to undertake the desired work, etc.
4	563	Employment and Unemployment situation among social groups in India	The estimates pertaining to the employment and unemployment situation among the various social groups in the country, along with certain other features associated with them.
5	564	Employment and Unemployment situation in cities and towns in India	The estimates pertaining to the employment and unemployment in cities and towns
6	566	Status of Education and Vocational Training in India	Features of literacy, attainment of general and technical education, current attendance in educational institutions, vocational training received, etc.

1.7 Contents of the Report

1.7.1 As stated earlier, this report deals with various estimates on employment and unemployment of the people belonging to different religions along with their correlates as obtained from tables generated from data collected on relevant items for the entire round. We would like to sound a note of caution at the outset that *reported* religion of household was a *by-product* of a *general* household *sample* survey aimed at estimating salient characteristics of employment and unemployment of the *general* population and was *not* specifically designed for collecting information on economic conditions of specific religious communities.

1.7.2 For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. Some results like, distribution of households and population by religious groups, distribution of households by household type,

land cultivated and worker population ratio, unemployment rate, etc. have been obtained for each of the major religions (viz. Hinduism, Islam, Christianity and Sikhism) from the survey.

1.7.3 The sample sizes pertaining to religious groups other than Hinduism, Islam, Christianity and Sikhism were small even at the all-India level. The estimates based on such small samples for the smaller religious groups, may not be sufficiently reliable and hence, estimates relating to these religious groups have not been generated separately. Households belonging to these religious groups have been combined together and their estimates presented as “Other” religious group.

1.7.4 This report contains three chapters including the present introductory chapter (Chapter One) and four appendices. Chapter Two discusses the concepts and definitions of only those terms that are relevant in connection with various items covered in this report. The main findings on employment - unemployment situation among major religious groups and their broad household and population characteristics are discussed in Chapter Three. The detailed all-India tables forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. The Projected Population as on 1st January 2012 obtained by using the Census population as on 01.03.2011 and the rate of growth of population between Census 2001 and 2011 have been presented in Appendix C. Appendix D gives a facsimile of the schedule canvassed in the survey.

1.7.5 The estimates presented in this report, in general, refer to the mid-point of the survey period (July 2011 - June 2012) of NSS 68th round, i.e., 01.01.2012. In the NSS reports, the estimates of the employment and unemployment characteristics are generally presented as ratios. To estimate the absolute number of any category corresponding to the NSS 68th round, the survey estimates of ratios may be applied to the Projected Population as on 1st January 2012 as given in Appendix C. It may be noted that the survey did not cover the (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. Thus, for any category, the survey based estimates of rates and ratios when applied to the projected population of Nagaland or Andaman and Nicobar Islands will give the estimates for the corresponding category for the whole of these State/UT, under the assumption that the inclusion of the left out areas of these State/UT may not change the estimates effectively. It may also be noted that as the tables are generally presented as ‘per 1000 distribution’ or rates ‘per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates of the employment and unemployment characteristics have been presented in the report for all the States and UTs. While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States/UTs in any category/ sub- category may not be adequate enough for getting sufficiently reliable estimates for some of the employment and unemployment characteristics.

1.7.6 Appendix A contains the detailed all-India tables of the report. The survey estimates of the aggregates are presented in the margin of the detailed tables and these may be used to combine the estimates of the ratios or to get the ratios with more significant digits. The cell-level figures in the detailed tables, when added up, may not exactly be equal to the figure shown against the 'total' column/row due to rounding off and/or presence of non-response (n.r.) cases. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category appear as zero (0) in the detailed tables. Estimated numbers per 1000 are also shown as zero (0), when they are greater than 0 but less than 0.5. Appendix A of the report is provided in a CD.

Chapter Two

Concepts and Definitions

CHAPTER TWO

CONCEPTS AND DEFINITIONS

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 Household: A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

2.2 Age (years): The age in completed years, as on the date of survey, of the household members were recorded.

2.3 Religious group: For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. The information recorded in this regard was based entirely on the response of the informant.

2.4 Household type: The household type was decided based on the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belonged to any one of the following six household types:

1. self-employed in agriculture
2. self-employed in non-agriculture
3. regular wage/salary earning
4. casual labour in agriculture
5. casual labour in non-agriculture
6. others

For **urban** areas, the household types are:

1. self-employed
2. regular wage/salary earning
3. casual labour
4. others

2.4.1 Procedure for determining household type in rural sector: The broad household types in rural areas used in this round were *self-employed*, *regular wage/salary earning*, *casual labour* and *others*. A household which did not have any income from economic activities was classified under *others*. Within each of the broad category of *self-employed* and *casual labours* two specific household types were distinguished, depending on their major income from agricultural activities and non-agricultural activities. The specific household types for *self-employed* were: *self-employed in agriculture* and *self-employed in non-agriculture*. For *casual labour*, the specific household types were: *casual labour in agriculture* and *casual labour in non-agriculture*. In determination of the household type in rural areas, first the household's income from economic activities was considered. Rural household were first categorized as '*self-employed*', '*regular wage/salary earning*' or '*casual labour*' depending on the single major source of its income from economic activities during last 365 days. Further, for those households which were categorized either as *self-employed* or *casual labours*, specific household types (*self-employed in agriculture or self-employed in non-agriculture* and *casual labour in agriculture or casual labour in non-agriculture*) were assigned depending on the single major source of income from agricultural or non-agricultural activities.

It may be noted that the household types and the procedure for determination of household type codes in rural areas were different in NSS 68th round from those followed in NSS surveys on employment and unemployment conducted earlier.

2.4.2 Procedure for determining household type in urban sector: In urban areas, a household was assigned the type *self-employed*, *regular wage/salary earning* or *casual labour* corresponding to the major source of its income from economic activities during the last 365 days. A household which had no income from economic activities was classified under *others*.

2.5 Procedure for collecting monthly per capita consumer expenditure (MPCE): Household consumer expenditure was measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It also included the imputed values of goods and services, which were not purchased but procured otherwise for consumption. In other words, it was the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. The imputed rent of owner-occupied houses was excluded from consumer expenditure. Any expenditure incurred towards the productive enterprises of the households was also excluded from the household consumer expenditure. Monthly per capita expenditure (MPCE) was the household consumer expenditure over a period of 30 days divided by household size. For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 68th round. The approximate value of consumer expenditure obtained through the worksheet was used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. The items of consumption were classified into four groups viz., (i) *food (other than 'cooked meals')*, *pan, tobacco & intoxicants and fuel & light*, (ii) *cooked meals, miscellaneous goods and services including education, medical, rent, taxes*

and cess, (iii) clothing and footwear and (iv) durable goods. Three different approaches were followed for defining consumption of these four groups of items. The approaches followed for defining consumption of these four groups were (i) consumption approach, (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure). Depending upon the type of item, either of the two reference periods viz. 30 days and 365 days, was used to record consumption of different groups of items. The following table gives the reference periods of the different items of consumption for collection of information on household consumer expenditure in Schedule 10:

