## FOREWORD

Promoting gender equality has been a key priority of the Government and is also plays a focal role in the Sustainable Development Goals (SDG) Agenda 2030. Gender statistics cuts across all areas of official statistics and provides a lens for policy makers to evolve targeted strategies to address gaps and bridging the gender-based disparities. The National Statistical Office has been bringing out "**Women and Men in India**" as an annual publication since 1995 and the current issue is the twenty first in the series. In each release, efforts are made to improve its coverage and presentation by incorporating latest available information in different domains of the Government and also based on the inputs and feedback of the varied users. In the current issue, information on a minimum set of gender indicators has been incorporated in the publication so as to accelerate existing efforts to generate internationally comparable gender indicators on health, education, employment, entrepreneurship and asset ownership.

I am confident that this publication would be useful to planners, policy makers, researchers and academicians to recognize the impact of policy interventions and suggest measures to reduce gender disparities as India moves towards achieving the Sustainable Development Goals.

We look forward to comments and suggestions for improving the quality and coverage of information presented in this publication.

## PREFACE

Gender equality has been widely recognized as a prerequisite for achieving national and international development goals. Gender statistics provide the present status of the socioeconomic situation of women and men, and girls and boys. It's also providing an essential tool for raising awareness about gender issues and highlighting concerns about gender disparities.

The National Statistical Office (NSO) has endeavored to focus in this publication on such crucial statistical indicators of socio-economic relevance as are deemed best in portraying gender inequality, gender bias and gender discrimination. The statistical tables of these indicators provide footprints of progress of the country for tracking by national and international agencies. NSO has been bringing out a publication entitled "Women and Men in India" on annual basis. The current issue is the twenty first in the series and efforts have been made to improve its coverage and presentation by incorporating latest available information published by the different Ministries/Departments/Organizations.

The publication has been prepared in the Social Statistics Division of the National Statistical Ofce under the overall supervision and guidance of Dr. Shailja Sharma, Additional Director General. I wish to place on record my sincere appreciation for the team of officers for their contribution in bringing out this publication.

I hope that the publication would be useful to the users and feedback on improving future publications are solicited.

(Tapas Kumar Sanyal)

### MESSAGE

The publication 'Women and Men in India' presents a holistic view of the situation of women in India and includes data on major indicators pertaining to women and men. In the Beijing Declaration adopted in the Fourth World Conference on Women (1995), participating Governments "determined to advance the goals of equality, development and peace for all women everywhere in the interest of all humanity". Government of India too, recognizes that development cannot be sustainable or equitable unless it accounts for gender, and women in particular would be the worst casualties of such unfair progress. It is well known that women's issues are complex, not easily recognized and often reflect conditions of grievous social evils. In developing countries like India women contribute to local and national development in a very big way despite being under-nourished, underpaid and over-worked. Furthermore, when one takes into account the multiple roles of women, one tends to ignore women's non-domestic roles working double-shifts with their unpaid domestic work.

Goal 5 of the Sustainable Development Goals (SDGs) is dedicated to "Achieve gender equality and empower all women and girls". The Inter-Agency and Expert Group on Gender Statistics (IAEG-GS), constituted by United Nations Statistics Division (UNSD), has also developed global minimum set of gender indicators for the national production and international compilation of gender statistics. The country is making efforts to compile appropriate gender statistics to report the data on globally and nationally identified indicators which helps in pursuing the SDG's underlying objective of "Leaving No One Behind".

The Social Statistics Division (SSD) has endeavored to focus in this publication on such crucial statistical indicators of socio-economic relevance as are deemed best in portraying gender inequality, gender bias and gender discrimination. The engendered statistical tables of these indicators provide footprints of progress of the country for tracking by national and international agencies.

I hope the publication would be extremely useful to planners, policy makers, research workers and academicians. Suggestions for improvement in the publication will be highly appreciated.