Item group
Reference period for value of consumption: last 30 days
cereals & cereal products (includes muri, chira, maida, suji, noodles, bread (bakery), barley, cereal substitutes, etc.)
pulses & pulse products (includes soyabean, gram products, besan, sattu, etc.)
milk
milk products (includes milk condensed/powder, baby food, ghee, butter, ice-cream, etc.)
edible oil and Vanaspati
vegetables
fruits & nuts (includes mango, banana, coconut, dates, kishmish, monacca, other dry fruits, etc.)
egg, fish & meat
sugar (includes gur, candy (misri), honey, etc.)
salt & spices (includes dry chillies, curry powder, oilseeds, garlic, ginger, etc.)
other food items (includes beverages such as tea, coffee, fruit juice and processed food such as biscuits, cake, pickles, sauce, cooked meals, etc.)
pan, tobacco & intoxicants
fuel & light
entertainment (includes cinema, picnic, sports, club fees, video cassettes, cable charges, etc.)
personal care and effects (includes spectacles, torch, umbrella, lighter, etc.)
toilet articles (includes toothpaste, hair oil, shaving blades, etc.)
sundry articles (includes electric bulb, tubelight, glassware, bucket, washing soap, agarbati, insecticide, etc.)
consumer services excluding conveyance (includes domestic servant, tailoring, grinding charges, telephone, legal expenses, pet animals, etc.)
conveyance (includes porter charges, diesel, petrol, school bus/van, etc.)
rent/ house rent
consumer taxes and cesses (includes water charges, etc.)
medical expenses (non-institutional)
Reference period for value of consumption: last 365 days
medical (institutional)
tuition fees & other fees (includes private tutor, school/college fees, etc.)
school books & other educational articles (includes newspaper, library charges, stationery, internet charges, etc.)
clothing and bedding
footwear
furniture and fixtures (includes bedstead, almirah, suitcase, carpet, paintings, etc.)
crockery & utensils (includes stainless steel utensils, casseroles, thermos, etc.)
cooking and household appliances (includes electric fan, air conditioners, sewing machine, washing machine, pressure cooker, refrigerator, heater, toaster, etc.)
goods for recreation (includes TV, radio, tape recorder, musical instruments, etc.)
jewellery & ornaments
personal transport equipment (includes bicycle, scooter, car, tyres & tubes, etc.)
therapeutic appliances (includes glass eye, hearing aids, orthopaedic equipment, etc.)
other personal goods (includes clock, watch, PC, telephone set, mobile handset, etc.)
repair and maintenance (of residential buildings, bathroom equipment, etc.)

2.6 Land possessed by the household as on date of survey: The area of land possessed included land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e., encroached) by the household but excluded land 'leased out'. For a piece of land under the possession of the household, if the household did not have the title of ownership and also did not have lease agreement for the use of land transacted, either orally or in writing, such land was considered as 'neither owned nor leased in'. Information regarding land possessed referred to the amount of land possessed by the household as on the date of survey. The 'area of land possessed' did not include the area of land owned, leased-in, etc. by the servants/paying guests who were considered as normal members of the household, as per the definition of household taken up for the survey.

2.7 Land cultivated (including orchard and plantation) during July 2010-June 2011: Land cultivated (including orchard and plantation) during the agricultural year 2010-2011, i.e., July 2010 to June 2011 was recorded considering cultivation of land from the land 'owned', 'land leased-in' or from 'land neither owned nor leased-in'. Area with field crops and area under orchards and plantations was counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares up to 3 places of decimals.

2.8 General educational level: A person who can both read and write a simple message with understanding in at least one language was considered as literate for the purpose of the survey. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed by him/her. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) *not literate*, (ii) *literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above.* The criterion for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

2.9 Status of current attendance in educational institution: Particulars of current attendance in educational institution were recorded for persons of age below 30 years. It was first ascertained whether the person was currently attending any educational institutions (government or private) or not. For persons who were not currently attending any educational institutions, reason for not attending viz. (i) *school too far*, (ii) *to supplement*

household income, (iii) education not considered necessary, (iv) to attend domestic chores, and (v) others, was recorded. For those who were currently attending any educational institution, the course of study pursued by them was recorded in terms of 23 categories viz. (i) EGS/NFEC/AEC, (ii) TLC, (iii) pre-primary (Nursery/Kindergarten, etc.), (iv) primary (class I to IV/V), (v) middle, (vi) secondary, (vii) higher secondary, (viii) graduate in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) other subjects; (ix) post graduate and above, (x) diploma or certificate (below graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, (xi) diploma or certificate (graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subject; (xii) diploma or certificate in post graduate and above level. Persons who were registered for any regular correspondence courses or distance education courses for a stipulated period at the end of which, were allowed to appear in the examination for the course, was also considered as ‘currently attending’. Persons who were awaiting results were also considered as ‘currently attending’.

2.10 Economic activity: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included (i) production of all goods and services for market (i.e. for pay or profit) including those of government services, (ii) production of primary commodities for own consumption and (iii) own account production of fixed assets.

2.10.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition of economic activities adopted for the employment and unemployment survey of NSS 68th round. Although production of any good for own consumption is considered as economic activity by UN System of National Accounts, production of only primary goods for own consumption was considered as economic activity by NSSO for the purpose of the survey. While the UN System of National Accounts considers activities like own account processing of primary products as economic activities but processing of primary products for own consumption was not considered as economic activity in the NSS surveys.

2.10.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 68th round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
 - (a) all the activities relating to the agriculture, forestry, fishing, mining and quarrying sector (i.e. industry Divisions 01 to 09 of NIC-2008) which result in

production of primary goods for own consumption (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.)

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities.

2.11 Activity status: It is the activity situation in which a person was found participated in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in labour force'. Within the labour force, broad activity statuses (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

2.11.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person during the reference period. In such an eventuality, unique identification under any one of the three broad activity statuses (viz. employed/unemployed/not in labour force) was done by adopting either *the major time criterion* or *priority criterion*. The former was used for classification of persons according to the usual status approach and the latter for classification of persons according to the current status approach (i.e., current weekly status and current daily status approaches).

Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code was connected to that activity in which relatively long time had been spent. A similar procedure was adopted for

assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

2.11.2 This report discusses various employment and unemployment indicators according to usual status approach and as such the discussions of the concepts relevant for usual status approach have only been made. The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in usual status approach are given below:

code description

working (or employed)

self-employed

- 11 worked in household enterprises (self-employed) as own-account worker
- 12 worked in household enterprises (self-employed) as an employer
- 21 worked in household enterprises (self-employed) as helper

regular wage/ salaried employee

- 31 worked as regular wage/salaried employee

casual labour

- 41 worked as casual wage labour in public works
- 51 worked as casual wage labour in other types of works

not working but seeking/available for work (or unemployed)

- 81 sought work or did not seek but was available for work

neither working nor available for work (or not in labour force)

- 91 attended educational institutions
- 92 attended to domestic duties only
- 93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
- 94 rentiers, pensioners, remittance recipients, etc.
- 95 not able to work owing to disability
- 97 others (including beggars, prostitutes, etc.)
- 99 children of age 0-4 years

It may be noted that for persons of age 0-4 years, a separate activity status code, viz., 99 was assigned.

2.12 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers.

Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 51 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21), *regular salaried/wage employee* (relevant activity status codes: 31), and *casual wage labour* (relevant activity status codes: 41 and 51).

2.13 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 was assigned for unemployed.

2.14 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 81 constituted the labour force.

2.15 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.16 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were treated as self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

2.16.1 Categories of self-employed persons: Self-employed persons were categorised as follows:

- (i) ***own-account workers:*** those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;

- (ii) **employers**: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) **helpers in household enterprise**: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

2.17 Regular wage/salaried employee: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.18 Casual wage labourer: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

2.19 Public works: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programmes such as Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' is restricted to those schemes under poverty alleviation programmes, or relief measures through which the Government generated wage employment. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, digging of irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. There may be some schemes sponsored by the Government and in operation, which were conceived as self-employment generation schemes. Some of such schemes of the Government were Swarnjayanti Gram Swarozgar Yojana (schemes under erstwhile IRDP merged with this), Rural Employment Generation Programme (REGP), Prime Minister's Rozgar Yojana (PMRY), Valmiki Ambedkar Awas Yojana (VAMBAY), etc. Employment generated through these schemes was not considered within the purview of 'public works'. Classification of individuals as 'casual labour in public works' required that the work in which they participated was 'public works' as defined above. To distinguish between 'public works' and works not classifiable as 'public works', some broad characteristics of 'public works' were identified, viz. the primary objective was generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives.

2.20 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA): The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) are formed by the State Governments. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

2.21 Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. In this report, the various indicators of employment and unemployment have been presented in the usual status approach. The procedure adopted to arrive at the usual status is given below.

2.21.1 Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 related to persons classified as workers and codes 91-97 and 99 to those not in the labour

force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons).

2.21.2 Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively short period (but not simultaneously), which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively short period was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

2.21.3 Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

2.22 Industry of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2008 was used.

2.23 Conceptual Framework of Key Employment and Unemployment Indicators

2.23.1 **Labour force participation rate (LFPR):** LFPR is defined as the number of persons in the labour force per 1000 persons.

2.23.2 **Worker Population Ratio (WPR):** WPR is defined as the number of persons employed per 1000 persons.

2.23.3 **Proportion Unemployed (PU):** It is defined as the number of persons unemployed per 1000 persons.

2.23.4 **Unemployment Rate (UR):** UR is defined as the number of persons unemployed per 1000 persons in the labour force (which includes both the employed and unemployed).

2.23.5 Key employment-unemployment indicators are derived as follows:

activity profile		key indicators
activity status (code)	category of persons	
11, 12, 21, 31, 41, 51	workers	1. Worker Population Ratio (WPR): $\frac{\text{no. of employed persons}}{\text{total population}} * 1000$
81	unemployed	2. Proportion Unemployed (PU): $\frac{\text{no. of unemployed persons}}{\text{total population}} * 1000$ 3. Unemployment Rate (UR): $\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000$
11-81	labour force	4. Labour Force Participation Rate (LFPR): $\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000$
91, 92, 93, 94, 95, 97,99	not in labour force	

Chapter Three

Summary of Findings

CHAPTER THREE

SUMMARY OF FINDINGS

3.0 Introduction

3.0.1 The NSS 68th round was conducted during July 2011 to June 2012. In this round, along with collecting information on various facets of employment and unemployment in India, information on 'household religion' was also collected on different religions viz. *Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism, Zoroastrianism* and *others*. The religion of the head of the household, as reported by the informant, was considered as the religion of the entire household irrespective of the actual religion followed by individual members. Discussions in this Chapter are centred on the all-India estimates of various indicators of employment and unemployment among persons of different religious groups viz. *Hinduism, Islam, Christianity, Sikhism* and the rest (*Jainism, Buddhism, Zoroastrianism* and *others*) referred to as '*Others*' which are referred to as major religious groups. Results of NSS 61st round (July 2004- June 2005) and 66th round (July 2009- June 2010) are also presented at all-India level for some of the indicators. The estimates for the State/UTs are given at the end of this chapter.

3.0.2 It may be noted that the scope of the survey being all households without special focus on major religious groups, sample design was not tailored to netting in religious groups. Thus the reliability of the results is critically dependent on the sample size of households of different religious groups which happened to be netted in a general-purpose representative sample of households. It may be noted that the number of sample households for a particular religious group in a State/UT may not be adequate enough in providing sufficiently reliable estimates of the various indicators and therefore, the estimates for the religious groups for the State/UT are to be used after taking due account of the sample number of households for different religious groups of the State/UT. This caution is sounded upfront for the interpretation of State level results for different religious groups.

3.0.3 The scheme of presentation of this chapter is as follows:

- i) As an overview, estimates of households, population and their rural-urban composition by household types, land possessed and cultivated by households of major religious groups are given in Section 1.
- ii) Details regarding literacy, attainment of educational level, current attendance in educational institutions for major religious groups are presented in Section 2.
- iii) In Section 3, employment and unemployment particulars of persons of major religious groups are presented.

3.1 Households and Population

3.1.1 Estimated/surveyed number of households and persons

3.1.1.1 To study employment and unemployment situation of persons among major religious groups, it is important to have an idea of the sample sizes based on which the survey results/estimates have been developed. Table S3.0H presents the number of households surveyed and Table S3.0P presents the number persons surveyed in NSS 68th round (July 2011 - June 2012) for major religious groups for each State/UT and at the all-India level with rural-urban break-up. The Tables show that there are a good number of States/UTs where the number of surveyed households/persons for some religious groups like Sikhs are rather low.

3.1.1.2 The survey was spread over 12,737 FSUs (7,469 villages and 5,268 urban blocks) covering 1,01,724 households (59,700 in rural areas and 42,024 in urban areas) and enumerating 4,56,999 persons (2,80,763 in rural areas and 1,76,236 in urban areas). The number of households surveyed¹ at the all-India level in rural areas for the Hindus were 45,565, for the Muslims were 7,141, for the Christians were 4,177, for the Sikhs were 1,346 and for Others were 1,471. In urban areas the number of households surveyed for the Hindus were 31,470, for the Muslims were 6,135, for the Christians were 2,754, for the Sikhs were 747 and for Others were 917. The number of persons surveyed at the all-India level in rural areas for the Hindus were 2,10,103, for the Muslims were 37,497, for the Christians were 19,846, for the Sikhs were 6,646 and for Others were 6,671. In urban areas number of persons surveyed for the Hindus were 1,26,419, for the Muslims were 31,114, for the Christians were 11,575, for the Sikhs were 3,329 and for Others were 3,798.

Statement 3.1: Estimated number of households and number of persons for major religious groups during 2011-12

all-India estimates	(Figures in Lakh)					
	Hinduism	Islam	Christianity	Sikhism	Others	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
rural						
number of households	1449.13 (69.7)	192.77 (64.0)	35.35 (61.4)	28.55 (72.8)	15.56 (55.8)	1721.35 (68.8)
number of persons	6433.29 (72.7)	962.87 (64.0)	146.08 (65.0)	137.65 (75.4)	64.41 (55.9)	7744.30 (71.2)
urban						
number of households	628.97 (30.3)	108.23 (36.0)	22.19 (38.6)	10.65 (27.2)	12.31 (44.2)	782.36 (31.2)
number of persons	2421.58 (27.3)	542.26 (36.0)	78.56 (35.0)	44.95 (24.6)	50.90 (44.1)	3138.26 (28.8)
rural+ urban						
number of households	2078.10 (100)	301.00 (100)	57.54 (100)	39.20 (100)	27.87 (100)	2503.71 (100)
number of persons	8854.88 (100)	1505.14 (100)	224.63 (100)	182.59 (100)	115.31 (100)	10882.56 (100)

Ref: Table R1 and R2 of Appendix A

Note: 1. Figures in brackets give percentage share of rural/urban areas.