## HIGHLIGHTS

### Chapter-1: Population and Related Statistics

- As per the report of Technical Group on Population Projections, India's projected population is 129.02 Crore with 48.59% female population in 2016. The projected average annual exponential growth rate of population has declined from 1.63 in 2011 to 1.27 in 2016 and likely to further decline to 1.07 in 2021. During this period, similar trend is also projected for female and for male population. In India, Sex ratio is defined as the number of females per 1000 males in the population, whereas in almost all the UN publications/International publications, it is expressed as males to per 100 females. The projected sex ratio is likely to reach from 943 in 2011 to 945 in 2016 and it may further increase to 948 in 2021. The sex ratio is projected to remain constant at 929 in Urban India while in rural India it is estimated to reach at 958 in 2021 from 949 in 2011. **(Table 1.1)**
- At all India level, the sex ratio has increased from 933 in 2001 to 943 in 2011. During this period 19 States/UTs have recorded significant increase in sex ratio. Notable increase in the sex ratio has been recorded in Delhi (5.7%), Chandigarh (5.3%) and Arunachal Pradesh (5.0%). Contrary to this, Daman & Diu has recorded decline of 12.9% in sex ratio. **(Table 1.3)**
- In 2011, the Sex Ratio is lowest at 908 in the age group 0-19 years, but the same is 1033 for the age group of 60+ years. The economically active age group (15-59) has the sex ratio of 944. **(Table 1.5)**
- In 2011, religion wise sex ratio for Hindus, Muslims, Christians, Sikhs, Buddhists and Jains was 939, 951, 1023, 903, 965 and 954 respectively. **(Table 1.7)**
- Based on SRS, sex ratio at birth was 896 in 2015-17 as against 898 in 2014-16. In rural areas, the ratio was 898 in 2015-17 as compared to 902 in 2015-17 and in urban areas it was 890 in 2015-17 as compared to 888 in 2014-16. **(Table 1.9)**
- Women's mean age at marriage at all India level in 2017 is 22.1 years and the same in rural and urban areas are 21.7 years and 23.1 years respectively. The women's mean age at marriage has shown a static trend in all the major States and at all India level from 2015 to 2017. **(Table 1.12)**

## Chapter-2: Health Statistics

- In 2017, highest age fertility rate is recorded for the females belonging to the age group 25-29 years at 157.1, while the age specific fertility rate stands at 137.1 for the age group of 20-24 years. It also showed the age specific fertility rate for the age group of 20-24 years had decreased from 174.9 to 137.1 during 2014 to 2017. Total Fertility Rate (TFR) for the country has come down to 2.2 in 2017 after being stable at 2.3 for the last three years from 2014 to 2016. **(Table 2.1)**
- As per SRS 2017, the infant mortality rate has decreased from 40 in 2013 to 33 in 2017. From 2013 to 2017, the infant mortality rate has decreased by 20 point in the state of Mizoram followed by 18 point in Dadar & Nagar Haveli, 14 point in Jammu & Kashmir and 13 point in Himachal Pradesh. Similarly, the infant mortality rate has increased by 10 point in the state of Arunachal Pradesh followed by 3 point in Tripura and 2 point in Manipur during the same period. **(Table 2.3)**
- Maternal Mortality Ratio (MMR) has declined from 301 in 2001-2003 to 122 in 2015-17. During the span of 15 years from 2001-03 to 2015-17, the states of Uttar Pradesh, Assam, Rajasthan, Bihar and Madhya Pradesh has significantly reduced maternal mortality rate by 301 points, 261 points, 259 points, 206 points and 191 points respectively. Despite this fact these states are far above the national value of MMR at 122. **(Table 2.6)**
- As per SRS 2017, Total Fertility Rate (TFR) for rural India is observed at 2.3 as compared to 1.7 in urban areas. There is a significant difference in the age specific fertility rate of the age group 20-24 years in rural (153.2) and in Urban (101.9) and in the age group of 25-29 years in rural (171.4) and in urban (130.4). **(Table 2.7)**
- As per the NFHS 2015-16 (NFHS-4), the percentage of women who had at least four Ante-Natal Care (ANC) visits during their pregnancy is lowest in Bihar (14.4%) and highest in Andaman & Nicobar Islands (92%) followed by Kerala (90%). **(Table 2.8)**
- As per the NFHS 2015-16 (NFHS-4), 78.9% of live birth in the five years before the survey was delivered in health facility. Nearly 100% Institutional delivery were observed in the States/UT of Kerala, Lakshadweep and Puducherry and lowest in Nagaland (32.8%). **(Table 2.9)**
- As per NFHS-4, female sterilization remains the most popular modern contraceptive method. Among currently married women age 15-49, 36 percent use female sterilization, followed by male condoms (5.6%) and pills (4.1%). **(Table 2.13)**