2. Figures may not be additive due to rounding.

3.1.1.3 Statement 3.1 gives the estimates of number of households and number of persons as obtained from NSS 68th round (July 2011- June 2012) for major religious groups. As per the survey estimates, about 1088 million people stayed in 250 million households in India. Statement 3.1 shows that about 68.8 per cent of the households belonged to rural India and accounted for nearly

¹ In urban areas, for 1 sample household, household religious group was not reported.

71.2 per cent of total population. 69.7 per cent of Hindu households were in rural areas with 72.7 per cent of persons, 64 per cent of Muslim households were in rural areas with 64 per cent of persons, 61.4 per cent of Christian households were in rural areas with 65 per cent of persons and 72.8 per cent of Sikh households were in rural areas with 75.4 per cent of persons.

3.1.2 Distribution of households and population by religious group

3.1.2.1 Statement 3.2 presents per 1000 distribution of households by major religious groups separately for rural and urban areas over different NSS rounds at the all-India level. The corresponding figure for each State/UTs is given in Table S3.2. Similarly, Statement 3.3 presents per 1000 distribution of persons of major religious groups for different NSS rounds at the all-India level and the corresponding figures for each State/UT are given in Table S3.3.

3.1.2.2 From Statement 3.2 and Statement 3.3, it is seen that during 2011-12, in rural India, Hinduism was followed by about 84.2 per cent of household consisting of about 83.1 per cent of population whereas in urban India, 80.4 per cent of households followed Hinduism consisting of 77.2 per cent of population. In rural India, Islam was followed by about 11.2 per cent of household consisting of about 12.4 per cent of population whereas in urban India, 13.8 per cent of households followed Islam consisting of 17.3 per cent of population. Nearly 2.1 per cent of households consisting of about 1.9 per cent of population in rural India and 2.8 per cent of households consisting of 2.5 per cent of population in urban India followed Christianity.

3.1.2.3 Statement 3.4 gives the average household size for the major religious groups as obtained from NSS 68th round. It is seen from Statement 3.4 that during 2011-12, in both rural and urban

areas, the average household size for Muslims (5.0 each) was the highest among all the religious groups. In both rural and urban areas, the average household size was the lowest among Christians (4.1 in rural areas and 3.5 in urban areas). In general, the household size in rural

areas was higher than or equal to that in urban areas.

3.1.2.4 Statement 3.5 gives the sex ratios (number of females per 1000 males) for Hindus, Muslims and Christians during 2004-05, 2009-10 and 2011-12. It is seen from Statement 3.5

Statement 3.5: Sex ratios (number of females per 1000 males) for major religious groups in NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds all-India

that the sex ratio among Christians was the highest among these religious groups in both rural and urban areas. During 2011-12, in rural areas, the sex-ratio of Hindus (953) was lower than that of Muslims (980) and in urban areas, sex ratio was 921 among Hindus and 911 among Muslims.

3.1.3 Distribution of Households by Household Type

3.1.3.1 The nature and type of work from which a household derives its major income is an important indicator of the activity pattern of its members. In this survey, major income of the household was worked out depending on the income from economic/ non-economic activities pursued by the members of the households during the 365 days preceding the date of survey. On the basis of the source of major income, sample households were categorised into different *household types* (details in Chapter Two). The distribution of households by *household type* for major religious groups in rural and urban areas are given in Statements 3.6R and 3.6U respectively. The corresponding estimates for each State/UT are presented in Table S3.6.

3.1.3.2 *In rural areas:* Statement 3.6R shows that, during 2011-12, proportion of households with major source of income from *self-employment* was the highest among all the sources of income for all the major religious groups. About 49.8 per cent of households had major source of income from *self-employment* followed by *casual labour* (34.5 per cent) and *regular wage/ salary earning* (9.6 per cent). Proportion of households, having major source of income from *self-employment*, was almost at the same level among Hindus (49.9 per cent), Christians (49.8 per cent) and Muslims (49.2 per cent). Christians had the highest proportion of households having major source of income from *regular wage/ salary earning* (16 per cent) among all the religious groups and had the lowest proportion of households deriving major income from *casual labour* (24.5 per cent).

Statement 3.6R: Per 1000 distribution of households for major religious groups by household type in NSS 68th (2011-12) round

major religious groups	household type								
	self-employed in			regular wage/ salary earning	casual labour			others	all (incl. n.r.)
	agriculture	non-agriculture	sub-total		agriculture	non-agriculture	sub-total

all (incl. n.r.)	343	155	498	96	210	135	345	61	1000

Ref: Table R2 of Appendix A

3.1.3.3 *In urban areas:* Statement 3.6U shows that during 2011-12, proportion of households deriving major income from *regular wage/ salary earning* was the highest followed by *self-employment* and *casual labour*. In urban areas, proportion of households having *self-employment* as the major source of income was the highest among the Muslims (50 per cent) while *regular wage/ salary earning* was the highest for Christians (45.8 per cent). Sikhs had the lowest proportion of households with *casual labour* as the major source of income (4.1 per cent) among all the major religious groups.

Statement 3.6U: Per 1000 distribution of households for major religious groups by household type in NSS 68th (2011-12) round

0.005-0.40	465	634	537	590	395	487	
0.41-1.00	171	129	162	65	166	165	
1.01-2.00	117	54	107	106	160	110	
2.01-4.00	67	36	47	93	59	64	
4.01 & above	29	12	15	85	35	28	
all	1000	1000	1000	1000	1000	1000	

Note: (i) The households with size class of land possessed 'less than 0.001' hectares comprise households which (a) possessed some land less than 0.001 hectares, (b) did not possess any land and (c) reported no information on land possessed.

ii) The size class of land possessed '0.005 - 0.40 hectares' included households with land possessed 0.005 - 0.404 hectares; the size class '0.41 - 1.00 hectares' included households with land possessed 0.405 - 1.004 hectares and similarly the other classes.

Ref: Table R3 of Appendix A

3.1.4.1 *Land possessed by different religious groups:* The distribution of households in rural India by size class of land possessed for each major religious group, as obtained from NSS 68th round (July 2011- July 2012), is presented in Statement 3.7. The corresponding distribution for each State/UT is given in Table S3.7. It is seen from Statement 3.7 that, among all the land possessed classes, proportion of households possessing land in the size class '0.005-0.40' hectares was the highest for all the religious groups. It was 46.5 per cent of households for Hindus, 63.4 per cent for Muslims, 53.7 per cent for Christians and 59 per cent for Sikhs. Among the specific religious groups, proportion of households possessing land less than 0.001 hectares (including the households who had reported no information on land), was the highest for households belonging to Christianity (about 5.9 per cent). It is also seen that the proportion of households possessing land of size 4.01

hectares or more was the highest for *Sikh* households (about 8.5 per cent) and lowest among Muslims (1.2 per cent).

3.1.4.2 *Land cultivated by different religious groups*: Information on land cultivated by the households during the agricultural year (AY) 2010-11, i.e., July 2010 to June 2011 was also collected through employment and unemployment Schedule of 68th round of NSSO. The distribution of rural households in India by size class of land cultivated for major religious groups is given in Statement 3.8. The corresponding distribution for each State/UT is given in Table S3.8. It is seen that during the agricultural year 2010-11, proportion of households cultivating land more than 4.00 hectares was the highest for Sikhs (8.7 per cent) and lowest among Christians (0.7 per cent).

Statement 3.8: Per 1000 distribution of households for major religious groups by size class of land cultivated during the agricultural year July 2010- June 2011						
size class of land cultivated (hectares)	major religious groups					rural

all	1000	1000	1000	1000	1000	1000

Note: (i) The households with size class of land cultivated 'less than 0.001' hectares comprise households which (a) cultivated some land less than 0.001 hectares, (b) did not cultivate any land and (c) reported no information on land cultivated.

(ii) The size class of land cultivated '0.005 - 0.40 hectares' included households with land cultivated 0.005 - 0.404 hectares; the size class '0.41 - 1.00 hectares' included households with land cultivated 0.405 - 1.004 hectares and similarly the other classes.

Ref: Table R4 of Appendix A

3.1.5 Age distribution of persons

3.1.5.1 Statement 3.9 presents the distribution of persons of major religions by 5-year age groups, separately for different categories of persons during 2011-12. Among the specific religious groups, proportion of persons in the age group 0-14 years was the highest among Muslims (38.5 per cent for rural males, 36.1 per cent for rural females, 32.8 per cent for urban males and 30.8 per cent for urban females) and proportion of persons in the age group 15-59 years was the highest among Sikhs (61.5 per cent for rural males, 64.5 per cent for rural females, 68.4 per cent for urban males and 70.7 per cent for urban females).

3.2 Literacy and Educational Level in the Population

3.2.1 Distribution of persons by Education Level

3.2.1.1 Statement 3.10 presents per 1000 distribution of persons of age 15 years and above by their general educational level for major religious groups. The corresponding results for the State/UTs have been given in Table S3.10.

3.2.1.2 It is seen from Statement 3.10 that among persons of age 15 years and above proportion of *not-literates* was the lowest for Christians (14.6 per cent for rural males, 23.7 per cent for rural females, 5.7 per cent for urban males and 9 per cent for urban females). Among the major religious

groups, proportion of persons of age 15 years and above with educational level *secondary and above* was the highest for Christians for rural males (36.2 per cent) and rural females (31.1 per cent) and for urban females (62.6 per cent) whereas for urban males it was the highest for Sikhs (67.6 per cent).

3.2.2 Current Attendance in Educational Institutions

3.2.2.1 Information on current attendance in educational institutions was collected for each person of age below 30 years from the selected households. Persons were classified as attending or as not attending and if not attending, it was ascertained whether ever attended or never attended. Those who were attending were classified according to the level of current attendance. In Statement 3.11, the current attendance rate in educational institutions per 1000 persons of major religious groups for different age-groups has been presented for 2011-12. The corresponding results for the State/UTs have been given in Table S3.11. Current attendance rate for any age group is defined as the number of persons of that age group attending educational institution per 1000 of persons in that age group. In general it is seen that the current attendance rates in the age group 0-29 years in educational institutions were higher among males than among females across all the religious groups. Current attendance rate was 54 per cent for rural males, 46.4 per cent for rural females, 55 per cent for urban

males and 51.2 per cent for urban females. Statement 3.11 shows that among the specific religious groups, current attendance rates in educational institutions among persons of age 0-29 years were the highest among Christians in both rural and urban areas (58.5 per cent for rural males, 51.7 per cent for rural females, 61.5 per cent for urban males and 56.8 per cent for urban females) and lowest among Muslims (48.7 per cent for rural males, 42.1 per cent for rural females, 47 per cent for urban males and 46.3 per cent for urban females).

Statement 3.11: Current attendance rates in educational institutions per 1000 persons by age-group for major religious groups in NSS 68th (2011-12) round

3.3 Labour Force, Employment & Unemployment

3.3.1 *General*: From the data collected through the quinquennial surveys on employment and unemployment, four different estimates of the employment and unemployment indicators can be generated based on the three approaches adopted for classification of persons by activity statuses. These are:

- (i) number of persons employed/ unemployed or in the labour force according to the *usual status* (ps) i.e., by considering usual principal activity only,
- (ii) number of persons employed/ unemployed or in the labour force according to the *usual status* (ps+ss) i.e., by considering usual principal and subsidiary activity together,

- (iii) number of persons employed/ unemployed or in the labour force according to the *current weekly status* (cws) approach, and
- (iv) number of person-days employed/ unemployed or in the labour force according to the *current daily status* (cws) approach

For the purpose of this report, estimates of the employment and unemployment indicators for different religious groups have been generated with respect to the *usual status* (ps+ss) where the activity status of a person for the reference period of 365 days preceding the date of survey has been determined on the basis of the usual principal activity and usual subsidiary economic activity of the person taken together.

3.3.2 Labour Force Participation Rate (LFPR) of major religious groups

3.3.2.1 Labour force, or, in other words, the ‘economically active’ persons refers to the population which supplies or seeks to supply labour for production of goods and services and therefore, includes both the ‘employed’ and the ‘unemployed’. The labour force participation rate (LFPR), i.e., the number of persons in the labour force per 1000 persons, presented in Statement 3.12 for all-India, has been measured according to the usual status considering both the principal and the subsidiary statuses among different categories of persons of the major religious groups as obtained from NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds. Corresponding results for each State/ UT has been presented in Table S3.12. Figure 1 shows LFPRs at the all-India level for persons belonging to the major religious groups.

Labour Force Participation Rate (LFPR) is defined as the number of persons in the labour force per 1000 persons.