- As per National Family Health Survey (NFHS) 2015-16, 12.9% of currently married women in the age group 15-49 years could not meet the need for family planning. **(Table 2.14)**
- However, against the total demand for family planning (66.4%) by the currently married women in reproductive age group, 80.6 % of demand satisfied was achieved. Of which, the share of percentage of demand satisfied by modern methods was 71.9%. **(Table 2.15)**
- As per the NFHS 2015-16 (NFHS-4), 3% of males and 5.1% of females in the age group 15-49 years were found to be obese. In males, highest obesity was found in the Andaman & Nicobar Island (8.1%) followed by Goa (7.7%) and Andhra Pradesh (7.7%) and lowest in Jharkhand (1.2%). Similarly, in females, highest obesity was found in the Chandigarh (14.9%) followed by Lakshadweep (14.6%) and Andhra Pradesh (10.3%) and lowest in Meghalaya (1.7 %). **(Table 2.17)**
- As per NSS 75<sup>th</sup> round (July 2017- June 2018) on Household social consumption on Health, the percentage of persons that reported as ailing (PPRA) in last 15-days period is 13.5% (Female) and 10.1% (Male) in urban areas, while the same percentage is 9.9% (Female) & 8.0% (Male) in rural areas. **(Table 2.19)**

### **Chapter-3: Education**

- In India, the literacy rate has increased to 77.7 in 2017 from 72.98 in 2011. It is observed that the male and female literacy in 2017 is at 84.7 and 70.3, respectively. **(Table 3.1)**
- As per NSS 75th Round (July, 2017- June, 18) the literacy rate for persons of age 7 years and above is observed as 73.5 and 87.7 in rural and urban areas respectively. The gender gap in rural is 16.5 while this gender gap is 9.4 in urban areas. **(Table 3.2)**
- As per NSS 75th Round (July, 2017- June, 18), the gender gap is highest for Rajasthan (23.2), followed by Bihar (19.2) and Uttar Pradesh (18.4). In urban areas, the highest gender gap is in Bihar (20.2) followed by Rajasthan (16.5). In rural areas, the highest gender gaps are observed in Rajasthan (25), Uttar Pradesh (20.1) and Bihar (14.9). **(Table - 3.4)**
- As per NSS 75th Round (July, 2017- June, 18), only 8.3% of the females of age 15 years & above by highest level of education have successfully completed graduation and above level of courses. While 12.8 % of males of age 15 years and above by highest level of education, have successfully completed graduation and above level of courses. **(Table 3.11)**

- As per NSS 75th Round (July, 2017- June, 18), the average no. of years completed on formal education by male with level of education below primary and above is 9.7 years, while for females this average is at 8.9 years. **(Table – 3.12)**
- As per NSS 75th Round (July, 2017- June, 18), 81.8 % of females' student that are pursuing education upto 10th standard and this percentage of males is 81.1 %. The Humanities is the most preferred course for both females (53.9 %) and males (46.4 %). **(Table – 3.13)**
- As per NSS 75th Round (July, 2017- June, 18), the Humanities (53.9%) has the highest percentage of female students among various general courses as compared to Science (28.2%) and Commerce (17.8%). **(Table – 3.13)**
- As per NSS 75th Round (July, 2017- June, 18), 41.2 % of females in the age group 3 to 35 years are currently attending education and this percentage for males is 46.2 %. In the age group 3 to 35 years, 16.6 % females are never enrolled while 11.0 % males are not enrolled. **(Table – 3.16)**
- In the age group 3 to 35 years, among the never enrolled persons, 13.6 % females and 14.9 % males were never enrolled in education due to financial constraints. 11.7 % females and 1.5 % males were never enrolled as they were engaged in economic activities. **(Table - 3.18)**
- As per NSS 75th Round (July, 2017- June, 18), persons in the age group 3 - 35 years ever enrolled, 30.2 % of females are currently not attending education due to engagement in domestic activities. For males, 36.9 % of ever enrolled males in the 3 - 35 years' age group are not attending education due to engagement in economic activities. **(Table 3.19)**
- As per NSS 75th Round (July, 2017- June, 18), only 4.5 % males and 3.1 % females are pursuing technical/professional courses. In urban, 8.3 % of male and 6.3 % females are pursuing technical/professional courses. **(Table – 3.21)**
- As per NSS 75th Round (July, 2017- June, 18), the highest percentage of male (41.6 %) and females (28.2 %) are pursuing engineering among the students pursuing technical/professional courses. **(Table – 3.22)**
- As per NSS 75th Round (July, 2017- June, 18), among the students pursuing technical/professional courses, medicine has the highest 59.8 % of students are females. In education, the percentage of females among the students pursuing education is 59.6 %. **(Table – 3.23)**