$$\text{LFPR: } \frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000$$

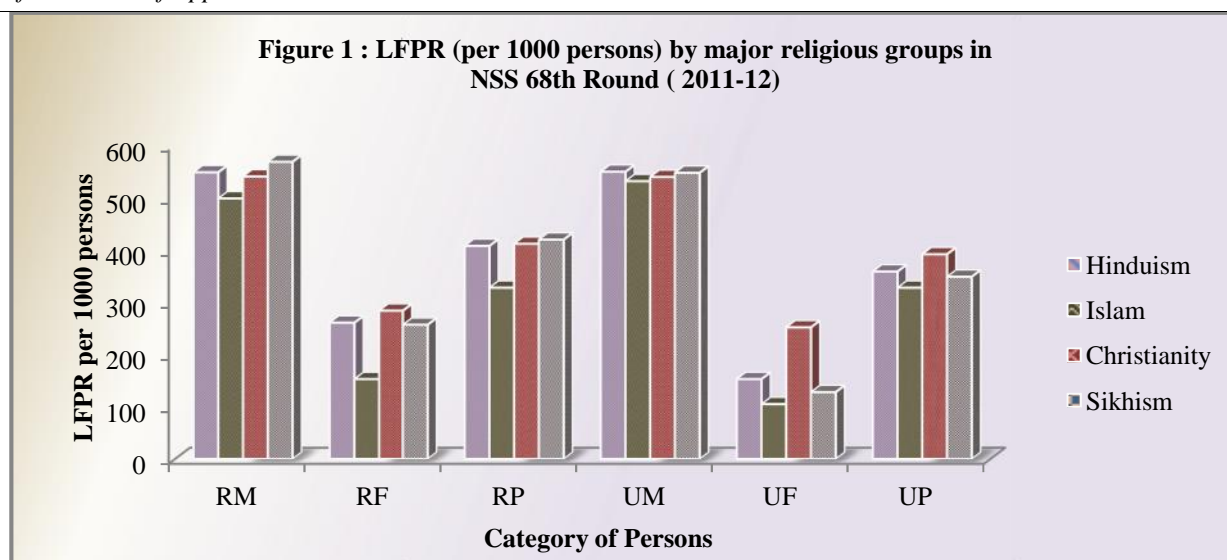

3.3.2.2 It can be seen from Statement 3.12 that during 2011-12, rural-urban differentials existed in the LFPRs for all the specific religious groups with LFPRs in rural areas being on the higher side than in urban areas except among Muslims where LFPR was 33.7 per cent in rural areas compared to 34.2 per cent in urban areas. LFPRs for males were much higher than those for females for all the religious groups and the differences were wider in urban areas than in rural areas. During 2011-12, among the specific religious groups, among males in both rural and urban areas, LFPR was the highest for Sikhs (57.6 per cent in rural areas and 56.8 per cent in urban areas respectively) and for females in both rural and urban areas, LFPR was the highest for Christians (30.4 per cent in rural areas and 27.7 per cent in urban areas respectively) whereas in both rural and urban areas for both males and females LFPR was the lowest for Muslims (51.1 per cent for rural males, 15.9 per cent for rural females, 55.3 per cent for urban males and 10.9 per cent for urban females).

Statement 3.12: Labour force participation rates according to usual status (ps+ss) among persons of major religious groups in NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds

3.3.3 Worker Population Ratios (WPRs) of major religious groups

3.3.3.1 The work force according to the *usual status* (ps+ss) includes persons who (a) worked for a relatively long part of the 365 days preceding the date of survey, and (b) those who did not work for the long part of the 365 days but did some work at least for 30 days during the reference period of 365 days preceding the date of survey. The estimate of usually employed population is a combination of two categories viz. (i) usually employed in the principal status (ps workers) and (ii) not usually employed in the principal status but employed in the subsidiary status (ss workers). The estimates for Worker Population Ratio (WPR) according to usual status (ps+ss) for persons belonging to the major religious groups as obtained from NSS 61st(2004-05), 66th (2009-10) and 68th (2011-12) rounds have been presented in Statement 3.13. Corresponding results for each State/

UT has been presented in Table S3.12. Figure 2 shows WPRs at the all-India level for different categories of persons belonging to the major religious groups.

Worker Population Ratio (WPR) is defined as the number of persons employed per 1000 persons.

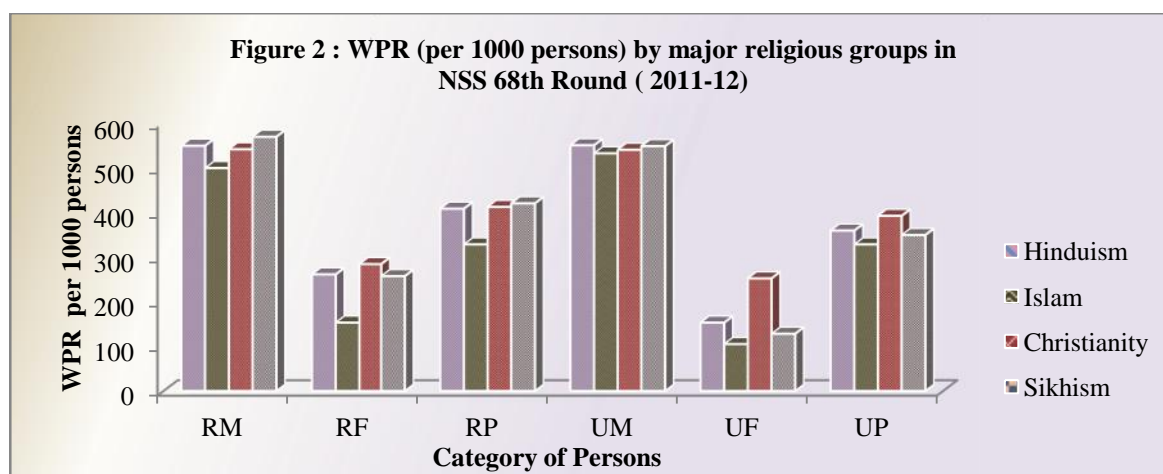

$$\text{WPR: } \frac{\text{no. of employed persons}}{\text{total population}} * 1000$$

Statement 3.13: Worker Population Ratio (WPR) according to usual status (ps+ss) among persons of major religious groups in NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds

all	546	543	549	147	138	166	355	350	365

Ref: Table R8 of Appendix A

3.3.3.2 It can be seen from Statement 3.13 that the rural-urban differentials existed in the WPRs during 2004-05, 2009-10 and 2011-12 with WPRs in rural areas being on the higher side for all the major religious groups except for Muslims during 2011-12 where WPR in both rural and urban areas were at the same level (32.8 per cent). WPRs for males were much higher than those for females for all the religious groups - the differences were wider in urban areas than in rural areas. During 2011-12, among the specific religious groups, for males in rural areas WPR was the highest for Sikhs (56.9 per cent) and in urban areas, it was the highest for Hindus (55 per cent) and for females in both rural and urban areas, WPR was the highest for Christians (28.4 per cent in rural areas and 25.2 per cent in urban areas). In both rural and urban areas for both males and females WPR was the lowest for Muslims (49.9 per cent for rural males, 15.3 per cent for rural females, 53.2 per cent for urban males and 10.5 per cent for urban females).

3.3.4 Distribution of usually employed persons of age 15 years and above by educational level

3.3.4.1 Distribution of usually employed (ps+ss) persons of age 15 years and above by general educational level for the major religious groups as obtained from NSS 61st(2004-05), 66th (2009-10) and 68th (2011-12) rounds are presented here, separately, for rural and urban areas in Statements 3.14R and 3.14U, respectively.

3.3.4.2 It is observed from Statement 3.14R that during 2011-12, in rural areas, majority of male workers belonged to the categories *not literate* (27.8 per cent) or *literate and upto primary* (27.6 per cent) while majority of female workers belonged to the category *not literate* (56.4 per cent) and the category *literate & upto primary* shared another 21.8 per cent of the female workers. About 25.6 per cent of male workers in rural areas had attained the general education level *secondary & above* whereas the corresponding proportion for female workers was only 11 per cent. Among rural males, proportion of workers with level of education *not literate* or *literate and up to primary* was the highest for Muslims (66.7 per cent) and lowest for Christians (42.2 per cent) while proportion of workers with level of education *secondary & above* was the highest for Christians (33.8 per cent) and lowest for Muslims (16.4 per cent). Among rural females, proportion of workers with level of education *not literate* or *literate & upto primary* was the highest for Muslims (81.4 per cent) and lowest for Christians (53.9 per cent) while proportion of workers with level of education *secondary & above* was the highest for Christians (27 per cent) and lowest for Muslims (9.3 per cent).

Statement 3.14R: Per 1000 distribution of usually employed (ps+ss) persons of age 15 years and above by general educational level for major religious groups in NSS 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds

*including all the religions

Ref: Table R9 of Appendix A

3.3.5.2 Statement 3.15R shows that during 2011-12, in rural areas, female participation in work activities was lower compared to males across all major religious groups and educational levels. WPR for males of age 15 years and above was the highest for the general educational level *literate and up to primary* (89.2 per cent) and for this level of education WPR was the highest among Hindus (89.5 per cent) and lowest among Christians (82.6 per cent). WPR for females was the highest for educational level *not literate* (41.8 per cent) and for this educational level WPR was the highest for Hindus (43.9 per cent) and lowest for Muslims (25.7 per cent). Among rural males with level of education *secondary & above*, WPR was the highest for Christians (72.1 per cent) and

lowest for Muslims (62.1 per cent) and for females with educational level *secondary & above*, WPR was the highest for Christians (33.6 per cent) and lowest for Muslims (16.9 per cent).

Statement 3.15U: WPR according to usual status (ps+ss) among persons of age 15 years and above for different level of general education for major religious groups in NSS 61 st (2004-05), 66 th (2009-10) and 68 th (2011-12) rounds

3.3.5.3 Statement 3.15U shows that during 2011-12, in urban areas, significant gender differential existed in participation in work activities like in rural areas. WPR for males of age 15 years and above was the highest for the general educational level *literate and up to primary* (84.7 per cent) and for this level of education WPR was the highest for Christians (85.9 per cent) and lowest for Sikhs (78.1 per cent). WPR for females was the highest for educational level *graduate and above* (27.9 per cent) and for this level of education WPR was the highest for Christians (50.2 per cent)

and lowest for Muslims (22.2 per cent). Among urban males with level of education *secondary & above*, WPR was the highest for Sikhs (71.7 per cent) and lowest for Christians (66.5 per cent) and for females with educational level *secondary & above*, WPR was the highest for Christians (30.4 per cent) and lowest for Muslims (10.5 per cent).

3.3.6 Distribution of usual status (ps+ss) workers by status in employment

Statement 3.16: Per 1000 distribution of usually employed (ps+ss) persons by status of employment for major religious groups during 2011-12

Ref: Table R8 of Appendix A

3.3.6.1 In Statement 3.16, distribution of usually employed persons (ps+ss) by status in employment is given for major religious groups during 2011-12 at all-India level. It is seen from Statement 3.16 that majority of workers in rural areas were *self-employed*. In rural areas, the proportion of *self-employment* among male workers was about 54.5 per cent and it was the highest for Christians (56.6 per cent) and among female workers about 59.3 per cent were *self-employed* and the share of *self-employed* was the highest among Sikhs (79 per cent). In rural areas, a significant proportion of workers (about 35 per cent) in both males and females were engaged as casual labour. Among males in rural areas, share of *casual labour* was the highest for Muslims (37.3 per cent) and lowest among Christians (27.4 per cent) while among females, share of *casual labour* was the highest among Hindus (36.6 per cent) and lowest among Sikhs (14.8 per cent). Among rural males and females, proportion of *regular wage/salaried employment* was the highest for Christians (16.1 per cent for males and 14 per cent for females).

3.3.6.2 Statement 3.16 shows that during 2011-12 in urban areas, share of *self-employed* and *regular wage/ salaried employees* were almost the same: among male workers 41.7 per cent were *self-employed* compared to 43.4 per cent of *regular wage/salaried employees* and among female workers shares of *self-employed* and *regular wage/salaried employees* were 42.8 per cent each. For

males, proportion of workers engaged in *self-employment* was the highest for Muslims and Sikhs (52.8 per cent each) and for females it was the highest for Muslims (61.3 per cent). Among urban males and females, proportion of *regular wage/salaried employment* was the highest for Christians (49.4 per cent for males and 64.7 per cent for females).

3.3.7 Unemployment Rate (UR)

3.3.7.1 The estimates of unemployment rate (UR) i.e., number of persons unemployed per 1000 persons in the labour force, according to the *usual status (ps+ss)* are presented in Statement 3.17 during 2004-05, 2009-10 and 2011-12, for major religious groups at the all-India level.

Unemployment Rate (UR) is defined as the number of persons unemployed per 1000 persons in the labour force (which includes both the employed and unemployed).

$$\text{UR: } \frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000$$

3.3.7.2 It is seen from Statement 3.17 that during 2011-12, unemployment rates across all the religious groups in rural areas were on the lower side than those in urban areas for both males and females. During 2011-12, among the specific religious groups, unemployment rate in both rural and urban areas was the highest for Christians (4.5 per cent in rural areas and 5.9 per cent in urban areas) and lowest for Sikhs in rural areas (1.3 per cent) and Hindus in urban areas (3.3 per cent).

Statement 3.17: Unemployment rate (number of estimated persons unemployed per 1000 persons in the labour force) according to usual status (ps+ss) for major religious groups during 2011-12, 2009-2010 and 2004-2005

Appendix B

Note on Sample Design and Estimation Procedure

APPENDIX - B

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Introduction

1.1 The 68th round (July 2011-June 2012) of NSSO was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. The period of survey was of one year duration starting on 1st July 2011 and ending on 30th June 2012. The survey period of this round was divided into four sub-rounds of three months' duration each - 1st sub-round: July to September 2011; 2nd sub-round: October to December 2011; and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 Census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/sub-blocks (sbs) from these FSUs.

2.2 *Selection of the first-stage units:* The sampling frame and the sampling technique used for selection of the FSUs are stated in the following paragraphs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 Census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks of phase 2007-12 constituted the sampling frame.

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising all rural areas of the district and
- (ii) urban stratum comprising all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population Census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification:* Procedure followed for sub-stratification in each of rural and urban sectors are stated below.

2.2.3.1 *Rural sector*: If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

2.2.3.2 *Urban sector*: If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS of phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS of phase 2007-12.

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per *Census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per Census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4. Equal number of samples was allocated in each of the four sub-rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For the urban sector, FSUs were selected from each stratum/sub-stratum by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples were allocated among the four sub rounds.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The procedures followed for selection of USUs within an FSU are stated in the remaining paragraphs of this sub-section.