- In 2018-19, among the foreign students enrolled in higher education, 31.69 % are females. The percentage of female foreign students enrolled is highest for Malaysia (64.12 %) followed by Sri Lanka (55.19 %). **(Table - 3.25)**
- The Gender Parity Index (GPI) in higher education has increased from 0.94 in 2016-17 to 0.97 in 2017-18. There has been an increase in GPI from 2016-17 to 2017-18 in SC and ST categories as well. **(Table 3.27)**
- The percentage of persons dropped out among ever enrolled persons of age 3 to 35 years for different levels of last enrolment is highest for females and males in Secondary level is 19.2 and 20.4 respectively. **(Table 3.30)**

#### **Chapter-4: Participation in Economy**

- Periodic Labour Force Survey results indicate that the worker population ratio for females in rural sector was 17.5 and 51.7 for males in 2017-18. In Urban sector, the ratio is 14.2 for females and 53.0 for males. In both rural and urban areas, WPRs for females were considerably lower than WPRs for males. **(Table 4.1)**
- As per the Periodic Labour Force Survey (2017-18), Worker Population Ratio (WPR) for persons in the age group of 15 years and above, is 22.0 and 71.2 for females and males respectively. Meghalaya (55.5) followed by Chhattisgarh (52.8) and Himachal Pradesh (50.0) have maximum WPR for females and Meghalaya, Madhya Pradesh and Chhattisgarh have for males in rural areas whereas Sikkim followed by Meghalaya and Andhra Pradesh for females and Andhra Pradesh followed by Gujarat and Chhattisgarh for male have maximum WPR in urban area. **(Table 4.2)**
- As per Periodic Labour Force Survey 2017-18, majority of the females (57.7%) and males (57.8%) workers in usual status (ps+ss) were self-employed in so far as rural area is concerned, whereas majority of females (52.7%) and males (54.7%) were regular wage/salaried employee in urban area. Casual labour among the female workers and male workers were still high in rural area as compared to urban area. **(Table 4.4)**
- In rural and urban areas, both females and males workers had shown the declined trend in agriculture sector from 38th round of NSS to (1983) to PLFS (2017-18). Similarly, both females and males workers showed the increasing trend in usual status of in Trade, Hotel & Restaurant sector in the same periods. **(Table 4.6)**

- Labour Force Participation Rate (LFPR) for male workers in age 15+ years above had declined from 79.8% to 75.8% from 2011-12 to 2017-18. LFPR for female workers in the same age group also decreased from 31.2% to 23.3% during the same period. LFPR for male and female workers in age 15+ years for both rural and urban areas has also declined from 2011-12 to 2017-18. **(Table 4.8)**
- As per PLFS (2017-18), the unemployment rate for women in rural area was 3.8 as against 5.7 for men whereas it was 10.8 and 6.9 for women and men in urban areas in the age group of 15 years and above. **(Table 4.14)**
- At All India level, average wage/salary earnings received by the casual labours in current weekly status shows the increasing trend in all the quarters of the PLFS (2017-18). However, average wage/salary earnings received by female workers of regular wage/salary employees is still lagging behind the average earnings received by male workers in both rural and urban areas. Similar trend was also observed in average earnings received per day by casual labourers engaged in works other than public works. **(Table 4.15.1 to 4.15.4)**
- As per the data of Basic Statistical Returns of Scheduled Commercial Banks in India, in rural area 37.03 percent of the bank accounts are held by female population while in Semi-Urban, Urban and Metropolitan areas, the percentage is around 34%. However, the proportion of amount held therein is greater in case of metropolitan females at 32.77% than that of female population of other areas. **(Table 4.16)**

## **Chapter -5: Participation in Decision Making**

- The percentage of women representation in Central Council of Ministers has decreased from 17.8 % in 2015 to 10.5 % in 2019. **(Table 5.1)**
- There were 437.8 million women electors in Seventeenth Lok Sabha Election (2019) which had increased from 397.0 million in sixteenth Lok Sabha Elections (2014). The difference between the percentage of men and women electors participated in election was decreased from 1.46 to 0.17 from Sixteenth to Seventeenth Lok Sabha General Election. **(Table 5.2)**
- There was an upward trend in the number of females contested as well as females elected from 14<sup>th</sup> to 17<sup>th</sup> Lok Sabha General Election. The data also shows an upward trend in number of males contested while a downward trend in number of males elected during the same period. **(Table 5.3)**

- Percentage turnout for female voters in 2019 general elections was more than 60% in all the States/UTs except in the States/UTs of Bihar, Uttar Pradesh, Maharashtra and Jammu and Kashmir. **(Table 5.4)**
- The highest number of women member of parliaments in 17<sup>th</sup> Lok Sabha is 11 each from Uttar Pradesh and West Bengal followed by Maharashtra with 8 members. The total number of women participation in the 17<sup>th</sup> Lok Sabha is 78 which constitute 14% of the total seats. **(Table 5.5)**
- At all India level, the women participation in the State Assemblies was 11% against the total elected representatives in the State Assemblies. The States of Bihar (14%) and Chhattisgarh (14%) shows maximum participation of women in the State assemblies followed by West Bengal (13%), Rajasthan (12%), Jharkhand (12%), and Gujarat (12%). **(Table 5.6)**
- The highest number of female judges is 9 each in Madras, Bombay and Punjab & Haryana High Court. It is also evident from the table that there are no female judges in Manipur, Meghalaya, Tripura and Uttarakhand. **(Table 5.7)**
- The women participation in Panchayati Raj Institutions is highest in Rajasthan (56.49%) followed by Uttarakhand (55.6%) and Chhattisgarh (54.785). In terms of elected women, the highest female representation is found in Uttar Pradesh (272733) followed by Madhya Pradesh (196490) and Maharashtra (121490). **(Table 5.8)**

## **Chapter-6: Impediments in Empowerment**

- Share of Cruelty by Husband or his Relatives has reduced from 35% in 2015 to 27% in 2018. Out of total crime committed against women in 2018, 60% cases reported for Cruelty by Husband and Relatives (27%), Assault on women with intent to outrage her modesty (24%) and Kidnapping & Abduction (19%). **(Table 6.1)**
- During 2018, police had disposed off 66% cases out of the total cases of crime against women investigated by the police. The maximum cases disposed off by the police under the crime head of Cruelty by husband and relatives followed by Assault on women with intent to outrage her modesty, kidnapping & abduction of women and rape. **(Table 6.2)**
- During 2018, crime rate was the highest for cruelty by husband and relatives followed by assault with intend to outrage modesty and Kidnapping & Abduction. Among the States/UTs, the highest share of crime against women was in Uttar Pradesh (15.71% of

all India crime). 7% of the total crimes were recorded against women. Assam recorded the highest i.e., 23% of the total crime against women whereas Tamil Nadu (1%) recorded the lowest. **(Table 6.4)**