2.3.1 *Formation and selection of hamlet-groups/sub-blocks:* Sample FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Haridwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hgs)/ sub-blocks (sbs) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and was termed as hg/ sb 1; one more hg/sb was selected from the remaining hamlet-groups/ sub-blocks by simple random sampling (SRS) and was termed as hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. For the FSUs where no hg/sb formation was done, the hg/sb number was assigned as 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Formation of second stage strata (SSS) and allocation of households in different SSS:* For employment and unemployment survey of 68th round of NSSO, all households listed in the selected FSU/hamlet groups/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in each of rural and urban areas and the number of households surveyed from each of the three SSS are specified below:

SSS	composition of SSS	No. of households surveyed	
		FSU without hg/sb formation	for each hg/sb - for FSUs with hg/sb formation
Rural			
SSS 1	relatively affluent households	2	1
SSS 2	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3	other households	2	1
Urban			
SSS 1	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	households having MPCE of middle 60% of urban population (A MPCE B)	4	2
SSS 3	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

2.3.4 In the rural areas, identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like refrigerator/ washing machine etc.; any member as doctor/ advocate/ high salaried job/ ownership of large business etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of 10 or more cattle, buffaloes and camels. In the urban areas, two cut-off points 'A' and 'B' (in Rs.) were determined from NSS 66th round data for each NSS region in such a way that top 10% of the population had MPCE more than 'B' and bottom 30% of the population had MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey, a total of 8 households were selected from each FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 68th round along with the number of villages/blocks actually surveyed and number of persons enumerated in employment and unemployment survey are given for different states and union territories in Table B1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs are briefly indicated below:

3.1 Notations:

s = subscript for s -th stratum

t = subscript for t -th sub-stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i -th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block ($d = 1, 2$)

j = subscript for j -th second stage stratum in an FSU/ hg/sb [$j = 1, 2$ or 3]

k = subscript for k -th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$; and

$= (D - 1)$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village used for selection

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum

H = total number of households listed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X}, \hat{Y} = estimates of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the t -th sub-stratum of s -th stratum.

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) of a stratum (s):

3.2.1 rural areas:

Estimate of population total (Y) of the characteristic y for the j -th SSS of a sub-stratum within a stratum denoted by \hat{Y}_j is obtained as

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t -th sub-stratum of s -th stratum denoted by \hat{Y}_{st} is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum (\hat{Y}_{sm}) is obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.2.2 urban areas:

Estimate of aggregates for j -th second stage stratum of a stratum (\hat{Y}_j) is obtained as

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t -th sub-stratum of s -th stratum denoted by \hat{Y}_{st} is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum (\hat{Y}_{sm}) is obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.5 *Estimates of Ratios:* \hat{Y} and \hat{X} being the overall estimates of the aggregates Y and X for two characteristics y and x, respectively at the State/ UT/ all-India level, the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

3.6 *Estimates of Error:* The estimated variances of the above estimates are obtained as follows:

3.6.1 *For aggregate \hat{Y} :*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6.2 *For ratio \hat{R} :*

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

3.6.3 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in each State/UT

CENTRAL		*
STATE		

**GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY OFFICE
SOCIO-ECONOMIC SURVEY
SIXTY-EIGHTH ROUND: JULY 2011 – JUNE 2012
SCHEDULE 10: EMPLOYMENT AND UNEMPLOYMENT**

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward /inv. unit /block:
3. tehsil/town:*	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household							
item no.	item	code			item no.	item	code
1.	srl. no. of sample village/block				11.	sub-sample	
2.	round number	6		8	12.	FOD sub-region	
3.	schedule number	1	0	0	13.	sample hg/sb number (1/2)	
4.	sample (<i>central-1, state-2</i>)				14.	second-stage stratum number	
5.	sector (<i>rural-1, urban-2</i>)				15.	sample household number	
6.	NSS region				16.	srl. no. of informant (as in col. 1, block 4)	
7.	district				17.	response code	
8.	stratum				18.	survey code	
9.	sub-stratum				19.	reason for substitution of original household (code)	
10.	sub-round						

Codes for Block 1

item 17: response code:

informant: *co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.*

item 18: survey code: household surveyed: *original -1, substitute -2, casualty -3.*

item 19: reason for substitution of original household:

informant busy -1, members away from home -2, informant non-cooperative -3, others -9.

* tick mark (√) may be put in the appropriate place.

[2] particulars of field operation												
srl. no.	Item		investigator/assistant superintending officer				supervisory officer (s)					
(1)	(2)		(3)				(4)					
1.	i) name (block letters)											
	ii) code											
2.	date(s) of :		DD	MM	YY	DD	MM	YY				
	(i) survey/ inspection											
	(ii) receipt											
	(iii) scrutiny											
	(iv) despatch											
3.	number of additional sheets attached											
4.	total time taken to canvass (in minutes)	Schedule 10										
5.		block 8 of Schedule 10										
6.	whether the schedule contains remarks (yes -1, no-2)		(i) in block 9/ 10									
			(ii) elsewhere in the schedule									
7.	signature											

[9] remarks by investigator/assistant superintending officer

[10] comments by supervisory officer (s)

[3] household characteristics										
1.	household size						7.	land owned as on the date of survey (0.000 hectares)		
2.	principal industry (NIC-2008)	description:					8.	land possessed as on the date of survey (0.000 hectares)		
		code (5-digit)					9.	land cultivated (including orchard and plantation) during July 2010– June 2011 (0.000 hectares)		
3.	principal occupation (NCO-2004)	description:					10.	whether the household has MGNREG job card (yes-1, no-2)		
		code (3-digit)					11.		number of MGNREG job cards issued to the household	
4.	household type (code)						for rural areas, if 1 in item 10,			
5.	religion (code)					12.		whether any member of the household has any bank/post office account [#] (yes-1, no-2)		
6.	social group (code)									

Note: 1 acre = 0.4047 hectare, 1 hectare=10, 000 sq. metre

#: Including accounts held in bank/post offices for payment of wages earned in MGNREG work.

Codes for Block 3

item 4: household type:

for rural areas: self-employed in: agriculture-1, non-agriculture -2; regular wage/salary earning-3, casual labour in: agriculture-4, non-agriculture -5; others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

Codes for Block 4

col. (3): relation to head:

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): marital status:

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): educational level - general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:

never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;

ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;

currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kindergarten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): **type of institution:** government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (11): **whether currently registered with any placement agency:** registered: only in government employment exchanges-1, only in private placement agencies-2, in both government employment exchanges and private placement agencies-3; not registered -4.

col. (12): whether receiving/received any vocational training:

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): whether worked in MGNREG works during last 365 days:

worked-1, sought but did not get work-2, did not seek work-3.

[4] demographic particulars of household members														
srl. no.	name of member	relation to head (code)	sex (male-1, female - 2)	age (years)	marital status (code)	educational level		for persons of age 0-29 years, current attendance in educational institution		for persons of age 15 to 45 years, whether currently registered with any placement agency (code)	for persons of age 15 to 59 years		for persons of age 18 years and above in rural households with MGNREG job card,	
						general (code)	technical (code)	status of current attendance (code)	for codes 21-43 in col. 9, type of institution (code)		whether receiving/ received any vocational training (code)	for codes 1 & 2 in col. 12, field of training (code)	whether registered in any MGNREG job card (yes-1, no-2)	for 1 in col. 14, whether worked in MGNREG works during last 365 days (code)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)

Codes for Block 5.1

col. (3): **status:**

worked in h.h. enterprise (self-employed): *own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, renters, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.*