- As per the data of NFHS, 30.9 percent of ever married women aged 15-49 years experienced physical or sexual violence committed by their husband. In Manipur 52.6 % of the women experienced such violence followed by Andhra Pradesh, Telangana and Bihar with 43, 42.9 and 42.7 percent respectively. In Sikkim only 2.2% of women experienced physical or sexual violence by their husband. **(Table 6.6)**
- In 2015-16, 26.8 % of women aged 20-24 years got married by exact age of 18 years. Bihar had the maximum proportion of such women. Kerala, Punjab and Lakshadweep were among the States/UTs having better off situation. **(Table 6.9)**
- As per the survey on Disability conducted by M/o Statistics & Programme Implementation, percentage of differently-abled person is higher for male than females at 2% in rural as well as urban areas. **(Table 6.10)**
- In females, the highest disability was found in Odisha (3.0%) followed by Kerala (2.9%), Andhra Pradesh (2.8%) and Punjab (2.8%) whereas it is lowest in the States/UTs of Daman & Diu (0.7%) and Manipur (0.7%). In males, the highest disability was found in Odisha (3.5%) followed by Kerala (3.4%), Andhra Pradesh (3.1%) and Puducherry (2.8%) whereas the lowest in Manipur (0.9%) followed by Meghalaya (1.0%) and Nagaland (1.0%). **(Table 6.12)**
- The highest percentage of type of disability found in females was locomotors disability (1.2%) followed by locomotors (1.2%). **(Table 6.13)**

Notes: Sex ratios have been calculated as the proportion of females to 1000 males.

Average annual Exp growth rate has been calculated using the formula  $(1/n \text{ No.of years}) * \ln(\text{This year population} / \text{Population as reported } n \text{ years back})$

2001 population exclude the estimated population of Paomata, Mao Maran and Purul sub-divisions of Senapati district of Manipur.

The population is as on 1st March of the year.

The background of the top half of the slide features two stylized silhouettes of human profiles facing each other. The silhouette on the left is colored with a gradient from light orange to pink, while the one on the right is a gradient from light blue to green. They are set against a background of soft, radiating light rays that transition from orange on the left to green on the right.

## Chapter 2:

# Health Statistics

Table 2.1: Important Women Related Vital Rates in India for last 4 Years

Indicators	2014			2015			2016			2017

unmet need for family planning refers to fecund women who are not using contraception but who wish to postpone the next birth (spacing) or stop childbearing altogether (limiting). Specifically, women are considered to have unmet need for spacing if they are:

-At risk of becoming pregnant, not using contraception, and either do not want to become pregnant within the next two years, or are unsure if or when they want to become pregnant. -Pregnant with a mistimed pregnancy. -Postpartum amenorrhoeic for up to two years following an unwanted birth and not using contraception. Women who are classified as infecund have no unmet need because they are not at risk of becoming pregnant. Unmet need for family planning is the sum of unmet need for spacing plus unmet need for limiting.

**Table 2.15 : Proportion of Women of Reproductive Age who have their Need for Family Planning Satisfied with Modern Methods**

<b>% Increase in 2017 over 2011</b>	12.2%	5.6%	10.1%	4.7%	3.9%	4.3%	8.8%	4.7%	6.5%

Source: Census of India, Office of Registrar General, India.

Notes: 1. For 1951, the population male, female and persons refers to effective literacy rates and the break up of Rural, Urban and male-female components are crude literacy rates.

2. Literacy rates for 1951, 1961 and 1971 relate to population aged 5 years and above whereas literacy rates for 1981, 1991, 2001 and 2011 relate to the population aged 7 years and above.

The 1981 literacy rates exclude Assam where the 1981 Census could not be conducted.

The 1991 literacy rates exclude Jammu & Kashmir where the 1991 Census could not be conducted due to disturbed conditions.

The 2001 literacy rates exclude Mao Maram, Paomata and Purul Sub-divisions of Senapati district of Manipur.

**Table 3.2 : Literacy rates for persons of age 7 years and above for rural & urban population**

	Rural				Urban				Total
	Male	Female	Person	Gender Gap (Rural)	Male	Female	Person	Gender Gap (Urban)	Gender Gap (Rural + Urban)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
<b>2007-08 (NSS 64<sup>th</sup> round)</b>	77.0	56.7	67.0	20.3	89.9	78.1	84.3	11.8	18.2
<b>2014 (NSS 71<sup>st</sup> round)</b>	79.8	61.3	70.8	18.5	91.1	80.8	85.9	10.3	16.1
<b>2017 (NSS 75<sup>th</sup> round)</b>	81.5	65.0	73.5	16.5	92.2	82.8	87.7	9.4	14.4

## Chapter 7:

# Minimum Set of Gender Indicators

## CHAPTER-7: MINIMUM SET OF GENDER INDICATORS

The Minimum Set of Gender Indicators has been developed by **Inter-Agency and Expert Group on Gender Statistics (IAEG-GS)** constituted by United Nations Statistics Division (UNSD). The Minimum Set of Gender Indicators was agreed by the United Nations Statistical Commission in its 44<sup>th</sup> Session in 2013 (E/CN.3/2013/33). The Minimum Set of Gender Indicators is to be used across countries and regions, for the national production and international compilation of gender statistics.

The indicators are organized into five domains namely (i) Economic structures and access to resources (ii) Education (iii) Health and related services (iv) Public life and decision-making and (v) Human rights of women and child. Each domain addresses one or more of the Beijing Platform for Action critical areas of concern.

The minimum set of gender indicators comprising of 52 quantitative indicators and 11 qualitative indicators addressing relevant issues to gender equality and /or women's empowerment. As of the April 2019, the minimum set of gender indicators have been classified in three tiers namely;

- 34 indicators fall under the **Tier 1 indicator** (Tier 1: indicator addresses relevant issues related to gender equality and/or women's empowerment; is conceptually clear and has an international established methodology and standards; and data are regularly produced by countries, with sufficient coverage to allow tracking progress over time
- 13 indicators fall under the **Tier 2 indicator** (Tier 2: indicator addresses relevant issues related to gender equality and/or women's empowerment; is conceptually clear and has an international established methodology and standards; but data are not regularly produced by countries
- 4 indicators fall under the **Tier 3 indicator** (Tier 3: indicator addresses relevant issues related to gender equality and/or women's empowerment; but with no international established methodology or standards; data are not regularly produced by countries
- 1 indicator falls under both **Tier 1** and **Tier 2**.

Out of 52 quantitative indicators of the minimum set of gender indicators, 22 quantitative indicators are aligned with global SDG indicators. Information related to many of these quantitative indicators of the minimum set of gender indicators have been given in the Women and Men in India, the mapping of which has been given in **Appendix-I**.

**Mapping of Minimum Set of Gender Indicators recommended by Inter-Agency Expert Group on Gender Statistics (IAEG-GS) with the Tables of Women and Men in India**

## DEFINITIONS AND EXPLANATIONS

### Annual Exponential Population Growth Rate

$r = (\text{Ln } P(t+10) - \text{Ln } P(t)) / 10$ , where Ln stands for natural logarithm

$P(t)$  = Initial population;  $P(t+10)$  = Population after 10 years

### Age- Specific Fertility Rate (ASFR)

Age-specific fertility rate is defined as the number of live births in a specific age group of women per thousand female populations of that age group (ORGI).

### Age- Specific Mortality Rate (ASMR)

Age-specific mortality rate is defined as the number of deaths in specific age group per thousand populations in the same age-group in a given year (ORGI).

### Crude Birth Rate (CBR)

The Crude Birth Rate (CBR) is defined as the number of live births per thousand population.

### Crude Death Rate (CDR)

The Crude Death Rate (CDR) is defined as Number of deaths per thousand population.

### Dropout Rate

A dropout is a pupil who leaves school before the completion of a school stage or leaving at some intermediate or non-terminal point of a given level of education (MHRD).

### Definition of Literate

A person aged 7 years and above who can both read and write with understanding in any language was taken as literate. A person, who can only read but cannot write, is not literate. It is not necessary that to be treated as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille were also treated as literates. All children of age 6 years or less were treated as illiterate by definition, irrespective of their status of school attendance and the capability to read and write (ORGI).

**Literate**

A person is considered literate if he/she can read and write a simple message in at least one language with understanding (NSS 75<sup>th</sup> round).

**Definition of Youth**

Youth are defined as those aged 15 to 29 in the National Youth Policy (2014) (NYP-2014).

**Disability**

“Person with disability” means a person with long term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders his full and effective participation in society equally with others. “Barrier” means any factor including communicational, cultural, economic, environmental, institutional, political, social, attitudinal or structural factors which hampers the full and effective participation of persons with disabilities in society (NSS 76<sup>th</sup> Round).

**Effective Literacy Rate (ELR)**

The total percentage of the population of an area at a particular time aged seven years or above who can read and write with understanding. Here the denominator is the population aged seven years or more (ORGI).

**Expectation of Life at Birth**

The expectation of life at birth is the average number of years a person is expected to live under prevailing mortality conditions (ORGI).

**General Fertility Rate (GFR)**

General fertility rate is defined as number of live births per thousand women in the age group (15-49 years) in a given year (ORGI).

**Gross Enrolment Ratio (GER)**

The Gross Enrolment Ratio (GER) for a class-group is the ratio of the number of persons in the class-group to the number of persons in the corresponding official age-group (MHRD).

### **Gender Parity Index (GPI)**

- The Gender Parity Index (GPI) is the ratio of the number of female students enrolled at primary, secondary and tertiary levels of education to the corresponding number of male student in each level. Thus GPI (based on GER) which is free from the effects of the population structure of the appropriate age group, provides picture of gender equality in education (MHRD).

### **Infant Mortality Rate (IMR)**

Infant mortality rate refers to the measurement of mortality in the first year of life and is computed by (relating) the number of deaths under one year of age divided by 1000 live births in a given year (ORGI).

### **Labour Force Participation Rate (LFPR)**

LFPR is defined as the percentage of persons in the labour force in the population (PLFS).

$$\text{LFPR} = \frac{\text{No. of Employed Persons} + \text{No. of Unemployed Persons}}{\text{Total Population}} * 100$$

### **Maternal Mortality Ratio (MMR)**

Maternal Mortality Ratio refers to the number of women who die as a result of complications of pregnancy or childbearing in a given year per 100,000 live births in that year (ORGI).

### **Proportion Unemployed (PU)**

It is defined as the percentage of persons unemployed in the population (PLFS).

$$\text{PU} = \frac{\text{No. of Unemployed Persons}}{\text{Total Population}} * 100$$

### **Sex Ratio**

Sex ratio has been defined as the number of females per 1000 males in the population. It is expressed as 'number of females per 1000 males' (ORGI).

### **Scheduled Commercial Banks**

All banks which are included in the second schedule to the Reserve Bank of India Act, 1934 are Scheduled Banks. These banks comprise Scheduled Commercial Banks and Scheduled Co-operative Banks (RBI).

### **Total Fertility Rate (TFR)**

Total fertility rate is defined as the average number of children expected to be born per woman during her entire span of reproductive period assuming that the age specific fertility rates, to which she is exposed to, continue to be the same and that there is no mortality (ORGI).

### **Usual Status Approach (ps+ss)**

The labour force according to the usual status (ps+ss) is obtained by considering the usual principal status and the subsidiary status together. The estimate of the labour force in the usual status (ps+ss) includes (a) the persons who either worked or were available for work for a relatively long part of the 365 days preceding the date of survey and also (b) those persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey (PLFS).

### **Unemployment Rate (UR)**

UR is defined as the percentage of persons unemployed among the persons in the labour force (PLFS).

$$\text{UR} = \frac{\text{No. of Unemployed Persons}}{\text{No. of Employed Persons} + \text{No. of Unemployed Persons}} * 100$$

### **Worker Population Ratio (WPR)**

Worker Population Ratio (WPR) is defined as the percentage of employed persons in the population (PLFS).

$$\text{WPR} = \frac{\text{No. of employed Persons}}{\text{Total population}} * 100$$

## **Explanatory Note for PLFS**

The Periodic Labour Force Survey (PLFS) was designed with two major objectives for measurement of employment and unemployment. The first was to measure the dynamics in labour force participation and employment status in the short time interval of three months for only the urban areas in the Current Weekly Status (CWS). Secondly, for both rural and urban areas, to measure the labour force estimates on key parameters in both usual status (ps+ss) and CWS. To achieve these twin objectives as well as providing estimates on additional aspects of data (such as hours worked) which were not available from the quinquennial rounds of NSSO, certain changes were introduced in the sampling design and structure of the Schedule of inquiry.

The users of this report are being apprised of the various aspects of the survey methodology, data collection mechanism and sampling design of PLFS vis-à-vis the earlier Employment and Unemployment quinquennial rounds of NSSO so that these can be considered while comparing results from earlier employment and unemployment surveys which were undertaken along with the NSS Consumer Expenditure Surveys. The results of the PLFS thus need to be understood and used in the context with which the survey methodology and sample selection has been designed.
